

First Crops Of Onions Reach Processing Shed

FIRST ONIONS TO GO TO MARKET from Floydada this year were being graded Tuesday afternoon at the old Massie Warehouse building. Shown feeding the conveyor belt here are Rodolfo DeLeon from Raymondville at the left, and John Garcia a Porto Rican. The crop is that of Buck Hickerson, at right, who obliged the cameraman as operations were slowed a minute for the picture. Hickerson reports the yield only fair on the onion crop, but says the quality of the Floyd County onions this time is unusually good, present market prices are favorable for showing some profit to the grower. Storm Damage Cuts Tonnage, Growers Say

The Floyd County onion crop began to move to market this week as brokers Griffin and Brand started grading and marketing operations at the Massie Warehouse building on the Santa Fe industrial switch in northeast Floydada. Growers Buck Hickerson and L. D. Simpson were first to reach the packing shed with offerings of white and yellow granos. Hickerson reported only a fair yield on his crop coming in from a field just southwest of town. He estimated something over 300 bags to the acre and if market prices reported early this week hold they will bring over \$3.00 per bag. Hail stopped growth on much of the county's onion crop and this accounts for the short production. The onions coming in, however, showed no signs of damage and are expected to find a ready market. The medium size is popular with the big grocery chain buyers, but of course does hold down on the growers yield per acre. If present market conditions hold local growers stand to get the best prices they have received since 1956. The county's onion acreage is still some 30 per cent from a year ago and about 50 per cent from 1959. About 650 acres or more will probably be harvested if all goes well. Several sheds to operate. Several sheds should be in operation soon if present plans are not changed. Griffin and Holder will be located at shed of Floydada Grower and Marketing Association in southeast Floydada. C. A. Russell is expected to market some 85 acres. Jim Simpson will operate a grading and sacking shed on his farm and facilities at Barwise will probably handle the crop there and also that from the Lockney area. Local growers say Raymond Rucker at Lockney has some of the county's best onions. The crop there escaped hail and has reached a much larger size. With fair weather the onion harvest will add greatly to the number of employed workers in the area. Handling the crop requires a large number of field hands, trucks, and crews at the processing sheds. A number of freight trucks have already started gathering at the sheds as they prepare to load and whisk their cargoes away to points far and wide over the United States.

Col. Burgett And Family Visit Home

Mr. and Mrs. Zollie Burgett are enjoying the company of their army son and his family, Lt. Col. and Mrs. Eldon Burgett and Lar-chlor, who arrived last week from their station in Ft. Devens, Mass. This is the first time the Burgetts have seen their son in four years. Col. Burgett's wife is the former Erma Dean Moore, daughter of Yancy Moore, and the late Mrs. Moore of Grand Saline, Tex. The Moores are former residents of Floydada.

Col. Burgett completed 20 years of duty with the army this past January but continues to serve in his capacity. Civilian life to an army career man of twenty years would mean quite a change and at present Col. Burgett is still in the thinking process as to future plans. This weekend the visiting trio, along with his parents will travel to San Angelo and be met there by the other Burgett children, Mrs. Eddie Brown and her family of Lamesa; Kenneth Burgett, and his wife of San Antonio, and Adolph Burgett, his wife and two children of Odessa. The family will have a reunion over the weekend with Col. Burgett and his family leaving for Ft. Devens the first of the week.

Management of Wheat Land Crop Residues Contribute to Success

Floyd County farmers have been harvesting a near-record wheat crop. Along with high yields, large amounts of stubble have been produced. With good management, much of these residues can be left on the soil surface to protect the soil from wind and water erosion. There will be some farmers who will burn this valuable organic material and others will work the stubble into the soil. They will hope that gully washing rains and sweeping winds will spare them damaging soil losses. There are many advantages in leaving crop residues on the surface. Farmers who take advantage of proper residue management have found that this is one of the best methods of protecting the soil against erosion and conserving moisture. If residues are left on the surface, high winds can't get at the soil's surface to start wind erosion and hard rains can't tear soil particles loose and do the damage they would do without residues on the surface. Water intake is improved, soil crusting is reduced, and the residues become humus that helps maintain good soil tilth. Tillage operations should be as few as possible to control weeds and prepare a firm seedbed. Sweeps, blades, or chisels destroy about 10 per cent of the stubble each time over whereas a one-way destroys about 50 per cent. A good many farmers in Floyd County consistently practice good management of their crop residues and they'll tell you it pays. Contact the local Soil Conservation Service for any information or assistance you need to solve your conservation problems.

City Auto Service Is Named Pontiac and Tempest Dealer

Official announcement came this week that City Auto Service in Floydada had been named as dealers for Pontiac and Tempest. The popular wide-track Pontiac had received approval of Floyd County motorists for a number of years, many of these cars being in service locally even without a dealership. The new Tempest is declared to be a stand out in the economy auto line, offering a front end four cylinder engine with rear transmission and all wrapped up in fine styling. Leroy Burns at City Auto was beaming this week as were all able to be around some in the family home on East Houston Street.

STUBBLE WORKING FOR HIM. An excellent example of good crop residue management, says the Soil Conservation Service. The field is well-protected against high winds and high intensity rains.

'Partnership' Golf Tournament Is Bracketed For July Fourth

A partnership handicap golf tournament at Floydada Country Club will be a feature of the Fourth of July holiday, it was announced this week by Bobby Westfall, club pro at the country club. Both members and non-members can play and those who enter can choose their own partners. Prizes will be gift certificates payable in merchandise at the pro shop of the club. Westfall anticipates a big list of entries will take part in the tournament.

Laid out around the island in Blanco Canyon, known historically as Cochran's Peak, Floydada Country Club course is one of the plains' prettiest and sportiest. Saturday's winner in the weekend tournament was T. L. Holland, whose 87-170 won him three golf balls. Doyle Norris of Italls was second with an 83-12-71, and Jack Stansell's 83-11-72 won him third place. Norris' prize was two golf balls and Stansell's one. Stansell was in a three-way tie and won the toss for the prize. Sunday afternoon Baird Bishop was the low man, with a 95-30-45, and was the three-ball winner. A. C. Carthel took second with an 80-11-69. Doyle Norris also repeated as a two-ball winner with an 82-12-70. Jake Watson, 88-17-71 and Buck Hickerson, 83-12-71, tied for fourth place, and were awarded one golf ball each.

Wester served on the school board from 1928 to 1938 and was chairman of the building committee that started stadium construction at the football field that now bears his name. Wester entered the bakery business in 1927 with S. H. Wester as partner. They operated the firm and wholesale routes to Ralls, Lorenzo, Lockney, Silverton, Quitaque, Matahor, Roaring Springs and served all in between country stores. The business was sold in 1946, a short time before he entered the grocery business.

Wester said the corner building where he is going gives him more display space, more storage space and above all more parking space, the latter being a big bottle neck for most downtown stores especially where there is only a 25 foot front on middle of the block buildings. Wester is advising his friends and customers of the moving plans as is Mrs. Patterson. Patterson Grocery has been in operation for some 17 years.

Came to Floydada in 1919 J. C. Wester is well known in West Texas business, school, and sports circles. He has become an "institution" around Floydada with 20 years of service in 7.25 miles of seal coat at the rate of \$899 per lineal mile.

Wester Grocery Buys Patterson

Wester Grocery and Market on South Main Street is moving to a new location on the corner of North Main at Missouri. The announcement came this week from J. C. Wester who has purchased the Patterson Grocery and plans to move his business into the Patterson location.

Wester has operated at the South Main street address since February 1, 1949. He said this week his plans call for operating both stores. Wester's and the Patterson firm on Saturday, July 1. On Monday he will close at his old stand and go to the new, continuing in operation there as the stock and fixtures are moved out of the old location.

In advertisements in this week's Hesperian both Mrs. Patterson and Wester tell the story of the business transaction and ask the kind consideration of the public during the transition period. Wester said the corner building where he is going gives him more display space, more storage space and above all more parking space, the latter being a big bottle neck for most downtown stores especially where there is only a 25 foot front on middle of the block buildings.

Baker Road Is Completed

Following completion and acceptance of the county road through Baker to Pleasant Hill from Highway 70 southeast this week, Lipham Bros., the contractors, made their plans to make Floydada their permanent headquarters. The company contracts road work throughout the plains area, their last job before coming here being in Briscoe County. In addition to the seal coat on the Baker Road the builders also re-built the paving in Dougherty along the highway to the Dougherty School. The total contract here was for 7.25 miles of seal coat at the rate of \$899 per lineal mile.

Air Force Family Home From France

Back in the states after a two year tour of duty in France are Major and Mrs. Robert B. Jones and daughter, Carolyn, age 10. Mrs. Jones is the former Laddie Hopper, who was reared in Floydada, attended schools here and graduated from Texas Tech. She is the daughter of Mr. and Mrs. John T. Hopper of this city. The family visited here until the first of the week then traveled on to San Antonio where Major Jones will be stationed until receiving his discharge in October. At that time Major Jones will retire with 20 years of service in the Air Force.

Schedule 4H Girls Dress Revue on Thursday Night, July Sixth

The 4-H girls enrolled in the clothing project will have their garments judged on Wednesday, July 5, and show them to the public Thursday night July 6. Both events will be held in the Floydada High School. The judging will start at 9 a. m. Wednesday with the girls modeling their garments, beginning with aprons, followed by blouses, skirts, school outfit, dress or skirt and blouse, dressy dresses and tailored garments. In the afternoon the garments will be judged on construction invited to attend.

TWENTY-FIVE TO DIE IN TEXAS

The Department of Public Safety has announced its forecast of the number of people who are to die on the Fourth of July from highway mishaps. Twenty-five is the magic number this year.

Millions will be on the go during the 24-hour period. Which of us the Grim Reaper has chosen to be a memory under a pile of sod on the following week is yet to be known. We are enjoying to the fullest our constitutional guarantee of freedom from restraint, danger or no danger.

AUTOMOBILE INSURANCE HIKE CERTAIN

For various and sundry reasons the number of claims under collision and liability insurance in Texas have grown more numerous and more expensive. The inevitable result is a forthcoming order from the State Insurance Commission raising the rates on insurance against such liability.

During the past year the insurance companies have taken a \$20 million beating, the report has it. The insurance commission, charged with setting the rates in Texas, convinced the insurance companies are entitled to the raise, are going to make the increase effective in the not too distant future.

Mentioned here because it is going to affect most every pocketbook, the reminder is that one needs to be ready to dig a little deeper. Responsible people, who can be held to account for damage done to persons or property, have to have the insurance to hedge against a loss that could be disastrous.

MANY ARE OUTSIDE THE LAW

While this warning is a serious matter to those who can protect themselves and the public, it is common knowledge that many automobiles in every county operate without benefit of the protection afforded by insurance, and the owners are, themselves, not in position to pay for damage they may do. These people, operating in violation of the spirit of the law, are a real menace. Whether the legislature knows how to deal with them is not certain. It is certain that body has not done anything to close the gap. The driver without license and the driver who is irresponsible need some time and attention they are not getting.

STRIKES ARE EXPENSIVE

Strikes at our seaports where the unions are picketing and other unions are refusing to cross the lines will have begun to reach way out toward the Floydadas of the country before long.

We export a great deal of wheat by way of Houston and Galveston and import, in particular steel from such countries as Belgium. The intent is, by economic pressure, to make "captive" ships which have been registered under flags other than our own, although the ownership is in the United States. The union leaders would make it useless to attempt to escape their grasp.

IT'S ALMOST PLUM HUNTING TIME

Most anybody on the plains could have their own "plum thicket" with hardly no trouble at all. So little trouble, in fact, that the only difficulty would be keeping the thicket from covering too much area after once it got established. However, that would be too much to expect of us, who had rather make it a picnic and gather plums on the Tongue or Dutchman or one of the other streams that carry water from the base of the escarpment to the sea.

Once upon a time the ranchers who own the land didn't care so much. People knew that gates are intended to be closed and that cattle should not be choosed. The new crop of plum hunters doesn't know about those things and cause some difficulty.

But when plum hunting time comes it is much like any other infection. It must run its course.

THE FLOYD COUNTY HESPERIAN

Subscription Prices: In Floyd and adjoining counties—one year \$3.00; six months, \$1.50; four months 90c in advance. Subscription Prices: Outside Floyd and adjoining counties—one year, \$4.00; six months, \$2.00; four months, \$1.25 in advance.

4th of July. The Hesperian, along with most of the rest of the town, will be closed on the Fourth of July. The day hits right in the middle of our busiest news gathering and assembling time. Accordingly we are forced to ask a little more than the usual cordial consideration of news sources and advertisers. Don't forget. Closed Tuesday. Open bright and starry-eyed, again Wednesday morning, if we've had plenty of help from our customers and friends on Saturday and Monday

It now appears, having given the Soviets all the advantage in Germany, we have trial balloons going up to see what the public reaction will be on the idea that we back out of Berlin before we have to face up squarely to the brave words we have been saying these years. If that is the way we are going to do why did we ever say words to have to eat?

The Cuban Mess, the Laos mess, the Korean debacle? Stevenson, unwanted, in South America, Harriman in Europe, the president himself winging off to Vienna, by way of Paris and to London on the home flight. And so much of what they are saying, judging from experience of the previous eight years, unknown to the taxpayers.

And why, pray, did Mr. Eisenhower and Mr. Nixon, and now Mr. Stephenson have to splat through South America to be spat upon, rocked and socked? Washington doesn't tell us. What they say is that we need to spend a lot more money in South America if we hope to keep our friends there. Our point of view is so provincial with the national executive department. Apparently the point of view that most of us have is not registering in the Congress either. We don't understand, they say. On and on our gripe goes, week in and week out.

Attract Tourists. In what way could Floyd County best attract tourists? A gimmick or a solid advertising idea would be worth a great deal, if some fertile mind would lay it out so the rest of us could see it. We are reminded of the importance of tourists by a statement we saw the other day. Industry follows tourism, it said. Something to use one's mental chompers on.

Do It Now. The Soviet's time table calls for America to be theirs within another 97 months. They have plenty of help here in high and low places, they say. The iron in American blood is turning into a jelly-like substance and our will to resist will have gone by the time they are ready. It will not be necessary to fire a single shot. So, if you think you will be living 97 months from now and there are any things you especially want to do without restraint, better do them now. When S-Day comes the citizen will have to have a permit from the commissar. No doubt the commissar must have his bad days, when it also will be a bad day for the citizen as well.

Meanwhile, Also. Be sure not to speak up too much. Don't be an official or a leader of any kind. Be noncommittal. Keep to the middle of the road. The Soviets have found it necessary elsewhere to exterminate the dissenters so as to preserve the peace.

TEA Seeking Successor To E. H. Boulter

The State Board of Education is now giving consideration to filling the vacancy on the Board created by the death of E. H. Boulter of Lubbock. Boulter's successor will be appointed by members of the State Board of Education to hold office until the next general election. To be eligible for membership on the State Board of Education, a person must have been in continuous residence in the district he is to represent five years prior to his election or appointment. He must be a citizen of the United States, a qualified elector in his district, and at least thirty years of age.

Counties in the 19th Congressional District include the following: Andrews, Bailey, Borden, Cochran, Crosby, Dawson, Dickens, Floyd, Gaines, Garza, Hale, Haskell, Hockley, Howard, Kent, King, Lamb, Lubbock, Lynn, Martin, Mitchell, Scurry, Stonewall, Terry, and Yoakum. The law provides that persons holding an office or receiving employment under the State of Texas or any political subdivision thereof, or receiving any compensation for services from the State or any political subdivision thereof, except retirement compensation, are ineligible to serve on the Board. Also, any person engaged in organized public educational activity is ineligible for Board membership.

Boyce House Says I Give You Texas

Life is becoming too standardized. People are getting stereotyped. We don't have "character" anymore, except in small towns — and, pretty soon, we won't have any small towns. Now when I was a boy, there were roaming ex-convicts who lectured on prison atrocities; human flies who climbed buildings with no aid except their hands and feet; and, every now and then, there would be a visitor who was hard to classify.

One such individual came into town in a buggy drawn by a big shaggy horse; and, trailing on a rope, was the sleekest, silkiest racing mare you ever saw.

"Doc" Martin (that turned out to be the stranger's name) hadn't been in town any time at all before the sports were badgering him for a race with "Red" Traylor's big bay. The visitor seemed reluctant but when mention was made of a \$100 bet, his eyes brightened and he said, "All right—in a couple of days."

There was a half-mile track out at the grove and quite a crowd was there for the race, which was to be 400 yards. Each owner rode his own horse. Martin's mare won by a length but the bay was gaining. Everybody had been pulling for the local entry and there was clamor for another race—and over a longer distance.

"Doc" didn't say "Yes" and he didn't say "No"—in fact, he didn't say anything. They kept after him for two days, though, and finally he said, "I'll run my horse against Mr. Traylor's next Saturday—half a mile, but the bet this time will have to be \$500." This was a rather sizeable amount but Traylor put up \$200 and other sportsmen provided the rest.

The approaching race was the talk of the town and there must have been close to 500 people at the track. It was almost 2 o'clock which was the time for the start, and only Traylor and his bay had put in their appearance.

Then "Doc" rode up—only he was on that shaggy plowhorse that had been hitched to the buggy. There was a general laugh. It was well that the crowd laughed before the race for that mouth creature made a runaway of it.

There was some haggling to the effect that the mare was supposed to have run but Martin declared, "The only stipulation was that my horse was to run—and he is my horse and he sure did run."

So he collected and departed—to "take" the sports in some other town.

The world no longer has such a figure as "Doc" Martin, wearing a sloop hat and a shapeless blue serge suit with grease spots, with his buggy and his sleek, silky racing mare and an old clodhopper of a horse that was a disguised thoroughbred. And so our lives are duller.

Sometimes, one wonders how some businessmen have been able to keep their doors open, they know—or practice—so little of good public relations.

LEAGUE LEADERS—After the first three weeks of play in the Freshman league the Oden Chevrolet Co. Dodgers were ahead of the pack by a narrow margin. Pictured here from left to right in back row Clifford Golightly, assistant manager and W. H. (Bates) McClung, manager; center row Tommy Bartee, Tommy Gregory, Terry Amburn, David Gregory and Ronnie Hill; front row Anthony Dycus, James McGuire, Florentine Morales, Clarence Chandler, Domingo DeLeon and Sammy DeLeon. Two members of the team, Curtis Jenkins and Dale Martin were absent when the picture was made. (Staff photo).

For instance, a store in a large Texas city, a while back, had a window filled with shoes and a large sign, "Big Sale—Save up to Half!" A small sign read, "Shoes on display not included in the sale."

One year after a big bowl game (not in Texas) the coach of one of the teams complained that he had been unable to obtain hotel rooms for two friends, whereupon the head of a leading hotel was quoted in the press as saying, "I doubt that Coach So-and-so has two friends."

For years I have lugged around heavy suitcases with two big handles, brass trimmings and bulky straps. At last the luggage industry has come out with a valise that is trimmed with plastic, has a single handle (the case zips open on the side) and has a light but sturdy frame-work. Filled, it weighs less than the old-time kind does, and costs less, too.

Slowly, the world goes forward. Do you know what "Alamo" means? Cottonwood.

Nothing But The Truth

Late in April 1775, Isaiah Thomas moved his press from Boston to Worcester, Mass., and on May 3 he resumed printing his paper, "The Massachusetts Spy or American Oracle of Liberty." Above the masthead appeared the historic slogan: "Americans—Liberty or Death!—Join or Die!" A copy is preserved, inscribed by Thomas: "This Newspaper is the first thing ever printed in Worcester. —Isaiah Thomas."

To be understood by all the inhabitants of India, over 80 languages are needed, spelled in a number of different alphabets most of them based on Sanskrit or Arabic. A supply of type for all of them would cost a small fortune. The ruling classes of India tend to communicate in English.

I have been asked "What is the origin of the term 'printer's pie,' and when was it first used? Defined as "a mass of type mingled in confusion, such as results from the breaking down of a form of type," it is listed as "origin obscure." Some think it is from pica, some derive it from the mathematical term "pi," but the favorite theory is that it means simply a "pie" with mixed-up type. Instead of mixed-up fruit. The term was used in a book printed in England in 1659, as a word already well-known among printers. Other spellings: "py, pye."

Winter was a difficult season for Colonial printers. They had to wet their paper before they put it on the press. Sometimes the paper froze hard—and that's Nothing but the Truth.

To make a delicious sauce for roast lamb, combine equal parts of water and distilled white vinegar, heat. Add sugar and chopped mint leaves to taste and allow to stand about half an hour so the mint flavor will develop.

Some epicures like to add raw mushrooms to a green salad. If the mushrooms are very small, add them whole. Medium-size mushrooms can be sliced thin and used.

Ever wrap frankfurters in strips of bacon before broiling? Double trouble but doubly good! After you top that fruit-flavored chiffon pie with whipped cream, sprinkle the cream with grated lemon, orange or lime rind. Pretty to look at and tastes good!

Also exchanging are from left to right, Mrs. Pat Tucker, Noble Grand; Mrs. Lauderdale deputy, and Mrs. Lillie Alexander of Lubbock, Past President of the Rebekah Assembly of Texas.

Rebekah President District 8 Lodges

Schreiber of Galveston of Ladies Auxiliary Patriarch of the Rebekah made her debut at the District 8 meeting at the host lodge. Schreiber was accompanied by her husband, guests were E. Brownfield, Grand of the State of Texas, and the Past President of the Rebekah Assembly of Texas.

In the receiving line were Mrs. Jane Marquis, District Deputy; Mrs. Alexander, Mrs. Pat Tucker, Noble Grand of the State of Texas; Mrs. Lauderdale, Mrs. Schreiber and Mrs. Lauss Parkey, Lodge Deputy.

The registering table depicted the theme for Mrs. Schreiber's program, "Anchor Our Ships on the Sea of Fraternity." The table was beneath a wall mirror which was overlapped with fishing net containing sea weeds and shells. Centering the array was a miniature life preserver with the words "Welcome Aboard."

Decorated As a Ship
Lodge Hall was decorated as a ship. Colors of Mrs. Schreiber's selection of blue, white, and silver were used with individual tables holding small bud vases. The head table was laid with a white lace cloth over white center with a white styrofoam anchor. At each end of the hall were draped fish nets entwined with sea weeds and star fish. Hanging from the ceiling were fish net balloons type holders containing crystal globes, giving a lighted glow. On the walls of the hall were life preservers caught with white and gold roping, and bearing the presidents objectives, U. S. S. Friendship, U. S. S. Fellowship, U. S. S. Membership, U. S. S. Leadership, U. S. S. Stewardship, and U. S. S. Worship.

The serving table held a white basket containing an arrangement of colored glads. The piano was also accented with an identical bouquet.

Mrs. Schreiber introduced her program for her term, giving her aims, her theme, her slogan which is "Let's Sail On the Good Ship Rebekah"; her emblem, the anchor; her flower, the blue rose; her colors; her scripture, "Thank My God For Your Fellowship"; and her hymn "Rock of Ages."

Mrs. Marquis Honored
Following her talk, Mrs. Schreiber asked that Jane Marquis, be escorted to the center of the floor. Here the president presented Mrs. Marquis with a beautiful chain of regalia with official insignia. In turn, each lodge made the presentation of gifts to Mrs. Schreiber, among them gifts of blue rose corsages containing cash. Mrs. Rucker, in behalf of the Floydada Lodge, presented the president with a treasure chest containing silver dollars, and an assortment of jewels, in keeping with the theme. As the presentation was made, the song, "Let The Lower Lights Be Burning," was sung by Betty Marquis.

The grand master made a brief talk and explained his projects among them being the building of a new Grand Lodge home for the Grand Secretary and staff. After the program a salad supper was served.

Before closing Mrs. Schreiber praised the Floydada Lodge highly and called it a model lodge of Texas.

Naturally it's taller! The Texas State Capitol at Austin is taller than any other state Capitol and reaches higher into the atmosphere than the capitol building in Washington, D. C.

Next time you're in Austin, be sure and make a trip through this majestic domed granite capitol. You'll notice something different on every visit.

Take a look at the door hinges for example, and the inlaid flooring. They were made especially for this building, but often are overlooked by many of the visitors to this great capitol.

Austin is quite a recreational center too; so you'd better plan for a long stay at this Central Texas beauty spot.

Wells Expects Sales Tax To Be Adopted

State Representative H. G. Wells, of Tullia, is of the opinion that the legislature is going to pass some kind of a sales tax bill when the special session is called and that the governor is going to sign it.

His prediction is based on the fact that the two bodies of the legislature were almost together in the regular session and that most any kind of a concession will bring the conflicting interest together.

He says it is a settled fact that the legislature will agree on a bill, with sales tax provisions. He also thinks it is probable the escheat bill also will get under the wire.

Wells, who is representative of the 89th District, composed of the counties of Briscoe, Floyd, Hale and Swisher, says the people have come around to accepting a sales tax. He expects it to be unpopular, however, and difficult to collect.

He expressed these opinions in a question and answer period following the meeting of the Rotary Club here yesterday. A dozen or so taxpayers fired questions at the representative about affairs in Austin.

Wells is making a tour of his district to discuss the tax matter with constituents before returning to Austin for the special session on July 10.

It's a warning many prominent in this country. It is frightening Americans have uttered during its implications. The strength the past few years. So it cannot of a nation does not lie primarily be dismissed merely as a state in its wealth or its military merit by a young lawyer who has might, but in the spirit of its become pessimistic after going people. The U. S. today is the through one of the most trying wealthiest and most powerful nations probes ever conducted by a Congressional group.

Of course, Mr. Kennedy has had an opportunity to study firsthand the corruption existing in certain segments of labor and industry. But he insisted the labor-management corruption he helped uncover is only a small part of the "anything for a dollar" attitude of most segments of U. S. society.

Specifically, he mentioned the television quiz shows, pointing out that "Not one of the people approached turned down 100,000 money." And he cited a recent study which showed that one of three U. S. POW's collaborated with Communist captors in Korea. These and other evidences point to a definite moral deterioration.

Floyd Tractor Introducing Sol-U-Phos

An announcement of special importance to Floyd County farmers was released this week by C. O. Byrnes, owner of Floyd Tractor and Supply, said Byrnes: "We want to invite all our customers and friends to come in and talk over their fertilizer problems with us. We are now dealer for Sol-U-Phos liquid fertilizer. Liquid fertilizers are fairly new in our area, but they have been used very successfully in the lower part of the South Plains and in other states for a number of years."

The product — Sol-U-Phos Liquid Fertilizer — is produced by Goodpasture Grain & Milling Co., Inc., in Brownfield, Texas. Floyd Tractor & Supply is just one of the 60-odd dealers throughout the Panhandle and South Plains.

"We feel very fortunate to be able to offer to the farmers of our area this fast, safe, easy way to fertilize. Not only will they have the benefit of a labor and money-saving product, but they will also enjoy the extra dollars a balanced fertility program will give them," said Porter Wylie, manager of Floyd Tractor & Supply.

A special invitation is extended to everyone to go by this concern and ask questions about the use of this new way to fertilize, and Wylie added: "We will have a complete line of implements to apply Sol-U-Phos Liquid Fertilizers — either custom application or you may purchase your own rig at a very reasonable price."

OUTDOOR EATING — DO IT THE EASY WAY!

Paper cups for easy clean-up. Prepare fruited gelatin in paper cups and serve for picnic dessert.

Try cups for individual servings of potato salad. It's nice, too.

Save those foil plates. After enjoying frozen dinners, wash and save the foil plates. They make wonderful picnic plates — and, too, they are free for the saving.

Use your electric fry pan on the porch and patio. Table top appliances are so handy for eating out on the porch or patio.

Plant one-dish dinners to prepare in and serve from the skillet. Just be sure to use a heavy duty extension cord when using your electrical appliances out of doors.

Freezing Sandwiches For Quick Snacks

Fillings which keep best are meat, poultry, all kinds of cheese spreads, egg yolk mixtures, and peanut butter. BE SURE to spread both sides of bread generously and to the very edge with butter. Do not include lettuce, celery, or other foods that lose crispness when thawed. Add these and fresh tomato slices to the sandwiches when they are served.

Jack Meador of Phoenix, Arizona, is here visiting his sisters, Mrs. M. L. Probasco and Mrs. Burnham Probasco and their families.

Mr. and Mrs. A. N. Dillard, Dee Ann and Paula of El Paso, spent last week visiting her mother, Mrs. M. L. Probasco, and other members of her family. Mr. and Mrs. Dillard and Dee Ann left Thursday for Mt. Pleasant, Texas, to visit his relatives and to attend a family reunion. Paula remained here with her grandmother.

Be sure and process all foods properly before freezing them. Some who have put in vegetables without processing have not been pleased with the results.

If you find your freezer is too small and you decide to buy a larger one, don't dispose of the small one — you can use it, too. There is always a time during the year when supplies are low and the small box will hold them all, which will give you a chance to clean the larger box and make definite plans for your freezer needs during the season ahead.

Those attending were Dean Mitchell, Judy, and Nancy Allen, Brenda Marley, Karen and Sherry Watson, Larry McCurdy, Richard Wheelers, Gaylon Wheelers, Mike Moore, Linda Kendrick, C. Roberts, John McSwain, and the sponsors, Mr. and Mrs. Elbert Bolsen.

Weed Control in Grain Sorghum Many people may be using some type of 2,4, D formulation for spraying weeds in grain sorghum. Remember that 2,4, D is extremely toxic to cotton and other broad leaf plants. And 2,4 D should be used in regular weed control method. Regular cultural practices should be used where possible.

Below listed are some pointers in using 2,4, D products:

1. The most resistant stage of grain sorghum is 6-10 inches tall and application during other periods may cause damage.

2. Use wide angle nozzle and set the boom about 20 inches about the tops of the weeds. Spray booms set too high will cause more drift.

3. Never spray when the wind is above 10 miles per hour.

4. Use low pressures of 15-20 pounds per square inch to minimize drift.

5. Use only amine salt formulations, low volatile ester formulations, or emulsifiable acid formulation to reduce hazards of drift.

6. Applying at least 10 gallon of water per acre can also reduce drift.

7. One-half pound of 2,4, D is sufficient to control weeds.

Cotton Disease

The prolonged rain and wet weather has brought on some cotton disease and makes the cotton look particularly bad. The most common disease is ascochyta or wet weather blight.

Symptoms are small spots, brown to ash colored, in the leaves with these spots also showing on the stems. In many cases this disease will cause young cotton to die.

This is a fungus disease that is carried in the seed as well as in old cotton stalk residue.

Plowing the soil tends to let in air and dries out the soil. This will help cotton recover from this disease.

Swine Association

A Floyd County Swine Improvement Association was organized this past week with Dale Lacey, president, Norman Caldwell vice-president. The organization is open to both senior and junior members.

The organization plans to conduct a barrow sale, carcass evaluation contest and educational and swine improvement meetings throughout the year.

Persons interested in becoming members should contact the above mentioned persons or the County Agent's office for further information.

Worker Should Be Certain Of Wages Posted

The amount of benefits payable to a worker and his dependents at retirement, if he becomes disabled, or to his survivors in case of his death, depends upon the amount of wages posted to his social security account. John G. Hutton, Manager of the Lubbock District Office of the Social Security Administration, pointed out today.

The Social Security Administration is responsible for keeping an accurate and up-to-date record of each earnings record; however, the cooperation of employers and employees is needed in maintaining these records.

A person working for someone else should be sure his employer gets his correct name and social security account number when he starts to work. If a pay slip or withholding statement has an incorrect name or number, the worker should call this to the attention of his employer. The employer should also make sure the correct names and account numbers are on the quarterly reports of earnings sent to the Internal Revenue Service.

A person who is self-employed should pay his social security self-employment tax and report his net earnings at the end of each year if those net earnings are \$400 or more. Mr. Hutton said. These reports must be based on records of income and expenses in connection with the trade or business.

Copies of self-employment reports and the business records upon which they are based should be kept for future reference.

The Social Security Administration encourages working people to check their social security accounts at least once every three years to ascertain if they are getting proper credit. A convenient card form for requesting a statement of the earnings reported to your social security account is available at the nearest social security office.

Special Poll Seek Answers On Possible Nuclear Attack

Do you believe that Western Christian civilization will survive to the year 2000? Of a group of suburban housewives contacted in a special poll, 100 per cent said "yes." "How" was another matter.

In the same poll, the women were asked to say whether they felt nuclear attack on this country was (1) impossible, (2) unlikely, (3) possible or (4) probable. Eighty-two per cent chose "possible." Remainder said "unlikely."

Asked what they would do if given two hours attack warning, 76 per cent gave answers reflecting some knowledge and fore-thought. Only six per cent said they would try to get out of town. Most said they would snatch up canned goods, water and children and head for a basement or some other "safest" home preparedness. It was said they had no idea what they would do.

Asked what they would do if they had only 15 minutes' warning, 64 per cent said they would take whatever shelter was available as quickly as possible. Other 36 per cent gave answers such as "panic," "pray" and "nothing."

Asked if they felt the country's present civil defense preparedness (both individual and collective) was adequate to enable the country to survive nuclear attack, 100 per cent said "no." Asked if they felt it could be done, 78 per cent said "yes." Remainder expressed some degree of doubt.

Some volunteered suggestions such as, "The government should build shelters into schools." Other urged more government encouragement for shelter building. The women questioned do not constitute what professional pollsters would call a "true sample" with a proportionate combination of ages, sexes and socio-economic groups. It was made entirely the problem of having one class

staked down to the ground so that he cannot move. According to the story, if the crab is confronted with some sharp and obvious danger, such as the approach of a deadly enemy, he will pull loose and save himself, even if it means tearing off a limb.

But if the crab is faced only with gradual starvation, he will stay where he is—and die.

NOTE OF THANKS

STAYING in one of the medium-sized Texas cities that is regarded as a target area. It was heavily and purposely weighed toward people in the response to live to the year 2000.

Almost all evidenced concern about civil defense, and none refused to answer the questions. A number asked where they could get civil defense information; others said, "I've got some pamphlets here somewhere I've been meaning to read."

All were required to answer immediately without time for thought or research.

Purpose of the poll was not to jar anyone into action nor to gain any accurate statistical measurement of civil defense area. Remaining 24 per cent said they had no idea what they would do.

Max Dyess Finds Father Dead In Home

Earlie Edgar Dyess, 49 year old father of L. Max Dyess of the Lakeview community, was found dead at his farm home Saturday morning, after apparently dying in his sleep from a heart attack Friday night.

The farmer was found by his son when he went by the home Saturday morning to join his father for work. Dyess had suffered no previous illness and his death was a shock to members of his family who saw him quite active the day before.

Justice of the Peace Ed Griffin following the inquest Saturday morning said there was no indication of foul play and that he probably would return a verdict of death from natural causes.

Dyess and his Floydada son farmed the Conner Oden place near the Ralls highway, where the man died.

Born in Bell County March 1, 1912, the deceased came to this area in 1928, farming since that time.

New Directories Are Distributed

The new July issue of the Floydada telephone directory will be mailed to subscribers Tuesday, J. C. Oakley, manager for Southwestern Bell Telephone Company, announced.

This year's directory has a white cover and contains 16 "white" or alphabetical pages with over 1,900 listings.

According to Oakley, more than 3,300 directories have been printed for distribution to telephone customers here. He also mentioned extra copies were printed as replacements for those used in public telephone booths and other places where a lot of use occurs.

Names of persons who had telephones as of June 2 were included in the new book.

Old directories should be thrown away as soon as the new issue arrives, Oakley said. However, out-of-town and frequently called telephone numbers should be copied in the new directory before throwing the old book away, Oakley cautioned.

HOMEMAKING HINTS

By Phyllis Roggensdorff Agent
One-Step Method Makes Canning Easier

The latest method for canning vegetables is a one-step cold-pack method.
Directions are simple. As an example, take snap beans. Begin by washing all pint or quart jars in hot soapy water and rinse well. It is not necessary to sterilize jars since the pressure canner must be used in canning all non-acid vegetables.

Use only fresh, young, tender beans. The bean should just be beginning to form in the pod. Wash them thoroughly, trim ends and cut into 1-inch pieces.
Thus far there is nothing different from the old method of canning snap beans. Now you will note that the fill is different.

Pack raw beans tightly into clean jars to 1/2 inch of top. Cover with boiling water, again leaving 1/2 inch space at the top of the jar. Add 1/2 teaspoon salt to pints and 1 teaspoon to quarts.

Close the jar with a two-piece lid and place it in the pressure canner. Exhaust the canner for 10 minutes, close the petcock and process at 12 pounds pressure in pint jars 20 minutes, quart jars 25 minutes. Remove the canner from heat, let the pressure return to zero and remove the jars.
This one-step method can also be used for canning fresh Lima beans, carrots, cream style corn, whole kernel corn, blackeye peas and summer squash.

Did you notice we said to process at 12 lb. pressure instead of 10 lbs.? Because of the high altitude here, all foods should be processed at 12 lbs. pressure.
For more information on canning vegetables and fruits, ask us for our free bulletin on "Home Canning."

Of Major Factors Govern Good Irrigation Management

get water. Then, after the root zone is filled, the farmer should be concerned primarily with the top two feet of soil. The root zone can be filled either with natural precipitation or by irrigation. The top two feet also can be filled in either of the same manners, although irrigation usually is required to take care of that need during the growing season.

The two foot area is particularly important because about 60 percent of the moisture and nutrients used by the plants comes from the top 24 inches.

The farmer can determine how much moisture he needs through a simple feel test of the soil. By taking samples from varying depths and squeezing them in the hand, a farmer can tell approximately how much moisture is in the soil at that time. Soil which leaves a damp impression on the hand is 75 to 100 percent full of water, while soil which bounces is about 50 to 75 percent filled. But if the soil just crumbles when it is squeezed, there is a need for more moisture.

Should Start in Time
In the summer particularly, a farmer needs to start his irrigation in time to cover the entire field before plants on the far side start hurting for lack of moisture.

In summer irrigation, a farmer can expect 70 to 80 percent efficiency from his water if several important factors are in equilibrium. If a system is de-

signed so that the length of run, slope and size of water stream all are taken into careful consideration, such efficiency should be forthcoming. With those factors determined, a farmer can determine how long he needs to water to apply the necessary amount, and not just have to guess at the rate and time.

The optimum moisture content of soil is about 50 to 75 percent. If the moisture content could be kept about that level, farmers and crops would be in good shape. That is the point that farmers need to keep in mind when watering in order to see that the moisture content stays at about that level if possible.

The Soil Conservation Service technicians can aid farmers in working out designs for the application of irrigation water, and can help in determining when moisture is needed.

Mrs. Fagan And Grandson Enjoy Vacation Tour

Full of enthusiasm this week are Mrs. Pearl Fagan and grandson, Larry Fagan, who returned home Monday after a guided tourist trip which took them through the eastern part of the United States.

The two left Fort Worth by tourist bus about two weeks ago and along the way saw the historical scenes in states such as Virginia, Louisiana, Mississippi and Washington, D. C., where a good deal of their time was spent in viewing monuments to historical events. They visited the White House, and other public government establishments.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford

AUSTIN — State Capitol is being remodeled on taxes in 1959, he re- having a relatively quiet period minded, and the state govern- somewhat like the "eye" of a hurricane.

Legislators are at home, and Gov. Price Daniel has gone to Hawaii for the National Govern- or's Conference. Officially, the "time out" ends July 19 when the special tax session begins.

But despite the lull, sharp gusts of differing opinion are still blowing. Before leaving, Gov. Daniel issued a parting blast at lobbyists in particular and critics of his anti-sales tax stand in general. He is thinking of asking for tighter lobby control measures, particularly in regard to reporting of money spent to influence legislation. He also accused opponents of his tax plan of being unwilling to compromise.

Lawmakers are having their say before the Daniel-appointed committee to study tax measures. Sen. Wardlaw Lane, sponsor of the Senate-passed sales tax bill, took a dim view of the "compromise" talk. Legislature compro-

SCHOOL BUS PRICES PROBED

— Atty. Gen. Will Wilson has launched inquiry into the prices being paid by the state for school buses.

Wilson announced courts of inquiry to be held in Austin, Dallas, and perhaps later in San Antonio. He said investigation had been under way for six weeks and had revealed that Texas was paying from 10 to 25 per cent more for school buses than other states. He said there was no evidence of identical bids, but that he felt there was a strong possibility of "rigged bidding."

School buses are bought by the Board of Control with state school funds on the basis of sealed bids. Bus dealers could, if found guilty of conspiring together over prices, be subject to both civil and criminal anti-trust suits.

Courts of inquiry are not trials, but proceedings for the taking of sworn testimony to see if there is evidence for filing suits.

PARENT LIABILITY UPHELD

— In a recent case, the Supreme Court refused to change a lower court decision that the law holding parents liable up to \$200 for damage caused by their children is constitutional.

Challenging the law was a father whose 15-year-old son had stolen and wrecked a car. Three courts upheld the constitutional-ity of the law and the father's responsibility.

It holds parents liable for "malicious and willful" destruction of property by children between 10 and 18 years of age.

INSURANCE HIKE FORECAST

— Higher auto insurance premiums are predicted by officials of the State Board of Insurance.

Board has the matter under advisement after a public hearing. New rates, if set, will go into effect Aug. 1.

Increases suggested by both industry spokesmen and the Board's actuarial staff are the same. They are 8.7 per cent for comprehensive private passenger coverage, 8.1 per cent for collision, 23.6 per cent for liability, and 16.1 per cent for medical coverage.

A Department study showed that premiums were down as a result of the new safe driving plan and that claim costs were up because of the costliness of replacements on today's automobiles.

GAS TAX RULINGS ASKED

— Probability of a strong push for a gas tax in the coming special session was indicated by Gov. Daniel's request for opinions from Atty. Gen. Will Wilson on the constitutionality of two such proposals.

One is a proposal by Rep. Bob Eckhardt of Houston which would require the holders of contracts for dedicated gas reserves to guarantee the state a tax of at least one cent on each 1,000 cubic feet of gas produced.

Another, by Rep. George Hin-

son of Mineola, is a rewrite of the severance beneficiary tax passed in 1959 and since held unconstitutional by the courts. Gov. Daniel has said that the 1959 bill would have stood up in court if it had been enacted as he recommended.

ANOTHER BIG REASON BEHIND THE BIG BOOM IN FORD SALES

Ford Dealers were first with a long-term warranty...because they have the car to back it up

For 1961 the warranty* on all Ford cars was extended to 12,000 miles or one full year, whichever comes first. This action tripled the existing warranty—and scooped the American automobile industry. It was dramatic proof of your Ford Dealer's confidence in the finest, most durable, most reliable Fords ever built.

These are the cars with the new service-saving features most other manufacturers are just planning for

the future. The '61 Ford goes 30,000 miles between chassis lubrications... 4,000 miles before you need to change oil. Brakes adjust themselves automatically. The muffler is built to last three times as long as the ordinary type. Body and underbody are specially protected against rust and corrosion. And, Ford's Diamond Lustre Finish never needs wax.

STOP spending money on a car

that's behind the times. SWAP for a '61 Ford while sales are booming and the deals are sensational. SAVE when you buy. Continue to save with the car that's built to be more service-free.

*Extended Warranty—Each part of '61 Fords, except tires, is dealer warranted against defects in materials or workmanship for 12 months or 12,000 miles, whichever comes first. Owners remain responsible for normal maintenance service and routine replacement of maintenance items such as filters and ignition parts.

Today is the day to STOP...SWAP...SAVE
