## Jno. C. White Talk Scheduled Cantaloupe Day

John C. White, Texas Commissioner of Agriculture, will be the featured speaker at Floyd County's Vegetable Harvest Festival in Floydada on September 7.

Mitchell Parrish, Festival Chairman and Chairman of the Floydada Chamber of Commerce, announced this week that the Texas Agriculture Commissioner would be in Floydada for the Vegetable Harvest Celebration.

Talking to District Attorney John Stapleton over the week-end, Commissioner White indicated that he would arrive in Floydada on September 7 in time to attend the first event in the day's schedule, a morning tour of a portion of the vegetable producing area and some of the packing sheds in the county.

The public is also invited to make the tour which will leave from downtown Floydada at 9:30 a. m. Luncheon for White is planned for Saturday noon.

The afternoon program will open on the court house lawn at 2:30 p. m. with a thirty minute concert by the one hundred piece Whirlwind band from Floydada high school.

At 4:00 p. m. Floyd County cantaloupe producers will be hosts to the entire festival audience at a free cantaloupe feast on the court house lawn.

Invitations were being mailed this week to area vegetable producers, brokers, canners, bankers, newspapers and agriculture officials to attend the festival and observe for themselves the progress made in vegetable production in the county within the last five years.

## Flu Cases May Or May Not Be Of Asian Type

A flu bug, but not necessarily the Asian type flu, has put several persons off their feet in Floyd county recently.

More cases will probably pop up due to the fact that any type of flu is highly contagious, doctors here say.

People naturally jump to the conclusion that it is the Asian flu when they become ill, but most of the cases here have been diagnosed as intestinal flu. True diagnoses cannot be had until a blood sample is taken and sent to Austin for a lab test, doctors stated.

Dr. Jack Jordan, county health officer, said this week that the Boy Scouts he treated were presumed to have the Asian type flu as they were exposed to it, but no blood test was taken, therefore he was not certain.

Dr. Donald Pitts said he had quite a number of patients with flu. All combined with a severe headache, muscular aches, and pains and a high fever for several days but he said, most all flu cases have these same symptoms, even to the Asian flu.

Dr. A. E. Guthrie said most of his flu cases were of the ordinary type, dysentery, fever and some-time followed with a sore throat.

Dr. Jordan said inoculation serum would probably arrive in Floydada around the first of September for the Asian flu.

## Reward Posted For First Bale

The annual award to the Floyd County farmer winning the first bale of cotton of the 1957 season was announced this week by Dan Hagood, chairman of the Chamber of Commerce Retail Trades committee.

The \$100.00 prize will be given the farmer who delivers the first bale of cotton to the south west corner of the court house square in Floydada. The cotton must be grown and ginned in Floyd County, Hagood said. It may be ginned by any Floyd county gin.

The first bale farmer is asked to notify Hagood or the Chamber of Commerce office when the bale is delivered.

Local gin men tell the retail trades committee that they are not expecting the bale until the middle of September.

## Big Cut Made by CCC In Cotton 'Spot' Values

Floyd County cotton raisers this season are going to have to do their utmost to up their grades to avoid losses from last year's figures for CCC loan values.

At that they are going to have to take reductions, even on their better quality of cotton.

Joe March, local cotton buyer, yesterday charted the loan values on nine different grades of six different lengths, based on the CCC figures.

Middling cotton with 15-sixteenths staple is off \$3.00 per bale to \$20.98 per 100 pounds, and one inch middling cotton takes a value of \$32.31 this year whereas it went into the loan last year at \$32.63.

The same length staple in strict middling spotted will really take a beating in CCC loan value. Last year strict middling light spots 1 inch went in the loan at \$32.19 per 100 pounds. This year the same cotton

will be valued at \$28.53 per 100 pounds, off 165 points.

The 7-eighths length in strict middling spotted will go into the loan at \$25.88, strict low middling 7-eighths \$21.88 and a low middling eighth \$21.88 and a low middling bale with 7 eighths staple, with light spots will take a value of \$18.93 per 100 pounds.

The loan values were announced last week. Congressman George Mahon, writing last week about this big spread between the bright cotton and light spots, says that this widening of the spread differential is a bad blow for light spotted cotton, and "this is certain to develop into a bad situation this fall."

A big battle was put up by farm interests to get the Agricultural Department to set up a special light spot cotton loan, which could have been done without legislation. Their request was rejected. "As is well-known," the congressman said, "the

Department of Agriculture is interested in lowering any and all support prices, not raising them."

One bright spot in the overall cotton outlook is pointed out by Mr. Mahon. The program for the disposition of surplus cotton is getting results. Since January of 1956 the government has sold 11,794,776 bales of cotton for export, and of this more than eight and three quarter million bales already have been shipped.

## Cucumbers Show A Profit Todate, Says Staniforth

His introduction to cucumber culture has been a pleasing one, Billie Staniforth Jr., told a news reporter this week.

Queried on the progress of his harvest of an 18-acre field of cucumbers planted on contract last spring, Staniforth said he had about \$200 per acre profit today in the crop and his net is still running about \$50 per day in spite of a bonthead he says he pulled about the first of this month.

His field was yielding between 1245 and \$425 per day when the big early August rains hit. "Honey dew developed in the cucumber crop because I didn't know enough to spray at the right time. This cut my production a big lot."

Staniforth said he didn't know whether or not he was going to be able to bring the cucumber vines back into big production. He indicated doubt. But he has fair production that looks like it will continue for some time yet.

When he first got going on the crop his crew of 19 covered the 18 acres in 2 1/2 days, something more than seven acres a day. His contract is with Craddock of Dallas. His pay has been based on four grades, the smaller the cucumber the higher the price.

Staniforth is also one of the cantaloupe growers of the county. He has 18 acres of cantaloupes which he began marketing this week. He thinks he let honeydew lice beat him out of a lot of cantaloupe tonnage also. But that is yet to be learned. The cantaloupe field is going to show some profit, the only question being how much now.

Biggest production operation ever attempted in the county is that of Trautman & Trautman, whose 30-acre field of cantaloupes began to move to market last week. The Trautmans operate in practically every vegetable growing area in the southwest.

Their field north of Lockney had already yielded several carloads of cantaloupes last week-end and the grading and processing plant is in full blast this week.

A similar operation by Lockney Vegetable Growers is handling a big volume from smaller operations.

Vegetable men this week said that growing conditions for the late vegetables has been good.

Rex R. Brown said this week his field of cantaloupes northwest of

## Kelley L. Hagood Is Victim Of Highway Crash At Cone

Kelley L. Hagood, 27, young Floydada farmer, was killed outright in a collision with a butane truck Wednesday morning at 2:40 in the north part of Cone on Highway 207.

He was enroute home from a visit in Lubbock with Joe Arwine and Carl L. Minor Jr.

Driver of the butane truck enroute south from Petersburg was Harry McDaniel. He was driving for Joe Barlow at Petersburg. His injuries

are believed not to be serious. Jean D. Smith, Cone ginmer, who was called soon after the accident occurred took McDaniel to Crosby for medical attention. McDaniel has bruises and lacerations but is believed not to be seriously injured.

Smith also called the ambulance which took Kelly's body from the scene.

Bob Jack Henry, first on the scene, was awakened by the collision, he told authorities. It sounded like a terrific explosion and he thought a neighboring house must have blown up. He lives near the scene of the wreck.

The body of the young Floydada man was first taken to Ralls and then brought to Harmon Funeral Home here.

Kelly's body was thrown clear of the wreck by the impact. It was found on the highway slab, by Henry and his father, who detected no sign of life.

The Hagood car hit the back duals of the truck and knocked the wheels completely from under it. The road was a wide straight-away but the lake waters reached up to it from both sides.

Kelly's wife and three children were notified in Cleveland, O. of the tragedy by telephone by Kelly's father, Cecil Hagood.

The young wife and three children were packing their bags

Born at Tulsa Kelly Lane Hagood was reared in Floydada. He attended Floydada High School and after his graduation here was a student at University of Texas, Austin, where he was given a degree in business administration in 1951.

He met his wife, the former Mollie Mae McCoy at Austin and they were married there on February 1, 1950. They have three children, Susan Marie, 6, Michael Lane, 2, and Timothy Sean, 1 year. Kelly would have been 28 on September 22.

The bereaved wife and orphaned children were met at the airport in Amarillo Wednesday by Mr. and Mrs. Cecil Hagood, his parents, Dan Hagood, his only brother and wife, Mr. and Mrs. Joe Jennings of Loreno, and Mr. and Mrs. H. D. Hagood of Petersburg.

The time table called for the plane to reach Amarillo at 3:45, but it was behind schedule.

Kelly was a farmer. He was operating one farm east of Floydada and another a mile north of Allmon at the time of his death.

He and Mrs. Hagood were members of the Episcopal Church.

Kelly had gone to Lubbock to keep a dinner engagement with Joe Arwine. Joe said Kelly had called him Tuesday evening and said he decided not to come because of a full day's work on Wednesday and plans to meet his family in Amarillo. But at the last minute he changed his mind and arrived in Lubbock about 7 p. m.

## Attack Warning Effects

ATTACK WARNING effects are graphically illustrated in the two aerial views of New York's George Washington Bridge above. The left picture shows normal mid-afternoon traffic, while the right photo shows the same scene a few minutes later on July 26, 1956, after civil defense sirens had blown to test New York's ability to take cover quickly. In general, a large city populace would be told to take cover from impending attack only when there was too little warning time to evacuate. (New York Daily News Photos)

# Grain Sorghum Field Day Set For Sept. 17

C. B. Carmack this week calls attention to the recently announced second annual Hybrid Sorghum field day to be held on September 17 on the DeKalb Hybrid Sorghum Research Farm northeast of Lubbock.

This is to be one of the outstanding farmer field days of the year, Carmack thinks. It is especially designed to furnish the latest information on hybrid sorghum research, new farming techniques and irrigating practices.

Carol P. Streeter, editor of the Farm Journal, with offices in Philadelphia will be the keynote speaker for the event.

This is an all day affair starting at ten o'clock Tuesday morning, September 17. The morning program is a guided tour of the research farm with Dick Holland, DeKalb sorghum breeder, in charge. He has several thousand replications of sorghum breeding work under way that will be on display.

The County Extension Office of Lubbock and the SCS are cooperating along with several business houses.

The noon luncheon will be served by the Lubbock County 4-H council at the DeKalb research farm. The afternoon program starts promptly at 1:30 and includes a talk on irrigating practices, a farmer panel discussion on hybrid sorghums and the keynote speech by Carroll Streeter on our farm situation as it affects Texas farmers.

### Make Grape Jam Now

Every well dressed pantry shelf includes some royal purple. It's the color of grapes, of course, and now's the time to make next winter's supply of delicious grape jam. Here's the easy way:

**Grape Jam**  
Yield: about 13 medium glasses (6 1/2 lbs. jam)  
6 cups prepared fruit (about 4 lbs. ripe grapes)  
7 1/2 cups (3 1/4 lbs.) sugar  
1 box powdered fruit pectin.

First, prepare the fruit. Slip skins from about 4 pounds fully ripe Concord or other loose-skinned grapes. Add 1 cup water to pulp; bring to boil and simmer, covered, 5 minutes. Sieve to remove the seeds. Chop or grind skins and add to pulp. Measure 6 cups into a very large saucepan.

Then make the jam. Measure sugar and set aside. Add powdered fruit pectin to fruit in saucepan and mix well. Place over high heat and stir until mixture comes to a hard boil. At once stir in sugar. Bring to a full rolling boil and boil hard 1 minute, stirring constantly. Remove from heat and skim off foam with metal spoon. Then stir and skim by turns for 5 minutes to foam slightly, to prevent floating fruit. Ladle quickly into glasses. Cover jam at once with 1/4 inch hot paraffin.

### America's Richest Women Named

America's ten richest women — who are they? How much money do they have and how do they spend it? Are they happy? Who are they? They don't know themselves. Nor do their lawyers know, nor can they, their lawyers or their investment counselors say, even within the last \$10 million, just how wealthy they are because their fluctuating assets can only be estimated in round figures.

The September Ladies' Home Journal names the ten women who are probably the very richest and tells, briefly, their life stories. Those listed and their estimated fortunes are: Doris Duke, who acquired her father's American Tobacco Company fortune at age 21 (\$300 million); Mrs. Edsel Ford, heiress to Ford Motor Company millions and J. L. Hudson, Detroit department store (nearly \$300 million); Mrs. Merriweather Post, whose father developed and popularized Post Toasties and Grape-Nuts (\$250 million); Mrs. Horace Dodge Sr., widow of the motor car manufacturer (\$250 million); Mrs. Frederick E. Guest, whose father was a partner of Andrew Carnegie (\$200 million).

Worth between \$125 million and \$200 million are Mrs. Alfred I. duPont, whose husband's family got its start with a gunpowder mill on the banks of Brandywine Creek; Mrs. Charles Shipman Payson, the former Joan Whitney, sister of Jock Whitney, U.S. Ambassador to Great Britain; and Mrs. Mary G. Roebing, one of the nation's ablest banking brains. Mrs. Chauncy McCormick, heiress of McCormick and Deering farm implement fortunes, has an estimated \$120 million and Helena Rubinstein, the list's only self-made woman, has a personal fortune around \$100 million. How do these women spend

*Photo Wide World*  
Doris Duke, the most publicized and reputedly richest woman in America, acquired her father's American Tobacco Company fortune at age 21.

their fortunes? They can—and do—buy anything they want. But they spend more on helping crippled children, finding causes for diseases, relieving poverty and raising education standards than they do on themselves.

Are they happy? Most of them are unhappy about the publicity they get. They can't marry, have children, get divorced or write a check without getting attention, which always prompts letters asking "Why do you have so much money?" and "If you have so much, why can't you give me even just one million?"

The biggest problem of a woman of immense wealth is more personal. As one woman put it, it is "finding a place where she can feel she is needed and is doing something worthwhile enough to be interesting."

## Spirited Work-Outs Are Held By Whirlwinds

Fifty-four boys answered the call Monday morning when football practice was started for the Whirlwinds. Though a few more will show up as farm chores release them when school starts this is expected to be balanced by those who drop out as the training schedule gets rougher. At present the squad is putting in two sessions a day. One starting at 8:00 a. m. and another at 4:00 p. m.

Working with these prospective winds are Coaches Prenton Watson, Charles Tyler, Paul Huntington, and Pete Fuglar.

Fourteen lettermen showed up for practice about as was expected, however, James Teague, starting offensive center, has a foot in a cast and it appears he will be out until mid season at least.

Teague broke a foot in an accident before the season training started. This throws another position wide open for the eager pack which will be battling for starting berths in the first game. At press

ent there appears to be no one with starting position that is secure. The coaches prefer to look over all the material before giving the nod to anyone.

Only a short 10 days of training from the first day of suiting out until the locals take the field against the rugged Wellington Skyrockets on September 6

And even before this date there will be at least one practice scrimmage for the green and white. Their first outing of this kind will be Saturday evening at 4:30 when they entertain the hard hitting Crowell Wildcats.

If Coach Red Ammonett's Cats are up to par this year (and they are expected to be) they will show up Saturday in mid-season form and ready for several hours of all-out play.

Returning lettermen which should furnish the backbone for the 1957 season include Buttons Beedy, 156, end, senior; Bill Patterson, 166, end, junior; Co-Captain Grant Cooper, 170, fullback, senior; Danny Shipley, 187, tackle, sophomore; Ranny Vickers, 136, guard, senior; Co-Captain Ronnie Downing, 163, quarterback, senior; Gary Huckabay, 158, halfback, senior; Bill Gilliam, 170, back, sophomore; Don Vickers, 168, back, sophomore; Vaughn Ginn, 209, center, senior; Dale Lawson, 186, tackle, senior; Leon Williams, 140, halfback, junior; Frank Potts, 165, back, senior.

To go with this group is a number of squadmen with freshman and B team experience and some twenty freshmen.

## SAW FILER WHO KNOWS SAW FILER ? ? ? ? ?

Last Friday at noon, a man who has been making this territory for several months filing saws came by our place and picked up our last saw for filing and we paid him in advance, \$1. We have not seen him since. He claimed to have filed 36 at Silverton, one trip after the TORNADO. He is tall, slender, about 50, always walking. Anyone knowing his name or address — LET US KNOW AT ONCE. His last trip here before was about first of July. A saw disappeared out of our building that week.

## Cucumber Crop

(Continued from first page)

town is expected to be ready for the first movement to the processing plant Monday. He has an excellent crop and if the market holds it should show him a good profit.

Brown & Davis, south of town on the Halls Road, were getting good production off of a small field this week. They planted in the sign of the twins. (Gemini) Hubert E. Davis said, and are getting a good many "twin" cantaloupes.

Ferguson & Kimble, probably the county's biggest single vegetable growing partnership, have, in addition to their connections with marketing facilities at Floydada and Lockney, a trucking arrangement for marketing in some of the big centers, particularly San Antonio.

Their production began with onions, ran through potatoes. They are now moving cabbage, and have peppers, squash, carrots and lettuce in the field in various stages of growth and maturity. They even have an acreage in pumpkins again this year.

In all Ferguson & Kimble acreage of various types of vegetables runs above 325 acres.

## Fred Cardinal Heads Quarter Backers Club

Whirlwind quarterbackers gathered last Thursday night in a called meeting and elected a slate of candidates for the coming year. Named to serve the group were Fred Cardinal, president; Roy Teague, Vice-president; Gene Collins, Jr. treasurer; and Kenneth Rimmer, secretary.

Cardinal replaced Gene Collins who has moved to the treasurers post. Roy Teague, another new officer for the club, took the post vacated by L. D. Britton. Rimmer was re-elected to the secretary's job.

Elected as directors to serve with the above named group were L. F. Oresham, Jim Word and Jake Watson.

The group voted to meet on the first Monday night following home football games. This will place the first scheduled meeting on September 9. However there will be an informal meeting of the club and preliminary business session on Saturday August 31, at the Floydada - Crowell vinnage.

Fans interested in the club's activities are asked to turn out early (the scrimmage starts at 6:30) and gather in the east stands. Matters to be discussed will be brief and all will be able to see the play on the field.

The club's membership drive is to get underway immediately and all Whirlwind fans are invited to get their names on the roster. Dues are \$1 per year and 100 per cent of this goes for the benefit of the high school athletic program.

The Quarterback Club has not as yet set all their project goals for the year. Under consideration is the purchase of a modern high quality movie camera for use in taking the training films. This project is now being studied by the group.

Those present Thursday did vote to finance the filming of five games to be picked by the coach. If no camera is purchased this will be done with a rented machine.

## HALF MINUTE INTERVIEWS

Bob Gibson: "We've got a mighty good crop in the making in Floyd County."

Ralph Johnston: "We have plowed up several sprouts from last year's cotton that didn't get killed out during the winter."

## PEOPLE'S FORUM

To The Hesperian:  
BOYS RANCH BODEO WILL BE FAST MOVING ENTERTAINMENT

Sunday and Monday (Labor Day) the annual Rodeo at Cal Farley's Boys Ranch northwest of Amarillo will be held.

This is not a make shift rodeo, but a rodeo conducted in a fast moving manner that pleases everyone.

Floyd County and adjoining counties have been pretty generous in helping save the boys for better citizens.

Now go and see for yourself how big, how necessary this task is and see what a worthy cause it is.

Dozens of buildings, plenty shade, hundreds of seats, plenty of entertainment in store for you. Those attending last year were highly pleased with what they saw.

The admission is low and for one of the best uses in America.  
C. L. Berry.

King to be acting securities com-  
missioner, a full-time, \$10,000-a-year  
job. He is a former assistant attor-  
ney general and had charge of sec-  
urities in the secretary of the state's  
office.

Approving or disapproving prop-  
osed issues of both general and  
insurance securities will constitute  
the prime duties of the new agency.  
Formerly these functions were divid-  
ed between the Insurance, Depart-  
ment and Secretary of State's office.  
It also will supervise the licensing  
of securities dealers and salesmen.

Governor Daniel called the new  
law an "outstanding measure for  
protecting the public against fraud  
and swindling."

**Youth Council**— Frank M. Wil-  
son of Waco will be chairman of the  
new Texas Youth Council.

Other members named by Daniel  
are Louis Henna of Round Rock  
and Robert Kneebone of Houston.

New agency replaces the old Youth  
Development Council. It will have  
charge of the three state correctional  
schools for young people and the  
Corascano State Home, the Waco  
State Home, and the Blind, Deaf  
and Orphan School at Waco.

Wilson is a Waco attorney and  
instructor at Baylor University  
School of Law. Henna, a member  
of the old Youth Council, was one of  
the founders of the Baptist Child-  
ren's Home in Round Rock. A bank-  
er, Kneebone has been active in  
youth work in Houston.

**SCHOOL STUDY PANEL**— Six  
legislators and two private citizens  
are early appointees to a new com-  
mittee to study the growth problems  
of Texas public schools.

Named by Lt. Gov. Ben Ramsey  
were Sen. George Parkhouse of  
Dallas, A. M. Aikin Jr. of Paris and  
Floyd Bradshaw of Weatherford  
plus former Atty. Gen. John Ben  
Shepherd of Odessa and Laredo  
school superintendent J. W. Nixon.

Full committee will number 24.  
Ramsey and Carr were directed by  
the law to pick three legislators and  
three laymen. Governor Daniel and  
the State Board of Education are to

pick six more each.

One proposal made during the  
session was to have the state build  
school buildings and lease them to  
districts. Numerous Texas officials  
have opposed federal aid for school  
building.

**HOUSE COMMITTEES** — A long  
list of groups has been set up by  
Speaker Carr to study basic state  
problems and report to the 56th  
Legislature. They include:

**Legislative Council**— Reps. Robert  
Huges of Dallas, Wesley Roberts of  
Lamesa, A. R. Schwartz of Galves-  
ton, Tony Korioth of Sherman,  
James M. Cotten of Weatherford,  
R. H. Cory of Victoria, Menon J.  
Murray of Harlingen, Alonso W.  
Jamison Jr. of Denton, Don Ken-  
nard of Fort Worth and Harold B.  
Parish of Taft.

**State Tax Study Commission** —  
Reps. Seelgrove, Richard C. Slack  
of Pecos and John Huebner Jr. of  
Bay City.

Full list includes 12 committees—  
even a committee to study the com-  
mittees.

**HARVEST TIME** — Typical hot  
dry August weather has been good  
for harvesting, but hard on pastur-  
age and late crops.

Dry weather and insects stunted  
the cotton in central, southeast  
and coastal counties, U. S. Dept. of  
Agriculture reported, but better  
yields in the northern half of the  
state.

However, USDA noted northern  
crops are two to three weeks late  
and could be damaged by an early  
freeze.

**EGG DEALERS GET LICENSES**—  
State Agriculture Department is in  
the process of licensing some 35,000  
egg producers, handlers and sellers.

New egg grading law will be in  
effect Oct. 22. Enforcement will be-  
gin Feb. 17, 1958.

Exempts from the license require-  
ment are retailers who sell less than  
a case of eggs a week to persons  
other than consumers and produc-  
ers who do not claim a certain grade  
for their eggs.

**TEXAS LEADS IN ROADS**—Tex-  
as is out in front in the interstate  
highway building program with 283  
miles of road "in the mill."

These are projects which are either  
under construction, contracted or  
advertised for bids. Cost will be  
\$85,000,000 with \$76,000,000 coming  
from federal funds.

California is ahead of Texas in  
cost of projects, but second in mile-  
age. It has 95.5 miles underway at  
a cost of \$68,000,000.

**SHORT SHORTS**—Texas prison  
population increased 7.5 per cent  
last year for a total of 9,268 persons  
behind bars. National average in-  
crease was 2.2 per cent. National av-  
erage is 102 prisoners per 100,000  
population; Texas ratio is 106 per  
100,000.

Texas Railroad Commission re-  
tained the lowest-in-history 13-day  
producing pattern for the Texas oil  
industry in September. Several  
weeks ago President Eisenhower  
asked oil companies to cut their im-  
ports by 10 per cent. But Texas com-  
missioners said the request had not  
as yet brought any increase in de-  
mand for Texas oil.

"Intangible assets" evaluated for  
tax purposes in Texas hit an all-  
time high of \$130,790,050 this year,  
reported Comptroller Robert S. Cal-  
vert. These include such things as  
the equipment of railroads, pipe-  
lines, bus and truck lines.

J. E. Connolly of Abilene will head  
the October "Dollars for Democrats"  
drive, state party headquarters in  
Austin announced. Goal will be to  
set at least one dollar for each  
Democrat in the state.

**★ ★ ★ ★ ★ VIEWS AND COMMENT ★ ★ ★ ★ ★**

**Important to cotton growers in Floyd County** this year is the frost date. Cotton crops have been making great strides during the month of August, making up for lost time occasioned by late planting. But the crop is much later at that than was last year's record-breaking crop. First bale in the county was ginned on August 17. This year on the same date there may have been an open boll in some fields. The crop one can say has all of September to develop. It has fruited as well or better than it did last year. Question is when the freeze will hit and how much sap it will catch in the growing bolls.

**Every man to his own "sign."** Ours sets the date for the first frost or freeze on October 27. That would be much better than the October 7 that marked one year recently. November 1 is spoken of as "normal" in some quarters, but not in our book. Better "settle" for October 27.

**Better Time Now.** No one knows exactly when is the right time to get into any kind of business. Man proposes and God disposes, we know that. So the best laid plans often go awry. But now would surely be a better time to get into the cattle business with cows and calves going at 40 per cent of the price they brought scant years ago. One has only to recall the pain the old line cattlemen showed in their expressions when calves began going into the feed lots at 18 cents. Having broken the price barrier there was no telling to what price they would finally go before the big bust. So, if you think you need livestock in your farming program go into cattle now if you're going to at all. The price may not be "right" but it is "righter" by 60 per cent than it was eight years ago when the drug store cattlemen took over.

**Back Home Protest.** When you stay with any problem, and any job too closely, you become like the little girl who came to the city and complained that she couldn't see the town for the houses. Our congressman and senators, we think, are spending too much of their time in Washington. The things up there soak too deeply into their systems with too close association too long. The congress needs to be more acutely aware of the need to reduce federal taxation. As to where to begin, few if any, of the people back home know exactly what should or should not be supported. They only know that now they work for the government the first five months of their year and that pressure to increase the spending is much stronger than the pressure for reducing the tax load.

**★ ★ ★ ★ ★ KITCHEN AND ★ ★ ★ ★ ★ FIELD NEWS**

**The drive to get reduced spending runs into** such things as the plans of the congress to "fix things up" some more in Washington. For instance, \$150 million, more or less, is being spent right now for more office buildings for senators and representatives. By the end of 1961 each of the 531 congressmen will have had an average of nearly \$300,000 spent on him for office space, we are reliably told. For a time an item in the budget called for \$1,000 hand-tooled desks and \$216 posture chairs with built-in vibrators. And a new hotel is being bought to be used for offices while a big remodeling job is being carried on at a cost of \$18 million. Then the hotel will be torn down to make space for something else in future years. All of which would be fair enough if you had the money in hand and did not plan to take it out of the take home pay of millions of workers. But to deliberately plan to spend more money when the need is to spend less doesn't seem to be good logic. The congressmen ought to spend more time back home where so much of that stuff won't rub off on them.

**Luxury and Convenience.** One of the contributing factors to the high cost of automobiles is furnished by customers of the car makers. That is the continuing demand for comfort and convenience. This demand is at an all-time high, despite the complaint of the buyer that the automobile makers are asking too much for their product. One major automobile manufacturer says that every equipment option he offers has gained steadily in popularity. Automatic transmission, heaters, power steering, power brakes, radios, white wall tires, and now air conditioning. They all add up. And then there are hundreds of accessories the car owner may add after he gets title.

**What Makes Us do that way?** The fact that a good looking, smart automobile, or the desire for one, is a major interest in more families, in this part of the world, than any other "necessity." A nice home would be all right, paved streets would be fine, but the smart appearing car is a must. Why a family would not take equal pride in the home, in neat appearing premises, in a paved street, in flowers and shrubs about the place even if rented, is asked by the student of human nature. The fact of the matter is not debatable. The family thinks more of the car on the driveway than of the premises in which they make their home. We assume it is that way everywhere. It is in Floydada.

**WAYS WITH PEACHES**

Now's the time for those luscious

peaches that we look forward to every year. They can be round-the-clock flavor treats "as-is" or they may be served in numerous simple ways.

You will get the greatest satisfaction from peaches if you watch for certain signs of quality when buying. Select peaches that have a creamy or yellowish color because they will continue to ripen at this stage. Avoid those that have a green color because they will not ripen after picking. Hold the under-ripe fruit at room temperature until it ripens. Cooking green fruit and adding sugar doesn't make it taste ripe. When buying peaches pass up the ones with hard knots, decayed spots, over ripe, or shriveled and bruised ones. The extra time required to work up plus low yield makes them an expensive purchase. Handle peaches carefully, since they bruise easily. Keep ripe peaches in the refrigerator.

One bushel (48 pounds) makes 18 to 24 quarts of canned peaches or 32 to 48 pints of frozen fruit. Extra large peaches are usually not worth the extra cost and probably do not have any better flavor than the medium ones.

It is a good idea to sort peaches for ripeness when you buy.

**Ripening Peaches**

Select tree-ripened peaches. (Some varieties freeze better than others—the Hale variety is considered one of the best varieties for freezing.) Peel and slice about one quart at a time, place in a bowl and sprinkle 1 tablespoon of lemon juice over them to retard discoloring; add sugar in the proportion of 1 part of sugar to 4 parts of peaches (1 cup to a quart).

Turn peaches over and over gently with a wooden spoon.

Pack into airtight containers and freeze immediately.

**Peach Preserves**  
Peel and slice one pint of ripe peaches. Add one pint of sugar. Mix and put on stove to cook. After boiling stage is reached allow to cook for 10 minutes; then add another pint of peaches and another pint of sugar and let it come to the boiling point and cook for 10 minutes longer.

Stir to keep from sticking to pan. Put into sterilized jars and seal. Store in cool place.

**Peach Pickles**

2 cups sugar; 1/2 cup vinegar; 1 cup water. Whole cloves and stick cinnamon to suit taste. Let mixture come to rolling boil. Add whole cling peaches that have been peeled. Cook just until tender.

Pack into sterilized jars and seal while hot.

Mrs. John Smitherman of South Plains called this little poem by Lura Cox Brand to my attention recently, and I would like to share it with you:
