Floydada Woman Fined After Downtown Dispute, Cutting

A Floydada woman, Velma Weeks, was treated and released at Caprock Hospital Tuesday afternoon for facial injuries suffered in a knifing incident in downtown Floydada, according to Floyd County Sheriff Bud Rainey.

Another Floydada woman, Myrtle Coleman, was arrested and fined for aggravated assault in connection with the incident, Rainey said.

The "cutting" occurred at about 1 p.m. in the alley between White's Auto Store and the City Barber Shop.

Rainey said the Coleman woman went into a cafe near the scene of the dispute and had the owner call the sheriff's office. The women were still in the alley when Rainey and Police Chief Tom Hopper arrived.

Vacant House Near Baker Burns

The Floydada volunteer fire department answered a rural fire call Monday afternoon, about 3:30 p.m. An unoccupied house eight miles south of the Baker School, the old James Lee Nichols home, was completely destroyed.

The firemen were reported have had the blaze contained to one room of the house but ran out of water, causing the building to be completely lost.

They were able to save most of the contents of the house. Fire Chief Billy Marquis said that with a sufficient tank truck, the house could probably been saved with only minor damage. The fire department's 500-gallon pumper truck was dispatched to the fire but did not hold enough water to completely extinguish the

LAST week's icy weather brought to mind past winter storms to a number of old timers, however in this modern world of today, I doubt that any of us suffered from the cold and hardships as our forefathers. According to the Almanac, Floyd County had a hard winter in 1881, again in 1918, 1898 and 1899. Texas suffered its coldest winters those two years. I recall an unusual day in February of 1945 when the weathermen dished out everything but a sandstorm. There was rain,

IT isn't too many weeks before the county's annual spelling bee so you youngsters need to start preparing. One of the longest, and probably the toughest word to be thrown to contestants this year will be "Tintinnabulation". The sixteen letter word is on the official word list along with the shortest, "Jut". Copies of the official word list may be secured from principals or from A. W. Coltharp, county director. Youngsters in the fifth, sixth, seventh and eighth

grades are eligible. LARRY, Sharri and Kerri, children of Mr. and Mrs. Babe Jones of Floydada, spoke by phone with country-western singing star Connie Smith, Saturday night and saw their names flashed before the television audience on the Rex Allen Re-Hab Telethon being held in Abilene. The youngsters called to pledge a donation to the rehabilitation center during the telethon and were nonored by speaking to the singer, as well as seeing their names flashed over television.

Poodle Mothering Bird Dog Pups

When Bob Copeland's bird dog died after giving birth to five puppies, he was fortunate in having another mother dog, Jett, a half poodle who was just getting ready to wean her one pup.

The poodle was "good . . . like a good mother should" and took on four of the bird dog pups. to nurse them and save their lives. One of the pups had died before she could save it.

Copeland reports that the bird dog pups seem to be doing okay on the poodle milk. The pups are German wire hair pointers.

Appliance Care

Taking care of your appliance is very important. To insure their greatest value of your appliance, take proper care of it and use the appliance for jobs it was designed to

Some general rules of thumb for small electrical appliances are as follows:

§Always use the appliance's own electric cord. §Connect cord to appliance

before plugging into wall §Don't use extension cords.

§Unplug immediately after &Clean after each use.

§Don't use scouring pads or cleaners on no stick coating. §Don't put cold water on hot griddles, saucepans or fry pans it may cause weeping. §Store appliance under

cover to keep free of dust. §Some small appliances require special care-tactics. These include blenders, can openers, coffee makers, toasters and waffle irons.

For blenders - don't overfill the jar, clean by filling with warm detergent water running on low speed or by removing the blades.

Can openers - wipe with a damp cloth, remove cutter wheel assembly and clean occasionally. Coffee makers - wash

interior thoroughly, use brush for spout.

Toasters - empty crumb tray frequently, never use fork to dislodge particles.

Waffle iron - brush grids with pastry brush, they don't require washing (the brown film helps prevent sticking.) If sticking is a problem, recondition by covering grids with unsalted vegetable oil and letting them heat about 10 minutes.

Remember that proper care of an appliance is important and the performance of the appliance depends on proper

Weather Halts Harvest Activities

ther completely halted all cotton harvest activities on the South Plains and cotton sample receipts declined to a few hundred daily at the four U.S.D.A. cotton classing offices, according to W. K. Palmer, in charge of the U.S.D.A. Classing Office in Lubbock.

All cotton received at the area classing offices was from backlogs of cotton harvested before the snow.

Samples from only 36,300 bales were tested and classed at the South Plains U.S.D.A. cotton classing offices at Lubbock, Brownfield, Lamesa and Levelland during the week ending Friday, January 12th. This brought the total classed for the season to 1,288.000

Estimates indicate that approximately three-fourths of the season's crop is now out of

Grades were about the same as the previous week. Strict Low Middling Light Spotted (42) was the predominant grade at Lubbock during the week, making up nineteen percent of all cotton classed. Strict Low Middling (41) made up 16 percent, Low Middling (51) 18 percent and Strict Low Middling Spotted (43) 10 percent.

Average staple length also remained about the same. Staples continued to be predominantly 30 to 33. Seventeen percent had a staple lengh of 30, 18 percent stapled 31, 26 percent was 32, and 24 percent was 33.

Micronaire readings were steady from the previous week. However, only fifteen percent of all cotton classed at Lubbock during the week had micronaire readings in the pre-

Hospital with his uncle, Arthur Stewart, a patient, who is seriously ill.

Mrs. Clyde Bagwell received phone call Monday night from her niece, Mrs. Bill Pierce of Everett, Washington, saying they arrived home about midnight Sunday. They left Muleshoe Wednesday and were in the snow all the way. The Pierce family had spent the Christmas and New Years holidays in this area with

percent "miked" 3.3 through 3.4, 33 percent was 3.0 through 3.2, 30percent 2.7 through 2.9 and 11 percent was 2.5 and

The Agricultural Marketing Service os the U.S.D.A. reported brisk trading on the Lubbock market. Pričes were \$2.50 to \$5.00 per bale higher on all cotton, but demand continued strongest for better grade, premium micronaire cotton. Prices ranged from \$2.50 per bale over the loan for low grade, low micronaire cotton up to \$50.00 per bale over the loan for high grade. premium micronaire cotton.

Average prices paid for the most predominant qualities in the 3.5 to 4.9 premium micronaire range were: Strict Low Middling (41) staple 32 26.55 cents per pound, Strict Low Middling (41) staple 33 28.65, Low Middling (51) staple 32 - 25.30, Low Middling (51) staple 33 - 26.35, Strict Low Middling Light Spotted (42) staple 32 - 25.65 and Strict Low Middling Light Spotted (42) staple 33 - 26.30.

Cottonseed prices were steady and farmers received \$45 to \$58 per ton for their cottonseed at gins.

Four former drug abusers are in Texas, Oklahoma and New Mexico from January 8 to February 20 contacting cattlemen to procure the beef necessary to feed young men and women who live in Synanon, the drug rehabilitation center which has grown in fourteen years from a small group of addicts to a unified community with centers in five California cities and in

The four are Roy Gewant, Les Hart, Arlene Heede, and

Roy Gewant used heroin and other drugs for 15 years, served time in many state and federal institutions, and was considered incurable when he arrived at Synanon's door five years ago. Roy is an example of what can happen at Synanon for those declared "incurable" - he has remained free of drugs for five years now, and is a role model for newer residents of Synanon. Roy, 36, is now married and he and his wife live in Synanon's ranch community near Tomales Bay in Northern California

Les Hart is from Gruver, successfully rebuilding his life Texas, where his father, Don for almost two years. Hart, operates feedlots. In Arlene Heede, 25, began 1971, two Synanon representatives were in the Gruver area, contacting local cattle

feeders. They met Don Hart

and told him about Synanon's

program for drug rehabilita-

tion and reeducation. Don

asked them to talk to his son,

Les, who was using pills and

psychedelics and had found

other "cure" tries totally

unsuccessful. The Synanon

representatives talked to Les,

and four days later he came to

smoking marijuana in college, then went on to pills and finally heroin. Three years ago she came to Synanon, after spending time in hospitals and jails trying to end her addiction. Now she's one of the team members for Synanon's Supply Department, the department with the responsibility of seeing that Synanon obtains the food and other needs to keep it operating.

Don Thornton is 38. He started using pot and pills when he was in his teens, and after he got out of the Army began with heroin. For the next eight years he was in and out of jails and hospitals because of his heroin addiction. Then he came to Synanon in 1965 and he's been completely free of drugs ever since, able now to offer a helping hand to others still caught up in the drug scene.

Roy, Les, Arlene and Don personify the clean-cut, personable, healthy young men and women produced by Synanon, where the emphasis is on hard, rewarding work, wholesome socializing, self-reliance, honesty and personal

Floyd County Hesperian

SYNANON RESIDENTS (left to right) Les Hart, Arlene Hea Gewant (in rear), and Don Thornton are visiting Texas, Ok and New Mexico January 8 to February 20, See story enclosed

While in the three states, the four Synanon people will be available to local youths who may be in need of Synanon's environment. They will speak publicly or privately to individuals or groups requesting their appearance.

From a storefront operation in 1958, founded by Chuck Dederich, an ex-alcoholic, and subsidized by his \$33 unemployment check, Synanon has become in 1972 the oasis for nearly 2,000 men, women and children from every corner of the United States.

Synanon is responsible for the pioneering and development of the self-help concept of drug addict rehabilitation, an approach that is now widely accepted as being, by far, the most effective.

In late 1971, Synanon turned its energies toward the lost generation - America's teenagers. At no charge, with no federal or state welfare aid, Synanon welcomed 500 addicts, mostly teenagers, juvenile delinquents, some Vietnam war veterans.

One of the facilities Synanon operates is a factory building encompassing one square city block in San Francisco, a gift from N L Industries (Dutch Boy Paints). This additional space will enable another group of addicts to enter Synanon this year.

Another unprecedented change has taken place at Synanon, allowing it to accept more new residents. Two full-scale ranches have been acquired in California. There young people are developing character, getting in top physical and mental condition in the clean country air, and gaining their self-respect in Synanon's drug-free, alcoholfree, crime-free, violence-free and tobacco-free community.

Roy Gewant, Les Hart, Arlene Heede and Don Thornton have three purposes their current Texas. Oklahoma and New Mexico trip: to thank the cattle industry for the tremendous support it has given Synanon in the past, to impart the need for continued support of Synanon in its efforts to

reshape the lives of the many additional troubled individuals who are seeking help, and to provide information to anyone who may wish Synanon's help in solving their own problems of drug addiction, alcoholism, alienation, or other character disorder. It takes 400 head of cattle a

year to feed the Synanon population, and organizations like the National Livestock Feeders' Association, Texas Cattle Feeders Association. Kansas Livestock Association, Nebraska Livestock Feeders' Association, Colorado Cattle Feeders Association, Arizona and California Cattle Feeders, and Iowa Livestock Feeders Association and Iowa Beef Producers Association have given Synanon their full support.

Synanon continues to grow and provide a service to the community, and a home to those in need. In addition to cattle, the American business community provides other food items, clothing, automotive parts, building materials, and other essential items.

Education is a key word in Synanon today. A wide variety of on-the-job vocational training takes place. The Synanon School (approved by the State serving his second ter of California Department of State Legislature and vi Education) offers a full range of subjects. A research institute, where Synanon will Agriculture Committee study its own processes, has recently been added to the educational opportunities available to Synanon resi- Cates stated, "I am e dents.
