Recipe Of The Week

We are sure housewives have a favorite recipe, one that is quick, appetizing, a fancy dish, a new dessert. Share it with your friends and neighbors. We would like to know about it and so would our readers, so we've begun this column to give you the opportunity to exchange recipes with your friends and neighbors. Each Thursday we will carry a favorite recipe and a picture of the housewife submitting it. Call Peggy Medley at the Hesperian or mail your recipes to Box 848, City. We'll pick one each week, it may be yours. This week we are sharing with you a recipe out of the kitchen of Mrs. Ernest Lee Thomas.

MRS. ERNEST LEE THOMAS

1 clove garlic
1 can Mushroom soup undrained

Dougherty Club Enjoys Luncheon

The Dougherty Home Demonstration Club met last Thursday in the home of Mrs. W. J. Ross, who was assisted in preparing an Italian luncheon by Mrs. Russell Crawford and Mrs. Johnnie Cates.

The meal consisted of spaghetti and meat balls, combination salad, Italian ice cream with Italian stick and Pimento cheese bread. A short business meeting was held following the luncheon.

Mrs. Ross gave the devotional from Psalms 117 chapter. Members answered roll call with a household hint such as putting a pin under a button when sewing on so it will not be so hard to button; using household ammonia on grease spots and on the collars of heavily soiled shirts before washing; also to keep onion fumes from getting into the eyes, peel or slice from the bottom of the onion. Other hints included when the cucumbers are in the bitter stage, cut off the stem end and rub together a few minutes, the bitterness will be rubbed out. Put one cup of salt to one gallon of water and boil your hose a few minutes and they will all be the same color. These are for those that are kept after discarding mates which were ruined.

Mrs. Johnnie Cates gave the council report and announced the THDA meeting which will be held on April 18 in Lubbock. Several from the Dougherty club as well as others are expected to attend.

Mrs. Crawford, Mrs. Cates and Mrs. Ross displayed their lovely hats they made and the club voted to make hats at their next craft meeting if Mrs. Tom Porter is available that day to show the procedures.

THE WHIRLWIND TRACK TEAM of Coaches Bill Curry and Bill Carmack will be host on Saturday to the big Whirlwind Relays which are expected to draw some 24 teams to the local track. The squad pictured here will carry the school colors at the meet. The Whirlwinds this year are mostly a young team, heavy with freshmen and underclassmen and light on seniors. They will be facing strong competition in the meet which should produce some fine winning marks in both the Class A and Class AA division.

2AA Basketball Teams Strong in Play-Offs

District 2 AA can be proud of their color bearers this year in the state basketball play-offs. The Canyon Eagles, winners of the boys division took White Deer in bi-district and then breezed through the regional tournament undefeated.

This weekend they will be at Austin in the state tournament where they can finish no lower than fourth place and have a good shot at the state title. The Tulia girls team is playing in a schedule that runs a week behind the boys. On Tuesday night they defeated Spearman in bi-district by a comfortable 18 point margin. This weekend they will be at the regional tournament at Lubbock.

Their chances of returning to the state meet again this year are good. Their toughest competition may come at the regional meet where Friona girls are representing district 3. Tulia has both won and lost to Friona and if they meet in the tournament it shapes up as a battle royal. Tulia was second in state last year and could very easily have taken the state crown at that time.

Local fans can well be proud of the showing of the Whirlwinds and Whirlettes against such competition as our district winners. The green and white was playing some of the best teams in Texas and looked good while doing it.

Stovall, suit for damages.

Letters To Editor

Dear Editor, I want to express my appreciation and extend my thanks to you for the assistance given your County Agricultural Agent in connection with your Soil Fertility Day held recently. You can rightly feel proud of the fine meetings you staged and the number of people who attended. Our interest in the project was to aid in developing sufficient community interest so a worthwhile group would be on hand to whom the speakers could fire their ammunition. I hope the results were as gratifying to you as they were to us. I want you to know that the Burlington Lines are grateful for your generous devotion of time and effort which resulted in more interest in good farming in our County. We were glad of the opportunity to work with you and we stand ready to cooperate with you whenever we can aid in the wider adoption of good farming practices. Yours very truly, A. K. Heppery

THIS ISSUE is our annual Fat Stock Show edition — I'm no judge of livestock, but after making both the Lockney and the Floyd county Junior Fat Stock shows — think I know more about lambs, swine and cattle.

The adult leaders, the young showmen, everyone who worked so diligently for the huge success of this year's show is to be commended. This is one of the best programs in the county — and the nation we know.

While we're on the subject of livestock I want to mention a telephone call I received from Mrs. Roy Hale, 13 miles west of Floydada. It seems they have a ewe sheep that gave birth to two and a half lambs! Of course twin or triplet births aren't too unusual for sheep, but the one-half sheep is certainly a unique event.

Hale said the half sheep was a perfectly formed back half and completely covered with wool.

I, too, have had animals sifted — and can still remember it, but think it has helped me to accept the ups and downs of newspapering.

THE CECIL Lewis family was here for the big show. I enjoyed visiting with Cecil and could hardly wait to get in print the last thing he said, "Come on down, I'll have the stink ball ready and I know where to catch the big ones."

THAT MAY be a very authentic 1927 Whippet that Bill McCown of Dougherty is driving, but I still believe that's a Model A bumper on the front. Bill's "new" car is pictured in this issue.

Douglas Degge Reports On Noxious Weed Control

Now is the time to check wheat fields for winter weeds and if weed infestation is heavy enough to justify spraying, it should be done immediately. Tansy mustard is the most prevalent weed in this area, it has alternate

HARRIS RITES HELD SUNDAY IN LOCKNEY

Funeral rites for Jesse S. Harris, 54 year old former Lockney resident, who died Friday morning in the Lubbock Methodist Hospital, were held Sunday in the First Methodist Church in Lockney. Interment was in Lockney Cemetery.

Harris had moved to Lubbock in January. He was a native of Snyder and moved to Lockney with his parents as a young boy. Survivors include his wife, Grace; one son; a daughter.

THE 1963 SCHWINN'S ARE HERE

Studies also show that one-half pound of 2,4-D ester applied after the wheat is fully tilled, but before vigorous growth begins (Feb. 15 to April 1), usually gives effective control. Further studies show that weed treatment will be profitable on dry land wheat when the estimated yield is 10 bu-acre or above. This is based on \$1.75 per bu. for wheat and spraying cost at \$1.50 per acre.

Douglas Degge reports that he has noticed heavy infestations of tansy mustard and other winter weeds recently. These plants are now beginning to grow in height and will take up large amounts of moisture until they reach maturity.

and Floyd Counties. Mr. Emmitt Smith, Wildlife Biologist for the Game and Fish Commission, who is in charge of trapping and transplanting in the state, from New Braunfels, Texas will be in charge of the meeting. Sportsmen and landowners are urged to attend.

The proposed site, which includes approximately 200,000 acres in Briscoe and Floyd Counties, will have a closed season on mule deer hunting for a five-year period. Wildlife management licenses will have to be signed by all the landowners in the proposed area before deer can be released.

Personnel of the Game and Fish Commission feel that this type of country on the Caprock has possibilities for establishing a huntable mule deer population in years to come if properly protected.

HOMEMAKING HINTS

By Phyllis Roggenorff, County Home Demonstration Agent

Sadie Thompson, Jr. Asst. Agent in-training.

The past two winters ice and snow storms have caused considerable damage to shade trees.

Prompt treatment can, however, keep many of these trees from becoming unsightly and dangerous. It may even save them from death.

But be careful when you apply first aid. Be sure your saws, knives, and wood chisels are sharp. Also, watch out for fallen electric wires. Don't do a thing until these are removed by an expert.

When cutting off damaged branches, try not to tear the bark. Tree specialists in the U. S. Department of Agriculture's Agricultural Research Service suggest that you "stub cut" any branch that is too large to support by hand. Their recommendations are given in the Department's Home and Garden Bulletin No. 83, "Pruning Shade Trees and Repairing Their Injuries."

Stub cutting requires three saw cuts. The first cut is made on the lower side of the limb about a foot or so from where the final cut will be made. Saw upward about half way through the limb.

Whitehead, northwest of Ralls.

Mrs. C. W. Denison visited briefly Wednesday at Mrs. Greens.

We extend our sympathy to Mrs. Gordon Mayfield, a former Centerite, in the passing of her father, Mr. Adams, of Littlefield, who died Sunday afternoon.

COOKING IS FUN

. . . IN AN ELECTRIC KITCHEN

Changing an old-fashioned kitchen into an attractive, efficient home-making center will make an older home a far pleasanter place in which to live, work and entertain. It will also increase the resale value of the house if the time should come to move.

Remodeling the kitchen will make it possible to install a built-in electric range, which gives a distinctly contemporary look while saving the home-maker the anguish of watching, probing, and guessing that goes with cooking on an out-of-date stove.

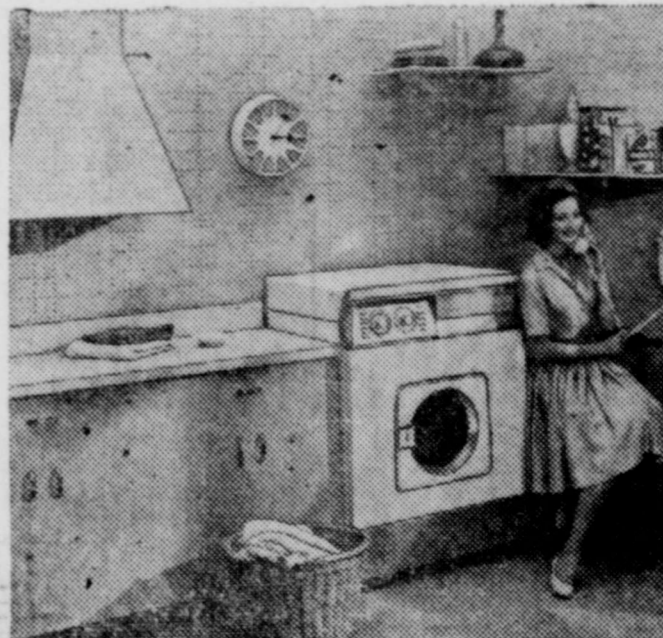

The variety of automatic electric built-in cooking units available today gives a wide variety of kitchen arrangement. The baking center can be separated from the surface-cooking area, and extra surface units can be built into the snack section for teen-age refrigerator raids and grown-up guest nights.

Built-in electric ovens may be single or double, and surface elements in groups of two or four may be installed flush with the counter, or fold-down units that leave counters free when not in use may be preferred.

"MUST"

Remodeling an older home these days without rewiring it might be compared to building a boat in the middle of the Sahara Desert. Rewiring without a good plan for present and future electrical household needs is almost as ridiculous.

An ideal guide to follow when wiring or rewiring a house is the list of "Gold Medallion" Home Standards. A "Gold Medallion" is awarded by electric utilities to homes that are adequately wired, equipped with modern electric appliances, and heated electrically.

Here are some of the electric features a home owner can enjoy in a home that has been remodeled for better electric living.

Full house power: each room has outlets and power enough for the many appliances that make electric living comfortable and convenient. No point along the baseboards of any room is more than six feet from an electric outlet.

Above-average lighting: proper lighting is provided for all family activities, including reading, shaving, watching television, and entertaining. Good lighting inside helps decorate each room. Outside it adds dramatic effects and discourages prowlers.

Electric heating and cooling: electric heat is clean, quiet and comfortable; with air conditioning, it will have perfect indoor "weather" all year long. Windows stay shut against outdoor noise, dirt, and irritants such as pollen, and there are no uncomfortable blasts of heat or chilly, drafty floors and walls.

STATE CAPITAL Highlights AND Sidelights by Vern Sanford TEXAS PRESS ASSOCIATION

AUSTIN — House bills passed by the Texas Legislature today were turned down by an estimated minority of 12-16.

While Gov. John B. Connally was recuperating from a hernia operation, the state senate turned thumbs down on his choice of former Supreme Court Justice W. St. John Garwood as chief justice of the state.

The move was made by Sen. Charles Herring of Austin — on an operation: an appendectomy.

Attempts at bedside maneuvers by both to get a senatorial confirmation for the prominent

GAME - PARKS MERGER — Senate spent most of the week spinning its wheels. But over in the House of Representatives one of Governor Connally's major reorganizations — merging the Game and Fish Commission and the State Parks Board into a single three-member "Parks and Wildlife Commission" — was pushed through by a two to one majority.

Rep. James Cotten of Weatherford, long a foe of the Game and Fish Commission, carried the measure through the house, and committed himself to vote to provide general tax revenues to sup-

port the parks system once they are merged.

COUNTY SCHOOL SUPERINTENDENTS — A heavy majority in the House favors ousting county school superintendents in 96 counties. They voted to cut off state aid to them. Aim is to force the voters to say "yes" or "no" on whether they want to keep them at county tax expense, after their present terms run out in 1966.

It is this proposal that stands as it now stands in the House, the state saving will be more than \$1,000,000.

Counties affected are those with no more than two rural school districts under the county official's supervision.

COASTAL PROBLEMS — One sick industry on the coast got a shot in the arm when a bill by Rep. Bill Walker of Cleveland and Ron Neil Caldwell of Alvin, to cut the state occupation tax on sulphur producers from \$1.40 a ton to \$1.03, was passed by the House.

This would reduce state revenue from sulphur taxes by \$70,000 the first year. But Walker estimated an increase in business would make up at least half of that.

Consideration of two hotly-contested bills — one to raise teachers' retirement benefits and one to authorize a new system for granting shell-taking permits — was postponed for a week.

PADRE ISLAND PARK APPROVED — A noisy but brief flurry attended final House passage of Rep. Menton J. Murray's bill to make a National Seashore of Padre Island. But the Harlingen representative's bill passed by a 126-19 vote.

A slightly-different version of this proposal, one by Sen. Bruce Reagan of Corpus Christi, already had passed the Senate.

It is expected that the first bill to get committee approval by the other chamber will go to a joint conference committee.

VENDORS WIN — The state cannot collect the two per cent sales tax on sales through vending machines, where each sale is less than the minimum 24-cent taxable range.

Justice John C. Phillips of the Austin Court of Civil Appeals pointed out that the sales tax is a levy on the consumer, not the vendor.

"VACATION STATE" — A lady legislator believes the slogan "Vacation State" will bring Texas a bundle of tourist dollars.

Rep. Myra Banfield of Rosenberg wants that slogan placed on all future Texas auto license plates.

She has introduced such a resolution in the House, asking that the Texas Highway Department order it done.

"Personally, I believe that tourism can bring more money into our state than any industry," she says.

VACCINATION REMINDER — Texas Health Department currently is reminding travelers to foreign countries of the need for certificates of vaccination.

Citizens planning to go abroad or visit the interior of Mexico must obtain a smallpox vaccination certificate.

U. S. citizens returning from another country are required to have a valid International Certificate of Vaccination or re-vaccination against the disease.

Short Sports

Texas again led the nation in 1962 as the foremost interstate highway builder, with 3,000 miles of highway construction contracts awarded during the year.

Rep. Bill Rapp of Raymondville and Rep. Maurice Pipkin of Brownsville introduced a bill to repeal the 1961 Sunday Blue Law.

State Comptroller Robert S. Calvert said a new cigarette vending machine permit — a gold, pressure-sensitive decal — must be displayed on all machines March 1.

Texas Railroad Commission ordered an oil allowable of 28 per cent for March. This would be a production decrease of 56,559 barrels per day from the 29-per-cent February allowable.

On March 20, principal execu-

tioning his place as associate justice of the Supreme Court of Texas and has announced he had joined an Amarillo Law firm, which will be known as Adkins, Madden, Polley and Adkins. Justice Polley began his practice of law at Floydada in 1925.

Mrs. P. W. Bell and Mrs. Victoria Asher have been vacationing the past three weeks in San Diego, Calif. They are expected home sometime this week.

Marjorie Ann Oden, daughter of Mr. and Mrs. Conner Oden, has become news editor of "Campus" student newspaper at Southern Methodist University.

Private pilots license were issued to five veterans who have been flying under the GI training offered at Floydada airport. Receiving licenses were Troy Vaughn, Clinton Fyffe, W. E. Garrett, Glenn Treadwell and Billy B. Henry.

The likelihood that the Cedar Hill and Center-Fairview Farm to Market roads including 13.4 miles of hard surfaced road for the two will be done this year became almost a certainty this week.

Eleven candidates for aldermen will appear on the city ticket in Floydada on April 5. The lists of prospects include J. A. Patterson, C. M. Thacker, J. M. Wilson Jr., Aaron Carthel, Lewis Norman, John W. Kimble, A. C. Rainer, Clinton Fyffe, M. H. Martin, Walton Hale, and J. D. McBrien. Five aldermen are to be elected out of this number.

COMMITTEES BUSY — Senate and House committees have accomplished quite a bit — either by positive or negative action — to settle some legislative issues.

They have given a green light to a bill to raise the age ceiling from 14 to 16 on the state's program of aid to dependent children (an effort to keep needy children in school).

Given a friendly reception to the bill by Rep. W. H. Miller of Houston to require seat belt anchors in all new cars sold in Texas.

Given cool reception to a series of Senate-proposed constitutional amendments and bills designed to revise — and eventually eliminate — the state property tax, and leave it to local units of government.

Approved a Senate bill to set up a new school for mentally-retarded children in Corpus Christi. Another bill to create a similar school somewhere west of the 100th meridian in West Texas is set for a Senate committee hearing on March 20.

BUDGET HEARINGS — In two quiet rooms in the Capitol and one in the Sam Houston State Office Building, budget hearings are grinding toward an end by the Senate Finance and House Appropriations committees, and by Governor Connally's budget staff.

These groups have the most influence on how the state's \$3,000,000,000 income will be spent in the two years starting September 1.

Their figuring will determine whether the hearings by the House Revenue and Tax committee eventually will turn into serious consideration of bills for sales tax revisions.

It's very likely that the first bill to increase taxes will be one revising the exemption on outer clothing under \$10, and other items, to raise sales tax revenue by \$10,000,000 a year.

COURT RULES ON SAFETY LAW — Col. Homer Garrison Jr., director of the State Department of Public Safety, cautioned drivers of publicly-owned vehicles that they must comply with the provisions of the state's responsibility law.

Garrison said that a recent ruling by the Waco Court of Civil Appeals confirmed the fact that the law must be complied with by drivers of publicly-owned vehicles. The safety responsibility law requires everyone involved in an accident to show his ability to pay for damages caused to others.

This can be done by purchasing a liability insurance policy; by obtaining written releases from damaged persons; or by

(from the files of the Hesperian dated March 10, 1949)

Rev. C. J. Menefee of Phoenix, Ariz., formerly of Floydada, passed away on Feb. 23 with rites following the next day. Rev. Menefee was employed in Floydada with W. M. Massie and Brother, Real Estate agent for about 20 years.

Judge A. J. Polley last week resigned his place as associate justice of the Supreme Court of Texas and has announced he had joined an Amarillo Law firm, which will be known as Adkins, Madden, Polley and Adkins. Justice Polley began his practice of law at Floydada in 1925.

Mrs. P. W. Bell and Mrs. Victoria Asher have been vacationing the past three weeks in San Diego, Calif. They are expected home sometime this week.

LYNCH BAN CONSTITUTIONAL — A law prohibiting lynching is constitutional, says Atty. Gen. Waggoner Carr.

Carr also held that Floyd R. Palmer Landscaping Company can be held to a bid of \$18,161 for landscaping work around a state office building, even though the company says it will lose money on the project.

In other opinions, Carr said: A facility caring for six or less children during the day must be licensed as a commercial boarding house.

A county which purchases gasoline for its own use must pay the state excise tax, but is not subject to the federal excise tax. Texans, buying and registering cars in other states, still must pay the 1.5 per cent tax on the purchase price if the car is operated in Texas.

New residents coming into the state, are subject to a \$15 use tax, he says.

Follow Directions When Using Farm Chemicals

COLLEGE STATION, Texas — (Sp1) — The "secret" of avoiding poisoning farm animals, or any other crop, with agricultural chemicals is to follow directions on the container, a Texas A&M College veterinarian says.

This tongue-in-cheek advice comes from Dr. R. D. Turk of the Veterinary Parasitology Department, a speaker at the 12th annual Texas Agricultural Aviation Conference held at A&M.

Dr. Turk paraphrased the old axiom: "When everything else fails, try following the directions."

But then there are always persons who feel that if a little bit is good, a little more is better, he said.

"We have the crop duster who turns over a lake without shutting off the spray or dust, and agricultural chemicals. The result is a dead fish," he said. "We were a few dozen people killed have them turn over pastures by misuse of aspirin as from fields of forage crops, and we even have some who poison themselves. However, these incidences are becoming fewer and fewer."

Referring to current unfavorable publicity about alleged effects of pesticides upon humans, livestock and wildlife, Dr. Turk posed this question to the 200 persons attending the conference: "Do we need chemicals?"

"If you have ever seen a many bull, a bollworm infested cotton field, or a good pasture eaten up by army worms, the answer must be yes," he said. "Some persons say we don't need meat, clothing, automatic washers, and many things."

The veterinarian cited statistics showing how chemicals have made U. S. farm production the world's best, and how chemicals have improved human health. But he added that chemicals can be improperly used.

"Certainly chemicals are dangerous. So are automobiles, airplanes, electricity and even balloons. Did you know that last year twice as many deaths were caused by misuse of aspirin as from agricultural chemicals. The result is a few dozen people killed have them turn over pastures by misuse of aspirin as from fields of forage crops, and we even have some who poison themselves. However, these incidences are becoming fewer and fewer."

Mr. and Mrs. Ray Fickes and daughters and Mrs. Fickes' mother, Mrs. Girard, were guests here one night last week with Mr. and Mrs. Lane Decker and family. Ray is a former resident of this county having lived at Lakeview and is a graduate of Floydada High School. He and Mrs. Decker are cousins.

VETERAN'S ASK

Q—Can you give me a breakdown on the veterans who hold GI insurance policies?
A—Approximately six million GI insurance policies are presently held by veterans. The face value of the policies approximates \$40 billion. Of the policies, five million are held by World War II veterans, 700,000 by Korean veterans, and 300,000 by World War I veterans.

Q—Would I benefit by converting my GI term insurance to a form of permanent insurance?
A—My present premium is \$8.50 a month for a \$10,000 policy. I am 40 years old.

A—Term premiums increase every five years and thus become highest when the veteran is usually least able to pay. For instance, on your term insurance you will pay \$26 a month when you are 60 years old and \$61.50 when you are 70. If you convert to permanent insurance, the premium will become \$21.20 a month and it will never go up.

The Weevil And Cotton Burrs

Some beneficial information on the boll weevil problem was outlined by W. H. Newton of the Texas Agricultural Extension Service at the recent Soil Fertility Day in Quitaque. Mr. Newton spoke for over an hour to interested farmers on this subject, and even after his allotted time had expired the crowd continued to bombard him with questions. While it would be impossible to cover all of the information here, we might point out a few of the things he mentioned about the controversial subject of

bur hauling from the gins. After listening to his sound reasoning on the practice, most of the crowd left the building convinced that bur hauling is not likely to contribute to the weevil problem. Here are some of his reasons why it should not:

If there is a fan treatment at the gin for the burrs (and he felt that every gin should have that) then it will immediately destroy both grubs and adults.

By the time the cotton is ginned, usually 90 percent of the bolls are open and the boll weevil is already in hibernation.

If the weevils have already gone into hibernation, they will not come back to the burs that are placed on the farm.

Weevils cannot stand a hard winter without heavy cover, and burs are usually spread on the land so thin that it would be next to impossible to withstand our severe winter temperatures.

Finally, if any weevils should survive the winter they will be killed when the burs are plowed under before planting, since weevils cannot live underground!

COME EARLY AND BRING THE FAMILY.
PLENTY OF REFRESHMENTS AT THE CON-
SESSION STAND.

Death Claims R. A. Hyer Sr.

Robert Arlon Hyer, 45 year old former Floydada resident, is reported to have died in Plainview Hospital and Clinic at 12:45 a. m. Friday.

Funeral services were conducted in Floydada at the First Baptist Church on Saturday afternoon. Rev. Gilbert Rhine, pastor of the Bible Baptist Church, officiated. Interment was in Floydada cemetery under the direction of Harmon Funeral Home.

Mr. Hyer had suffered a previous attack about three and a half years ago, then underwent a major surgery in Houston in July, 1961. His recent attack occurred at the home in Plainview where he and Mrs. Hyer were living. Another howler suffered an attack, apparently not a serious one and the excitement from the incident was believed to have brought Mr. Hyer's attack on, according to his wife.

Born in Roby, Tex., on March 5, 1917, the deceased was the son of the late Mr. and Mrs. James Claude Hyer. He came to Floydada in 1956 and was in the trucking business until moving to Plainview in October, 1962, at which time he went into the concrete business. He was a member of the Baptist Church in Roby and a veteran of World War II.

Survivors include his wife, the former Marie Arrington of Floydada; one son, Robert Hyer of Perryton; one grandchild, Rodney Dale Hyer of Perryton; five sisters, Mrs. A. E. Hale of Lamesa, Mrs. Joe Margan, Roby, Mrs. I. Perryman, Mrs. Lora Edwards both of Abilene and Mrs. Stewart Williams of Amarillo.

This week, I joined with Senator Carl T. Curtis, of Nebraska, in introducing a resolution to insure Senate approval of all moves to limit or reduce America's armed forces or America's armed might.

In 1961, the Arms Control and Disarmament Act, sometimes known as Public Law 87-297, created an agency to be known as the United States Arms Control and Disarmament Agency. The agency is headed by a director who serves as principal adviser to the Secretary of State and the President on Arms Control and Disarmament matters.

Section 33 of the act authorizes the Director to prepare for the President, Secretary of State, and heads of such other Governmental agencies, as the President may determine, recommendations concerning U. S. arms control and disarmament policy. This section continues, however, with a proviso that "no action shall be taken under this or any other law that will obligate the United States to disarm or to reduce or to limit the Armed Forces or armaments of the United States, except pursuant to the treaty making power of the President, under the Constitution or unless authorized by further affirmative legislation by the Congress of the United States."

Section 34 of the act provides among other things, that the Director is authorized to "formulate plans and make preparations for the establishment, operation, and funding of inspection and control systems which may become part of the United States arms control and disarmament activities, and as authorized by law, to put into effect, direct, or otherwise assume United States responsibility for such systems."

This resolution that I have co-sponsored with Senator Curtis says it shall be the sense of the Congress that the American negotiating position in arms control or disarmament discussions include these safeguards:

1. Complete on-the-spot inspection of all areas involved in arms control or disarmament agreements with Members of Congress included as members of the inspection team.

2. Reporting of the President of the United States to appropriate committees of Congress, of any and all steps taken by him which would tend to alter existing ratios of weapons and the effectiveness between this Nation and its allies, and the Soviet bloc of nations.

3. All preliminary and final arms control or disarmament agreements be embodied in treaties subject to the advice and consent of the Senate of the United States.

When this act setting up this Disarmament Agency was passed I voted against it. It was passed by a vote of 73 to 14 with 13 members not voting. I very vigorously opposed the bill at the time and I am very sorry that it is on the books now and that this agency has been created. It is our hope that this resolution will get favorable consideration by the Congress to the extent that we can have more control over this business of disarmament.

You know what would happen if we surrendered our armed forces to the United Nations. They would for the most part come under the control of the Assistant Secretary-General for Security Council Affairs. He is one of the eight Department or Cabinet Secretaries in the United Nations and this is the most important "Cabinet" position in the United Nations. The present Assistant Secretary-General for Security Council Affairs is a Russian. His name is Eugeny D. Kiselev. As a matter of fact, every one of these Assistant Secretaries since the beginning has been a Russian by virtue of some stupid agreement that we entered into with the Soviet Union on the matter. That would mean that our armed forces would come under the control of an Assistant Secretary-General who is a Soviet. I think it is foolish for us to talk about disarmament at a time when the Soviet Union is bent on the destruction of the free world.

Too, we should take a lesson from history. No dictatorship has ever voluntarily disarmed. We cannot expect the Soviet Union bent on world conquest as it is to enter into any honorable agreement.
