

Boll Weevil Outbreak Found In County

According to a report from Joe Wilson of the County Agent's office insect survey teams from the USDA and the Plains Cotton Growers have reported finding Boll Weevils in ten fields in Floyd County. Four of these fields are those owned by James Thomas, Kenneth Bean, J. A. Welch and Harvey Moon.

All the fields in which weevils were found mentioned here were on top of the Caprock.

Hopes were that the Boll Weevil could be kept off the Caprock this year following the fall spraying program last year when the diapause control program was initiated by the Plains Cotton Growers. A similar program is planned for this year.

In a meeting at Crosbyton last week Winfield Sterley, U.S.-D.A. Entomologist stationed at Spur, reported that survey teams began work below the Caprock on June 1 and above the

Caprock June 6.

Seventy-seven fields were checked along the edge of the Caprock in Floyd County prior to July 16. Sterley reported ten of these were infested with weevils.

He further stated that the percent of infestation was not calculated. A field was counted as being infested even if one weevil was found in the field.

The survey teams marked the spots where weevils were found

by a white flag on a stake about 4 feet high.

Don Rummel, Agricultural Extension Entomologist from Lubbock, reported that the last fall spraying program reduced the number of overwintering weevils 90 percent.

However the 10 percent missed will be a large enough number to build up a large population and possibly hurt production of cotton below and along the edge of the High Plains if no in-

season control is applied.

In the Rolling Plains, out of the fall spray zone, up to 1,200 weevils per acre were found to have survived the winter. In the spray zone, however, the overwintered population averaged only 50 weevils per acre.

With no in-season control these 50 weevils can reproduce and number 17,150 by the end of their growing season. Each weevil can produce seven-fold and there is enough time be-

tween now and the diapause period to produce three generations.

Rummel stated that the only way to eliminate the weevil from the High Plains was for the producer to apply an in-season control program where weevils are found to keep the numbers low so that the fall spray program will have a better chance to eliminate all the weevils.

Local Physician Removing Practice From Floydada

E. F. Bayouth, M. D., announced the removal of his offices from Peoples Hospital to University Medical-Surgical Clinic, Lubbock this past week.

Dr. Bayouth and his wife moved to Floydada about two years ago, soon after he finished his medical training.

The reasons for the removal of the office are: he is tired of sending patients to another hospital for treatment; he will have better facilities with which to work; a better future for his family in his practice.

Dr. Bayouth said he and his wife, Barbara, regret leaving Floydada, for they love the people here. "This is my first home in 15 years and the first home my wife and I have had", he said recently.

The last day the office will be open in Floydada is July 31, 1965.

Presently the crops throughout the county that are irrigated are looking good, but again, dryland is suffering from lack of moisture.

Different portions of the county continue to receive small showers occasionally. Last week near South Plains amounts measuring up to three inches fell but came so hard little benefit was derived from the moisture. WHEN PLANNING TRIPS

Vacation Check-List Given

When Planning 18 caps Vacation Check 2/24

Vacation time is here for most of us and planning for it can't start too soon. Here are some hints for stretching the vacation dollar:

*Travel light.
 *Consider eating at diners or cafeterias once you reach your destination.

*Use the family car. Here four or five people can ride as cheaply as one. Surveys show automobiles take only 14 cents of the travel dollar versus 22 cents on public transportation.
 *Take along a picnic basket and a thermos for picnic lunches and snacks to trim food expenses.

*Consider camping out. Complete equipment can be rented from \$45 to \$80 for a two-weeks period.

The "check list": There are many small but important items which need attention when preparing for a vacation. Are these items on your check list?

HELLO WORLD
 Mr. and Mrs. Benny Douglas Edwards of Floydada are parents of a baby boy born July 8 at 5:25 a.m. in Lockney General Hospital. He weighed 4 pounds, 10 ounces and was named Benny Jr.

When you clean out your closets for spring, put a small cotton scatter rug on the floor of each closet. It will be easier to shake dirt and lint from the rug than to clean the floor. The rug can be machine-washed when necessary.

*Notify landlord, neighbors, or police of departure and return date.

*Notify the milkman, mailman and newspaper boy. You might want to give the Post Office your forwarding address.

*Store outdoor furniture and equipment.
 *If you leave your electric power on, disconnect appliances.

*Have your car thoroughly checked and serviced. Three of the principal causes of car failure on the road are electrical connections, tires, and battery failures.

*Make sure that a set of simple tools is aboard.

The LIONS ROAR

This week was a time for "homecomings" as far as the local Lions Club was concerned. Lions Weldon Harris and Don Cheek just returned from the International Lions Convention held in Los Angeles. It was good to see that they made it all the way through Las Vegas without much difficulty. However, I understand that Lion Cheek did have some traffic difficulty.

Bennie Edmonds and Charlie Ferguson returned recently from the Lions Camp for Cripple Children. In information received from the camp concerning the two boys it was noted that Bennie won the award for the Outstanding Boy Swimmer. Bennie and Charlie belonged to the Lipan Apache tribe while they were at the camp. That tribe won 1st in Clean Cabin, 1st in Overnight Camping, 2nd in Sing Song, and Best Unit Award.

The other tribes include Tejas, Comanche, Fox, Cherokee and Chippewa.

At the noon meeting of the club last Thursday, Lion John Reue spoke shortly on the clean-up campaign and Staff Sergeant Nathan Simpson, home on leave from Thule Air Base in Greenland, spoke about that country.

He impressed on the minds of the club the extreme cold weather that covers the land most of the year. He said when he left there last week the temperature was 22 degrees. And now, it is almost mid-summer.

He also mentioned that he is stationed 2,100 miles from Seattle, Washington, 2,135 miles from New York City, and 2,300 miles from Moscow.

Since the program books for the year have not been distributed the program chairman for each of the meetings has not been known by the members until the program begins. However, since the Lion Boss has returned the books should be printed and distributed in the near future.

Checked Your SS Account?

Do you check your bank statement each month to be sure it's correct? Your credit card purchases against your monthly statements? Sure you do. But, have you checked everything? How about your social security account?

Ask at your social security district office for a postcard form if you would like to check your record. Fill it out, sign it, and send it in -- you will receive a statement of total earnings reported to your social security account. It may not include all earnings you had during the last calendar year because of the time it takes to bring the records up to date.

If your records do not agree with the earnings statement you get from the Social Security Administration, write to or visit

your local social security office as soon as you can.

Check your account from time to time. Keeping your record up to date means you will receive the correct amount of benefits when you file your application for social security benefits.

A representative of the Lubbock Social Security Office will be in Floydada on August 3rd and 10th in the Courthouse, Room 106 at 9:30 a.m.

Drillers Blast Matador For Championship

SPORTS

VFW Drops Matador Nine

The VFW team had no mercy for Matador when the two teams had their final meeting of the season last week.

VFW took the lead in the first with one run only to have this lead erased by Matador in the second when they scored three runs. Again in the third Matador scored three to lead in the game 6-1. This was not to last, however, for the locals scored four runs in the fourth

and two in the fifth, while allowing Matador one in each of the innings. Going into the sixth the score was 8-7, Matador.

In the sixth the VFW came to life with a six-run rally that gave the VFW team the lead and the locals added two more in the seventh to take the game 15-8.

Emert was the winner for VFW after he relieved Steve Pierce in the third. L. Bostich was the loser. He was relieved in the sixth by Garrison.

Dodgers Beat Indians, 10-7

The Dodgers stymied the Indians thrust to take the lead in the National League as they dropped the tribe 10-7.

The Dodgers had to play catch-up in the fifth and sixth innings with four and five run innings, respectively to overcome a 6-1 deficit.

The Indians got runs in the first, second, third and fourth innings to lead 6-1 going into the fifth. In the fifth the Dodgers scored four runs and held the Indians to 0. In the sixth the five runs for the Dodgers put that team far in the lead and the one run on the part of the Indians was not enough to overtake the lead. The game ended 10-7, Dodgers.

Switzer was the winning pitcher for the Dodgers. Villareal, Olivarez and Burk shared the mound duties for the Indians.

In a playoff game held at the Plainview Minor League Park Monday night, the Floydada Drillers blasted Matador, the league's co-champion, 7-5 to give the Drillers the right to represent the district in the Regional playoffs at Haskell. The playoffs begin Monday, August 2.

Waldo West was the winner for the locals. He was strong throughout the game, giving up only two hits until the last

inning. The score going into the seventh the score stood at 7-0, Floydada.

In the final inning, however, West began to weaken, gave up five runs on four hits.

The victory represented a good team effort for the locals with no outstanding star. The team members stole a total of nine bases from Matador.

The boys from the Rolling Plains threw every pitcher into the game they had, but it wasn't good enough. Smith started for Matador and he was relieved by Tim Green. Richard Campbell finished the game.

Last Friday in a practice game against the Lockney All-Stars the locals beat that team 10-6. The Drillers were handicapped in that only nine players showed up for the game.

Weldon Emert was the winning pitcher, relieved in the fourth by Wilmer Bonner.

In the hitting department Hill and Southerland each got three for four and Ronnie Eubanks slammed a 340-foot homer over the left-center field wall.

Saturday night the locals played Petersburg, winners of the Cotton Belt League. Waldo West was the loser in this effort as the locals fell 4-3. He pitched a four hitter, however and struck out six batters.

Floydada got seven hits but couldn't bunch them enough to be effective.

The Drillers picked up Gary Campbell and Richard Campbell of Matador and Dale Galloway of Lockney to take to Haskell to the Regional playoffs. If the team is victorious there it will advance to the state playoffs set later in August.

The team is involved in the Lockney tournament this week with Cotton Center, Post, Petersburg, Tullia, Plainview American Legion, Matador, and Lockney All-Stars.

Tigers Blast Dodgers, 19-8

The Tigers showed no mercy on the hapless Dodgers as the Dodgers fell to the claws of the Tigers 19-8.

A five run first inning got the scoring underway for the Tigers and another two runs in the second gave that team a good cushion. In the third the Tigers were scoreless and the Dodgers managed one run. In

the fourth four more runs were added by the Tigers and the Dodgers were scoreless. In the fifth the Tigers got another two runs and allowed the Dodgers four. In the final inning the Tigers got six runs and the Dodgers got only three.

L. Williams, R. Hale and M. Hale shared mound duties for the winners and J. Billegas, B. Billegas and Switzer were on the mound for the losers.

Cardinals Down Dodgers, 11-4

Cardinals Down Dodgers, 11-4 1/18 sports

The Cardinals had to come from behind for the second time in one week as they downed the Dodgers 11-4 last week.

The Dodgers got two runs in the first and held a 2-1 lead going into the third. A five-run inning put the Cardinals in front to stay. The winners added one more run in the fourth and four in the sixth while allowing the Dodgers two more in the fifth.

Southerland was the winning pitcher and Switzer was the loser.

Indians Sneak By Tigers, 6-5

The Tigers lost a two-run lead in the second when the Indians rallied for five of their six runs in a 6-5 game last week.

The Tigers took a 2-0 first inning lead but fell behind 5-2 in the second. Another Indian score in the third made it 5-2 going into the fourth. The Tigers fought back with one in the fourth and two in the fifth but this was one short of the amount needed to send the game into extra innings.

Olivarez was the winning pitcher and Williams was the loser.

Cardinals Take Braves, 7-4

A last-inning rally accounted for five runs that gave a game to the Cardinals by a 7-4 margin when the team played the Braves last week.

The Braves got two runs in the first and added another in the second to lead 3-0 going into the third. The Cardinals came back with 1 in the third and added another in the fifth, while allowing the Braves one run in the fourth. Going into the sixth inning the Braves led 4-2. However, the last inning rally gave the game to the Cardinals.

The winning pitcher was DeLeon and the losing pitcher was Biggs.

Giants Blast Mets, 19-8

Playing in the next to last week of the regular season the Giants took a 19-8 victory from the Mets in the first game of the night.

The Giants took a 4-0 first inning lead and scored two more in the third. However in the second the Mets had one run and added three in the third to make it 6-4. The Giants came back with two in the fourth, five in the fifth, and four in the sixth, while allowing the Mets only one in the fifth and three in the sixth to make the final count 19-8.

Mike Vinson, Vaga and Mark Vinson were on the mound for the Giants and Selman and Patzer tossed to Jester for the Mets battery.

Colts Blast Mets, 15-9

A five run inning in the first gave the spirited Colts the lift needed to go on and blast the Mets 15-9.

The Mets scored in the first, had five in the third, and three in the sixth to account for the scoring. The Colts blasted out scored in the first, three in the second, one in the third, four in the fourth and one in each the fifth and sixth innings to account for their 15 points.

Foster was the winning pitcher for the Colts and Selman was the loser for the Mets.

TIGERS, BRAVES IN 10-5 GAME

The Braves went scoreless for two innings, had a three-run inning in the third to tie the Tigers, but fell behind and did not catch up enough to overcome the effects of a seven-run rally by the Tigers in the fifth.

The two teams were tied going into the fifth and the seven runs put the Tigers ahead by a score of 10-3. In the top of the sixth the Braves came back with two runs, but a total of eight were needed to catch the Tigers.

Biggs and Campbell were pitchers for the Braves and L. Williams and Hale were pitchers for the Tigers.

Cotton can be treated to avoid shrinkage of more than one per cent in either direction.

Whittle started the scoring when he crossed the plate in the first inning. In the second the Bankers added two and continued to roll in the third with three runs. The next two innings went scoreless but in the sixth the Bankers rallied and drove in four runs. They ended the scoring with two runs in the seventh.

COLTS, TIGERS IN 5-1 BATTLE

The Colts took a two run lead in the first when Roberts and Crawford scored. The Colts scored again in the third when Crawford crossed the plate and scored two more in the fifth when Harris and Robert Porter scored. The Tigers score came in the third when B. Teague scored.

MRS. MYRON W. KATTNER

"God Made Me and Everybody," "I Can Do Things," "I Am Different from Everybody Else," "Other People and Me," and "Growing as Jesus Grew," which are some of the headings in the 80-page book.

Tahoka Man Praises Late Sister-In-Law

Editor's note-The following article was taken from the Lynn County News and was written by Frank Hill in praise of his late sister-in-law, a Floydada resident.

HELLO WORLD Mr. and Mrs. Bob Cline of Garland, Texas are proud parents of an adopted son born July 12. The baby weighed 6 pounds and was named Robert Howard.

FLOYD DATA

Don Hardy, son of Mr. and Mrs. Lloyd L. Hardy of Floydada, was released from the army last week and arrived home Monday. He has been stationed in Alaska.

Mrs. Kattner has returned from Glorieta, N. M., where she used the new study course in teaching primary children in a class observed by leaders during Training Union Week.

Miss LaVerne Ashby, consultant for primary work of the Southern Baptist Sunday School Board, observed the class at Glorieta. She commented "It is one of the most promising books to have been published in recent years and it is being watched with a great deal of interest through the Southern Baptist Convention as to its suitability and usability with the primary child."

Author Gives Aims Mrs. Kattner has said that she considers some of the most important aims to keep in mind when writing for primary children are "to lead the child to think of himself as important in God's sight and realize his own worth as an individual, and then to develop his capabilities as he grows so he will be the most well-rounded individual possible."

The book is Mrs. Kattner's first, but she has been writing primary units for the Sunday School Board nine years. She is one of five writers of Training Union units and averages writing about two a year. She wrote the new study course book on assignment from the Sunday School Board.

She has been invited to take part in a Curriculum Revision Writers Conference to be held in Nashville in December to study and revise the curriculum for Training Union primary study for the next six years.

She has been a teacher of courses during Training Union

Week at Glorieta the last eight years. The last of July she will teach a study course, using a unit prepared by another writer last year, at a Baptist General Convention of Texas Leadership school at Paisano, near Alpine.

Work At Slaton Church Mrs. Kattner is a primary department leader at Westview Baptist Church in Slaton. Her husband, Myron W. Kattner, who is credit manager of a Lubbock store, is minister of music and education at the Westview Church. Mr. and Mrs. Kattner have a three-year-old son, Mike.

A 1948 graduate Magna Cum Laude of Hardin-Simmons University, Mrs. Kattner formerly taught the fifth, seventh and eighth grades in Floydada seven years before she and her husband moved to Lubbock. She was reared in Floydada. Her parents, Mr. and Mrs. C. C. Huckabee, now live at 3312 38th St. in Lubbock.

She did speech therapy in Lubbock Public Schools several years before her son was born. She is a member of the Daughters of the American Revolution, National Council for Exceptional Children, Texas Speech and Hearing Association, Texas Association of Music Teachers and also the national Association, and Phi Sigma Alpha.

In addition to writing primary study units, she has written articles for the Baptist Training Union magazine and for Home Life and Church Recreation, Southern Baptist magazines.

She does most of the writing late at night or early in the morning.

"Open Rates" Offered By U.S. Navy

The Navy Department recently announced that a new list of "Open Rates" in which enlistment/reenlistment may be effected had been promulgated to the Navy Recruiting Service. These open rates consist of specialties in which shortages presently exist throughout the Navy, and the list includes some of the specialties in most of the major groupings of Navy occupations.

Persons may qualify by virtue of having served in one of these open rates, by having gained experience in another of the Armed Forces, or by civilian experience. Interested persons should contact the Navy Recruiter at Post Office Building, Room 204, Lubbock, Texas, phone PO 5-8541 EXT 328.

Mitchum Called Perfect 'Joe' For 'Mister Moses' Adventurer

"The most underrated actor in the business!"

That's what film producer Frank Ross says of his star Robert Mitchum, who appears opposite Carroll Baker in the former's three-million-dollar Panavision-Technicolor treatment of the great Max Catto adventure novel "Mister Moses," opening SUN. AT THE PALACE through United Artists release.

And it's Mitchum's own fault, say those who know.

There are more than 250 kinds of cotton cloth and more than a thousand different finishes.

Cotton is grown in 19 states.

There has come into being a legend about Mitchum that he's a 2-B actor—lored and blasé. The legend says he can't act and doesn't want to. Mitchum has done nothing to disillusion anybody about this. In fact, say some, he likes the reputation.

But, insist those who know him, that's the Bob Mitchum of legend. The Bob Mitchum of fact is a very different person indeed. He's witty, intelligent and an excellent companion—if he happens to take a liking to you. If he doesn't, keep away from him.

"By the time I was 18," says Mitchum of himself, "I had no illusions left. I was a ferret-faced kid who had done a spell in the chain gang."

Resolution? Whether Doctor Is Leaving

Hesperian received word last week that a doctor in this area has seen his future elsewhere. The reasons? They are many but summed up they are "lack of facilities".

Dr. E. F. Bayouth, M. D., who maintained his offices in People's for the past two years. The man and express regrets for leaving Floyd County this is his first home in 15 years and his wife's first home since marriage.

Months ago it was noted in the paper that Dr. Muckleroy of that closing his clinic and moving to where prospects of getting better were real and could be seen in the future. (Briscoe County ran into similar to those being experienced by Floyd County residents when they establish a hospital district a few years ago.)

Reason there are not better facilities concerned physician can practice work in this community seems merely that a minority group in city and hospital district seems to the method of financing the bonds to build a hospital would be in their individual rights and privileges guaranteed by the U. S. constitution.

But the group brought a suit against hospital district to halt the sale of bonds on several points, but the most of which was that the hospital was not legally formed by the vote of the people when the election was held in the district. The vote was 551 for and 551 against. The group held, however, 551 voting for the formation of the hospital was not a majority of the 1,750 voters in the district.

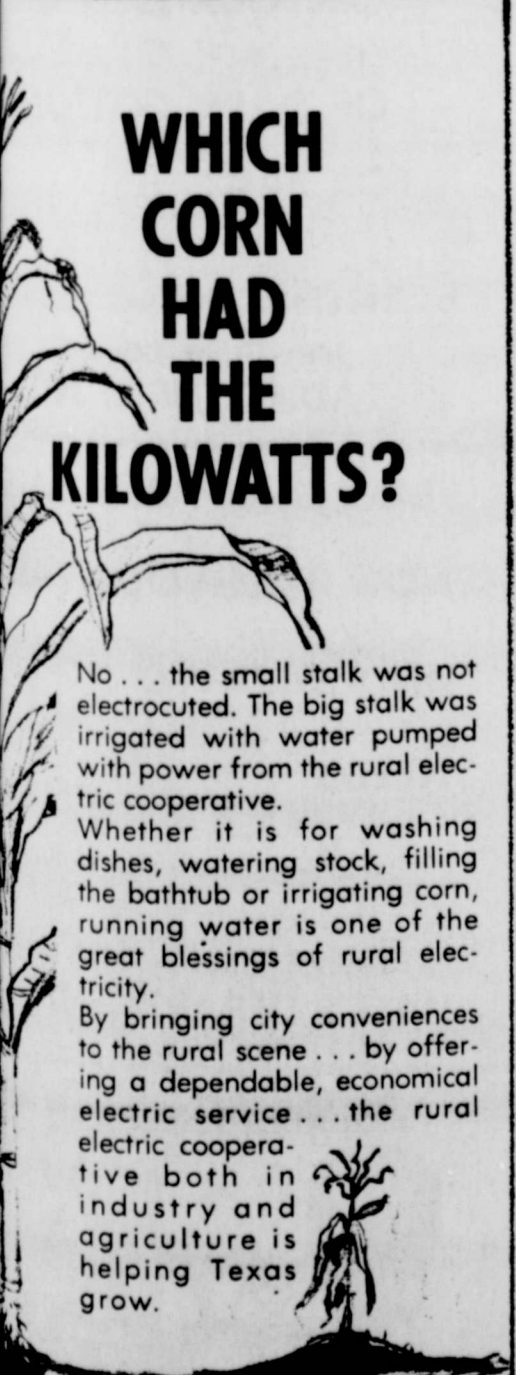

An election was held last year to disapprove the sale of bonds to build a hospital the group filed the above suit.

Before long the group brought suit stating that the taxes of the hospital are not assessed on an equal basis and that property is not on the county property.

An injunction was filed with the judge asking that he block the collection of the 1965 taxes as assessed by the county without a hearing by all parties before. This was refused.

A hearing concerning this issue before the judge stated that both the plaintiffs and the defendants should file briefs with him stating their side of the issue before July 31. The briefs will be taken under consideration and a hearing on the merits of the case will be held shortly thereafter.

WHICH CORN HAD THE KILOWATTS?

No... the small stalk was not electrocuted. The big stalk was irrigated with water pumped with power from the rural electric cooperative.

Whether it is for washing dishes, watering stock, filling the bathtub or irrigating corn, running water is one of the great blessings of rural electricity.

By bringing city conveniences to the rural scene... by offering a dependable, economical electric service... the rural electric cooperative both in industry and agriculture is helping Texas grow.

Lighthouse Electric Cooperative

The relationship of this to the hospital district is that the Caprock Hospital District uses the county evaluation of property for its evaluation of property. If the County Commissioners Court changes the method of evaluation then the hospital district's is changed automatically. (The Floyd County Commissioner's Court is the county Board of Equalization, also.)

Although there may be some discrepancies in the way the property is valued for county and hospital district taxing purposes, and we are sure there are some, after a complete re-evaluation by qualified tax assessing experts if one looked hard enough and long enough surely there would still be some error. After all those authorities are only human also.

However, even after a tax assessing expert should complete the job of re-evaluating the county property, if the case comes to this, it is doubtful the minority group will cease filing suits against the Caprock Hospital District. A similar situation was just completed by the Floydada Independent School District, but suits continued to be filed.

The late Winston Churchill once said, "The inherent evil of Capitalism is the UNEQUAL sharing of blessings, whereas the inherent virtue of Socialism is the EQUAL sharing of miseries".

Then perhaps, the only solution to the problem where people are seeking EQUALITY is to become a socialistic society. There would be no private ownership, therefore no taxes and no tax inequities.

We doubt this is the solution to the problem and we doubt this is what the minority group wants.

Presently, there are five medical doctors in Floyd County, two in Floydada and three in Lockney. There are none in Silvertown and if there are any in Quitaque or Flomot, we don't know. We do know that the longer the building of a hospital is delayed the more doctors are going to seek other places to move their practice. For good medical facilities are needed in every community.

If this trend continues, that is, the continued loss of doctors, then eventually Floyd County could be equal. Equal, that is, to the medical facilities with which Dr. Albert Schweitzer works, and where numerous thousands are treated by one doctor. (Presently there are about 3,000 Floyd County residents per doctor.)

This is, perhaps, an exaggeration, but it illustrates a point.

Let us ask you this, while the question of equality goes on and on.

What is the life of one of your children worth? In dollars, the difference in whether your land should be valued at \$3, \$12, \$35, or \$400 per acre?

Or is it worth the fact that "Joe Blow's stocks and bonds are not taxed by the county but my irrigation well is"?

Just what is the value of the life of your child when in an emergency the nearest medical facilities were too overcrowded or too far away to save an arm, an eye, a leg or a life? How do you measure this in dollars and cents, in equality or inequality?

We wonder if there were a contagious disease going through the county taking the lives of the children, would this group block the efforts put forth by the county or a community to curb the spread of the disease. Surely not... However, encephalitis cases are being reported every week, medical facilities are needed to curb this threat, and law suits keep coming in to block the building of a hospital.

There is a solution. Just what that solution is, we don't know. It could lie in a privately owned and financed medical center or hospital, instead of publicly owned and financed. Is this what the group is seeking? Do any of them know of a person or group of persons willing to finance, supply, staff and maintain a medical center or hospital adequate to serve the needs of this community now and in the future?

If such a person or groups of persons is known, the chamber of commerce is anxious to know of them so contact can be made with the individuals and plans can be made for work to start immediately on such a plant. A convalescent home is being built near a proposed hospital site therefore the medical needs will increase when the home is completed.

No matter what it is, something needs to be done, and done now. Let's hear some constructive suggestions from the minority group... that is, if they have any.

Discovers New Public Affairs Trend

Editor's note: The Floyd Philosopher on his Johnson grass farm thinks he has discovered a trend in public affairs, his letter this week reports.

Letter To The Editor

Letter to Editor:
Cadier en Keer
June 17th, 1965

Dear Mrs. Patterson,

Marleen's year of study has come to an end, and we, Marleen's parents, are most grateful to you, Mrs. Patterson, for all you did to make Marleen's stay at your school and town Floydada an unforgettable one. Marleen thanks it to you as President of the A. F. S. of Floydada that she became a student at your school and that she had such kind people as the Gregorys to accept her as their daughter. When I wrote you last year, I was a little bit afraid, questioning myself will Marleen feel at home so far away and in a foreign country.

But from the very beginning her letters were very enthusiastic and she felt at home from the first minute of her arrival.

How nice the Gregory family treated her. How nice to know that she was at once at home as a student among your students and felt at home in your town. This was a great joy to us.

We hope that you are not disappointed in having had her. We however cannot express our thanks in a way we would like it. We have been surprised about all you do to make a student feel one with you. Thanks a million.

Your school teachers, the principal and the staff have done everything to Marleen, who will now know your country and its nice people and which she will never forget.

She will have to tell us a lot and especially about sunny Texas.

Dear Mrs. Patterson accept our thanks. We do hope that one day you and your daughter Sheila will visit Holland and if you and all the teachers of your school will really have that chance, know that at Cadier en Keer you will find an open door at the Kessels family, who then will be too happy to thank you not only with words but also with deeds for the warmest reception you have given to Marleen and that every day of her stay.

You are welcome to Holland and the Kessels family.

May the Good God bless you.

With all best wishes and thanks to all of you and mostly to you, Mrs. Patterson, from Mr. and Mrs. Kessels and family

Grams.

One thing is for sure, most of the working people in the United States will take a cut in take-home pay starting January 1.

For the business people, it will mean another increase in labor costs, at a time businessmen are being asked by the national administration to hold the line on increases and price hikes.

Under the House version of the administration's broad social security program, the base on which employers and employees must pay taxes would rise Jan. 1 from \$4,800 to \$5,600. Currently, the payroll levy cuts off at \$4,800; after Jan. 1, if the legislation goes through as expected, the payroll deductions would continue longer into the year, to the higher base figure.

The tax rate would rise from 3.625 percent which is paid by the employee and matched by the employer, to 4.35 percent. The levy will be divided four percent for social security and .35 percent for medicare.

The Senate version would raise the base to \$6,600 but provide a smaller increase of 4.175 percent.

For instance, a wage earner with \$5,000 a year income would be taxed \$231.80 under that enacted in the Senate, and \$243.80 in the House. The man with a \$8,000 income would pay \$772.25 under the Senate plan, and \$243.80 under the House.

grass farm, untroubled by monsoons and De Gaulle stones. I have been watching a trend develop over the last few weeks and I can report it has now reached serious proportions.

First General Maxwell Taylor resigned as ambassador to Viet Nam, saying he had spent over a year there and would now like to spend more time with his family.

Then the head of the U.S. Information Agency, Carl T. Rowan, resigned, saying he owed it to his family to get a better-paying job.

Next Mayor Robert Wagner of New York declined to run for re-election, saying he had an obligation to be with his children more.

Now you see what the trend is. If it keeps up, it'll get to the point where, if a man in public office announces he'll run for re-election, the public will start asking: "What's he got against his family?"

You can see where this will lead to. A man decides to stay in office and immediately everybody assumes he doesn't care about being with his family or his family isn't worth being with.

This will be a terrible plight, and if office-holders are smart they'll break this trend and start giving other reasons for re-

tiring, like "I've had enough," or "Been here too long," or "This is a dull job," or "If there's an answer to the problems in Viet Nam or New York City, it's beyond me." Otherwise, one of the main planks

in the standard candidate's platform will be knocked out. Being a family man is about all some men run on, and frequently it works.

FARVIEW NEWS by Mrs. Clyde Bagwell

Most Farmers Begin Hoeing

CROP RESIDUES, such as the wheat stubble pictured above, help insure greater returns when properly managed.

SOIL CONSERVATION DISTRICT NEWS

Management Key To Returns From Wheat Stubble

Management is the key word when it comes to handling the crop residues that remain on the land after wheat harvest. Farmers in the Floyd County Soil Conservation District can realize greater returns from their land as a result of wise crop residue use. For example, residues such as wheat straw will act to improve soil structure and tilth, as well as to increase water intake and water holding capacity. This means a greater saving of irrigation water and rainfall.

As the organic level of the soil is increased by the addition of plant residues, a better utilization of plant nutrients, including commercial fertilizers, can be expected. Besides improving the soil, plant residues can be of valuable use in protecting the land from erosion by wind and water. Rainfall is trapped by the residues on the land and allowed to soak into the ground before it has a chance to run off and be wasted. According to recommendations made by the Soil Conservation Service, crop residues should be handled in such a way as to leave sufficient

amounts on the soil surface during the critical erosion period. On medium textured and moderate fine textured soils, a minimum of 750 pounds small grain residues or 1750 pounds of grain sorghum residues per acre is necessary for the desired results. Residues may be left undisturbed, shredded, mowed, or knocked down with a stalk cutter. Normally, loose residues need to be "tucked in" by tillage to prevent blowing away. Nitrogen fertilizer may be applied to speed up decomposi-

tion if the residue is likely to present a problem in the next year's cropping operation. When insufficient crop residues are present for soil protection and improvement, it is highly recommended that a mulch such as cotton burs or straw be applied to the land to achieve the desired results. Wheat stubble and other crop residues can mean more income and lasting productivity from the land for the farmer who capitalizes on this valuable asset.
