

West resumed Wednesday in Cotton Fields

Heavy Rainfall Over Week-End Covers County

Cotton harvest was resumed on a limited basis in Floyd County Tuesday afternoon and practically all crews got into the fields by 10 o'clock yesterday, but the sorghum grain harvest was still at a standstill as late as noon Wednesday in every section of the county contacted.

Fine rains received over the week-end ended with two inches in Floydada. They brought rejoicing to wheat growers and cattle raisers, were received with mixed emotions by producers with fall crops in the fields.

Cotton and maize growers would be moving a tremendous volume to gins and elevators, and the vegetable growers would be carrying on a considerable volume of grading and packing had the weather not stopped operations.

One estimate put the probably open cotton in the fields at 20,000 bales.

On the other hand wheat growers find the conditions ideal. Wheat that has been dusted in is coming through to a good stand. Farms where the land is to have its last plowing before sowing is in ideal condition. Plowing and sowing will get going this week-end or by Monday.

Adding to the cotton man's uneasiness are the continuing reports that more showers are anticipated and the reports from the east and south that ruinous floods are over flowing crop lands, as well as highways, cities and towns.

This mid-week last year the cotton men had 36,000 bales already ginned and gins were operating all over the county on a 24-hour basis. None of the gins this season have had anything like a fair day's run.

Maize growers who tried to get started Tuesday with combines got negative moisture tests. Tests ran 15 per cent and upward.

Migrant farm labor is not ample but many crews are in the county and will move a lot of cotton to the gins any time a day or two, like Wednesday, occurs.

Cotton men are hauling their cotton to the gins in better condition than in any previous year. Instead of tramping the cotton into their trailers they are loading it into trailers and expect to get at least one grade higher on their cotton marketing cards.

Market is also helping the feelings of the cotton growers. Offers run from 50 points to 275 points above the "loan" on the better grades. Light spot middling cotton is much in demand this mid-week. If it has a 15-16teenth inch staple or better.

This week County Agent Cecil Lewis offers a suggestion that may be helpful to the individual farmer in marketing cotton. Says the agent: "Do not put light spots and full spots on the same lot note. In selling equities later they must be redeemed together and the price for light spots may be reduced because they are tied with the less desirable full spotted bales. Keep the light spot on separate notes."

"Make sure that your bales weigh between 425 and 650 pounds because the CCC and the Texas Cotton Association has a penalty of from \$1.00 to \$7.50 per bale for under and over weight bales. These penalties revert back to the producer."

The rain story is a dandy. From Floydada westward to the county line and beyond and both north and south the rain ranged between one and a half and two inches. Eastward the fall got heavier. Lakeview had more than two inches as did Fairview and Cedar. The Dougherty area and a wide strip along the creek had three inches and upward. The land really got a soaking. Northward the rainfall was an inch or more.

The principal rainfall was Saturday night, in the late hours. It was reasonably gentle and did no damage. Television reports had alerted the area to possible winds and beating rains.

Farm Bureau Convention Is Slated For Tonight

County convention of the Floyd County Farm Bureau is due to hold its most important meeting of the fiscal year tonight at Floydada High School auditorium. The meeting hour is 7:30 o'clock.

County President Robt. L. Smith said this is the meeting which will determine the farm policy this county is to adopt for this year. He urges full attendance, discussion and vote.

Since all scientific surveys of ground water in the high plains of Texas sustain the fact that the ground water of this area is an isolated and separate body of water, we recommend that in any statewide water conservation program, it be regarded as such, and that it be regarded as having no connection with any program for surface water. We contend that since this water is not the property of the state, that any control or development be on a local basis.

We are opposed to a statewide ad-valorem tax to finance a statewide water conservation program. Due to the widely varied water problems throughout the state, we feel that financing of a water program should be done on an area or watershed basis, so that each area would bear the cost proportional to its benefits from the program.

We urge Farm Bureau to voice strong opposition to federal encroachment in any function of government that can be effectively handled by any state or local subdivision thereof.

Whirlwinds Go To Abernathy Friday Night

The Floydada Whirlwinds will travel to Abernathy this week to meet the Antelopes of that city. It will be the second district outing for the Winds and the third for the host team.

Game time is 8:00 p. m. and the site is the new football field in Abernathy.

Floydada players and the fans as well as are not taking the Antelopes lightly though they have dropped several games this year. Abernathy has defeated Floydada for the past three meetings and is expected to be primed to make it four in a row if they get over their injuries and sickness which have hampered them greatly.

The Antelopes of Coach Royal James started the season with 11 lettermen, three of whom were starters last season. They defeated Clinton 19 - 0, Tulia 26 - 6, and then fell before Sundown 19 - 21, lost to Dismitt 0 - 34, and were defeated by Lockney 13 - 42 and last week were defeated by Spur 12 - 49.

The Antelopes are known to be able to play very good ball as evidenced by their first half showing against Lockney. With no injuries they can probably hold their own with most any team in the district.

Scout reports say the Abernathy team is of medium weight, has fast speed and a lot of spirit. They have been running from a Y formation. They like to pass and run wide as well as hit the line and have a good offensive attack to go with a tight defense.

Lane Tannahill is the sparkplug of the Antelope attack. Regulars from last year on the Abernathy team are A. C. Harris, Darrell Goodrich, and Donny Apperson. Along with the other eight lettermen and a fine crop of B team material which was moved up the Lopes appear to have plenty of depth.

Coach Watson's Winds were hoping to be back near top strength by game time though they had three of their big offensive guns out of pads for Monday's workout. Flu seemed to be letting up somewhat and several of those who had been ill are regaining strength.

The Floydada team will be followed to the game by the big Whirlwind band and student body and a large number of fans. Entertainment from the school bands should be a major attraction to go with the ball game. Floydada and Abernathy bands are the two outstanding marching and playing units of the district. Their half-time shows are usually exceptional.

Methodists Shifting Pastors; Armstrong Goes to Andrews

Tilden B. Armstrong, in his seventh year as pastor of the First Methodist Church of Floydada, is moving effective November 1 to the field at Andrews, where he will assume the duties of pastor.

Coming to the Floydada charge will be H. DeWitt Seago, who is presently serving the Forest Heights Methodist Church in Lubbock.

Thirteen pastorate changes were announced this week by Bishop William C. Martin in the biggest shake-up in the Northwest Texas Conference of Methodism in years.

The many changes came about by the untimely death of Dr. Orion W. Carter, pastor of the San Jacinto Methodist Church in Amarillo last month. The special conference at which the changes were planned was held at Brownfield.

The local pastorate of Rev. Armstrong is the first that has extended over a period of more than four years in the history of the Floydada church. The congregation has been strongly bound to him, personally and as a preacher. The fact that the minister and the congregation have been engaged in a five-year struggle to get a new church home built has not affected the congregation's attachment to him.

Tuesday Rev. Armstrong said he and Mrs. Armstrong had enjoyed a rest experience living in Floydada. "A good community, a good church and a good school have meant much to us in rearing our children," he said, adding that personal friendships as well have endeared the community to them. Their eldest child, a daughter, Glynell, is in her junior year at McMurry College.

American Farmer Award is Given Stanley Burleson By FFA at KC

Stanley Burleson, yesterday in Kansas City, was awarded the degree of American Farmer, highest honor that is offered by the Future Farmers of America.

He is the first boy in the history of the local FFA chapter to receive the American Farmer degree, Henry G. Barber, agriculture teacher of the school reports.

In company with Pat Gross Stanley left Sunday afternoon for Kansas City. They boarded the Santa Fe at Plainview and joined the rest of the West Texas delegation at Amarillo where they continued on to the national convention in a special car, arriving 4:10 a. m. Monday.

Stanley is the son of Mr. and Mrs. W. E. Burleson and Pat the son of Mr. and Mrs. Fred Gross. They are due home tomorrow.

Stanley began training in the FFA program when he entered Floydada High School as a freshman. He is now a sophomore at West Texas State College. His first year in college he spent at Panhandle A. & M. College, Goodwell, Okla. His mother attributes the change from the Oklahoma to the Texas school to the fact that Canyon is closer home. "Stanley spends practically every week end at home looking after his crop," his mother said.

School Festival Date Is Oct. 24 At RCA School

The R. C. A. Ward School PTA met Wednesday, October 9, with an attendance so great as to demand chairs moved in to furnish sufficient seating for the overflowing crowd in the music room.

The Annual Carnival will be in the form of a Fall Festival on Thursday evening, October 24th, beginning at 5:30 p. m. and going until 8:30 p. m.

The cafeteria will be open to serve everyone until the closing hour at which time the "country store" will open. There will be a variety of items and food that will be sold at the store.

The Fall Festival will possibly be the only money raising project of the PTA this year and with many school projects in view, such as the music, art and science department, we invite and urge everyone to attend and have fun with your children.

Speakers at the Wednesday meeting included Mrs. Arlan Miller, who in giving her views of art in our school, said in regard to the importance of creative art, "art is expressed in every life, every day. Our way of life is directed by art, our clothes, our grocery displays, even our cars and stoves and our living rooms. Work with your child but not for him in creative art. Let him express himself." Mrs. Miller gave an example of ways different arts could be exercised. It need not always be with a paint brush. She said "I take time out and sit down with my child and draw the tree in the yard. His drawing is not like mine, nor mine like his, but we have had fun."

Concerning music, Mrs. Kinder Farris said, "music, one of the fine arts, is one of the finest that may be offered a child." In 1836, music was just introduced in the school system in London, England, by a man, a mason, who gave without salary for a year.

W. P. Nicholson announced that the Science room is about available for use. He expressed himself by saying "the future of the world tomorrow may depend entirely on what our school and other elementary schools teach our boys and girls today. Our world of today is a scientific world."

The membership prize was won by room 3-B with Mrs. Margaret Springer as its teacher. There were 325 memberships sold which included 198 families. Room 3-B had a 92% record with room 2-A with 74% and room 3-D third with 73%.

The \$5 prize money will go for something in room 3-B to further their school work.

Going to a football game used to be so simple. We grabbed our ticket and a jacket and went. Nowadays it's not so easy.

First, there's the blanket to sit on or to cover our knees in case the winds grow chill. It comes in a zipper-type bag with a handle -- which makes it easier to carry, but requires stowing during the game.

If we're really comfort-conscious, we also have cushions. Add topcoats for two, a thermos of coffee, field glasses, dark glasses, a camera, and maybe a portable radio to keep up with other games in other places, and we're ready.

Now that traffic is thick, we must leave the house about half an hour before the game. This suits the male of the species right down to a T. He wants to get there in time for the warm-up anyway.

Getting settled takes several minutes. We must stow the thermos, the zipper bags and extra wraps where they won't get kicked around. We must reduce the lap-holdin' stuff to a minimum, so we can get up quickly for: a) the national anthem, b) the first long run by our own team, c) the school song, d) the visiting team's school song, e) all touchdowns.

We've heard several other frightening suggestions made by idea folks. The woman who sits next to us, for example, has decided she needs a footstool. The man who sits behind us hopes to see the day when electric plugs are installed in each box and telephone made

rentable, so busy business men can stay busier.

Did women taking up sports so avidly change the pace? Or are menfolks getting softer?

Once in awhile, we long for the simpler days when we just grabbed a ticket and a jacket and went.

Brief Glimpse at Texas Agriculture

Texas pecan production this year has been estimated at thirty-seven and a half million pounds by the Crop Reporting Board -- more than six million pounds above the 1946-53 average. Conditions have generally improved in major producing areas, but best prospects are in East Texas and along the Upper Coast. Still lagging with the shortest prospective outlook in the Edwards Plateau region, hard-hit by the drought. Of the 37.5 million pounds forecast, 31.6 million pounds are natives, 6 million pounds improved varieties.

Income Tax Waivers on profit from drought-affected livestock sales are producing problems for some Texas stockmen. Under internal revenue provisions, stock sold under such circumstances must be replaced within a year. However, farmers are not always able to find suitable replacement stock. Also, the drought continues in some areas, causing reluctance to restock. In order to maintain tax benefits, application should be made for extension of the replacement period. Farmers still hit by drought should look into other tax benefits available under the new law.

Thursday afternoon some women met at Mrs. Chil McClure to make plans to start a community club. It was decided to meet twice a month, once to have Bible study, the other to work on quilts. These present Thursday were Mrs. Chil McClure, W. U. Riggles, Lee Burton, Galn Holland, Shirley Irwin, Walton Wilson, Phyllis Burton, and Loretta and Harvey Irwin. Canyon Couple Have Been Wed For 63 Years

(By Mrs. J. H. McMurray)

Mr. and Mrs. J. H. McMurray of 1816 7th Ave., Canyon, Texas, celebrated their 64th wedding anniversary on October 1.

Visits from our children on Sunday before and on the first with presents and cards helped make the occasion more enjoyable. Grandchildren came too, also of the eighth great grandchildren and eighteen great grandchildren all could not be here.

We moved to Canyon some twenty-one years ago to be close to the college. We take the Hesperian, thanks to our children, Floyd and Florence Montgomery of Plainview. They have been sending it to us for years and it seems like a letter from home.

We would like to hear from our old neighbors and friends in Floyd county, Crosby county and other places.

Our granddaughter, Lee Ona Mae Foster, who is a student a Baylor University in Waco, is recovering nicely from the flu, another reason to be thankful. She is the daughter of Ruby, our second daughter, as many will well remember.

Another daughter, Mrs. Lee Allen of Amarillo, visited us yesterday. We will not have many more anniversaries, probably none, as we are 81 and 87 years of age. We do hope to hear from a lot of friends and relatives, but if not, then all meet over there in a better world than this, where we will be forever with our Lord and loved ones.

Wishing all success and happiness we are your friends.

Mr. and Mrs. Joseph H. McMurray

Mr. and Mrs. Lee Burton and children enjoyed Sunday dinner with Mr. and Mrs. Clyde Burton of Floydada. During the afternoon they went to South Plains to visit in the home of her parents, Mr. and Mrs. J. T. Myrick. On the way home they stopped to see Mr. and Mrs. Walton Wilson and Judy.

Brenda and Larry Walls spent Friday night with their grandparents, Mr. and Mrs. E. W. Walls, and Mrs. Don Branson and Spivey, and Mrs. T. C. Goodman and children, visited Mr. and Mrs. Grady Reeves Saturday.

Mrs. Grady Reeves visited her mother, Mrs. L. B. Corby Sr., Friday afternoon.

Mr. and Mrs. Albert Mize, Mr. and Mrs. Sid Brown and Mr. and Mrs. Walton Wilson visited Mrs. W. B. Wilson Monday night.

Mrs. Ray Hopkins and sons of Taboka visited Mr. and Mrs. W. W. Baxter Friday afternoon.

We are sorry to learn that Patricia, daughter of Mr. and Mrs. Lewis Marley, is quite ill at this time. We hope that she will soon be much improved.

PEOPLE'S FORUM Seeks Support Of Road Bonds On November 5

Having been somewhat knocked out by two operations last summer and this, followed by a severe heart nerve attack, I am not too active as yet. Since getting out of the hospital have spent my time mainly at home. Therefore, have heard very little of the sidewalk conversation. But as so many people have cooperated with the great God of the universe, I am doing pretty well at the present time.

One thing of interest that I have heard about over the radio and read about in The Hesperian is that we are to have a road bond election next month.

I feel that after living in, or at least existing in, Floyd County for 70 years I should be interested to some extent in such. I have seen Floyd County with perhaps less than 50 acres of her soil distributed by a plow. Now, perhaps, too much of it is in cultivation. Who knows?

Have seen our school system from no school at all with only four or five children of school age in the county to our present school system and scholarship, of which I am proud.

Changes in many lines, one that of roads. When we came here we had no roads at all, and now I think we have a pretty good road system. Our highways and farm to market roads sure are a big help. A lot of this almost forced on us as I see it, for we have had a habit of generally voting down road propositions.

I appreciate the attitude of our people about the line of indebtedness. I do believe our government and on down to individuals have gone too far in debt.

Personally I have not lost all of the little that I possessed by plunging into debt so wildly as some have done. On the other hand I have missed opportunities of making by being too cautious.

I do not wish to help heap on the rising generation an unreasonable obligation, yet on the other hand I do not wish to deprive them of reasonable, convenient and safe (as man) means of transportation.

Although, if I live a few months more I will be four score years old and cannot hope to use these roads much, still I would like to help provide as good and safe roads as possible for my children and grandchildren and you and yours.

We know there are no fool proof roads but also know that some are more inconvenient and more dangerous than others.

This present proposition, as I understand it, is not exactly to my liking. It seems to be the best that has been offered. The question with me is can we afford to turn it down? My answer is no.

In this we are to pay only one-half of the right-of-way through the county. To be sure we help pay the part that the highway department proposes to take care of out that has already been paid and they seem to want to spend it here in our county and will spend it somewhere. So why not let it be done here where they think best and will benefit us most?

With what I am saying I do not expect to change your vote, but do want you to know where I stand on the proposition.

If you feel like going to the polls on November 5 and vote as I hope to, for the bond issue, I will appreciate it. But if you think best to vote no, go and vote your sentiments.

Yours for better and safer roads.
J. T. McLain

Rites Held For Former Resident, at Wichita Falls

Funeral service was held Thursday, October 10, for Don B. Robertson, 74, former resident of Floyd County, in Wichita Falls in the Star Avenue Baptist Church. Burial was held in Petrolia Cemetery.

Mr. Grain Sorghum Producer

A serious problem for grain sorghum producers has developed. A declining market with a continuously expanding production for exceeding the present demand, makes it imperative that the farmer himself take some action to rectify the situation. You will agree that for a more prosperous agriculture area, the market for grain sorghum must be expanded and more favorable legislation enacted.

The Grain Sorghum Producers Association is attempting to improve the "picture" for grain sorghum producers through an expanded program of RESEARCH, MARKET DEVELOPMENT and LEGISLATION. There is now an agriculture economist experienced in grain marketing on the Association staff to develop these activities.

We urge you to support this program by requesting your local elevator to deduct TWO POUNDS OF GRAIN out of each 1,000 pounds you deliver and deposit it to the account of the Grain Sorghum Producers association in your name.

Every grain elevator in Floyd County has agreed to deduct the grain with your permission as their contribution to this program.

Reduction Plan Report Received By Farm Group

The board of directors of the Grain Sorghum Producers Association at a meeting at the Herring Hotel in Amarillo last Friday, heard Frank Moore of Plainview and R. G. Peeler of Hereford report on their recent meeting in Washington, D. C. with 24 other commodity groups.

Moore and Peeler presented the Surplus Reduction Plan to the Washington meeting. By this plan the farmer leaves out of production 15 per cent of his land with no pay in exchange for 75 per cent of old parity on price supported crops.

Ewald Quebe, one of the Sorghum Producers board members, said there will be another meeting on Nov. 27 in Omaha, Neb., for further study of the Surplus Reduction Plan. All groups are in favor of the plan with some changes. The final plan will be presented to Congress at the next session.

Bill Nelson, executive vice-president of the Sorghum Growers, reported to the Amarillo meeting a favorable reaction to the plan to deduct two pounds per thousand pounds from the farmers at the elevator in support of research, marketing and legislation, Quebe said.

Seventeen counties were represented in the Amarillo meeting, including two new ones, one from Texas, and one from Oklahoma.

FB Convention

(Continued from Page One)
We also urge that every attempt be made by Farm Bureau to seek a reasonable interpretation of the child labor law and, if necessary, seek legislation to amend the law to place the responsibility and liability for violation of the law upon the contractor or crew leader instead of upon the farmer.

We are concerned not only about the fact that agriculture as an industry has no effective organization on public relations, but also that much of the recent publicity relative to agriculture has been presented in a manner which has tended to divide farmers and to cause the non-farm population of this nation to regard farmers as a drag on the economy and a burden on the national treasury.

We therefore recommend that the Texas Farm Bureau take appropriate action to insure more favorable public relations for agriculture in Texas. We further suggest that this might be done by establishing a public relations committee on the state level.

We recommend also that the American Farm Bureau Federation take the lead in disseminating non-partisan factual information on the problems of American agriculture through nationally circulated publications and through radio, television, and other methods of nationwide communication.

We urge the changing of the present livestock marketing act to permit farmers to contribute to a meat promotional fund to help themselves. This is a voluntary program and we approve the check-off schedule of 10c per head for cattle and 5c per head for sheep and swine. This cannot raise the cost to the consumer for it is paid by the producer in an effort to promote the sale of his own products.

We also suggest continuing efforts by Farm Bureau to obtain more accurate classing of cotton by the government's classing offices and to have a "light spot" classification for cotton under the government own program.

Grain Sorghum—We feel that since grain sorghum is a widely grown and commercially important feed grain and since it compares favorably with corn as a grain in feeding operations, it should be recognized under any government price support program as being on a par with corn. We specifically urge that it be supported at the same percentage of its parity value as is corn under any concurrent program.

We recommend that the farm to market road program be continued and extended until all Texas farms have reasonable access to markets on all-weather roads and we recommend that where possible priority of road improvement be given to school bus routes and to mail routes.

We urge the Texas Farm Bureau to use all its influence to prevent the removal of the Texas goat to work laws from the statutes of the state.

Casa de Amigos Proves Popular

(By Mrs. Gene Arwine)
The response to our migrant labor family meeting place was gratifying both Saturday and Sunday. It has an advantage to the center, had year, more room and better facilities for everyone which is greatly appreciated by the laborers.

We now have two volunteer registered nurses that will be on hand at all times to help anyone who needs medical attention. They are Mrs. Wesley Carr and Mrs. Oleta Stores. Any other registered nurses who feel they could help out in anyway are asked to get in touch with either myself or Mrs. Bill Brown, our local chairman.

Rev. Daniel Hernandez of the Latin-American church led the worship service Sunday, and two members of his congregation were most helpful. Worship service begins following the free movie on Sundays.

David Harrison of Lubbock, area supervisor for the Texas Migrant Ministry, will be here both Saturdays and Sundays to be in charge of the Center.

A display will be put in the window each week on worship and on recreation and anyone having old toys, color books, paints or other items that could be used will be most welcome.

Women who volunteer as hostesses for the Center will have two hour shifts, from 1 p. m. until 3 p. m. and from 3 p. m. until 5 p. m. on Saturday and from 2 p. m. until 4 p. m. on Sundays. All are asked to get in touch with Mrs. Billy Brown.

The Center is a non-profit and self supporting and all Latin Americans are urged to attend. All churches in this area are invited to participate in the project.

Industry Celebrates Week

operations come the transporters and the refiners of the oil products ready for the distributors.

Playing a major role in the distribution of oil products in this county are scores of individuals. In fact the handling of petroleum and petroleum products is probably only second to agriculture in the number of persons gainfully employed.

"Strange as it may seem," says Floydada Oil Information Committee Chairman S. E. Sparks, "people buy and use the two principal petroleum products without ever seeing them."

"In fact," he said, "crude oil can be pumped from the depths of the earth, pipe lined to a refinery, processed into gasoline or fuel oil, moved to the market place, then to the consumer's car or home and actually be consumed without ever having been seen or touched by anyone."

Tank trucks are a familiar sight

on roadways. They keep service station tanks filled and, indirectly, keep the customer's tanks full. Tank truck drivers deliver gasoline and fuel oil to farms, factories, to railroad and business terminals. Giant trailer trucks haul gasoline and other products from refineries to distribution points particularly in remote areas not served by pipe lines.

The last census shows 1,999 petroleum bulk stations and terminal establishments in Texas with sales amounting to approximately \$626,670,000 a year. Bulk storage capacity amounts to more than 330,498,000 gallons for petroleum products and an additional 29,438,000 gallons for liquid petroleum gases.

These Texas establishments own and operate 5,203 tank trucks and employ some 15,156 people in wholesale distribution alone.

Most people come in direct contact with the oil industry through the last ten feet of hose leading from service station pumps to their cars.

There are 11,992 service stations in Texas with annual sales amounting to nearly \$643,999,000 annually. These stations employ some 26,275 people.

Some operators own their stations outright, while others lease the properties from supplying companies. In both cases the dealers are in business on their own and it's up to them to make good.

Texas consumes large quantities of petroleum. There are 3,052,095 automobiles, 16,336 buses and 8090, 553 trucks on the roads. Highway consumption of gasoline is in excess of three billion gallons each year.

Farm vehicles account for another 316,724,500 gallons of gasoline a year as well as thousands of gallons of oil. Industrial consumption in Texas reaches 3,166,000 barrels a year, railroads 7,761,000 and utilities another 91,000 barrels.

"Statistics like these are head-spinning," Sparks said, "but they give a measure of the oil industry's never-ending job of serving and supplying the people of Texas."

The OIC spokesman emphasized that petroleum, both as a product and as an industry, contributed immeasurably to the growth and development of not only this state but the entire country as well.

"Our citizens, thanks to oil, enjoy a degree of comfort, convenience and security unequalled in any other part of the world," he said. "We have luxuries and services our ancestors never dreamed of and we also have more leisure time to enjoy them. They lead to a richer, more pleasant life."

Dougherty News

(By Mrs. W. J. Ross)

DOUGHERTY, Oct. 14—Rain was general over this area Saturday night. Reports show slight variations but approximately three inches.

There were twenty-nine present at Sunday School October 13.

Rattlesnakes are reported more numerous than usual this year. Everyone should be on the alert as it is the fact a rattlesnake does not always warn before he strikes.

Everyone should be informed on first aid case of a snake bite. In recent days a Latin-American farm laborer in the Plainview area suffered a snake bite. His life was saved by immediate treatment. A prized colt on the Saul Ranch died of a snake bite last week. About two weeks ago a pure-bred English Shepherd puppy died of a rattlesnake bite at the Henry Harris place on the rim of the Canyon. A rattlesnake was killed on the highway near the W. J. Ross mailbox recently.

The Boy Scout first aid book reports that snake poison is a chemical substance that spreads rapidly in the circulation. First aid should be given instantly. First, apply a tourniquet from 1 1/2 to 2 inches above the bite (remember to loosen the tourniquet at brief intervals) quickly make the wound bleed by laying each fang hole open with an X cut with a sharp knife or razor blade. Squeeze gently and rub toward the wound, keep quiet as possible, keep the bitten place still, and receive medical attention quickly, also keep a wet dressing on the wound until a doctor is reached.

An elderly friend told me in early days a child was bitten by a rattlesnake and it was hours before they could reach a doctor. First aid by immersing the wound in salt and dipped in kerosene saved the child's life.

SOIL CONSERVATION DISTRICT NEWS

OUR SOIL ★ OUR STRENGTH

Edwin A. Barker, cooperator of the Floyd County Soil Conservation District is a firm believer in soil improving crops.

Barker, who lives two miles northwest of Providence, first interplanted mung beans with grain sorghums in 1933. Since that time he has increased his acreage until now all of his 170 acres of grain sorghum and kafir is interplanted with this legume.

"The reason I like mung beans is because you don't need any special equipment to plant them", Barker said. "Since mung beans are about the same size as grain sorghum they can be easily mixed and planted in the same planter box. I have increased my yields over 1.3 of previous production by using this legume", he said. This was without use of any commercial fertilizer.

Barker has rotated his cotton following grain sorghum and mung beans each year. He stated, "I get better penetration of my irrigation water than ever before and it has also saved me at least one irrigation."

SCS technicians say that mung beans are a summer annual legume. They can be used for hay, temporary pasture, ensilage, food or soil improvement. They also aid in decreasing evaporation loss of water due to their shading effect. Although they do not produce quite as much foliage as cowpeas they compare favorably with cowpeas in ability to store nitrogen in the soil. Mung beans are considered a shallow rooted legume.

Barker said that he had encountered no difficulty with volunteer stands of mung beans in his cotton the following year.

Farmers in the district who are not using a soil improving crop in their rotation are urged to include this in their plans for next year.

Mr. and Mrs. R. B. Rosson, who returned recently from a trip to Greenville, North Carolina, reports their son, Lt. Barry Rosson of the Air Force, still in a Greenville Hospital but doing nicely. His stay there will be indefinite.

Mr. and Mrs. Bobby Finley of Tulsa visited the week end here, guests of their parents, Mr. and Mrs. Bob Finley and Mr. and Mrs. R. B. McCravy.

Mr. and Mrs. Mose Simpson, of Albuquerque, N. Mex., were at home for a couple of days last week on business.

VIEWES AND COMMENT

The Baseball World. Only last week the World Series games had the American sports fans by the ears, but it was noticeably adult ears, not little tads. Also the City of New York, which had three major league teams now has only one—and accepts the new situation calmly. And on the West Coast there is only lukewarm reception in many quarters to the fact that Brooklyn and New York teams are moving in to two major cities in California, almost as much unfavorable as favorable comment. Furthermore, when the Dixie League series wound up in Atlanta or wherever it was this fall, the crowd which watched the outcome of the final game with bated breath consisted of 1,325 souls. The story of this last episode did not reveal how many youngsters were in the crowd. What we infer here is that baseball as the national pastime is on the way out. Only the superb performers get the praise and the attention—and that from elders. Even the youngsters who are playing ball on the sandlots do not seem to have the thrill that the Burdettes, the Mathews' the Berras and Mantles would have created had they been contemporaries of Covalleskie, Plank Honus Wagoner or Cy Young. Baseball has been a wonderful institution and there'll still be lip service to it for a number of years. But baseball doesn't move fast enough for a new generation.

Cold weather is on the way . . . soon you'll be turning on the heat again. But before you do, remember this: stoves and heating systems are a major cause of home fires. So have your furnace checked now . . . and cleaned, if necessary. Have the pipes and flues inspected, too. Be sure your chimney is in good condition, and that all stoves and space heaters are clean and in good repair. Stop fires!

Fall For Fishing. Now is really the best time to go fishing in Texas. For one reason because most people take their vacations in the summer and so there won't be so many to bother you and the fish. Likewise the skiers will mostly be out of the way. Fishing also is good in the spring, before the heat and the tourists set in. Everybody almost picks summer for their fishing expedition. Spring would be better, so would fall. Even winter.

One writer, speculating on why people take their vacations in the summer, supposes it is because people have done it that way so long and we're too full of inertia to make a change. But many good anglers hang up their rods in July and August unless they are able to go to the mountains. There they get mashed in the mad rush. Fall is the time for the best fish and biggest in Texas.

The smart conductor of this column might as well go the whole hog on advice to sportsmen. If you're a hunter and have habitually worn red to keep from getting shot, change to yellow. It can be distinguished more easily and quickly than any other color. Red is one of the worst colors. Next to yellow comes orange, then green, followed by red.

The Good Rains. The good rains of the last two weeks have been received with mixed reactions over Floyd County. Whereas many hailed the rains as the salvation of range lands the assurance of good wheat planting and growing seasons, many who have a year's work standing in the fields ready to harvest, dread the damage the rains may do to their feed and fiber before they can get it to market. Generally, however, rainfall is not as damaging as it sometimes gets credit for being. How cotton is handled, for instance, after a rain, has more to do with the grade the producer gets than does the rainfall itself. Anyhow, the dry land farmer needs a break and we are happy to see him get it.

Dallas' Football Mob. The week-end of the Texas-OU game in Dallas saw mobs of irresponsible take over the down-town section. Little boys who are inclined to destruction got a good lesson from some of their elders. It was all in fun no doubt, but just how much fun can be put up with by Dallas people and the rest of the state who would like to see the Dallas Fair and the football game is debatable. How to let the carnival spirit have full sway without the hoodlums taking over is a problem that Dallas will have to work out.

FOOTE BUTANE & OIL

Butane — Sinclair Gasoline & Oil Products — Wholesale & Retail

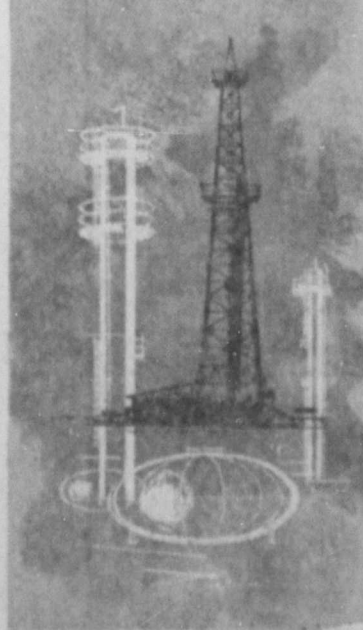

THE WONDROUS YEARS OF OUR TIME...

It's a fact that:

Today's gasoline is the biggest bargain on your shopping list. In the last five years gasoline quality has increased tremendously, but the price of gasoline has gone up only 2 1/2 cents a gallon. (However, for every dollar you pay for fuel itself, you pay an additional 40 cents* in federal and state taxes.) Still, gasoline itself costs less than many other items you buy today. Yes, with today's gasoline you're driving a real bargain!

OIL PROGRESS WEEK OCTOBER 13-19

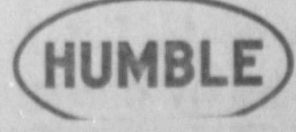

Man's use of petroleum — of oil and natural gas — began before the first records of history. But petroleum's full usefulness to man has been a matter of decades only. They have been wondrous years, those decades. Years that saw automobiles built by the millions because gasoline was available as a cheap source of power. Years that saw the oceans dwindle under the high speed of great ships powered by oil. Years that saw the evolution of a more comfortable living in homes warmed by oil and natural gas. Years that saw rubber, fibers, paints and many other useful items of everyday living produced from petroleum's hydrocarbons. Years that saw the earth shrink under the wings of the airplane, and great wars decided by the availability of oil. Thus, the oil industry has led the way into the wondrous years of our time. The industry, through foresight, ingenuity, research, and risk-taking, has found and produced the oil required in greater quantity each year, has conserved

oil for the future, has devised the transportation systems that move oil economically, has built the refineries and plants that convert crude oil and natural gas to the hundreds of useful products needed by a growing United States. The Humble Company, founded in 1917, has participated in petroleum's progress during four great decades, and has pioneered in the development of many current techniques for finding, producing and refining oil. This week, with the industry, Humble invites you to consider the variety and extent of oil's progress... Surely no other industry has contributed more to the making of modern America.

HUMBLE OIL & REFINING COMPANY

It's a fact that:

your gasoline dollar stretches further!

Yes, your dollar goes further when you buy today's gasoline. In 1920 your dollar bought 2 pounds of coffee and about 4 gallons of gasoline. Today's dollar buys less than one pound of coffee but your gasoline dollar buys almost 5 gal-

lons of top quality fuel. True, direct taxes* add 30% to your gasoline bill... yet gasoline itself still costs less than most items on your shopping list. Yes, with today's gasoline you're driving a real bargain.

Highlights And Sidelights From the State Capitol

(By Vern Sanford
Texas Press Association)

AUSTIN—There's talk now of not just one, but two special sessions of

the Legislature. East Texas House members, who served as a tightly-knit team in pushing pro-segregation laws last spring, are asking Governor Price Daniel for a chance to put through some more. Texas needs laws to prevent the kind of trouble that developed in Little Rock, say the East Texans. Specifically, they propose (1) a law to allow local boards to close schools in case of riots or occupation by troops and (2) a measure directing Attorney General to assist local school systems involved in federal

suits to enforce integration. Daniel said, "It may be we should take some further action." But he said he thought the East Texans were wise in not suggesting the segregation issues to be added to the agenda of the session which opened Monday. It was called to work on lobby registration, regulation of practice before state agencies, water conservation and crime study. Most observers think thrashing out all the details on these will take a full 30 days.

FOUR INDICTED—Travis County Courts, which serve as the arena in which state officials are taken to task, are due many more months of statewide attention. After four months of studying the history of the ICT Insurance Co., a Travis grand jury returned perjury indictments against former insurance Commissioners Garland A. Smith and J. Byron Saunders. It also indicted ICT's onetime manager, Ben Jack Cagle, on charges of bribing the commissioners. Also Smith's son-in-law, Max Wayne Rychlik, on perjury charges. Jurors recommended state laws be strengthened, particularly in regard to liabilities and responsibilities of company officers and board members.

There wasn't time to go into legislative lobbying, said the weary jury. But it urged a law requiring registration and expense reports by lobbyists. Proof that the jury's tiresome task took its toll was the hospitalization of one member just as the term ended, reportedly suffering from "physical exhaustion."

WATER PREVIEW — Sectional rivalries and lack of money hobbled past efforts for an overall water conservation program in Texas. So said speakers at the Texas Water Conservation Association meeting where water problems confronting the special legislative session were previewed. State Water Board Chairman R. M. Dixon said his department has never had enough money to carry out its assigned duties. He asked for more money to gather data and pay salaries comparable with other state departments.

House Speaker Waggoner Carr pointed out that legislators have had trouble getting together on a water program because they reflect the conflicting ideas of their constituents, said Carr. He urged cooperation. Governor Daniel recommended a water plan to take care of needs up to the year 2000. We can go forward," he said, "and guarantee the future growth and prosperity of our state, or do nothing and face economic stagnation."

WATER AMENDMENT — Governor Daniel has expressed great pleasure over the wide spread interest in passage of the Constitutional Amendment for water development. He pointed out that the measure, which is third on the Nov. 5 ballot, has received the endorsement of the state's leading organizations and associations. "Each day's mail brings additional support from local chambers of commerce and other civic organizations, as well as private citizens interested in the welfare of Texas," the governor added.

ROD AND GUN STATISTICS

Texans spend twice as much money to hunt and fish as they do for admission to all football, baseball and basketball games, plus all other spectator sports, plus all movies and other theatrical attractions combined. So said L. A. Wilke of the Texas Game and Fish Commission at a Rotary Club luncheon in Austin. Here are some other facts with which Wilke surprised the Austin Rotarians: Anglers and hunters outnumber golfers 9 to 1. They also spend more on hunting and fishing than all Texans spend on medical and dental care and hospitalization insurance.

FLU CASES PILE UP — "That foreign flu" is getting familiar to Texans. Reported cases doubled in a week, according to the State Health Department, bringing the total of flu-like illnesses to 62,319. A number of schools had to close after absences skyrocketed. Many others canceled football games, band concerts and other special events.

COTTON FORECAST UP—Texas 1957 cotton crop will be 83 per cent of normal, says the U. S. Dept. of Agriculture. October estimate is for 1,100,000 bales - a half million aies more than was expected in September.

USDA also reported that mild fall weather was helping farmers in many areas. Scattered showers brought up winter wheat on the plains and encouraged volunteer oats and other pasture for cattle over wide areas. Weather also was favorable for harvesting peanuts, rice and sweet potatoes.

APPOINTED BY GOVERNOR — Named by Governor Daniel to serve on state boards are: W. W. Heath, Austin attorney, rancher and banker; to the State Board for Hospitals and Special Schools; Dr. B. B. Brown of Dallas (reappointed) and Dan McKnight of Rocksprings to the State Board of Pharmacy; Dr. Eimer C. Baum of Austin, Cyrus Hill Lambert, a pharmacist of El Paso, and Dr. William Hibbitts of Texarkana, to the State Board of Health.

Dale Broussard of Beaumont and Norman Bratcher of Denison to the State Board of Morticians.

SHORT SNOOTS — People in Brazos County, home of Texas A&M are unhappy. Their county was assigned auto license plates with the prefix letters TU. That, to Aggies, sounds too much like the initials of their arch-rival, the University of Texas. What they don't know is that tags with AM letters now are appearing on Austin cars. . . . Texans leaving the Armed Forces in September was more than double the number entering service, reports State Selective Service Headquarters. . . . Despite an attorney general's ruling that the House speaker and lieutenant governor are legally entitled to Capitol living quarters, former State Sen. Joe Hill is still trying to get them thrown out. Hill has carried his fight to the Court of Civil Appeals where he contended the practice was unconstitutional and "ridiculous," besides.

HERE'S ONE "INVENTION" THE RUSSIANS CAN KEEP

No doubt the Russians claim to have invented "service" station, like everything else. But if this is an example of their ingenuity—let them keep it. Who wants it? A "service" station with no windshield. No friendly attendant to wash your windshield. And there are only five of these stations in all Moscow! That's the result of an oil industry in the State—not by the wishes of its customers. Compare that situation to ours in America. Here you can choose our favorite station from literally thousands. Makes First District Tahoka Bulldogs 34-0

Tahoka rushed for 57 yards net on the ground and made 10 yards in the air as they completed 2 of 9 passes tried.

In the other statistics it was Floydada 22 first downs and Tahoka 7. Floydada 8 penetrations and the visitors none. Floydada was penalized 86 yards and Tahoka 25.

Opening the game it was Vickers who did the kickoff chores and toed it to Karl Prohl on the Tahoka 20. He returned it 14 before going down. Tahoka was held at their 42 and forced to punt with Jerry Brown kicking to Potts on the Floydada 30 from which point he ran it back 11 yards to the 41. The 'Winds fumbled very shortly and Prohl recovered for Tahoka on the Floydada 45.

The Tahoka attack again sputtered and Rannie Vickers dropped Prohl for a long loss forcing them to punt from their 45. Brown's kick again went to Potts at his 32 and he brought it out to the 41.

This time the 'Winds had made a first down on the visitors 46 before a fumbled snapback from center squirted high and charging guard David Bray took the ball for the Bulldogs.

The dogs were again held for no gain and punted from their 47 out of bounds on the Floydada 25. This time the 'Winds began to move and advanced the ball deep into Bulldog territory. The big gain came on a 35 yard run by Potts and featured some of the finest blocking

seen this season, Bill Gilliland being among those key blocks for the ball carrier.

The drive died, however, following a penalty and then a fumble and Tahoka took the ball at their own 30.

The Floydada defense failed to yield a first down yardage and Tahoka faced a punting situation as the first quarter ended.

Opening the second period Brown kicked from his 37 to Potts on the Floydada 25. Potts ran the ball out to the 39 where he was downed. The 'Winds then drove in quickly to the Bulldog 10 and again fumbled the ball.

Floydada held and Tahoka punted to Potts at midfield where he returned it for five before going down.

This time with passes mixed with the running game the green and white moved in to the one yard line and Potts hit for the final yard to score the first counter. Huckabay's kick for the point after was no good and the score was 6-0 with short time remaining to the half.

In the third quarter it was Katie bar the door from the opening whistle. Tahoka's kickoff went to Rannie Vickers on the Floydada 11. Vickers found some ready blockers in his teammates and did some fine running on his own as he carried back to the Bulldog 47, looking for a time like he would go all the way.

Moving fast the locals drove down field and soon Potts picked up a first on the 12. Three plays later Cooper went over the middle to score from the 2 and Huckabay added the conversion to make the score 13-0.

Floydada kicked off and held the visitors at their own 20 forcing them to punt. The punt went to Franks Potts at the Floydada 40 and he carried it back to the Tahoka 13 where he was hauled down.

Floydada punched out a first on the two and Huckabay scored from that point going over his right tackle. Huckabay's kick was good and the score stood 20-0.

Tahoka received again and was held at their own 39 with Rex King coming in for a key tackle, catching the visitors short of the line. The Bulldog punt traveled from their 25 to Potts on the Whirlwind 30 and he returned it to mid field. Clipping set the green and white back however to their 20 where they put the ball in play.

After picking up five yards Potts playing at the tailback slot on double wing then circled left end. As he crossed the line of scrimmage his blockers split the Tahoka defense allowing him to cut back briefly and gain the secondary. Reinforcements arrived at just the right time and the ball carrier again reversed his field and scampered 75 yards to pay dirt, crossing just in time. Huckabay's placement was again good and the score was 27-0.

Before the period ended Tahoka had received again and fumbled the ball with Don Vickers recovering for Floydada on the visitors 22. Floydada failed to cash in on this break however as a holding penalty set them back 15 yards and they failed to make first down yardage

Style, Power Mark 1958 Chevrolet Trucks

Fresh styling, more power, and many chassis improvements mark the 1958 Chevrolet truck line. This Low Cab Forward heavy-duty model has a new 348-cu.-in. 230-horsepower engine designed for durability with sodium-cooled valves, heavy bearings, and other heavy service features. Combustion chamber is wholly within the cylinder bore. All 1958 Chevrolet trucks have dual headlights and redesigned grille, hood, and fenders.

at the Tahoka 14.

Opening the final quarter the Floydada defense was air tight and the visitors punted from their 13 to Bill Patterson on the Floydada 40. Floydada was faking again but fumbled on the Tahoka 20 with David Bray again recovering for Tahoka.

The Bulldogs had gained their 38 when they fumbled and Bobby Christian recovered for Floydada. This time it was Rannie Vickers carrying and passing. After making a first on the 11 he went the remaining distance to score. Danny Shipley kicked the conversion and the scoring was over at 34-0.

Before the game ended Tahoka received and made short yardage, then facing a kick situation the Bulldogs faked a punt and gained first down yardage near midfield. The drive was halted by an intercepted pass which was caught and fumbled with Beedy finally recovering for Floydada.

With Rannie Vickers at quarter the Whirlwind attack again began to roll but penalties stymied the drive, forcing a punt.

The final Tahoka offensive was held with Edward Hartman throwing George Adams for an eight yard loss.

Coach Preston Watson used all of the boys he had suited out for the night. Coy Grundy was out with a wrist injury and Henry Self with the flu. The entire team performed well especially on defense.

Don Vickers and Bobby Christian were seeing their first service since the Wellington game early in September.

Tackles at the line of scrimmage were prominent in the game but difficult to credit to any one player as there was usually from two to four on most of the stops.

You Have a Full Time Night Watchman In Your Home

It's true . . . The only trouble is, you've learned to put such trust in "him" that you've forgotten such a one exists. The Night Watchman we refer to, of course, is your electric service.

Electricity serves you night or day. It's there when the baby stirs . . . it's there in case of emergency . . . it's always there when you need it.

We're happy you've learned to put such trust in your electric way of living . . . now we plead with you to make more use of it by living all-modern, all electrically.

One of the most modern conveniences offered by electricity is economical and clean electric cooking. It is safe and dependable and needs no watching . . . Just set it and forget it . . . operates automatically.

For the Managers Desk:
If you enjoy working problems, here is one you might like to try: A shipment of coconuts is sorted into three stacks. The first stack (the culls) contains 23 coconuts. The second stack contains exactly 4 per cent of all the coconuts, while the third stack contains an exact total number with as many times as many coconuts as the difference between the quantities contained in the first and second stacks. Since the shipment is acceptable only if the culls come to less than 2 per cent of the total, and this shipment was accepted, how many coconuts were there in all?
If you would like the answer drop the manager a note, or come by to see us.

A woman walked into a psychiatrist's office leading a small white duck by a chain.
"What can I do for you, Madam?" the psychiatrist asked.
"Oh, it's not me," said the woman, "it's my husband. He thinks he's a duck."

TELEPHONE TALK

by J. C. Oakley, Manager

Our service representative who waits on you when you go into our office or when you call our office is Mrs. Betty Gilbreath.

As you know, Betty was an operator with 11 years service before we converted to dial.

She became our office girl several months ago and I know she is doing a very fine job.

She has lived in Floydada all of her life and knows most every person there. She feels that your problems are hers and certainly wants to help you in any way.

The other service representative is Maxine Hatley, who has also lived in the Floydada community all of her life.

Maxine has just completed a three week school in the telephone business office procedure and although she is new in the telephone field I feel sure she will make us a top notch representative.

Please feel free to call on us to discuss your telephone service. That business office number is YU3-2891.

FOOTBALL FUN

Another football season is underway. If there are any fans around your house, it's likely that the radio and television sets will be working overtime for the next few months bringing the games into your home. It's next to having a 50-yard line seat.

Maybe you've never realized it but the telephone company plays an important part in bringing you these football broadcasts, as well as other radio and television programs you enjoy. We handle the transmission of programs from distant places for your enjoyment.

Telephone engineers have worked constantly through the years to improve these facilities. Today we use both cable and microwave networks to transmit these broadcasts.

And, of course, improved transmission means more pleasure from the programs for you.

This is another example of how the telephone company always seeks to bring you improved communications — in radio, television, on a local telephone call across town or a Long Distance call across the nation.

Getting back to football, have you attended any of the Floydada Whirlwinds games this season? If not, why don't you plan to be at the next one. Better still, go to all the Whirlwinds games this year. You'll enjoy them and the team will appreciate your support.

Save 1/3 On Out-of-Town Calls

Whether you're making a business call or just keeping in touch with members of the family in other cities, it's smart to place your Long Distance calls Station-to-Station.

You save money because Station-to-Station rates are about one-third lower than Person-to-Person rates. This means you can make three calls for the price of two.

And here's another Long Distance tip to remember: call by number — it's twice as fast.
