ARE HIGHLY WATER SOLUBLE

Experiments prove that crops take up more phosphate from water soluble AMMO-PHOS fertilizers than from ordinary mixed fertilizers.

Let Us Demonstrate This Easy Test.

MMO-PHOS fertilizers are highly water soluble and we can prove it by simply placing a small amount of AMMO-PHOS in water and

placing the same amount of an ordinary fertilizer in another equal amount of water. You'll be able to see w water soluble AMMO-PHOS GOES INTO SO-LUTION while the ordiary fertilizer collects at the bottom of the glass. You'll know then why AMMO-PHOS fertilizers give the quickest response to crops.

EDITORIAL VIEWS AND COMMENT

New Primary Date. Still seems to go hard with some of the old timers that the first primary election date has been moved up to May - the first Saturday in the month-from the fourth Saturday in July. That's too much hurry up, hey think. Before you know it time to file for office will have expired. It takes hot July weather really to make politics get hot-hot weather and crops mostly laid by. Note the first primary comes on the best day of the year to plant cotton.

Should the kind of weather that is said to be in the making prevail during the spring and early summer the cotton planter will wear his ear muffs to start planting. After he freezes out he'll crawl down off the planter and disgustedly tell himself "Heck, I'm about to freeze. I'll just take out and go vote."

Senator Kennedy Announces. Senator Kennedy, of Massachusetts, is offering himself for the Democratic nomination for the presidency. In a news conference the other day he said he would enter the New Hampshire primary and probably others, which ones yet to be decided upon. Just about the right age for the job the senator is a most capable young man with a good family background. Also he has been in the money long enough that money and pomp and power would not bother him like it might a poor man or a new rich. On account of his religion Senator Kennedy might not carry Texas, but Mr. Truman made it without us, remember. The Senator might do the same.

There's Senator Johnson, Geography or eligion, a gotch eye or some untoward incident often rules out an otherwise good man for an important candidacy like that of running for president. But when and if the time comes that the Democrats need a good runner this fall as has Lyndon B. Johnson. He is in re pitching for his country and his andfather fit the Indians. The fact nat he is from Texas and that he doesn't speak Italian might be too much weight for him to carry. Otherwise he's got what it takes.

ocial Security Checks. More than thirand a half million people are now on cal Security, meaning they have med the right to draw money from federal treasury every month, havmet the requirements of the Social oody in congress will think up something else to liberalize the Social Security regulations. In a tight race it is always worth a few votes to have your name associated with something helpful to the old folks. The young ones, who are going to pay the enormous bill, think nothing of it. Principal objection to Social Security increases at the time is that the program is not now self-sustaining. It will be some time up in the next generation and a few notches higher in cost before it will be so.

Good Shooting Season. Combination of a seasonable year and good wildlife management resulted in a most unusual year for hunters and fishermen in 1959. A shortage of surface lake water made the local duck hunting season a rather skimpy one but quail and dove, and deer and antelope pickings very. very good. All hunting seasons are almost over now but the hunters har-

vested literally thousands of deer, I antelope as well, and time after time, bag limit of doves and quail. Amazing to the old timers who assumed that deer and antelope were on the road to ex tinction along with buffalo.
