WELL, YOU CAN'T PLEASE everyone. After Atlanta's Hank Aaron hit number 715 homerun Monday night and beat Babe Ruth's record and Atlanta reporter was interviewing local people about the event.

"Aaron and Watergate — that's all we've been hearing for months," said the Atlanta citizen. "I think folks are good and tired of it."

The man, declining use of his name, said he was a bus driver triet of the city.

"Even the blacks are a little fed up," he said. "We set the records but we can't win a ballgame. People are sick of finishing fifth. I hear the grumbling all the time on the bus."

WE HAVE BEEN DOING some more research on the top Whirlette scorer. According to a report in the Hesperian of February 4, 1965 Dee Ann Wilson broke the old record at Floydada High, scoring 51 points, the record still stands.

THE FAMILY HAD FINISHED dining at a restaurant and some of the children left part of their steak on their plate. The father called the waitress and asked her to put the remaining steak in a bag to take home to the dog.

"Oh, Daddy," cried Junior, "are we going to get a dog?"

IT'S BEEN A GOOD week as we have enjoyed the revival at the Methodist Church — good preaching, good singing, good fellowship.

Fred Cardinal's breakfast crew did a good job...even cooking B. A. Robertson's All Bran cereal just like he wanted it.

NOTICE IN MY FFA BANQUET Notes I overlooked mentioning that Dorris Nixon, Ann Henson and Carolyn Marble were recognized for meritorious service to the success of the stock show. Sorry, I overlooked that, girls!

MRS. TAYLOR WAS angry with her son for saying a four-letter word. "But, mother," the little boy protested, "Tennessee Williams uses that word."

"Then, don't play with him anymore," the mother replied.

Second place winner in the Regional Bee will receive an Encyclopedia Britannica set and third place winner will receive a 12-inch black and white portable TV.

Water Rates Going Down 40%

The Floydada City Council voted in its meeting Monday night to lower water rates in the city from the May meter readings through the September readings.

The council felt this would encourage everyone to have beautiful yards and gardens. Last year the discount was on for three summer months. The council retained the \$7.00 minimum for the first 2,000 gallons as stated in the present water rate.

In other business councilmen Leroy Burns, Wayne Russell, and Johnny Bill Sue were sworn in for another term of service on the council. Another councilman re-elected was Gary Carthel, who was unable to attend due to

usually sell paraffin. For easier application of crayon, melt uncolored paraffin with it. This also will make the color lighter. Use a different artist's brush and muffin cup for each color. Dip brush in melted wax and transfer quickly to egg, painting in each color according to penciled design. Wax will dry as it cools, so keep the wax in the muffin tin warm while painting.

FELT TIP MARKET-Use different colors of felt tip markers to draw designs. Do not overlap colors as top might smear bottom color.

For a lasting effect spray eggs with a plastic coating or cover with a thick, clear shellac applied with a lint-free cloth. Pile decorated eggs in a pretty bowl or other container. Hang them from trees by threading a string or colored cord through the holes and tying a knot at the end of the string. If the hole is too big, thread a sequin on the string before knotting.

Raw eggs blown from shells are fine for family use, say TDA home economists. They can be scrambled for breakfast the next day or used in cooking. To keep for longer periods, eggs can be frozen. To do this blend yolks and whites by stirring. Do not beat. Put blended eggs through a food mill or a medium-mesh strainer. Add 1/2 tablespoon corn syrup or sugar or 1/2 teaspoon salt for each cupful of eggs to prevent yolks from becoming gummy during storage. Place in a rigid, moisture-proof container, allowing for expansion of up to three-quarters of an inch. Seal and freeze. At 0 degrees F., eggs will retain freshness for nine to 12 months. Thaw overnight in the refrigerator. In recipes three tablespoons of frozen whole egg equals one egg in the shell.

Dougherty Club Meets

Dougherty Home Demonstration Club met April 3 in the Council Room in Floydada with club president, Mrs. G.W. Smith presiding. A devotional reading was given by Mrs. Ray Carthel after which seven members and the agent answered roll call by telling what each likes in the new fashion trends.

During business the 1974 Committee Recommendations were read and adopted and the club voted to support the Council in placing a Commemorative book in the library in memory of Bill McNeill.

Extension Agent, Mrs. Billie McMorris gave the program on "Looking Your Best." She pointed out the present and coming styles tend to be more feminine, modest and comfortable. She told that small belts and shoulder interest are some of the changes appearing on the fashion scene.

Two games were led by Mrs. C.A. Caffee after which Mrs. Ray Carthel served refreshments furnished by Mrs. Bob Ross.

Attending the meeting were Mmes. G.W. Smith, Carmel Eastham, C.A. Caffee, R.H. Crawford, A.H. Kreis, Ray Carthel and Mrs. McMorris.

Museum Board Reviews Plans

A long awaited realization of museum plans was viewed by members of the Floyd County Historical Museum board Monday during their quarterly meeting. Display walls featuring a meandering path with glass cases of various sizes and shapes stood ready for committees to begin arranging educational exhibits.

These exhibits will tell the story of Floyd County from the natural history through Indians, Spaniards, soldiers, cattlemen, nesters and city development to the coming of modern transportation.

Ted Bell, president of the board, read the list of project chairmen who were asked to have displays prepared by Old Settlers in May. Jim Word reported for the planning committee. He said that display cases had been completed up to the electrical wiring, which is to be done this month. Old

beaded ceiling from early day Floyd County houses was utilized in the case construction. Builders Mart found some unused beaded paneling that had been stored for years, which they gave to the museum to complete the display cases. Carpenter work was done by Green Thumb workers and Charlie Cross.

Mrs. M. J. McNeill reported to the group that the Museum Auxiliary would resume the Artist-of-the-Month showing in May.

A membership drive was begun by board members paying their 1974 museum dues. Membership cards were handed out to be used in recruiting others. Ted Bell discussed plans for a meeting and reception honoring all museum members upon completion of the drive.

Mrs. Q. D. Williams

reported a request from South Plains Junior College for a copy of Mrs. S. W. Ross's book, "The History of Court Houses in Floyd County" in memory of all Floyd County students who have attended the college.

Mrs. Don Marble told of the continuing need for volunteer hostesses or hosts who can give an afternoon to guide visitors through the museum.

Appreciation was expressed to the Junior Historians and Mrs. Ted Bell's history classes for their work in constructing replicas of historic sites.

Following the business session members adjourned and viewed more display boards in the upstairs section built by the Green Thumbers.

We plan for it to help us in our work. Want to say many thanks to Mr. Harris and the FFA boys for the salads they brought from their banquet. Everyone enjoyed them very much.

'Postique' To Open In Lubbock Friday

Elmer J. Reed, Jr., Postmaster, Lubbock, announced today that a Postique, a Postal Store, will open in the lobby of the Main Post Office, 1515 Avenue G, at 1 p.m., April 12. Regional and District Postal Officials will participate in special ribbon cutting ceremonies at the opening. April 12, 1974 is the 65th birthday of the City of Lubbock — the city charter having been certified on that date in 1909.

The Postique is located in a green carpeted area of the Main Post Office lobby. It is a replica of the Old Singer's General Mercantile Store — the first known business establishment in the area which has become Lubbock. "Old Man Singer's Store", established prior to 1881, became the first area post office and gathering place for yarning, while serving buffalo hunter, trader, Indian, drifter, cowboy and cattleman. The store, on Lake Punta de Agua in

Yellow House Canyon, was located at the intersection of two military roads, between Fort Griffin, Fort Sumner, Fort Stockton and Fort Elliott. The site was actually marked on Spanish Land Maps 300 years before the Anglo found the lake.

Postmaster Reed quotes a Lubbock old timer, Rollie Burns, on his first sighting of Singer's store: "I rounded a bend in the canyon and saw Singer's store, diminutive and forlorn, nestling on the southwest side of Lake Punta de Agua. When I rode up, a dozen or more horses were tied to the hitching rack out front. In and around the store was a motley crowd of cowboys, a few Mexicans and a half-dozen Apache Indians. I mailed my letter, bought a drink of whiskey and some candy, stood around awhile, and then started back."

A specially postmarked and cacheted envelope will be made available to collectors to commemorate the occasion. History and patriotism are represented on the cachet, a vignette in blue, gold and black. The cachet features a line drawing of Singer's store, the city of Lubbock official seal and the Postique service mark. The cacheted envelope will bear the new ZIP Code stamp and will be cancelled with the unique Postique cancellation which has the word "Postique" in stylized script in the killer bars.

Requests for cachets should be sent to "Postique, Postmaster, United States Post Office, Lubbock, TX., 79408." The cacheted envelopes, stamped and cancelled April 12, 1974, are 35¢ each or three for \$1. A Number 10, self-addressed, stamped envelope should be included for return of the cacheted envelopes. Orders will be filled as long as the supply of cancelled cacheted envelopes permits.

Waltons Program Set

Jason is urged to enter a music contest, Ben to be a salesman, John-Boy to prepare himself for college. She makes Mary Ellen a dress for the big dance; and in her determination to teach her daughter to dance, she manages to move her paralyzed leg and bring a glimmer of hope into the family. When little Elizabeth asks why would God punish someone so good, Olivia's answer is merely, "There's a purpose in everything, and God knows what it is even if we don't."

The direction and script for this special telecast is by Philip Leacock and John McGreevey, the same "regulars" that have made the fictional Walton Family welcome television visitors in over 20 million American homes every Thursday evening. Miss Michael Learned, who plays Olivia, and Richard Thomas, who plays John-Boy, each won an Emmy award for their characterizations in the series, which has garnered no less than half-a-dozen awards from the Academy of Television Arts and Sciences.

This Easter Sunday special is one of several telecasts that will be sponsored by the ABA in cooperation with The First National Bank in Lockney. On April 26, a "Wild Science" program will be seen on NBC, Channel 11, and in June the ABA will sponsor a four-part series on Benjamin Franklin.

Ag Teachers Tell How To Save Tractor Fuel

O. L. Harris, Larry Smith and Milton Kirby, Vocational Agriculture Instructors at Floydada High School, submit the following suggestions for making the maximum use of tractor fuel. The information was provided by Norman K. Waggoner, Tractor Maintenance Specialist at Texas A&M University.

Mr. Waggoner states that never has there been a time when a good schedule of regular maintenance was more important than now. No engine can make

maximum use of fuel without an abundance of clean air and clean fuel. This calls for servicing the air filter to assure the engine's "free breathing". Give special attention to keeping the fuel clean and serving the fuel filter.

Operators may be forced to accept a low grade fuel that may be high in sulfur content. Sulfur in diesel fuel should not exceed one-half of one percent. A greater percentage than this will require more frequent oil changes.

Tillage practices might well be analyzed. Can the number of trips over the field be reduced without affecting yield? Can some tillage operations be combined? Maybe we should ask ourselves, "is this trip really necessary?" Being sure tillage implements are properly adjusted will relieve side draft and reduce power requirements.

Selecting the proper forward gear to match the load will greatly improve efficiency. In many cases an operator can shift up to the next higher gear and throttle back. Diesel tractors give better fuel economy when fully loaded.

Weight the tractor to keep wheel slippage below 15%. Preferably about 10%. It has been found that wheel slippage of between 15-20 percent increases fuel consumption 10% and tire wear 40%. Excessive weight will also waste fuel. So good judgment is required here. Using the small tractor for small jobs and big tractor for big jobs is more important today than ever.

Don't "baby" the tractor, load it and work it. Remember that an engine that is idling is not idle at all. It is burning valuable fuel.

U.S. Might: Farm Power

The United States is one of the world's few areas of highly productive agriculture. With only 7 percent of the world's land area, it produces three-fourths of the world's soybeans, half of its corn, and more than a fourth of its beef, pork, and milk.

WHAT ONE PERSON CAN DO

H.E. Hahn, Business Executive & Clown

If there's anything a businessman is not expected to be, it's a clown. But that's what Herbert E. Hahn, a Goodyear executive in Akron, Ohio, becomes once a week. Kids love it. And so does he.

Ten years ago, Mr. Hahn was asked to serve as a Santa Claus at a Masonic Lodge children's party. He had no idea what he would do to amuse the youngsters, "but I did as soon as I saw their trusting, smiling faces. It was beautiful."

After that, Mr. Hahn knew that being Santa once a year would never be enough. Watching some Shriners perform as clowns, he decided to join the group. He learned the intricacies of putting on clown makeup. His wife created his costumes. He added refinements, and in about a year, he was a professional.

"Herbie the Clown" began appearing at hospitals, nursing homes, orphanages and wherever a clown could bring a sparkle to children's eyes. His first solo appearance was in the Detroit Thanksgiving Day parade. Mr. Hahn pays for his own costumes, makeup, gimmicks and plane fare. His wife always accompanies him.

"I told an old-timer it was exhilarating," Mr. Hahn recalls, "and he said 'I know what you mean. It's like you've taken a bath inside and outside. It's a good, clean feeling.'"

"The rewards are intangible but they're there in good measure," Mr. Hahn says. "How many people do you know who are paid with smiles and laughter?"

Dressing in a funny costume is one way to bring joy into the lives of others — and a good one. God made us in such a way that our happiness increases as we try to give it away. Try it. Your friends will love it. And so will you.

By 1985 the U.S. will have some 700,000 fewer farms than it does now, according to the U.S. Department of Agriculture.

Before 1930, it took more than half an hour of labor to produce a bushel of corn. In the last few years, U.S. farmers have produced a bushel of corn with less than 10 minutes' labor.

Pinto Bean Production Profitable

Pinto bean production on the High Plains is a distinct possibility if farmers are careful to follow guidelines for production as outlined in the 1973 Annual Research Report from the High Plains Research Foundation.

A pinto bean production study was established at the Foundation in 1972 to determine the feasibility of pinto bean production in the Texas High Plains. The study is in cooperation with Womack Brokerage.

Jim Valliant, Foundation research director, said there were several major reasons for conducting the study. First, the Texas High Plains is located closer to the area of major consumption than Idaho, the present major production area. Also the growing season for pinto beans is shorter than crops being grown presently in the High Plains and should make greater use of the rainfall since the greatest percent of rain occurs just prior to the blooming period for pintos.

Then, too, pinto beans can be harvested early enough to allow the same area to be planted to small grains for grazing or for harvest.

Valliant adds that if favorable yields are obtained, returns per acre would be competitive with crops grown in the area.

He noted that the short growing season is another plus factor. "Pinto beans can be used for replanting weather or diseased damaged summer crops," he said.

Linda Kaye Henning To Appear At Hayloft

Today's Linda Kaye Henning is a far cry from the girl who played the role of simple, homespun Betty Jo on "Petticoat Junction" for seven years. That girl has grown into a warm, sophisticated and talented actress whose roles have run the gamut from the gentle daughter of Tevye in "Fiddler on the Roof" to a sexy striptease dancer — "Gypsy" in the musical about Gypsy Rose Lee.

Now, Miss Henning will be giving Lubbock theatre audiences a treat as Josefa, the childlike and completely captivating chambermaid in Marcel Achard's "A Shot in the Dark", the next presentation of the Hayloft Dinner Theater. Preview nights are April 9, 10 and 11.

Linda has wanted to perform as far back as she can remember, and her mother — herself a successful actress before she married television writer, Paul Henning — saw to it that Linda had the necessary career foundation of ballet and voice lessons, both of which began for

LINDA KAYE HENNING

Linda at an early age. As a freshman at San Fernando Valley State College, she became convinced that her range of expression would be broadened if she extended it to acting.

When her father was reading "Petticoat Junction" for the cameras, the late Bea Benadaret, who was to star, saw Linda on stage in "Bus Stop", and suggested that she audition for the ingenue role with the result that Linda was given the

role despite her parent rather than because of him. "With Bea in my corner, it really helped. But, I had to prove myself twice over to convince my father."

Off-screen, her interests and outside activities are kaleidoscopic. When she is at home and at leisure, she attends classes at UCLA, specializing in English Literature, purely for the pleasure of learning. She also attends, as well as addresses, acting seminars. She is involved in dancing and singing lessons and works out in a gym regularly. And, there are several charitable endeavors and fund-raising events in which she takes an active role.

Those who followed "Petticoat Junction" will remember that Linda married her co-star Mike Minor, both on and off-screen. After four and one-half years of marriage, they are now divorced.

"I have no desire to become a household word and no aspirations to be a 'star', observes Linda. "But, I would like to be well-known and respected for my acting ability so that I can always work. I love my work."

Take a second look at that 'loving friend'

By Abigail Van Buren

© 1974 by Chicago Tribune-N. Y. News Synd., Inc.

DEAR ABBY: As my husband and I were preparing to make a trip to Europe by air, one of my so-called dearest friends came to me and asked me if I would please get a \$50,000 airplane insurance policy naming her as the beneficiary. She said she would gladly pay for the insurance!

I was shocked to say the least. What do you think of such a suggestion from a supposedly loving friend? I'd really like your opinion. PEACHES

DEAR PEACHES: Let me put it this way: If this "loving friend" invited me to her home for dinner, I'd wonder who she was loving, and I'd also take a food-taster along.

DEAR ABBY: It's a cinch you've never been to Alaska, otherwise you never would have told that 45-year-old woman who was husband hunting to go there.

There are no extra marriageable men here, plus jobs are scarce and prices are double. You should have told her not to go to Alaska unless she had a round-trip ticket and plenty of money. She's too old to be a go-go dancer. ERMA IN ANCHORAGE

DEAR ABBY: A few months ago I was hospitalized for a heart condition, and upon release, my doctor told me I had to take it easy.

My son, his wife and their three very active young children are neighbors to us, and the children are here more than they are at home. They wear me out, but I can't bring myself to send them home.

My husband hired a housekeeper to help me the last few weeks, but my daughter-in-law has begun to "borrow" her, so once again I am alone with those undisciplined children.

My daughter-in-law is a good girl, and I'm sure she doesn't realize the toll the children take on me. She's also very sensitive. My son tried talking to her about letting the children spend so much time at my house unsupervised, but she ended up in tears, all upset, and the next day they were back.

How can I handle this without hurting anyone? I love them all very much. NAMELESS, OF COURSE

DEAR NAMELESS: First, tell your housekeeper that she is not to be "borrowed" by your daughter-in-law. Then tell your daughter-in-law to please quit commandeering your help—that you love her and the kiddies, but you aren't up to having them over unless she is there to discipline them. Don't worry about her ending up in tears. Better that than you ending up in a box—before your time.

CONFIDENTIAL TO WORRIED AND WAITING IN N.J.: The answer is YES! See a physician at once. And if you can't get an appointment immediately or can't afford one, contact your public health department and tell them what you have told me. And do not wait another day!

Problems? You'll feel better if you get it off your chest. For a personal reply, write to ABBY: Box No. 69700, L. A., Calif. 90069. Enclose stamped, self-addressed envelope, please.

For Abby's booklet, "How to Have a Lovely Wedding," send \$1 to Abigail Van Buren, 132 Lasky Dr., Beverly Hills, Cal. 90212.

1,000 Attend Annual Lighthouse Electric Annual Meeting

A big crowd of people from seven counties that Lighthouse Electric serves heard REA administrator David Hamil speak and over 1,000 attended the barbecue preceding At Floydada High School Saturday.

Two directors were elected to serve on the Lighthouse board, Henry Scarborough of district six and Tom Porter of district seven. They will serve three year terms. Scarborough was re-elected, Porter takes Chloma Williams' place.

Crosbyton attorney Harry Jung conducted the election for directors.

South Plains farmer Kendis Julian served as master of ceremonies. William Bertrand gave the invocation, Claude Weathersbee read the minutes of the last meeting, Scarborough verified notice of meeting to the membership and A. B. Seegers gave the audit report.

Lighthouse manager Alton Higginbotham gave the annual report in which he pointed out that assets of the local REA had climbed to almost eight million dollars, serving almost 5,000 consumers. He also mentioned that Lighthouse was the biggest single taxpayer in Floyd County.

President of the board Gerald Lackey introduced Hamil. Lackey also expressed appreciation for the many years that Ned Bradley has served as emcee of the annual meeting, 1952 through 1973.

Hamil praised the people of this area for their industrious efforts in combining grain and cattle feeding in this area... for the big cotton gin at Crosbyton. He mentioned that the American people are eating twice as much beef now as they ate in 1956... some 115 pounds per person per year.

In praising the work of REA, he said that of \$10 billion in loans the government had lost only \$44,000... about 1/100 of 1% loss. He complimented Lighthouse on paying ahead of its payout schedule some \$800,000. He explained why Lighthouse and other electric cooperatives must borrow money... it takes money to properly equip to serve the electric needs of the rural people... he compared this to the progress of contrails to super highways.

In looking at the future, he said that electric power is going to coal, that there is 500 year's supply of coal in this country. He complimented Lighthouse on 35 years of progress, growth and service to the people of this area and praised the Lighthouse board of directors for good management.

Mr. and Mrs. Hamil were given a Tom Warren creation of "The Well" by Higginbotham. Warren of Plainview makes the wood based statuettes and western scenes with a blow torch

from metal. Mrs. C. H. Huffman of Lockney won the grand prize of an 18 cu. ft. refrigerator-freezer combination.

Mills Run More Cotton In February

NEW YORK — American mills are running more cotton.

That was the crux of a new report issued by Cotton Incorporated, the research, sales and marketing company sponsored by U.S. cotton growers.

Cotton Incorporated President J. Dukes Wooters Jr. said figures just compiled for February show that the seasonally adjusted daily usage of Upland cotton by U.S. mills was 29,700 bales — an increase of 1,600 bales a day over January consumption.

"It's been a long time since the daily cotton usage rate showed such a dramatic turnaround from one month to the next," said Wooters.

The report also shows that the usage rate in February was up 600 bales over the figure for February 1973.

Wooters said the new report from his company's economic research and development analysts backs up Cotton Incorporated's position that demand for cotton from the 1974 crop will continue strong and prices for producers will remain in the 60-cent range.

"America's cotton growers have demonstrated that

they respond to marketplace demands. They deliver when they can make a profit," said Wooters.

"As long as mills continue to signal their demand by bidding a price that will allow producers a profit, producers will continue to deliver."

WE PUT MORE INTO OUR IRRIGATION SYSTEMS SO YOU GET MORE OUT.

When you buy Gifford-Hill irrigation equipment, you get a lot more than just equipment. You get a quality product. One that's proven itself superior to anything in the field.

You see, Gifford-Hill is one of the nation's leading suppliers of irrigation equipment, and has

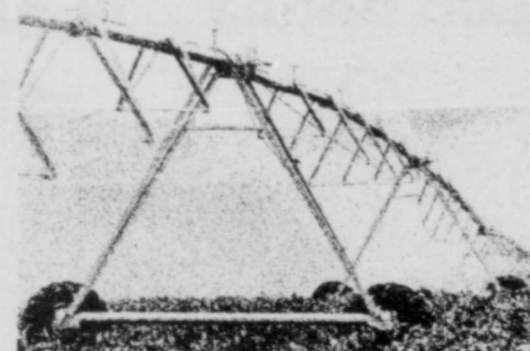

been for over 20 years. And one of the reasons we have remained a leader is our concern for quality. That along with our understanding of the problems you face.

Take our 360 pivot sprinkler for example. It's a classic. The 360 is recognized throughout the industry as the most sophisticated, yet the simplest to operate, pivot system on the market.

But it's the little things, the care in designing and engineering, that really set the 360 apart from all the others.

For example, the water pattern is unique. By placing the sprinkler heads further apart near the pivot point and closer together at the end, the 360 applies water uniformly along the entire length of the system.

We also make the best surface irrigation pipe around. Each joint of our aluminum pipe is manufactured under stringent quality controls. And it's roll-welded

to insure uniform wall thickness.

Gifford-Hill makes the most dependable and economical pipe available for underground installation, too. Vanguard PVC Plastic Pipe.

Aside from durability and flexibility, Vanguard features an exclusive rubber gasket joint. Thousands of feet can be installed in one day. In practically any kind of weather.

Of course these are only a few of the outstanding features of our products. The

point is that we know and understand the problems you face everyday. And we have the expertise and equipment to help you solve them.

But more important, we stand behind our products. We make them. And we guarantee them.

So, if you have an irrigation problem, call the irrigation experts. Call Gifford-Hill.

For more information on these and other Gifford-Hill products, contact your nearest Gifford-Hill representative.

FLOYD PHILOSOPHER

Claims He Has Come Up With A Use For All Those Gas Rationing Coupons

Editor's note: The Floyd Philosopher on his Johnson grass farm may be a little rough on politicians this week but that's his lookout, not ours.
 Dear editor:
 Since nobody else is giving any thought to it I figured I might as well. According to a news item a while back the government in a moment of panic rushed out and had 12 million dollars worth of gas rationing coupons printed up, just in case rationing became necessary. You're not going to catch Washington napping once it wakes up after sleeping through the arrival of the energy shortage.
 Well, as you know, when the Arabs realized our money stopped flowing in when their oil stopped flowing out and a sheik can't buy a new tent with un-sold oil, they lifted the embargo and all those rationing coupons are now stacked up in a warehouse in Washington gathering dust.
 And some people are saying, well, that's 12 million down the drain, but it doesn't have to be so. I have given the matter some thought

and there is a use for those coupons.
 Look, every time you pick up a newspaper these days you read that somebody else high or low in government has been indicted for perjury. Generally this ruins their career since it is one thing to lie in private practice but another to lie to a grand jury.
 Now lying to a grand jury, while it may have had its moral leadership planted in Washington, is not limited to the capital and officials all around the country are being indicted by grand juries who don't seem to realize the jails are over-crowded as it is.
 So the idea hit me, why not utilize those gas rationing coupons? Why not issue one book a month to every office holder in the nation, with each coupon good for one lie? Tell a lie, get caught, tear out a coupon, hand it to the grand jurors, and their hands are tied. Use up your quota before the month is out and face the consequences.
 You reckon those 12 million-dollars worth of coupons are enough to go around?
 Yours faithfully,
 J.A.

If you can't get PIONEER Brand 8311 here are some excellent alternative hybrids for High Plains farmers.

Pioneer Brand 8311, the "Golden Bronze Yield Leader," has been our most popular hybrid this year — so popular, in fact, that it may be in short supply in some areas. One reason is that the demand has been so great downstate where 8311's disease tolerance is so important. Fortunately, there are several other Pioneer Brand hybrids that are proven top performers on the High Plains. If you can't get 8311, ask your dealer about these.

- PIONEER Brand 8417**
This versatile yellow endosperm sorghum is a champion yielder in the medium-late maturity class, for irrigated or non-irrigated land. It has large open heads, uniform head height, strong stalks for easy threshing, good tolerance to smut and anthracnose.
- PIONEER Brand 820**
This top-notch full-season hybrid, is a consistently high yielder. Excellent drought resistance and standability plus good roots and stalks make it a good choice for irrigated or non-irrigated farming on the plains.
- PIONEER Brand 828**
One of the highest yielding sorghums you can plant, this full-season hybrid responds well to good management on good land with plenty of water. Plains growers like it because it holds its quality and threshes well even after an early freeze. It produces sturdy stalks with semi-compact heads of dark red grain.
- PIONEER Brand 846**
Famous for its versatility and adaptability, this medium maturity hybrid yields along with the full-season varieties. Resistant to smut, rust and MDM, its outstanding hybrid vigor and excellent drought resistance help it turn in consistently high yields even under stress.

Eighteen Year Olds Must Register By Mail

AUSTIN — Colonel Melvin N. Glantz, the State Director of Selective Service for Texas, has announced the use of "Registration by mail" in Texas.

Although inductions have ended, young men are still required by Federal Law to register with Selective Service at age 18. Failure to register makes the young

man liable for an extreme penalty of five years in prison and \$10,000 fine.

Recent reorganizations within the Selective Service System have left considerably fewer local board offices open in Texas. As a result, many registrants live a considerable distance from the nearest registration place. To make the require-

ment of registration more convenient for those men who are a great distance from a Selective Service Registrar, the forms for "registration by mail" will be used.

"Registration by mail" is not intended to replace the established procedure of appearing in person before a duly appointed Selective

Service Registrar. It is designed only as a supplemental measure to accommodate the young man who lives so far from a place of registration that going before the Registrar would be an inconvenience.

To accomplish registration by mail, the young man can simply write to his nearest Selective Service System Area Office requesting the new form for registration by mail. The

form will be forwarded immediately, and when completed, returned to Selective Service System Area Office requesting the new form for registration by mail. The form will be forwarded immediately, and when completed and returned to Selective Service, the young man will have complied with the requirement of Federal Law to register with Selective Service.

Glantz said: "Since inductions have ended, many people think it is no longer necessary for young men to register, but the law still requires each young man to register within 30 days before or after his 18th birthday."

Glantz urged young men to keep their records clean by timely registration with Selective Service, and added, "if a young man has reached age 18 and has not

yet registered, he should do so as soon as possible. To receive the registration by mail, the young men should write to the nearest Selective Service System Area Office or to State Headquarters, Selective Service System, Austin, Texas.

The nearest Selective Service System Area Office is located at AO #11377th in Plainview, Texas.
