Rankin Lauds Plans For Hwy. Department For Mt. Blanco Road

Former Judge J. M. Rankin, in his column appearing weekly in the Crosby County newspapers, last week-end recaps the good news for the Mt. Blanco area as regards a farm to market road building program.

Plans for new construction that will be in the area with roads east and west was announced ten days ago by the State Highway Department.

"The State Highway Department is finally moving the oldest settlers of Crosby County right up to the pavement," says Judge Rankin.

"The project just announced will start at the Hank Smith crossing and go east to join the road from Wake. That will pass along the south side of the George Smith ranch and within a half mile of the Smith home.

Up on top of the cap there are doubtless a number of other old settlers whupping themselves around with their hats for joy. Blanton Hartzell, Dennis Taylor, the McClures, the Appings and scores of others are happy that this gap in the county road system is to be filled."

The added road mileage ties in with paving to the east, west, north and south to make it convenient for the people in all directions. "Even when it begins raining again," Judge Rankin points out.

Postmaster Edward H. Wester on behalf of the Post Office Department and the National Safety Council presented Safe Driving Awards to Rural Carriers Oliver Allen and Jeff Welborn for 26 years of safe driving; Sherrill L. Powell for four years; William O. Newberry for three years; and Burl Huckabee for two years; and to Fred A. Stewart for one year of safe driving while delivering parcel post packages, on Wednesday, Dec. 12.

Oliver Allen has a total of 39 years of safe driving. Neither of them have had an accident on their routes since beginning postal service. They received 26 year pins, having completed the other 13 and 6 years respectively before the Safety Council started the program. This represents a total of 4,466,904 miles of safe driving for drivers of the Floydada Post Office.

"This is a record we are proud of," said Postmaster Wester.

The National Safety Council's Driver Award is the trademark of professional drivers who have proved their skill in avoiding preventable accidents. Every year since 1930 when the N.S.C. Play Cast Chosen For January Date

The Floydada High School speech department is making plans to present "I Remember Mama" a three-act play, in the near future.

CANDYLAND, THE WINNER in the annual pre-Christmas parade Thursday afternoon, and the Christmas Queen's float, were two of the more than a score of beautiful entries which enterprising local clubs and business houses presented to admiring thousands. Candyland was the entry of White Auto Store, and the Queen's float of the four federated clubs of Floydada, the Rotary and Lions Club. The queen is Vanda Carter, daughter of Mr. and Mrs. E. C. Carter, the princesses, Billy Anne Goode, left, daughter of Mr. and Mrs. Bill Goode, and Janise, daughter of Mr. and Mrs. P. I. Roberts.

Mile Long Parade Is Viewed By Merry Christmas Crowds

Hundreds, upward of two thousand and persons, lined the streets in Floydada Thursday afternoon for the Toyland Parade, formally heretofore the Christmas season.

Despite the postponement occasioned by Tuesday's bluster the parade was nearly a mile in length. Three of the marching units which had planned to participate could not make the postponed date to the disappointment of the crowds. These were the Petersburg and Ralls bands and the Matador school's drum and bugle corps.

Noon-day crowds were good Tuesday, even better than on Thursday. But the float makers could not stand the idea of having their beautiful floats come out of the downtown parade line all tattered and torn. They were cancelling right and left when the committee announced the new date and hour.

The weather man was more kind on Thursday afternoon, although considerable wind whipped the area in the morning hours. It was, after all, a lovely afternoon period when the parade was staged.

Miss Vanda Carter, daughter of Mr. and Mrs. E. C. Carter, rode as Christmas queen in the Toyland Parade.

The election of the parade queen took place two weeks ago when the parade, the 1929 and the 1934 Study Clubs, the Rotary Club and the Lions Club voted on their queen selection.

Candidates nominated for this honor were Miss Janis Roberts, daughter of Mr. and Mrs. P. I. Roberts, Billie Ann Goode, daughter of Mr. and Mrs. W. M. Goode and Miss Carter.

Miss Carter was revealed as queen, as she rode on her throne in the parade Thursday afternoon. A blond hair, blue eyed beauty, Vanda wore a waits length formal of lace and net for the occasion. Her gold crown was presented to her preceding the affair.

Mrs. Roberts and Miss Goode, dressed in beautiful white formal, served the queen as attendants. All girls are outstanding seniors at Floydada High School and rode on the beautiful gold and white float which was built by the Floydada Band Boosters Club for the federated study clubs and the two civic organizations.

The parade was led by City Policeman H. R. Cage and followed by the 96-piece Floydada Whirlwind Band which recently won recognition as a No. 1 marching unit.

Other bands participating in the parade included the 74-piece Crosbyton High School band and the 47-piece band of Lockney High School.

Radio Stations' Party Attended By Seventy-Two

Radio Station KPLD was the official host for a Christmas party of the personnel of four related plain stations, Monday evening at 7:30 o'clock at the Hotel Coffee Shop, Floydada.

Approximately 72 officers and employees and their families of Stations KPAN, Hereford, KTUE, Tulsa, KSML, Seminole, and KPLD Floydada were present for the occasion.

Following the evening meal of turkey and all the trimmings a short program was given by Mrs. Clint Formby of Hereford.

The Christmas motif was carried throughout the decorations of the Coffee Shop. On the head table was a miniature radio tower flanked by Yule-tide decorations.

Each station's personnel had drawn names previously and gifts were exchanged Monday evening.

Saccharin is derived from coal-tar.

Dangerous Walking Habits Decried

Most of the 6000 adult pedestrians killed on the highways last year were more the victims of their own childish antics about than the automobile which struck them down, according to the public education department of the Aetna Casualty and Surety Company.

In "Pedestrians, Grow Up and Live," a new Aetna pamphlet, the company's safety specialists liken the grown-up jaywalker to the child who plays hopscotch in the street. "Many dangerous walking habits reflect childish impulses we have never shed," they say.

Publication of the new safety booklet, which is being distributed by Aetna as a part of its public safety program, coincides with the onset of winter's shorter days, the peak period for pedestrian fatalities.

Among dangerous walking habits which show a juvenile attitude toward safety are crossing against the light, arguing over the right of way, ignoring pedestrian safety areas, stepping from an automobile into traffic, and not paying attention when crossing the street.

There is no better insurance for growing old than growing up, the pamphlet concludes.

The ambitious young missionary asked his guide to take him to a remote section inhabited by cannibals. Upon meeting the tribe's chief, the missionary told the interpreter: "Ask him if he knows anything about religion."

After a bit of grunting and sign language, the interpreter replied: "He says he got a little taste of it when that other missionary was here."

A colonel was transferred to a new command. On reaching his depot, he found stacks of old documents accumulated in the archives of his predecessors, so he wired headquarters for permission to burn them. The answer came back: "Yes, but make copies first."

Skinning Ducks Is Important Step in Preparing For Food

The time-honored method of preparing wild ducks for the table is to pluck, wax, roast and serve them under candlelight so the pinfeathers will not show. Concealed also under the dim lights are the feathers which each shot carries into the meat. But there are times when the appearance and flavor of wild ducks are definitely enhanced by the removal of the skins.

Wayne and Opal Judy of International Falls, Minn., set forth instructions for skinning ducks. Their reasons for removing the skin are five. First, in the case of early-season ducks which are invariably in the pinfeather stage, there are feathers under the skin which are impossible to remove by any waxing or plucking method yet devised. Secondly, ducks badly shot up have feathers under the skin which cannot be seen unless skinning is accomplished. Also, if ducks are to be frozen for a long period of time, the layer of fat directly underneath the skin will turn rancid, imparting a strong "wild" flavor to the entire duck. This layer always adheres to the skin, and when the skin is removed, so also is the fat.

Another reason for skinning is to remove the fishy or strong taste of certain species, and lastly, because skinning is faster, easier and cleaner than plucking.

The first step, of course, is the actual skinning. After you've severed the wings and legs at the joints, insert a knife under the skin of the breast and cut down the center. Peel the skin away, helping it separate from the flesh with a razor. When the skin is off, remove the entrails and wash inside and out well. Clean each shot hole individually.

Then comes the important soaking. Lace a pan of water with about two tablespoons of salt and one of

The landlady brought in a plateful of extremely thin slices of bread which dismayed her hungry men boarders. "Did you cut these, Mrs. Brown?" asked one.

"Yes, I cut them," was the stern reply.

"All right," said the boarder, "I'll deal."

Salesman: "This model has a top speed of 130 miles an hour and she'll stop on a dime."

Prospect: "What happens after that?"

Salesman: "A little putty knife comes out and scrapes you off the windshield."

Mountain Guide: "Be careful not to fall—it's very dangerous. But if you do fall, remember to look to the left. You get a wonderful view."

"What's your idea of harmony?"
"A freckle-faced girl with a polka-dot dress leading a giraffe."

Chest Fund Drive Making Progress

The Floyd County United Chest fund drive is rolling along nicely according to reports coming in to Floydada. A check at the bank early yesterday showed 1222.05 on deposit. Another check for \$250 was still to be marked with most of this expected for the chest.

Toyland Parade

The "Candyland" float entered by White Auto Store was named top winner in the Toyland Parade Thursday afternoon.

The float was built by the Floydada Band Boosters Club under the direction of Mrs. A. Galloway. Working with her were Mr. and Mrs. Ben Galloway, Mr. and Mrs. T. L. Callaway, Mr. and Mrs. William Blair, Mr. and Mrs. Aaron Cartmel, Mrs. Joe Dunn and Mrs. W. W. Trapp.

The Candyland house designed of white with a red roof had the modern features of a house today. Red lollipop flowers and candy cane trees were used as foreground and background for the setting.

Miss Shirley Breed, 9-year old daughter of Mr. and Mrs. Odell Breed of the Lakeview Community, caught the eye of all who were present for the parade, as she sat by the front door of the house. A huge teddy bear was opposite Miss Breed.

Other winners in the parade were Santa's Work Shop entered by the Floyd County Library, featuring members of the Books on Bikes Club dressed as Santa's helpers at North Pole, second place.

Merry-Go-Round entered by the 1936 Study Club, third place; Jack-in-the-Box, entered by the 1936 Study Club, fourth place.

Hitch Your Wagon to a Star of Faith, entered by the Rebekah Lodge No. 77 and The Three Bears won honorable mention.

The floats were judged on originality and most time and work spent to make a good showing for the occasion.

"We cannot boast about doing a whole of a job in our conservation teaching — until seeing a pastured woodlot causes belligerency and witnessing an eroded field brings on heartache." —Ranger Mac

HUNGARIAN RELIEF GIFTS CAN BE MADE TO RED CROSS

Persons interested in taking part in the Red Cross Hungarian relief project may do so by giving directly to the Red Cross. Money may be left at either of the banks in Floyd County and should be marked for this purpose.

Rush Wheeler, Red Cross chairman for Floyd County, said the Hungarian relief was not included in the United Chest budget and was a separate project sponsored by Red Cross. No drive is planned for this county by Red Cross which participates in the United Chest drive.

Those who feel this a worthy cause and would like to have a part in it may make contributions to the bank and mark them so they will go for the intended purpose.

RED CROSS AIDING HUNGARIAN REFUGEES

A Hungarian refugee, one of thousands fleeing to the USA from strife-torn Hungary, is fitted with a coat by a Red Cross worker before leaving Camp Kilmer, N. J. She is Mrs. John Bausen, of Cleveland, Ohio, who with her husband, are sponsoring this young man. The Red Cross, serving sufferers since the beginnings of the uprising, in distribution of food, medicine, clothing and other necessities in Vienna and Budapest, is launching a campaign for \$5,000,000 in this country to meet costs of the mammoth humanitarian program. By the end of the year the Red Cross will be feeding over 200,000 victims daily in Hungary, besides supplying needed clothing, fuel and medical supplies.

Suggestions In Use and Care Of Appliances

Are your electric appliances doing all the work they should for you? You will get most use out of them if you follow the advice given in Redbook for November. Keep your electric housewares close at hand.

Use them for every possible job and do as the manufacturer suggests in caring for them. These and other tips in the November issue will help you increase the value of your home appliances.

"If you find yourself in the rut of using an appliance for only the most obvious type of cooking, why not extend its use to other things? Did you know that an electric frying pan is great for popping corn? Or that with a blender, it no longer requires an expert to make mayonnaise?"

"To get the most out of your electric appliances, you will need a plentiful supply of electricity. An inadequate supply will cause your electric housewares to operate feebly. The toaster that heats up too slowly, the motor that gets overheated, the Gunkler of lights when appliances are turned on are all signs of electrical ills. Your electrical contractor or power company will be glad to tell you how you can bring your outmoded electrical system up to date.

"When it comes to the care and handling of electric appliances, remember the manufacturer knows best. It's only common sense to read his instruction booklet and to keep it where you can refer to it easily. In the meantime, here are a few generalizations for your guidance. Cool waffle and sandwich grills open. Freshen a coffee maker by brewing baking soda in it (1 tea-

spoon per cup of water). Be sure to rinse thoroughly. Use only a rubber spatula to guide batter into the blades of a mixer when it's going, never a metal or wooden spoon. Take hold of the plug, not the cord, to disconnect electrical appliances.

"Don't shake a toaster upside-down. It usually has a crumb tray you can empty. Never wrap its cord around a hot electrical appliance. Avoid sharp turns in use cord. Hardwood stains can be removed from aluminum interiors with soap-filled steel wool pads, or by heating a solution of 2 tablespoons cream of tartar in 1 quart of water or a weak vinegar solution in it. Keep the vent tube of a pressure cooker clean. If it's clogged, use a cleaning wire to open it up.

"If you need to use scouring powder on a waffle grid, be sure to rinse it off thoroughly and reseason the grid. Silver polish can be used to restore the gleam to satin-finish aluminum. Do not put sticky foods in a toaster. Always unplug an electric pressure pan before putting it under water to cool it.

"Do not use electric housewares in an area where they could accidentally fall into a sink while connected. To season waffle or sandwich grids: Put one teaspoon unsalted fat or salad oil on cold grids. Close cover; bring to medium heat; then turn it off. Open it and wipe excess fat from grids with a soft cloth. Let it cool completely with the cover open. Don't let salted liquids stand in aluminum. Remove tray for easy cleaning.

"With electrical housewares, as with most things, storage has a great deal to do with use. On-the-counter storage is especially convenient for heavier appliances that you can use often. Special devices for specific storage include the idea of dropping into the counter one motor that will operate a blender, mixer or knife sharpener. Another way to save a mixer is to mount it on a typewriter-elevator sort of platform that is built into one of the base cabinets in the mixer center.

"Cabinet storage is fine if the cabinets are accessible. Heavy items should be placed as close to the counter as possible to eliminate lifting them up from a bottom shelf of a base cabinet or down from the top of a wall cabinet."

SAY "MERRY CHRISTMAS" WITH GIFT-WISE BUYS FROM BEALL'S

KITCHEN AND ★★ FIELD NEWS

from Lighthouse Electric Cooperative, Inc. by Nancy Morlock and Claude Weatherbee Electrification Advisors

On Friday night, Dec. 14, 7:00 o'clock p. m. here at the demonstration kitchen, at the Lighthouse Electric, Yreva Mae Ellis, Home Economist with Southwestern Public Service Company in Plainview, and I will give a demonstration on "Making and Packing Candy for Christmas." This meeting was planned at night because so many are unable to attend the daytime meetings. We are looking forward to seeing you on Friday night, especially those of you who work during the day.

There are so many wonderful electrical appliances that will make the most thoughtfully considerate the best remembered gifts of all. Electrical gifts are the kind that give convenience and enjoyment day after day, year after year. The whole family enjoys it when some one says "Merry Christmas" with an electrical appliance for the home.

A demonstration on "Making Candy" was given at the Ralls Auditorium last Thursday afternoon for the Future Homemaking Club of the Ralls High School. Mrs. James Cox of the Cox Furniture and Appliance Store in Ralls sponsored the demonstration. More than 100 attended this meeting. Mrs. Xie Collins and Carolyn Davis, Home Economists with Southwestern Public Service Company in Lubbock were guests.

A. B. Segars and Jim Hansen of Lubbock were at the co-op on Monday.

John Smitherman, Bill Smith, Herman King, O. A. Williamson and Lee Rushing, directors, Ben Ayres, attorney and Melvin Henry, manager, attended regular monthly board meeting at the co-op last Saturday.

Little Lana Duke, daughter of Mr. and Mrs. Jackie Duke, spent two days last week in the Plainview Hospital. She is doing fine at this time.

Mr. and Mrs. Bill Ward of Lubbock dropped by Sunday to see the Edwin Pollans.

Mr. and Mrs. J. C. Nelson and family of Dumas spent the week-end with her father, F. L. Morris, and her brother Billy Morris and his family.

Mr. and Mrs. E. J. Marrison and Patsy of Idaloo spent the week-end with Mr. and Mrs. Buck Marrison and boys.

Mrs. John Nay, Eddie and Martha, spent the week-end in Spur with her mother, Mrs. Ray Dixon, who is nursing a broken arm.

Mrs. Dave Standifur of Plainview was a co-op visitor on Thursday of last week.

Christmas foods, customs differ, but the spirit is the same round the world! For almost two thousand years Christmas has been the most celebrated holiday of every year. Celebrated by all kinds of people in all parts of the world - people whose taste in living and eating differ, but whose feeling about Christmas is the same.

To everybody, Christmas means shining lights and shining eyes, gayety, laughter, peace and joy, as well as prayerful thanksgiving. Christmas is stuffed with plum

pudding, roast beef, a wassail bowl, magi cakes or lebkuchen - depending on where you come from and what your inherited traditions are.

In the time of the Saxons, the festive board was spread with its "board-cloth" and the guests waited for the two specialties that marked Christmas: the peacock and the booby's head. The peacock, always borne to the table by a lady perhaps the most beautiful of the female guests, sometimes arrived in the form of a pie with the head of the bird protruding from the crust, and its widespread tail from the other. More often, the bird was skinned, stuffed with herbs, and roasted. Just before it was served, the skin was put back on.

The English Christmas feast of that era ended always with a dish unknown to modern times. It was called "frumenty" and consisted of wheat boiled till the grains burst. When the mixture was cool it was strained and boiled again with broth or milk and yolks of eggs. As the years passed, more imaginative cooks added other things; raisins, prunes, mace. By 1670, chopped suet was added, to produce the first plum pudding. Today, plum pudding is as traditional in American Christmas feasting as it is in English.

Mince pie is also a decidedly British addition to the Christmas feast. As early as 1596, "shrid pye" or shredded pie, was popular. The delicacy symbolizes the gifts of the Wise Men to the Christchild, representing a compound of the choicest spices of the world.

In Scandinavia the festive "bord-cloth" becomes "smorgasbord," which literally translated means "sandwich-table." This however, is a meager description of the untold varieties of delicacies which adorn the Christmas table of the Swedish, Norwegian and Danish people - and their descendants in this country.

Here are found, in wondrous array, cold roast pork with currant jelly, veal with mustard sauce, jellied calf tongues, and radish roses smoked whitefish with capers, pickled herring in dill sauce, anchovies smoked salmon, pickled pigs feet, assorted fruit and vegetable molds to create color contrast, molded fish mousses, endless varieties of cheese brown beans cooked in molasses, meat balls, and half a dozen kinds

Good Attendance At PTSA Meeting

A good crowd was in attendance at the Junior High Parent Teacher Student Association meeting Monday evening at 7:30 o'clock in Floydada High School auditorium. This meeting was the second of four meetings planned for this school year.

Mrs. L. H. Christensen's chorus presented several musical numbers. Mrs. Myron Kattner's junior high speech students gave several selections and Mrs. I. T. Graves gave a review of "Mansion's."

At the business meeting the group voted to have entertainment for the Junior High students in February.

Refreshments were served at the close of the meeting.

of spiced Christmas breads. Many of the latter are baked only at the holiday season, and are as much a part of Christmas as the Christmas-dawn service, Jullotta, held in all the churches.

Christmas in Sweden is also a time for Glog, a Viking drink as old as the history of the Scandinavian countries and served to warm the bodies as well as the hearts of the celebrants.

Christmas in all countries, has always called for special decorations. The earliest were the handiest - greens from the forests. Since the season determined that these be evergreens, the "Christmas tree" that evolved was a pine or fir. The use of trinkets on the tree dates from the early Roman days when masks of Bacchus were hung on trees to impart fertility to those who gazed upon them.

To accept a bunch of edelweiss on Christmas, in Switzerland, is also to accept the man who proffered it. In Denmark, some of the bread baked at Christmas is mixed with the seed at sowing time to insure an abundant harvest. In Spain, cows are honored at Christmas time because it is believed that cattle breathed upon the Christchild to keep him warm.

In Ireland, if a person dies at Christmas Eve, the belief is that his soul automatically enters the gates of paradise. Ireland, too, has a traditional drink, known only in that country. Called "Lambsool," it is made by bruising roasted apples and mixing the juice with ale or milk. It is served with apples and nuts and considered indispensable on Christmas Eve.

Weinachten, Holy Night, is Christmas to all in Germany. These people have maintained their traditions through centuries. Everybody who has German ancestry - or German friends - knows the typical Christmas cookies: the Lebkuchen. It takes two days to make this wonderful children's delight, but the general consensus of opinion among people who have sampled Lebkuchen is that they are worth the time and effort. Stollen, that large fruit and nut filled seed coffee cake is also a German Christmas treat.

If you would like to try some of these really traditional Christmas foods here are two recipes especially adapted for our American kitchens:

Norwegian Julekake
(Christmas Cake)

1/2 cup sugar
1/2 pound butter, softened
2 whole eggs
2 egg yolks
1 cup seedless raisins
2 yeast cakes
1 cup lukewarm milk
1 pound flour, sifted
1 cup citron, chopped
1 tablespoon cardamom, ground.
Beat sugar and butter in large bowl until well blended. Beat eggs and cardamom. Add. Dissolve yeast cakes in milk. Add to mixture alternately with sifted flour. Mix dough well. Cover and set aside in warm place until double in bulk. Then toss in floured board and add citron and raisins. Knead until smooth. Cut in half. Mold into loaves and put in 2 greased loaf pans. Cover with heavy towel and set aside until double in bulk. Brush with beaten egg. Bake in a moderate oven (350 degrees F.) 1 hour, or until it is golden brown and shrinks from sides of pan. Remove from oven. Cool in pans.

German Stollen
(Basic sweet dough, enough for 12 dozen rolls)

1/2 cup raisins
1/2 cup citron, finely shredded
1/2 cup chopped candied cherries
1/2 cup nuts, chopped
2 tablespoons melted butter
2 tablespoons aromatic bitters
Confectioners' sugar, long
When basic sweet dough is light, add and knead in the raisins, citron, cherries, bitters, and nuts. Shape the dough into two balls and allow them to rest for 10 minutes. Flatten each ball into an oval about 1/2 inch thick and brush with melted butter. Fold over like large parker house rolls. Pinch the ends firmly together and place them on a greased baking sheet. Brush tops with melted butter and allow to rise until doubled in bulk (about 1 hour). Bake at 350 degrees F. for 35 minutes. When cool, brush with confectioners' sugar icing. Makes two Stollen.

As A Farm Woman Thinks

(Nellie Witt Spikes)

THE SONG REMAINS

What did they talk about, I wonder, When angels sang above the plain? Zealots invoked Jehovah's thunder, Farmers discussed the chance of rain.

Roman soldiers cursed and hated The subject Hebrews rude and raw; The Scribes and Pharisees debated Each jot and tittle of the Law.

The temple square was loud with prattle Of people haggling at the price Of bleating sheep and lowing cattle Bought for the morrow's sacrifice.

Traders in balm and silk and spices

Urged on their camel's stolid pace Talking of profits and of prices In the Damascus market place.

Herod (a Roman chariot bore him) Harangued the crowd with haughty mein;

A leper drove that crowd before him With the dread cry, "Unclean! Unclean!"

Astrologers observed the swinging Of brilliant planets in the sky. But silent shepherds heard the singing And Mary heard a Baby cry.

The cant of court, the chat of table, The feverish count of loss and gains, Are one with the last speech of Babel, Only the angel song remains.

As the beautiful time of celebrating The King's Birthday draws near we should take stock of our feelings and pray for the peace and security that the trust in God will give us if we only really want it. It is a time for remembering, the precious

memories of other years. It is a time for the renewing of friendships through the means of lovely greeting cards and letters. It is a time for giving, for receiving, for feasting and laughing.

I like to pass the homes and see the wreaths, the different methods of decorating each home, the colored lights that sparkle in the dark. I like to think of the days at Emma when boys and girls went over the stile at the courthouse fence and took bundles of packages from the store for the busy workers to hang on the big fragrant cedar tree from the canyon which stretched toward the tall ceiling in the big courtroom.

The women made long strings of white popcorn which looked like tiny white roses. They made strings of red cranberries and hung golden oranges and red apples for more decoration. They made fluffy paper chrysanthemums of colored tissue paper. They hung each gift on the tree, unwrapped in all its beauty and appeal.

Dolls stretched out tiny hands at the young girls, drums and bugles and shiny guns for the boys hung on many a green limb. There were gold

watches and long gold slender chains for the young ladies. Bracelets with gem sets encircled the tree from the steep canyon hill.

I can recall the mustache cups for father, the blue dishes for mother. These were set at the base of the tree.

Soft crocheted fascinators with beads that glittered like tiny lights, dark colored nubbias to keep a man's throat warm and a pair of wristlets for his wrists, knitted or crocheted by some woman who loved him, warm red hoods for girls. My what a beautiful sight was the cedar tree in the big courtroom at Emma when I was a child!

Miss Clara Pratt gave this recipe for cookies on television last week, which I am going to try:

Beat two eggs, (she used a fork) add two teaspoons vanilla, one teaspoon grated orange rind. Stir in eggs—three fourths cup sugar, two thirds cup of cooking oil which makes a pretty glaze, she said. Stir fairly stiff with two cups of sifted flour, two tablespoons baking powder, 1/2 teaspoon salt. Drop in spaces on cookie sheet, then with a glass oiled on the bottom and dipped in sugar

press each cookie into shape. Decorate cookies with tiny chocolate drops or pecan halves, jelly beans or cake candies.

Sounds pretty good, doesn't it? Forgot to tell you last week that silver tinsel wrapped around the bells made out of aluminum covered paper cups make them prettier.

Every One Welcome

Planned especially for ladies who cannot attend daytime meetings.

If wishes were presents, a lot of folks would get a lot of beautiful gifts this Christmas.

Almost every one of us would like to shower our friends and loved ones with the things they want or need. The kind neighbor who spends every extra dime on her shiftless son... we'd love to give her a completely new kitchen. The cousin who wears a 10-year-old coat with dignity and good cheer would get a mink wrap. The spouse's threadbare dressing gown would be replaced by a luxury robe to lounge in. We'd paint Mama's house, buy Brother a foreign-made sports car.

But most of us don't have that kind of bank account. And maybe it's just as well.

We don't question the sincerity behind the average Christmas wish regardless of its price. But the most expensive one that is not backed up by real meaning might just as well have stayed in the store.

It's the year-round giving of ourselves that builds up into the priceless gift for someone we love. Then the thoughtful trinket at Christmas time, whatever it may be, touches off the wealth that is already stored in a loved one's heart.

For eleven months we make the investment. The Christmas gift we send is merely the dividend — the reminder of that gift-edged stock the receiver holds in the heart of a friend.

Urge Mosquito Abatement Now

area of West Texas accounted for 341 cases.

They constitute two of the biggest outbreaks of the mosquito-borne disease ever recorded, State Health Commissioner Henry A. Holle said. By contrast, only 96 cases were reported in 1955.

The Plains outbreak caused an estimated 15 deaths, Dr. Holle reported.

"ENCEPHALITIS seems to occur in epidemic waves," the commissioner said. "And for some unknown reason the outbreaks are becoming more frequent."

The theory has been advanced that an increase in the number of water impoundments makes for ideal breeding places for encephalitis mosquitoes. And the more mosquitoes of the type capable of transmitting encephalitis, the greater the chances of it being spread among the human family.

Dr. Holle advised city and county health departments to make sure they had both funds and technical

personnel available for their mosquito killing campaigns in the spring.

He said State Health Department entomologists and vector control experts are available to local areas for consultation on their problems of mosquito control.

But he added: "Local programs will be useless without working funds."

MEANWHILE, the American Society of Tropical Medicine and Hygiene, meeting in New Orleans last month took cognizance of "the increasing exposure of man to mosquitoes due to various socioeconomic trends."

The society adopted a resolution in support of "more adequate work" in the field of mosquito control. It suggested that the work be done by the U.S. Public Health Service in cooperation with state and territorial health departments.

VIEWS AND COMMENT

The Olympic games ended last week in hatred and bickering that was far from the hope of the French sportsman who engineered the first Olympics 60 years ago. It was his hope that the games would promote better sportsmanship and greater understanding among the nations. The Russians, in particular, were charged with un-sportsman-like conduct and about a third of the Hungarian contestants are not returning to their homeland, seeking instead new homes and a new beginning in other lands. Russians won the most trophies and the most points in the games, with United States athletes second. Americans won most of the events which they like to do best, the Russians the kind of events they like.

From Washington, or is it New York, we read that some farm machinery manufacturer has come up with a prediction of a boom in their business. At retail outlets for this machinery the story is not the same. We hear this kind of a story: That the machinery prices have zoomed upward so fast the dealer has been unable to keep up. He is, in fact, selling new farm machines at prices below the figure he has to have to make a living and is keeping his business open by other services he is rendering the public. The "regular mark up" is long since a thing of the past in the farm machinery business. You rarely see a boom in any line when that condition prevails. We do not anticipate a boom to occur in the farm machinery business, tycoons of the industry to the contrary notwithstanding.

The worst thing that has happened to the southwest since the Civil War is the present drought, now going into its seventh year. We are of like opinion with Agriculture Commissioner John C. White that the legislature should begin its sessions with serious consideration of the problems created by the drought. Instead it appears the biennial tax fight will blossom out on the opening day of the legislative session in January and continue right on through until the end. Everybody wants more taxes collected—and somebody else to pay them.

Now hear this. While Christmas is only thirteen days away ample time still remains to shop thoughtfully and without panic. You can make the same amount of money give a great deal more satisfaction when Christmas-time comes by putting your mind to the job. Christmas shopping is good for you or it is a nightmare according to the way one approaches it. We'd like to plug for Floydada as your shopping place. The shops and stores

here teem with good ideas. You do not have to look elsewhere unless you just naturally want to.

Five Thousand Weekly. In the surge of sympathy for the Hungarian refugees, latest victims of the Russian purge, we are apt to forget that all over the world there are people looking to America for aid or refuge, or both. Perhaps none of us have hurt ourselves nor gone to too much inconvenience to help any of the war-ravaged people but we could go overboard for the latest to suffer and forget the commitments already made in our names. For instance, Hungarians are being flown into America, (on order of the president at tremendous more expense than necessary), while there are thousands of East Germans who have been on waiting lists for months, even years. And there are still 5,000 a week emerging from East Germany trying to get to freedom from the iron heel. To these we are already committed. If we also help the Hungarians well and good, but if we help the Hungarians to the harm of those whom we have already pledged help, are we doing the most good to the most people?

We've never understood money and money-making well enough to have an opinion worth expressing on whether "tight-money" is a deterrent to run-away inflation, as claimed by some, or on the other hand, merely adds to the burden that business and industry must carry in a battle for profits. That "tight-money" will not be helpful in such communities as Floyd County seems to be a safe statement to make. With money so plentiful it is unreasonable for the price of its use to increase, speaking from a layman's point of view. The different theories of money and its handling or manipulation by the Federal Reserve System is coming in for sharp review in hearings this week. Texas' fiery Wright Patman will conduct the hearings and he is an opponent of the tight money theory.

It is historical that tight money precedes and goes with a bust. Whether it has a tendency to be the cause of the bust we wouldn't know. It can't be said that simply. Lack of credit, something to use for collateral, is generally the best sign that a bust is coming. There seems to be no shortage in this respect in most quarters. The principal exception is in the instance of dry land operators and drought-ridden cattle land of which Texas has a great area. In a farming or ranching country you have to produce your collateral. And when you fail to do so the tighter the money the harder the sledding.

Hutton Points Out Provisions Of New Aid Law

Persons who may become entitled to old-age or survivors insurance payments during the months just ahead, because of recent changes in the social security law, namely, women aged 62 disabled workers who have reached age 50 and children who were disabled before age 18 will not lose any payments if they delay filing a claim for benefits. Mr. Hutton, district manager of the Lubbock social security office, declared today.

Payments to a woman who has reached age 62 can begin with the check for this November which will be due after the end of that month. However, women 62 to 65, do not need to apply for the payments immediately.

Even if they wait a full year before filing a claim at the social security office—that is, not until November 1957—they can still get any back payments they are entitled to," Hutton assures them.

A DISABLED working person who has reached age 50 can't start to get monthly benefit payments until July 1957. Even if he does not file a claim until the end of December, 1957, he will get back payments for all months beginning with next July. In the case of a child who became disabled before reaching 18 the first payments are for January 1957. However, if the claim for benefits is not filed until January 1958 back payments for the 12 months can be made.

Hutton said that many people who have read about or have been told about the recent changes in the social security law feel that they stand to lose some benefit payments to which they may be entitled if they do not get to the social security office right away. He wants to assure them that this is not the case.

"REMEMBER," he says, "women aged 62 have a full year after reaching that age to file an application without losing a single month's payment; a worker disabled before age 50 has until the end of 1957 to file without losing any month's payment to which he may become entitled after next June, and an application for a child who became disabled before 18 can be made at any time before the end of January 1958 and back payments will be made for all 12 months of 1957."

Hutton has a word of caution in the case of the disabled worker, however. While he has until the end of next year to make his claim without losing any payments, it may be advisable for him to get in touch with the social security office before that time. While delay would not affect his own benefit payments, it might mean lower benefit payments to his survivors in case of his death before he makes application to establish his disability.

A representative of the Social Security Office will be in Floydada on Dec. 18 at 9:30 a. m. at Room 106, Courthouse and will be glad to assist in all matters pertaining to Social Security.

Mr. and Mrs. Delbert Groves and sons of Pampa and Mr. and Mrs. W. C. Holt and family of Levelland were recent visitors in the home of Mrs. Mary Stanley.

Mr. and Mrs. Wayne Shultz of Carlisle were week-end guests in the home of her parents, Mr. and Mrs. Carter L. West.

GLANDULAR BALANCE IN OBESITY

There is more to being overweight than being blessed with a healthy appetite. Often the Obese person is amazed to see others eat twice the quantity of food he does and yet remain thin. In these cases of obesity, it can be attributed to an upset glandular system.

One popular method of treating these types of patients is the injection of hormones, however, it must be kept in mind that this does not make the gland work any better but is actually substituting for the gland. This, in time, will usually result in atrophy (Shrinkage of the gland which in turn makes the patient all the more dependent on the injections.

Instead of finding what gland is not working and giving substitutions for it, one should find out why the gland is not working and then proceed to correct that.

Your own body can correct the condition when given a chance. It is common knowledge that all organs and glands are controlled by the nervous system. The logical place to look for trouble is along your nerves. When pressure on nerves exist trouble begins. Your Chiropractor restores the nerves to normal, then your own body does the rest.

Drive One of the New JOHN DEERE TRACTORS

The exciting Ford Fairlane 500 Club Victoria (above)—over 17 feet long—is one of two new, bigger Ford sizes this year.

If you think it looks new... wait till you drive it!

...For there's where Ford's newness really pays off
...in melting mountains...in smoothing the bumps
...in straightening the curves

You can see that Ford's longer, lower Sculptured Look makes other cars look downright old-fashioned. But the part you can't see—the new "Inner Ford"—is what shows its stuff when you drive a Ford. It's revolutionary from the wheels up! And it feels it.

Ford's wider frame lets you sit sweet and low. And Ford's new front suspension, rear springs and new easy handling are part of the scheme to make you think every road is cloud-smooth.

The magic touch of the new Ford power plants makes mountains disappear. What looks like uphill feels like downhill. You get this surging power in a wide choice of Silver Anniversary V-8 engines. Or choose Ford's Mileage Maker Six, the most powerful Six in the low-price field.

There's magic in Ford's price tag, too! You won't believe this big new Ford is still priced Ford-low. But it is. Come in and test its magic. It's a real "Wizard of Ah-h-h-h!"

changed after 20 years of inflation. Texas tuition charges of \$25 a semester for in-state students, \$150 for outsiders, lag far behind those in other states. But even substantial increases would meet only a portion of the cost of salary raises, it was claimed.

Public school teachers also seek higher pay. They term the need an "immediate crisis" and ask that the Legislature treat it as an emergency measure.

Teacher salaries were last raised in 1953. State minimum wage for a beginning teacher with bachelor's degree is \$2,805 per year.

Texas State Teachers Association's House of Delegates also called for a full study of the "Cavness plan" to ease school financing problems. State Auditor C. H. Cavness proposed some 18 months ago that only 27 1/2 per cent of revenue from school owned lands be invested in the permanent school fund. This would free 72 1/2 per cent of this revenue, an estimated \$20,000,000 to \$25,000,000 a year, to meet current expenses.

DANIEL LISTS GOALS — Incoming Gov. Price Daniel said he believes there are a multitude of other problems with which the Legislature can deal more effectively than school integration.

He favors local determination, rather than state-wide legislation.

At the outset of a series of conferences with lawmakers, Daniel emphasized these issues: (1) overall state financing, (2) narcotics control, (3) teacher pay raises, (4) wa-

ter conservation, (5) lobby control, (6) housing of state archives.

WATER LOCAL PROBLEM — Texas' water problems must be met locally, says Rep. Waggoner Carr of Lubbock.

Carr, unopposed candidate for Speaker of the House, feels that people in each watershed area should devise plans to meet their own unusual conditions and carry them out with possible aid of state credit. He termed "futile" any further effort to finance water conservation with a state-wide tax that would be fair to all parts of the state.

SALES ACT CONTESTED — Texas' new sales limitation act is up for its first legal test.

State Supreme Court is considering a case stemming from the 1955 law which prohibits grocers from limiting sales of items advertised at below-cost prices.

Contestants are a San Antonio grocer who defied the law and the San Antonio Retail Grocers Association which sought enforcement through a court injunction. A San Antonio district court refused to grant the injunction.

Attorneys for the defendant contend the law is unconstitutional and discriminatory. It applies, they point out, only to grocers and not to other retailers selling the same merchandise.

Association attorneys counter that control of "loss-leader" selling is needed "to keep the big man from gobbling up the little man."

SHIVERS HONORED — More than 2,000 Texans and a distinguished "ex" paid tribute to Gov. and Mrs. Allan Shivers at a mammoth dinner party in Dallas.

President Eisenhower sent personal greetings. Leading statesmen and businessmen saluted the man who in a few weeks ends a record-breaking tenure as chief executive. Mrs. Oveta Culp Hobby termed Mrs. Shivers an expert in "glass house living."

Wit abounded. Example by Supreme Court Justice Ruel Walker: "I came not to bury Shivers, I came here to praise him."

STATE REGULATION CHAMPIONED — Atty. Gen. John Ben Shepperd has gone to bat against federal regulation of Texas insurance companies.

Shepperd filed a friend of the court brief in behalf of American Hospital and Life Insurance Company's fight against a Federal Trade Commission ruling.

American Hospital is a Texas firm. Its case has now reached U.S. Circuit Court of Appeals in New Orleans.

Shepperd contended the McCarran-Ferguson Act specifically authorizes states to regulate insurance to the exclusion of the federal government or any of its agencies.

AUDITOR REPORTS — State Auditor C. H. Cavness' lengthy annual report on state departments unearthed no scandals. But he suggested several agencies to be marked a little better in their financial record keeping.

These included the State Board of Morticians, Agriculture Department, Austin State School, Surplus Property Agency, State Board of Medical Examiners, State Parks Board, and Waco State Home.

Cavness noted that certain sections of the General Land Office are understaffed, but present personnel seemed qualified.

WCTU STRATEGY — Banning of alcoholic beverages in grocery stores will be the prime legislative goal of the Women's Christian Temperance Union next year.

A petition to this effect, bearing 100,000 signatures, was exhibited at the WCTU convention in Austin.

A resolution, aimed at the Legislature, urged that public school textbooks "have no discussion of moderation, but simply teach the students the bad effects of alcohol."

SHORT SNORTS — Assessment by senatorial districts has been proposed for raising money for the Texas Democratic Party. Finance committeemen have approved the plan will recommend it to the executive committee.

State Sen.-Elect Charles Herring of Austin has proposed a two-term limit be placed on Texas' governorship. It would take a constitutional

amendment.

Two per cent gain in income of Texas farmers and ranchers has been reported by the U. S. Dept. of Agriculture for the period of Oct. 15 to Nov. 15.

Dallas leads the state in number of manufacturing plants. Houston, San Antonio, Fort Worth, El Paso, Austin, Amarillo, Waco, and Corpus Christi follow in that order.

Texas' construction is virtually certain of its greatest year in history. Construction for the first 11 months of 1956 hit \$1,135,843,562. December awards are expected to add more than the \$44,476,612 necessary to match the all-time record set in 1953.

Education engineering and enforcement were underscored in an Austin conference studying means of reducing traffic accidents. U.S. Air Force officers from over the country joined the Texas Department of Public Safety and Texas Safety Association in planning a coordinated program.

State Game Commission has called on hunters to help reduce the doe deer population in Gillespie, Mason, Llano and Medina Counties. Unless some 5,000 excess does are killed, starvation of many animals will result.

Barbara McNeill spent the weekend as guest of Geneva Ellis of Crosbyton.

The Wilmer Jones house has been moved from the farm into Floydada. The latest report from Mr. and Mrs. J. E. Newton is that he received the eye operation as scheduled and is improving nicely.

Freida Smith was the house guest of her grandparents, Mr. and Mrs. John Lloyd of Floydada several days last week.

Mr. and Mrs. C. A. Caffee recently visited relatives at Byers.

Mr. and Mrs. Raymond Holt of Hereford visited in the Caffee home Sunday of last week.

Mr. and Mrs. Ned Bradley were house guests of his sister, Mrs. Tom Boyd and family of Amarillo this weekend.

Farm Progress Encouraging To F.H.A. Borrowers

DALLAS — Annual gross cash income grew from \$4,880 to \$8,021 in five years for a group of Texas farm families who obtained Farmers Home Administration farm ownership loans in 1950 to buy, enlarge, or improve their farms, the agency's State Director Walter T. McKay reported today.

The average net worth for these Texas farm families advanced from \$7,391 before they received their farm ownership loans to approximately \$10,900 at the end of their fifth year of operation under that loan program.

Before the loans were made the average family in the group was operating 189 acres but was operating 224 acres in 1955. The combined value of equipment and productive livestock owned by the average

Floyd County Hesperian, Floydada, Texas, Thursday, December 13, 1956

family in the group was \$4,598 before the loan was made, and was approximately \$6,686 in 1955.

Figures showing these advances, together with five-year progress along other lines, come from a survey of 1955 borrowers who obtained loans in 1950. A similar survey is made each year. The 1956 figures will be available in 1957 showing five-year progress made by those who got their loans in 1951.

Farm ownership loans are made to buy family-type farms, enlarge underused farms, develop farms, and refinance debts. Funds come from private lenders under the insured loan program or from annually appropriated funds, and are amortized for periods up to 40 years. On an average the loans are repaid in 9 years.

Insured loans are limited to 90 percent of the fair and reasonable value of the farm. A loan to buy a family-type farm cannot be made if the fair and reasonable value of the farm is more than the average value of efficient family-type farms in the county.

Agriculture

Released by
The Texas Department of Agriculture

The egg bucket is on its way out. The once common sight of the farm boy using "egg wampus" as a means of bartering for groceries and, occasionally, "show money," is on the wane.

The Agricultural Revolution of the last 20 years has taken its toll of this and other farm traditions as farming has become less diversified and more specialized. The common reason is that it simply is not worth the time, labor and feed involved to keep a few hens on the side and bring the fruits of their labors to town on Saturday.

Yet a great many Texas farmers may be missing a bet for supplemental income by overlooking the possibility of using egg production as a "specialized" sideline.

While the old "hen house" with a few old tottering birds is an unlikely profit maker, modern facilities and improved handling operations can be made to turn in a nice profit. There is always a market for top-quality eggs, and Texas consumes several times more eggs than

it produces. Best way to get into a profitable egg business is to install an assembly line operation, providing for cooling, proper cleaning and regular marketing. Eggs from such a caged layer plant are not only in constant demand but usually bring a nice premium in the market place.

For a great many of those Texas farmers who have gone out of the broiler business due to low prices, their empty houses might well be put to profitable use in egg production.

As added incentive for premium egg quality, on-the-farm grading and candling are certain to up the profit margin. Accurate grading facilities can be obtained at little cost and free instruction on grading and candling processes will be given on request for the Texas Department of Agriculture or U.S.D.A. extension workers.

Egg producers who provide for adequate grading and standards now will also be getting in on the ground floor of the proposed Texas law which will make grading mandatory.

Texas is the only state which does not already have such a law, and its inauguration is certain to boost Texas' possibilities as a major egg producer.

Use of Air Mail Now Suggested

Postmaster Wester expressed his thanks today for cooperation so far on his annual "Mail Early For Christmas" campaign.

He said, "I know the time has passed to talk about mailing early." To the inevitable last minute mailer he suggests that you use Air Mail for every Christmas card or gift going out of town after this week.

He reports that the flow of Christmas cards is running about the same as last year, but mailing of gifts by Parcel Post is definitely behind schedule. To aid in mailing of parcels, the Post Office will remain open Saturday afternoon, Dec. 13, until 5:00 p. m. After this date Air Parcel Post should be used.

"Most people realize the early arrival of a Christmas card or gift is always welcomed," the Postmaster pointed out. "But there are still some who have the mistaken idea that a gift or card actually arriving on Christmas Eve has a special significance. Actually, it is the thought behind the gift or card and not the time of arrival that is the important consideration."

WHY?

Do We Sing Christmas Carols?

Singing of Christmas Carols originated in England where the poor went from house to house singing in the streets in the hope of receiving gratuities in coin or food. The word comes from cantare "to sing" and rola a joyous exclamation.

Carolling nowadays is done mostly by suburbanites who hope for nothing more than to bring happiness. School children hold "carol parties" and go about singing for "shut-ins," hospitalized children and veterans.
