have some big lakes and it is good to see the farmers utilizing that good water.

Time was, when we sorta discounted the price of a farm if there was a lake on it. We considered it waste land. Now it's a different story... those lakes are mighty valuable.

ONE MORE TIME... hope you baseball managers remember to bring in the scores to Gayle Daniel... the sports editor will be on vacation. Please and thank you!

RECEIVED THIS NOTE from Mat Pope out at Deming, New Mexico. "Please send us some rain... the trees and bushes are running after the dogs. It is so dry out here."

MARK TWAIN, in his reporting days, was instructed by an editor never to state anything as a fact that he could not verify from personal knowledge. Sent out to cover an important social event soon afterward, he turned in the following:

"A woman giving the name of Mrs. James Jones, who is reported to be one of the society leaders of the city, is said to have given what purported to be a party yesterday to a number of alleged ladies. The hostess claims to be the wife of a reputed attorney."

TALLEST TALE of the week: Alton Higginbotham says a man from Arkansas told him it really rains in that country. Why, the fellow said, one time the creek got so high you could see under it...

## Fly The American Flag Through July 4

Americans are asked to fly their flags from Flag Day, June 14 through July 4 this year as a 21 day salute to "Honor America."

... "this great anniversary festival ought to be commemorated as the day of deliverance, by solemn acts of devotion to God Almighty. It ought to be solemnized with pomp and parade, with shows, games, sports..." — John Adams, July 3, 1776.

The HONOR AMERICA program of the American Historic and Cultural Society was designed to increase the knowledge of the American public about its cultural heritage, constitutional form of government, and history, also to commemorate the anniversary of the independence of the United States of America.

This is accomplished by the dissemination of educational materials on historic sites and state or federal facilities, and by the conduct, sponsorship or dissemination of information about musical and cultural events, featuring examples of American art, music and culture.

The events included in the programs consist of historic commemorative ceremonies, parades, erection of monuments, band concerts, festivals of American folklife, viewing of historic documents in public buildings, contemporary musical entertainment and fireworks displays. The entire program is non-political and non-partisan.

## James Golightly Burned In Electrical Fire

James Golightly, son of Mr. and Mrs. Clifford Golightly, an employee of Lighthouse Electric in Floydada, sustained burns on the face and shoulder about mid-noon Friday while working on the J.S. Hale place.

Officials at Lighthouse said Golightly was taken to Central Plains Hospital in Plainview, by Moore-Rose ambulance.

The Golightlys reside in Plainview and James and his mother commute to work in Floydada.

A spokesman for Lighthouse said she understood that Golightly was working on a meter when his screw driver slipped, hitting live current. It caused a flash fire which burned the man, but his injuries were not believed to be of a serious nature, she said.

## Get Ready For Agriculture Census

All farmers on the High Plains, including cotton farmers, have a sizable stake in finding a remedy or a solution to the plight of cattle feeders, according to Don Marble of South Plains, President of Lubbock-based Plains Cotton Growers, Inc.

"If the recent year's disastrous cost-price relationship forces cattle feeders out of business and feedlots go empty, a surplus of feed grains and cottonseed products could easily develop," he says.

Accordingly, PCG has joined forces with the cattle industry, the Grain Sorghum Producers Association of Lubbock and others in pushing for federal legislation to provide emergency government-guaranteed loans to feeders unable to get financing through normal channels.

Bills have been introduced and hearings scheduled in both the House and Senate, and considerable bipartisan support is in evidence. The bill considered most likely to move in the Senate, on which hearings are set for June 17, is S-3579, co-sponsored by such notables as Democratic Senator George McGovern of South Dakota, Chairman of the Senate Sub-Committee on Agriculture, John Tower (R-Tex.), Carl Curtis (R-Neb.), James Eastland (D-Miss.) and Hubert

Humphrey (D-Minn.), and others. Republican Congressman Bob Price of Pampa has introduced H.R. 15079 in the House and hearings are to be held June 25 and 26.

In telegrams to McGovern and to Texas Congressmen and Senators, Marble said "Legislation is desperately needed authorizing emergency loans to cattle feeders - prevent empty feedlots, beef shortages and depressed markets for feed grains and cottonseed."

The U.S. Department of Agriculture's most recent estimate of U.S. cotton acreage and production, printed in the May issue of "Cotton Situation" obviously will need revision in view of recent developments on the Texas High Plains and elsewhere, according to officials of Plains Cotton Growers, Inc. of Lubbock.

USDA projected the U.S. upland cotton crop for 1974 at 14 million bales, to be harvested from 14.7 million planted acres, and PCG says it is reasonable to assume that some 2.5 million bales were expected to come from about 3 million acres in the 25 counties represented by PCG in the Lubbock area.

But since the USDA compiled those figures, it is pointed out, hail, high winds and continued dry weather in sections of the Plains have reduced the area's potential to around 2 million acres and perhaps 1.5 million bales. Excess rain has brought flooding of cotton fields in the heavy producing areas of Northeast Arkansas, Western Tennessee and parts of Mississippi and Louisiana. Some observers indicate this situation without quick relief could reduce acreage and production potential in those areas by as much as 10 percent.

Also there are reports that some of the acreage intended for cotton in the Southern half of Texas may have gone to grain sorghum instead.

The joint PCG-Lubbock Cotton Exchange Estimates Committee will meet in early July to compile standing acreage figures for PCG's 25 counties. USDA will release another national acreage estimate on July 11, but it will be an estimate of planted acreage as opposed to "standing" acreage.

So truly meaningful national cotton acreage figures will not be available until the following month, and at that time they are almost certain to be down from the May estimate.

Farmers and ranchers, get ready for the 1974 Census of Agriculture! Keep good records of your farming operations this year! This is the request of the Bureau of the Census, the Federal agency that will conduct the 20th nationwide Census of Agriculture during the first part of 1975. The Bureau is part of the U.S. Department of Commerce's Social and Economic Statistics Administration.

Farmers will receive their report forms by mail early in January. They should fill them out and mail them back promptly. Having accurate and detailed records will make it easy for farmers to do this. Questions will be much like those in the last previous agriculture census which covered farming and ranching during 1969.

Questions will ask for acreage of cropland harvested; quantity and market value of major crops produced; acres irrigated and means of irrigation; acreage treated with pesticides, lime and other chemicals; acreage fertilized by kind of fertilizer (dry, liquid, gas).

Questions on livestock and poultry will cover the number of each kind on the farm as well as the number sold and the sales value. Quantities and sales value of their products will be sought.

Details will be requested about farm products produced or marketed under contract. A few questions will be included about hired and contract labor, the number of workers and cash wages paid; also about any injuries to workers.

Further expenditure questions will cover amounts spent for feed, fertilizer, pesticides, lime, gasoline and other farm fuels, machine hire, and livestock and poultry purchases.

There will be questions about the various types and uses of land, such as cropland not harvested,

SCS PERSONNEL Fay Gooch and Layton Koch check out tailwater pit on the Connie Bearden farm about 2 miles west of Floydada. The tailwater recovery system will return runoff irrigation water back into the irrigation system to be re-used.

## Recover Tailwater

Many of today's progressive farmers are installing tailwater recovery system to re-use runoff water from his surface irrigation system. Most of the soil on top of the "Cap" in Floyd County is Pullman Clay Loam.

Under a properly designed and managed conservation surface irrigation system about 1/5 (20%) of the irrigation water will be lost to runoff. However, when a tailwater recovery pit is used about 3/4 (65%) of the tailwater may be recovered. This means that about 1/8 (13 1/2%) more water is available for the irrigation system.

A tailwater recovery reinforces confidentiality. It also allows the farmer to complete the report at his convenience with accurate information from his records.

## GI Bill Checks Due This Month

Educational assistance checks for some 150,000 veterans whose G.I. bill eligibility was extended by one month will reach them by late June or earlier, the Veterans Administration announced today.

On May 31, the day the G.I. education entitlement expired for veterans discharged between Jan 31, 1955, and July 1, 1966, the President signed PL 93-293 granting a 30-day extension to the eight years entitlement veterans normally have.

Long before the legislation was passed, VA accomplished all possible preliminary work for the speedy service in anticipation that some form of extension would be passed by Congress and approved by the President.

In addition to the May 31 law, a supplemental appropriation is needed to fund the increases, but speedy Congressional action is expected on the President's request for the necessary funds.

system consists of a storage pit, a pump and a pipeline to return the water to the surface system. At present cost-share assistance is available through the REAP program and the REC program for installing the storage pit and the return pipeline.

The Soil Conservation Service will assist farmers in working out the details of the pit size and shape and the necessary pipeline size to install a conservation tailwater recovery system.

Anyone needing more information on a tailwater recovery pit, other conservation measures, and cost-share assistance available for conservation practices should contact the Soil Conservation Service in the agriculture building on the courthouse square in Floydada, or telephone 983-2352.

A Weekly Report Of Agri-Business News  
Compiled From Sources Of The Texas Department of Agriculture  
John C. White, Commissioner

Estate prices Up... Peanuts More Popular... Demand for Cotton Increases... Watermelons on Market... Hay Cutting Underway.

**FARM REAL** estate prices jumped over the United States by 21 per cent during the past year, from \$233 to \$280 an acre. Although the per-acre prices may be higher in some areas of Texas, latest figures show Texas farm real estate prices climbed by a more modest nine per cent. The jump was highest in Colorado, 33 per cent, and Pennsylvania was second with 31 per cent, followed by Alabama, Iowa and South Carolina with 30 per cent.

**PEANUTS AND PEANUT BUTTER** are being consumed by Americans more than ever, the USDA reports. There were 524 million pounds of shelled peanuts used in edible products from August through December, 1973, an eight per cent increase over the same period for 1972. Experts think the increased demand for peanuts came because of the higher prices for beef, dairy products and poultry. Growers received about two cents a pound more for peanuts in 1973 than they did the previous year... Peanut planting in Texas is more than 35 per cent complete, but moisture is short for planting in the Cross Timbers area.

**COTTON CONSUMPTION** is up over the world by about two million bales, to about 59 million. The carryover in the United States August 1 is expected to be 3 1/2 million bales, below a previous USDA estimate because export volume now is expected to increase. Cotton planting in Texas is about 70 per cent complete, compared to 75 per cent at the same time last season. Planting is making rapid progress on irrigated fields on the High and Low Plains, but more rain is needed on the High Plains to complete planting. Boll weevils and flea hoppers are reported in cotton in the southern half of the State.

## Yard Of The Week

This week's selection is the yard of Mr. and Mrs. Noland Brand at 629 West Lee in Floydada. The design of landscaping, including large trees and evergreen shrubs, which present a pleasing appearance, was one of the many reasons the yard was chosen by the Women's Division of the Floydada Chamber of Com-

merce.

A large tree on one side of the lawn is balanced by spreading junipers on either side of the driveway and another circular planting of shrubs near the front doorway and porch, enhances the appearance of the tan brick home built in 1951. Several red blooming plants

environmental Protection Agency comes along and attempts to prohibit new construction, enforce anti-parking rules, and plow under downtown development.

Regardless of whether there is a land use planning act or not, the EPA insists that it has the final decision to approve new construction of buildings, roads, streets, parking lots, garages, shopping centers, recreational areas, amusement parks, sport stadiums, airports, and all kinds of commercial and industrial development. No business decision of significance can be made under EPA's mandates without the Agency's approval.

The decrees of the EPA

have only yet to be applied to a few cities. But when they get in high gear and if left alone to rule, our economic life will be much more regulated by Federal edicts than it already is.

When Moses, leading the Israelites, came to the Red Sea and the Egyptians were close in pursuit, Moses called on the Lord. The Lord said to Moses that I have some good news and some bad news. The good news is that the waters will part and you and your people can cross on dry land and be safe. The bad news is that we will have to first get clearance from the Environmental Protection Agency. If this imaginary situation had been true the Israelites would never have made it.

are near the west side next to the street.

Inside the fence, on the west and south, the length and width of the Brands' lot, is a row of Arizona cypress. This makes a pretty evergreen background for the home and yard, as well as a shady place for late afternoons, where they enjoy cookouts on their patio.

## Miss Debbie Willingham, Terry Huggins Recite Vows

Debbie Willingham and Terry Huggins were wed June 8 in the United Methodist Church in Blunt, South Dakota. The Rev. Wally Walton of Pierre, South Dakota performed the ceremony.

The bride is the daughter of Mr. and Mrs. E. G. Willingham of Pierre, and the groom is the son of Mr. and Mrs. Fred Huggins of Lockney.

Given in marriage by her father, the bride wore a gown of dacron and polyester organza with a midriff bodice and yoke accented with Chantilly lace and seed pearls. Rows of lace encircled the skirt and detachable train and her shoulder-

length veil of net fell from a lace crown. She carried a colonial bouquet of blue, pink, yellow and lilac flowers with ivy streamers.

Her maid of honor, Cheryl Stephens of Onida, South Dakota, wore a chiffon gown of spring colors, with underlining accented in blue, and carried a long stem red rose tied with a blue ribbon. The bridesmaids wore gowns styled to that of the maid of honor, each accented with a different pastel color. They wore picture hats of matching color and carried a long stem red rose with a ribbon of her color. Carrie Jo Eckman of Blunt, South Dakota wore a dress accented in yellow; Rayle

## Peggy's Meddlin's

FOLLOWING are some worthwhile wive savers passed along from the Farmer's Almanac:

If you are stung by an insect you can stop the pain of most stings in seconds by applying around the area of the bite a solution of 1/4 teaspoon of meat tenderizer dissolved in two teaspoons water. This is no substitute for medical attention if the reaction is severe.

Here's an ingenious way to clean an antique clock. Dip a ball of cotton in kerosene and place it on the floor of the clock. Close the door. Wait three or four days for the fumes to loosen the dust particles. They will fall and the clock will be clean.

A cloth dampened in club soda will clean stainless steel counters and range tops gleaming bright without streaks or spots.

When you wish to reuse plastic bottles and cans, the super market prices can be removed easily with nail polish remover.

A few self-stick carpet

squares laid on one end of a work bench create a padded area for protecting fine finishes or for holding rolling parts when repairing household articles.

Try this as a temporary repair for a tiny hole in a window pane. Fill the hole with a dab of colorless nail-polish, allow to dry and build up layers until the hole is completely closed.

When roasting with plastic oven bags it is a safe precaution against bursting to shake one tablespoon of flour into the bag before filling, this guards against "bumping"—a condition which can happen when a layer of fat prevents steam from escaping normally from the juices below. Follow carefully the manufacturers instructions for air holes and pan size.

In selecting a head of iceberg lettuce choose one heavy for its size. You can open it easily by holding it in both hands and hitting the stem end sharply on the table. The core will break and can be lifted out. Allow running water to pour into the head and the leaves will pull apart.

Can you tell whether your refrigerator door has a tight seal? Close the door on a piece of newspaper. Pull. If it slips out the door is not tight enough for efficiency.

Traveling families note this idea for packing children's clothes. Pack separate plastic bags for each child's daily clothing needs, shirts, socks, shorts, etc. At night stuff the bags with the soiled clothes and socks won't get lost or shirts misplaced.

Can't get that avocado seed to grow? Maybe it's planted upside down—the dimpled end is the bottom, the pointed end the top. Expose the top third to the light, the lower portion cover with soil or just immerse in water. In a month or two it will sprout.

Mrs. Iris Colston is a patient in Caprock Hospital where she is under treatment for broken ribs, sustained in a fall at her home.

Mrs. Billie Huggins, mother of the groom, and Mrs. V. J. Skaggs, the groom's grandmother, joined the honoree in the receiving line. They wore pom mum corsages.

Mrs. Merlene Whitfill displayed gifts. Mrs. Nelda Howard and Mrs. Jimmie Dee Whitlock served refreshments of coffee, spiced punch and coffee cake.

They don't worry about things like waiting for hot water when they want to do the laundry, or wash the dishes or things like that, because they know their electric water heater is fast recovery. They don't worry about service either, because they know we have over 100 trained people to provide any service that may be needed. ## Black boyfriend shocks her parents

By Abigail Van Buren

© 1974 by Chicago Tribune-N. Y. News Synd., Inc.

DEAR ABBY: Judy, our 22-year-old daughter, is a graduate student, living out of state. She's pretty and popular and always has been a leader and an honor student.

Judy had written us about a very fine black girl she had become friendly with at college. We live in a small mid-western town and never had anything to do with the few black families who live on the highway.

Judy phoned a few days ago and asked if she could bring a young man home for a visit. I said: "Certainly."

Then she said: "He's black."

I asked: "HOW black?"

She said: "About as black as black can get." Then she went on to tell me that he was the brother of her college friend, also a graduate student, and an outstanding person, etc.

I managed to control my emotions, and asked whether she was serious about him. She said: "Possibly, but I don't think I'm lucky enough to get him." [My stomach turned over!]

Abby, no one in her father's family or mine would ever understand it if Judy were to marry a black man. I can see nothing but heartaches and problems ahead for her if she married him. I'm not a bigot, but we just aren't ready for something like this. I told her not to bring him home until I could prepare her father for the shock, so she said: "Unless you will treat him properly, I'd rather not subject him to any humiliation." That's where we left it.

Now, what do we do, Abby? SLEEPLESS NIGHTS

DEAR SLEEPLESS: Unless you and your husband can treat your daughter's friend as though he were a Caucasian with a suntan, tell her not to bring him home. But don't be surprised if Judy doesn't come either. She's old enough to choose her own friends. And by the way, what is your definition of a bigot?

DEAR ABBY: My career is my home and family, and I am proud of it. But for some strange reason, when a housewife is asked what she does, she very apologetically says: "I'm ONLY a housewife." This irritates me no end.

When I am asked what I do, I proudly say: "I am an oikologist." The word comes from the Greek words "oikos," which means house, and "ologist" which means "one who studies" or "is an expert in."

Please pass this on for other housewives. Perhaps they will feel more important if they use it, too. OIKOLOGIST

DEAR OIK: I wouldn't recommend springing that on the average Joe without defining it. The "oikologist" might be mistaken for an expert on pigs.

DEAR ABBY: I hope you'll put this in your column for those nice people who are guilty, but are not aware of it.

Two months ago I had a breast removed, also the lymph glands under my arm. [Cancer.] I am doing fine, and I look fine, so I started to go to my club meetings and to church.

Just about every other person I meet is so happy to see me up and around again that they slap or grip my sore arm. I'm sure they don't realize how painful this is because they don't connect my operation with my arm.

They are dear people, and I wouldn't hurt them for the world, but, Abby, my arm is still swollen, has fever in it, and when it's gripped it hurts like mad. It's getting so I hate to go anywhere because I'm afraid of this painful greeting I'm sure to get.

Maybe some of those nice but slap-happy people will read this and take note. ACHING ARM

DEAR ACHING: Consider it done.

### Floydada Care Center News

By Dessie Turner  
This has been a wonderful week, but we have stayed busy. Good visiting with our residents.

We gave manicures to our woman residents Wednesday. Most everyone took part and we hope everyone enjoyed this.

Thursday was our monthly birthday party. Everything was nice. Cake and punch were delicious. We are always grateful to the women of the City Park Church of Christ for this occasion.

We have two new residents, Martha Burke, and Theodule Cardinal. We hope they will be happy with us.

Our Care Center will be entering a scrap book in a contest given by Challenge Homes. This will be the first of August. There will be a trophy and a \$50.00 cash prize. We will be hoping to win. We need your help. Any pictures and articles of interest will be appreciated. I'm sure there are people in our community who can be of help to us.

Don't forget about our picture taking Thursday [today] at 6. Be sure to encourage your loved one to have their picture taken.

## KEEPING IN STEP

You don't have to be "square" to go to church. The image of dour individuals with "holier-than-thou" attitudes is as old fashioned today as people dancing the minuet.

Take the Adamses, for example. They aren't youngsters, to be sure, but they are very much in step with the times, and their home is a haven for teenagers. Mr. Adams is a lawyer, who works with kids who have been in trouble. Mrs. Adams is on the local school committee and also helps the Girl Scouts. The Adamses like to walk to church each Sunday and to discuss the sermon on the way home. Their minister is "with it" too—he strives to counsel his parishioners on the dilemmas that confront Christians today.

The Adamses, their minister, their church—all a part of today.

Are you?

West Texas Chamber of Commerce. In 1966 she was the only woman to testify on the 45 public forums concerning water importation

to West Texas. As an outgrowth of this, she was asked to serve in organizing "The Small Towns Task Force" concerning survival of the smaller communities. Her material consequently was published in *The Small Community in West Texas*. Currently Mrs. Kirchhoff is serving as the 30th Senatorial District State Committee Woman. ### Steel Firms Double Spending On Pollution

A survey reveals that during the past year steel companies of the United States nearly doubled their planned short-term spending for environmental quality control facilities.

The report, issued by the American Iron and Steel Institute, covers firms producing about 98 per cent of the nation's steel.

It shows that at the beginning of this year the nation's steelmakers had budgeted \$643 million for air and water pollution control equipment scheduled to go into operation in 1974 and later years.

This is nearly twice as much as the amount similarly budgeted at the beginning of 1973.

Between 18 million and 20 million workers are members of labor unions, according to the Bureau of the Census, or about 20 per cent of the work force of 84,000,000 people.

AGREEMENT QUESTIONNAIRE certain farmers and ranchers in your county a crop acreage questionnaire from Mr. Agricultural Statistician in Charge, Livestock Reporting Service, Austin, Texas. The information received is the basis for production estimates for Texas and for the United States. We ask that you encourage farmers who receive the questionnaires to complete and return them to the Livestock Reporting Service by the deadline of June 28, 1974. This information is appreciated.

FLOYD PHILOSOPHER

**Figures Out A Way For Everybody  
To Get Rich Out Of The Stock Market**

Editor's note: The Floyd Philosopher on his Johnson grass farm is having a hard time understanding the stock market, his letter this week indicates.

Dear editor:

While it has always seemed to me they were taking up time that could have been used for something more interesting, the television network newscasters every evening always give a report on the day's stock market, how many shares were exchanged and how many points the average share rose or fell. To me this is about as interesting as a nationwide weather report on what the average temperature was for all 50 states at 2 o'clock in the afternoon.

However the other day something new crept in. Walter Cronkite reported that when a major bank in New York reduced its prime interest rate from 11.75 per cent to 11.60 per cent the stock market gained 19 points.

What this proves is that nobody listens to the networks' stock market report, because if they did somebody would figure out that if a drop in the interest rate of fifteen-one-hundredths of a cent can send the stock market up 19 points, think what dropping the interest rate a nickel

would do.

If everybody in the country bought some stock a day before the interest rate came down, everybody would wind up rich, could pay off and go back in debt at a much lower interest rate, his bills and go back in debt at a much lower interest rate.

But times are too out of joint for something as simple as this. Why I read just the other day that a candidate had been indicted before an election. I never heard of that before. I thought you always waited till a man was in office and then indicted him. Then if he pleads guilty you give him a probated sentence so he can be free to write a book.

Say, I hope President Nixon is taking some experts along with him when he visits Russia so they can study capitalism. I understand the Russians, during the oil boycott which they secretly promoted, sold their oil right and left at double the usual price and made enough profit to pay for the wheat they bought from us a year earlier at about half price with money they borrowed from us.

Yours faithfully,  
J.A.
