Grain Growers Poised To Harvest Wheat Crop

Promise of Best Yields Since 1949 Seen In First Test Runs

A county full of good wheat crops — 130,000 or so acres—is about ready to be harvested.

The weather man is to have the last say about when the harvest will be in full sway. If sunshine and brisk breeze like on Wednesday morning continues the volume of wheat coming to the elevators will be very considerable this week-end in some parts of the county.

Probabilities are the crop will be the best since 1949, although the dry weather in the latter part of April and early May cut into the yields on dry land considerably.

First load of 1961 wheat re-Hesperian they expected rigs to ported to The Hesperian, that be going in several fields of wheat was dry enough to harvest came before the weekend.

Clubb Grain in Floydada and Producers elevators had reported was harvested by Leonard Alexander no wheat dry enough to go as under in the Lakeview Community of Wednesday a. m., though they had caught one jag at the

The load was delivered on Monday, May 29, about 3:30 p. m. The test weight was 63 pounds and grain was a little wet and moisture 13.6. Alexander has continued cutting since Monday and, at Muncy, where a bid mid-reports a good yield. The moisture content of his wheat was down to 11 per cent Wednesday morning.

Barley activity has continued brisk at the elevators and many fields of wheat are expected to be entered by today.

Lon Davis Grain reported their first wheat on Tuesday, the load coming from B. C. Cates, south-east of town. The grain tested 61 with moisture content 13.

Dougherty Grain reported barley moving there but had not received any wheat on Wednesday morning. George Farris told the

Registration started at 9 o'clock with former residents registering from as far away as California and Oregon.

A quartet composed of Joe Reeves of Lockney, Johnny Wilson and daughter, Sue of South Plains, and Faye Hart of Floydada, entertained pioneers during the morning session and throughout the day with gospel songs.

They were accompanied at the piano by Mrs. Hart.

He urged active person to person evangelism.

He said he was disturbed to find so many of the new sprawling urban communities where the need of a tie with the Supreme Being is not felt by many.

The judge felt at home among homebodies in Floyd County, he said, and regretted that the duties

Good Rain Showers

Meanwhile good rain showers have been recorded in practically all parts of the county. Last Friday a good rain fell that amounted to 1.2 in Floydada, preceded by showers on Thursday and followed again on Sunday. Some parts of the county had upward of 2 inches in all with other sections something less than an inch. The rains fell gently with no reports of hail damage as late as Wednesday afternoon.

Vandals Damage Machinery

The approach of the harvest season has heightened the danger of thefts of gasoline and tractor parts. In two instances actual damage to crops and machinery have been reported, where the raiders cranked up power machinery and ran across planted fields and fields nearly ready for the harvest.

Damage to machinery and the wheat and row crops was extensive in one instance. Warning for other farm operators with machinery in the fields to be on the alert has been issued.

Pool Halls Close In Three Counties Of 110th District

Closed last week after operating only briefly were four pool halls in Briscoe, Motley and Dickens Counties, operating one each at Matador, Spur, Quitaque and Silverton.

District Attorney John B. Stapleton reported Monday that all four of the places had closed when warned that injunctions would be filed if they continued to operate.

Pool halls, although in violation of the law, are operating in many counties of the state, Mr. Stapleton said, but none of these explain their uses.

The girls gave this demonstration at the annual meeting of Amarillo last January. They showed first at the district 4-H contest in Lubbock which makes them eligible to attend the state contest.

Considerable pressure was brought to bear in one or two instances to permit the pool halls to continue to operate, the district attorney said.

Our Town Now-Next Year?

STILL ON THEIR OWN

Throughout the many years since government subsidies, price supports and production controls became a part of the economic picture in America cattlemen have fought off all efforts to put the dead finger of government on their industry.

It has been a real fight and is a continual fight. Even against their wishes the effort to get government control of the cattle business is being carried on now. What a tremendous plum. Many thousand swivel chair jobs, supervisors, counters, checkers, inspectors, policy makers, chiefs of division, should the cattle people only succumb to the coaxings.

But even seven years of drouth, of bankruptcy, beginnings over again, could not breach the determination of the cattle industry to have their own way with their own affairs. And at Graham the other day in a meeting of the Texas and Southwestern Cattle Raisers Association this group pledged to continue the fight to stay out of government programs. The longer they stay out the better they like it, it seems.

VOTED IN THE TRADITION

We are rather proud of the fact that all four of the Floydada precincts followed the Democratic tradition and gave Mr. Blakley a majority. For the first time in 30 years Texas failed to vote like Floyd County precincts gave Mr. Tower a majority. In one precinct the vote was a tie. Democrats who bow to the majority, or should, always, need not be ashamed of their candidate and his wealth. All that happened is that he just didn't get enough votes to be elected. The signs of the times were against him as we now find out.

A REPUBLICAN SENATOR

John G. Tower, the Wichita Falls school man who resigned his place with Midwestern University to pursue a forlorn political fantasy, will go down in history as the political Giant Killer.

A man who can successfully defy the Democratic party in Texas and carry the state for the important office of United States Senator is quite a personage to be sure.

Young people, kicking out of the traces and breaking away from the traditional outlook of their fathers (possibly just harking back to their grandfathers) had something to do with the upset which sends Mr. Blakley back to private life. There are other factors, not the least of which is the deep resentment felt by many Democrats, both liberal and conservative, against the switch made by Senator Johnson, when he accepted nomination for the vice presidency. We can't count on our fingers, without repeating, the number of people we know locally who considered it an outrage, and still boil.

HISTORY WILL TELL THE STORY

Of the two men—Blakley and Tower—there is no doubt that Blakley had greater stature. Blakley is one of the smartest and solidest men ever to come on the political scene in Texas. But that is not necessarily to discount Mr. Tower. History may prove, indeed, that his point of view is best.

Texas at the crossroads has often taken the wrong turn, and the sun did not quit shining. We expect Mr. Tower to make the state a good senator. At least Texans will make the most of it for five years and six or seven months.

A GOOD LESSON TO LEARN

One of the things that beat Mr. Blakley is his immense wealth. Although people will accept favors gladly from wealthy people and even fawn before them, the man of wealth doesn't have a chance against a man who "needs" the office, in a political race. This holds true from constable to senator. The hackles on the back of the neck of a "common man" stick straight out when he picks up a pencil to vote and sees the name of a man who "doesn't need it" on the ticket. Ask some of them who have run.

SALES TAX AND INCOME TAX

Texas supporters of the proposition that the sales tax is the only way out for the state have all the advantage on their side. They have worn down the anti-sales taxers in the legislature and have the governor on the defensive. An interesting part of their argument is that the choice in the dilemma lies between the sales tax and an income tax. The fact is, based on experience in other states, that as soon as we have a sales tax and all the botheration that goes with it, we also will have, right behind an income tax. There are other and better ways out but the sales taxers "have the hump" and are riding the advantage to the utmost.

Quite A Switch. Old Settlers Day in 1961 was quite different on many Floyd County farms to what it had been in any year since 1928 when the pioneers organized. It has become a sort of by word that old settlers day has come, time to replant cotton. Last Saturday there was quite a bit more cotton up to a good stand ready for the cultivator than in a long, long time before.

Alligators. People who live in alligator country are beginning to realize now that this hard-hided reptile has a place in nature, a reason for existence, in keeping balance in the area where they thrive. A good many people say that the mesquites have invaded the rangelands and stolen much of the cattlemen's grass because the prairie dog has been exterminated. It may be the people in the alligator country will have a similar experience when the ruthless slaughter kills off the last of these denizens of the swamp lands. When the last gator is killed and left to rot at the water's edge watch the nutria, the turtles and rough fish or something take over.

Quail Cover. Quail need only a bit of encouragement to thrive on the plains. They need a few tree limbs in the corner of the pasture to restore virgin conditions in the flat, irrigated farm land. The Soil Bank lands offer proof of the natural love of quail for the high plains. The Game and Fish Magazine writes of one fellow who planted weed seed in a bit of cover in an unused corner of his place, used old split tires to provide water catchers and let nature take its course. In a year or so he had quail again.

Foot Massager. The old timers, way back in the nineties were not entirely without some of the comforts. Along with the rockers, the range, the album on the red cloth covered dining table was a foot massager. Not all the homes had foot massagers but all of them could have used one.

Wild Flowers. The wild flower display at the pioneers reunion is not always just the same. Depends on the season, which varies largely here as is well-known. This year the prairies yielded baregrass, sunflowers, wild grass, Indian blankets and a gorgeous orchid thistle. Old uns who were once young uns on the plains say the prairies were a riot of beauty sometime every spring before cattle grazed the ranges so closely.

The Hail Period. In this particular part of the high plains the period of most damaging hail storms occur generally in the period from June 2 to June 22. Since the weather has been so unusual the past several months we may be favored with less damage than in ordinary years from the hail storms. It probably should be said that farmers and business people who serve their crop needs are poised and ready for replanting, should occasion demand.

Re-Charge Problems. Recharging underground sands with raw lake water has begun to present problems. Clogging the underground formation is one of the dangers. The High Plains Underground Water Conservation District is working on the problem of extracting suspended particles that cause clogging and appear to have the trouble whipped with a simple arrangement.

Outdoors
In Texas

By Vern Sanford
Earl Golding, the prolific outdoors writer from Waco, makes some interesting observations. The News-Tribune columnist, who also writes for the Austin Statesman, notes that there seems to be a "pattern" of lake fishing, employed by anglers fishing the different lakes in Texas.

Once you stop to think about it, fishing styles do follow a trend and these tendencies vary in different sections of the state. Lake Travis fishermen, for example, employ methods quite unlike those used on Falcon. Fishing on Lake Belton differs from that on either Travis or Falcon.

Earl's research reveals that fishermen from the same town often fish alike. They sort of have their own trademark.

It's very likely a case of "follow the leader" or copying the ideas of the most successful anglers. Exhibit "A" could well be the fast growing popularity of the "click" and reel fishing on Lake Buchanan, for example.

When a certain type of lure, or a certain type of gear, or a certain method of taking fish from their habitat "clicks" with an angler, he's likely to stick with it religiously. Only person who can change that pattern is a more successful fisherman.

That's when styles change. That's when even the better fishermen adopt a new method. And if it does prove more productive—man, most everybody switches to it—whatever it may be.

Golding's studies of the various fishermen, their habits, likes and dislikes, and their method of fishing, enables him to tell where an angler habitually fishes.

If you meet a tall fellow sitting atop his gasoline powered outboard motor and working his troll motor with his foot—he's a Lake Austin fisherman. This motor-riding procedure is an Austin trademark. See a fellow with a cushion on his big outboard, riding it like a saddle, and you can figure he stands a mighty good chance of being from the capital city.

On Belton, if you see a spin fisherman, you can almost be sure he's from Temple, as Temple is about the only town around the lake with an abundance of spinners. Most of the other boys are strictly casters.

And, if you see a guy with his troll motor on the front of his boat, and him sitting in one of those little low-hanging swivel chairs, out over the bow and just inches off the water, you know he's from Waco.

Nearly all the plug fishermen from Waco consider the chairs standard equipment.

All this just goes to show you that fishermen are different. They differ in both their ways and their means of fishing.

"If you're a good fisherman, you won't laugh at any of them," says Golding—referring also to the fat-bottomed boats, the Wacoans use, and the bigger, broader, higher craft used by the Austin boys—because a good fisherman knows that he can learn something by observing others.

Ray Creel, one of Waco's top fishermen, who moved to Zapata a few years ago, learned some new tricks when it came to fishing Falcon Lake.

He discovered that when the weather was cold and the wind was high the fish went to the bottom and gathered around the thorny huisache (wee-satch) shrubbery.

To get to the fish you had to glide alongside one of the trees, wrap a towel around the huisache bush's thorns, then pull up. Next you dropped a plastic worm down into the water, right alongside the tree—to the very bottom—then jiggle the worm.

If no success at that spot you'd try another tree.

So, from these various versions it's quite evident that the way to success in fishing the numerous lakes in Texas—as Scribe Golding points out—is to follow this rule: "When in Rome, fish as the Romans do!"

When doughnuts are ready to be turned over, they will rise to the surface of the fat and you will see some color around the edges. It takes from three to five minutes for doughnuts to be cooked on both sides.

THE BOY ON THE JOB

Once there was a boy who was trying faithfully to fill his first real job, that of office boy. There were a number of jokesters in his department who delighted in playing pranks, and the boy was kept in hot water trying to obey orders. He was frequently ordered to do things that were not in his line of work. He was told one time to "swipe" something from another department, and when he refused, he was threatened to be "fired."

A friendly watchman told him one day how to protect himself. "Tell them to give you a written order whenever they want you to do something that you don't think you ought to do." This the boy did, and the jokesters didn't try any more "phony" instructions.

Mrs. George Stiles left Saturday for Hamilton and from there to Groves where she will visit a sister, Mrs. Monroe Smith and other relatives.

Mr. and Mrs. O. M. Watson Jr., and daughter have been in Paradise, Tex., visiting her parents and other relatives.

A minister in our town has a special gift with words. A few years ago, he and his wife adopted a baby boy whose happy-hearted innocence has been a source of great pleasure to them. From the day he was a toddler, he was encouraged to take part in family prayers before being tucked into bed. Kneeling together, the three of them have taken turns at beginning and closing the brief worship time. Evidently impressed by the variety of ways in which his father could express thanks, seek help and guidance, the youngster began to experiment with words, too. Now he is six. He startled his parents one night by giving thanks for "teachers, doctors and skillets." On another evening it was antiques and garbage cans. But the night they realized they must try a new approach came when he ended the prayer session by quoting a familiar cigarette slogan heard on TV, followed by "amen."

What would be irreverence in an older person must be judged quite differently for a little boy. His intentions cannot be questioned. Within his small world of understanding, he selects the things that seem suitable to comment on at this very special time in the family life. Looked at in one way, it reflects a wholesome background for future relation with the Divine Being — one of absolute friendliness, confidence and trust. How many of us as adults might now be better Christians had we been able to develop such an attitude of shared experience, day by day, when we were very young?

When
the
last

EXAM
is
OVER

Nothing quite compares with the exhilaration of that final day at high school.

The drudgery of note-taking, the monotony of assignments and recitation, the tedium of term papers, the nights of cramming, the toiling tension of exam week ... it's all behind them.

And ahead ... graduation ... the prom ... college ... a job.

But as an earnest parent, pause to take stock of your son's spiritual maturity. Has the soul's growth kept pace with the mind's?

The firmness of the bond between the Home and the Church holds the answer. Strengthen that bond every Sunday. In a world that constantly tests the faith of men ... *the last exam is not over.*

THE CHURCH FOR ALL ... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Danger Lies In Apathy Of Citizenship

Paul Fullerton told members of the Rotary Club Wednesday he fears America is now in a crisis which may determine within a brief time whether or not the nation shall continue to have the freedoms for which lives have been sacrificed in America.

Speaking with Memorial Day in mind he told his audience that few barriers now stand against the forces attacking the freedom for which so many have been sacrificed.

Apathy of the citizenship to the alarming events of the day is appalling, he said, citing instances where selfishness and class demands are undermining government of the people, by the people, for the people.

Mr. and Mrs. R. C. White left this morning for their home in Houston after spending the past two weeks in Floydada with their daughter and husband. Mr. and Mrs. Kinder Farris and family. Returning with the Houston couple was their grandson, Johnny Farris, who will stay a brief while.

Donald Green Old Settlers Dies Of Over-Dose Of Pills

(Continued From Page 1)

Donald Eugene Green, 38, was found dead in the bed Saturday afternoon at the home of his parents, Mr. and Mrs. John L. Green on East Tennessee Street.

Death was attributed to an overdose of sleeping tablets by Justice of Peace Ed Griffin and medical examiner, Dr. A. E. Guthrie.

Green had been dismissed from Veterans Hospital in Amarillo three days prior to his death. He had been receiving treatment for an ear infection and an old injury to his arm, previously broken. The family related that the deceased had been in a great deal of pain for some weeks. At the time of death the injured arm was in cast awaiting the probability of surgery.

Green was born March 29th, 1923 in Haskell, Tex. He came to Floydada with his parents in 1925 and had lived here most of the time other than a period spent in service during World War II.

He and the former Aline Cantrell, daughter of Mrs. Johnny Cantrell and the late Mr. Cantrell, were married in Floydada on Aug. 28, 1942.

Survivors in addition to the wife and parents include two sons, Kenneth Eugene and Michael Lynn, both of the home; one sister, Mrs. Bob Reeves, Floydada; four brothers, Billy Green, Floydada, J. L. Green, Sunray, Glenn Green, Ballinger, and Jimmy Green, Tupman, Calif.

Funeral rites were conducted Monday afternoon in the Calvary Baptist Church with the Rev. Vance Zinn, officiating. Burial was in Floydada Cemetery with military honors, under the direction of Harmon Funeral Home.

Military rites were in charge of the J. W. Harrison Post Veterans of Foreign Wars. Pallbearers and firing squad were Sam Spence, A. J. Jester, Johnny Sparks, Oway Oden, Gerald Hall, Shorty Neff, Bobby Bishop and J. L. Dalton.

The late afternoon hours were given over, as has been the 34-year custom, to the dances which tickled the toes of the old settlers in the days of the open prairie and the pioneer homes and communities. The dance was resumed, after a supper recess, in the evening.

Late afternoon and night crowds were the biggest that local restaurant operators have known in many years. Helping to swell the crowds were the rodeo performance and the dance staged by the Veterans of Foreign Wars.

TYLER MUCH IMPROVED
Roy Tyler, brother of A. G. and son-in-law of Mr. and Mrs. Tom McLain, was down with his family over the weekend from their Amarillo home. Tyler is much improved after a narrow escape from death when he accidentally fell from the back end of a pick-up. At present his main concern is a collar bone which was broken in the mishap, however the injured place seems to be healing properly, following surgery, according to local relatives.

*Live Modern...

with* **GAS**

Sure, it means nicer working surroundings for the PNG staff here in Floydada. It's larger than the old place, with 2,400 sq. ft. of Gas air-conditioned working space; and the buff brick exterior is far more attractive. After all, it gives us a feeling of pride to do business from a place that's right "up-to-snuff". • But what really counts is that we're now able to serve YOU better than ever. Pioneer is considerate of its employees' welfare, yes. But this building wasn't built just to please them... it was built to please YOU and all our valued customers, to make things more convenient for you in dealing with us.

- Take the matter of parking, for example. We now have a spacious, paved lot cheerfully illuminated by the glow of Gas Lights. You'll have no parking problem in your visits to the office.
- There's a drive-up teller window which makes it easy to pay your service bill from your car... and a night depository for after-hours payments.
- For your information and buying guidance, there are handsome displays of the latest Gas appliances. But why prattle on? C'mon in and look the place over for yourself. Ralph Mardis, local manager, and the entire staff extend a cordial invitation to come see us.

GREELEY'S PLAN FOR SOUTH: A FARM APICEE FOR YANKEE SOLDIERS

Good for you, Horace. The people of the South will not object to this arrangement, but will themselves divide up their land into nice little homesteads of six feet by two "due east and west" and every New York soldier who comes this way will be welcome to a lot. Come down, Horace, and take an interest; this is a fine opening-title good, no taxes to pay-free soil, just what you've always admired.

P. S. Come soon, Horace, before the lots are all taken. Bring James Gordon and Abraham along with you.—The Columbia Democrat.

DAVIS' SAILORS ORDERED HUNG (sic)

Orders have been received from the Navy Department at Washington, by the officers of the various United States vessels, that all persons found sailing un-der Jefferson Davis' letters of

marque and reprisal, be treated as pirates. That the confu-sious be immediately hung from the yard-arms and the crew and more penitent officers be placed in irons to await their trials at ocean brigands. —Montgomery Mail.

THE OX AND THE BULL

The Yankee abolitionists, with characteristic inconsistency, im-pudence, and insincerity, are making a great hullabaloo over the act of the Southern govern-ment authorizing letters of mar-que and reprisal, as though it was not a legitimate and cus-tomary mode of warfare.

They roll their pious eyeballs in holy horror and declare the act as piracy; but like all their assumed philanthropy it is only a hollow pretense. With these Roundheads it has always been a true aphorism that "circum-stances alter cases."

alarmed and says that Virginia is literally full of troops armed and equipped. —Indianola Cour-ier.

DEAR EDITOR

The enterprising publications of the Galveston News propose to republish that part of "Giffan's Manual," referring to the Infan-try drill and the school of the soldier. I would suggest to them the importance of the bugle sig-nals pertaining thereto. Giffan's "Sounds for the Bugle" are all important for the Infantry, but there are no signals given for the skirmishers for "right wheel," "left wheel," "com-mence firing," "cease firing."

Also a signal for the whole (that is for all troops present upon any occasion) ought to be given. In addition to this, every Re-giment and Company ought to adopt a signal to signify such Regiment or Company.

As a general thing, our signals are too long, but our Companies ought by all means practice skir-mishing, and other field drill, by the sound of the bugle. It will not do for them to consider them-selves complete and ready for a campaign without this. A Pri-vate. —Weekly Telegraph, Hous-ton.

In the present troubles of our country, England is disposed to move carefully, wishing France to take the lead. —Indianola Courier.

The tax instructors make sure that the young tax men get the tax answers they need to solve taxpayers' problems and to always be fair in dealing with taxpayers. Internal Revenue Service teaches employees to be as interested in seeing that the taxpayer gets fair treatment as they are in assuring that the government gets all the tax due.

One of the tax instructors explained, "Our new tax men are highly qualified when they finish their first six months. They are ready to effectively and fairly solve the taxpayers' problems. They will make sure that taxpayers are given every consideration but they will also make sure that taxpayers pay all the tax due."

Rodeo Crowds See 3 Nights Of Good Shows

Ratjen Bros. rodeo stock lived up to their reputation as ornery animals last weekend when the three-night show of J. W. Harrison Post, VFW, was staged at the grounds of the Floydada Rodeo Association in East Floydada.

Some of the animals gave the participating cowboys a real work-out.

The show was staged at a fast pace. Bull dogging, bare bronc riding, saddle bronc riding and calf roping events were staged nightly.

For the girls were the flag races and for the youngsters the flag races and the calf scrambles to get a taste of rodeo life.

The clown who worked the arena had a miniature dog as his helper in distracting attention of the wild animals from attacking their riders.

Winners In The Finals
Finals at the rodeo were Saturday night. All contestants with high scores in the previous events made their utmost to cut their time records.

Ed Harlan of Texhoma, Okla., VFW commander, Bobby Bismarck of Texhoma, Okla., VFW commander, said there were some 1,350 events. A tie for second was split: paid admissions to the rodeo and by Cotton Barrington and Don the VFW, sponsors of the event.

Hurt, Guthrie.
Barrington, who resides in Lubbock, also took first in the saddle bronc riding. Ed Harlan was second and Harold Williams, Crosbyton, was third.

Jim Brock of Lubbock took first in bull riding, with Bill Deering, Lubbock, second, and Ed Stewart, Snyder, third.

In the barrel race Pat McNatt of Plainview took first place and Kathy Brakebill, Crosbyton, was second with Betty Evans, Meadow, third.

In the calf roping Travis Knuckles of Roswell, N. Mex., came out first followed by the class time of Bill Flowers from Aspermont.

Bruce Martin of Plainview came out of the Kids Flag race under 11 years and Billy Norris of Floydada came out first in the class of 11 years or over.

In the bull dogging events Ed Workman of Lubbock, who entered all five events in the rodeo, came out second. Workman is known state-wide for his participation in rodeos. He had hard luck in several events and picked some pretty rough animals.

Troy Robinson of Amarillo was first in bull dogging and Buzzy Cau of Hereford was third. Youngsters had a big time in the calf scramble during the three night performances but a complete list of all the winners was not available.

said it was a big success.

Household appliances should be selected carefully, and only after making a complete survey of all the models and features available. Because most appliances will be used from once to a number of years—therefore they play an important role in the life of the families who own them and use them. When selecting a refrigerator and freezer be sure to buy a model that is large enough to meet the needs—even the anticipated needs—of their family.

Even a small family should consider a refrigerator-freezer combination large enough to require shopping only once a week or maybe less often for fresh and frozen foods. And if you are planning to freeze quantities of fresh fruits, meat and vegetables from your farmstead it is wise to plan for one of the new upright freezers in your kitchen or if you prefer, a chest type freezer may be located in the utility room or where ever there is room to accommodate it nicely.

You may choose an electric range from cabinet or built-in models. Both types are available in models with deluxe features. When building a new home or remodeling the kitchen, a built-in range is a popular choice; it offers a maximum flexibility of arrangement and installation to satisfy every family's needs.

The free-standing models also

"LOOKS SPEAK LOUDER THAN WORDS" as the old proverb goes, and Rev. Vance Zinn, pastor of the Calvary Baptist Church in Floydada, is shown here paying off for words spoken in his church work.

Rev. Zinn told L. C. Jones, who is seated in the wheelbarrow and who is superintendent of the Training Union of the church, that he, Bro. Zinn, would push Jones in the one-wheel cart if membership of the Training Union reached the 100 mark. That number was reached last week and on Wednesday afternoon late, the pastor was seen going along the highway, making his word good but enjoying it. To give a twist to the story, the next time the hundred mark is reached Jones is to give his pastor a ride in the same way.

feature modern styling and offer the advantage of easy replacement, or maybe a change of location, if desired. Consider the additional convenience offered by either the two-oven free-standing or built-in range. Both are complete ovens, allowing the homemaker to cook at two different temperatures at the same time or broil in the other oven and bake in the other at the same time. Or broiling can be done at the same time in both ovens.

Dishwashers are available in mobile or built-in models. The mobile dishwashers are on casters; they are used by connecting to the sink faucet and when not in use can be stored in any 24-inch space. The one with a maple top can be used as a cutting board. The built-in model may be placed under any counter top. The dishwasher is one of today's busy homemakers best helpers—it really saves convenience and time saving.

Remodeling the kitchen is one of the most gratifying projects a home owner can undertake. The whole family benefits when an ugly, outdated, hard-to-work-in kitchen is turned into a handsome, efficient, all-electric one.

"LIVER FOR LONG LIVERS"
Liver's a great health-giver. All kinds of liver are excellent sources of protein, iron, riboflavin, and niacin. Bake it, broil it, fry it, or use in casseroles.

Liver can be kept frozen—if kept at zero or below—up to three months. Of course it must be properly packaged, too.

One of the most delicious new cake recipes we have tried recently is the one Lois Hutchins brought us for:

Pineapple Cake
Measure into sifter:
4 cups sifted all-purpose flour
1 2/3 cups sugar
1 teaspoon salt
4 teaspoons baking powder
1/2 teaspoon soda
Sift into large bowl of mixer, and add:
1 cup soft shortening or 2 sticks of butter or margarine
Juice from a No. 2 can crushed pineapple (approximately 3-4 cup)
5 whole eggs
1 cup buttermilk
Mix on low speed until dry ingredients are moist—then mix at higher speed for 4 minutes. Makes 3 large layers or four 8-inch layers. Bake layers 20 minutes, or until done, in a 350 degree F. oven. When cool ice with pineapple filling.

Pineapple Filling
1 cup milk
2 cups sugar
1 stick butter
Drained pineapple
Put sugar and milk into sauce pan over medium heat. Boil until it drops off spoon "heavy-like". Add drained pineapple and butter. When cool, place between layers and on sides of cake.

Or if you prefer the apricot flavor, the recipe given us by Era Mae Seigler is equally as delicious:

Apricot Nectar Cake
2-3 cup shortening
1 3/4 cups sugar
1 teaspoon salt
1 teaspoon lemon extract
2 whole eggs
2 egg yolks
1/4 cup milk
1 cup apricot nectar
2 1/2 cups sifted all-purpose flour
3 teaspoons baking powder
Cream shortening, sugar, eggs and egg yolks until light and fluffy; add sifted dry ingredients, milk and nectar, lemon extract, to creamed mixture. Beat only until batter is smooth. Pour bat-

ter evenly into three greased and floured 9-inch layer pans. Bake in 350 degree oven for 25 minutes, or until done.

Fill with apricot filling and frost sides and top of cake with fluffy white frosting.

Apricot Filling
1/4 cup cornstarch
1/4 teaspoon salt
2 cups apricot nectar
2 teaspoons lemon juice
2 tablespoons butter
Mix first four ingredients into a smooth mixture. Cook over low heat about 5 minutes, or until thickened. Add butter; let cool completely. Use to fill between cake layers.

Something To Think About
A young man called one evening on a rich old farmer to learn the farmer's story of how he became rich.

"It's a long story," said the old man, "and while I'm telling it, we might as well save the candle. And he blew it out."

"You needn't go on," said the youth. "I understand."

Steel Buildings Need Lightning Rods For Safety

COLLEGE STATION, June — A metal covered building without adequate grounding is not protected against lightning. W. S. Allen, extension agricultural engineer, says that proper grounding of such buildings, especially metal roofed structures, will prevent many fires.

Lightning protection is very inexpensive and easy to provide, Allen continues. All buildings should be placed as close as possible to the building.

with metal roofs or sides can be protected by grounding the roofline, Allen explains. These lightning rods done by flattening the end of a piece of 1/2 or 3/4 inch galvanized iron or steel pipe and bending it so that it may be attached by bolts to the drip edge of the roof. For support, galvanized screw hooks should be placed on the side of the building and bent shut over the pipe. After the pipe has been firmly attached to the roof, it may then be attached by galvanized wire rope clamps to a 1/2 or 3/4 inch rope driven eight to ten feet into the ground. This ground piping strength and improvement according to Mrs. Henry Willis, who went surgery last Tuesday at Plainview Hospital and is expected to be home tomorrow. The Floydada woman is recovering from her operation.

Grain Sorghum Leave Out Acreage
There will be several acres of leave out ground this year that will be good possibilities to put soil improving crops on.
There are several possibilities for summer legumes such as cowpeas, soybeans, mung beans, and guar.
Cowpeas Usually the forage peas such as Chinese Red, Brahman, New Era, and Whippertwill will produce more tonnage than the blackeye peas and cream peas.
Planting Rate: Broadcast or drilled - 60 - 80 pounds of seed per acre; 36 - 42 inch rows - 35 - 40 pounds of seed per acre.
Maximum growth is usually obtained when the first pods are fully developed.
Soybeans Will make an excellent cover where the field is situated so that some supplementary water can be applied if necessary.
Good clean seed free of weed seed will be cheaper than certified seed.
Planting Rate: Broadcast or drilled - 30 pounds of seed per acre; 36 - 42 inch rows - 60 pounds per acre.
Mung Beans is another legume that can be used. It is a real fast maturing crop and can make some yields planted as late as the first of August.
Planting Rate: Broadcast or drilled - 15 - 25 pounds seed per acre; 36 - 42 inch rows, 5 - 8 pounds of seed per acre.
Guar Is a summer legume that can be planted up to July 1. It is a drought tolerant crop, however best results can be expected with more moisture. This is a deep rooted legume. The varieties most commonly used are Tuxedo, Groehler, and Mesa. Mesa and Groehler will produce more tonnage of green manure.
This crop can be handled much the same as grain sorghum as far as management is concerned.
Planting Rate: 36 to 42 inch rows - 5 to 6 pounds of seed per acre.
The above mentioned are all summer legumes and can be used for soil building practices. For maximum yields of nitrogen they should all be inoculated with nitrogen forming bacteria.
Forage Sorghum - The use of the forage sorghums such as Red Top, Atlas and others could be drilled or broadcast and used as a green manure crop. The shredding and working in to the top 3 or 4 inches of the soil could mean a high yield of organic matter. The addition of 20 to 30 pounds of nitrogen per ton of plant residue would aid in the break down of the residue.
The planting rate should be from 40 to 60 pounds per acre to produce fine stems to aid in the decomposition of the sorghum residue.
These are a few of the possibilities for annual soil building crops.
The use of winter legumes planted in August and September could possibly be made on the leave out ground.

PLAN BURGETT FAMILY REUNION IN SAN ANTONIO
Mr. and Mrs. Z. A. Burgett visited their daughter and her family over the weekend, Mr. and Mrs. Eddie Brown at Lamesa. They were met there by their son, A. N. Burgett and his family of Odessa. Plans were made to go to San Antonio the latter part of June for a family reunion at the home of the Kenneth Burgetts.
At that time Lt. Col. and Mrs. Eldon Burgett and family of Fort Devens, Mass., will join the group during his leave.

Tell your young son to wrap his kite string on a fishing reel. The string won't tangle and will every one who came and helped be easy to reel in.
