Change of Control at First National Bank Is Announced

Blood Pressure Checks Slated on 1st Monday

A mass blood pressure check to be held in Floydada on August 1, has been announced by Joe Gidden, member of the Floyd County Heart Association. He was joined in the announcement by Bob Copeland, chairman of the Chamber of Commerce Health and Safety committee.

Residents of this section will be asked to take advantage of this health service and participate in the dually-sponsored event.

During the day long survey, to be held in the Bishop Motor Company lobby, adults will be registered and their blood pressure recorded for the examination of heart association specialists. Those whose blood pressure checks indicate they should see their physicians, will be notified.

Local physicians, nurses, hospitals and Heart Association officials are cooperating in the project, in the hope of reaching as many people as possible on August 1, and record blood pressures for the future health of the individuals as well as the communities," Gidden said. "We hope that every person above 17 in reach of the testing station will mark the date on the calendar as an important day."

Personnel to staff the registration tables and provide other survey aids will be announced next week, Chamber of Commerce officials said.

Funds and equipment for the blood pressure survey will be provided by the South Plains District Heart Association and the Floyd County Heart Association.

Immediate attention and consideration also will be given to an expansion of the board of directors, Norman said.

Although a controlling interest has been purchased additional shares of stock will be offered for sale to residents of Floydada and Floyd County within the near future," the bank president said.

The First National Bank of Floydada will be operated by and for the residents of Floyd County, considering the needs of Floyd County and sharing the problems affecting our friends and customers," Norman said.

Accredited High School Is Board's Goal For North Ward

Increased faculty this fall, and additional facilities being added this summer, at North Ward School, are expected to transform that educational unit of the Floydada School system into an accredited first class high school.

Laborers of the school board and school superintendent have been pointed to this end for sometime if representations being made to the State Education Agency are successful the results will be reflected favorably not only in the Floydada schools but also throughout the county.

Several months ago the Floydada Independent School District purchased a surplus government building at Reese Air Base near Lubbock. Initial cost was \$128 for the two story frame building which was 30 x 90 feet complete with heating equipment.

Since that time workers have disassembled and moved the lumber and material to the North Ward school site in Floydada where it has been put to good use. Much of the labor was done with workers already in the employ of the school and added little to the cost of purchase or of building.

Materials salvaged in this method are described by Superintendent I. T. Graves as very good with a large portion of heavy timbers in excellent condition.

Working mainly with material salvaged from this building the school district has built an addition to the North Ward School in Floydada which measures 30 x 75 feet which is very attractive and fits other units of the school together nicely.

Cost of the addition figures at about \$7.50 per square foot and is considered a big bargain at present day prices.

Improvements have been made at the North Ward School by adding a new laboratory science room, study hall, library, storage room, and a corridor which connects two of the present buildings which will make much better facilities for the said school.

By securing a building at Reese Air Force Base from the government, the attractive modern addition is costing approximately \$7,000 which will be valued at more than \$10,000.

twice the amount that has been spent for the addition.

The new requirements by the Texas Education Agency for having eight teachers is being met.

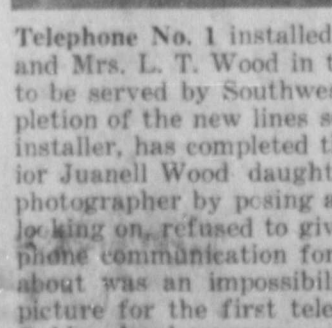

The Texas Education Agency has approved a vocational homemaking teacher for 1958-59 school term for the first time. Improvements are being made to meet the physical facilities in this department.

The new addition provides for a much needed science laboratory room which is 32 ft. by 20 ft. and

biology, and chemistry. The new study hall is 20 ft. by 30 ft. joined by a library that is 10 ft. by 20 ft.

The growing school now has 10 class rooms along with rest rooms, lockers, closet space and halls to get students in out of the weather.

This week only some painting finishing work inside and painting and fill in work on the yard and outside are lacking in completing the job and having it ready for the coming school year.

Telephone No. 1 installed June 30 in the home of Mr. and Mrs. L. T. Wood in the new area at South Plains to be served by Southwestern Bell, presages the completion of the new lines soon. Here Delbert Mattheus, installer, has completed the installation, and FHS junior Juanell Wood daughter of the family, obliges the photographer by posing at the telephone. Mrs. Wood, looking on, refused to give up when they told her telephone communication for her home and others thereabout was an impossibility. Present but not in the picture for the first telephone installation were J. C. Oakley, local manager, and wire chief Ray Ainsworth. The Woods' home is five miles northeast of South Plains. Industrial Expansion Is Tied To Building Sites, Says Watson

Floydada needs an industrial area for home-town industry to expand into and to attract new industry to the community, O. M. Watson Jr., manager of the Floydada Chamber of Commerce, told members of the Chamber's Board of Directors at a recent meeting of the board.

"It's not a new idea," says Watson. "Just about every Texas town of any size has an industrial foundation organized by citizens which buys land, and builds and leases buildings to industrial firms."

Lamesa, Littlefield, Amarillo, Plainview, Olney, Levelland, and Childress are just a few of the Texas communities with active industrial development programs," he said.

Residents of those communities contribute funds which are used to purchase industrial sites and build plants for lease or sale to the nation's industrial firms.

The local Chamber of Commerce Industry Committee has found that the problem facing any industrial prospect which might consider Floydada for a location is buildings and building sites. Local industry looking for an opportunity to expand has also found it difficult to obtain new building locations of a convenient size and at a price they can afford to pay.

"The community needs an acreage which could be cut into small industrial sites and sold at a price which would encourage industrial expansion in Floydada," Watson told the Board.

Local industry should have the first choice of locations in any new industrial area. Home town industry given a chance to grow and expand their operations offers the best opportunity for additional industry for any community, Watson added.

Bill Patterson Wins 3 Events In Jr. Olympics

Floydada High School's star athlete, Bill Patterson, won all three events in which he was entered Saturday at Andrews and this week will go to Odessa for further competition.

Patterson will represent Region One at the state meet of the Junior Olympics. He will enter both high and low hurdles and the 220 dash. Competition will be Saturday with prelims at 2:00 o'clock in the afternoon and finals starting at 7:00 P. m.

Teamed with Patterson on the Floydada entry will be Don Vickers who will participate in shot put and discus. Vickers did not compete last week but is eligible since Region One did not hold a regional meet of their own and entries which are unchallenged may certify themselves.

Due to a mix up in invitations Bill Patterson entered the Andrews meet and ran off with three first places before it was discovered he was not required to compete at that

regional meet but was instead in the Amarillo region which was holding to meet.

Saturday's competition will pit winners from all regions from over the state in a single class for state Junior Olympics champions.

The Floydada entries are entered under the sponsorship of Floydada Lions Club and are coached by their high school coach, Preston Wilson, who will accompany them to Odessa.

Patterson swept scoring honors for an individual at the meet, taking three first places at Andrews. He took the high hurdles in 15.3, the low in 21.3 and the 220 dash in 24.4. He was not pushed in the hurdles events and the off season makes are not his best. The dash was a new race for the Floydada runner.

Andrews won the team honors taking eight first places and packing the 2nd-4th with entries. Their sprinter Tom Nelson in the 100-yard dash (14-15 year old class) turned in 16.2 and a 32.7 440 yard dash. Nelson will be a sophomore this coming school term.

Junior Olympics are held under regulations of Amateur Athletic Union. The boys receive no pay or awards that will disqualify them in intercollegiate competition.

The Lions Club paid their \$10 entry fee for the meet.

News of Harmony

(By Mrs. Chiona Williams)

HARMONY, July 14 — Isn't this a beautiful time of year, so far, as crops are concerned? Everywhere you look the ground is carpeted with beautiful green foliage. How much more effective rain seems to be than irrigation water.

Our Sunday School lesson, Sunday was on "The Use of Money." Do we recognize the fact that the good Lord has saved us so much not only in dollars and cents but in labor and anxiety in giving us such beautiful rains? Let us pause in our rushing about to thank Him and give back unto Him what is due.

Beth Scott spent last week visiting in Dallas. She accompanied Mr. and Mrs. Kyle Glover and Lois Ann.

Summer is truly at its peak. Sunsets are a deep bronze. Motor boats and backyard grills have lost the fervent look of winter neglect. Lawns and flower beds are spick and span. It's the season when everyone stops on the mountain-top to leisure to enjoy the view.

"Summer has hardly come, yet it's almost over," observes a neighbor as he leans on the handle of his power mower.

will go back to school so soon," sighs his wife. "I'm lonesome when they're gone!"

In the shade of the apricot tree a created cardinal and his wife give two fledglings a lesson in scratching for food. They chatter noisily as they peck at insects and pass them to the "benches" of awkward babes.

We love the summer pose. Families have a chance to get acquainted again, neighbors to chat, and relatives to remember they belong to a clan quite apart from church and service club. Children, who live like little robots most of the year, relax and wiggle their toes, just for the joy of wiggling; or watch bus ants peck in their winter food supply.

We've heard talk of year-round school, to offset teacher shortages and crowded classrooms. We'd hate to see this happen. Efficient, no doubt, but not much fun. The annual pleasures of finishing and beginning again would be lost; so would the chance to just be. Summer's heat bespeaks a change of pace; Americans need to heed it. Never fear come September they'll once more shoulder the troubled world and hustle on down the road.

Estacado Reunion Was Held Sunday

Between 250 and 300 persons attended the annual Estacado Reunion Sunday held at the Estacado Tubernacle located on the original townsite.

During the afternoon's business meeting a trusteeship committee was elected to accept the Tubernacle and the two and one half acres of land surrounding it which has been offered as a gift to the Estacado Reunion Association.

Last year's officers were re-elected and persons named to various committees to make arrangements for grilling a water well for supervision of landscaping the grounds on the site; and remodeling the Tubernacle, as well as a finance committee.

The committee for establishing the water well site included two Floydada men, Bob Smith and Lee Noble.

Attending the reunion from Floydada were Mr. and Mrs. Bob Smith, Mr. and Mrs. Hamm Smith and Lee Noble.

The reunion will be held at the same location next year on the second Sunday in July.

Headline Movies Slated at Capada

Capada Drive-In Theatre has a couple of headline movies on tap for the coming week's program, says Doyle Mount.

On Saturday night's twin bill is "The Epic of the Real American Cowboy" starring Glenn Ford. This adventure western is about a tenderfoot who bluffs a tough trail boss into taking him along on the great drive to Mexico and back.

On this same bill is Mala Powers in "Man On The Prowl."

Starting Sunday will be Don Murray and Diane Varsi in "From Hell To Texas." This story is based on Charles O. Locke's best selling novel of the same name and also portrays early western adventure.

The story is of a young peace-loving cowboy who finds himself accused and pursued by a ruthless cattle baron and band of hired gunmen.

Both of these movies are recommended as good entertainment for the entire family.

Blakley Story Is Typically Texan

The typical American story is of the poor boy who made good through his own efforts. This is the story of Bill Blakley, born in a covered wagon while his parents were on their way to homestead in Oklahoma territory. He has come a long way in 39 years. Said the Austin American-Statesman, when William A. Blakley announced for the Senate:

"... He was a top-hand cowboy; he was a crackerjack bank clerk; he was an exceptionally good accountant and lawyer. We have an idea that he is going to be a refreshing, able political candidate. He would make a great United States Senator."

Vote for Bill Blakley on July 26 — an able man whose only ambition is to serve all of Texas.

His parents, Mr. and Mrs. Marvin J. Schofield, live in Plozet.

Sure-footed Man Serves Texas
The colorful language of the ranch and trail seems to fit Bill Blakley, who made his start in life as a working cowboy. He still rides and ropes with the hands on his ranch at roundup time.
Speaking of Blakley's service as U. S. Senator in 1957, the Dallas News said: "... If he was as unassuming as an old boot, it was nevertheless a well polished boot that never wobbled or wavered from its purposeful path. For this man Blakley is a sure-footed man who knows exactly where he stands and what he believes."

To The Voters of Precinct Two

I, Elmer L. Burleson, am asking for your vote and support for the office of County Commissioner of Precinct No. 2. I do so in the belief that I can serve you well, and with the promise that, if elected, I shall do so to the best of my ability.

I am familiar with every road in the Precinct. If not at the present, I will know something about every piece of property along every road, and try to do three things along each road in the interest of the road, and the property next to it.

I look at the job of County Commissioner as being a member of the Board of Directors of a pretty big business. In other words, a Commissioner is a member of a Board of Directors of a \$15 million corporation or business. It is a business which belongs to the people — every one of us. Your County Judge is the Chairman of this Board, and the Commissioner's Court runs the business, which affects every man, woman, and child of the county.

A Commissioner should know how to get the most done for each dollar spent. He should keep in mind at all times that every nickel spent is tax-payer's money.

He should know the values of property, and do everything possible to equalize values to bring about the lowest possible tax rate for state and county levies. In this way, and by watching closely every expenditure made, is the only way your taxes and my taxes can be reduced.

If you see fit to elect me as your Commissioner, I will conduct your affairs, which come under my jurisdiction, as carefully and as conscientiously as if they were my own — and even more so, if that is possible, for the responsibility is greater.

Voters are entitled to know something of the life and background of a candidate who seeks their support for any public office.

I am 62 years of age, in good health and can do any kind of work. I served 4 years in the Army in World War I. I attended grade school in Jones County, finished high school in Abilene, Texas, and have had two years of business school.

I have ranched and farmed all over the Southwest and have bought and sold property all over the Southwest. I operated three of the big cattle ranches in Texas, such as the T Diamond near Abilene, Texas, the J Bar near San Angelo, Texas, and the SMS Ranch near Stamford, Texas. The last eleven years I farmed 5 miles Northwest of Lockney and I invite you to ask my neighbors out there and my neighbors here in Lockney where I now live, concerning my reputation.

Having lived in the country all my life, I know what it means to have all-weather roads, and REA. If elected your Commissioner, I will work for better roads and cooperate in matters of right-of-way for REA facilities.

If you feel that I am qualified for the job and worthy of your support, I assure you I will try hard to deserve your trust and confidence, and will be very grateful to you.

Thank you,
Elmer L. Burleson

Ever try answering your out-of-town long distance calls instead of letters?

Nothing can beat long distance when getting things done.

Just the other day, for example, I had four letters on my desk, all waiting to be answered. Couldn't seem to get to them. Finally, I picked up phone and called the people. In 20 minutes I was I must have saved myself at least an hour's work.

Try doing it that way yourself. When think you'll like the quick action you get — as a small amount it costs.

IEWS AND COMMENT

ABOUT VOTING PRIVILEGES (A Contributed Clarification)

The only material change in the election law since the 1956 elections is that the alternate box and check method of making your ballot, permitted in the 1952-1954 and 1956 elections, has been done away with, and that only the old style method of marking your ballot, in use for many years, by scratching or marking out all names except the name of the candidate for whom you wish to vote, is now legal.

In the light of the recent county school trustee election contest, attention is invited to the fact that each voter is required to vote in the election precinct where he resides on election day, and if he votes in any other election precinct, his vote is unlawful and, if contested, must be discarded. Further, if a voter residing in one commissioner's precinct knowingly votes in another commissioner's precinct in the commissioner's race, his vote in that race is not only illegal and required to be discarded in the event of contest, but the voter has committed an offense by voting in an election in which he knows that he is not a qualified voter.

The notion has been prevalent for many years that if a voter resides at or near the precinct boundary, or if his farm extends into two precincts, he can vote in either precinct. This is not and has never been the law; a voter is required to vote in the precinct where his residence is, that is, the house in which he sleeps and, in this day and time, watches TV.

As probably every one knows the four Commissioners' Precincts of Floyd County have a common corner, in the center of the Court House, dividing Floydada territorially into four quarters corresponding to the four Commissioners' Precincts, but the North line of Justice's Precincts 1 and 4 runs some distance North of and includes all of Floydada.

The common boundary between Commissioners' Precincts 1 and 4 on the South and Commissioners' Precincts 2 and 3 on the North, and the common boundary between Justice's Precincts 1 and 4 on the South and Justice's Precincts 2 and 3 on the North, follow the same course from the West line of the County to a point about 1 mile West and 2 miles South of Muncy School House, but at that point the boundaries of the Justice's Precincts on the one hand and the boundaries of the Commissioners' Precincts on the other, diverge;

The Commissioners' Precinct boundaries turn South and East to the center of the Court House but the boundaries of the Justice's Precincts turn North and East to form a sort of peninsula running 1 mile North of Liberty School House, where they turn South and East to a point about 1-1/2 miles North and 2 miles West of Fairview School House, at which point they intersect the common boundaries of the Commissioner's Precincts and proceed East with such latter boundaries to the East line of the County.

If any voter is in doubt as to his election precinct, Commissioner's Precinct, or Justice's Precinct, County maps showing such information are posted on the bulletin board in the Court House.

Floyd County 14 Years Ago

Although we know cotton is well rooted and has good season in the soil and the sub-soil and know also that cotton likes hot weather and lots of it, we are not so sure that the searing wind that prevailed Sunday and Monday was too beneficial. This south-west "hot wind" is one that blows down off of the mountain in Old Mexico, we have been told. As it moves across the country it drops to the lower altitude and expands, drying out in the process. The expansion process also results in heat. We'd like heat on the cotton but hardly in such concentrated and mobile form.

Colored Man's Idea. Half a column about the progress of the cotton crop in Floyd County this week, was stated by a colored man in a single sentence Sunday. Said he: "That cotton looks right up at the hot sun and don't bat a eye nor say a mummelin word."

Not Immoral, Unmoral. What a good many Americans do not understand about the antics of the odd balls who try to buy their way at Washington is how they can be so brazen. There is an element in human nature that has been cultivated through the centuries in some races (a set, constant gene) that makes them believe any means to an end is as good as any other. Buy, wheedle, traffic is all in the pattern. They have no sense of remorse such as other mortals have to make them "break down" when caught in the web of their own perfidy. A lot of this new way to American life comes from what President Roosevelt spoke of as "The soft under belly" of Europe. Morality, in the accepted sense, had been bred out of them before Jesus walked on the earth. Mafia is one of the products of this breeding.

"Safe at home!" Welcome words to the vacation motorist as well as the ball player. Your chances of getting home safe will be much better if you curb the hurry-hazards in your driving. The Texas Safety Association suggests that you slow down and live.

Right Answer Is No. A recent suggestion of the Chamber of Commerce for self-survey of property owners in Floydada, lists the following, which we hope to get at least one person to read and think on: Does my home need painting and repair? . . . Do I own rent houses which should be painted and repaired? . . . Do the vacant lots which I own in Floydada need the weeds cut and the trash cleaned? . . . Do I own business buildings in Floydada which should be made modern and attractive and an asset to Floydada? . . . Do I own an eyesore building in Floydada which should be removed? . . . Do the curbs and paving at my home and in front of my business need repair? . . . Do the alleys back of my home and business need to be cleaned of weeds and trash? . . . Are there any fire hazards at my home or business which should be removed? . . . Think what we could do for the improvement of the community. How about it?

Answer to last week's puzzle: Tom is the judge; Dick, the policeman; Harry, the fireman.

White Says City People Have Stake In Farm Services

AUSTIN — City people have a vital stake in affairs of the Texas Department of Agriculture just as much as farmers and ranchers, Commissioner John C. White said this week.

White, who is seeking re-election as head of the state's top farm agency, said, "Every housewife, busman or worker is somehow served by nearly all the duties of my department. We keep every grocery store scale accurate, check proper measures on gasoline pumps, make certain that printed weights on all foodstuffs are correct as well as maintain sound and economical policies that protect all phases of agriculture."

The 33-year-old White predicted a sweeping re-election victory in the July 26, primary based on his observations during a just-completed 1,400-mile tour of Central, North and West Texas.

"You can't argue with successful policies that have made Texas first in the South in modern farm services," White declared. "People assure me they want to keep an efficient administration in office."

TATE CAPITAL Highlights AND Sidelights

by Vern Sanford

In 1876 a wagon with a good transmission was a luxury. But on today's super-highways, a wagon would be just a traffic jam.

Now we are saying that a good transmission is a bottleneck on the highway of dynamic government.

Revision is not one of our leading campaign issues. It is a quiet, steady and patient, professional and civic effort in private and public educational institutions.

Judge Sarah T. Hughes Supreme Court

are playing away in a make-or-buy campaign. Principal objective now is to get Texans thinking about what they want and need in a state constitution today.

Their campaign gained official blessing last year when the Legislature passed a resolution instructing the Legislative Council to do research on the subject and report back in 1959. An 18-member citizens advisory committee was appointed to counsel with the legislative study group. Dean Robert G. Storey of the SMU Law School is chairman. C. Y. Mills of Mission and Mrs. Horton Wayne Smith of Austin, vice chairmen, and Dan Moody Jr. of Austin, secretary.

Next meeting of the advisory group is to be held in September. Right now, one member admits that progress toward revision is itself moving at an ox wagon pace. Reason is that those concerned feel strongly that any action should be preceded by an exhaustive, professional research job. This takes money.

Legislative Council, with a staff

of seven, and 11 studies under way, can't go all-out on this one thing, but is doing some fact gathering during the summer. Both Council and committee hope to get money for the work, perhaps by next year, from the Legislature and / or some private foundation.

Advocates of Constitutional revision advance these points, among others, as reasons for concern:

1. It's a staggering document, 47,000 words long, patched up with 133 amendments. If nine more proposed amendments are approved next November, it'll be 54,000 words. Much of it is regarded by lawyers as properly belonging in the statutes rather than in a basic document like the Constitution. Much is cited as totally useless, such as provisions for repelling Indian raids.
2. Like Topsy, Texas' huge conglomeration of agencies, departments, commissions and divisions, "just grew." It's all so loosely put together, say critics, that folks don't know who to blame when things don't suit them. Same indictment is applied to the fiscal set-up. It's a billion-dollar-a-year business, but control is muddled among many. State has more than 100 special funds, representing about 85 per cent of state revenue. These can't be touched by the Legislature, even if they are not needed for the purpose for which they're earmarked and are desperately needed elsewhere.
3. Another argument made is that increasing concentration of government in Washington can be halted only if state governments are sufficiently vigorous and adaptable to meet people's changing and growing needs. Some suggest that Texas'

present Constitution may be a "strait jacket" on state government.

High Cost of Driving — Texas drivers will have to "pay the piper" next year in higher auto insurance. State Insurance Board has announced that, effective Aug. 1, auto insurance rates will be substantially higher in most parts of Texas. Average hike will be 32 per cent on comprehensive coverage, 19 per cent on liability and 17 per cent on collision.

In Dallas County, for example, a policy which now costs \$106 will jump to \$142.

Premiums paid on the old rate schedule have not nearly met accident claims, said Penn Jackson, chairman of the Insurance Board. He attributed the insurance companies' "tremendous losses" to four factors:

1. An increasing number of collisions.
 2. Higher cost of repairing today's swanky cars.
 3. Higher cost of hospital and medical care.
 4. Generosity of juries in awarding damages to claimants.
- Auto owners, said Jackson, must realize they set their own insurance rates by the way they drive.
- Water Future** — Hope for an ever-more-prosperous Texas is found in the recently completed state-federal survey of Texas' water resources and needs.
- Contents of the study were made public by U. S. Sen. Lyndon B. Johnson who requested the survey a year ago. Texas Board of Water Engineers and three federal agencies collaborated in compiling data.
- Each major river basin was studied and the possibility of switching floodwaters from one basin to another discussed at length.
- "The scope of the economic impact of large-scale water exchange in Texas is impressive," said the report. "If exploited to its logical conclusion, there is solid evidence to indicate that the increase in Texas income would be of great magnitude."
- On Fishing For Industry** — A how-to-do-it booklet for communities wanting to attract new industry is now in circulation.
- It was published by the Texas Industrial Commission with private donations. In 66 pages, the book tells how a community should analyze itself, correct any inadequacies and bring all good points to the fore in a promotional effort.
- Commission members expressed hope that passage next November of a constitutional amendment to permit use of state funds for advertising would make continuation of their efforts possible.
- Hands Off** — State Board of Education has gone on record as officially -- and positively -- opposing any plan to tamper with the permanent school fund.
- Last legislature voted to make 1 per cent of the permanent fund available annually for current expenses. State Auditor C. H. Cavness has proposed making part of future income from school lands available for pressing present needs and putting only part into the multi-million-dollar school trust fund. But the school board declared the fund should be "inviolate."
- At the same meeting the Board learned the school fund had run \$6,091,505 in the red for 1957-58. Reduction in oil production, a prime source of school revenue, was blamed.
- Per student state payments for next year were cut from \$82 to \$75.

MURRETT DORSEY LAID UP WITH INJURIES FROM FALL

Murrett Dorsey is laid up this week after suffering injuries last Thursday when he fell from a ladder at his home. He was taken to Peoples Hospital following the accident and was returned home the following day.

Dorsey had placed the ladder at the side of his home and climbed to the roof to make a repair. He lost his balance and when he hit the ground his chin was cut on discarded auto license plate used as a flower bed border.

Mrs. Dorsey said the lower part of his chin was cut badly and a part of his gum. He was also bruised and shaken. His condition is improving daily, however.

To The Voters Of Precincts 1 and 4

By these means I am asking for your vote and support. I have had to work all I could and it has been impossible for me to see all of you. I am in the wheat harvest now, but will try and be back and to see all that is possible.

I am asking for this office because I believe I am qualified to handle it. I have worked with the city and county and State Patrol until I have become acquainted with the duties of the office.

If you see fit to elect me for your J. P., I assure you that everything I have contact with will be treated with the same fairness and will show no partiality to anyone.

Sincerely yours,

A Time For Being Grateful Is Here

This time two years ago Texas was writhing under the effects of prolonged drought. Sections of the state had not for at least six years known the feel of beneficial rains. July was a crucial month in which we asked for all possible assistance from the federal government for

our suffering farmers and ranchers. This year, July is a time for being grateful. For the most part, Texas pastureslands are covered with grass, and drought-depleted livestock herds are well on the way to being replenished. We have just come through a most successful and rewarding grain harvest, and conditions are right for this year's cotton crop to overcome last year's miserable failure. Other crops offer similarly glowing reports, and for many Texas farmers the smile has returned to replace the sun-squint of the drought years.

Even in a good year such as this promises to be, farming is not all smiles, though, and it can never be. Mired with our blessings, we have our problems. The rain brings insects and other pests, but had we no rain, we would have no crops to be infested. Our pestilence problems this year range from the irritating imported fire ant in East Texas and hordes of grasshoppers in Northwest Texas to the pecan-sapping walnut caterpillar in South Central Texas and a

leathome scourge of rats in Southwest Texas.

We have to fight hard to protect our crops and our livestock from these and other menaces. But we must also be grateful that we have something worth defending from them.

Blakley Is Waging Campaign In New Style for Senator

William A. Blakley, Dallas rancher-lawyer-businessman who has never sought public office and was virtually unheard of in Texas politics a year ago, is now being credited with having conducted one of the most effective campaigns in Texas history in the race for U. S. Senator. So states James Blundell, Blakley's campaign manager.

Since announcing for Senator three months ago, an office in which he served with marked distinction in an interim appointment for four months in 1957, Blakley has traveled more than 12,000 miles and visited upwards of 200 towns and cities throughout the state. He has waged a campaign of personal visiting and handshaking with tens of thousands of voters on courthouse squares, on the streets and in the stores.

A plain man, characterized as "Texan as a cowboy's saddle," Blakley has never outgrown the cow country background from which he launched his remarkable career.

Born while his family was on the way to Oklahoma territory in a covered wagon, he was earning a cow-hand's wages at 14.

He got hold of the books, taught himself accounting and became an accountant. He taught himself law and became a lawyer. Long years of hard work and sacrifice made him a successful businessman, rancher and lawyer, but he has never turned his back on his humble beginnings.

"I do not believe," he says, "that the day will ever come when the working man or the farmer will be paid too much for his services, so

"I was a secretary at the Public Service Company and I used to overhear the Home Service Advisors tell about electric home freezers—how they saved money—how you could get better meals—how you could preserve the garden-freshness of vegetables—how a freezer could save a housewife lots of time. What they said made sense to me but the words just couldn't equal the actual experiences of owning your own home freezer. I find that everything those girls say is true—especially do I find the freezer ideal for entertaining," says Mrs. Elsey.

I have never seen anything like it in my life. I do not think anyone who attended has ever seen anything like it.
—Mr. and Mrs. N. D. Rogers, along with Georgia Ann and, of course, Andy must have felt wonderful Monday night. And still do.
The idea for the Appreciation Dinner did not originate in Childress. In fact, as far as I know, Childress residents did not have anything to do with it.
And when Andy heard about the proposal, he said that it could not be done.
Andy was wrong. And I imagine right now he is happy that he was wrong. I would be.
A dozen leaders in the district were programmed to speak. They, typically, represented a cross-section of Plains life.
One was the Senator's pastor. He lauded the honoree for his fight against liquor, narcotics, and lewd literature. "Senator Rogers is always on the right side of every moral issue," said the churchman. "He wants and works for a high moral atmosphere to prevail."
A county teachers' association president called attention to Senator Rogers' work in behalf of public education. A Memphis druggist related that Rogers has always had an "open ear" for the small businessman.
A district judge praised the quality of legislation introduced and sponsored by the Senator. A mayor and insurance man emphasized the value of Andy Rogers' fight against corruption in Austin, particularly in connection with the insurance investigations.
Said an official of one of the veterans' organizations: "Andy told us for a long time there was serious trouble in the veteran's land program. He was right. And when this was cleaned up, Andy worked hard to see that this good program was not scrapped."
A newspaper editor and publisher, a former president of the Panhandle Press Association, observed: "This is the first time I've ever heard of people traveling so far just for a state senator. But it's fitting," he added, "for Andy Rogers for a job well done."
Stockmen for the motor farm organizations expressed approval of the Senator's record on farm-to-market roads, local ownership of underground water, rural electrification, and other legislation of concern to agriculture. Said the farm spokesman: "I'm proud out the program."
"In view of all Andy Rogers has done for agriculture, I'm amazed to hear from the other speakers here this evening that he's had time for such effective work for so many others, too." The farmer concluded:
"Andy Rogers must use a six-row political tractor!"
The Senator acknowledged the praise-filled evening with obvious humility. He spoke humbly, too, of his "close personal friend" — Lewis B. Taylor of Austin and Waco—who had been stricken with a fatal heart attack three a few minutes earlier.
To the series of "thank you's" which had been expressed during the evening, Rogers responded:
"What's been accomplished, you've done. The credit belongs to you, to my parents, and to my wife who have all supported me so strongly. I really feel like I owe you all an appreciation dinner."
