Mackenzie Water Board Submits Bill To Legislature

Future Water For Lockney Floydada, Tulia, Silverton

The first big step in a future water supply for the cities of Lockney, Floydada, Tulia and Silverton was taken Monday night when the Mackenzie Municipal Water Board met in the city hall at Lockney and voted to submit a bill to the state legislature within 30 days for creation of the water authority.

It was a long meeting in which board members, interested property owners, bond men, and engineers studied the proposed bill, discussed it at length, changed it in some sections before voting unanimously to submit it to the state legislature.

President of the board Lon Davis of Floydada presided at the meeting which was attended by board members from the four involved cities.

A complete copy of the 27 page act is available to the public to study at the city halls and newspapers of the four cities . . . and publication of the notice of intention for the creation of the authority is published in each newspaper this week.

It is impossible at this time to estimate the cost of the dam, the cost in revenue and ad valorem taxes to the residents of the respective cities and the exact location of the dam on Tule Creek is still under study.

The group from Silverton was concerned that a clause be added to the bill in which it would guarantee a city a second chance to vote into the authority should the election fail to carry the first vote. The board voted to amend the act to this point and added that this city would have priority over another city's entry into the authority.

For instance should Silverton voters vote down the bonds and membership in the first vote, it would have the opportunity to have another vote to get into the authority before some other city like Abertamy would be given a chance to vote in and take Silverton's water rights and membership in the authority.

Another change in the act was voted to change the condemnation powers of the authority to condemn land around the proposed lake for recreational purposes. Tax money cannot be used to purchase recreation land.

It first appeared that the dam site would be on the property of D. M. Cogdell Jr., about two miles east of the Claude Crossing bridge, however one of the engineers present said that it now appears that the dam could better be located parallel with the highway on the west side of the bridge. He said that very little

Emmett Hinson Killed In Fall From Ladder

Tragedy struck in Floydada Tuesday afternoon with the accidental death of a 67 year old electrician, Emmett E. Hinson, who fell from a ladder as he was trimming trees at the family home, 230 W. Marivena. Ira Colley, who resides next door to the Hinsons, was backing his car from the driveway, and was the first to reach Mr. Hinson. He was pronounced dead on arrival at 5:05 at Peoples Hospital from head injuries.

Funeral rites are tentatively set for this afternoon, (Thursday) in the First Methodist Church. Burial will be in Floyd County Memorial Park.

Hinson was a native of Limestone County, born October 3, 1897. He was married to the former Ethyle Run on December 24, 1921, in Lampasas.

They moved to Floydada in 1927 and opened Radio Electric Shop on Main Street and also ran the telegraph office for several years. Later the shop was moved on California Street. He closed the business in 1962 but continued to do electrical work.

Hinson was a member of the

Firemen Called To Three Fires

The local fire department had its activities stepped up this past week as they answered three fire calls. Actually two of the calls were to the same place, only a day apart, to complete the job.

Friday, January 3, the department was called to a fire 1 1/2 miles south of town. A frame house belonging to B. C. Cates burned to the ground, including the cedar post foundation.

The next day, the group was called back to the same place to put a little more water on the smoldering remains.

Some farm equipment, including a Heston combine pickup attachment, was lost in the fire. Neighbors saved several feet of pipe and other tools that were in and around the house.

The other fire involved a car parked on the Silverton Highway four miles north of town. The motor had caught on fire and was extinguished by the department.

Several officials mentioned that several persons have been noticed chasing the fire truck to see where the fire is, etc. It was noted that this can impair the work of the crew, for a number of people have parked by the very fire plug the department needs to be using. Some people have been in the way in other respects at various fires.

Police Kept Busy With Break-Ins

The local police officers have been kept in a constant run since a couple of weeks before Christmas by a person or persons that enjoy breaking in buildings and forcing doors, drawers, or other equipment open.

New Year's eve someone broke into Gosh Drug and Pharmacy and managed to get away with a clock, a watch and about \$80 in cash from both cash registers.

According to Bud Goen, manager of the firm, the person know building quite well, for there is a place in the roof that has been torn loose for repairs, or their reasons, in the past, and the person seemed to know just where that place was.

The culprit entered the building through a manhole on the roof, went to the place that had been patched before, tore the repairs off, and cut a hole in the new roof to gain entrance into the building.

Goen mentioned that E. E. Boche, owner of the building, offers a \$100 reward for information leading to the arrest and conviction of any person breaking into one of his buildings.

At Thriftee Super Market a couple of nights ago, someone tried to pry the back door open to get into that building, but

Hospital Suit Appealed To Texas Supreme Court

The litigation against the Caprock Hospital District Board that was heard in District Court here last year, has now been appealed to the Texas Supreme Court by the plaintiffs.

District Judge L. D. Ratliff ruled in favor of the defendants when the suit was heard here last Spring and the suit was in turn taken to the Court of Civil Appeals in Amarillo. That court, too, ruled in favor of the defendants, and a re-hearing, asked for by the plaintiffs, was refused by the Court.

Now the plaintiffs will plead their case before the Texas Supreme Court, and that should be heard sometime this month. According to James H. Milam, attorney for the defendants, this action will delay the selling of the bonds for the new hospital for only about another month. A bill-burton grant of \$425,000 has already been approved for the hospital, that is expected to cost \$735,000.

Free Washington Trips Offered By Local Firm

All expense paid trips to the nation's capital city will be awarded to winners of an oratorical contest was announced this week by Melvin Henry, manager of Lighthouse Electric Cooperative.

The contest is open to any boy or girl who is a junior in High School for the 1964-65 school year. Mr. Henry said, winners will join winners of similar contests sponsored by other electric cooperatives across Texas on the first annual Texas Electric Cooperative Government in Action Youth Tour to Washington, D. C. All expenses of the 11 day trip beginning June 4, will be paid by Lighthouse Electric Cooperative, Mr. Henry said.

Each entrant will be restricted to give a 5 to 8 minute talk on the subject, "What Local Ownership of Lighthouse Electric Cooperative means to this Area," and answer 1 or more of 50 questions asked by the judges.

The oratorical contest will be judged on the basis of (1) knowledge of subject—40%; (2) speaking ability—30%; (3) poise—10%; (4) personality—10 percent; (5) appearance 10 percent.

Interested young people may obtain an official entry blank from their school or the offices of Lighthouse Electric Cooperative. The deadline for submitting entries will be February 12, 1965, Mr. Henry said.

As participants in the Texas Electric Cooperative Youth Tour, local contest winners will travel by car-train bus to Washington, D. C., where they will spend three days visiting places of historical interest and seeing the nation's government in action.

On Wednesday, June 9, the Texas group will meet more than 600 students from 10 states for a program sponsored by the National Rural Electric Cooperative Association and the Rural Electric Association and the Rural Electric Association.

Interment was made in Floydada Cemetery under the direction of Moore Funeral Home.

New Business Firms Open

Two new businesses have opened their doors for business in Floydada during the past week. One is a new structure and the other is the continuation of a business after a remodeling job.

McLain's Conoco Service opened its doors for business for the first time last Monday. That firm is located at Tennessee and Second streets.

The Merry Mac is also open. It is in the same location that Wither's Cafe has been for several years.

Both these new firms look forward to meeting the people of Floydada in their respective businesses.

Please Don't Call Me "Reverend"

Members of the churches Christ avoid referring to their preachers as "Reverend" or "Father". This is due to a fundamental teaching of Christ Matt. 23:8-10. We do not wish to be rude, but we are striving to uphold the teaching of the Bible on this subject.

Frequently, we who preach the Gospel are referred to as "the Reverend" as a gesture of respect, but religious leaders are blame for this confusion. We like BIG titles. We want people to think of us as highly. We thrive on competition with our fellows, and to separate ourselves from the "average person" into a CLERGY—Laity relationship.

Our Lord said, "be not ye called Rabbi; for one is your Master; even Christ; and all ye are brethren. And call no man your father on the earth; for one is your father, WHICH IS IN HEAVEN." Thus the Lord forbade the use of distinguishing religious titles. They are contrary to the spirit of Christ.

Paul was referred to as "our beloved brother Paul" (2 Pet. 3:15). Can you imagine some ear Christian referring to Peter, as "His Eminence the Most Divine Heverend Father Peter, Rector of Jerusalem?"

Only one time in all the Bible is the word "Reverend" used and this time it refers to God, NO man; "Holy and REVEREND is HIS NAME" (Psm. 111:9). I would not want to wear God's title, even in great humility. We who preach need to cease this race for supremacy and get back to the Bible from whence "cometh our help." If we would teach on this subject and not encourage others to call us Reverend, churches and people would not continue such a practice. If Paul, we need to be "minister" or servants of Jesus Christ.

FFA NEWS

(By Larry Patton)
Learning by doing is one of the most beneficial things that Ken Campbell, senior vice president of the local FFA chapter, has received from his past four years in ag.

He has learned the skills that will enable him to further his career as a farmer and rancher. Ken has lived on a farm all his life and enjoys working the land. As a freshman he had wheat for his project in ag but from his sophomore year until the present he has had a progressive project in cattle.

He is undecided about attending college this year or going right into farming and ranching. Ken is learning the cattle business from his father, Hal Vance Campbell, such as how to

pick high productive cows to keep for keeper cattle. With a great deal of culling Ken and his father have built up one of the best Hereford herds in this part of the county. They do all the farming on the Campbell place assisted by a brother of Ken.

Ken said he had learned that in order to get complete satisfaction from farming and ranching you do your own work. Anyone can give orders Ken said but not everyone will do the work themselves. The four years of ag has helped Ken to learn that if you want something done right, do it yourself. Ken has great pride in the FFA motto, Learning to do, doing to learn, earning to live, living to serve as a backbone for his future in a farming and ranch career.

Mrs. Dena Myrick has returned home after an enjoyable three month visit in California with her children, Mrs. Dick Bunnell and family at Inglewood, Mrs. Ross McWilliams and family at Ontario, and Roscoe Myrick and family at Santa Clara.

MRS. MYRICK HOME

The Myricks have a new baby girl, Sherri Denice. Mrs. Myrick attended adult music classes at Inglewood and also a music piano recital at Scripps College Campus given by the Pomona Valley Teachers Association in which her granddaughter, Julie Robertson, played. She also attended piano concerts at Pomona and Inglewood and several football games one in particular was Ontario and San Bernardino. Her grandson, Jackie McWilliams made three of the touchdowns.

Mrs. Myrick also saw the Tournament of Bands in Ontario in which Chaffey High School was host. There were 45 participating bands on parade and 33 competed for trophies. More than \$3000 worth of trophies were presented. Chaffey High School has an enrollment of 37000 students, 150 in band and 150 in drill team. Ontario is the home of The All States picnic on July 4th.

Mrs. Myrick reported a wonderful and interesting visit.

Pre-Planting Irrigation Suggested

Irrigation farmers who want to be prepared to water their 1965 crops are being reminded by W. H. Nelson Irrigation that the time for pre-planting irrigation is "nearer than you think."

When the irrigation season starts you can be irrigating instead of repairing—if you put all equipment into operational order early. Submersible pumps can be checked with special equipment for shorts, before the well is turned on. It could save you a burned out motor.

They can also replace electric motors for your pump. Check their prices on pulling and setting and repairs of all submersible pumps and quotations on new installations.

Nelson Irrigation is dealer for Rapidayton Submersible Pumps and A & C Turbine Pumps. The telephone number for W. H. Nelson Irrigation is YU 3-3894.

Auxiliary To Conduct Heart Fund Drive

Hospital Auxiliary of Floydada met Tuesday with the president, Mrs. Harold Ellison, presiding.

Members voted to conduct the Heart Fund Drive to be held in Floydada in February.

During the meeting Mrs. Jimmy Wilson and Mrs. A. L. Wylie were appointed to examine the by-laws and constitution of the Auxiliary.

It was announced that a permanent calendar would be posted in Peoples Hospital denoting the working day of each member. Also it was suggested the investigation of the possibility of a Red Cross first aid course to be taught here.

Members discussed the community clothing center in the basement of the court house. The urgent need is clothing for children from infants to six years old. Volunteer help is also needed on Tuesday and Thursday afternoons.

Mrs. Wise To Be Honored On 90th Birthday

The family of Mrs. C. O. Wise will honor her with an open house in observance of her 90th birthday Sunday, January 10, at 739 West Grover in Floydada. Calling hours will be from 2:30 until 5 p.m.

The six children of Mrs. Wise, Pauline Falkenberg and Carlisle Wise of Floydada, Lucille Bryan, Windsor, Mo., Doris Kitchens of Silvertown, DeWitt Wise of Brownfield and Marie Porter of Lubbock, will be assisted in hospitalities by Mrs. Wise's 22 grandchildren, 51 great grandchildren and 17 great great grandchildren.

Mrs. Wise was born in Clayburn Parish, La., on January 13, 1875. She was married to Charles Wise on January 6, 1895, and has been a resident of Floyd County since 1932 moving here from Paducah. Her husband died in 1942.

Rainfall For 1964 Reached 21.19 Inches

According to records kept by the ASC office in Floydada, this area received a total of 21.19 inches of rainfall during the year of 1964. This amount could vary as much as two inches only a few miles from the office, because of the scattered showers received by the county last summer.

The early part of the year was hard for the dryland farmers in this county, for through April only 1.43 inches of moisture had been received to bring the wheat to maturing age and also to give the needed underground moisture for the autumn harvested crops. The lack of rainfall in April, particularly hurt the local farmers.

However, when the harvest was completed, the total production reached almost the total that last year's crops did. The production of the crops root was considerably more than last year's.

The rainfall by months is as

Crop Stubble Provides Food For Game Birds

COLLEGE STATION — Leaving crop stubble as long as possible after harvesting serves as a food source for many game birds.

Such birds as quail, doves, ducks, geese and wild turkeys often have a difficult time finding food during winter and early spring, points out Wallace Klusmann, Extension wildlife conservation specialist.

Crop residues plus the seed of native weeds that are available in harvested fields make one of the best food sources for wild game. But, says Klusmann, some birds, especially quail, will not utilize food in a field unless there is some cover to protect them from natural enemies. Plant stubble left in the field will give this needed protection.

Rice, corn, grain sorghum and other field crops provide especially good feeding areas following harvest if left undisturbed as long as possible. Native weeds and woody vegetation along field borders serve as natural travel lanes for birds attempting to feed in a field.

Leaving stubble on the field, adds the specialist, is also recognized in many areas as a good soil conservation practice. The stubble aids in controlling both wind and water erosion and in holding snow in northern areas.

The 1964 Texas spring pig totaled 522,000 head, a drop of 16 percent from the 1963 total, reports the Texas Crop and Livestock Reporting Service. An estimated 76.7 pigs per litter compared with the 6.8 pigs per litter farrowed in 1963. Nationally, the 1964 spring pig crop was down 8 percent from 1963. The cutbacks in pig numbers is expected to strengthen the hog market later in the year.

follows: January 30, February 51, March 62, April 70, May, 1.59, June 2.62, July 5.76, August 2.92, September 3.69, October 3.7, November 1.80, and December 1.01.

This total of 21.19 is three and one-half inches more than was received last year, but the moisture fell during the growing season during 1963 and didn't this year. This year's total is slightly below a normal for this area of around 22 inches per year.

water drainage would be lost in moving the dam farther up the creek and said that it would be difficult to build a spill way around the "narrows" location.

The engineer said the narrow location on the Cogdell land would mean that the water would probably back up about 40 feet over the Claude highway and a considerable amount of expense would be involved in re-routing the highway around the lake.

If the dam is located on the west side of the bridge it will be on the property of C. M. Flowers. Flowers said that he certainly believed in fishing and boating and was agreeable to selling land for the dam and lake, but that he was concerned about the act which would allow the authority to work away from the lake and take good grass land.

The board assured Mr. Flowers that they were not interested in acquiring additional land for cabins and lodges etc. that their main interest was drinking water . . . and voted to take out the part of the act that would allow the authority to condemn land for recreational purposes.

Both Flowers and the board were in agreement that an area around the lake for flood purposes as well as a road is satisfactory and necessary.

Cogdell was present and asked if the dam would cut off flow of creek water through his land. An engineer replied that a state law required that normal flow of the creek must be maintained.

Marvin Shurbet, a Floyd county farmer and member of the state water board was present and told the group that the state water board had "several millions of dollars" available for water dams and that he certainly would like to see some of it placed up in this area.

He urged the group to work out its problems and get the act properly submitted and the state board would go to work on the disposition of money for the project.

Attending the meeting were: Davis, Shurbet, Cogdell, Flowers, John T. Forbes, attorney for the city of Silvertown; Joe W. Smith, First Southwest Company; Julius Lyons David G. Stubbe, U. S. Billy Marquis Is Improving
Five year old Billy Marquis, son of Mr. and Mrs. Billy Marquis, who was seriously injured some three weeks ago when struck by a car in Floydada, is said to be improving daily in Methodist Hospital.

The youngster is now taking therapy on his hand and arm and his broken bones were expected to be put in a cast yesterday, according to his grandmother, Mrs. F. M. Marquis.

It was not known just how much longer Billy would have to remain hospitalized.

Careful driving doesn't always avoid an accident, but it helps.

About half of the ills that afflict the human body originate in a pampered, idle mind.

MAJOR CONSTRUCTION—One of the major investments in the 1965 construction program of the Southwestern Public Service Company is a new 210,000 kilowatt generator, which is being installed at Cunningham Station, west of Hobbs, New Mexico. The new unit, pictured under construction, is scheduled to be in service in mid-1965. Southwestern Public Service Company's 1965 improvement program calls for an investment of \$24,607,000 in new equipment, second largest construction budget in the company's history.

Southwestern Public Service Co. Plans Major Expansions In '64

Southwestern Public Service Company's 1965 construction and improvement program calls for an investment of \$24,607,000 in new facilities, it has been announced by A. R. Watson, president and general manager of the electric company.

The company's construction plans for 1965 anticipate the second largest annual improvement program in the company's history, topped only by 1964's record investment of more than \$30,000,000. At the conclusion of the 1965 program, the electric company will have invested nearly \$120,000,000 in new equipment in the 1961-65 period.

"One year ago, when we announced a record single year construction budget, our forecast was for continued growth throughout our 45,000 square mile service area. Our optimistic outlook remains unchanged, as evidenced by the continued high level of new equipment investment we plan for 1965 and the years to follow. Inasmuch as we must begin our planning and construction to meet our customer's needs from 3 to 5 years in advance of their actual requirements, it is apparent that we anticipate continued economic expansion in our service area," Watson said.

A major portion of the electric company's 1965 construction budget will go for additions to its interconnected generation and transmission system, which includes 11 base-load electric generating stations which are linked together by a 4,000 mile network of high voltage transmission lines.

The additions to the generating capability include a 210,000 kilowatt unit to be installed at Cunningham Station, west of Hobbs, New Mexico. The Cunningham addition will be the second 210,000 kilowatt machine to go into service with the period of a year. Plant X, near Earth, Texas, houses the first of these giant generators, the largest single unit in service on the company's system.

The other generating additions to be completed in 1965 are gas turbine units to be installed at Borger and Pampa. Those units will be located at industrial plants in each case, with the fuel to be provided by the customer.

At the Borger location, where natural gas will be purchased from the customer for fuel, the exhaust gases will be returned to the customer for use in his plant.

At Pampa, hot pressurized gases which are a by-product of the customer's manufacturing process will serve as the fuel for the new turbine.

"These 'tailored' installations of generating equipment are indicative of our responsibility to conserve the natural resources of the area we serve. In each case, there will be total utilization of the heat energy present in the gases, and all waste will be eliminated. This, of course, introduces economies for us as well as the customer, and is the type of program we must carry on to keep the customer's price down by keeping our costs down. The benefit of this type of planning goes to all of our customers," Watson said.

1965 will see a continuation of a program started last year to convert the main arteries of the company's transmission network to 230,000 volt lines. The major voltage was 115,000 volts until this year.

Whirlettes Split Games With Springlake Teams

The Floydada Whirlette team traveled to Springlake to play a game that was a spur-of-the-moment match, and also to even a score that was the worst defeat the Whirlettes have suffered in a long time. That game was a 20-point defeat at the hands of the Springlake team in the Tulsa tournament, a couple of weeks ago.

The local girls had their hosts down five points at halftime, and appeared to have an easy time ahead in the final 16 minutes of play, but the Springlake girls turned the tide on the locals and salvaged a victory out of the game, with the final score reading, Springlake 41, Floydada 37.

The Whirlettes had a 27-22 lead at intermission, and were having little trouble scoring against the taller girls, but when the third quarter began, the girls realized they were in the midst of the

coldest quarter they had played in a long time and when the buzzer sounded ending that period, the locals had added only two points to their halftime score. During the fourth quarter the Whirlettes did much better, but still were able to add only eight points.

Coach Kelly Chadwick gave special recognition to his guards for doing such an outstanding job against three forwards that are all 5'10" tall. (The guards on the Springlake team are 5'8" in height.)

According to Coach Chadwick there were 23 fouls called on the Whirlettes and only eight called on the Springlake team. Even though the Whirlettes lost the game it was a game that was a great boost to the girls' morale, for they found out they could overcome the Springlake team if they met again and the stakes were very high.

Dee Wilson sank 22 counters for Whirlettes while Beth Dent scored 21 for the victors to pace the Springlake team.

In the B game the local girls took that game with ease by a 41-21 count. The locals took the lead in the early part of the game and never relinquished the lead, nor were ever threatened by the Springlake fems for that matter.

Sally McIntosh led the Whirlettes B team in the victory by dropping in 16 points. Linda Gregory led the Springlake with 10.

WHIRLETTE B TEAM — Shown above is the Whirlette "B" team that has two victories in as many outings this year. This team downed the Springlake "B" team 41-21 Saturday.

Della Plains Hornets Win One, Lose Two In Odessa Tournament

The Della Plains Hornets, only team that had any activity during the holidays from Della Plains, took part in the Odessa Invitational Tournament and were unable to capture any trophy in their efforts.

The Hornets won their first game, eliminating McCarney by a score of 80-51, lost to Midland by a disappointing score of 64-63, and lost to Odessa for third place by a count of 67-57.

In the game against McCarney, Hozie Jackson led the entire field by scoring an impressive 29 points of the locals 80. Albert Baughman and Marvin Blankston led the McCarney crew with 18 points each. Jewel Storey and Willie Simon scored 17 and 15 for the locals in their victory.

The Hornets took a 19-14 first quarter lead, and after that time were never pushed or threatened by the McCarney team. The locals went on to hold a 29-27 halftime lead and continued to widen that margin as they led 60-41 going into the final eight minutes. The Hornets coasted to a finish scoring 20 points in the final period while allowing the McCarney team an additional 12.

In the second game, a scrappy Midland team sent the local team down into the third place playoff game by downing the Hornets by one lone point.

Jerry Cannon sank 26 for Midland to lead the field in the scoring department and was followed by Della Plains' Jewell Storey with 15, Wilbur Bonner with 14 and Hozie Jackson with 13. Willie Robertson added 12 for the victors.

Della Plains jumped to a commanding 23-10 lead in the first quarter but the Midland team started in the second quarter and continually closed the gap until they led the locals at the end of the game. At halftime Della Plains held the edge by a 25-23 count, led going into the final eight minutes 48-42, but Midland scored 22 points in the final quarter and allowed the locals only 15 to stay ahead by one point to stay in the final closing minute.

In the game for third place, the Odessa team eliminated the Hornets from the tournament by a 67-57 score.

The locals spotted the host team eight points in the opening period, but gained two of them back by halftime to trail Odessa 24-18. Going into the final period however, Odessa had extended that lead by nine additional points and led 51-39.

open date or two may be filled with games against other teams if they can be matched to fit the local's schedule.

game made me stop and see the difference between a good team and a "great" team. I am not a TU fan, and I am not knocking the Alabama team, but the goal-line stand of the Longhorns was outstanding and the difference in the two teams considering the Crimson Tide had been able to move the football almost at will any other time during the second half. When the job had to be done, the 'Horns' did it.

One of the finest compliments that can be paid to a team was given to the Texas team during the game, by Bud Wilkinson, former Oklahoma coach.

Something was said at one time, that one of the Texas tackles that broke through on his charge as he approached the crippled Quarterback.

The announcer and Wilkinson were mentioning the fact that the play could have ended the game for Namath, if the Texas team had wanted to.

Wilkinson said, "Yes, but you never see Texas get penalized for playing 'dirty' football. They stick to the fundamentals of the game, and don't go out there to hurt anyone."

He, of all people, should be in position to know. He coached Darrell Royal at Oklahoma, and Royal's team has beaten his teams often enough to make Wilkinson an authority.

The Whirlettes did not have a

Speaking of the bowl games, I was pleased with all the contests except for the Rose Bowl. It seems that the Tournament of Roses is becoming a bigger attraction than the Rose Bowl game.

whelming score of 41-21. The Whirlwinds participated in the Caprock Holiday Tournament at Lubbock during the holidays, and lost out of the running after the second game.

The locals lost to Aspermont 94-56 in the first round, so of course, took the consolation route. In the second game they lost to Petersburg 67-66. After trailing 18 points with only four minutes left to play in the game, and coming back like they did, Coach Greer mentioned the fact the team also missed five lay-up shots during that time that would have easily won the game.

Both the Whirlwinds and Whirlettes traveled to McAdoo last Tuesday night, (too late for the results to be mentioned in this column) and played their last game of this year prior to beginning the conference play Friday night here against Lockney.

Beginning Friday night a conference game is scheduled by the teams for every Tuesday night and every Friday night through February 9.

It looks as though, looking at the tough competition ahead, that the team who loses the least games on the road (usually the most difficult ones because of the unfamiliar surroundings) will win the district. No team, either boys or girls, can lose any conference battles on the home court and still win the district. The competition is that tough.

Best of luck to the Whirlettes and the Whirlwinds. Play heads-up ball, you can go a long way.

The Della Plains Hornets (girls) were also idle during the Christmas holidays, but the Hornets participated in the Odessa Invitational Tournament this past weekend but were unable to salvage any trophies for their efforts.

The boys won their first game when they played McCarney, lost their next one to Midland, and lost for third place to Odessa.

According to Coach Johnson at Della Plains several exciting games were seen during the tournament. He mentioned that

each team playing in the finals got there by defeating another team by only one point.

Midland lost to Amarillo in the finals, Midland defeated Della Plains by one point to gain the berth and Amarillo beat Lubbock by one point in an overtime period to gain the finals. Also Amarillo beat Odessa by one point during the tournament.

The boys and girls played

against Lubbock here Tuesday night, but once again the suits are too late for this year. The teams lost to 3 here Friday night at 7:30 Della Plains Gym in conference games.

With only one conference game behind them, the teams are tied with Snyder the district lead at 1-1. The other district teams, Olton and Ten, or course, trailing at 0-1.

Approximately four inches of snow fell at the South Plains community area last week.

The new Soil Conservation Service will be opened in Floydada on January 16 to serve an area including Floyd, Motley, Briscoe, Hall and Cottle Counties.

Weems Norman, small son of Mr. and Mrs. Bill Norman, was painfully injured Friday afternoon while rabbit hunting. He fell as he was wading through the snow and an air rifle accidentally discharged entering his knee. The shot was removed at a Floydada hospital.

Mr. and Mrs. R. C. Bennett observed their Golden Wedding anniversary Christmas Eve at the old homestead near Lockney where they came as newlyweds fifty years ago.

Sam Blair in the Dallas Morning News was making a few "Bowl Comments" in his column in the Sunday paper. One of these particularly was concerning Arkansas and the possibility of being this year's Grantland Rice Trophy recipient.

Also regarding the following comment keep in mind that the University of Arkansas, at Fayetteville, is a state supported school, therefore, the instructors, coaches and other personnel at the University are state employees.

Blair made the following comments: "The Grantland Rice Trophy would be a wonderful prize to win at the end of the best season Arkansas has ever had," Broyles said, "and what happened in the bowl games makes us feel we've earned it. I just hope the men who decide the winner remember that our team now is the only untested, untied team in the country."

"Whether they do or not, however, Broyles can be sure the wild-eyed Razorback fans will. His present salary of \$22,000 per year should receive a boost which will make Orval Faubus' eyes glow.

"As Arkansas governor, Faubus has come to view Broyles' success as a wonderful fringe benefit. Due to a law which decrees that the governor must be the highest-paid state employee, Faubus sees his salary rise as Broyles' does. Being governor has been lots more fun since the National Guard left Little Rock and Frank came to Fayetteville."

Speaking of the bowl games, I was pleased with all the contests except for the Rose Bowl. It seems that the Tournament of Roses is becoming a bigger attraction than the Rose Bowl game.

All the other bowls went very well, as for as Southwest Conference fans are concerned, save the Sun Bowl game, which went in favor of Georgia over Texas Tech, 7-0.

Goldwater Fans

An interesting sidelight pertaining to the recent Presidential election is the recent revelation that more grass roots contributors sent in contributions to the Republican Party, and to the losing Presidential candidate, Barry Goldwater, than in any political campaign in history.

The number of small contributors to the 1964 GOP Presidential candidate campaign was far greater than in 1960 and exceeded both Democratic and Republican experiences in the past.

Thus, contrary to the popular conception, that it is the fat cats (big business and big corporations) which support the Republican Party, it was the small donation from the dedicated conservative that gave the Republican Party a surplus in its 1964 campaign effort.

Some 45,000 letters are still reportedly unopened and it is said that the average donation from many small donors was something like five or ten dollars.

What does this mean? It is hard to analyze in full, but it would indicate that quite a number of Goldwater supporters in 1964 were highly dedicated people, that they are not as likely to be swayed, or changed, in the future, as are others. It may mean that concern among conservatives is currently far deeper and stronger than among those other shades of political thinking.

20,000 Murders

The Communist world, through its various deceitful propaganda organs, has been damning the United States and Belgium for the rescue operation in the Congo — which is called a "colonial action." The Soviet Union is attempting to make the rescue operation a major issue in winning African states to its banner.

and turning them against the United States.

This effort became clearly reprehensible to the impartial when it was revealed by the British Minister of State for Foreign Affairs recently that 20,000 people had been murdered by rebels in the Congo. The British Minister also told the House of Commons, in a shocking report, that some British and other citizens are still in the hands of the rebels, but that rescue of them is now impractical, except through regular Congolese Government military efforts.

Citizens of the civilized nations are still at the mercy of the half-savage rebels. The fear of taking any action, because of the certain reaction by the underdeveloped peoples and the Communist propaganda machine prevents their rescue.

Thus, the rescue operation by Belgian troops in the Congo was not only more than justified by the bestial behavior of duped and murdering savages but, actually, stronger military action than was taken would have been justified by the usual humane and historical standards.

A Man Without Backbone ... Is No Longer A Man

CHICAGO — Wouldn't this rot your socks: California reliefers were urged to take farm jobs. California relief-recipients were told to go to work in one of the plentiful farm jobs vacated by departing Mexican braceros.

They refused. These parasitic bums, instead, formed a "union" demanding "their rights" and "struck" — refusing to do such work.

The very idea that there should be one unemployed person in our country while the newspapers are bulging with jobs searching for people is indefensible.

Whatever it amped to the Biblical admonition "Six days shalt thou labor..."

Where did we get the erroneous notion that loafing is preferable?

Even in Heaven, the Bible says "build houses and inhabit them... plant vineyards and reap the fruit therefrom."

Heaven won't be a park bench where men are sentenced to stagnate; that's the other place!

Yet Labor Secretary Wirtz recently bewailed the 12 per cent jobless rate among 16 to 21 year olds. Wirtz predicts "A nightmare of teen-age unemployment."

He says young people are piling onto the unemployment rolls an additional 200,000 every quarter.

And while he was issuing the ominous prediction, most every golf course in the nation was begging for caddies, there is a chronic shortage of window washers, car parkers, custodial workers, hod carriers... lawn mowers... and agricultural workers.

No, these jobs might not provide enough income to meet the payments on two TV sets...

No, these jobs might not carry with them any great degree of "social prestige"...

But they are honest work and any honest labor is decent, dignified and honorable.

There is nothing decent, dignified or honorable about a leech. It is a shameful thing for an able-bodied man or woman to accept charity — whether from in-laws, church or government — when there is a job to be had and work to be done.

Even Britain has managed to get her unemployed total down to half our rate. Fewer than two per cent unemployed in Britain more than five per cent jobless in the United States.

In New York State the average reliefer last year collected \$38.31 a week and many of them "demonstrated" for more!

Special Federal Social Security tax rules apply to farm owners, shareholders, farm workers, and farm crew leaders. Elton W. Davidson, Administration Officer of Internal Revenue for the Plainview office, reminded today.

Floyd Philosopher Reports, In A Round-About Way, What Sort Of Year 1964 Was, 1965 Will Be

Editor's note: The Floyd Philosopher on his Johnson grass farm takes a look at a couple of years in his letter this week.

Dear editor: "Well, what sort of year did you have?" a neighbor asked me as 1964 drew to a close.

Generally, I've found that the man who asks this question probably had a pretty good year himself, so I never let such people down. I just say "Oh, I can't complain," and then give them a chance to report on theirs, which I figure was what was on their mind in the first place. Another thing I've found out is that people report a much better year

when they're talking with people outside their own immediate family. The last thing a man wants to do is let his own folks know he had a good year, financially speaking. It'd be worse than a country on foreign aid announcing its gross national product was up 400 per cent. You've got to remember, a family's rock-bottom, absolute basic needs always stay 10 per cent ahead of what a man's making, regardless of what it is.

But what I really started out to say was what I thought of the new year of 1965 will bring.

I know that there are trouble spots all over the world and nobody seems to know what to do

about them, but this doesn't bother me because it's normal. Man's problems are always several jumps ahead of his ability to solve them.

My theory is that the amount of brains in one town is always about equal to the amount of brains in any other town, and you carry this forward to nations, and you can see we never quite have the equipment we need. We get along, but the odds for total solution are always against us. And besides, if we solved all the problems we wouldn't know what to do with ourselves, although I'd be willing to try.

Therefore, my prediction is that 1965 will be about normal although as to what exactly will take place throughout the world, I can't tell you. Me and the State Department haven't figured out yet what took place in 1964.

Yours faithfully,
J. A.

Peanut Cash Crop

Year in and year out the BEST CASH CROP in this area is peanuts. This was the case once again during 1964, for profits from peanuts continued to surpass those from any other crop. Some peanut growers cleared over \$100.00 per acre on their DRYLAND peanut crops, and some irrigated yields were truly hard to believe. About this time a year ago E. G. Reed, who farms southeast of Quitaque, gave us a breakdown on his peanut harvest, so this year we checked with him again to see how it compared. On the 26 acre field that we figured, E. G. brought in a check this time for \$13,340.41—which made it pay off to the tune of \$355.00 per acre. To top this off, there was also an excellent crop in rich PEANUT HAY, and most of the hay that was baled made over a ton per acre and sold for \$30.00 a ton!

Our boll weevil picture continues to look good. In last month's "Comings, Goings, and Doings" we mentioned that an entomologist would soon be checking this area for late season weevil buildups, and the findings would be relayed on to us. A letter arrived recently from Don Rommel, the Area Entomologist for the Texas Extension Service, with a comprehensive report on his findings. He reported that during his trip to this area a number of weevils had been examined to see if they were in diapause. All but one of the weevils examined showed NO EVIDENCE of diapause, therefore there was no danger of them surviving the winter. He went on to say: "We feel that the first year of the program has been a success and a great deal of progress has been made... We do know, based upon field checks throughout the summer, that the weevil population was significantly reduced. The western movement of the weevil above

SANTA FE NEWS

Total carloads moved over Santa Fe System Lines for the week ending December 26, 1964 were 24,145 compared with 24,689 for the same week a year ago.

On-line loadings were 13,662 compared with 15,493 for the corresponding week last year.

Cars received from connections totaled 10,483 compared with 9,196 for the same week a year ago.

Santa Fe handled a total of 29,052 carloads in the preceding week of this year.

"Dear Mom and Dad," a young college student wrote home. "I haven't heard from you in nearly a month. Please send a check so I'll know you're all right."

More Study Slated On Boll Weevil

What makes a boll weevil like cotton? Research soon to be sponsored by the Cotton Producers Institute will be directed toward the answer.

Studies at the Southern Research Institute, Birmingham, will seek to isolate, identify and synthesize, if feasible, the substance which stimulates boll weevil feeding.

The project is a cooperative effort between CPI and the Entomology Research Division of the U.S. Department of Agriculture. The work has been supported by the USDA since June. If attractants, feeding stimulants or arrestants can be developed and if mating habits of the weevil can be eliminated or changed significantly, use of insecticides could be greatly reduced.

With less insecticides, the possibility of toxic residues and their harm to beneficial insects would be minimized.

Then, too, pests have been developing immunity to some of the more commonly used poisons.

That there are substances in the cotton plant that induce feeding by boll weevils has been demonstrated.

There also is evidence that weevils depend on a plant attractant for their food and on a sex attractant for mating.

If these substances could be synthesized, they could be used to lure the pest to areas baited with poison.

NEW WATER

Just fill this Pen with Water- and it instantly writes with Ink!

THE AMAZING AQUA PENI

Exciting new scientific development! This American-made pen does away with messy ink bottles, skipping and missing. You never run out of ink as long as water is available. It's a fountain pen you fill and re-fill as many as 25 times with just plain tap water to write with genuine no-fade permanent Blue-Black ink. Actually writes from 1 to 2 years on one ink activator container. Perfect for students, physicians, salesmen, clerks. Handsomely styled. Comes in attractive gift box. Black, gray, maroon, red, green or blue. By ROHILL.

Additional ink activators available 3 for 1.00

MANUFACTURER'S LIFETIME GUARANTEE

The Aqua Pen is backed by the maker's service guarantee entitling user to free repair and replacement of parts for lifetime use of pen.

THE AQUA PEN IS 100% AMERICAN MADE
