wn on cigarettes? nore or less than of the country?

ing the Surgeon ssued about ten ing was a hazard leaths a year, some

cut down on the number they smoked and some turned to cigars and pipes as a substitute.

More recently, however, despite the barrage of medical reports in subsequent years linking cigarettes with heart disease and other illnesses, they have been puffing away at a near-record rate.

Figures released by the Government, by the Tobacco Tax Council and by others depict the trend in each section of the nation. Cigarette sales in Floyd County in the past year came to approximately 1,262,000 packs, according to a breakdown of regional totals reported by industry sources.

estimated.

The total bill, for the community as a whole, was close to \$639,000 last year.

FHS Golfers Hold Third Place

A comprehensive survey of public

employment, covering all parts of the

of local government - county, township, municipality, school district and special district. Federal and state employees are treated separately.

It shows that in Floyd County, after converting part-time workers to their full-time equivalent so that inter-county comparisons can be made, there are approximately 33 full-time employees or their equivalent locally for every 1,000 residents

elect officers.

Any adult wishing to work with boys involved in the summer baseball program, are especially urged to attend.

Netters Sweep Slaton

Floydada's tennis team travelled to Slaton Thursday where they had no trouble winning seven out of eight matches. Most of the matches were pro Donette Marble, Kelly McDowell, Keith Tooley, Tracy Brown all won their singles matches, Theis Brown and Alonzo Gonzales Jr., Pat Miller and Todd White, Donette Marble and Kelly McDowell all won their doubles matches.

IME YOU READ this ey should be over in a cool drink from one mills. See you all in a ke care.

In terms of the local population over age 18, this was equal to 173 packs per person.

It was a lower rate than was found in most areas. The average throughout the United States was 214 packs. It was 183 in the West South Central States.

Although most health authorities believe the case against smoking has been well proved, the tobacco industry maintains that the evidence is merely statistical and that no cause and effect relationship has been properly documented.

Despite the steady increase in taxes imposed on cigarettes by Federal, state and many local governments, making smoking more costly, sales have been on the rise in the last few years and are within two percent of their all-time

high. The biggest increase since 1970 has been among teenage girls. They now smoke nearly as much as the boys. How much does the average Floyd County smoker spend for cigarettes?

FHS VARSITY GOLF TEAM (l to r) Tony Hesson, Lyle Suggs, Mike (Staff Photo) Estes, Randy Fleming and Jerry Parr.

This is a larger operating force than is found in most places in the United States, where the average is 32 per 1,000 population. Among local communities in the State of Texas the average is also 33 per 1,000.

As for the actual count, the report shows a total of 360 equivalent full-time workers on public payrolls in the county

With regard to the payroll to operate the local governments, it has been running somewhat lower in Floyd County than in most parts of the United States. Whether the services rendered were more productive or less so is not taken into account.

The total payroll in the month when the census was taken represented a cost equal to \$17.18 per local resident.

Nationally, the cost of meeting such payrolls averaged \$25.16 per capita per month. In the State of Texas it was \$20.24.

If all public employment - Federal, state and local - were taken into account, it would be found that one person out of every six in the nation is on some government payroll, according to the Tax Foundation.

It places the current public payroll at more than \$135 billion a year, up 60 percent in the last five years.

Linda Norman and Debby Johnson lost their doubles match.

The FHS tennis team was in the Canyon tournament Friday and Saturday.

JIMMY JONES WINS COUNTY SPELLING BEE ... Jimmy Jones, son of Mr. and Mrs. Albert Jones of McCoy, and last years county spelling bee champ, took the title again this year. Runner-up was Randy Davis of Lockney, son of Mr. and Mrs. Jerry Davis. Randy mis-spelled the word "optimism". Jimmy correctly spelled the word, then went on to spell the next word "opulent" thus winning the County Bee. 485 words were spelled with Mrs. Sally Carthel as word pronouncer. Pictured with A. W. Coltharp, director, are Jimmy, Randy and Mrs. Carthel. Jimmy will compete in the Regional Spelling Bee at Smylie Wilson Jr. (Staff Photo) High in Lubbock April 5.

our Child Be Hungry In 1985?

Union wages, government not salaries, and prices of all about other products automaticalhad ly rise to offset cost of living eally increases and inflated proat it. duction costs, but when farm have prices increase, loud howls d to of indignation sweep the food nation. Apparently, very about few Americans realize the der if goose that lays their golden ouate egg can be starved to death.

The food producer's fimore nancial investments and and work are always in danger of other weather disaster. This they ecause accept as an unavoidable round part of their business, but sable when they have to mortgage to buy their land and inventory to survive this cost price 1% to squeeze, only the very large just to operations will be able to doubt borrow enough additional ation's money to survive any made serious weather calamity. agri The family farms and deed ranches that have been the such backbone of American agrifrom culture will perish. tion goes solely into the en 1967 hands of big conglomerates a 3.6% or corporations, WHAT will nent. He the price of food be when nsiderthis work has to be done by same union workers or eight hour ix free shifts, five days a week, not had supervised by management osts of

control could produce food. Russia wouldn't be buying it from us. She has absolute bureaucratic control and has had our agricultural technology since World War II. She has certainly proven her mechanization capacity and yet, with 50% of her working class growing food, she cannot produce enough to keep her own people fed. China has 80% of her population working in agriculture and last year had to conscript more from the cities into the fields. Shouldn't that be sufficient evidence that no kind of any amount of bureaucratic controls can insure adequate food supplies.

In fact, Russia's experience indicates there is an inverse ratio between governmental intervention and food production. She had been viewed as the breadbasket of Europe before introducing large scale collectivization, but has been unable to solve her agricultural production problems since then. For the past three decades, the rate of growth in her population has exceeded the rate of growth in agricultural production. What is the explanation

for the amazing productivity of American agriculture which so far exceeds other nation's food production with so few food producers? What does the American farmer and rancher have that the Russians do not have? Only freedom and incentive for motivation. Both os these are being endangered.

The importance and practical value of freedom in agriculture can be seen by examining the way our food production chain works. Government funded research develops new ideas for improvement and its Extension Services brings them from Experiment Station into the field. Then the food producer studies these new ideas to see how they can be tailored to fit his particular locality and situation. To implement them, he has to gamble his own financial investments and work on his ability to adapt the new techniques to his unique environmental conditions. This is a powerful and two-fold incentive. He is motivated by both the necessity to protect his financial investments and the challenge to his ego to prove out in practice the

food producers come to grips with the gut issues of environmentalism twenty four hours a day, 365 days a year.

It is somewhat startling to hear the theoretical environmentalists spouting rhetoric as though the environment had just been Apparently, discovered. some of them didn't know it was here until they found it in a book. Let's hope and pray these ardent people 'discover" food because there is often a wide chasm between theoretical facts and practical facts. Legislation and bureaucratic decrees based on theories which have not been proved in practice are extremely dangerous to America's food supplies and costly to the consumers.

For example of this, consider the furor raised over the possibility of the coyote becoming extinct. Had he been asked, the most illiterate old sheep herder could have told anybody the possibility of rats becoming extinct in the cities was more probable than the wily coyote disappearing from the open range. And, doubtless, he would have posed some most logical questions about body lice, cockroaches, and malariacarrying mosquitos being part of the ecology, too. The sensational emotionalism generated around the coyote completely obscured practical considerations and bureaucratic controls were instituted to protect the coyote. Fifty years of predator control work were wiped out. The coyotes are so prolific and destructive that now, three years later, there are 92 separate studies in progress trying to find some way to keep them from overcoming the west. Packs of covotes are voraciously consuming food needed for hungry children and have

cost the consumers hun-

dreds of millions of dollars in red meat. It would, indeed, be interesting to know what the total cost to the consumers has been for this one bureaucratic blunder.

For, of course, American consumers have to pay at least twice for each and every bureaucratic control. Once in taxes for government personnel to implement and enforce it and then again in costs added to those of production. When a bureaucratic intervention is based on misinformation or faulty theory, we have to pay a third time for the efforts to rectify the mistake. When famine is stalking the world, bureaucratic mistakes disrupting food production can well cost the consumer a much dearer price in the future - one most Americans have never known - hunger.

Isn't it time for consumers to stand up and demand that all bureaucratic interference and legislation affecting food be proven out in practice on government land and the total cost of each one be

Floyd County Hesperian

made known to the American public before it is imposed on our food production, processing or distribution system? How much longer can we afford these costly bureaucratic blunders jeopardizing the basic essential of life?

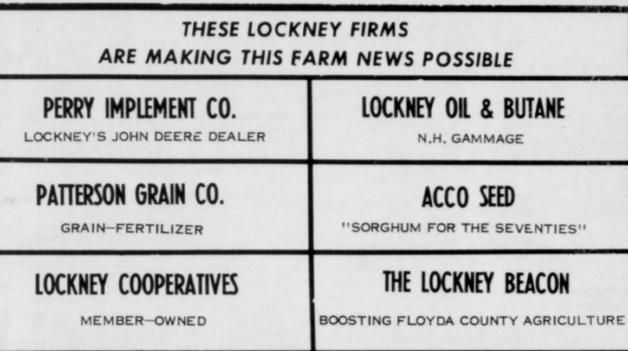

The Federal government owns almost 1/3 of all land in the United States. Surely that is sufficient ground on which to prove out any and all theories or ideas which can be generated by busy brains with idle hands. The public will learn much about bureaucratic capability to manage land by studying what has been done in the past thirty years with this government owned land. Let the American people compare what this land has produced in food and dollar value to the economy with what privately owned land has produced, the management of it in terms of conservation and environmental protection before any disruption of the nation's food supply is made with anymore unproved bureaucratic interference.

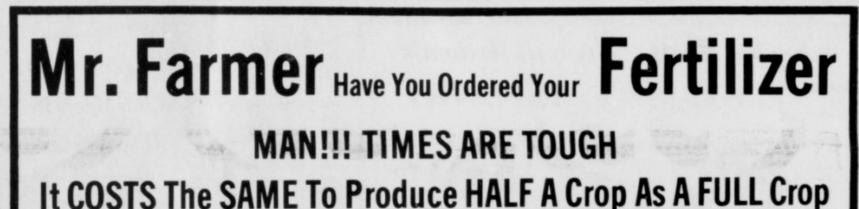

It is natural for some politicians to be more concerned with pleasing the shortsightedness. We have had a bitter lesson on what foreign governments will do when we are dependent on them for oil. How will we fare if we become dependent on them for food? This is the road the

administration takes us down in importing meat when American beef producers are having to sell their cattle for less than it takes to raise them. The government imposed stringent and very costly SEE HUNGRY, PAGE 8

majority of voters before next election than they are with how that vast majority is going to eat ten years from now. This is the sad part of democracy that led us into this energy disaster. This situation was plainly discernable from facts available ten years ago and if corrective measures had been taken, this catastrophe could have been averted, but what politician is willing to present such unpleasantness to the voters. Now we are

paying the price for this

personnell? And can wages motivate people to do this during kind of work? costs

Alpha Mu Delta **Elects Officers**

Officers for the Floydada Alpha Mu Delta Chapter of Beta Sigma Phi were elected at their March 18th meeting held in the Jimmy Nichols' home. Mrs. L. H. Koch presided over the business session.

New officers named include Mrs. Dean Watson, president; Mrs. Bud Henderson, first vice-president; Mrs. L. H. Koch, second vice-president; Mrs. Glen Bertrand, secretary; and Mrs. Doyle Warren, treasurer.

Installation of officers will be held May 30 on Founders Day along with the Rituals of Jewels degree.

The March social for the chapter was changed from March 22 until March 28. A light meal will be served after which games will be played.

An Easter egg hunt for members and their guests will be March 25 at 2 p.m. at the home of Mrs. Koch.

The program entitled, "Action", was presented by Mrs. Koch with an open discussion following. Refreshments were then served by Mrs. Nichols to Mmes. Randy Patterson, L. H. Koch, Bud Henderson, Glen Bertrand, Dean Watson and Mark Montandon

Athena Hears Bicentennial

Program

Athena Junior Study Club met March 14 at the Floyd County Insurance office with Mrs. Richard Wiley and Mrs. Gene Owens serving as hostesses. Roll Call was "an interesting fact about a state." Mrs. John Peck. bi-centenial chairman presented "Unity for Independence." She included patriotic music and recordings of the actual words of the signers of the Declaration of Independence. She told some of the personal sacrifices and how the signers literally pledged their lives, their fortunes, and their sacred honor to the Independence cause. Of personal interest were the little known facts about these men, the lives they

led, the contrast between them -- John Hancock, and Sam Adams, for instance. To set the stage patriotic posters were on the walls and a stars and sripes decorated table held decorations. Then Mrs. Peck presented each member with a copy of the Declaration of Independence. The program closed with a pledge to the American Refreshments of red,

KAREN ALLDREDGE white, and blue rose cakes. liberty cheese bells, roasted pecans, coffee, tea, and orange punch were served to Athena members.

A business meeting followed. Mrs. Roy Turley announced members would each receive four tickets for

TEL Class Meets

The TEL Sunday School Class met March 20 in the home of Slyvia Yeary.

There was a business session, then Ruth Reeves brought the devotional "Steps" from Psalm 37:23 and Job 14:16.

Anne Handley conducted a Bible quiz game.

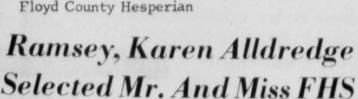

Refreshments were served to Anne Handley, Bobbie Kellison, Elvira Stewart, Ruth Reeves, Jewel Fortenberry, Slyvia Yeary, Christine Byerly, Bessie Smith, Doris Casey, Myrtle Messimer.

Upholstered furniture collects just as much dust and grime as the tops of your wood tables! Don't overlook it just because you can't see it. Neglect causes gritty dirt particles to wear away and discolor the fabric--creating a dusty smell in the process.

Regularly vacuum all upholstered furniture with your vacuum cleaner attachment. Be sure to get into the seams and tufts to prevent dust build-up.

FLOYDADA, TEXAS

Mrs. Raymond Poole Chairman Of Floydada Cystic Fibrosis

Mrs. Raymond Poole, 983-2285, is chairman and coordinator of the Floydada Cystic Fibrosis Fund Drive. Anyone wishing to volunteer their services for the Cystic Fibrosis Breath of Life Campaign, please contact Mrs. Poole.

According to Mrs. Poole, there are six million reasons why the Breath of Life Campaign needs volunteers six million boys and girls who have inherited incurable disease cystic fibrosis, or other lung diseases like chronic bronchitis, bronchiectasis, severe asthma, and a condition sometimes called "childhood emphy-

These children need our attention, they demand our concerted effort to do something about lung diseases, said Mrs. Poole.

The National Cystic Fibrosis Research Foundation supports over 100 c/f Centers across the country, six of which are located in Texas. At these clinics children suffering lung diseases are diagnosed and treated. It also supports continuous research, seeking a cure or more effective control for Cystic Fibrosis

and the development of new techniques to make possible a practical test to determine carriers of the c/f gene.

Money contributed through the Breath of Life Campaign over the years has made possible research and care which has significantly increased the life expectancy of c/f children. Although Cystic Fibrosis is still incurable, these children are living into the teen years and increasing numbers are reaching young adulthood. This research has also brought tremendous advances in the treatment of other chronic respiratory illnesses. Today, many of these diseases can be cured, and all respond favorably to

treatment. "Obviously, we are tremendously encouraged by the progress to date," said Mrs. Poole, but so much more needs to be done. Anyone willing to devote a little time can work in a number of Breath Of Life Campaign activities. The rewards are great, Mrs. Poole added, for you will be truly making possible the breath of life for those who cannot take breathing for granted."

Hunting, Fishing And **Trapping** Proposal **Meeting Wednesday**

The Texas Parks and Wildlife Department has set the time and date for public hearings on proposed regulations of particular interest to sportsmen in Texas.

Individuals interested in hearing the new proposals and wishing to make comments about these items should be present at the county courthouse in Floydada at 2 p.m. on March 26,

The department holds these hearings every year to gather information concerning proposed hunting, fishing and trapping regula-

As the result of action by the Texas legislature, the Texas Parks and Wildlife Department commission is hunting, fishing and trapping regulations to be available prior to the start of the 1975 season.

The Texas Parks and Wildlife Department invites anyone having comments about wildlife proposals or wishing to hear the new proposals to attend their county hearing.

More information about the hearings can be obtained by contacting your county game warden or by calling Amarillo (806) 355-9246, Lubbock (806) 744-6847 or Abilene (915) 673-3333.

Agriculture Commissioner John C. White recommends "carpooling" to the supermarket with a neighbor By taking only one car, you'll save gasoline - and have more time with friends.

Love

A few years ago one of the popular songs expressed the greatest need of man with the words, "What The World Needs Now Is Love." With increasing turmoil and conflicts that need becomes greater with each passing year. Selfishness is the predominate attitude. Love is the best antidote for selfishness. The world recognizes the need for love and desires love yet the world is full of hate.

Christianity provides the answer to this world need. The jundamental principle of the Christian message is love - the fundamental principle of Christian conduct is love. This is not to imply that every professing Christian demonstrates this principle. If that were so, this would be a much proc laims God's love for man: "For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life." This is the kind of love that seeks the welfare of those who are loved.

for the setting of seasons, bag limits, and means and methods of taking wildlife resources in Texas.

All comments made at each hearing will be recorded and presented to the Parks and Wildlife commission for their consideration at a later date.

Texas game wardens and biologists have been gathering pertinent information during the 1974 hunting, fishing and trapping seasons. This information is studied, discussed and it will be presented as a new proposal at each hearing.

Each meeting will be headed by a hearing officer, an inland fisheries biologist, a wildlife biologist and a law enforcement official.

Upon approval of these proposals by the Parks and Wildlife commission, the proposals will become law and listed in the new 1975-76

The ministry and teachings of Jesus were based on this kind of love. He made it clear that all the law could be met by this kind of love - love for God and love for man. During his final days he gave a new commandment to his Apostles: "That ye love one another." There doesn't seem to be anything new about that commandment, but new quality came with his next statement: "As I have loved you, that ye also love one another." This adds the greater quality of Christian love which is to the point of self-sacrifice. Jesus went on to say that it is by this kind of love we prove to the world we are really his disciples.

Finally, consider the conditional statement of Jesus, "If ye love Me you will keep my comandments," If we really love him, the natural result will be obedience. If you love Him, search the Scriptures and be obedient to His commands.

the body needs - the amount and quality of protein no other one food can provide. The beef, lamb, and other life essentials grown on this vast acreage is produced with relatively small amounts of fossil fuel and no fertilizer.

Where it takes 30 acres to pasture one cow, a small ranch sounds like a vast land holding, contributing to the myths about ranchers. Using a few examples of exploitation and abuse of private land, the news media has made sensational stories of bad, rich, old ranchers living in idle luxury while exploiting all resources for his greedy gain - tarring all ranchers with the taint of a few and leaving urban America with the impression it would be morally justified to rid the country of such scourges. Most urbanites are unaware of the existence of that mass of hardworking, conscientious, small food producers who were grappling with the practical problems of conservation and environment when 'ecology" was just a word in the dictionary to the rest of the nation. Without realizing they are contributing to the destruction of one of the most vital sources of their food, sincere urban people join in abetting the theoretical environmental and ecological witch hunts.

Now the plague of false information has infiltered top echelons of government. Cowmen gasped in disbelief when a high official said it takes 8 pounds of grain to produce 1 pound of beef. The truth is 75% or more of all feed consumed by cattle is grass, forage and by-products which are completely inedible to humans. It takes 3 pounds of grain to produce pound of grain-finished beef and highly nutritious, very palatable baby beef can be produced with almost negligible amount of grain. The dangers to America's food supplies of governmental policies based on fallacious misinformation are incalculable. Only an informed public concerned enough to take positive action to protect their source of food can put a stop to this.

43°

69°

Looking at what has been done to the beef producers, other food producers wonder who will be next. There is no way of knowing what way-out theory or fallacywill be governmentally imposed on them. Many can no longer see risking their financial investments and future to the triple jeopardy weather catastronhies

the governmental boondoggling of political expediency of the moment - they are quietly leaving the field. National Geographic, September, 1974, has a realistic account of Iowa farmers they were vanishing at the rate of 70 per day in 1973. Young people with the genetic stamina, temperament, and desire to follow their generations of forefathers in producing food are leaving their heritage to pursue less plagued vocations.

There is macabre irony in President Ford's telling grain producers to grow all they can. That's what the President told beef producers two years ago. They did produce it and even though the government disrupted beef markets and contributed to the problems in other ways, there was complete indifference about what producers could do with this surplus food produced at governmental request. Grain growers laughingly conjecture about whether they will be foolish enough to fall into the same trap.

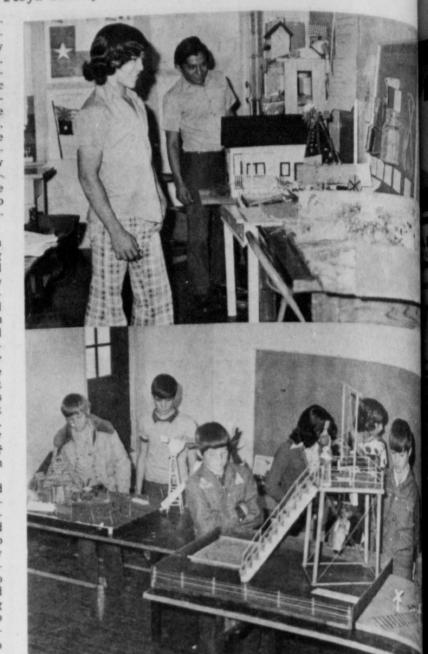

Food producers respected and accepted without question all adverse consequences of the supply - and -demand factor essential to free enterprise until they realized foreign governments are being allowed to control and exploit our food markets, i.e. Japan buying our grain to trade for cheap oil, while our own government makes no effort to benefit our lagging economy with the potential value of our food productivity.

America's farmers and ranchers cannot control international politics or establish order and efficiency in food marketing and distribution systems. These are governmental functions. Food producers cannot

feed a hungry world alone. Responsible government action to insure marketing and distribution systems equitable to our farmers and ranchers is essential, too. Without these, asking them to risk over-production by growing all they can is asking them to produce their own destruction and destroy America's source of food at the same time.

It is incredible that this situation can exist in a world where 700 million people are already facing starvation and the world population is increasing at the rate of 70 million per year. The millenial good growing weather the world has enjoyed for thirty years has ended and wide spread droughts

birthday last Sunday.

Spring is now upon us and isn't it the greatest!

We have enjoyed the outdoor walks, and sitting outside on days like last Tues. and Wednesday. Mr. Juan Garcia who is one of our residents, has enjoyed the weather, he has planted flower seed and helped clean our yard, so has Mr. Louis Roberts. We really have a great group.

We had a wonderful week once more. Last Monday, Schachts Flower Shop sent us two beautiful flower arrangments. Mrs. Roberson brought us another arrangment, Ester Brasher shared with us a beautiful arrangment of ivy for St. Patrick's fixed with shamrocks and all. Our thanks to all for this arrangments. We really enjoyed them. Thanks again to the members of Il Penseroso Jr. Study Club for all they have done for us. Our residents are really enjoying the outdoor furniture. Thanks to Dollie Cardinal for sharing her Easter centerpeice with us. We thank everyone who

came last week to share with us during the morning devotionals.

We want to express our most sincere sympathy to Mrs. Lola Grider and Art & Yvonne Ratzlaff for the loss of Mrs. Velma Grider Carter, daughter of Mrs. Grider and sister to Yvonne who passed away last week.

Residents that went out last week: Mrytle Burke, Elsie Woodall, Bettie Lester went with Mrs. Jim Settle to Lubbock to the Rodeo. Mary
