Jump Seen in Corn Acreage In County

Floyd County farmers, casting about for something profitable to do with their lay-out cotton and wheat acres, this spring may come up with several thousand acres of hybrid corn.

Although corn calls for lots of water and fertilizer there are several farmers who have already got their seed ready to plant and a few have put seed in the ground.

Of the county's dealers in hybrid

corn C. B. Carmack appears to have led the pack in number of bushels sold. His sales figures indicate between 4,000 and 5,000 acres, and the probability that the total acreage may run up to 7,500 acres or so.

PLAINS CORN last year topped all Texas production figures. County Agent Bill G. Rodgers said this week, and corn growers talked to the reporter have indicated they had good yields in this county last year and a fairly good market.

Principal thing in the way of making up their minds on a plan for lay-out acres, according to most farmers, is the question of the kind of a farm bill which may be passed and approved.

One grain dealer-farmer said this week that of course all the cotton acreage would be planted up to the hilt, and more than likely the major part of the remaining acreage would go into forage feeds.

A few farmers are going the cattle route and plan to fill silos with corn ensilage.

ONION PLANTINGS for the season have already been made. It appears the acreage will be increased somewhat over last year. At least more farms will have onions than last year. Actual acreage may climb little.

Meanwhile the 25 to 35 farmers who are interested in the possibility of getting into vegetable production are still dickering in the hope of getting a market contracted for their crops.

At their meeting Thursday night of last week in the high school cafeteria at Lockney the vegetable market organization, represented by J. A. Baker.

Tom Sussard, who went in for vegetables last year to some extent and hopes to do the same this year, said that nothing definite was arrived at in the meeting, but conversations are continuing this week.

As yet planting time is not crowding on most of the crops that are being contemplated.

They 'Attended' The Antler Quake

Mr. and Mrs. Duncan Hollums and family returned home Monday from Antlers, Oklahoma, where they were guests over the Easter weekend of Mrs. Hollums' mother, Mrs. T. E. Adcock and Mr. Adcock.

They went through the experience of the earthquake there without recognizing it for what it was until after it was all over and done.

Mrs. Hollums was in her mother's home. The dishes rattled and the house sorter weaved momentarily, she said. Mr. Hollums was on the porch fishing a short distance from the house.

The ground trembled and he had a "queer feeling" for the moment. Both thought of heavy road work that was going on a short distance away.

Hollums said it went through his mind that the roadbuilders were using mighty heavy charges in their blasting.

Mrs. Hollums said the experience was similar to that she had had previously in California. "But this is not a quake country and I couldn't be that," was the thought that went through her mind. They did not learn of any damage from the quake if there was any.

Whirlwinds Begin to Show More Class As Young Team Practices

The green and white thinclads of Floydada High School will enter the Hale Center track meet Saturday.

Coach Watson's Whirlwinds are not expected to be particularly strong contenders in the big meet, but might glean a few points if they are feeling good.

The young squad which is also few in number has been training hard and has been showing up better in practice meets the past two weeks. Last Thursday they placed second in a three-way meet at Lubbock which saw Tainoka score 70

Standard Oil Company's Minnie Adams No. 1, four-year-old small oil producer on Survey No. 32, P. D. Adams one-half mile west of Lakeview school and store, is responding normally this week to an acid and sand fracturing treatment last Thursday, Reese Cleveland, of Midland, said, yesterday.

It was recovering at the rate of 90 barrels of oil and acid jelly in 24-hour daily pumping.

Dee Adams, one of the Adams heirs, has charge of the well. He said the daily reports to the Standard's office in Snyder were indicated as "normal" and encouraging by the management.

The well will have to keep making a good showing for 60, possibly 90, days before an offset will be started, was the opinion given by Mr. Cleveland.

To local observers the sand fracturing process was dramatic. It was quickly done after two days of assembling machinery, acidizing fluids and fracturing sand.

IN TWO HOURS and a half the well was dosed with 10-thousand gallons of acid, 10-thousand pounds of fracturing sand, 900 barrels of oil

from the storage tanks at the well, and sealed with 250 barrels of acid jelly.

In the oil fields the operation would have been seen as routine. Here it was quite a show as a quarter of a million dollars worth of motorized fracturing machinery was quickly assembled and crammed three carloads of fluid and sand down the throat of the well at an estimated cost of \$25,000.

THE POROUS EARTH 7,500 feet below drank up the fracturing fluid greedily and for more than 24 hours, while crews re-assembled the pumping machinery, gulped down air from the surface as the acid and sand ate its way into the producing formation.

The pump was started up at 5 o'clock Friday afternoon. It will require several days to recover the fluid that was dumped into the hole. Increased flow was noted until yesterday when the recovery appeared to level off at slightly more than 90 barrels.

The operations are in charge of Standard of Texas crews and officials, Cleveland said.

There is evidence of growth on every side in Floydada and Floyd County and the community has laid a good foundation for the future, but the builders of the area were pled with by Dr. Joe C. Humphrey of Abilene, Friday night to realize and to react wisely to the "terrific impact of change."

"We are in an age of new energy and we must change as the techniques change or lose out in the race," he said. But the old truisms that built America still must be recognized as they were by the founders of the republic. These he said were:

Recognition of the dignity of the individual, the value and worth of the contribution of every person to the common good;

The need to blue print plans carefully and follow through, approaching the community problems in a scientific manner; accepting truth when it is revealed;

Follow cooperative processes, working as a team.

Floydada and Floyd County, as indeed all of west Texas, he said, has made only the beginning. Using the concepts of the early builders we are laying broad foundations. To see the fruit of our labors we must be willing to work.

Dr. Humphrey is academic dean of McMurry College. He was to have been presented by J. M. Wilson Sr., who is, incidentally, chairman of the board of that college. However, Mr. Wilson was ill and his son, J. M. Wilson Jr., presented the speaker.

T. L. Holland, president of the Chamber of Commerce, for the closing year, was master of ceremonies for the evening. He presented the incoming president and both new and old members of the board of directors.

Miss Joy Porter, talented high school senior, favored the gathering with two solos, her coach, Mrs. L. H. Christensen, accompanying at the piano.

Two hundred thirty were present for the event, with guest delegations from Lockney, Plainview, Quanah, Amarillo, Abilene, Lubbock, Waco, Littlefield and Rails.

The Chamber of Commerce has done the leg work for numerous routine efforts in the community during the past 12 months which are not listed among 17 major projects in the brochure of the 12-month period ending in March.

A remarkable record of only two flat failures, against 15 projects accomplished or put into motion on a solid basis, was chalked up by the organization in the 12-month period. President T. L. Holland praised C of C manager, O. M. Watson Jr., for his able work during the year. Members of the board of directors also came in for praise by the retiring president.

MRS. KOENEN WILL SPEND PERIOD WITH BEREFT SISTER

Mrs. Harry Koenen left Wednesday of this week for San Fernando, Calif., to be with her sister, Mrs. George A. Snow, who lost her husband last Thursday after a brief illness.

Burial was made in Oak Ridge Cemetery in Illinois last Saturday. He is survived by his wife, one son and three grandchildren.

His ex-President, T. L. Holland (left) now and president E. C. Carter, of Floydada Chamber of Commerce, who posed last Friday night at the annual Chamber of Commerce banquet for the benefit of the photographer.

As A Farm Woman Thinks

(By Nellie Witt Spikes)

I should like to rise and go Where the golden apples grow, Where below another sky Parrot Islands anchored lie. And, watched by co-katoos and goats,

Lonely Cruises building boats: Where in sunshine reaching out Eastern cities miles about. Are with mosque and minaret Among sandy gardens set. And rich goods from far and near Hang for sale in the bazaar. Where the Great Wall round

China goes. And on one side the desert blows And with bells and voices and drum Cities on the ether hum; Where are forests, hot as fire, Wide as England, tall as spire,

And the negro hunter's huts; Where the knotty crocodile Lies and blinks in the Nile, And the red flamingo flies. Hunting fish before his eyes,

Where in jungles, near and far Man devouring tigers are, Lying close and giving ear. Lest the hunt be drawing near, Or a comer-by be seen Swinging in a palanquin;

Where among the desert sands Beside desert city stada. This is part of a poem by Robert Louis Stevenson. I hope you enjoy it as much as I do. Give you a lift when things grow tiresome as they sometimes do. Even the new moon ceases to be a gypsy's gold ear-ring, and is just a plain old moon lying on its back holding water that every one wants right now; the wind, usually so confidential in its whispering of romance at far corners of the world, has become a screaming woman throwing sand in our faces.

We turn on the fire as we get a bit chilly, then it is too hot and we turn it off. Our muscles, long unused since last fall, are sore and stiff from bending over to set out tiny onions and the ground is as dry as the Sahara desert. The rose hedge is just another place to work and the briars stick. Even my beloved books lose their interest, the many objects I have collected are just dust catchers.

I sit down to write this column, which has always been a happy pleasure. I hope you enjoy it as much as I do. Give you a lift when things grow tiresome as they sometimes do. We turn on the fire as we get a bit chilly, then it is too hot and we turn it off. Our muscles, long unused since last fall, are sore and stiff from bending over to set out tiny onions and the ground is as dry as the Sahara desert. The rose hedge is just another place to work and the briars stick. Even my beloved books lose their interest, the many objects I have collected are just dust catchers.

I sit down to write this column, which has always been a happy pleasure. I hope you enjoy it as much as I do. Give you a lift when things grow tiresome as they sometimes do. Even the new moon ceases to be a gypsy's gold ear-ring, and is just a plain old moon lying on its back holding water that every one wants right now; the wind, usually so confidential in its whispering of romance at far corners of the world, has become a screaming woman throwing sand in our faces.

State Highway Map For 1936 Is Made Ready

AUSTIN, Texas — The new 1936 edition of the Official Highway Travel Map is now available. D. C. Greer, State Highway Engineer, announced in Austin today.

The map has many new features and contains a wealth of information on Texas. Greer said, "Most of the topographical relief was removed from the map last year so that more essential information can be read easily and quickly. The growth of the Texas Highway System at the rate of about 3,000 miles a year has made it necessary to gradually remove some of the less important information to make room for the increased mileage, he said.

In addition to the highways and the mileages between various points, the Travel Map shows state parks with recreational facilities, historical state parks, roadside parks, attitudes, and the Highway Travel Information Bureau. The pictorial side of the map features scenes of general interest both to Texans and out-of-state tourists, with every section of the state represented.

The Austin office of the Highway Department, the 25 district offices and the seven Travel Information Bureaus near the state's border all have maps available for distribution. Special map cards for requesting a map may be obtained at the tax collector's office when license plates are purchased.

Mr. and Mrs. C. L. Berry and children of Spur spent Monday in the parental home of C. L. Berry Sr. of this city. They were returning from a Sunday at Cal Farley's Boys Ranch. They also spent a day with his brother's family, Harold Berry, who is employed in the Amarillo office of Boys Ranch.

Mr. and Mrs. Joe Fisher and family of Lubbock were week-end visitors in the home of her parents, Mr. and Mrs. J. H. Tribble.

and hats to get more of the precious coolness. Back to our row, another weedy one, rest at the other end and back and forth across the field day after day. What a gratified feeling to look over the field at the end of the last row. True some weeds were left but our work was done and we stood at the end of the last row.

Yes, there will be some weeds left when I get to the end of the last row, but there will be many that were put to wither and die, and I pray that the harvest will be good.

Guess you saw the mistake I made week before last. I quoted from Proverbs instead of Psalms as I intended.

The end of the row, how good it was when we went down the hot ground in the field yesterday. When my children were at home we would take our hoes and go to the field. How big and impossible the weedy field looked as we first started in. Down the long row, one at a time, silent at times, but as the weeds thinned how we all talked!

When we got to the end of our row we sat down and waited for the others. Cool water gurgled down our dry throats from the jug well wrapped in gunny sacks and put in the shade. We would sit on the ground and relax.

A bit of seed made a fine pen to write in the sand, or for turning a spade on his back, watching his feet slip wildly in the air before he got righted again. Chewing sweet mesquite grass, anything to do or see for a few restful minutes. How cool the wind blew on our sweat-covered

Why is it, a person never troubled with hayfever, should suddenly develop that aggravating ailment? It is because some change in the quality of the nasal passage tissues has taken place leaving them susceptible to certain substances.

People who already have hayfever should have the condition corrected before hayfever season gets here so as to avoid the irritation and inflammation. Once the inflammation has started the case will generally follow the regular course of the condition. It is therefore important that you locate and correct the cause of your hayfever before it develops.

The condition of bodily tissues is dependent on your nervous system. This is why, thru chiropractic care, your hayfever condition can be corrected.

After a very trying day at the office, the husband was enjoying his pipe and reading the evening paper. His wife who was working on a crossword puzzle suddenly called out: "Henry, what is a female sheep?"

"Ewe," replied her husband, and that's how the fight began.

The Hargis family formerly lived in this city on the Matador highway before moving to 2309 Emory Street, Lubbock, two years ago.

Mr. and Mrs. Troy Hutchins and son, DeWayne, of Lindsey, Okla., were Easter weekend guests in the home of his brother and family, Mr. and Mrs. T. J. Hutchins.

Mr. and Mrs. M. H. Roddam and daughters, Kathryn and Jannette, spent the weekend in Tishomingo, Okla., with Mrs. Roddam's uncle and aunt, Mr. and Mrs. Roy Dale. The group reported a wonderful trip. Everything was so pretty and green with rain part of the time while in Tishomingo.

Mrs. J. E. Horton of this city left yesterday (Wednesday) for an indefinite stay with friends and relatives in Oakland, San Jose and Bakerfield, Calif.

Mrs. Reynolds is the former Pat Spears.

Mary Ruth Guffee and Barbara Roy of Sweetwater, Tenn., were Easter weekend visitors in the home of Mr. and Mrs. S. A. Guffee of the Campbell Community.

VIEWS AND COMMENT

Some dark horse, after all, may run off with the Democratic nomination. And he may be elected. It seems unlikely that a Democrat can win, but since the president has decided upon a Harding-like front porch campaign and continues to deal in platitudes while his lieutenants carry out their own ideas of how the country should be run, a good campaigner could have an outside chance. Democrats, however, are more likely to split into northern and southern groups, and into conservative and liberal camps, and spoil their chances, helping solve the Republican campaign problem.

The Wheat Outlook. The April 1 report of the Santa Fe agricultural agent generally reflects the spring weather conditions on the high plains much better than we can do. So we quote: "High winds, dust storms, wide emperature variations, and a critical moisture situation continued to hold the spotlight on the greater part of the southwestern winter wheat area." "On the high plains south of the Canadian River where heavy February snow fell, wheat and barley have made fair to good development in spite of the high winds and dust." "In parts of the area farmers have been forced to list, hereby abandoning their wheat crop as hyseling becoming ineffective." There it is in about 100 words.

Another wheat sage: "Any time we go into April with some wheat we've always made a little bit of wheat that year, sometimes a lot, depending on the weather."

No Rain Todate. The writer may take an involuntary departure from the community on or before Saturday night, unless he can beat the tar and feather brigade so as to "all it a trip out of town on business. It wasn't rained todate. Saturday night is the lead line. The moon doesn't full again until April 24, and that at 7:40 in the evening. Meanwhile we go into disgrace with both the readers hereof. The cold spell tore up the rain clouds and our dreams all at the same time. You can't say it wasn't a good try."

It Must Rain. For the sake of dry land farmers who have gone down the line on a wheat crop this season the story is about told unless rain falls. This means that some families are going to be looking for a place to work and make their home. Not too optimistic sounding but it is probably better to say it. Still time for the row crop man but we must have a season.

Plenty of Bugs. Last fall's grasshoppers have a big family coming on this spring as soon as it rains. Other bugs also left the eggs for an ample posterity for which the farm lands will furnish dowry. One irrigation farmer said his wells hatched out such a good crop of hoppers last week that long-bill plover flew in and ate so much they couldn't fly out.

They've Paid Dearly. Back in the eighteenth Century the Santa Fe was among many railroads which got land grants for building their roads into new and undeveloped areas. Millions of acres of two-bit land (in the eighties and nineties) came into their ownership as subsidy from the government. Recently it was announced just how much the Santa Fe had been given. The sum ran to 123 million. But there was a joker in the grant. The railway getting the grant had to haul freight at half price for the government, and give other concessions, including a cheaper fare for passengers and a cut price for hauling the mails. The Santa Fe had so much government business during World War I it had the management looking for their hole card. Since the first of the year it has been announced the Santa Fe has their "bill" paid in full. The cost? Over a billion dollars.

Minds of big city people are being poisoned against farmers, we hear. A city housewife no bigger than a minute can carry out \$25 worth of food from the supermarket in her arms and she hears it is because the government is giving subsidies to the farmer and hoarding millions of pounds of food to help increase the price still more. The lady, in her \$25 purchase, had included garden-fresh frozen vegetables, cake mix, warm and serve biscuits; pre-packaged meats and the like. Probably not wise to tell her that a lot of her \$25 went for something more than just food. How to meet her complaints, how to get the farmer problem over to her is a problem in itself. She wouldn't know without being told that the farmer doesn't set the price, that in fact he sells for what the buyer will pay and buys at the seller's price. The time is due when the ill will of the big city consumer must be faced as a fact and something worked out to meet it. Big city consumers have votes—more than we have by a long shot.

Nations which would get the best cuts in the pie that the United States is passing out are taking the cue from the Egyptians, who found it profitable to blackmail us and Britain into financing their hydro-electric plant on the upper reaches of the Nile. It is freely stated that the new dam will open up a vast new fertile area for the production of cotton. Latest is India, which has indicated a clear-cut pro-Soviet, anti-American attitude. It is in the picture that we are now going to hike our give-away to that antagonistic people by 50 per cent. And Pandit Nehru is coming to America to be wined and dined soon. Our State Department is almost hysterical in its insistence on having the funds provided by the congress, so he can soft-talk The Indian when he gets here. The American taxpayer will have to meet the bill for this handout to a people who hold us in scorn.

Surplus of Popcorn. Surpluses are running out of the country's ears, the way we hear it. Surpluses of all the commodities that come from the farm. Now it is even said that there is a surplus of popcorn. However, the report has it the popcorn surplus is due more to the way it is stored than to over-production. A popcorn authority says that sanitation and health authorities are clamping down on popcorn stored in farm bins that rats and mice can get into. They say there is a threat to the public health in popcorn carelessly handled before it gets to the crunch, crunch, gawp, gawp, state.

Date Is May 7. For those who are interested there is quite some weeks left for political aspirants to get their hats in the ring. The new election law puts the final date for filing for a place on a primary ballot as May 7, the first Monday in May. The date formerly was the third Monday in June. The new arrangement gives the county chairman and committee a little more time to get their work done. The old law kept the county chairman in a lather trying to meet the deadlines.

For Safety Sake, the Texas Game and Fish Commission urges that fishermen and boaters generally become more weather conscious. This is vital for persons using the larger lakes. Waters in even small bodies of water can and do become suddenly and violently rough, the warning points out. When this occurs a person inexperienced in boating is at a big disadvantage. At this time many have boats and new ones are being bought along with outboard motors, which give too much speed and add too much weight unless you know what to buy to preserve balance. When the wind blows the disadvantage becomes even more pronounced. Pleasure and fishing boats are nice. They also are dangerous when operated by amateurs, who usually overload them.

A Backward Glance At Farm Income

Texas and U. S. farmers are just like business men—everyone is interested in making a return on invested capital. How did the farmer come out in 1955?

Agriculture demands a big investment in land, improvements, tools and machinery. Last year, the nation's farmers had an equity in farms of about \$8 billion dollars. In addition, farm operators and their families did 11 billion hours of unpaid work on their land.

For this capital investment, and for all this labor, the farmers collected a total of 11 billion dollars in 1955.

This means that if we allow farmers and their families a return of \$1 per hour for their labor, then they had nothing left at all for a return on their investment capital last year.

However, let's say we allow farmers a 3 percent return on their \$8 billion investment. This would be giving them 2.4 billion dollars on their capital.

In such a case, subtracting the capital gain from total income, the farmer would have earned only 74 cents an hour for 11 billion hours of labor.

All this points out a curious situation. It appears that the best thing for farmers to do is to sell out.

Oldsters Must File Claims or Lose Benefits

John G. Hutton, manager of the Lubbock District Office of the Social Security Administration, says that under the Social Security Act monthly benefits may be paid to insured individuals beginning at age 72, regardless of the amount of their earnings from wage or self-employment.

However, to become entitled, these oldsters must file a claim for benefits.

fits. It is important that the insured file promptly on attainment of age 72.

Mr. Hutton also pointed out that there are many persons already age 72 who may be losing benefits because they are not aware of this special consideration of law. These people are urged to contact the Social Security office promptly, as in some cases benefits may be paid retroactively for as many as 12 months. Delayed filing may mean loss of benefits.

Highlights And Delights From State Capitol

Sanford Texas Press
 Battle lines are being drawn for control of the State Capitol. The Democratic convention is a no-holds-barred, toe-to-toe fight.
 When House Speaker Rayburn, leader of Texas liberal forces and Godfather of the Democratic Advisory Council, and U. S. Sen. Lyndon B. Johnson, Texas favorite son candidate for President of the United States, and head of the Texas delegation to the nominating convention, were sanding, chairman of the Democratic State Executive Committee proposed Gov. Alvin D. Tompkins as chairman.
 Tompkins charged that Byron Skelton, chairman of the DAC, had upped the favorite son and the idea that Rayburn is his mouthpiece.

Shivers denounced Rayburn's proposal as a "cynical and calculated effort to divide the conservative democrats of Texas — an attempt to maneuver the senator into the DAC-PAC camp."
 Then he challenged Johnson to denounce liberal-loyalist backing and take a stand for states' rights. Johnson's answer was that he would head only a middle-of-the-road delegation. Not one "from either fringe" — either ultra-conservative or ultra-liberal.

"No one knows better than Allan Shivers that I am not a creature of the ADA, DAC, PAC, NAACP, CIO or any other group he may have named," snapped Johnson. "Nor am I an errand boy of reactionary big business or the Republican party."
 Verbal blasts between Washington and Austin continued. Shivers accused Rayburn of "trying to run Texas from Washington." Rayburn termed Shivers "an angry, confused, irate man on a sinking ship." Adding "I belong to no faction but the Democratic party."

Shivers replied that he had gotten in the boat with Rayburn and Adlai Stevenson in 1952, "we would have lost both the boat and the Tidelands!" He charged Rayburn with "being a Democrat first and an American second."
 Shivers declared he will not pledge himself to support "any nominee," and will hold himself free to vote for the man he considers best for President, regardless of party.

Fencing between Johnson and Shivers was in milder tones, with Shivers concluding that he had no desire to battle with "my old friend, Lyndon Johnson." Without withdrawing his demand for Johnson to state his position on the issues, Shivers said "I would not stand in the way of Texas honoring him as chairman of the delegation or as favorite son."
 Johnson has not said whether he would permit his name to be presented as a favorite son candidate, or whether he would take the chairmanship. He has said, however, that he hopes to be a delegate.

All of which means a show-down fight for control of the Democratic State Convention in Dallas, set for May 22. Liberals have promised a contest there — and if they lose they will attempt to bar the conservatives from the national convention. Rayburn will be temporary chairman of the national convention.

Interposition Approved

Complying with Governor Shivers' request, the Democratic State Executive committee has ordered on the July ballot a referendum on "interposition." This seeks a voters mandate for the Texas Legislature to petition Congress for a constitutional amendment re-establishing and protecting states' rights.
 It is an attack on U. S. Supreme Court decisions, such as the Tidelands, school segregation, federal control over natural gas, etc., which Texas conservatives have branded as an unauthorized invasion of states' rights.

Ineligible for Office?
 C. T. Johnson, who testified five times under oath that he had spent "no more and no less" than \$125 in traveling the length and breadth of Texas while campaigning for Lt. Governor in 1954, now admits spending \$1200 more than he reported.

This exposure resulted from charges by Russell W. Bryant, Italy publisher, that Johnson could not have traveled an admitted 12,000 to 15,000 miles for \$125 (or approximately 1c a mile).
 "There isn't a standard make automobile made that doesn't cost nearly 2c a mile for gas alone," said Bryant. "And Johnson testified under oath that the \$125 included not only gas, oil, tires, batteries, etc., but also such other necessary travel expenses as lodging and meals."
 In admitting the \$1200 additional expenditure Johnson stated that he did not report any expenses under \$10. State law requires the reporting of all expenditures, and the names and addresses of persons with whom more than \$10 is spent.

Qualification of a campaign expenditure prohibits such candidate's name from appearing on the ballot at any succeeding election.

Yarborough After Grassroots Votes

A down-to-earth intensified campaign for governor now is under way by Austin Attorney Ralph W. Yarborough.
 His first official move was a crossroads plea for contributions and support "from the common people who believe in the Democratic form of government."
 Ads appear this week in weekly newspapers throughout Texas soliciting one dollar, or more from small-town contributors. It's a "Dollars for Democracy" appeal.

SHORT SNOOTHS: Atty. Gen. John Ben Shepperd has called for the establishment of a Texas commission to define the boundaries in which the federal, state, county and city government should operate.
 Also advocated is a code of ethics for public officials — those at the local as well as the state level.
 Injunction suits have been filed in Gainesville by the State Bar of Texas, to restrain four non-attorneys from engaging in alleged unauthorized practice of law.

Newspaperman Ed Kilman of the Houston Post is the newest member of the State Parks Board. Supreme Court Justice W. St. John Garwood, a long-time personal friend of Kilman's, administered the oath of office in a ceremony in the Governor's office Tuesday.
 Applications from veterans for the purchase of land are being received by the Veterans' Land Board at the rate of 500 per month.

Yarborough In Governor Race

Ralph W. Yarborough of Austin, pledging to "build a structure of morality" in state government, has announced his candidacy for the Democratic nomination for governor of Texas.
 Yarborough announced a platform "of progress including water conservation, drought relief, higher old age pensions, improved schools with adequate teacher pay and adequate retirement pay, adequate classroom space, a youth development program, a juvenile delinquency program" based on "broad general humanitarian principles." He said he would take his campaign in person "to the people in every corner of this great commonwealth."
 Yarborough made his announcement simply, to the press, in contrast to the statewide radio and television broadcasts of other gubernatorial contenders.

"Humbly I accept," Yarborough said, "the commission of duty you have given me in tens of thousands of messages — to lead the fight for the good name of Texas."
 "The people of Texas want a new state government, free of entangling alliances and partnerships with the outgoing administration. Texas wants a state government free of the policies of the past and capable of independent action."
 Yarborough added: "I pledge the people of Texas the restoration of honor, integrity and dignity in their state government."
 "To every one of the 683,132 Texans who voted and worked with us in the hard campaign of 1954, I extend my thanks and gratitude. I urge each of you, and all Texans who believe in the triumph of honesty and morality, to join us in this crusade for a new administration in Texas."

Pan American Race To Be Shown Here

The first public showing locally of the 1½ hour color sound movie of the 1964 Pan-American Road race is scheduled for the High School Auditorium Monday, April 16, at 8:00 p.m.

The movie, covering the entire 5-day race, was made by K & W Products, Inc. automotive chemical manufacturer. K & W sent a 9-man crew to Mexico to cover the race from start to finish. Included in the film are starts, finishes, dangerous intermediate points, aerial views and a number of thrilling spins, skids and accidents. Cameras mounted in several of the race cars afford the audience the opportunity of "riding" in a race car at speeds up to 150 miles per hour.

The 1964 race was run over a distance of 1,908 miles, starting at Tuxtla Gutierrez, near the Guatemala border, and finishing at Ciudad Juarez, across the Rio Grande River from El Paso, Texas. In its fifth running, the race has truly become an international classic, with 154 entries representing 14 countries.

Admission will be free, but due to the limited seating capacity, it will be necessary to have an invitation. These are obtained from one of the local automobile dealers, garages and service stations who are making this local showing possible. A list of the co-sponsoring dealers will be published at a later date in this paper.

Pan American Race To Be Shown Here

The first public showing locally of the 1½ hour color sound movie of the 1964 Pan-American Road race is scheduled for the High School Auditorium Monday, April 16, at 8:00 p.m.

The movie, covering the entire 5-day race, was made by K & W Products, Inc. automotive chemical manufacturer. K & W sent a 9-man crew to Mexico to cover the race from start to finish. Included in the film are starts, finishes, dangerous intermediate points, aerial views and a number of thrilling spins, skids and accidents. Cameras mounted in several of the race cars afford the audience the opportunity of "riding" in a race car at speeds up to 150 miles per hour.

As sales go up

As sales go up, so do production, salaries and the standard of living — and advertising is a vital factor. By making your shopping easier, by bringing you information on new products, new features, new ideas, advertising moves merchandise and keeps business humming. As a result, our factories work full time and the pickup is felt down the line from plant owner to you, the consumer.

Advertising makes you the boss. To win your favor competing products must constantly be improved; to satisfy your needs new products must always be introduced. And most important, as you buy more, production costs drop ... and so do prices. Every day in many ways, Advertising Benefits You!
