## Caprock Chat

By Wendell Tooley

EVERY HOPE that every member of the Floydada Company will be present at the annual meeting . . . I can't think of anything that you have to do that is more important than working for more industry.

A GOOD industry prospect now that will bring over Floydada to work, but one of their requests is that county taxes for ten years. Wonder what the taxpayers court would say to that?

Howard Gregory and I are trying to work out a bucket brigade out our way in case one of our house. Anyone want to join our country fire department you country folk forgot, your city fire department stopped at midnight September 30, 1969.

With the Whirlwinds to beat Lockney. . . figure we about 28 to 14. Agreed, that Lockney would rather than any team. . . however, Floydada has quite a Lockney also.

Looking at the stack of tax bills we have received from the county, school and city and remarked "all these taxes are getting almost intolerable." "The habit of looking at everything optimistically," she replies, "yes, taxes are high, but I another country I would rather live in . . . do you?" "Well her. . . but she is probably right."

NEXT APRIL . . . there'll be a mighty long line of people to get that little inspection sticker put on their auto before the deadline. "I'm in the garage for repair the other day and the man said, 'we better put next year's inspection sticker on them in.'" "The fireman is on the ball . . . he's trying to avoid that."

KNOW less about the oil and gas business than any industry. I know that my autos take a lot of gas and my house is heated with natural gas. I understand wells pay off better than oil wells for the land owner.

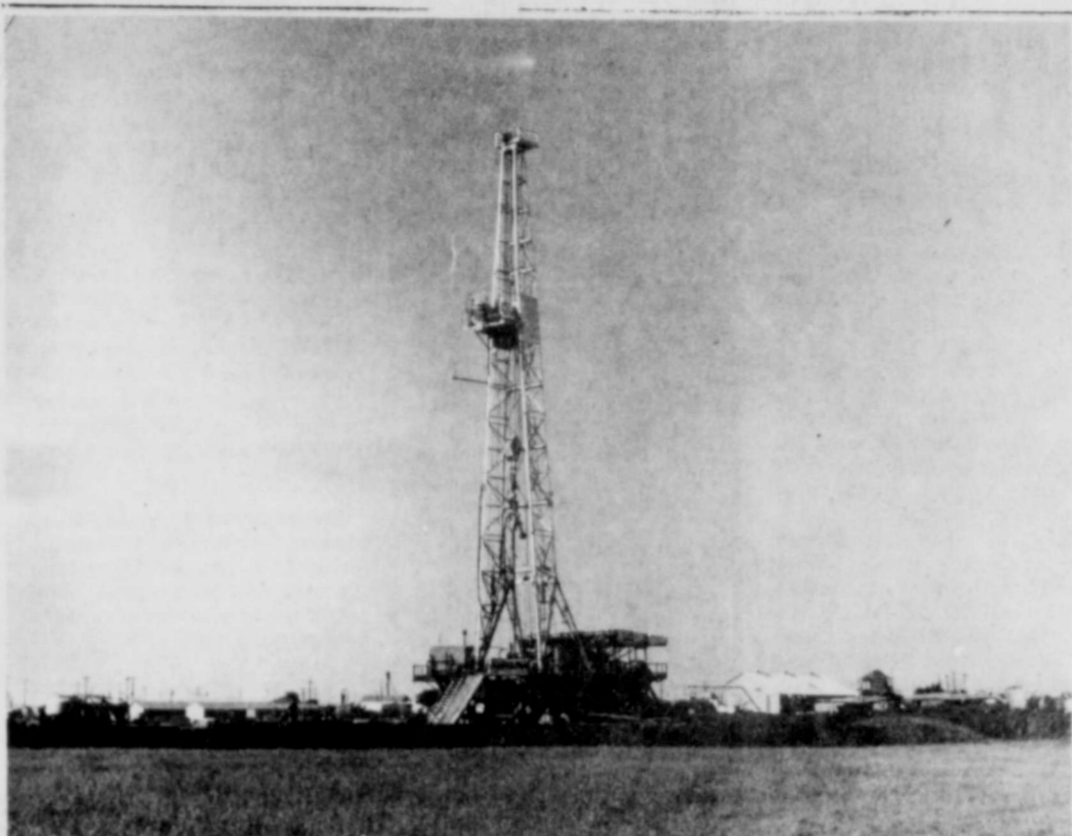

The oil business is a well controlled business. . . supply and demand pretty well set according to what the cheapest oil storage is in the ground. Companies plan their wildcaters around a need to pay income tax purposes. . . some of course never results of a wildcat well until they are ready to develop a need for more production.

Bob Ross is a nice fellow, and has been very helpful with us here at the newspaper. However, the three listed in Floyd County at this time are classified "wildcat." This means that about all you can report is the location and expected depth of drilling. "I don't know much oil production can be developed in Floyd County at the meantime we appreciate having Bob and industry people in here."

Most enthusiastic football contest entries each week. I understand Wiley got his entry filled out and lying on his desk. One of his "buddies" wrote his name on the entry and turned it in. I will be watching the winner's announcement very soon. SEE CAPROCK, PAGE 7

# County Football Championship At Stake Here Friday Night

## Wester Field Expected To "Run Over" With Fans

"Lockney would rather beat Floydada than the Green Bay Packers" is an often heard expression around here, and Wester Field is expected to literally run over Friday night as fans from both Lockney and Floydada flock in for the big contest. It's a conference game for both teams and kick-off time is 7:30 p.m.

All year long Lockney has lived with the idea they should have won last year. . . and they had last year's game won until less than three minutes of time was left. A strong Whirlwind defensive team made a safety and the Whirlwinds brought home the county championship.

Lockney is impressive this year with a 3-1 record, having defeated Kladou, Ralls, and Crosbyton. For comparison, however, Floydada defeated the Post Antelopes, the team that defeated Lockney.

In pre-season forecasts by the Texas Football magazine Lockney was picked to come in second to Dimmitt. . . Floydada third.

Last week Lockney used long, explosive runs to defeat Kladou 34-8.

Lockney's Tracy Dickson and Robert Duckworth have been making 80 to 95 yard runs as they make fast breaks with a line that is moving out also.

Gary Mangold is also a good ball carrier and kicker. Quarterback Larry Glasscock is an average passer, weighs 154 and like all the Lockney backfield is an experienced senior. . . he also carries the ball.

The backfield is one of the fastest in the district; the line will average 170.

Between halfbacks Duckworth and Dickson will be 165 pound sophomore Charlie Mathis. Seniors Julian Gonzales and Tim Jeffers are two of the best ends in the district.

On the offensive line will be

senior Raymond Sterling (173), senior Dickie Lambert (165), junior Terry Howard (160), senior Tommy Hulcy (175), junior Jim Martin (185).

Big Mike Burk received a knee injury in the Hale Center contest last week, but might be able to go in the Lockney game. Quarterback Jack Gregory, who

## 1969 Whirlwind Yearbook Gets Top Rating

The 1969 Whirlwind yearbook received the top rating as honor book this fall at Texas Tech. This outstanding rating is given to those yearbooks which excel in copy, picture quality and layouts.

To qualify for honor book a AA school must have 1,450 points. The judges praised the Whirlwind on its personality section, its excellent end-credits, superior advertisement section, basic idea, pictorial coverage of activities and organizations, class portraits, senior achievement sections, coverage of student life, and a public relation medium.

The 1969 Whirlwind is one of the first FHA yearbooks to receive this honor.

If anyone is interested, there are extra yearbooks available to buy.

## Salvation Army Fund Campaign Begins October 14

This year's Salvation Army fund raising campaign will begin next Tuesday, October 14. The captains and workers will meet for a luncheon at the First United Methodist Church at 12 noon. Following the luncheon, instructions will be given, and a film "Blood and Fire" will be shown. It is a new film just recently produced, and portraying the marvelous work being done by the Salvation Army.

There is no goal set for the campaign this year in terms of dollars and cents. The goal is that every person in Floydada and surrounding communi-

ties be given an opportunity to give to this most worthwhile charitable organization. Few, if any, organizations do the good work the Army does in the unselfish spirit which is its nature. Anyone may turn to it with no credentials except that of need, and be helped. The Army also has the lowest rate of administrative costs averaging between 6 and 7% of funds received for that purpose.

Jake Webb is serving as chairman of Special Gifts; Gayle Baucum as chairman of the Rural areas, and Rev. C. B. Malton as General chairman of

the campaign. The following are serving as team captains: Rev. Floyd Bradley, Rev. DeWayne Grimes, Tommy Assiter, Louis Anderson, Wilson Bond, Carl Benton, Lorin Leibfried, Jimmy Willson, and George Miller. Rural team captains, and all workers will be listed next week.

"Our deepest gratitude is expressed for the fine sentiment toward the Salvation Army that exists in the hearts of the people of this area, and for their indicated continued support of the campaign this year," Rev. Malton said.

## It's National 4 H Week

"Involvement" is a term heard a lot these days. Also "demonstration." Many of today's headlines involve youths who demonstrate. This week, October 5-11, will see more headlines about youngsters who ARE involved and who DO demonstrate for what they believe in: 4-H.

This is National 4-H week. It is observed by more than 3 million boys and girls from 9 to 10 years of age, and some 26 million men and women in every state in the nation.

Of this 3 million youngsters in the United States, over 100,000 Texas youth will observe the week. The theme this year is "4-H: Opportunity for all." Emphasis will be on 4-H benefits being available to boys and girls of all cultural, racial and economic backgrounds. The 4-H program of today has changed greatly from the so called

"cow program" image of twenty years ago. Just a few of the projects offered now are public affairs, emergency preparedness, career exploration, leadership, town and country business, garden and forestry. These projects are designed to appeal to both rural and urban youngsters. Of the 3 million 4-H'ers in the United States, 35% come from farm homes, 33% from rural non-farm homes, and 32% from towns, cities and suburbs. Therefore, one can readily see that the 4-H program must be broad enough to encompass the different types of people it comes in contact with.

The 4-H program in Floyd County is basically agriculture and home economics. This is easily understood because of the fact that approximately 90% of the 4-H members come from

## New Surgeon Opens Office In Caprock Hospital Monday

Dr. John W. Haenosh opens his offices in the Caprock Hospital here Monday. The Haenosh family has moved into the Ray Johnson home on the Ralls Highway and the two Haenosh girls have entered Floydada schools.

Dr. Haenosh will return from California this weekend where he has been attending a meeting of the American College of Surgeons. He is also purchasing equipment for orthopedic surgery.

Dr. Haenosh will be in general surgery and will be performing caesarian births.

EMERGENCIES  
He can take care of any emergency that might occur, he has five years surgical residency which includes two years

of special traumatology work, and can also perform all bone fracture operations.

Traumatology includes all sorts of body injuries.

"We at Caprock Hospital feel that with the addition of Dr. Haenosh and the excellent facilities of our hospital including surgery, X-ray, laboratory equipment we can take care of people all over this area of Texas who heretofore have had to travel to Lubbock," hospital administrator Barney Barnett told a Hesperian reporter yesterday.

BLOOD BANK  
It was also reported yesterday that the Floydada Lions Club is working on a plan for the availability of a walking blood bank.

## "Many roads leave Floydada, if you don't like it here"

"I have lived in Floydada 42 years because I like it here. . . and I told a fellow who was always unhappy with Floydada downtown one day that if he didn't like it here, there were several roads leading out of Floydada." This expression of love for Floydada was made to a Hesperian reporter this week by W. H. "Jenks" Jenkins, who will celebrate his 93rd birthday at the Floydada Nursing Home today.

When asked what he attributed his long life. . . Jenks replied, "living right and staying off the bottle." Jenks does enjoy his Roi-Tan cigars, and says that cigarettes are too high to smoke.

He enjoys walking every day and has been known to walk all the way to town just for a good bowl of chili.

He remembers a life of hard work which included farming, ginning, working in a hardware store, grocery store, sawmills, he has worked horses, oxen, built the gin at Estacado in 1926.

"I really enjoyed farming,

always enjoyed working and making a living and if it hadn't been for the drought and boll weevils, I'd probably still be farming in Oklahoma," Jenks continued.

When he first married and started farming he had half interest in 120 acres of corn and 50 acres of oats. He remembers pulling bolls with Mrs. Charlie Huckabay and Mrs. Roy Patton many years ago.

He drove a truck for five years, prefers to drive Dodge trucks, and has visited 42 different states.

Jenks was born in Howe, Texas, October 9, 1876. He has six living children, two live in Lubbock, one in Tucumcari, New Mexico and three in California. His wife died in 1945.

He has 14 living grandchildren and 13 living great grandchildren.

He has lived in the nursing home three years.

Mildred Parnell, administrator of the Floydada Nursing Home reports that Jenks is

pretty popular around the home, always gets extra copies of The Hesperian to take to the

room of his friends, likes to take long walks, and listens to his radio.

## Mahon Continues Efforts To Import Water Into Texas

Representative George Mahon advises that the House of Representatives in Washington has approved the sum of \$1 million for the continuation of the study to import water into Texas, particularly into West Texas. This item is contained in the annual appropriation bill for Public Works.

The current study seeks to answer the question of whether surplus water is available from the lower Mississippi River and whether it is economical to transport such surplus water into Texas.

The study was initiated in 1966 at Mahon's request and is a joint effort of the Corps of Engineers and the Bureau of Reclamation. About \$2.1 million has been made available to these agencies prior to this week's action by the House of Representatives. The study is scheduled to be completed by 1972 and will require about \$2 million additional funding in the next two years.

If the results of the current study are favorable, legislative authorization will be required to proceed with the project. Mahon emphasized that this is an extremely long-range and expensive undertaking but he expressed his confidence that the proper steps were being taken at this time to move the project forward.

Also contained in this same appropriation measure from Mahon's Committee is initial funding in the amount of \$500,000 for a comprehensive study of the lower Mississippi Valley. This \$1.3 million study is to appraise the overall land and water resource needs of the area and has a very significant relationship to the Texas water import study.

## Mahon Continues Efforts To Import Water Into Texas

Representative George Mahon advises that the House of Representatives in Washington has approved the sum of \$1 million for the continuation of the study to import water into Texas, particularly into West Texas. This item is contained in the annual appropriation bill for Public Works.

The current study seeks to answer the question of whether surplus water is available from the lower Mississippi River and whether it is economical to transport such surplus water into Texas.

The study was initiated in 1966 at Mahon's request and is a joint effort of the Corps of Engineers and the Bureau of Reclamation. About \$2.1 million has been made available to these agencies prior to this week's action by the House of Representatives. The study is scheduled to be completed by 1972 and will require about \$2 million additional funding in the next two years.

If the results of the current study are favorable, legislative authorization will be required to proceed with the project. Mahon emphasized that this is an extremely long-range and expensive undertaking but he expressed his confidence that the proper steps were being taken at this time to move the project forward.

Also contained in this same appropriation measure from Mahon's Committee is initial funding in the amount of \$500,000 for a comprehensive study of the lower Mississippi Valley. This \$1.3 million study is to appraise the overall land and water resource needs of the area and has a very significant relationship to the Texas water import study.

## WEATHERMEN are predicting a 50 percent chance of the first frost in Floyd County October 31st. That's Halloween night. We had a first frost Oct. 15, 1966; Oct. 31, 1967; and Nov. 9, 1968. Wouldn't surprise me at all if we got one this year earlier than the last part of the month.

## DANNY called Monday night after reading the Hesperian and said "Mother that was a real good article you wrote on the need of a playground in Floydada". I also received several local comments on the article and a number of mothers informed me they agree that most of our problems with local youngsters is due to "nothing to do" in Floydada. The only thing, they are like me, where to start and how? Anyway I got their backing 100 percent.

## OUR new surgeon and his family have arrived in Floydada and are getting settled in the Ray Johnson home. Dr. Hanosh will open his office in Caprock Hospital Monday. Speaking of the hospital I understand they are establishing a medical library there and also plan to have a walking blood bank. When this materializes and along with our general surgeon, who is also a specialist in traumatologist (I think that is right) then our hospital will be equal to the big city hospitals.

## ROBERT Duckworth of the Lockney Longhorns holds the record for the longest touchdown run from scrimmage this season. The youngster ran 99 yards against Malou last Friday night and in the same game Tracy Dickson of Lockney, ran the longest kick-off return, 86 yards. These two, along with the other strong Lockney football boys, will bear plenty of watching Friday night by the mean greens of Floydada, who I'm sure, will be expecting plays of this sort and will be doing their utmost to stop the Longhorns.

## FLORA McNeill has chartered a TMC bus from Lubbock for the Floydada-Friona game. Anyone wishing to make the trip by bus, should contact her at 3-3391. She is selling tickets for the trip on a first come-first serve basis.

### ... I REMEMBER

#### Service Problems

some confusion in both high and low registers. The Local Board had to classify them and say which and when. Naturally, just reading a manual, they got into a "jackpot" the first rattle out of the box.

As I recall it now the first call was for 56 men. The board called up several more registrants than that to be sure to have enough manpower to fill the draft. They were to fill out a questionnaire. This questionnaire, when completed, revealed everything the board needed to know about a man's relation to family and community.

**THEIR FACES WERE RED**

Selective calls worked then because the people thought it was as simple and as fair as could be made. The board's dilemma came the very next day after they sent out their notices. For when the scores of men showed up the board's mountain of supplies contained no questionnaire forms - well, yes, one, a sample.

Nearly all the men had friends and relatives with them and as the crowds milled the red-faced amateur officials had to tell registrants they did not have the blanks. A blast from one or two prominent local men added to their embarrassment.

**WE HAD TROUBLE, TOO**

The board's troubles at once became a pressing problem at The Hesperian office. We got an order for many pages of fine print and tabular forms, for which we were ill equipped, and urgent demand not to "spare the horses." Fifty-two hours and some minutes round the clock later we finished the work for them. We were red-eyed and groggy when it was over.

Later we learned the Selective Service Committee had no authority to pledge govern-

ment's credit for printed forms. But by that time there were other dilemmas, other problems.

And in all those years that followed until just last week it had not occurred to me that The Hesperian 'ought to sue the government for our money.' Homer Steen

closely this week.

**JAKE WEBB** says he has trouble on some of the contests listed each week. . . like Loop and Cotton Center. Can you imagine anyone having trouble on games like this. I suppose everyone has been to Loop and Cotton Center. . . I have.

**IN A FEW DAYS** Riley Holmes should receive another hole-in-one trophy, then I want to get his picture with three such trophies.

Very few people ever make a hole-in-one in this sport of golf. . . Riley just seems to have a knack of driving that ball into the cup on the first swing of the club.

On June 9 and December 4 of 1964 he made hole-in-ones on number two out at the country club. Last week he made another hole-in-one on number eight. Believe he made it with a number four iron. Witnesses include George McAllister, Gene Collins and Glen White.

Congratulations Riley. . . call me when that trophy comes in.

**ALL YOU FOOTBALL FANS** don't forget the Quarterback Club meeting Monday night at the high school. There'll be some whirlwind films to view and of course refreshments.

Here's a good chance to visit with the coaches, a chance to get some "inside info" on the team, an opportunity for both men and women fans.

**THE OIL COMPANY** that has caused all the excitement in Floyd County sorta figured out how things go here. . . what Floydada gets, Lockney is also supposed to share. . . so, they have given both towns an oil wildcatter. . . how's that for playing fair?

**60 MILLION OWN CO-OPS**

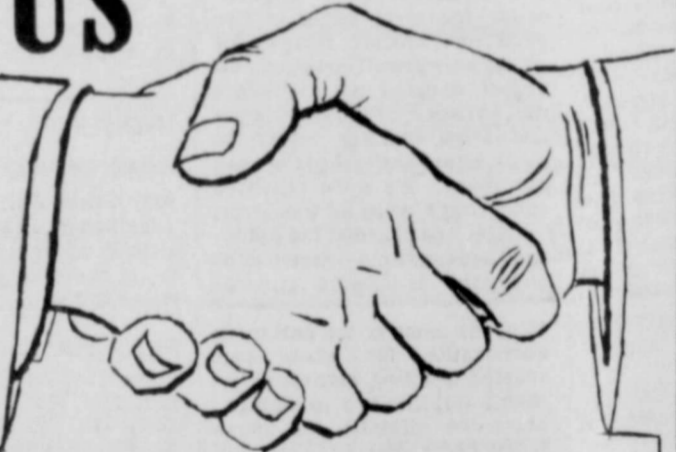

More than 60 million Americans share ownership in cooperatives. City, town, and rural people use these co-ops to get housing, food, health care, credit, insurance, drugs, furniture, and petroleum products. Rural people use cooperatives to get ginning, elevator, fuel, electricity and telephone service, chemicals, and steel products. All of this cooperative business totals \$20 billion dollars a year.

Business men also use cooperatives to serve their special needs — druggists, grocers, hardwaremen, clothiers, and other independent merchants. Associated Press, the world-wide news gathering agency, is a publishers' cooperative.

The distinctive mark of a co-op is that it serves the people who own it: its customers. It's locally-owned, not-for-profit, serving its member-owners at approximate cost. They have a voice in determining the quality of goods and services they get and the prices they pay through their co-ops.

In cooperatives, 60 million persons participate more fully in this country's free enterprise system. They find it a good way to get things done.

# Whirlwinds Twist Hale Center Owls 27-0

## Loaded By Penalties, Fumbles

Floydada stretched their lead to 4-0 at Hale Center Friday night as they won 27-0 in their home game. The game was filled with many penalties for the Owls and many passes with interceptions. Quarterback Jack Selman was on the sidelines with a sprained leg from the game and the quarterback who replaced him, Kirby Pierce, threw the 'Winds' into the end zone. Fullback Frank Watson made two touchdowns and Selman scampered for an 11 yard TD. Watson made a two yard TD in the first quarter, found Selman for a yard away from the end zone, and capped the game with a two yard TD in the final period. The game was followed by Greg Selman's conversions by Greg Selman. Like Burk accounted for the Whirlwind conversion. Selman's deepest penalty was to the eight yard line. ## Sammy Hale Wins Football Contest

Three contestants missed only two games in last week's football contest and the tie breaker Floydada-Hale Center game was used to determine the winners. Sammy Hale missed the Tech-Oklahoma, Monterey-Coronado games and picked Floydada to win on the tie breaker with a total score of 40. The total score was 27. He receives the first place \$7.50. In second place is Ina Lewis who missed the Army-Texas A&M, Lorenzo-New Deal games and guessed the tie breaker at 46 points. She will receive the \$5.00 second place prize. In third place is McCoy's Dan Fry, who missed the Hart-Vega, Lorenzo-New Deal game and picked the total score on the tie breaker game at 49. Hale was one of the very few contestants to correctly pick the Lorenzo-New Deal upset. Contestants who missed only three games include Frances Hamright and Bill Hendrix. Contestants who missed only four games include Tex Morren, Barbara Goen, Gail Hick-

erson, Mrs. Freddie Morren, David Battey, Bud Goen and Miles Davis. As you can see this week's winners included many of the fairer sex... Fellows, this could get embarrassing.

**Israel Described By Son Of Local Woman**

son of Mrs. Elva Reeves, con-  
four years in Israel .....

I would run one of their combines. I got the job,  
over the responsibility of the harvest. They told  
me to cut first. We cut near the battle zone first, and  
the army camp then we cut the rest.

They lasted six days, but they would not release the  
combine until the eighth day, so I stayed on the combine until the  
eighth day, so I stayed on the combine until the eighth day,

and injured, the other one went off.  
Well, this sort of thing goes on all the time. I won't tell about  
all the times we met with close calls like this, but would like to  
tell one more.

It happened when we were in Elite. It was about 4 in the morn-  
ing. I was up drinking a cup of coffee. I heard a big explosion out  
side. I looked out the window and I could see them firing on us  
from over at Jordan. We were just about two miles from the  
border. I didn't know what they were using. I thought it was  
heavy artillery and if it was, we would be safe behind the  
thick walls unless it was a direct hit.

I found out later it was rickets. I watched it all from my win-  
dow. I could see the fire when they would fire one, then a few  
seconds later you would hear a whistling sound, and then a big  
explosion. Well, this went on for quite a while. I kept waiting  
for the Israelis to open fire since they do have a big Army  
camp there, but they never did.

Along about sun-up I saw two jets come from the north and they  
went right over where I saw the fire come from, and I wasn't  
close enough to see the bombs fall from the planes, but I saw  
smoke come up from the ground, and I heard some light machine  
gun fire, and it was all over. I heard later that eight people  
were killed over on the Jordan side.

The rickets fell all around us but none of my family was hurt,  
however some of the Israelis were injured, but I never did learn  
the casualties. One of the rockets that fell close to our house  
fell in a lumber pile and it broke 2 x 4's into pieces like match  
sticks. We had lots of close calls like this but nothing grieved  
me so much as did the loss of my Gospel records when we left  
the U.S. I gave my records away with the idea in mind that I  
could replace them after I arrived in Israel.

Daily necessities ruled out a record player. The economy is  
nowhere near that of the U.S., and most Israelis know it. I  
talked to so many young men there that wanted to come to  
America. Some of them seem to think that apples grow in boxes  
over here, and if they could just get here all their problems  
would be solved.

I tried to tell them that America is a great country, but it didn't  
n't happen by accident. I didn't want to tear down their dream,  
but I did tell them they would meet a lot of complications, among  
a few other things. CONTINUED NEXT WEEK

**NEWS FOR  
HOMEMAKERS**  
by Sherry Mullin  
Floyd County H. D. Agent

Want something different in  
flavor and versatility? Look to  
rolled wheat. Right now the  
U.S. Department of Agriculture  
makes this highly nutritious  
food available to needy folks ac-  
ross the nation. But it's show-  
ing up, more and more, at  
neighborhood grocery stores, too.

Rolled wheat is much like  
its familiar counterpart, rolled  
oats, but of a slightly darker  
color. Processing techniques  
are much the same.

Rolled wheat is a good source  
of natural B vitamins and also  
furnishes goodly amounts of  
iron and other minerals, as well  
as food energy. Its nutty wheat  
taste provides an interesting  
flavor, too.

This whole-grain product  
serves as a hot cereal, ei-  
ther quick-cooking or regular.  
It also supplies the homemaker  
with a replacement for rolled  
oats in baked products like  
cookies, bread, rolls, pancakes  
and muffins, or as an extender  
in meat loaves and meat pat-  
ties.

Try "wheatmeal" for break-  
fast. You make it almost like  
you would oatmeal. For four  
servings, USDA suggests using  
2 cups rolled wheat, 4 cups  
water and 1 teaspoon salt. Boil  
3 minutes for quick-cooking and  
8 minutes for the regular form.  
Stir occasionally. Let stand,  
with pan covered, for a few  
minutes before serving.

Cookies on your kids and see if  
they don't become a favorite.  
1/2 cup sifted flour  
1/3 cup sugar  
1/2 teaspoon salt  
1 teaspoon baking powder  
1/4 teaspoon cinnamon  
1 1/2 cups rolled wheat  
1/2 cup raisins  
1 slightly beaten egg  
1/2 cup milk  
1/2 teaspoon flavoring  
1/4 cup melted fat or oil  
Sift together flour, sugar,  
salt, baking powder and cinnam-  
on. Mix in rolled wheat and  
raisins. Combine egg, milk,  
flavoring and fat, and add to  
first mixture. Stir only until  
ingredients are moistened.  
Drop dough by teaspoonfuls onto  
greased baking sheets. Bake at  
375 degrees F. (moderate oven)  
about 20 minutes. Makes about  
3 dozen cookies.
