The Floydada school board, after working for two months, Monday night approved an increased budget for the operation of the schools another year. The new budget is for \$1,094,856, compared to last year's \$1,009,243. The budget includes money for bond retirement as well as operations. In another action Monday night the board approved a tax increase for the school's patrons from \$1.55 to \$1.75, to meet the needs of the new budget. Caprock Chat

By Wendell Tooley
HAD A VISIT out to Guy Ginn's farm (west of the community) last week. I went out to shoot a picture of harvesting 40 acres of carrots. However, the mowing machine when I shot it and the picture was out. I'll just have to tell you about it. The machine takes a row at a time, digs the carrot, transfers it to a trough like area where blades clip the tops, a conveyor belt carries the carrots over into a truck and the man on the machine, one man on the tractor and driver. This is quite an improvement over digging up carrots by hand. A good carrot crop, my family and I have been eating and they have what I call a "sweet carrot taste." Only way I enjoy carrots is raw. The carrots are hauled directly into a produce house at San Angelo. Guy how much money he would make, and he didn't know until the checks came in. Carrot farming is like all vegetable farming... usually no can and go. Guy has raised onions and okra commercially, these crops this year. SEE CAPROCK PAGE 6

Floydada Girl Writes Of Wreckless Driving

(Editor's note: Brenda Mathis begins a series of articles this week on teenage drivers and cooperation with local police officials. She was inspired to write them after attending the state youth conference.)

For months now Cliff had been driving that way. Sure, it scared some of the girls and even Cliff himself sometimes but EVERYONE drove a little recklessly. Didn't they?

After first receiving his driver's license, he had taken all the necessary precautions to prevent accidents and injuries. He used the provided seatbelts, yielded to YIELD signs, and came to a TOTAL stop at the STOP signs. He understood the yellow light to really mean "prepare to stop for the red light" and this he did until... he began observing other drivers and listening to his friends.

Cliff's dad was a very good driver - why, he had told Cliff so himself! So when he saw the shortcuts his dad took while driving, Cliff realized that only the "pansie" drivers stuck to the written laws. It wasn't long before Cliff, too, had decided that he knew more about driving than those stupid law makers ever could. Why even his dad said that the present laws belonged with the horse and buggy era. And surely anything to save time could be called pro-

gress. Cliff just never would understand why smart people like his dad weren't making the laws instead of the pansies of the world. Unfortunately for Cliff, he never realized that his dad was making the laws - he was taking the law in his own hands, but neither he nor Cliff was big enough to accept the responsibility such an act can bring.

If his dad's influence had been the only factor contributing to Cliff's driving habits, perhaps he would never have been in the position that he found himself today. But adults are not the only drivers in the world, and certainly not the worse drivers by far! In case you are guessing, the answer to who causes the most accidents through carelessness is also not the extremely elderly people - by elimination, this leaves only one age group; teen-agers.

The teenager frightens many adults because they realize that this age group leads the nation in crime and accident rates. Ironic, isn't it, that the only group not alarmed by teenagers are the teen-agers themselves! Cliff was no exception. He was certain that his friends knew best. Most of them had been running red lights, skipping stop signs, and speeding since the beginning of their driving careers. Why NOT have a little fun dragging one another as long as the fuz didn't catch them? And certainly there was no reason to quit speeding when the cops were out on the drag because most of the time they simply turned their heads and appeared to not see the kids whiz by. It became sort of a game with the kids calling the plays. It wasn't long before Cliff realized that the only thing you couldn't get by with was possession of alcohol. And yet, even then some of the kids had found ways to do that, too.

On conviction, constitute a habitual violator and many people are guilty of four violations within one day! These violations are punishable by loss of the privilege to drive and in some cases, even by a prison term. It is difficult to picture yourself as a criminal isn't it? But how many of us, in reality, are?

All of these thoughts ran through Cliff's head as he sat in the courthouse with his parents. The events of last Friday flashed before him. He had been late for a meeting and was driving along the residential streets on the way to his destination. Although the posted speed limit was 30 mph Cliff never drove less than 40mph on these streets. After all, not many people were around. He saw the STOP sign, but he was late and he never paid much attention to those four letters anyway - But from now on those letters, STOP, would be branded in his every thought as would be the lifeless body of that little girl he had hit. If he had only stopped, complete-

ly, he would never have hit her - he would still be driving - he would not have to live with a police record - most of all, he would not have to live with himself as he now was.

His father was thinking that maybe he should have been a little more particular about his driving habits as well as Cliff's. THEY had to learn the hard way that thinking is wonderful ONLY when it is done in time. For Cliff's family it was too late - will it be for yours? Will you, the youth and adults of Floydada, wake up and realize the importance of obeying traffic laws in time? Or will YOU someday be in Cliff's position? Will your son or daughter be directly responsible for the death of someone else? Remember - YOUR child could be the victim of a reckless driver. STOP. THINK. DO SOMETHING. Form good driving habits, obey traffic laws, and see that they are enforced.

"The life you save may be your own!"
Start today; tomorrow could be too late.

Higher College Fees Facing Parents

Families in Floyd County, who are sending more of their young men and young women to college these days, are finding that it will take more money to do so this year than last.

Costs have gone up considerably. In some families, especially those that have two or three going to college at the same time, it has become a major financial problem.

For them, the home may be taking second place to college as the biggest family investment, according to the Institute of Life Insurance.

It is calculated that the bill that Floyd County parents will be shouldering this year for college expenses will amount to approximately \$2,212,000.

Estimates on the number of college students and the costs involved are based upon figures obtained from the Census Bureau, from the Department of Health, Education and Welfare and others.

Nationally, they show, col-

lege enrollments have been rising rapidly. Over 7,000,000 are expected this fall, a far cry from the 2,935,000 in 1960.

For those who will be attending publicly-supported colleges, the average cost for the next academic year will be about \$1,600 for tuition, fees, room and board.

Some of them charge more for out-of-state students and less for in-state residents. And this does not include other expenditures that must be considered, such as clothes, books and transportation.

All in all, it might cost a family as much as \$3,400 to keep a youngster in private college and about \$2,200 in a public college, the figures indicate.

The total cost of \$2,212,000 for Floyd County families assumes that half of the college-bound students will be going to state colleges and half to private ones.

Fortunately, the number of local families that are able to absorb this kind of economic shock is on the increase.

"WE'RE FED UP TO HERE!"... with people who have accidents and have no liability insurance. This statement comes from a friend of mine who has suffered three auto accidents that were the other driver's fault, and the driver at fault did not have liability insurance.

It seems to me that there is a way to make sure that everyone who owns an auto has the state required liability insurance. It would be very simple for the license plate office to require an "insurance paid" receipt before issuing the needed license plates.

MY SINCERE THANKS TO A. W. Coltharp and the many persons who have bought magazines from junior high students for making it possible for this community to have two new tennis courts. It will still take a little more money for the needed backstops for the courts, but I believe we can figure out this problem a little later.

JUST FOR THE RECORD... Charlie Tyer and I lost to the team that wound up champions of the Plainview Invitational Tennis tournament last week.

It seems to me that if we are going to win that tournament next year that Tyer will have to get into training, which of course will mean that he'll have to give up that stinky pipe. I don't have any suggestions on how I may improve my tennis game before next year... fact is, I suppose I'm past helping.

Coed: "Do you think it's the amount of money a fellow's father has that's important?"
 Girl friend: "Certainly not! It's the amount of the father's money that the boy has."

There are three basic rules for having good teeth. Brush them three times a day. See your dentist twice a year. Keep your nose out of other people's business.

Did you hear the one about the hippies who hired a lady to come in once a week and dirty up?

LOOKING AT THE FRONT page this week, I suppose you'd say we have two "bad news" stories and one "good news" story. The good news of course is the decision of the ICC to allow Frisco to keep hauling automobiles into Floydada for distribution by two transport companies... the bad news is in the form of tax increases for city and school operation.

There are several persons who helped us save the auto transport companies and Frisco for business in Floydada, and I think I shall thank them personally or by letter. It was a tremendous effort by all concerned, and we appreciate everyone who helped.

SOME OF THE NICEST people in the world are truck drivers. We were over the other side of Grady, New Mexico two or three weeks ago when we ran out of gas.

Luckily Henry Hinton was behind us and he went on into Ragland to get us some gas.

While we were waiting for Henry, this big gasoline transport came by, slowed down, stopped, must have backed up an eighth of a mile to ask what was our trouble. When I told him I was out of gas, he climbed down from the driver's seat, asked me if I had a bucket. I had a plastic bucket, and he proceeded to open the valve and get me some gas.

I thought that was pretty nice of him to back that big truck up that far to help us on our way.

Yessir, truck drivers are nice fellows.

Bringing New Life to the Country

Two years ago this plant site was a lonesome stretch of barren land with little to recommend it. But it had low cost electricity from a rural electric cooperative and when a road made the land accessible the building began.

All over Texas this story is being repeated nearly every month. The first question is the availability of low cost electric power. When it is furnished by Lighthouse Electric Cooperative the answer is a dependable yes.

The first class service offered by the Lighthouse Electric Cooperative is Helping Texas Grow.

elementary teachers were required this year due to the state educational department's rule that each teacher must have 45 minutes per day for planning.

A new current ADA rating on state aid has now been classified "current" instead of a year behind. ADA means average daily attendance at the schools and according to superintendent A. E. Baker if Floydada schools have only a 5% absenteeism per day, the ADA rating will mean around \$18,000 less state money for teachers.

"We must have the cooperation of every parent in helping Floydada schools to maintain a good ADA rating with every student in school every day," Baker added.

The schools also lost some state aid money when the county re-evaluated all property, giving Floyd county a better economy rating.

"Of course we have all sorts of price increases in operating the school," Baker continued, "our principals reworked their budgets and cut out around \$15,000."

FLOYD PHILOSOPHER Has Confidence Congress Will Win At Least One Inflation Battle

Editor's note: The Floyd Philosopher on his Johnsongrass farm examines inflation a little bit this week.

Dear editor:

According to a newspaper I was reading this morning to get my mind off the last line on my July bank statement, the United States treasury is amazed to find it has a 3 billion-dollar budget surplus, and a lot of economists are worrying about it.

The reason they're worried is that they're afraid the surplus will produce more inflation.

At a time when the more a man makes the harder it is to make a living, the last thing we need is more inflation, but the economists who are worrying about that surplus just don't have enough confidence in the government.

While it's true the government was caught off-guard, you might say is temporarily embarrassed, by the surplus, I believe it will get hold of itself, come to its senses, and emerge in a few months with some plan to

achieve an over-draft. Once you let Congress understand inflationary surplus on hand, you'll see anti-inflationary legislation through, we've got the road construction program built it with, or the dam construction, etc.

Up to now, fighting inflation has been a worrisome thing because nobody knew how to do it, but once you convince Congress to do it is to eliminate a surplus we'll have it whipped faster than a ball melts you know where.

Provided, of course, the economists are right. You've got to remember the economists themselves were caught guard by the surplus, as they'd produced the opposite.

I have long contended that economic forecasting is like weather forecasting. They're telling you what happened yesterday, little shaky about what's going to happen tomorrow.

Yours faithfully,
 J. A.

Textile Specialist Speaks To Rotarians

Harry Arthur of the Textile Research Center at Texas Tech spoke to the Floydada Rotary club at its luncheon last week about the textile industry and particularly about synthetics.

Some of the Floydada community ginneres were special guests of Cecil Hagood, who introduced Arthur.

Arthur said the center was having good success with cotton-wool-mohair blends and also a 50-50 wool and cotton double knit fabric. He said the center was also expanding into chemical process types of fabrics.

He said the complete commercial area of the center is expanding and there will be an open house showing of it soon. The commercial plant can turn raw stock into the complete fabric.

In reply to a question about synthetics gaining on cotton, Arthur said, "I believe cotton is holding its own."

Mrs. Charles Craig Visits American Field Student In Austria

(Editor's note: Mrs. Charles Craig writes from Austria where she visited with the family of the American Field Student who will live in the Clay Henry home this year.)

The highlight of our tour came today when we met the parents and six year old brother of Peter Prischl, Floydada's 1969-70 American Field Service Student from Wells, Austria who will be residing with the Clay Henry family.

Mr. and Mrs. Cornelius Prischl and Johannes had made a four-hour journey to meet us after a telephone conversation with them upon our arrival July 27 in Vienna, (Peter was away at a Boy Scout Retreat).

Upon departing New York July 19, my sister, Mrs. H.O. Robinson, Dallas and I were assigned a tri-seat unit on the Pan American flight to London. After settling in our seats, we introduced ourselves to our tri-seat companion, Miss Johnie Christian, Denton, Texas. My sister and I said we were from Dallas and "West Texas".

"Where is 'West Texas'?"

"South of Amarillo," was the reply.

"Yes, what town?" Miss Christian pressed for information.

"Floydada" was the acknowledgement.

To shorten the story, Miss Christian and her sister, Mrs. Louream Robertson, Amarillo have a farm in Floyd County, McCoy area. Their parents, Mr. and Mrs. J.D. Christian resided in Floydada prior to their deaths.

They are traveling with two nieces, Miss Kathryn Fortenberry and Joann Hancock, Dallas.

As this Texas foursome was introduced to the Prischls, Mr. Prischl commenced to apologize for not bringing Peter's copy of the Hesperian. It was really not necessary since he knew the details of the issue: Floyd County had had a bad hail storm, the Holmes girls were married and engaged respectively, Brown's Pharmacy had been purchased by a Memphis buyer and would be known as Thompson's Pharmacy, and the street sweeper had struck an auto! Needless to say this information from home was far better than the Deutsch Newspapers we could not read here in Vienna.

The Prischls spent several hours with us and truly proved the Austrian hospitality. They, of course, were most anxious to learn about Floydada.

Vienna is a unique city with a very colorful history. Schonbrunn, the summer home of the Hapsburgs, is the most beautiful palace we have seen. Here, for the first time on the tour we were permitted to use flash cubes for interior shots. It is hoped that some will be good.

Tomorrow we fly to Rome, for views at Vatican City, Colosseum, Catacombs, and then to Naples and the Isle of Capri. Stops in Nice, Madrid and Lisbon will then complete our continental itinerary.

Note: Hesperian Editor - If this is readable, it seemed pertinent to send since it once again proves that the world is truly at our doorstep and The Hesperian carries news eagerly awaited in Austria!

With best regards,
Mrs. Charles Craig

Ag Commissioner Certifies GSPA Referendum

John C. White, commissioner of agriculture, has certified the Grain Sorghum Producers Association to conduct a referendum in 29 Texas High Plains counties. The grain sorghum farmers will vote on a program of research and market development, designed to strengthen the farmers profit position by financing research to find methods of lowering production costs and promoting markets.

Representing the Grain Sorghum Producers Association in Austin today were Pat Northcutt of Silverton, Texas, GSPA secretary-treasurer; K. B. Parish of Springlake, Texas, GSPA vice-president; and GSPA executive director, Elbert Harp. Harp stated, "We are pleased to have the opportunity of holding this referendum. It is the first opportunity the farmers have had to vote on this program which is so essential to their future." Recent passage of HB 764 by the Texas 1969 Legislature made it possible to hold such a referendum among the producers of grain sorghum.

Harp said, "We are looking for a vast majority of the farmers to approve this referendum. The investment will only be five cents per ton, to be collected at the point of first sale, or an average of eight cents per acre throughout the area. If we do not find some way to cut the high cost of production and strengthen the prices of the grain we sell, the grain farmers will not be able to stay in business. If nothing more could possibly come from this program than a possible reduction of one spraying for in-

sects, this would yield a 2500% return annually for a farmers' investment. This is only one possibility of the value in this program."

A mail ballot will be held in early October, and a 12 man board will be elected at the same time. This board will have the responsibility of developing the programs of research, promotion, and education which they believe most vital to the grain farmers and use the funds for this purpose. Any grain producer may have his name on the ballot by submitting it in writing, with the signatures of ten other grain farmers, to the Grain Sorghum Producers Association, 1212 14th Street, Lubbock, Texas 79401 by the first of September.

"It is a farmer's program, a board made up of producers, a voluntary program in that anyone may get his money back if he so desires, and it is the farmers future GSPA was concerned about when we asked for this opportunity. We believe it will pass by an overwhelming majority," Harp added.

A list of the counties involved are: Armstrong, Briscoe, Carson, Castro, Dallam, Deaf Smith, Floyd, Hale, Hansford, Hartley, Hutchinson, Moore, Oldham, Parmer, Potter, Randall, Sherman, Swisher, Bailey, Cockran, Crosby, Dawson, Gaines, Hockley, Lamb, Lubbock, Lynn, Terry, and Yoakum.

FIGHT BACK!

Fight the price/cost squeeze on your wheat with NITROMITE. Shamrock's fine brand of anhydrous ammonia. A preplant application of NITROMITE speeds early growth, producing lush, high-quality forage (and plenty of it!)—an important factor if you plan to graze cattle this winter. And the cash crop? NITROMITE delivers the most usable nitrogen per dollar to help increase yields without increasing cost appreciably. So come harvest, even if prices are low, you make out. If they're good, you'll be the big winner. Put down NITROMITE now. It'll give you a fighting chance in the marketplace.

NUMBER... I REMEMBER.....

Trapping A Coon

is a wily animal, and as a corollary, he said that many fighting dogs have been drowned before his eyes. A raccoon does not lose his wits. He is a long one, in a word, and adds in all the Chester were born in Mrs. J. J. Day in a few hundred yards

south of Blanco Canyon. The Day pasture land lay back to the north, across the canyon. In and on this canyon Jodie and Chester lived in an idyllic setting. As their lives unfolded they found themselves swimming in the limpid waters of White River, climbing craggy cliffs, exploring clefts in the canyon wall, catching rabbits and o'possums, killing skunks and snakes, trapping quail, and so on and so on. Every day was a new venture - unless dad had them in the field working. But one thing they could not do. A raccoon was just too smart to be caught.

The canyon was full of coon tracks, and a coon pelt was mighty valuable.

Opportunity Beckons So one day when they read in a catalogue put out by the St. Louis Fur Co., of a gadget they could buy for two bits and it guaranteed to trap a coon, it was too much.

Some way they got the two bits, a stamped envelope, and shortly St. Louis Fur Co. had an order. They ordered a brass cylinder several inches deep with inverted hooks at the top. They were told a coon has so much curiosity he will stick his paw into the cylinder to see what it is that shines in its depths.

When the coon starts to pull his paw out of the tube the hooks take hold, and there's your coon. The boys realized at once that it was a wonderful idea.

Following instructions carefully they set out the trap right where they found the most coon tracks, anchored it securely to a log. But next morning no coon - and the next morning and the next. Then it dawned on them. Two good, honest country boys had been cheated, taken in by a city slicker.

Used Plain Talk Jodie let them know in no uncertain terms what he thought of St. Louis Fur Co., and all the other crooks who prey on good, honest people. He demanded his money back, as guaranteed.

Promptly came a return letter. "Look at your almanac," said St. Louis Fur Co. "You set your trap in the dark of the moon. The coon couldn't see anything in your trap and had no reason to stick his paw into it. Next week will be in the light of the moon. Set out your

trap and see what happens." Dubiously the boys followed instructions. And next morning they went wild with joy. The gadget had tricked a big, fat raccoon into their hands - and they had not been city slicked. Life was sweet once more. --Homer Steen

Floydada Boy Scout Takes Look At City

By DAVID McCULLEY
Sometimes we don't think very often about how our city tax money is spent. You might say that the money goes for paving the streets or mowing right-of-ways and alleys and cleaning vacant lots. This would probably be what the majority of us would say, but there is a lot more to it than that!

There are seven departments in the city that have to operate from tax money. The administration department (office staff), police, fire, streets and alleys, parks, health (mosquito control) and airport. The above departments are made up of the General Fund, which gets its money from taxes.

Our city manager, Bill Feuerbacher, has a big part in what our city accomplishes in the way of city maintenance and management. He is a hard working man who has the ability and the initiative to get

Christian College.

Mr. and Mrs. L. N. Johnson and family spent the past week end in Childress at the Rodeo, where Shari won the barrel race, and Carlton won the calf roping. At Dumas the weekend before, this marvelous family won a household of trophies with Shari taking the barrel race; Denise the pole bending; and Carlton won the ribbon roping. Shari was named All-Around Cox Girl. Their grandfather, Carl Daniels, of Amarillo went to Dumas to the rodeo with them. We add our congratulations to the family, and are very proud of these wonderful horsemen.

Mrs. L. T. Wood left last Saturday for the Amarillo airport where she met her sister, Mrs. Lyle Haley and Len of Casper, Wyoming, who flew in to spend a week here. The group went to Tucumcari, New Mexico, to spend the night. Sunday all went to their old home places west of Nara Visa, New Mexico, where they had grown up, and found mementos of their parents' home. Sunday noon they attended the Nara Visa Community reunion, and returned home Monday. Tuesday they all went to Hollis, Okla., where they visited a 92 year old uncle, Rye Waller, and an aunt, Mrs. Barta Prock, and all spent Wednesday here. Thursday they went to Lubbock, having dinner with Mr. and Mrs. James Teague, and went to Hobbs, New Mexico to spend the night with another sister, Mrs. Buster Dunham and family, and returned home Friday.

things done. He delegates jobs that need to be done by the different maintenance crews and brings in new ideas for city improvement.

City Secretary Miss Jimmie Lou Stewart and Clerks Mrs. Gerald Hall, Mrs. Clarence Young, and summer assistant Susan Hotchkiss are kept busy with utility billing and collections, tax billing and collections, and with phone calls. They are very friendly and willing to help anyone at any time.

POLICE DEPARTMENT
Our police force made up of Chief of Police Tom Hopper and Patrolmen Frank Breed, H. O. Ginn, and Willard Patterson who are ready at all times to assist anyone who is in need of help or to assist in any emergency which occurs within our city limits.

WATER DEPARTMENT
Water and sewer superintendent, Bobby Welborn, and his crew, Harold Huggins, Bobby Tilley and Bobby Cantrell have the responsibility of getting water from the wells to the ground reservoirs, to the booster pumps, to the overhead storage tanks, then to our home water meters. They are always ready to do any repair or maintenance jobs that are necessary to keep fresh, pure water available to city residences 24 hours a day and seven days a week. They repair such things as water pipe leaks, booster pumps, and water meters. Each year Harold Higgins takes out from 100 to 200 water meters for repair or replacement, to assure accurate billing to water users. The water department men are also responsible for sewer maintenance. They keep all sewer mains clean and open and in good condition. They take care of the sewer lakes also which are east of the city and sewer lifts.

SANITATION
Sanitation Department employees (which is garbage collection) are Frank Bueno, Willie Galvan, Corley Jarrett, Frank Martinez, Ed Nichols, and Ray Nichols. They are responsible for picking up garbage twice weekly and taking it to the dump, which is approximately 28.8 tons per month. There are two men and driver for each truck and one supervisor stays at the city dump. The city now owns two new garbage trucks. This service is often taken for granted by our citizens, but plays an important role in our city's health and safety. It eliminated the need for trash burning which

would not only be a tire hazard, but would add to air pollution within the city limits. Burning is not allowed in city limits. Insects and rodents are less of a threat when garbage and trash are kept in covered containers and emptied regularly.

STREET
Our Street Department workers Billy Joe Baker, E. T. Rodriguez, plus extra summer help, Lino Garcia, and Cecil Pope keep our city streets swept and in good repair. They are responsible for grading and mowing the alleys, putting up and repairing street signs, and maintaining the airport runways and mowing.

PARKS
Walter Duvak is the man responsible for keeping the parks blocks of parks mowed and well maintained. He also trims the hedges and cleans the shrubbery beds. He is the one employee in the Parks Department.

These men are responsible for the production of electricity for Floydada. Employees are superintendent J. W. Cannon, L. C. Ferguson, Jerry Galloway (assistant superintendent), Woodie Morris, Alfred Van Hoose, and John Van

Hoose. In the Electric Department distribution section, there is also a superintendent, Mr. Roberts. He has three helpers. Wheat Acre Allotments Cut For '70

WASHINGTON — The Nixon administration announced Monday it had cut wheat acreage allotments for the 1970 crop to 45.5 million acres—the smallest on record—in an effort to head off rising surpluses of the bread grain.

The 12 per cent cut from the 51.6 million acres in effect for 1969 was announced by Agriculture Secretary Clifford M. Hardin.

It was the third straight year of acreage reductions in the government program. The national wheat allotment was 68.2 million acres in 1967, and 59.3 million in 1968.

The announcement had been expected since mid-June. Officials had said for weeks it would be announced "anytime."

Under the program, farmers would be eligible for basic price support loans of \$1.25 a bushel, plus additional payments for their share of wheat used domestically.

Except for adjustments to reflect changing prices, most of the 1970 wheat program will be the same as this year.

The acreage cut—not as deep as some government and farm officials had favored—came as U.S. wheat exports lagged far behind peaks of recent years. Exports for the year ended June 30 totaled 542 million bushels, compared with 761 million in 1967-68.

Carryover supplies rose to \$11 million bushels on July 1 compared with 539 million a year earlier.

"There are areas of hopefulness for improved wheat trade," Hardin said in a statement. "Following recent sessions of the major exporters, we are moving toward recognition of our determination to maintain the U.S. share of world wheat trade."

Hardin said, however, that "it is likely there will be an additional buildup" of wheat surplus by next July 1.

Fortenberrys Hold Reunion

The 18th annual Fortenberry reunion was held Saturday, August 9 in the American Legion Hall in Lockney. One hundred and thirty-two persons registered before the day ended.

The program began at 11 o'clock with singing of gospel numbers, reading of the 23rd Psalm and a brief memorial service for deceased family members in the past year.

A short business meeting was held during which time Eddie Fortenberry of Lockney was retained as president; Charles Higgins of Hereford, vice-president; and Mrs. Mary Dorris of Gomerco, N.M., secretary-treasurer.

The noon meal was served to some 120 persons by women of the Assembly of God Church in Floydada.

STAIN REMOVAL
Immediate action is the secret to removing picnic stains from clothing and table linens. A large number of common household stains require only a 15 minute cool water soak before clothing is machine washed with detergent.

For bleachable fabrics, chlorine bleach in the wash will remove many common stains. Remember there are many finishes now that chlorine bleach cannot be used on.

On unwashable fabrics, it is recommended to let a reliable dry-cleaner remove stains. Be sure to tell the dry cleaner what caused the stain as well as the fiber content of the garment.

Here are some tips on the most common picnic stains and their treatment:

Soft drinks — sponge immediately with cool water. If stain is not completely removed, soak in cool water and work detergent into stain, then rinse.

Coffee and tea — soak in cool water for about 30 minutes and wash in detergent suds. If stains remain, use one tablespoon of chlorine bleach to one quart of water. Soak 15 minutes and rinse.

Grease, oil and fat — soak white fabrics in hot detergent water and rinse. Rub liquid detergent into stains on man-made fabrics and dark cottons. Let stand briefly, wash and rinse.

Ice cream — remove excess from fabric. Soak in cold water. Wash in hot detergent suds.

Meat juices — soak in cold salt water. For stubborn stains, soak in ammonia and water solution until clear. Wash and rinse. Substitute peroxide for ammonia in non-colorfast washables.

Hodge Family Reunion Held In Lubbock

The sixth annual reunion of the descendants of the late Mr. and Mrs. G. T. and Lula Hodge was held Sunday, August 10, at the Mackenzie Terrace Party House in Lubbock.

A bountiful basket lunch was served at the noon hour and group pictures were made of those attending.

After lunch a business meeting was held, with the president, H. B. Barnett, presiding and Mrs. Bulah Reeves as secretary-treasurer. The secretary read the minutes of the last meeting, and gave the treasurer's report. Both were re-elected to their respective offices.

During the business meeting it was decided that the reunion be held annually at the Mack-

NEED THE WATER TO BUILD THE DAM?
The right to develop the water shed was issued to the involved four towns by the Texas water board. These rights will expire on October 26, 1969, State Representative, Ralph Wayne, was in Tulia recently and told Don Crocker, Manager of the Tulia Chamber of Commerce, that it was up to the voters now. He said it has been

four years since we asked the Texas Water Board for these water rights. We went back once and asked for an extension. What argument would we have in going back and asking for another extension?
The Tule water shed runs into the Red River, the Red River runs into Oklahoma, and the cities in the Dallas area are asking Oklahoma now for the water drainage from the Tex-

as area. Dallas would be glad to have this extra water for future growth. If they have faith in the future, why shouldn't we?
Lubbock also expects to outgrow their water allocation from the Meredith Lake. Engineers tell Lubbock that they cannot expect to store a large quantity of water in the Yellow House Canyon, simply because it won't hold water. Na-

turally, they are looking for additional water supply for the future.
So if we wait until our underground water supply runs out, more than likely the water rights, and the engineering data for the proposed Mackenzie Water Shed will be in use by someone else...

COUNTY AGENT'S CORNER
by Joe Wilson

So far no poisonous spiders have been identified here in Floyd County.
One of the spiders that caused a great deal of concern two weeks ago was identified as a member of the jumping spider family and is non poisonous. Its markings were similar to the Brown Recluse which is very poisonous and recently has been found in the southwest especially in the Lovington-Carlsbad, New Mexico area.
Many spiders have been turned in to the county agent's office by The Hesperian and individuals in the county and those that are anywhere close to the description of the Brown Recluse are sent to a qualified entomologist for positive identification. So far all reports have been good as none have been poisonous.

Most spiders can bite but they have no venom. Some people are allergic to their bites such as some people are allergic to ant or wasp stings. It might be a good idea if bitten by a spider to check with your family doctor.
The Brown Recluse is a small spider with the body being about 3/10 to 1/2 inch in diameter and varies from an orange yellow to dark brown or almost black. The body is covered with thin hairs. The legs are long and somewhat darker than the body, being well covered with short hairs.
Probably the most distinguishing characteristics are the presence of three pairs of eyes arranged in a semicircle on the forehead of the head and guitar or violin-shaped markings immediately behind the semicircle of eyes with a distinct short median groove forming the neck of the guitar.
Because of the violin shape the spider is often called the

"Violin spider."
If any spiders are identified as poisonous the public will be notified through mass media means.

FLAVORFUL WATERMELON
In France they "melon d'eau," in China "si-kwa." Arabs refer to it as "bot-tikh," and if you can speak Sanskrit, you ask for "chaya pula" at your local grocery.
What is it? It's that old Southern favorite - watermelon! No matter what you call it, people all over the world enjoy delicious juicy watermelon.
And no wonder - the entire watermelon has eating potential. The rind is popular made into relishes and pickles. The seeds can be roasted to a crisp goodness, and added to green salads (at the last minute) for a unique flavor. White-fleshed "citron" watermelons provide citron for making preserves and sweet pickles.
Some 92 percent water, pleasantly sweet, with just enough "meat" to bite into, a well-cooled watermelon can't be beat on a warm day. Iced, on the rocks, pureed, frozen, or simply chilled and cut - Americans are finding scrumptious ways of using watermelon to refresh hot summer days. Now's the time to do it, too, while the U. S. Department of Agriculture's Consumer and Marketing Service reports plentiful supplies of watermelons.
Try some of these summer treats to quench your thirst for something icy cold and delicious.

WATERMELON ICE
Cubes of Watermelon
1 quart watermelon juice
1/8 teaspoon salt
3/4 cup sugar
Lemon Juice (from 1 lemon)
Chill cubes of watermelon until icy cold. Combine watermelon juice (easily extracted from ripe melon) with salt, sugar and juice from one lemon. Pour this mixture into refrigerator trays and place in freezer until a soft, icy firmness forms. To serve, place four or five chilled melon cubes in a clear sherbet glass and add lofty peaks of the watermelon ice. Garnish with a sprig of fresh mint or a twist of lemon. For a delightful refreshment to serve at your next party, fix SPARKLING PUNCH IN ITS OWN SHELL.
6 oz. can pineapple juice frozen concentrate
6 oz. can orange juice frozen concentrate
6 oz. can lemonade frozen concentrate
10 cups water
1 quart ginger ale
Watermelon balls
Combine fruit juices and water; mix well. To make melon shell to serve the punch in, slice one end of melon several inches from end. Scoop out the larger part to form the shell. Level off the shell end so the melon can stand upright. Mix half of the fruit juice mixture with half the ginger ale. Pour into shell, add ice cubes and melon balls. Serve immediately. Mix remaining fruit juice and ginger ale as needed. Makes 32, 1/2 cup servings.
An idea keyed perfectly to a summer party is a festive watermelon boat piled high with melon balls and berries and served with iced tea as an appetizing salad while the steaks or spare ribs are still on the grill.

is easy to fix, yet will be the highlight of any summer menu -

Boys Ranch Rodeo Labor Day

The boys at Cal Farley's Boys Ranch are expecting a new record attendance for their 25th annual Boys Ranch Rodeo during the two performances that will be held over the Labor Day weekend, August 31 and September 1.

All of the Ranch's 348 boys will have a part in the rodeo with more than 100 riding professional rodeo animals under R.C.A. rules. Top honors will go to the Senior and Junior All-Around Cowboys with trophies also awarded to boys with the best rides on bucking broncs, Brahma bulls, steers, calves and stick horses.

Boys not competing in the rodeo arena will have jobs as ushers, chute helpers, concession helpers, or working at some assignment necessary to the rodeo's production. Making their first rodeo appearance will be members of the Boys Ranch band under the direction of Richard K. Amarillo Public School.

For rodeo fans to enjoy a picnic, barbecue beef sandwiches prepared and served. The barbecue is expected to be one of the most attractions of the rodeo.

The only outside party in the rodeo will be the Grand Entry of the Ranch Rodeo is one of its traditions.

Dr. and Mrs. J. M. Ryman Jr. and four of the children, of Hubbard, and Mr. and Mrs. Don Clark Green and Donnie of Big Spring visited their parents and grandparents, the J. E. Greens, Sunday. All attended church at Calvary Baptist, then dined in the Green home. The Ryman's were on their way to points in New Mexico to spend a few days vacation.
