He adds that farm and ranch families constitute only about five per cent of the United States' total population. Strong organization is needed if agriculture is to promote and preserve its place in our economy, Farm Bureau officials point out.

Paradoxically, while one farm worker today provides food for 45 persons, compared with only half that many a dozen years ago, agriculture's efficiency has created problems for producers.

"Because of the agricultural abundance, prices for farm products have not risen

nearly as much as prices farmers must pay for production and family living items. This cost-price squeeze hurts," Mosley points out.

Farm Bureau is now being reconstructed by asking the opinions of county members, and using such ideas as stepping stones toward advancing agriculture to its proper position. Now is the time for you to express your ideas and plans to add strength to a strong voice of agriculture, FB leaders emphasize.

Farm and ranch operators will be contacted by Farm Bureau members during the membership campaign.

## Whirlettes End Season With Win

In the final game of the year, played in Abernathy Friday, the Whirlettes closed the season by defeating Abernathy, 49-46.

At one time in the second quarter, the Whirlettes led by 13 points, and the halftime score was 28-19 Floydada. Abernathy came alive in the third

quarter and outscored the Whirlettes 16-6 to take a 53-34 lead going into the fourth quarter. The Whirlettes scored 15 while Abernathy managed only 11 in the fourth quarter.

Terri Shipman again led the Floydada scoring. She had 29 points and Denise Chadwick added 13. Kathy Chappell collected eight rebounds and four steals for the Whirlette defense.

The Whirlettes had a good year. The team had lost five starters off last year's team and their overall size was small. The Whirlettes showed a great deal of heart and a tremendous amount of desire during the season. The season record was 15 wins and 12 losses and the district record was 5-5 for a third place finish behind Friona and Dimmitt.

The JV Whirlettes finished the season with a record of 6-12, losing to Abernathy Friday in the finale 35-29. Janette Conwright had 11 points and Rhonda Jackson 10 for Floydada.

### Junior High Girls Split With Abernathy

Floydada Junior High's seventh grade girls lost a close one to Abernathy Monday, 24-23. Debbie Johnson led the seventh grade Breezettes in scoring with eight points.

Although they lost the last game, the seventh girls are district champions with a 6-2 district record and a 14-2 season mark.

Although they didn't have a winning season record, the eighth grade girls finished the basketball year in grand style with a 30-14 victory over Abernathy. Linda Norman scored 19 points for the Floydada girls and Carol Cozby grabbed 10 rebounds.

Their district record was 2-6 and their season record 5-12.

These members are Jill Wheeler - 2 Hampshire Barrows; Greg Bishop - 2 Hampshire Barrows; and Danny Wheeler - 1 Crossbred barrow.

Three members of the Floydada FFA Chapter have also entered livestock in the Houston Livestock Show as follows: Mike Simpson - 2 barrows; Danny Wheeler - 1 barrow; Frank Watson - 1 barrow.

The Houston show is the largest livestock show in the world, and this year entry figures and premium money are expected to exceed all previous years. Last year's 17,756 livestock entries set a record. Classes are provided for 9 beef breeds, 4 dairy breeds, 5 swine breeds, 11 sheep breeds, 5 horse breeds, 5 rabbit breeds, 22 poultry

breeds and Angora goats.

Among other programs benefiting youth on a statewide basis are the scholarship and research programs. The Houston Livestock Show and Rodeo annually presents scholarships to outstanding FFA and 4-H Club members in the amount of \$4,000 each. More than 40 students are currently attending college on scholarships provided by this non-profit civic event.

The research program was established in 1970 by the show to be conducted in nine Texas agricultural colleges. Much of the work is done by students, thus providing jobs for those college students who need to work.

The knowledge shared through this \$100,000 research program directly benefits Texas as an agri-business.

Dates for the 1971 Houston Show are February 24 through March 7, with the first two days set aside solely for livestock judging and sales.

The rodeo will open on February 26 with Johnny Cash headlining matinee and evening performances on February 26, 27 and 28; B. J. Thomas will appear at evening performances on March 1, 2, 3 and 4 and Glen Campbell stars at the evening performance March 5 and the matinee and evening performances March 6 and 7.

Tickets may be obtained by writing the Houston Livestock Show and Rodeo, P. O. Box 20070, Houston, Texas 77025.

#### Postal Rate Hike Plan Faulty

A number of serious flaws are evident in the U. S. Postal Service's plans for rate increases to become effective in May. For one thing, the postal card rate would rise from the present 5 cents to 7 cents while the first-class rate jumps from 6 cents to 8 cents. This would perpetuate the old foolishness under which the non-private postal card is fancied to be worth only a cent less than private first-class.

More importantly, the charge for second-class mail, used by newspapers and magazines, would be doubled, while rates for third class, largely "junk mail," would go up only one-third.

The Postal Service, correctly, is expecting strong objections from publishers, many of whom are in financial difficulties caused by high labor and materials costs. Publishers, faced with mail rate increases of a tremendous 142 per cent, to be reached within five years, should be joined by the reading public in wondering what happened to the long-established tradition that an informed citizenry is very much worth special rates to encourage dissemination of information.

That was Congress' intention in setting second-class rates in the first place. Also, Congress traditionally considered good postal service to be worth subsidization by the taxpayers. Now, the public is "assured" that sharp increases in rates will mean no improvement in steadily deteriorating service, and possibly even worse deterioration.

If the taxpayers were consulted, they'd probably vote overwhelmingly for the spending of enough of their money to produce decent mail service.

Assistant Postmaster General James W. Hargrove was asked the other day whether there's any hope for a ceiling some day on the cost of mailing a letter. "No more," he quipped, "than I can foresee a top price for beef."

Well, beef and mail are entirely different, and the Postal Board of Governors ought to be shown the difference. (Lubbock Avalanche-Journal)

...I am quite sure that the people of Floydada are interested in my success of our work here in Albuquerque. I would like to share some of our experiences, we will not be able to tell of all our experiences would not contain them all.

...Della and I arrived in Albuquerque, N.M. Saturday night, January 30. We found all the plumbing in the house had frozen and the commode and tank, all the copper lines in the wall, and a new water heater. The water had literally frozen in the pipes and ran out the door, before someone had distributed the water. There was no water standing in the house, the living room rug was thoroughly saturated. We had to re-install and throw it away. It was pretty well worn, but it would not be the concrete floor.

...the day Baptist Church in Floydada, our home church, provide a new move for us, and we deeply appreciate all that they are doing for us. We would like to encourage each one to visit the church, and to meet their new Pastor and ours, Brother Pyle. He moved up from Denton, Texas, and has three teenage girls and an 11 year old son. We would like to encourage you to pray for him, as he begins this new ministry. We are sure that God will richly prosper his ministry in Floydada, and many souls will be won to the Lord because of his ministry.

...on, we plumb all day Monday, and also all day Tuesday, and Wednesday. We have had a difficult time finding a location to meet in the area that we feel is the area of greatest need. We know that God will provide. Also, we are aware of the prayer of each Christian man, woman, and child. Floydada, for there is a tremendous opportunity here, Williams, there are also many obstacles, and much opposition. We are sure that God, He is greater than any obstacle or opposition. We are sure that God, He is greater than any obstacle or opposition. We are sure that God, He is greater than any obstacle or opposition.

...to the people of Floydada, and especially to the people of the day Baptist Church, you have a spot in our heart, and we continue to pray for you.

I HADN'T PLANNED on viewing the moon eclipse Tuesday night, but when someone called about 1:30 a.m. . . I got up and viewed what little was showing of the moon at that time. At 6 a.m. Wednesday morning when I drove downtown, the moon was in full brightness again.

I SAW ONE of my old Littlefield friends in Lubbock the other day. He is E. C. Caldwell. E. C. said tell his friends in Floyd County, especially the folks around Dougherty where he used to teach, that he is still going strong, slipping into retirement, and has many fond memories of the days he lived over here.

I CLIPPED THE from Edgar Hays Nocona newspaper: Dedicated to local fishermen: The husband and wife were sitting in their boat, their lines in the water, when he suggested a bet as to who would catch the first fish. She accepted and it wasn't long until she got a bit. In attempting to pull in what appeared to be a big one, she got so excited she fell out of the boat. "Oh, well," said the husband, "If you're going to dive for them, the bet's off."

KNOW THE SEVEN STAGES OF AMBITION? They are: (1) To be like dad; (2) To be an engineer; (3) To pilot an airplane; (4) To be famous; (5) To become a millionaire; (6) To make both ends meet; and (7) To hang on long enough to draw a pension.

JUST IN CASE someone looks back in the Hesperian files 20 or 50 years from now, it should be stated for posterity's sake that astronauts Alan Shepard, Edgar Mitchell, and Stuart Roosa successfully completed man's second journey to and on the moon successfully.

IF WE DIDN'T GET all the scout troops in this issue of the Hesperian, it isn't because we didn't try, and perhaps we can "shoot" the rest of the boys for next week's edition.

CITY MANAGER Bill Feuerbacher has asked me to remind everyone who owns old houses or buildings that should be torn down, to contact him immediately and he will schedule the work to be done in clearing the lot, with the cooperation of the owner.

This is probably a good time to note that the First Baptist Church, the city of Floydada, commissioners John Fowler and Carl Jarrett are doing a terrific job of cleaning up the corner of Missouri and Silverton highway where the old Latin churches were located.

We hope you'll notice in this week's Hesperian the beginning of a new "before and after" series showing the progress of the cleanup program. Next week we will feature work in Washington Park. If some organization wants a project, contact the city manager about this. In the meantime the city is planning to plant grass in the park.

I HAVE A recommendation for the track coach at FHS. Try deputy Connie Reed. . . he should make a good 100 yard dash man. Connie was parked over at a service station on the Matador highway the other afternoon when a car and pickup sped around the corner in a reckless manner. Connie called the police to get the car and he sped after the pickup. He got the driver hemmed in at a dead end street, pursued the young fellow on foot. . . caught him and started back to his car with "the catch" in tow. The pickup had just been stolen from the Neff Grocery; Neff arrived on the scene, was surprised at how fast the stolen vehicle had been recovered.

A FOOTBALL COACH from one of the Southwest Conference schools was addressing a sportswriters' convention and quoted a letter he had just received.

"You are the greatest football coach in the world and better than Frank Leahy, Knute Rockne, or Bud Wilkinson."

For a moment the sportswriters were stunned at such conceit.

Then the coach continued, "Incidentally, the letter is signed 'Mother.'"

**Here's a watertight statement about Vanguard's rubber gasket joint.**

**It won't leak**

The idea of using a rubber gasket joint in Vanguard PVC plastic pipe was revolutionary. It meant no more bands or solvents. Easier, faster, trouble-free installation. But that was just a beginning. Next we put the pressure on. We hydrostatically tested it. We put it through all sorts of temperature tests. We twisted it and turned it. Then we field tested it. We gave it more punishment than you or those inevitable ground shifts could ever hope to.

Just as we anticipated - the rubber gasket held. So, whatever your needs for plastic pipe, Vanguard is it. Bend it any way you want. We'll make a watertight statement about Vanguard's rubber gasket. It won't leak. Just be reasonable.

Vanguard is available in 1/2 to 15-inch diameters. For further information, call or write your local Gifford-Hill irrigation specialist...

# The Best Way of Life

Buy . . . where your trade helps to sustain prosperity you can enjoy

It depends on what you like, of course. There is the warm neighborliness . . . the dignity and satisfaction of life in a community like ours . . . and there is life as it is lived in the cities . . . as one of the scrambling herd . . . where neighborliness is viewed with suspicion . . . and squalor is the lot of anybody who gets pushed aside in the rat race.

- Those of us who live here have already voted our preference . . . for this more tranquil smaller community unit

as a way of living. We like churches where everybody knows everybody else . . . and schools where we know our children's teachers . . . and they know us. We like living that is more calm, easier, safer . . . and we like business dealings with neighbors we can depend on.

- But happy communities don't just grow . . . they have to be built. It takes revolving money . . . local trade volume . . . to build and maintain and enrich our chosen way of life.

## Install gas air conditioning now?

Installing GAS air conditioning now means you'll beat the rush that always comes with the first hot or dusty spring day. While everyone else is waiting for the overwhelmed installers you'll be cool, calm, and collected.

GAS air conditioning cools your whole house quietly and efficiently. You'll save on repairs, too, because there is no compressor to break down or wear out. And, GAS air conditioning cools your whole house for what you might have been paying to cool just two or three rooms before.

So, be foxy. Call Pioneer and tell them you'd like to find out more about installing GAS air conditioning in the winter. A representative will tell you what it will take to include it in your present forced air heating system. You may be able to use the same ductwork for heating and cooling. It costs nothing to get a complete survey of your home or business.

Ask about special Winter Terms.

## The Day Advertising Ceased In The USA

Advertising in the United States was stopped at 10 o'clock this morning.

More than 3,000 of the nation's newspapers immediately announced plans for discontinuing advertising indefinitely. Spokesmen predicted that more than 500 radio stations in the nation will turn off their switches this week. About 86,000 employees in these organizations will be affected directly or indirectly.

Approximately 600,000 in all industries, it is expected, will receive their final pay.

Major national networks, by the complete loss of advertising, announced imminent cessation of all service. Nation's newspapers, principally upon advertising revenue, were readjusting the situation quickly. They were reducing size to 85 percent and at cutting circulation prices. American Newspaper Association announced several hundred thousand would lose their jobs. Magazines went to the streets. Some were reduced to half the size and raising circulation prices.

Thousands of retail clerks throughout the nation are predicted, will be unemployed within a week. There will be sufficient buying traffic to support the retail payroll.

Owners and managers cancelling orders, given cessation of normal business. And, of course, this means that thousands of manufacturers and wholesalers are making

plans to reduce production and lay off workers. Economists predict that unemployment will rise into the millions. Mass production crippled, and merchandise will rise in price while buying power is cut.

Emergency meetings to discuss what should be done. The future looks dim. That's the little or nothing to carry on.

Because advertising stopped at 10 o'clock this morning, all of this because remains no method of telling people about the products who own manufacture.

Market prices on the Exchange dropped to new lows, as in bars foresaw general business bankruptcy throughout the country. Trading is at a virtual

tual standstill. There are plenty of sellers, but no buyers.

Dr. Albert Snallpace, who has been conducting a campaign against "advertising excesses" by organizing citizens' groups throughout the nation commented: "This is awful." Dr. Snallpace had just been notified that he had lost his faculty job. The university did not expect many of its students to return to the campus for the next semester.

There are emergency sessions of the Cabinet and congress in Washington, and Governors throughout the nation are calling sessions of General Assemblies.

Officerholders are beginning to wonder how they will conduct their campaigns now. In big towns and small towns, breadlines are forming -- but there will be no bread in a few more days. Grain and cattle markets in Chicago, Omaha, and Kansas City are collapsing.

All of this because advertising stopped at 10 o'clock this morning.

There is no voice to tell the buyers about the sellers' wares. There are no dollars to support the mass media that day in and day out, hour in and hour out, convey information to the people.

There are long faces in the Treasury Department -- where Savings Bond officials read quickly the handwriting on the wall. Savings bond sales would drop to a trickle, and the nation would lose a vital means of helping to keep our economy stable.

Department of Defense officials made plans for stepped-up manpower drafts, for they could expect very few recruits in the absence of selling assistance from the crippled media of the nation. The Red Cross, long thwarted in its attempts even under ideal conditions -- to maintain blood banks at minimum requirements, has given up the fight completely.

The Bureau of Internal Revenue anticipates only a small percentage of the taxes which will be required to meet the growing demands of emergency operation of the nation.

And in Russia, there is a man with an enigmatic smile. Something had happened in America that reduced that nation to a shambles faster -- of, so very much faster -- than a thousand atom or hydrogen bombs, or even some of the more horrible subsequent ones that can take millions of lives.

Ladies and gentlemen, that's what could happen if advertising stopped in America today.

## NEWS FOR HOMEMAKERS

by Sherry Mullin  
Floyd County H. D. Agent

What's the difference in paying cash and buying on credit over a long period of time? The comparison results are somewhat shocking.

A study conducted at the University of Minnesota in 1968 illustrates the side effects of credit buying over a period of 45 years. Based on the service life expectancy of nine commonly purchased consumer items, the study estimated that a family will buy three refrigerators, ranges, toasters, vacuum cleaners and living room rugs; two electric sewing machines, and four television sets. In addition, if they are a one-car family and a car is kept for approximately 3 years and 10 months, 13 cars will be purchased.

If these items are bought on time payments, the total cost of principal and interest will be about \$39,000. But if these same monthly payments are invested in a savings account

for a similar length of time as the installment payment period, the family will be able to purchase the same nine items during the 45 year period and have almost \$33,000 left over. This is due to 45 years of interest compounded quarterly at 4 percent. If \$8,000 in interest charges not paid are considered, the total savings would equal \$41,000.

The interest charges for the 13 cars alone, if saved would be enough to buy all the other items used during the family's life span for cash. The difference between buying first and paying later, and in saving then buying, is equal to about one-third of the purchase price of the items. Even the "wise use of credit" is expensive and creates considerable erosion of purchasing power over the life span of families.

## Water Inc. To Hold Meet In Hereford

Members of Water, Inc., will convene on Hereford Feb. 19 for the organization's Fourth Annual Membership Meeting. More than 500 persons are expected to be on hand for the day-long session which gets underway at 9:45 a.m. at the Hereford Bull Barn.

Parfitt, Southwestern Division engineer, U.S. Corps of Engineers; Calvin Watts, executive director, Red River Valley Association; and Dr. Tinco van Hylckama, noted U.S.G.S. geologist.

Two meetings of Water, Inc., directors will be held in conjunction with the annual meeting. They will convene on the eve of the meeting for a study of the audit report of activities of the past year. Immediately following the annual meeting, directors will again go into session to elect officers for the coming year.

Purpose of the referendum is to raise funds with which to conduct programs of education, research, disease and insect control and marketing relating to wheat, explains County Agriculture Center in Plainview at 2:15 p.m. in Swisher County, producers are encouraged to meet on February 16 in the District Courtroom, County Courthouse, in Tulia at 3:30

p.m. A meeting for Briscoe County producers will be held on February 17 at 9:30 p.m. in the Silverton High School Cafeteria while Floyd County producers are invited to meet at Plains Theater in Lockney at 3:30 p.m. All the meetings will immediately follow an annual Soil Fertility Day program at each of the locations.

The program on the referendum is designed to explain the provisions of the referendum and to give a brief report on the overall wheat industry.
