Miss Janna Bertrand, Derrell Monday Exchange Twin Vows

Miss Janna Bertrand and Derrell Monday exchanged wedding vows in the First Baptist Church in Floydada at 6:30 Friday evening, August 20. Ronnie Hill performed the twin ring ceremony.

The bride, daughter of Mr. and Mrs. Harold Bertrand, was presented in marriage by her father. She wore a formal gown of white dremette, fashioned Empire style with a scoop neckline. Lantern sleeves were made of white bridal lace, which also overlaid the bodice of the dress. A white sequin trim accented the high waist, neckline, sleeves, and the band of her veil. The chapel length train, joining the dress at the shoulders, was made of bridal net with a lace trim.

For the traditional "Something old and borrowed," the bride carried a handkerchief which had been carried in six previous weddings, including her mother's and maternal grandmother's. The "something blue" was her garter, and the "something new" was her wedding ensemble. She carried a Bible topped by white velvet streamers and a white floral arrangement. The arrangement was later detached and worn on her going-away dress.

Miss Donna Bertrand, Castroville, Texas, sister of the bride, was maid of honor, Miss Teresa Monday, Plainview, sister of the groom, was bride-maid, and Miss Kim Bertrand, sister of the bride, was

junior bridesmaid. They wore identical formal length gowns of apricot. The dresses were semi-fitted with a roll collar, short puff sleeves, and a scalloped yoke of apricot jacquard. The bride made the ensembles for her attendants, and also made her wedding gown.

Garland Martin was best man, Bob Sarpalus, Ft. Worth, was groomsmen, and Jon Jones was junior groomsmen. Ushering were David Ashby, Canyon, and Bobby Allison, Abilene.

Wedding music was furnished by Clay Freeman of Sweetwater, organist, and Paul Hall of Abilene, soloist.

Following the ceremony, a reception in the Fellowship hall honored the couple. Mrs. Andy Brown, Hamlin, and Miss Iwana Smithey served. Mrs. Jerry Towler, Lubbock, presided at the register.

For departure, the bride wore a navy and white long-sleeved dress with a solid navy sleeveless coat. She used navy accessories.

The couple will be at home at 1802 Anderson in Abilene following a wedding trip. The couple are both graduates of Floydada High School. The groom is employed by Hardin-Simmons University of Abilene, of which he is a graduate, and the bride plans to attend school there.

The rehearsal dinner, hosted by Mr. and Mrs. Travis Jones, was held Thursday night at their home.

Leon Hale, a columnist for the Houston Post, recently listed 20 things that it takes to be a cattleman.

"The Texans who now take the most kidding about their work," Hale writes, "are the part-time cattleman. At one time this honor went to barbers, because they talked so much. And for a while the bankers, who were kidded about their stone-heartedness.

"But now it's the half-time ranchers. One reason may be that we have more of them than ever before. Then I think a second reason is that so many guys who are not in the cattle business imagine they know quite a lot about it, possibly even more than some of the people who are in it."

Columnist Hale continues: "Anyway it has become, especially in the rural regions of this state, so popular to kid part-time cow men that sometimes they even kid each other. Evidence of this is that in the past week I have been given two different lists which are going around, being read in the feed stores and the barber shops and the bank lobbies, and both are spoofs on ranching. One is headed 'Ten Minimum Requirements For Ranching' and the other 'What It Takes To Be A Cattleman.'" Hale combined the two lists into the following:

- (1) A wide-brimmed hat, one pair of tight pants, and some \$20 boots from a discount house.
- (2) At least two head of livestock, preferably cattle; one male, one female.
- (3) A new, air-conditioned pickup truck, with automatic

CHECKING PRESSURE COOKER GAUGES

Procedure for Checking Gauges
Gauges on cookers should be checked with a maximum thermometer at least once per year. Check as follows:

1. Prepare the cooker as if you were going to can. Place a rack in the cooker. Have at least 1 1/2 to 2 inches of water in the cooker.
2. Test thermometer in boiling water. It should register 212 degrees F. at sea level.
3. Shake the mercury down below 228 degrees F. each time before using.
4. Put thermometer in the center of the cooker in an empty jar on the rack.
5. Close cooker. Leave petcock open until steam escapes 10 minutes so that no air will remain in cooker. Close the petcock.
6. When dial registers 10 pounds hold this pressure for 5 minutes.
7. Remove from fire, and let gauge return to 0. Let stand 5 minutes, and then open petcock.
8. Open cooker and take reading.
9. The thermometer should read 240 degrees F. at sea level.
10. Repeat this procedure at 15 pounds pressure. The thermometer then should read 250

A Sweet Little Ole' Mother

(By Peggy Medley)

"MY SWEET LITTLE OLE MOTHER", is the description given a Floyd County pioneer by one of her sons. Although not the age of most pioneers, Mrs. Fannie Matthews Green has been a long timer in the county, coming here with her pioneering parents in a covered wagon in the 1890s. She has long remembered sayings by her father, two in particular, "Remember the Sabbath Day" and "train up a child in the way you should and it will not try to depart from that."

Although tiny in structure, Mrs. Green has carried a heavy load on her shoulders through life, losing her mother while quite young, and being reared when "wants" were very few.

Her parents were Mr. and Mrs. K. J. Matthews, who settled in Mt. Blanco when they came to Floyd County. She was two years old at the time. Two years after arriving here they returned to Hill County to seek medical aid for the ailing Mrs. Matthews, but death followed, leaving the father with three tiny ones to care for. He returned to Floyd County with his little family, bringing along his widowed mother.

Money was scarce in those days, but Mrs. Green recalls that she and her brother, William, and sister, Nannie, never went hungry. Someone would give them a cow to milk, occasionally there was antelope steak, or maybe stew, whipped up by her grandmother, from a young cotton tail.

Her dad was appointed mail carrier on a route from Mt. Blanco to Matador. He farmed, raising feed corn, maize and a small patch of cotton. Watermelons were a money maker back then, Mrs. Green recalled. She said at one time they sold enough from their yearly crop to purchase a town lot in Matador in addition to buying necessities for the home. They even had watermelon to serve for a Christmas fete.

Mrs. Green said her father was a religious man which was passed on to the Matthew children. She said she couldn't remember when she was not familiar with such passages as "a good name is rather to be chosen than great riches" or "the fear of the Lord is the beginning of wisdom."

Mrs. Green's father organized the first Sunday School in the little Mt. Blanco school house, led the first prayer, read the first scripture and led the first hymn.

In her youth Mrs. Green said there was no time for loneliness. On week days there was school, lessons and chores; for entertainment there were picnics, fishing and sometimes swimming at Crawfish Creek. Every July was a memorable occasion for Mrs. Green. The family rode horse back on a camping trip to the breaks where they gathered plums and grapes.

Years passed and Mrs. Green found she was doing high school work. Families with children

were moving into towns in order to patronize a high school or college. The Matthew children were the only students left at Mt. Blanco so the school was discontinued. Her father arranged for the three to attend school in the nearest town, Floydada.

Fannie went through the 10th grade at Floydada, then entered North Texas State at Denton by examination. She received her diploma in 1914 in History and English, then started teaching in Dickens County. She taught the 6th grade in Floydada a half a term, then at Ralls from 1918 through 1920. From there she went to the little community of Robertson, south of Lorenzo, then to Mt. Blanco where she was teaching when she met her future husband at a "42" party. Green had come to Floyd County with his father. Later he rented a farm, then went into the Navy during which time the couple corresponded. In 1920 Green was discharged and he and Fannie were married on an Easter Sunday in 1921.

The couple made their home on land leased from J. D. Starks. They resided there two years then moved to a farm of an uncle, D. L. Bolding where they made their home for 32 years, moving into Floydada in 1956.

When Mrs. Green married she gave up teaching but busied her life with the rearing of five children, four of them sons. The two older boys served during World War II in the Air Force and the other two in the regular army. The oldest, Jimmy, who was a Staff Sergeant, and an engineer and gunner on a B-24, lost his life at sea. His plane contained a ten man crew. Seven of the personnel parachuted out and the other three evidently went down with the plane. Three of the seven were picked up by Japanese. Jimmy had been missing two years before being declared dead by the Air Force.

The other children are Mrs. J. M. Ryman Jr., of Hubbard, Victor Green of Plainview, Don Clark Green of Big Spring and Clyde Green of Hoonah, Alaska. Mr. and Mrs. Green also enjoy the company of 12 grandchildren.

Mrs. Green has been writing Center Community News for the Hesperian for the past 17 years. She has also written the early history of the Andrews family for a History of Crosby County.

Her other free time is spent visiting the sick and caring for her husband, who has been in failing health for the past several years. She also spends as much time as possible gardening and working in her yard. But each Sunday you will find her at Calvary Baptist, a religious life taught by her father, which she has not departed from.

Plainview Couple Will Be Honored In Their Home Sun.

Sunday, September 5, Mr. and Mrs. Alton Chiddix will be honored on their twentieth wedding anniversary in their home at 2308 West 13th Street, in Plainview from 2 until 5 p.m. All friends and relatives are invited.

Hosts for the occasion will be their brothers and sisters and their families: Mr. and Mrs. Harry Reeves, Floydada, and children, Mrs. Ronnie Evans, Floydada and Mrs. Joe Christian, Petersburg; Mr. and Mrs. Preston Chiddix, Plainview; Mr. and Mrs. Felton Patterson, Plainview and daughter, Mrs. Earl Harkins, Hereford; Mr. and Mrs. Glenn Chiddix, Plainview; Mr. and Mrs. Marvin Smith, Petersburg and daughter, Mrs. Danny Daniel, Floydada; Mrs. Phil Green of Brownfield; Mr. and Mrs. Wayne Chiddix and daughters, Lisa, Larai, and Melissa of Plainview.

Chiddix has lived in the Plainview community most of his life. He was farming in the Liberty community at the time of their marriage September 1, 1951 in Plainview. He has been employed by Peetless Pump Company for the past eighteen years. Mrs. Chiddix was born and reared near Floydada. Both Mr. and Mrs. Chiddix are Past Noble Grands of the Oddfellow and Rebekah Lodges, respectively. He is also a member of the Rebekah Lodge. She has been active in Pink Ladies. They are both active members of Trinity United Methodist.

Those who find it difficult to get down to work in the summer usually find it difficult to get down to work in spring, autumn and fall, too.

Tired business men might try resting.

COUNTY AGENT'S CORNER

By Doyle Warren

Highlights Aired for Lubbock Center Field Day
This year's field day and open house at the Texas A&M University Agricultural Research and Extension Center at Lubbock will offer several unique features, according to County Agricultural Agent Doyle G. Warren. The annual event is slated for Tuesday, September 14 beginning at 1 p.m.
Detailed discussions will be presented on grain sorghum varieties, weed control, narrow-row cotton and verticillium wilt control. These will be presented on special tours to particular field locations throughout the afternoon. Visitors may select any one or all of these tours.
Also featured will be special-

ists in various phases of agriculture who will be available for individual consultation. So, agricultural producers, homeowners and gardeners are encouraged to bring their questions on insect, disease, and weed control, fertilizer use, irrigation or whatever for the "experts". Warren also encourages them to bring any plant specimens they may have.
A mainstay at the annual event will be general tours to the various field research plots on the Center's 300 acres, adds Warren. This tour will give visitors a bird's-eye view of the many phases of agricultural research being conducted.
Displays and exhibits will also be featured from public viewing. These will include

Letters To The Editor

August 10, 1971
3 Lexden Circle, Athlone
Pietermaritzburg, Natal
Rep. of South Africa

Dear Wendell, Peggy and all interested parties:
First of all, Wendell, you may publish this letter in the Hesperian if you would like to do so.
It doesn't seem possible that a year has passed as quickly as it has since we left Floydada! So many things have happened since then that it is hard to recapture it all.
We have settled down very nicely to our new way of living here in Pietermaritzburg. I must say it has been hard to slow down after our fast pace we had in Texas. We now have what everyone in South Africa describes as "Natal Fever". This merely means to slow down and enjoy life; but it can be exasperating at times!
When we talk now, people don't have the difficult time of un-

derstanding what we want or mean anymore. I don't know if we have started to lose our Texas drawl or not!
We are falling into what I describe our "slot" and when you are in a new place and meet people on the streets, for a while they were all strangers and just faces to us. Now, we have friends just like we had in Floydada to stop and "chat" with. Until someone has been a "stranger" they cannot understand how lonesome they would be. So to everyone, when you meet new people in the community, have these new people in your home, for strangers don't care what the house looks like, they are just want to meet and talk to people. The people over here are wonderful and are more like the fabulous folks in Texas, so warm and open. . . and it is a very nice place to live.
Fred and I travel a lot, and I dare say, that we have seen more of South Africa than most South Africans. It is the most beautiful country I have ever dreamed existed. The farms are very large and some are over 33,000 acres of farm land.
Fred is doing very well with his importing and now I'm trying to "figger" out how to get the ships over faster! Ha! He usually takes six weeks from the time the implements are loaded in New Orleans until they reach the Harbor in Durban. The importing and exporting business is a very complicated procedure and not what the average person would think. Reams of documents flow to and from South Africa to the United States; to factory, clearing agents, shipping offices and shipping companies and then back through these legal channels over here. We spend hours at the clearing agents and Custom Offices in Durban and other ports of entry every two weeks. It is most unusual and interesting work and we do stay busy. Of course I've torn my hair out several times; and it always works out and my hair grows back!
The telephone system over here is really "unreal"! It is better than it was, as they are adding direct dialing; but it couldn't get any worse. . . only better any way you look at it! So go pick up your telephone and listen to the dial tone for me. . . as it would be music to my ears. You have to "book" a call any time you want to make a toll or trunk call. Sometimes it is hours of delay. We can call the United States quicker and with excellent connections; but to call the Drug Store or your next door neighbor. . . forget it! I just hop in my car and go get what I need.
Now, more people have written us about this APARTHEID situation. So I decided to answer it, if I can very simply. All it is. . . is the Dutch South Africans word for segregation. That's all!
There is no problem over here. If the "world" is so upset with this useless word Apartheid, all they should do, rather than read books etc., before they speak, shout or whatever they're doing, is to come over here and rent an apartment in a capital like Pietermaritzburg (which is the capital of the state of Natal, like Austin is in Texas) and see how the average person lives and TRY to understand the South African Negro. They are the most delightful group of people you will ever see and VERY WELL DRESSED. Here in Natal they are Zulus.
Now, here on the African Continent all Negroes speak their own language. Here in the Southern part of Africa there are at least 800 native languages and dialects spoken. . . Zulu, Ndebele, Swazi, Xhosa, Basuto, Malawi and many more. Bantuis the name for Negro Tribes in South Africa. Now up in Kenya, which is 8 or 9 thousand miles away, they speak Swahili. Several people have asked if we have learned Swahili or not. This language is not spoken down here. These languages are a series of "click sounds" and Zulu is the most beautiful language that I have ever heard in my life. A whole lot prettier than the romantic language of French. Oh, how I would love to learn pure Zulu for it is truly beautiful.
These tribes are just as different in structure and language as your English, German, Italian and Spanish peoples are. Each has their own language and are all very proud people. Sure, you find some under-nourished and poor; but you also find all sorts of people like this in America. Some are lazy just like we Americans are; but more than average are very well dressed and clean. All are being educated through your elementary grades, and have opportunity for college work. You will find doctors, lawyers, etc. that are all Negroes. They have their own schools, hospitals, hotels, picture shows, restaurants, etc. And likewise, no Europeans are allowed in their establishments.
This government, contrary to public overseas opinion, is helping these people and I take my hat off to Mr. Vorster and his officials. You cannot do this all in a year or two. You see, South Africa is only 9 years old, as that is as long as they have had their independence from England. It is such a new and young country.
Do you realize that in South Africa alone there are over 25 million Negroes? That is a lot in any man's language. The ratio of Negroes to Europeans is 9 Negroes to 1 European. Whereas, in Rhodesia it is 17 Negroes to 1 European.
This country of Rhodesia has no segregation and is as much like Texas as any place you will find. Poor little Rhodesia! I get mad when I think of the United Nations sanctions against this lovely country and all because it wants to quit the British Commonwealth and be independent! Well, I've expounded my "two-cents worth" and please don't believe all you read about our lovely and wonderful adopted land of South Africa.
We are now permanent residents of South Africa. Now DON'T confuse this with giving up our American Citizenship. We are and will always remain American Citizens. We could never give up our birth-right for it is too precious a possession. So Americans we still are; but living in another land. I call ourselves a new race called "Tex-Natalians". Doesn't that sound continental? Ha!
Now you are wondering about Kit and Dwane. . . so now to them. Kit is in Medical BSc. at Witwatersrand (which we call "Vits" for short) in Johannesburg. Now Johannesburg is the big city of South Africa. It has a tremendous skyline and is really a big city. It is called the "City of Gold" because of the Gold Mining and you see the huge dumps of gold dust way out surrounding the city.
Kit is having a hard time at University as the subjects are very hard over here. Physics is about to drive her up the wall. . . so to Jerry Livingston. . . be sure your students have a very strong background in Physics; as it is extremely rough over here.
She is in Womens Dormitory or Womens Residence as they call it here and since she is a Medical student she has a private

room. Nothing as fancy as she had at Trinity University in Antonio, but nice. She is enjoying Johannesburg times as in all big cities, she feels like she would like to visit friends. She was home for a month's holiday and went up to Swaziland.
Dwane has just returned to Michaelhouse, his boarding school and is enjoying it very much. We all feel he is getting a wonderful education as he has boys in his school from all over the world. They are from. . . of all places, California, France, Italy, China, Kenya, New Zealand, the Greek Islands and other countries near South Africa. Dwane is part of Eaton and is a very well thought of student of his professors from Ft. Worth, Texas. So with his learning as well as his social contacts, I feel he will learn foreign languages amazes me. So far he has picked up but haven't only knows for how long!
I must explain that schools over here are like those in Texas. They don't have 9 months of school and 3 months of vacation in terms all year long. They have a month holiday in 2 weeks in September, 7 weeks in December and 2 weeks Easter, etc. This is nice as it is just right for them and not too long for them to become bored. Dwane is developing an English accent and give him another year and he will have it "down pat", even though he wants a Texas accent, it is hard when all you hear is very English!
My aunt, Jennie Conner, is doing very well and broke her right leg in three places. She is now cast and is using elbow-crutches and takes physiotherapy daily. In no time at all she will be climbing up these steps and I will have to tie a bell on her to see if she is! Ha! She has been just great through all this and ask for a better patient. She has had the most wonderful one could ever ask for.
My mother, Minnie Smart, is doing fine and is as old tricks and looking forward to seeing the rest of us as soon as Jennie is able to travel.
I mentioned Swaziland earlier and this is a small independent country bounded by South Africa and Mozambique. It is a beautiful country with big, big farm estates. Up in the capital of Mbabane and it is situated in a most beautiful! We travel a lot in Swaziland and find the roads are mostly gravel and so we use the pickup as best way to travel on these roads.
You will find another independent country that is called Basutoland and since becoming a country of its own called Lesotho. Lesotho is just west of us here in Pietermaritzburg. Dwane went up to a chalet for snow skiing and several weeks ago. Yes, I said snow! Fred and I picked his party up and Oh, what beautiful country! All I ever say is "Oh, what beautiful country".
This week I had to drive out of Michaelhouse and up the climb (Pietermaritzburg is at the base of mountains) I looked down on the lovely garden city I thought and compare to its beauty; but as I got up near the top through a spot in the forests I saw new snow and I was so breath-taking for the sun was just hitting the snow. It was so heavy snow. . . it was a lovely sight. In Michaelhouse, all the mountains were covered with tall red-brick buildings of Michaelhouse with their red walls was a picture and I wished for my camera where it always is when I want it. . . home!
So many things of interest are on this continent. I believe that one of the greatest pleasures I viewed was your grey Limpopo River that R. Kipling wrote of "set all about with fever trees". I was surprised to see "greasy" looking. This was Kipling's land and as he can feel his deep attachment for this country.
Another thing of interest is the Baobab trees. These thick bloated trunks and stubby grotesque branches that a strange appearance like where were put in the ground with the limbs looking like roots. This tree has Monkey Bread maybe twelve inches long and diameter. I call them pods and like small coconuts in my yellowish and fuzzy. Inside these precious shells is a red nut, which when broken open contains pure cream. I had never given a thought as to where cream of tartar comes from. As I've said, this is a very modern and beautiful when you see the untouched land with nature's reserves beasts happily roaming these reserves. . . you really like in the motion picture of "Born Free". Such beautiful life, that a zoo seems so awful to cage these lovely animals. The flora is magnificent too, and birds by the thousands.
Our animals are still with us, Tippy, Beau, and give us all much comfort to hear them trill. They have really been wonderful for Jennie while she's bed.
By the way we receive the Hesperian weekly and takes about 5 or 6 days for it to arrive here.
I'll say Goodnight and hope you have enjoyed my God Bless each of you and even the you are far away. . . you don't seem but 160 miles.
Just remember that South Africa isn't bad. . . it's beautiful with warm friendly people, for Fred and I saw and went home and then came back and brought . . . to a most gracious land of ten thousand forks.
With kindest regards
Babe Martin

Kent Hale Wins Floydada Tourney

THE NAME "HALE" is associated with golf in the Floydada community. Floydada country club golf pro Richard Hale gives winning certificates to Andy Hale (left) and Kent Hale.

Kent Hale of Floydada beat out Johnny Goodwin of Tullis by two strokes to take the championship in the 17th annual Floydada Country Club Invitational Golf Tournament Sunday. Andy Hale took third with a 146.

The Hale cousins, both attending Hobbs Junior College on golf scholarships, have some pretty good instructors in Jessie Blackwelder, Hobbs JC golf coach, and Tommy Hale, brother of local pro Richard Hale. The Hale-Blackwelder team scored a five-stroke victory Sunday in the Ocellio Park Partnership Golf Tournament in Hobbs.

In the Floydada tourney, Morris Meriweather of Hobbs won the first flight with a 151; Dennis Willet of Lubbock took second with a 153; and two Floydada golfers, Greg Campbell and Carlos Arellano, tied for third with 154s. Arellano won the playoff.

White To Speak At HPRF Field Day

The driving force behind the ever-expanding Texas Department of Agriculture, Commissioner John C. White, will be guest speaker for the 15th Annual High Plains Research Foundation Field Days in September.

Commissioner White will be guest speaker during the final day of activities September 10 at 5 p.m.

For the first time, Field Day activities have been expanded to include two days of field tours and an enlarged exhibit area for all types of agricultural related equipment, chemicals, seeds and other products.

Activities will begin with field tours at 1:30 p.m. Thursday, September 9, on the research station farm at Halfway. Field Day has been expanded to allow area farmers and businessmen to tour research plots and get a close look at the research projects underway.

Preserving and conserving the High Plains underground water supply is the theme for Field Day activities and this theme will be developed in various field tour stops where Foundation scientists will explain the many phases of optimum production combined with irrigation efficiency.

The Foundation has been an area leader in the protection of underground water through artificial recharge and has compiled 15 years of statistics for irrigation efficiency.

Much of this information will be detailed in special indoor lectures throughout both days.

The expanded two-day farm equipment exhibit area is filling up rapidly. Jack Cloude, Foundation representative, noted that letters of invitation had

been mailed to equipment dealers and manufacturers and if any dealer or manufacturer had not received an invitation to lease exhibit space and wished to do so should contact Cloude at the Foundation.

A special feature of the final day of activities will be a "Mexican Holiday" drawing for supporting members of the Foundation. Winner of the drawing will receive a holiday trip to Mexico City plus cash expenses for two.

Commissioner White's address will conclude Field Day activities on Friday, September 10, 1971.

He is currently serving his 10th term as agriculture commissioner. During his years in office, White has developed the department into a valuable tool for the promotion and protection of Texas agriculture production. He has helped in improvement in the state's weights and measures and packaging and labeling laws for the protection of consumers.

Other protection and promotion areas developed by White include the Texas Agricultural Products program, a major marketing concept to promote Texas' \$4 billion annual agribusiness industry; improvement of Texas Egg Law with its licensing and inspection provisions; the Texas Grain Warehouse Law which has served as a national model; voluntary pesticide residue monitoring and laboratory testing of Texas produce and other food products; the nation's largest seed testing and certification program and the first environmental services branch of any state department of agriculture.

Consumers Want to Know

What is a trash masher?
Garbage may be put into this new appliance, but foods that might cause excessive odor such as fish, onions, etc.,

should not be added. The trash masher compactor is designed to handle cans, bottles, plastic containers and paper.

What are the basic advantages of this new kitchen appliance?
It saves on frequent trips to the trash can and on the number and size of trash cans

needed in the home. The trash masher compactor will hold a week's worth of trash for the average family of four. The trash is compacted into a rectangular bag, 16 x 16 x 9 inches, which holds the equivalent of about three 20-gallon trash cans.

CAPROCK, FROM PAGE 1

So, if you're interested in a snug bug, call Polly or cheer leaders and they'll have them in before you know it. And... in case you're wondering, a snug bug is a green sleeping bag to put your legs in during the games.

WHEN MARY TOM and I made the trip around the world years ago we invited everyone with whom we became acquainted to come to see us. We received an air mail letter from a young Indonesia couple that they are taking us up on our invitation.

He will begin work on his doctor's degree in Pennsylvania and they are coming through Texas (Dallas) to see and realize how far Dallas is from Floydada, but we are on our way to meeting their plane Saturday and bringing them to Floydada for two or three days before they go on.

This couple worked with Mennonite churches in Japan though their income was only \$15 per month, they did not show us the best kind of hospitality when we visited. Gasoline was expensive, but Alberto carried me all day on his motor bike sightseeing.

"I'M NOT REALLY RICH" the young man said to his friend. "And I don't have a convertible like Jerome's. I love you."

"I love you, too," the girl said, "but tell me Jerome Green."

ONE FORT WORTH bank teller explained that she was by a customer for a checkbook even though the teller had a book the day before. The customer had a ready supply. She had lost the first supply.

"But it doesn't really matter," she explained, "because I always sign all my checks when I get a new book. In that one else can use my checks."

FRANK RAYNER, manager of the Underground Water presented a most interesting program at Rotary last night regarding our underground water (what's left of it).

I thought I knew a lot about the water table, but he showed me the top soil back and gave us a view of the lake below. There is a high underground plateau northeast of Floyd over on the other side of the White River.

In between these plateaus lies a lot of underground water. R sort of follows the White River area across Floyd County. It takes as long to get to the surface as it takes to get to the range through 1985.

In the meantime folks, let's catch all the tail water we can serve it, pump water from the playa lakes and recharge where possible. Water is the very future of this country. It's just that simple.

OUR CONGRATULATIONS to Johnny Harris, Jr. on the expansion of The Ponderosa Meat Co. I suppose you doubled their plant, equipment and facilities in size. It is expanded with a total payroll of some eight million.

This progress is not just for Floydada, I believe it will continue to expand his business into several areas. He is one of the few meat packing companies in the state rebuilt and equipped to meet the state requirements.

WE HAVE two big costs of operation at The Blanco Offset Printing. Labor and newsprint. The companies have averaged a seven percent increase a year in the last five years. Fact is they've averaged a price increase this year. We had one in April and gonna raise us again in November.

So, the price-wage freeze has helped us from that point of view. It seems to me that labor unions have caused so much inflation. And this is the case in newsprint cost. Labor increases in the pulp mills.

While the Hesperian has increased advertising rates in the past nine years and Blanco Offset has increased printing newspapers only five percent in the last five years, the price freeze holds any increases at this point.

Well, through the past years we have continued to increase newsprint and labor increases. And friends, it's a tough fight!

I was sorry to see Governor Preston Smith "lose" against the President. And the nation, this sort of thing is in with the labor unions that are fighting the President.

Stambough of Floydada; seven grandchildren and 10 great grandchildren. Burial was in Kress Cemetery.

Mrs. Connell

Services for Mrs. James Connell, 50, the former Elvora Louise Billington of Floydada, were conducted Thursday in the First Christian Church in Amarillo. Mrs. Connell died Tuesday morning of last week in High Plains Baptist Hospital in Amarillo after a lengthy illness from a malignancy.

Mrs. Connell was a native of Floydada and has been a resident of Amarillo for the past 30 years. She resided at 6205 Palmetto and was a member of the A. E. Shirley Club.

She served as president of the OES. She served as Matron in 1967 and as deputy grand matron in 1968. Mrs. Connell was president of the P. O. Club in 1965 and president of the following year. She was a member of the First Christian Church.

Survivors include two sons, John and Jimmy of Houston, J. C. Billings of Amarillo, mother, Mrs. Lucy of Lubbock.

A.H. Kreis

Services for Arthur Kreis, 78 year old long time County resident, were held Saturday in the First Baptist Church in Caprock. Kreis died Saturday 5:45 in Caprock. He had been in failing health several months, suffering from a diabetic condition.

Kreis was born in 1893 in Knoxville, Tenn., and the former Mrs. Kreis were married there in 1914. They resided in Florida before moving to Floydada in 1924. He later moved to the Matador High Plains area and resided there until his death in 1964. Kreis was a farmer in Floyd County and still a land owner at his death.

He served as the president of the Floyd County Electric Association in the 1940s, and served on the board of the Caprock Baptist Church and as a Greek Mason. Survivors include two daughters, Mrs. McIntosh of Floydada, Bill (Irene) Holland and three half-brothers, Jacksonville, Fla., August, Ga.; two half-sisters, Mrs. Claude Armstrong of Knoxville, Tenn., and Alyea of New Orleans. Grandchildren and great-grandchildren.

Dr. Floyd C. Bradfield officiated by Rev. C. B. McMillister of the Methodist Church in Floydada, conducted the interment was in Floyd Memorial Park under the direction of Moore-Rose Funeral Home. Pallbearers were Jones, Malvin J. Lyles, Bob Bradfield and Bob Vickery.
