NUMBER SIXTEEN

Absentee Balloting For May 7 Primaries Underway

2,912 Floyd Residents Eligible To Vote

Absentee balloting for the May primaries is now underway at the Floyd County Clerk's office. The balloting began Monday, April 18, however, to date no one has asked for such a ballot. The absentee balloting for the primaries will be concluded on Tuesday, May 3.

Those who will be out of town May 7, or will be unable to go to the polls are urged to take advantage of this method to cast their votes.

A total of 2,654 Floyd County residents paid their poll taxes prior to the deadline, but a forced registration period, after the poll tax was considered unconstitutional, netted an additional 258 who wished to vote, bringing the total number eligible voters in the county to 2,912.

In the last national election year, 1964, almost 3,500 poll taxes receipts and exemption certificates were secured by Floyd County residents.

Additional registration periods sought by the Justice Department were turned down recently by Federal Courts. The periods would have included one in April and one from August into October, however, it was ruled that people had had sufficient time to register and the registration of people was handled in such a way as

REPLACEMENT FROM MATADOR

ASCS Head Moving To Denton

Tom Hutchins, who has been the manager of the Floyd County ASCS office for the past 15 years, announced this week that he is moving to Denton County to assume a similar position. He will leave here May 15.

He is being replaced by Tho-

mas E. Moore of Matador, who has been the Motley County ASCS office for 10 years. He will replace Hutchins beginning May 23.

The Moores have six children.

Hutchins said the family went to Denton last week and looked at the situation, which seemed

very favorable. Not only does the job look good but the climate and terrain appeal to the family, according to Hutchins.

He said that in Denton county the office has one less employee than the one here and it has 1/3 the work load. The USDA rates the office work load in points and where the Floyd County has 45,000 points in work load, the Denton office is rated at 15,000.

Although there are about 700 cotton, grain sorghum and wheat farms in Denton County, as well as livestock production, only about 1/2 the farmers signed up to participate in the new farm programs. By contrast the office here signed around 98 per cent of the farms.

Hutchins moved to Floyd County in February of 1951. He moved here from Lipscomb County, which is in the northern Panhandle.

Hutchins must report for work in Denton May 16, so his family will remain here until school is out, May 20, then join him there.

Good Representation Seen At Sales Clinic

Thirty-four Floydada merchants are joining hands during the next eight weeks in a determination to make Floydada the most attractive market for all kinds of goods and services in the Central Plains area.

They hope to give the city this new image by concentration on value and service. Each week these merchants will be offering special bargain opportunities in a special section of The Hesperian. Perhaps even more important is the emphasis sales personnel will be placing on friendliness, courtesy and helpfulness in their relationships with customers.

To spark this special 8-weeks promotion, a capsule course in Human Relations and Over-the-counter Selling with special emphasis on Floydada sales market potential was held here Monday evening by Wil-

liam Leigh, Oklahoma City, well-known midwest advertising and sales executive.

The sales clinic was held in the High School cafeteria and followed a dinner for personnel of Floydada business firms who are joining in the clinic and 8-weeks sales program sponsored by The Hesperian.

The clinic and program is a new approach to improving the

COUNT AS DIVERTED ACRES

May 2 Wheat Plowup Deadline

May 2 is the final day a farmer can plow up his drought stricken wheat and receive the \$6 per acre for it and count it as diverted acres according to Tom Hutchins, manager of the Floyd County ASCS office.

"A person had to sign up for the new farm programs and count the acres plowed up as diverted to fit into the new farm program," Hutchins said.

At the first of the year Floyd County had around 115,000 acres of wheat, both dryland and irrigated and now probably between 30,000 and 40,000 acres has been destroyed according to Hutchins.

"Often a man has come into the office and signed to plow up and receive payment on half his wheat land and before he was through he would have it all plowed up," he added.

The problem hasn't been just a matter of destroying a drought-stricken crop but one of getting the plows into the ground to kill the plants. The long dry spell has left the ground so hard in some places that a plow won't penetrate it.

For next year farmers have signed to divert 31,070 acres of the county wheat land.

While the dryland wheat has been destroyed, or is suffering in such a manner that harvesting the crop is questionable if it does make anything, reports indicate that irrigated wheat on the High Plains is jointing and in some instances is being watered again.

The dryland wheat that is to be plowed up may be grazed until May 2.

Local Farmers Begin Planting Operations

Although mass planting of cotton is still a few weeks away, a number of Floyd County farmers are beginning to crank up the tractors, adjust their planters and put their grain sorghum seed into the ground for the 1966 crop. A few people in the county have planted their cotton allotments as well.

Several dryland farmers are still awaiting enough moisture to justify planting the seed, but presently, time is not pressing. However, without a general rain in the next few weeks, the dryland situation can become critical for a very small amount of moisture has been recorded here since the first of the year.

Floyd County farmers will plant 65,331 acres of cotton, 103,337 acres of grain sorghum and 79,561 acres of wheat this year. They will divert 30,416 acres of cotton, 81,916 acres of grain sorghum and 31,070 acres of wheat.

All of the merchandise in business in the abstract office half in the front location, the Bros. store remodeling and expansion work will come

in and complete the job. Anderson said that the all new store would be ready to go around June 17.

Anderson said that he was very happy about the expansion and remodeling and asked that the public excuse the inconvenience of shopping at Bealls during the work. He said that the store would begin a remodeling sale this week and his advertisement with special buys appears on page three of this issue of The Hesperian.

"Children's wear, ladies ready-to-wear, and foundation departments will be featured on the balcony, new carpeting and enlarged shoe department, brand new fixtures and display innovations throughout the store, refrigerated air conditioning, central heat, decorative wall treatment, enlarged household department, intercom system, are only a few of the improvements that will be made," Anderson said.

Anderson said that the expansion and remodeling was made possible through the con-

tinued patronage of the store by this community and area communities since the store opened here in 1954. Anderson has managed the store for the past eight years.

SUNDAY, MONDAY

County Receives Various Amounts Of Needed Rain

Amounts of moisture varying from just a trace or a sprinkle to over one inch were received by different parts of the county the early part of this week.

Cedar Hill failed to receive any moisture Sunday or Monday while other parts of the county were getting the needed rainfall. Not far from there, on the Eugene Beedy farm near South Plains, over 1 inch of rain was received while South Plains proper received 1/2 inch Monday. None was received there Sunday.

In other areas rainfall was received Sunday and none Monday. McCoy recorded up to .30 of an inch Sunday but was missed by the moisture Monday. Barwise, on the other hand received a trace Monday and two or three miles north and two or three miles west good showers were noted according to reports.

Dougherty seemed to get the greatest amount of any area in the county as from 1/2 to 3/4 of an inch fell south of there Sunday and from a trace to .25 of an inch was received Monday.

In Floydada only .06 was received Sunday and only a trace was recorded Monday. This brings the total rainfall for Floydada proper to almost .6 of an inch for the first three and one-half months of the year.

Leigh has held similar clinics throughout the midwest. In Perryton, last month, he talked to 167 persons and in Liberal, Kansas, two weeks ago, to 287 persons with enthusiastic responses. He spoke to almost 200 persons in Dumas.

Reports on his sales-building program emphasize the informative and comprehensive presentation of customer-level objectives in both salesmanship and human relations, which Leigh terms "the key to lasting business."

Leigh has 25 years experience in sales and sales training problems related to both management and direct selling. He has served as sales consultant for a number of large firms and institutions and has done sales promotion work in some 2,000 towns and cities over the midwest and southwest, also in Hawaii.

Clinics have been sponsored by merchants groups, chambers of commerce, professional associations and broadcasters.

"Leigh lays the facts on the table and they are grasped by sales-minded persons, facts that lead to better community sales and more productive sales people. Attend just one of his lectures and you'll want to hear him more often," said a leading midwest chamber of commerce manager.

The businesses participating in the promotion are Beall's Department Store, Johnson Pharmacy, Quality Body Shop, Kirk and Sons Furniture and Hardware, Collins Implement Company, Oden Chevrolet Company, Perry Brothers, Inc., Hales Department Store, Hagoods, and City Auto, Inc. Also, Superior City Trim Shop, Wylie Butane Co., Hull and McBrien, City Trim Market, Wester Grocery, McDonald Implements, Stewart's Cleaners, Allen Chrysler-Plymouth, Martin and Company and Arwins Drug.

High Plains Research Foundation at Halfway, Okla. shows the 1960-64 5-year average yield of varieties tested to be 6,224 pounds per acre. The P-A-G 515 average yield for the same 5-year period was 8,089 pounds per acre! THAT'S 865 POUNDS PER ACRE EXTRA YIELD. For the highest yields you've ever plant P-A-G 515. Man, that's sorghum!

LCC Hears Talk On Will Making

Lubbock Christian College Associates met April 11 in the community room of Lighthouse Electric for their regular meeting. Refreshments of coffee, tea and cake were served to members and guests by hostesses, Mrs. Hodges, Mrs. Holladay, Mrs. Jackson, Mrs. Orman and Mrs. Arwine.

George Elkins introduced the guest speaker, Wartick Thomas of Amarillo, who gave an interesting and informative talk on estate planning and the importance in making not only a will, but one that has been carefully planned.

Thomas urged parents of minor children to make proper plans for their care should one or both parents die. If no will has been left the surviving spouse must go through a lot of red tape, trouble and expense in order to have funds from the estate with which to rear the children, Thomas said.

It was also pointed out by Thomas that many wills are out-dated and need to be brought up to the present date and that one should seek legal advice in estate planning in order to protect survivors.

A question and answer period followed the talk and an interesting discussion was had in which members and guests participated.

The next meeting will be May 9 in the home of Mrs. L. D. Smith. Juanita Pollard of Lubbock Christian College will install officers for the coming year.

Mrs. Jack McIntosh Named Floydada Woman Of The Year

Mrs. Jack McIntosh, remedial reading teacher at Andrews Ward School in Floydada, was named 1966-67 Woman of the Year in the annual recognition tea held Tuesday night in the community room of Lighthouse Electric. The 1950 Study Club sponsors the event.

Mrs. Lane Decker, president of the club, gave the invocation and introduced a former Woman of the Year, Mrs. Ralph Johnston, who portrayed a remedial reading teacher in the skit which led up to the naming of Mrs. McIntosh. Students in the skit were portrayed by Mrs. Tommy Assiter, Mrs. J. S. Hale Jr., and Mrs. Travis Jones.

Mrs. McIntosh, who moved with her parents to Floyd County in 1927, graduated from high school in 1939 as Valedictorian with a grade average of 98.4. She received her degree from the University of Texas in 1943 where she was a member of Phi Beta Kappa.

After graduating and during the war years she was married to a Texas A&M student and Floydada boy. While her husband was in service overseas Mrs. McIntosh was employed at the local bank and upon his return they moved near Floydada where he is engaged in farming. The couple have two sons and two daughters.

In 1962 the McIntoshes were selected as the Family of the Year by the First Methodist Church, were selected Family of the Year of the Plainview District and competed in national competition at Chicago.

Some, who have pledged, have backed out . . . some who didn't pledge certainly will now want to give some money to this project, now that it is started.

Maybe we need to reiterate again why we need an airport. Here's what the editor of the Lockney Beacon said about airports last week:

"Getting back to industry. We're told by the Texas Aeronautic Commission that one of the things that is saving the small town is a good airport. A good airport enables the busy executive to come and go in a hurry, affords him good connections with any business interests he has in the town and attracts industry. Lockney needs a good airport. We don't have any now."

Here's what the mayor of Lockney said about airports last week:

"In trying to secure some sort of industry for Lockney, we have been told repeatedly by the manufacturers that they are not interested in putting a factory in a town that does not have a landing strip and some form of recreation for their employees."

BLUEBONNETS are a beautiful sight down in Texas this time of year, and it is interesting to note that some Floydada folk have some even this far north.

Gladys Jones reports that she has some growing in her yard, and I get a call early Wednesday morning from one of the Daniel Clan out southwest of town that they have a big flower bed of bluebonnets. I'll try to get out there and get a picture of it.

NOW AND THEN the Academy Awards come up with a very deserving winner. This year I heartily approve of their selection of "The Sound of Music." Just when you think the movie industry can't put out any good shows, they produce a movie like this that is certainly excellent entertainment.

I AM happy to report that the city is putting up all steel

Survey To Determine Needs For Potential Vocational Program

A large group of interested Floydada persons met in the Production Credit Building here Tuesday to kick off a survey of local businesses to determine if a vocational training school is needed in Floydada or if it is necessary to work a vocational training program into the school curriculum.

Mrs. Emily Potts, school counselor, is coordinator of the survey.

The Vocational Education Act of 1963 provides that before a program of vocational education may be implemented under the act the need and opportunity for employment in the vocation must be established.

This means that if there is no need for a vocational training program in Floydada, one will not be established under the Vocational Education Act. But, on the other hand, if a need can be established and shown the Texas Education Agency, then it is very likely one will be established.

The first step in establishing this need is the completion of a comprehensive survey to determine the availability of employment opportunities in the community concerned.

After the meeting held Tuesday, the survey got underway. Each worker was assigned certain firms he must contact and

fill out a survey sheet on the business. The sheets serve to identify the employer and enable him to present his views concerning the need for vocational education programs for present and potential employees.

The sheets also provide for the listing of the number of individuals employed in each occupation at the time of the survey and provide for an indication of the number of employees the employer will need immediately and at the end of 12, 24 and 36 months. These projected needs for new employees are the most important data collected during the survey and employers are urged to make realistic estimates of their future needs.

At a later date, yet to be named, after the survey has been completed, a member of the program development staff and area supervisors from the various vocational education divisions of the Texas Education Agency will meet with the survey committee for final compilation of the survey data.

From the various sheets, one sheet will be made giving an overall picture of Floydada's needs for vocational training. This will be reviewed at Austin.

The school already has two vocational training programs,

those of vocational agriculture and home economics, but the survey is being used to determine if similar courses are needed in relation to other businesses in this area.

Those who are working with the survey are Andy Anderson, Henry Barber, Lowell Bell, Bill Brown, Roy Burks, Don Cheek, Bob Copeland, R. G. Dunlap, David Eaton, Darrell Fairles, John Fowler, Jeff Glazner,

Dale Goen, Dan Hagood, Sammy Hale, Bill Hendrix, Alton Higginbotham, Henry Hinton, T. L. Holland, David Kirk, Leonard King, Jim Lackey, Bert Mankins, Ralph Mardis, Fred Martin, Bill McNeill,

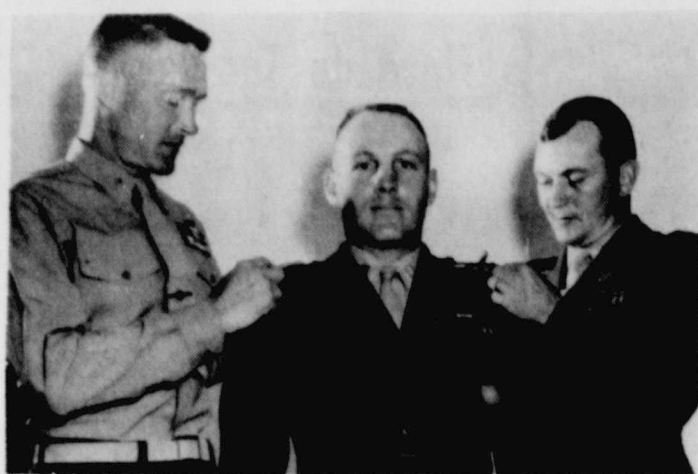

Vernon Parker, Don Pemberton, Carl Plumlee, Louis Pyle, Kenneth Robertson, Wayne Russell, Ernest Smitherman, Tom Snead, Wendell Tooley, Preston Watson, Jim Word, Ray Gene Ferguson and Carl Minor.

County Will Plant 65,331 Acres Cotton

Floyd County farmers will plant 65,331 acres of cotton, 103,337 acres of grain sorghum and 79,561 acres of wheat in 1966, according to figures released this week from the County Agricultural Stabilization and Conservation Committee office. This is the smallest acreage in all three crops in a number of years. The figures were compiled by the ASCS office after the final date for sign-up on the 1966 farm program passed.

Advance diversion payments have amounted to well over one million dollars though many farmers did not ask for advance payment and only one-half of the diversion payment was available to those who did want it.

COTTON

Thomas J. Hutchins, office manager at ASCS, said that farmers have signed up to leave out 32 percent of the county's cotton acreage allotment. The county allotment is 95,747 and the diverted acres total 30,416 leaving planted acres at 65,331. The diversion payment on cotton will total \$2,171,702 and the price support will total \$3,947,415 for total cotton payments of \$6,119,118. Farmers were paid a total of \$869,214 in advance diversion payments on cotton.

GRAIN SORGHUM

The county has total allotment of 185,253 acres on grain sorghum. They signed up to leave out 81,916 acres and will plant 103,337 acres, the office records show. The price support on grain sorghum will total \$2,222,340 and the diversion payment will amount to \$388,375 and price supports will total \$1,510,931 for total wheat payments of \$1,899,306.

Most dry land farmers signed up to leave out one-half of their wheat acreage while most irrigation farmers did not leave out any wheat, Hutchins said. Nearly 100 percent of the farmers of the county signed up for the federal program with this week. Miss Ford was a member of the class of 1917 and is in charge of the program for the affair.

Mrs. Dimple McGavock of Lockney said that she continues to receive letters and cards from members of the classes up to 1920 who say they are planning to attend.

The Baker home, located a block west of the Baker Mercantile store, will be headquarters for the old timers, and all are asked to stop there and register when they arrive in town Saturday. They will be issued badges. Also it will be the meeting place for the old grads when nothing else is happening and Mrs. McGavock is making plans to play host to as many as possible.

Lodging places are still needed for some of the visitors and if anyone wants to keep one of the early day graduates they should call Mrs. McGavock, Mrs. Guy Sams or Mrs. Jeffie Griffith.

Open house will be held at the Baker home after the banquet on Saturday night as well as most of Sunday. The visitors will be allowed to attend the church of their choice on Sunday morning.

Mrs. McGavock estimated that perhaps 40 or 50 members of the early day classes will attend the affair here including the husbands or wives of the graduates, the teachers and other guests.

American Legion District Contab Set In Plainview

Hershel L. Doyle, Adjutant of The American Legion, Department of New Mexico, Albuquerque, will be the featured speaker of the 19th District Convention of The American Legion, which will be hosted by the Plainview Post April 23-24. He will speak at the banquet and joint meeting of The Legion and its Auxiliary Saturday night and again during the business meeting of The Legion Sunday afternoon.

No stranger to Texas Legionnaires, Doyle was born at Rock-springs, Texas, entered the Army Air Corps as a private in 1935, graduated from the Signal Corps Communication School at Fort Sam Houston, Texas, and was retired from active service in 1944.

A 20 year continuous member of the H. U. Wood Post 245, Seguin, Texas, Doyle served as post commander, 14th District commander in 1951-52, and was appointed a national field representative for The American Legion in 1955, assigned to the states of Arkansas, Colorado, Kansas, Louisiana, New Mexico, Oklahoma and Texas. He was appointed Department Adjutant of The American Legion in New Mexico April 1, 1965.

Ellis P. Schmid, Slaton, 19th District Commander of The American Legion, Department of Texas, will preside over the Spring Convention of the organization to be held in the Hilton Hotel, Plainview, April 23-24.

Schmid, a retired Army Major, was a member of the famous Lost Battalion of World War II, surviving the ill-fated Bataan Death March. Since his retirement he has been very active in The American Legion and has inaugurated a new program of Zone Meetings among the Posts of the District, which are proving interesting and effective.

only a few small farmers failing to sign.

Economists are pointing out that the farmer will have considerably less cotton and grain

to sell next fall and that the price will be much less, but that farm expenses will probably also be down and that the completion of diversion pay-

ments and payments of price supports may enable the farmer to net as much or more than he has in the past.

Floyd County has been producing well over 100,000 bales of cotton but under this program the county's yield will probably be something less than the 100,000 bales.

MAY 31 DEADLINE

About 800 In Floyd Sign For Medicare

According to Mencie King of the Social Security office in Plainview, approximately 800 Floyd County residents have signed up for the Medicare program, although, no statistical records are available.

King said recently that nationwide figures show about 90 percent of eligible persons have signed up for the program. "I think 90 percent is really too low an estimate for this county," he said.

Anyone who is 65 or over is eligible for Medicare, King said. The program is in two parts: a hospitalization plan and a medical insurance plan.

The hospitalization plan is free to the insured person, but must be applied for. The medical plan, which pays for services outside the hospital, is optional at a \$3 per month cost, matched by the government.

The first sign-up deadline, March 31, has been extended to May 31 so more eligible persons will have a chance to apply, King said.

If this deadline is missed, the next chance will be the second registration period beginning October 1, 1967.

Medicare coverage becomes effective July 1 for those who apply by May 31, King said.

He said persons who think they may be eligible should go to the Social Security office at 1401 B. W. 5th in Plainview, or call CA3-4371 if they are unable to go in person.

The only standard for eligibility is that the applicant must be permanent United States resident over 65, he said. It is not necessary to have worked under Social Security.

Those receiving Social Security checks will receive the hospitalization plan automatically, but must apply separately for the medical coverage, King said.

Bu-Tuf Tubing Distributor Named

Appointment of a distributor in this area for a new portable irrigation system of thin-wall plastic tubing which completely eliminates seepage and evaporation water loss common

in open-ditch systems has been announced by Petro-Tex Chemical Corporation.

Econo-Flex Pipe Co., 711 Oakland Street, Plainview, has been named distributor in this area. B. F. Sammaan and W. F. Bowser, well-known Plains area businessmen, are partners in Econo-Flex.

Made of Bu-Tuf resin, the new systems are being marketed after a three year program of testing and development.

The new system overcomes limitations of open-ditch irrigation while providing increased economy and convenience. It is manufactured in a wide range of diameters and wall-thicknesses and -- since it is in a collapsible, lay-flat tube form -- can be supplied in rolls of great length.

"By any standards, this is a significant improvement over other methods of irrigation," said J. M. Kincaid, development engineer for Petro-Tex Chemical who has been working with farmers in the area in recent months. Bu-Tuf tubing can easily be installed and moved by one person. The farmer using it has a far greater degree of flexibility in field layout since he can move the tubing to direct water to any area of the field.

Control of seepage and evaporation in open ditches "is impossible," Kincaid said, "yet the ditches have remained in wide use because there have been no attractively-priced alternatives. With the Bu-Tuf system, the farmer eliminates the open stretch of ditch between the well and the point where the water transfers to the furrow. The Bu-Tuf system directs the water to the field -- not the long open ditch."

In development of the new irrigation system, elimination of seepage and evaporation was a major objective because a Texas Technological College study showed that water losses of 20 percent due to these two factors were found to be typical in the Texas South Plains area, Kincaid said.

"Typical pumping costs for

this South Plains area in 1964 ran about \$12 per acre," Kincaid said. "On a 160-acre cotton farm, a loss this size could be valued at \$385 and could represent 45 percent of the seed costs."

Kincaid said the new Bu-Tuf irrigation system should be "especially attractive to farmers who do not own the land they farm since the system is portable and can be moved from one farm to another."

Bu-Tuf tubing is sold in standard lengths of 400 feet. Coupling devices have been developed which provide positive seal and simplicity of operation.

W. P. Dally, for 30 years proprietor and operator of the Commercial Hotel in Floydada, died at his home last Thursday. He had been active in business, civic and church affairs during his long residence here until 18 months ago when he became ill.

Mrs. A. T. Hull entertained with a party Tuesday afternoon honoring her little daughter, Linda, who was three years old.

Lon M. Davis Jr., enroute home for Easter from Oklahoma University at Norman, was in a collision three miles west of Iowa Park Thursday night. The wreck damaged his car enough that it had to be towed into town but he escaped with only slight bruises.

BU TUF TUBING - This photograph was made on a Plains area farm during installation of the dramatically-new Bu-Tuf portable irrigation system recently introduced in this area. The Bu-Tuf system is made of thin-wall plastic tubing with diameters ranging from 4 1/4", shown here, through 12 3/8". The system gives the farm operator total flexibility and permits changing irrigation layouts as needed. With the system, the portion of the ditch used to transport water to the point of irrigation can be eliminated, greatly reducing the costly losses due to seepage and evaporation.

Inflation Causes \$502,000 Loss To Floyd Residents

(Special to the Hesperian)
 NEW YORK, Apr. 9 — The average Floyd County housewife is finding that she needs more money these days when she goes to the grocery store or the meat market. Her food bills are running nearly five percent higher than they were a year ago.
 After a long period of relative stability, the cost of living is increasing rapidly. Talk of inflation is in the air. Locally and in almost every other part of the country, the prices for consumer goods and services have been going up at an accelerated rate. The problem has become one

of major national importance as the Government considers ways and means to keep the lid on without putting too much of a brake on the economy. Prices have been creeping upward for some time, but at a modest 1 to 1 1/2 percent a year. In the past year, however, according to the Department of Labor and other Government sources, the rise has been considerably more than that — about 2 percent.
 What does this amount to in dollars and cents for the average Floyd County family? For households with spendable incomes of \$6,280, which is the latest average figure reported by Sales Management, the 2 percent represents a loss of \$126 a year in purchasing power.
 In local families where earnings were above or below this average, the losses were proportionately higher or lower. Those with net incomes of \$5,000 were deprived of approximately \$100, those with \$7,500 lost \$150 and those with \$10,000, about \$200.
 For the population of Floyd County as a whole, the cost of inflation in the past year was an estimated \$502,000.
 Fortunately, the rise in living costs has been more than balanced by higher incomes. Thus, despite inflation, the average working man, locally, has been able to absorb the rise and improve his standard of living as well.
 As a result, there has not been too much concern over the upward trend in the cost of goods.
 Now, however, the threat of inflation is more serious. Present Washington opinion is that, if the trend continues, the Administration will call for a tax hike to wase the situation.

LEROY TITUS

Lt. Leroy Titus Enters Training At Reese AFB

LUBBOCK, Tex. — Second Lieutenant Leroy Titus, son of Mr. and Mrs. Melvin Titus of Rt. 2, Lockney, Tex., has entered U. S. Air Force pilot training at Reese AFB, Tex. Lieutenant Titus will fly the newest Air Force jet trainers and receive special academic and military training during the year-long course. He will be awarded silver pilot wings upon completion of the Air Training Command flying program.
 The lieutenant, a graduate of Plainview (Tex.) High School, received a B.B.A. degree in marketing from Texas Technological College where he was commissioned upon completion of the Air Force Reserve Officer Training Corps program. His wife is the daughter of Mr. and Mrs. D. G. Kirkland of 1617 27th, Lubbock.

County Agent's Corner

Cotton farmers in the eastern part of the County are urged to plant their cotton between May 10 and 20. The late planting date will aid the boll weevil diapause spray program.
 Weevils must have food when they come out of their diapause thus if cotton is planted late several weevils will have emerged and died from lack of food. This further reduction over the fall spray program could keep the weevils population so low that in season control would not be needed.
 The late planting, advocated by officials of the boll weevil control program would not hurt cotton yields according to the High Plains Research and Extension Center at Lubbock. The experiment station has tests over a period of 15 years that show the highest yields and

most net profit from cotton planted between May 10 and 20. As cotton planting time arrives here on the south plains farmers should consider buying high quality seed.
 A planter box survey conducted in Crosby County by the South Plains Research and Extension Center showed that lint quality and quantity could be increased by buying certified or high grade seed. The seed saved by farmers in the test generally produced less lint and of a lower quality.

 As lawns begin to green up, weeds often become a problem in established grass. The broadleaf weeds including dandelions and clover can be controlled with 2,4D.
 Care should be taken to use only the amine form of the 2,4D. Two tablespoons of the chemical per gallon of water should be used plus one tablespoon of a household detergent. The detergent acts as a sticking agent for the chemical.
 Several companies make a paraffin bar or roller that is treated with 2,4D. Dragging the device over the lawn gets enough of the chemical on the weeds to kill them.
 Extreme care should be taken not to get the chemical on any broad leaf plant including trees and shrubs that you do not want killed. 2,4D is a hormone type weed killer and a few drops can kill a large tree.

The Floydada Track and Field team failed to perform as well at the Regional Qualifiers meet held in Olton last Saturday as they did the week before at the district competition.

Although the team placed fifth with 37 points, only two second place ribbons were won by the local team members.

At the meet Melvin Sissney of Lockney moved to the number one spot in the state's open quarter as he whizzed around the track in 48.1 seconds. Prior to Saturday the best time was by Mark Fry of Abilene Cooper with a 48.3. Sissney ran a 48.5 to win the district competition two weeks ago. Sissney is now a good bet to take the state title in that event.

Sissney sparked the Longhorn team as he anchored the Lockney relay teams that also set new records. These victories gave the Longhorns 76-62 advantage in points over Abernathy who finished in second. Idalou was third with 50 and Panhandle was fourth with 48-1/2.

Two groups of four tied for first place in the AM-AM tournament held at the Floydada Country Club this past weekend. Both teams fired 61, under the low ball rules, for an 11-under-par.

Al Harrison, Lorraine Harrison, E. D. Morgan and Thumper Morgan, all of Floydada, made up one team and J. A. Sherrod, Pud Boyd, George Carter and Muncy Canter made up the other team that shared the first place trophy. Sherrod is from Idalou and the others are from Lorenzo.

In third place with a 10-under-par 62 was a team consisting of Cliff Southerland and Dickie Watson of Floydada and James Pevey and Earl Coulter of Lorenzo.

The low amateur prize was shared by Cliff Southerland of Floydada and Charles Hopkins of Lorenzo. Both fired one-under-par 71.

There were 100 entries in the tournament.

Saturday Last Day To Enter Mix-Up Volleyball

Saturday, April 23, is the last day a person may sign up to enter the mix-up volleyball tournament set in Graves Gym May 5, 6 and 7. The games will begin each day at 7 p.m.

Survivors include her husband; three daughters, Mrs. Herman Sanchez of San Antonio, Mrs. Raymond Larez of Los Angeles, Calif., and Mrs. J. B. Mitchell of Amarillo, also one son, Tony Nunez of Florida.

Home For Floydada Farm Supply Under Construction Here

The new home for the Floydada Farm Supply is now under construction on the Lockney Highway near the Floydada City Limits. The firm is owned by Gary Don Carthel and Wayne Adams. The two also own Cone Farm Supply, which Adams manages.

The fertilizer store, office space and shop area for the equipment will be included in the 6,072 square feet of floor area. The building will be 66 x 92. It is being built by Phillips Petroleum Company and will be leased to the Farm Supply owners.

Aaron Carthel, former owner of the fertilizer business, has sold that to the partnership mentioned above.

The building should be completed and ready for occupancy around July 15.

FLOYD DATA
Edell Moore, local funeral home director, was able to come home from University Hospital in Lubbock Saturday where he had been for treatment of hepatitis. Moore is reported doing nicely but he will have to remain in bed for several weeks.

FLOYD DATA
Mr. and Mrs. Buford Terry of Midland were here during the Easter holidays visiting his mother and other relatives.

Two Floydada Residents In Car-Train Wreck

Jesse Flores, 40, and his 16-year-old daughter, Esther, of Route 3, Floydada were involved in a car-train mishap on a county paved road 6.1 miles north of Idalou about 6 a.m. Saturday morning.

The two were taken to Methodist Hospital where the man was treated and released and the daughter was admitted. Her condition was considered fair later in the day.

Highway Patrolman Kenneth Walters said the truck was heading west, with the teenager driving, and the Burlington Lines train was traveling south. Joe V. Crowley of Childress was the engineer.

LETTERS to EDITOR

Dear Sir:
After discussing the outstanding success of our first race of the 1966 season with Mr. Bill McLaughlin at Multi-Media Advertising Agency, and after observing that you did use our press release and our picture with the caption underneath, I feel that a tip of the old racing helmet is in order to you and to your entire staff. The race was the most successful yet and we know you and your staff had a big hand in making it so. Many thanks.
Sincerely,
Ernest Walker

Get Acquainted Party Planned At South Plains

There is to be a "Get Acquainted Party" at South Plains School House auditorium Monday, April 25 at 8 p.m. The event will feature slides shown by Kaz Wierzbicki, Floydada foreign exchange student, from New Zealand.

The slides are new and have not been shown before, according to members of the two hobby clubs in South Plains, who are sponsoring the program.

Coffee and doughnuts will be served and everyone is extended a cordial invitation to attend.

CORRECTION

It appeared in last week's Hesperian that a gun club would be formed Saturday, April 23 and those interested were urged to be at the rifle range that morning.

However, this was in error. The meeting will be called by the Young Farmers of Floydada and will be September 23 at 8 p.m. at Lighthouse Electric. The group is anxious to hear suggestions both pro and con concerning a gun club.

The organization has the backing of Public Service for if vandalism will be reduced by the club as it has been in other parts of the country, that firm will be saved several hundred dollars a year that is now spent on transformers and other equipment that is damaged by pranksters and other vandals.

Coffee and doughnuts will be served at the meeting.

MYF Pancake Supper Set Here Saturday

The Methodist Youth Fellowship of the First Methodist Church is sponsoring a Pancake Supper Saturday, April 23, from 5:00 - 7:00 in the Fellowship Hall of the church.

Prices are 75¢ for adults and 50¢ for children up to the sixth grade. This is for all you can eat, and everyone is cordially invited to come.

Proceeds will go to the summer activity program of the M. Y. F.

Advanced tickets may be obtained by calling 3-3707, 3-2915, or 3-2755.
