### AND NO AIR CONDITIONERS Although Area Swelters This Summer, Not Like Mid Thirties

Although Floyd County, as well as most of the nation, has sweltered under intense heat during July, that is until last weekend when some relief came, it doesn't compare with some of the summers in the thirties.

The area has suffered 27 days, all of July, as the temperature approached the 100 degree mark some days. The last day the high was below 90 was June 31 and it was 89 then.

Some dates were picked at random in the records of Pioneer Natural Gas where a day to day high and low temperature is recorded and it was found that in 1934, the temperature did not get below 90, for a high, from June 4 until August 23. August 23 that year recorded a high of 95 and the next day the high recorded was 61. Quite a drop.

The year before the high temperature remained above 90 from June 19 through July 24, and July 10 through the 14th recorded the following highs: 102, 106, 104, 106 and 107. July 25 a cold front must have hit for the high that day was a mild 89 degrees.

Most of years in the records indicate that from

mid-June to mid-July each year the temperature remains, for a high, around ninety or above, then a few days of cooler weather prevail, then for another 20-30 days the temperature climbs once again. However, in 1941, which was a wet year, the high temperature was 100, July 18. Most of the remainder of the summer the high temperature ranged from

## Good Price Received, Most Shipped Out

Despite cutbacks in production, and despite the drought that caused several acres of dryland wheat to be plowed under, the Floyd County wheat crop poured over \$3 million into the county this summer. The total bushels times the average price showed the crop worth \$3,018,916.

The actual number of bushels received at the 21 county elevators reporting, was 1,719,381 bushels. This is somewhat below the amount of 1,951,901 bushels received last year, but the price of the crop was considerably better this year. In 1964 2,096,909 bushels were produced in the county.

The crop this year was produced on about 75,000 acres of land. Since growers may substitute wheat for grain sorghum and vice versa, the exact amount of acres could not be determined.

In 1965, the crop produced was on an allotment of 115,718 acres of which 10,154 were diverted, according to ASCS figures.

Although no exact price was set and held during the harvest season, no exact figure could be used to determine the value of the crop. However, most elevators reported that probably the majority of the crop was sold at around \$1.75. The price was as low as \$1.55 per bushel and rose to a top of \$1.83.

According to most managers in the county, the majority of the crop was shipped out when the price reached the \$1.80 mark, but of course, some was held back. About two or three weeks ago the market price reached the \$1.80 figure and this broke loose some of the wheat that had been stored for several months and years before.

The current price of wheat is from \$1.76 to about \$1.78.

One manager expressed unhappiness with the government for saying such things as "we have surplus wheat." If that notion had a crop failure it is reported that the U. S. would have to buy wheat for 6-8 months, for only 4-6 months supply is in storage.

### Open House Set At Brown Gin

An open house to show the people in the Floydada area the new offices at Brown Gin Company, on the Ralls Highway, will be held at the gin from 2 until 5 p.m. Sunday afternoon, July 31, according to Morgan McReynolds, manager of the firm.

The new brick structure replaces a frame building the gin has been using for offices for several years. The interior is completely paneled and a lattice brickwork separates the entry room from the pastime area, where people can amuse themselves while awaiting ginning results.

New furniture throughout is another outstanding feature of the building, which also features refrigerated air conditioning and central heat.

Pike Hanna was the building contractor for the new structure.

### SETS SCORING RECORD

## Shirley Rainer Standout At North-South All-Star Game

Last Saturday night at Duncanville, Texas one of the most competitive basketball games of the year was played. This game was the tenth annual All-Star girls basketball game, and a 5'5"-116 pound Floydada athlete played her very best to prove that the South wouldn't rise again!

Miss Shirley Rainer truly gave one of the finest performances as she poured in 29 points to receive the honor of highest scorer for the evening and spark the North to a 78 to 55 victory over the South. The next highest scorer to Shirley was Miss Marilyn Aschenbeck for the South with 19 points.

The highest score previously was 71 set in 1960.

She made 9 field goals, 11 free throws and only had two personal fouls against her. There were 16 on each team, 8 forwards and 8 guards and each coach had to use the entire team at sometime during the game, so Shirley only played about three quarters.

Gunner Rainer kept her defense thoroughly confused as she demonstrated her famous jump shot while driving from both the left and the right side of the court. Once in the second quarter Shirley received the ball three consecutive times to consistently score nine points for her team.

With plenty of hard effort and help from team mates representing the towns of Abernathy, Springlake, Friona, Tulia, Spearman, Sundown, Slidell, Petersburg, Deport, Rivercrest, Chapel Hill, and Duncanville the North contributed 78 points to defeat the South scoring 55 points.

This was the highest score ever set by either side at the annual event in the ten years of its existence.

When asked by Coach Ron Buckner of Ranger Junior College what Shirley's plans were for the fall, she informed him that West Texas State University was the chosen school. "I can give you a scholarship and guarantee you books, room and board, and a job if you will consider playing for us", said Coach Buckner. "I have heard about you and now I have seen you in action. I know you can really play for us if you would desire to do so."

Miss Rainer promised to give the matter some serious thought and acknowledge her decision before September. She has also been offered a scholarship if she attends Wayland Baptist College in Plainview.

No matter which school Shirley chooses, she will do her best and make good. Shirley has proven to be every inch a lady as well as a fighting athlete. She is one of the finest Christian young people anyone could ever meet. Shirley stands for what she believes and fights hard to earn what she gets. She is the greatest example of a Fighting Whirllette and a person of whom Floydada can justly be proud.

### FB Church To Observe Anniversary

The First Baptist Church will observe their Diamond Anniversary with a Homecoming

on August 13 and 14, according to information from the church this week.

All living former pastors are planning to be present for the occasion. There is to be a catered supper at camp Saturday night, August 13, and lunch served at the church, August 14. Open House will be held Sunday afternoon.

Former members are invited to attend and all present members are urged to attend.

### Bill Smith Is Seriously Hurt

Wm. H. (Bill) Smith, Floydada farmer, remains in a serious condition in Crosbyton Hospital where he is being treated for a burst liver sustained in an accident on his farm Monday.

Members of the family said the mishap occurred when Smith stopped his tractor and while standing on the back was attempting to repair the fertilizer rig hooked on. He started to descend from the tractor and jumped, catching his foot, causing him to fall across the draw bar on his stomach. He sustained a burst liver and several broken ribs.

Smith was able to get into his pick-up and drive himself to his Floydada home where he told his wife, the former Lillian Kincheloe, what had happened. The couple did not realize at first just how seriously Smith was hurt. However, Mrs. Smith got her husband into the car and rushed him to Crosbyton where immediate surgery was performed. Doctors informed her that had there been a few minutes delay, he would have hemorrhaged to death.

The family said it would be several days before Smith would be out of danger.

### Area Receives Scattered Showers Sunday

As the high temperature continues to remain in the mid-nineties to the high nineties, some scattered showers Sunday morning helped to cool things off, although only temporarily.

To date Floydada has received .34 of an inch of moisture in July which brings the year's total to 5.2. Larger amounts of moisture were received in most of the rest of the county. At South Plains a total of .9 of an inch was received, Harmony got .3 Dougherty had .8 and north of Dougherty near the highway .5 was received. The heaviest amount fell in the Antelope area where from 1 to 1 1/2 inches were recorded.

### Mrs. Smith Named County Campaign Manager For Tower

U. S. Senator John Tower announces the appointment of Lucille (Mrs. Robert Lee) Smith of Lockney as Floyd County Chairman of Tower's re-election campaign.

"I am greatly honored that Mrs. Smith will assist me in my campaign for re-election to the U. S. Senate," said Senator Tower. "I feel confident that we can wage a successful campaign to retain effective representation for Texans in Washington."

Mrs. Smith attended West Texas State University, the University of Colorado and received her B. S. Degree from the University of Texas in 1943.

Mrs. Smith is active in the P.T.A.; she is Bible school teacher for the Church of Christ. She occasionally directs school plays, gives book reviews, and narrates style shows. Mrs. Smith has four children.

Senator Tower is in his sixth year as Senator and is on two major Senate Committees - Armed Services and Banking and Currency. This year he was named to the important Military Construction Subcommittee.

As part of his Armed Services Committee business, Senator Tower has twice toured Vietnam and Southeast Asia and is considered by many to be one of the best informed members of Congress on this troubled area.

He was also a leader in the successful fight to save the Texas Right-to-Work Law, giving the worker a choice in joining or not joining a union.

"I am greatly pleased to have this opportunity to help Senator Tower in his campaign for re-election," said Mrs. Smith. "Senator Tower is doing a fine job in Washington for all Texans."

### Vehicles Collide With Tree, Calf In Two Mishaps

Vehicles collided with a tree and a calf in two separate incidents Sunday, it was reported by the Department of Public Safety here.

The first occurred at 8:35 a.m. Sunday, July 24 10.3 miles east of Floydada on U.S. 62. A 1959 Plymouth driven by Joe Lee Walker, of Bakersfield, California, ran off the roadway and hit a tree.

According to the report the road was slick and he evidently lost control of the car as he passed another vehicle, ran off the road and into the tree.

Walker suffered a broken nose and was treated at the Lockney Hospital. Jerry Leon Noland of Floydada suffered a broken leg and was carried to a Lubbock hospital for treatment. Charles Noland of Floydada, the second passenger in the car, received minor cuts and was treated at the Lockney hospital.

The car was a total loss.

The second mishap occurred about 10:15 p.m. Sunday, one mile west of Cedar Hill, when a 1955 Ford, driven by Aurileo Castillo, Jr., of Floydada ran over a calf weighing about 400 pounds. Gerald Howard, investigating officer, had to shoot the calf when he arrived at the scene.

The vehicle received about \$250 damage. It was traveling west on Farm Road 97. Castillo received no injuries.

Vargas was the winning pitcher, as he tossed a no hitter, and Bickley was relieved by Baccus in the fifth for Lockney. Gary Martin aided the Post team cause as he blasted a grand slam home run.

In the game Tuesday night Lighthouse Electric had seven runs on seven hits, committed four errors and left three men on base. The Lockney All-Stars had six runs on six hits, had one error and had four men left on base.

The winning pitcher was Bearden, who relieved Pierce, the starting pitcher, in the fifth. Green was the losing pitcher. He relieved Jefferson in the sixth.

Timm Jeffries hit a double for the only extra base hit of the game.

The winning run was accomplished as Marler singled, stole second and third. Then Wester stepped to the plate and hit a single that scored Marler. The defense held in the last half of the seventh and Floydada owned the game 7-6.

Wednesday night Silverton met the Floydada All-Stars. Results of that game were not available at press time. Tonight Lockney Cubs meet Lockney All-Stars and Post meets Lighthouse. The winner of tonight's game will play the Silverton-Floydada All-Star winner for the championship.

The loser of the Lockney Cubs-Lockney All-Stars game will play the loser of tonight's Post-LHE game for consolation.

Yarborough Newsletter

Dear Fellow Texan: Summer actually is the busiest time of the year for the United States Congress. It is a time of challenge.

It is the time of writing the final bills in committees on matters vital to every person in America. It is the time for important votes and Senate action, as the record is written for this final second session of the 89th Congress.

For example, last week working as your Senator, there were as many as six committee meetings in one day. Four of these were executive or closed sessions where we put the bills in final form for passage. During this week there was no day that did not have at least three such committee meetings where the important terms of the bills were being hammered out.

The pace is fast. It is a part of what makes being your Senator in Washington a challenging job. For this is why we are here-to be of service to the people.

Here are some of the things done during this one week: An amendment to the Elementary and Secondary Federal Education Act of 1965 was adopted which would change the formula of dividing Federal money among the states so that the low per capita income state would get a more fair share. Texas would get more money per pupil under my amendment. In the money bill for Agriculture, words were changed that mean saving the Rural Electrification Program from old terms that were strangling it.

An amendment to preserve parks and historic sites from

being bull-dozed by the super highways was accepted by the Public Works Committee of the Senate.

Two bills were introduced in the Senate to guard against the destruction of the present Capitol building. One of these calls for a study by qualified men, including leading architects of the Nation, of the best way to preserve our beautiful Capitol building. And it would make certain that your taxpayers' money is not wasted.

As Chairman of the Postal Affairs Subcommittee of the Senate, I was able to help push the passage of the 2.9 per cent Federal Pay Raise Act - which was signed this week by President Johnson, affecting the pay of 100,000 federal employees in Texas.

Senate floor speeches were made in support of the Clean Air Act for the Federal Water Pollution Control Act; for the School Lunch programs; and for the development of Water Resources. All of these are vital to the future health, growth and development of our America and its people.

A floor fight was made that helped to defeat the Brewster amendment to the Agriculture Act. This change proposed by Senator Brewster would have limited the amount of payments and loans under the 1965 Agriculture Act to individual farmer. It was defeated.

These actions, carried out in one short week, are indications that your Senate is acting rapidly and responsibly for you.

We are not a rubber-stamp Congress, however.

We raised the appropriations from the Special School Milk Program by \$84 million. We raised the school lunch money to \$29 million. We raised the Impacted Areas school money and the National Defense Education Act Student loans. We increased the authorization for

the high 80's to the mid-90's.

Keep in mind there weren't air conditioned homes, offices, and cars at the times mentioned above.

In 1962, bringing the records more up to date, the June temperature ranged in the 60's, 70's and 80's, in July they were mostly 70's, 80's and a few 90's and in August the high temperature was in the low 90's and 80's with a few 70's. The temperature did not reach 100 degrees that year and did not reach the century mark the following year.

Throughout all of last week the temperature ranged near the 100 degree mark for a high.

Although it is not hotter now than it was in the thirties, it is more noticeable. Houses, tractors, stores and every other place was hot, but now people step out of a home where the temperature is kept around 72-78 degrees, ride in an air conditioned car to the office or to town and do their business in a store that is air conditioned.

It's no wonder that it's like walking into an oven each time someone steps outside a building.

REA loans to the Rural Electrification Co-ops. And we cut foreign aid by \$250 million in one amendment.

county. Bollworm are of minor importance at this time. Hot dry weather has probably contributed to keeping this pest from increasing in numbers. Very few weevil punctures have been reported in the county at this time. The weevil population is considerably lower this year than last year. No damage to Grain Sorghum from the midge has been reported yet. Some grain sorghum is past the bloom stage when the insect attacks the plant. Midge population are expected to build up from now on. Some is past the bloom stage when the insect attacks the plant. Midge population are expected to build up from now on. Some areas could have damage from the insect by the latter part of August.

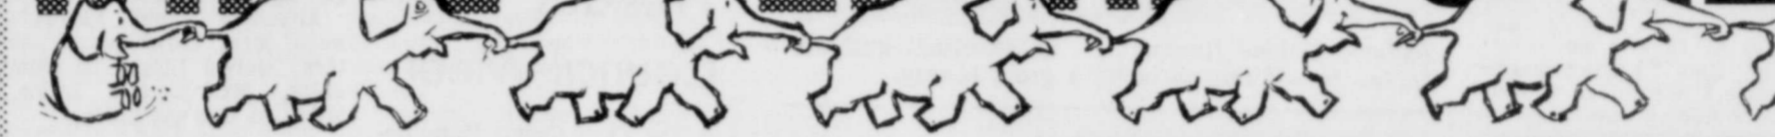

Submitting wheatland soil samples now will insure getting soil test recommendations in plenty of time to plan the most profitable fertilizer application for the fall planted crop. Fifty bushels of wheat grain contain 50 pounds of nitrogen and 25 pounds of phosphorus. Additional nutrients are used up producing straw and forage.

An early soil test is particularly helpful when a field is found to need phosphorus or when the wheat will be grazed. Nitrogen should be applied preplant to stimulate early growth if the wheat will be grazed. When wheat is grown only for grain, research shows that time of nitrogen application is of little importance. Phosphorus, if needed, should be applied before planting. Wheat, like other crops, uses it while it is young and phosphorus is not moved into the soil by moisture.

Fertilizer recommendations for wheat are based on the nutrients available in the soil and on producers statements about yield goals and anticipated grazing. The fertilizer recommendation will be most meaningful when the sample is highly representative of the soil and when the information sheet gives accurate details on crop history and production intentions. County agents can be contacted for sample containers, soil information sheets, mailing instructions and more complete information on soil testing and fertilization.

### Madame Helene Rochas Typifies Paris Version of Career Woman

\*\*\*

PARIS (WNS)—"I would never forgive myself if I worked so hard and so long that I couldn't find time to get to the hairdresser. No matter how busy I am, I always make time for my hair, my skin and my figure," declares Madame Helene Rochas.

Madame Rochas is a career woman, Paris style. She lives in an apartment furnished luxuriously in the European manner, she wears couture clothes and she gives famed parties at which the guests include the likes of Rothschilds and the Duke and Duchess of Windsor.

She is also the active head of Parfums Marcel Rochas, which she had to take over in 1955 when her husband died. Her employees are quick to point out that their glamorous boss, a permanent fixture on the Ten Best Dressed list, has increased the business tenfold since she became its head.

"Why not?" asks Madame Rochas with a well-bred French shrug. "What has brains to do with the exterior one shows? I didn't change because I had to run a business. I have always been interested in books, theatre, painting, ballet and music. Perhaps it was fortunate my husband's business was one which a woman naturally loves. I might not have been so happy running a nuts and bolts factory."

Perfume is more than jewels to the Parisienne, according to Mme. Rochas. "We would feel almost naked without perfume, but not without jewels. Perfume is far more romantic, more personal as a gift, and very often, in better taste."

Mme. Rochas is a beauty by any standard, with large, soft eyes and a model's pure features. She faithfully consults her personal dermatologist every three months, and takes advantage of the many services offered by chic Parisian salons. She goes to the hair stylist twice a week.

"That isn't such a frivolity as it sounds," she laughed. "I go out a great deal, and one's hair must always look right. In Par-

is, one has to have a gala coiffure for gala evenings. For day, however, I like my hair quite simple, just softly rounded with a little curl at the ends."

Mme. Rochas believes it is vitally important for every woman to find a fragrance which is her personal signature. This is one reason they come in small sizes, so that one can test a fragrance by wearing it for a short while.

"Perfume can't be sniffed from the bottle, it has to be worn on the skin. Even when trying in the shop, it should be placed on the wrist, where the pulse is, and smelled there."

Mme. Rochas is always surprised at the stinky use many American women make of perfume. Somebody, she says, should brainwash them into that backwash of the ears stuff, and with it."

they've never gotten any further.

"To become a personal signature, perfume and its sisters, colognes and bath aids, must be used fairly lavishly so that they are always an aura about a woman. Perfume should be used on ALL the pulse spots, including the backs of the knees! And it must be renewed after about four hours. That's what perfume flacons and sprays are for."

A favorite of Mme. Rochas is "Femme," the warm rose and jasmine blend which is one of the top sellers of her house. She thinks it is one of the most feminine perfumes ever created.

"Most women think of clothes as their big attraction, but the perfume outfit becomes glamorous when a fine perfume is worn backwash of the ears stuff, and with it."

**Wading Pool Needs Mid-summer Sudsing**

Have you taken a close look at the children's backyard wading pool lately? Just about this time of summer it probably needs a good sudsing. Even though you started the season with a clean pool, then came the little muddy feet and breezes that deposit leaves and soil. Nothing is healthier or more welcome to youngsters than a patch of water they can splash in, but it must be kept reasonably clean.

Most backyard pools of the popular plastic type are easy to drain and scrub. You can either turn them over and tip them out, or use the convenient built-in drains. Swish up hot soap or detergent suds in a pail, and use a lathered brush to get off slimy film. Then rinse with a hose. The pool will be much safer and more inviting for the children.

Family-sized pools need even closer inspection because more people use them. Grime that settles along the edge is distasteful, and makes you feel that the water itself is not clean. So maintain high outdoor cleanliness standards, just as you do indoors. You wouldn't leave a ring in the bathtub, would you?

Frank Litterest a Specialist with the Vocational Education Agency from Texas A & M University taught a Cattleman's Short Course in the Lighthouse Kitchen last week.

Approximately 30 men from Floydada and the surrounding area attended the 4-night course.

\*\*\*\*\* Several have called asking for recipes for pickled okra the last few days. Perhaps you would like to preserve some of your fresh okra in this way also.

This recipe comes to us from Texas A & M Extension Service.

**PICKLED OKRA**

Young okra pods, uncut  
Garlic Cloves  
Salt  
Vinegar, boiling  
Wash okra; pack in hot pint jars. Add 1 clove garlic and 1/2 teaspoon salt to each pint. Cover with vinegar, wipe top of jars and seal. Let stand 3 to 4 weeks; chill well before serving.

Mrs. J.M. Smith of the Harmony Community uses the following recipe and finds it to be a favorite with her family.

**PICKLED OKRA**  
1 clove garlic  
1 pod hot pepper  
1 teaspoon dill seed or fresh dill  
1 quart vinegar  
1 cup water  
1/2 cup salt

Bring salt, vinegar and water to a boil; then, simmer for five minutes. Put small okra in jars and pour this over while hot, then seal. Let stand for 6 weeks before using.

\* 1/2 teaspoon mustard seed per pint jar can be added.

We have several pamphlets about Canning and Freezing here at the Lighthouse office. If anyone would like to have these, please come by and pick one up.

**TRAVEL SECRECY**  
The White House reports the President's future travel plans probably will be kept secret except for those occasions when he is making a public appearance and large crowds are desired. The greatest secrecy will be trips to large cities where he passes high buildings.

**How To Cope With Problem Windows**

How to cope with an air-conditioner poses a particularly difficult problem in window decor... especially when the appliance is the older, protruding type.

A well-thought-through window treatment can hide just such an eyesore and, at the same time, be decorative as well as practical.

Key element in such a plan is the window shade. Used alone or in combination with curtains and draperies, it gives a neatly balanced look to the window and a contemporary flavor to the entire room decor.

Handsome new cotton shades—vinyl-coated for easy upkeep—come in a brand new palette of decorator colors, textures, and patterns. Plain shades can be completely laminated with cotton fabrics to match draperies or slip-covers... or trimmed with fabric hems or appliques to coordinate with other room furnishings.

**WINDOW SOLUTION**—A protruding air-conditioner can be minimized by fully planned window treatment. Here a unified effect is achieved with a bordered in polished plaid cotton to match side draperies. Hung reverse to the need for a cornice, the shade is teamed with cafe curtains across section of the windows. When light is needed in the daytime for desk work, pulls up to make a handsome plaid valance. For privacy at night, it goes down just behind the curtain rod.

### OFFSPRINGS GROWN

## County Birth Rate To Rise

By 1970, Floyd County may be looking for a boom in births, but watch for a drop in the number of young people in the usual childbearing age, now ranging from 14 to 19, in the post-1945 to 1951 period of babies,

18,000,000 were born in those years.

The figures are from the Census Bureau and the Department of Health, Education and Welfare, which states that "the only factor influencing future births about which one can be reasonably certain is the size of the childbearing population, which will continue to grow for many years. A significant portion of this rise will occur between 1965 and 1970. . ."

Floyd County is due to share

The C. L. Berry Sr., home was the scene of a host of their relatives last week. Among those present were little Tim Berry and Cynthia Lou Berry of Fort Worth. They are the children of the late C. L. Mr. and Mrs. Tubal Cain are attending West Texas University in Canyon this summer. Present also were friends from McKinney, Fulton Price Jr., Rosella and baby daughter.

fully in this boom. The figures show that no less than 602 young women in the local area will be reaching the age of marriage and childbearing between now and 1970.

This is 23 percent more than there were in the 1960-65 period.

Of great importance, also, will be their decisions regarding family size. The difference between two children per family and three children would be tremendous, both from an economic and a population standpoint.

Nationally, slightly more than 2.2 children per married woman is sufficient to keep the population at its present level. If every woman should have three children the population of the country would nearly double within 25 years.

In some parts of the world that is what is happening. The populations of some countries are rising beyond their ability to feed and otherwise maintain them.

Government reports on birth rates throughout this country show that, in almost every community, there has been a drop in recent years.

For Floyd County, the latest figures show a birth rate of 31.4 per 1,000 residents. It compares with an average

**Whirlwinds Picked For Fourth**

According to a sports publication that is fresh on the news stands, the Floydada Whirlwinds are picked to finish fourth in the field of eight in 3-AA competition this year in football.

The publication, Texas Football, picks Abernathy as the most likely suspect to take the title while Dimmitt and Friona are picked for the next two spots. Olton, Memphis, Hale Center and Lockney, in that order, round out the district.

Concerning Floydada, the magazine states "Floydada, once a power, hopes to recover some of its old glory this year

as 13 lettermen (4 offensive regulars, 5 defensive) return. Watch for ends Mac Baker and Bob Murry, tackle Larry Adams and center Nathan Johnson to offer stout line play. QB David (Ross) Miller and halfback Kerry Bearden are the backfield standouts."

Abernathy will see 5 offensive and 6 defensive regulars from the 1965 team, a legacy that focuses attention first on such experienced backs as Roland Murry, Doyle Fuller, Harry Mathis and Andy Oliver. The hope is that the line will develop rapidly to prove leadership. Dimmitt, a young but scrap-

py team the past two years, comes armed with 8 offensive and 8 defensive regulars. Guard Mike Breguel (6-0, 195) twice all-district, is one of the area's defensive standouts. He will join guard John Howell and ace punter-end Ronnie Kenmore in anchoring the line. QB Kent Lindsey and halfback Danny Land trigger the backfield. Fullback Joe Bob Sanders, guards Stanley Byrnes and David Seale, tackle Rodney Hutto and end Don Moore round out a potential challenger for the district crown.

Bill Weatherly, Friona, considered the best tackle in the district, will team with tackle Mike Smith, guard Mike Woolley, end Mike Riethmayer, QB Larry Graves and halfback Bobby Jordan to make Friona a team that could develop into a champion.

Olton, like Floydada, expects to regain some lost ground as 7 defensive regulars return among 15 lettermen. The team will have size and strength, made up of such beef as Jim Scherier (195) and Joe Fincher (6-3, 255) and guard Steve Burleson (195). Guard Eddie Hopper and ends Jim Huckabee and Jim Smith are expected to come forward rapidly. Bennie Akin, who as a freshman was a threat as a runner, weighs in at (180) and senior Dale DeBerry pair to give punch to the offense, while Charles McClaine, Bob Turner and Albert Key are experienced in defensive backfield play.

Memphis, one of the newcomers to the district up from Class A, returns 6 offensive and 5 defensive starters, and puts its hopes on end Clyde Wilson (6-1, 190), who has quickness, blocking ability and superb hands. Tackle Bobby Carroll (6-1, 190) and guard Willie Devoree are other anchor points up front. Tony Pounds and Fred Durham are ball carrying reliables.

Hale Center, also up from Class A ranks, and who defeated almost every team they played in District 3-AA last year, has the makings of a potent backfield in QB Wayne Johnson (6-1, 170), a good passer, and strong runners H. T. Smith (6-0, 185) and Marvin Wilson (6-0, 190). Leroy Taylor, a star

of two years ago will add strength to the offensive punch. Although center Bobby Temple and tackles Ray Trevino (195) and Kent Kelley return to beef up the line, this could be the weakness of the team.

Lockney, who lost much of its size and speed through graduation, still has halfback Melvin Sissney, a 440-yard ace, and a threat on the gridiron. QB Bob Wester, fullback Tim Stansell and interior linemen David Workman, Ben Sue, Rudy Kellison and Keith McCullough are other promising talents, around which a team can be built that will brighten any coach's dream.

Without hesitation the writers of Texas Football firmly state that the winner of 3-AA will meet the traditional Denver City in bi-district play. Denver City is picked to win Regional

but Iowa Park is picked to meet Granbury in the quarterfinals. Granbury is selected to meet Mineola in the semifinals.

Iowa Park is selected to finish sixth in the state ranks and Phillips is picked as the number nine team.

The pre-season picks indicate where the obvious strength lies, but halfway through the season, the entire appearance may be upset by any team that

## Oden Named Director Of TADA Recently

Appointment of Connor Oden, Oden Chevrolet Company, Floydada as Area Director of Texas Automobile Dealers Association was announced today by H. E. Nall, Plainview, who represents this area on the TADA Board of Directors.

Oden has been advised that his major responsibility as an Area Director will be to work at the grass roots with other officials of the statewide franchised new car dealers association to promote a high standard of integrity among the car dealers of the state and serve the motoring public better by making driving safer, more convenient and more economical.

"Automobile dealers were particularly concerned at this time," Oden said, "with highway and car safety, and stress will be placed on association programs in this area with this as the aim. He said TADA planned to work with Area Directors to expand the driver education program into more Texas schools. Dealers help sponsor this training by loaning automobiles to schools.

Oden will serve as an Area Director until the next TADA convention in Houston, May, 1967. The Association, with headquarters in Austin, represents 1,400 franchised dealers of new automobiles and trucks of the State.

Oden is presently recovering from a heart attack.

## Philosopher Finds New Trend In Government Thinking

Editor's note: The Floyd Philosopher on his Johnson grass farm seems alarmed about something he read this week, his letter indicates.

Dear editor:

Most people are so busy earning a living they don't have time to back off and recognize a new trend in governmental thinking when it first crops out, but I found one in a newspaper yesterday which somebody ought to head off before it spreads.

According to this article, a government official was struggling with the same problem every state has, as well as every city and town--how to get more revenue.

"We ought to raise the gasoline tax another cent a gallon," he said, and here's the clincher, "because it hasn't been raised since 1955."

That's what I'm talking about. You mean to say the government is coming around to the idea that a tax rate eleven years old is out of style? You mean they're thinking about going over every tax there is and raising every one that hasn't been raised in a given number of years?"

You can see what this will lead to. Take just the gasoline tax. If it ought to be raised automatically every two or three years just to keep from being old-fashioned, you can see what the tax would be 50 years from now.

And since there are hundreds of taxes, most of them pretty well hidden, scattered around on nearly everything you buy, this new trend would let the cat out of the bag.

I tell you, we've got to head this off. Some people are always talking about preserving historic landmarks, why not put tax rates in the same category?

What a shame it'd be to destroy these historic old tax rates and rob future generations of such a splendid heritage.

I hope you will use your influence if you can remember where you put it and nip this in the bud.

Yours faithfully,  
J.A.

**TAX MAN SAM SEZ:**  
Each year thousands of students work in summer jobs. Their employers, in accordance with the law, withhold taxes from their wages. A lot of students do not earn enough during the summer to require them to file an income tax return. However, it is very important that they file a tax return shortly after January 1 next year, so they can get their refund. If a student does not file a tax return and claim his refund, the Government doesn't know he has a refund coming. In the case of many students, filing a tax return can be a profitable task.

Farmers are watering from irrigation wells, and this shower will surely help the situation.

Unless there is a change of plans due to the building program in Floydada, school will open here at South Plains Monday, August 29, according to the county superintendent. This will help families to plan their vacations.
