Handsome Meringue Topping For Raisin Sour Cream Pie

A golden tipped fluffy meringue crowns this handsome pie filled with the taste surprise of flavorful California raisins. The elegant sour cream filling is also accented with chopped walnuts and fragrant spices. Cook the filling over low heat or hot water and stir constantly so it comes out satiny smooth.

Raisin Sour Cream Meringue Pie
1 cup sugar
2 tablespoons cornstarch
1/4 teaspoon salt
1/2 teaspoon cinnamon
1/4 teaspoon nutmeg
1/4 teaspoon cloves
2 eggs, separated

Combine 3/4 cup sugar, cornstarch, salt and spices. Blend in egg yolks. Add sour cream, raisins and lemon juice. Cook over hot water until thick stirring constantly. Cool. Add walnuts and pour into baked pastry shell. Top with meringue. Bake in moderate oven (350 degrees F.) about 15 to 18 minutes until delicately browned. To make meringue, beat egg whites until frothy. Add cream of tartar and continue beating until peaks begin to form. Gradually beat in remaining 1/4 cup sugar, beating until stiff and glossy. Makes one 9-inch pie.

A cartoon that tickled our fancy recently showed a pert housewife billing her laundryman for \$34 buttons lost during 1959. "It might be fun if we could turn the tables once in awhile. Not only on 'billers', but on people and situations."

For instance, how about the doctor who makes an appointment for 2:15 Monday, for which we rearrange the entire day, then lets us sit in his outer office until sundown wondering if he has forgotten. We propose to bill this fellow at \$5 an hour, plus overtime for shattered nerves.

When we buy a ticket for a show that's disappointing. Wouldn't it be a switch if we could reclaim the admission price, plus compensation for wasted time? Or when some clumsy old breaks a plate out of our best china, instead of saying lightly, "Indeed you won't pay for it! It was already cracked," say, "Good! That'll be \$9.95."

Or instead of sending a gift to a bride who already has three just like it, how about buying something dainty for the plucky little lady down the street who takes in ironing for grocery money? Or maybe, selecting a piece of china for the girl who didn't get the groom — she's the one who needs presents!

We aren't just sure what would happen to the gold standard in such a topsy-turvy economy; or whether our social system could weather such a revolt against what's proper. But it would sure relieve some tensions; and maybe straighten out some pretty cockeyed values we've let creep into our thinking.

'Course, if it went both ways, we'd be bankrupt in a few weeks at our house, both for money and friends!

McLain Moralizes On Schools And Other Current Affairs

I notice that we have a school bond election ordered for us to vote on the 21st. This is to say whether we will move the colored people's school out of that low ground where the ground and buildings are flooded at times and on to high ground where it can be made suitable in size and otherwise for their needs.

Before I heard that the school board was even thinking of such a thing I said this should be done. So far as I know, these colored people have made no effort to be permitted into the white schools and I feel that they should be complimented for this. I know it suits white people to remain separate and I feel that it is much better for the colored people to continue separate if they have satisfactory buildings and location.

This let's them be together and have their own teachers and not have the embarrassment of being thrown in with mostly whites and also at the present time I am quite sure no colored teacher would be employed.

If all are thrown together the additional enrollment in these schools would make it necessary for enlargements as we are well filled up as it is.

Too bad for any teachers to lose their jobs. Teachers and pupils understand each other better and I believe children will learn faster this way.

I believe colored children as well as whites should have access to the best training possible at the present time.

As to homes, those who desire to live in these parts where they will at times be flooded, because you can buy lots much cheaper or get rent cheaper, that is a person's own business but the school should be on good ground, suitable room and equipment.

Sees Favorable Outcome

I take it for granted that the election will go favorable and this change and improvement be made. I think we can not afford to vote otherwise. This is my seventy-fourth year in Floyd County.

Been here when there was not a colored person in the county and not one of the Latin American race here and very few of us who consider ourselves white people. I think it should be easy for you to see that I should be interested in the development of our county along every line and I do believe I am and the education of our children should come up high on the list. The moral and religious should be first.

And along these lines color and race should bar no one. I believe it has been God's plan for different tribes and races to keep themselves separate in many respects. Not that we fail to have anything to do with each other but I know I desire to mingle mostly with those of my own race and I believe this is true with others also.

Back to this election, I understand that very few of the colored people or of the Latin Americans have paid a poll tax and have a right to vote. Too many of our whites have failed on this line. Also, voting, as I see it, is not only a privilege but a duty that each of us owes to our town, county, state and nation, for surely each man and woman could afford \$1.75 for the protection that we have.

Officers Are Our Friends

I fear that too many have the idea that our peace officers are our enemies. I can't see them any other way.

Notes Neglected Sidewalk

It is nice that we have a lot of new street paving and I wish we had a lot more of it but what about sidewalks in the residence part of town. We see very little new walks and so much of the old is broken up and often tree limbs hang out over what sidewalk that we have and so low that even a person cannot stoop and get under, so has to detour.

All this discourages walking which is good exercise for most people. If a few of our old people still do some walking, does bark as though we are out of our place and children stare as though at just and old fool who does not know modern ways.

Reminds me of real early days here. The real ranch cattle were used to seeing a man ride around on a horse and pay little attention to him but let a man happen to walk out near them they seemed not to know what it was and often he was in danger of being hurt by them.

The small nester herds were not that way as they were used to seeing people on foot.

The God of the Universe has put us here as free moral agents and it seems that there is little limit in depth of sin and in the heights of holiness to which we can go. It is up to us to decide which way we go.

Mrs. Green called at the Atteberrys late Sunday evening. Mr. Atteberry is on his feet again.

The Jerrold Vinsons, of Sand Hill, are at his parents the O. C. Vinsons Monday "finishing up the cotton".

Mr. and Mrs. Vinson dined Saturday with the Charles Dennings where they were having hog killing. Who doesn't enjoy such fresh meat in the country!

The Hiway 84 club met one night last week at the Oliver Allens. Those present were Mr. and Mrs. Vinson, Mr. and Mrs. Starks Green, Mr. and Mrs. Charles Denning and the Allens. Frank Dunn and O. C. Vinson were in Lubbock last Tuesday for a physical check-up.

Let us hope all are able to go and attend Sunday School and Church next Sunday. We never know, do we, when it will be our last chance? Then what?

We neglected to mention earlier that Francis Ashton, of New York City, a former Center girl, spent the holidays with her parents, the Clarence Ashtons, of the Dougherty community and other relatives in Floydada. This is another "success story" of one of our Center young people who has

grown up and gone out into the world.

FORD

is beautifully built to go 30,000 miles between lubrications!

Galaxie Club Victoria, in looks and luxury, the rival of cars costing hundreds of dollars more.

Imagine: no more chassis lubrications every 1,000 to 2,000 miles. Imagine, too, the savings! While other car owners pay up to \$45 for lube jobs during 30,000 miles, Ford owners will pay only about \$4 . . . and the job will take only about 20 minutes.

That's because of Ford's new sealed-in lubrication system. At your Ford Dealer's, the threaded metal plug protecting each lubrication point is removed, specially developed grease injected, and the plug put back. That's all there is to it for another 30,000 miles!

This is just one of Ford's many takes-care-of-itself features . . . all good reasons why this Ford should be the Ford in your future!

HERE'S HOW THE '61 FORD TAKES CARE OF ITSELF

Lubricates itself—You'll normally go 30,000 miles between chassis lubrication (which cost only about \$4.00 and take about 20 minutes) because Ford has special conventional grease fittings with a sealed-in lubrication system.

Cleans its own oil—You'll go 4,000 miles between oil changes because Ford's Flow oil filter gives you filtration through fibers . . . trapping more dirt than other type of filter made.

Adjusts its own brakes—New Truck Size brakes adjust themselves—automatically.

Guards its own muffler—Ford mufflers are double-wrapped and aluminized to three times as long as ordinary mufflers.

Protects its own body—All vital underbody parts are specially processed to resist rust and corrosion, even to galvanizing the body panels beneath the doors.

Takes care of its own finish—Just wash and clean Ford's new Diamond Lustrite and it continues to glisten like new. It never needs waxing.

Only FORD is beautifully built to take care of itself

Wrong

Right

Right

THE WRONG WAY (TOP) AND THE RIGHT WAY (LOWER) to mark Texas boats with registration numbers is pointed out by Bob Townsley, Director of Texas Highway Department's Motor Vehicle Division. Top number, white, gives poor contrast with the light hull. The bottom number, contrasting sharply with the dark background, has good visibility.

Water Safety Boat Numbers Are Explained

AUSTIN, January 12 — "Texas boat owners may need a woman's opinion in choosing the colors for the registration numbers on the hulls," Bob Townsley, Director of the Texas Highway Department's Motor Vehicle Division said today.

"Boat number colors and boat hulls aren't contrasting enough to be readable — that's the problem," Townsley said.

"Too many boats are not numbered in accordance with the law — which requires a legible, visible, contrasting number for good identification. The solid-color area of the boat number should contrast strongly with the hull of the boat. A good many of the boats we've looked at have white numbers on a white hull — and the thin colored border around the number doesn't make it show up."

Three things the Texas boat owner should do after getting his registration number from the Texas Highway Department:

1. The solid-color area of the registration three-inch, block letters must contrast with the hull of the boat.

2. The numbers should be located on each side of the forward half of the hull, as near to the stem as possible.

3. Between each part of the number there should be a hyphen or a space. Example: TX-1234-AA or TX 1234 AA.

Townsley said the boat-numbering problem was nationwide, and that manufacturers who make boat numbers are helping out by increasing the size of the solid-color area of the boat number to a full three inches.

Coast Guard and local enforcement authorities will give owners of boats whose numbers do not meet the federal numbering specifications until July 1961 to make necessary changes.

The Water Safety Act passed by the Fifty-sixth Legislature gave the Texas Highway Department the responsibility of administering the Act. Owners who power their boats with a motor in excess of ten horsepower are required to obtain a license. Numbers are issued by the Motor Vehicle Division of the Department.

Townsley stated that 150,000 power boats were registered in Texas, and that registrations on these were good until March 31, 1961.

"The registrations are good," explained Townsley. "Now we want to get the numbers so we can read them. No matter what power rating a boat may carry, it is to the owner's advantage to register his boat. The boat's registration will provide an inexpensive way of quick and positive identification should the craft be stolen or involved in difficulty."

Gazing ruefully down through the grate he observed rather sadly, "Well, there goes the Lord's nickel."

No mess — no pipes, or flue to clean or replace.

CLEANLINESS — No flame, no dirt, greatly reduced cleaning, painting and decorating.

No fuel hauled in — no dirt carried into the home.

No forced re-circulation of dirty, super-dried air.

Clean roof, no rust or soot smudges.

SAFETY — Electric heating is as safe as electric lights.

No combustion of any kind needed within the home.

No gases to consume oxygen.

No pilot light to fail.

ECONOMY — More living space.

No wasted heat.

Longer life of heating equipment.

Much less depreciation.

Your electric cooperative would like to remind you that the cost of heating electrically is now within reach of the average farm family with a well-constructed home.

IT AS BEEN SAID: "If women really dressed to please their husbands, they'd be wearing last year's clothes."

Modern Electrical Appliances in Today's World

Today, a woman who makes a career of managing her home and rearing her children is a homemaker, not an old-fashioned housewife. Modern electrical appliances have brought about this revolution. Opinions differ as to which household appliances has contributed most to promote this change from housewife to homemaker, but there is no doubt that the automatic clothes dryer has contributed its part.

Never in the history of household equipment has an appliance been more warmly welcomed by woman. The reason for this is that the whole family recognize its labor-time-saving and convenience features.

The fortunate owner of an automatic dryer is freed from lifting heavy baskets of wet clothes; carrying them to the line; reaching, stooping, bending and stretching to hang clothes on the line or to remove them from the line.

No waiting for a good wash day — rushing to bring clothes in from the line when a sudden shower comes over or a washing because of a broken line, smoke or soot, dust and insects. Draping clothes all over the house in the wintertime or during inclement weather to dry is a thing of the past.

White clothes remain just as white when dried in a dryer as when dried out of doors, according to tests made. Colored fabrics retain their color much better when dried in a dryer than when dried out of doors.

With an automatic dryer many articles need no ironing and sprinkling is eliminated by drying to the degree of dampness required for ironing.

Fewer clothes are needed with a dryer. Clothes are fluffier and softer when dried in an automatic electric dryer — the modern homemaker cannot afford to be without an electric automatic clothes dryer!

HOMEMAKING HINTS

By Phyllis Roggendorff
County Home Demonstration Agent

ARE YOU BUYING A NEW VACUUM CLEANER? — Vacuum cleaners take on new duties and a new look. If you are shopping for a new one, you will want to consider the duties you will expect your vacuum to do.

Consider your main cleaning jobs. Different degrees of suction are available for different kinds of cleaning; light suction for surface dust or litter, more powerful for embedded dirt and grit. Some new models have a dial or switch of the handle to make shifting to the right degree of suction easy.

Vacuum cleaners are of two general types, those with a rotating cylinder-equipped with rows of brushes and in at least one cleaner, beater bars — within the nozzle, and those without such parts, known as straight suction cleaners. In general, the home-maker will find the motor-driven brush or motor-driven agitator cleaner called the upright cleaner more satisfactory for floors covered with wall-to-wall carpets or rugs. On the other hand areas above the floor are more easily cleaned with a tank or canister model, even though similar attachments are provided for the upright cleaners.

Along with your decision as to whether you need the upright, tank or canister sweeper you will want to check other features before you decide on a model. For instance, the ease of handling and moving the sweeper, type of attachments, bumper guards, type of hose and dust bag.

For further help in choosing a vacuum cleaner, get a copy of the Extension Leaflet, "THE VACUUM CLEANER."

Bill To Raise N. Mex. Lease Fees Proposed

SANTA FE — Legislation to increase lease fees on state grazing lands will be sponsored in the Senate by Lon V. Shurbet of Harding County and Tibo J. Chavez of Valencia, both Democrats.

Shurbet, a rancher, said sub-leasing should be stopped, land sold on 30-year contracts should be put on the tax rolls and state land sales should not tie three or four pieces together thus discouraging bidders.

Shurbet set off protests from other ranchers in the 1959 Senate when he tried to get the state's 3 to 7 cent grazing fees increased.

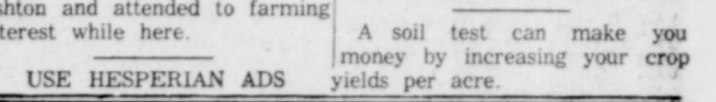

School officials have been urging higher fees.

"It's not fair to our schools for this land to be leased for 3 to 7 cents and be subleased at \$1 or more," Shurbet said.

A soil test can make you money by increasing your crop yields per acre.

STATE CAPITAL Highlights AND Sidelights

By Vern Sanford

Texas' 57th Legislature on a note that's continue for some time over money.

Members felt their had made an awkward situation noted themselves as the first item of House voted 97-45 to put into effect the \$4,800 a year legislative salaries made possible when the people approved a constitutional amendment last November.

Objectors were quick to point out that (1) the state general revenue fund was at that moment \$85,249,951 in the red and (2) many lawmakers campaigned on an "economy in government" platform.

Rep. Raymond Bartram of New Braunfels said he felt the people would rather legislators take care of teacher salary raises and medical assistance for the aged before spending extra money on themselves.

H. B. 1, the legislative salary and expense bill, would divert some \$2,600,000 from the cigarette tax and drivers license funds. Money had to be "found," since the general revenue fund, as fast as it comes in, has to be used to pay the state's "hot checks."

Down the road are even more fireworks as the legislature searches for \$200,000,000-plus to take care of the wants of other state agencies and services.

TURMAN SPEAKER — Farmers and teachers have one of their own in one of the most important of state offices. Rep. James Turman of Gober was elected Speaker of the House by a vote of 83-66. Rep. Wade Spilman of McAllen, whose support was largely from conservative House members, was the losing candidate.

Turman and his family operate a 103-acre farm in Fannin County. He is a former grade school teacher and worked his way to a doctor of philosophy degree in education. For a time he was assistant to the president of Texas Women's University at Denton.

As Speaker, Turman's first big job is appointing House committees, due to go into action about January 23. By his selections, he can influence to a considerable degree how certain legislation will be handled.

SENATOR ROBERTS HONORED — Sen. Ray Roberts of McKinney is president pro tempore of the Senate for the present session.

His job, largely honorary, is to preside over the Senate in the absence of the lieutenant governor. Also, he is second in line of succession to the governorship. By tradition, during each president pro tem's term, the governor and lieutenant governor leave the state so the senate president can serve as "governor for a day."

Senator Roberts, a World War II Naval hero, is a farmer and realtor.

GRITS FOR THE MILL — Texas Legislative Council, an influential joint House-Senate study group, will offer a mass of proposals for new legislation.

Among recommendations: 1. Some streamlining, but not a wholesale re-writing of the state constitution. This will be a disappointment to groups working for steps toward a new constitutional convention.

2. Limitations on the annexation powers of cities and towns.

3. Increased facilities for juvenile guidance and care, including a home for dependent Negro children, facilities for mentally ill juveniles and regional training centers for delinquent youths.

4. Higher minimum coverage requirements for automobile insurance. Present minimum is \$5,000. A raise to \$10,000 or \$20,000 was suggested.

Another study group, a special Senate committee, recommends removal of some of the restrictions on investment of the permanent school fund. It suggests investments in corporate securities and real estate mortgages guaranteed by the federal government.

COLLEGE BID REJECTED — Commission on Higher Education does not favor making Del Mar College in Corpus Christi a senior college.

Commission has agreed to study requests for senior college status and state support for Pan American College at Edinburg and San Angelo College.

On Del Mar, the Commission will make its negative recommendation to the Legislature which will have the final say. In the past, the Legislature has approved more such requests than the Commission.

NEW STATE BUILDING — Contracts have been awarded for construction of a second new State Office Building just north of the Capitol.

It will be a four-story granite building with 147,295 square feet. Cost is to be \$2,076,102. It will be known as State Office Building No. 2 and will house the Game and Fish Commission, State Board of Plumbing Examiners and some other agencies now scattered over Austin.

This is one of six buildings in the current program to create a unified government center, clustered around the State Capitol. Already in use are State Office Building No. 1, the State Courts Building and the Texas Employment Commission Building. Archives Building is to be finished soon, and a new Insurance Building is due to start this year.

DECENTRALIZATION SET — State Game and Fish Commission has voted to set up a system of five regional and 20 district offices to improve operation of its field service.

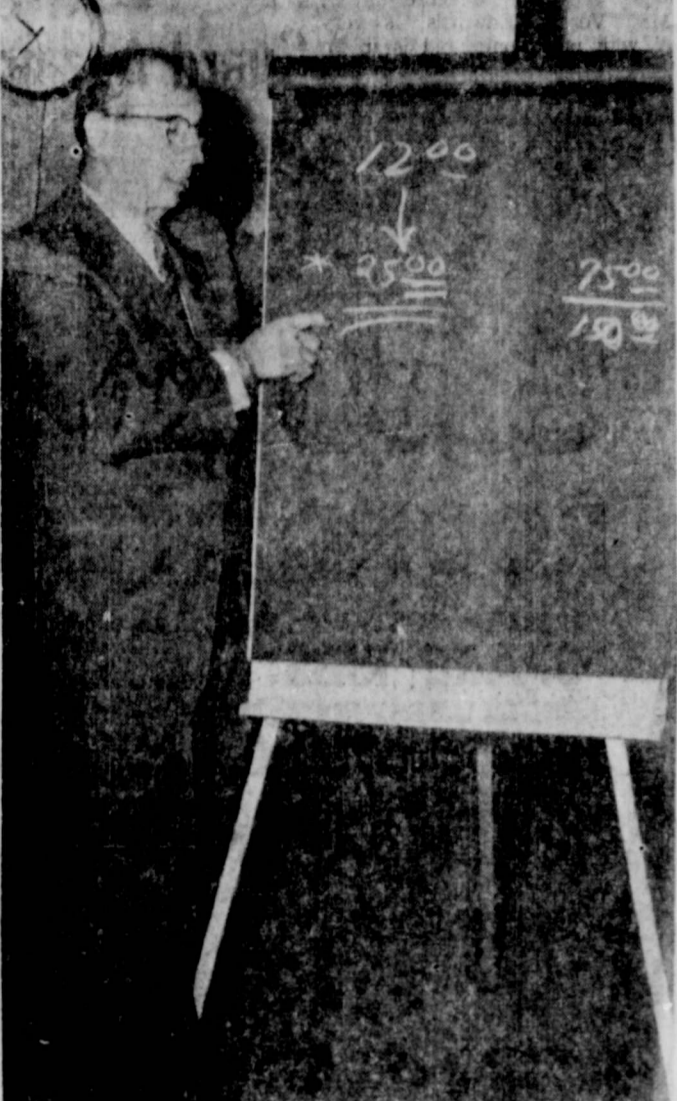

Reorganization plan was recommended by the Texas Research League, a privately financed organization to study operation of governmental agencies.

Regional offices will be at Seabrook, Rockport, Tyler, San Angelo and Waco.

District offices will be at Amarillo, Beaumont, Bryan, Houston, Victoria, San Antonio, Edinburg, Corpus Christi, Lubbock, El Paso, Wichita Falls, Midland, Fort Worth, Temple, Brownwood, Kerrville, Dallas, Texarkana, Palestine and Lufkin.

CARD OF THANKS — I wish to express my appreciation to the many friends for the visits, flowers and food sent to me during my illness.

Mrs. Tom Hutchinson, of Floydada.

FAIRVIEW, Jan. 16 — Farmers are back in the fields after a long absence due to all the wet weather. They are finding the ground still very wet in places. Bundle hauling and stacking is a main work the farmers are doing now, however, some are still trying to get their cotton gathered.

Another old timer and long time friend of ours passed on to her reward, Mrs. Jennie Elshop. Mrs. Bishop was a person very interested in life and people. Our sympathy is with the family in this their hour of sorrow.

Mr. and Mrs. Lee Rushing spent the day Friday in Lubbock and visited while there with their son and family, Mr. and Mrs. Joe Rushing. When the Lee Rushings returned home their grandsons, Joe Ray and Dickie Lee came with them and stayed until Sunday night. Mrs. Sim Reeves, of South Plains, spent the day Tuesday with her sister, Mrs. Walton Wilson.

Mrs. Walton Wilson visited Mrs. Dot Hammonds Friday afternoon. The children of Mr. and Mrs. L. B. Cozy were very excited and pleased Sunday when the mother hog on the farm gave birth to 16 babies and L. B. was very busy being nursemaid.

"Woe to the world for temptations to sin! For it is necessary for temptations to come, but woe to the man by whom the temptations come!" These are words of the Saviour as he talked to His disciples as found in Matthew 18:7.

We are very happy to see these fine days and the ground drying out. I have been reading over old letters and I find that so many of them tell how badly a rain was needed, so it does not seem just right to complain of too much wet weather. It is fun to work on family histories, but just as you seem to grasp some new information it fades away.

There are thousands trying to find family histories that only some thirty or so years ago could have been had for the asking of older members in the family. If you need a hobby, one that is exciting and interesting, join the crowd looking for ancestors.

I have been saying I just didn't want to make a garden this year, but Mr. Spikes has been at work digging up ground for one. The other day a seed catalog came. I looked it over, thinking I was completely inoculated for "garden fever." But seems as if I have not been, for I was "sold."

All of the children of Mr. and Mrs. W. J. Rhodes are in Floydada this week to be with the family. The seven children are Clifton Rhodes of Albuquerque, N. Mex., Jim Rhodes, Lubbock, Carl Rhodes, Perryton, Raymond and Laurie Rhodes of Lockney, Mrs. Bud Watson and Mr. Watson of Dalhart and Mrs. Frank Ramsey of Plainview.

A number of us attended the formal opening of the new business in town, the City Auto Service, owned and operated by Leroy Burns and V. D. Turner. This is a beautiful building and will help the looks of that side of the business district of town.
