

## Golden Harvests Sunflowers

Afternoon Floydada harvested the sunflower seed in the elevator and hauled it to the cooperative Elevator in the morning. The elevator was 15 percent and Bill Cagle said the Oil Mill at Lubbock 12 percent or dryer

ers for the load were and Melvin Johnson. set the cylinder 3/4 had bought a special combine from a He said he was of the stalks as the to the auger.

most sunflower contract with Plains will to pay 15 cents per seed. He said he making around 1500 did not have a real field where the first ed. He estimated the acre cost in the crop.

MARKETING letter received by Cooperative Oil Mill per-pound payout, 10 when sunflower seed the elevator and the are marketed and John F. Herzer at the letter.

is this a new crop you must recognize it us in regard to the contracts were 15 cents was what floor price; however, er commodities, the much lower than the same as cotton oil.

we were unable to take a hedge on the soybean oil Board that we felt would cover any risk exposure we might have. There was also great concern and considerable question about how much sunflower we could produce, if any. We were also concerned about selling something we didn't have produced, and then finding ourselves with more sold than produced, and being forced to go into a market and compete for a commodity we didn't have available to purchase.

The markets today are much improved over what they have been for the past several months. We are quite confident that we will be able to market all of the sunflower seed or its finished products at a level that will allow us to make a profit rather than to take a loss by forced selling.

We were able to make our first sale yesterday. We sold 15,000 tons of sunflower seed at 15 cents, FOB Lubbock. This sale is the first sale of its kind in our history and is the start of what we hope will be a new cash crop for our producers.

This marketing can be done successfully over the next 30 to 60 days if you will give us your total cooperation. The markets appear to be on an uptrend, and only by selling what the market can take, can we eliminate the possibility of forcing the markets down. To market the balance of our crop in a week would probably drive the market back to the 12-13 cent level. With continued strong demand for oil and meal, we could even see the markets move to levels comparable to last season's high.

We trust you will give us your cooperation and accept with favor the manner in which you are to receive payment for the sunflower seed you produce.

To everyone involved, this is a new experience, not only in planting,

harvesting or handling, but also in marketing. With your continued cooperation and by working together, we can accomplish the goals that we set out for, to have a new cash crop for our producers and a new source of raw material to process through our mill. We trust you will understand our situation and join with us in working out the best solution for our sunflower marketing system.

We trust we will be able to pay the balance due you in a short period of time. We commend you on your success in proving sunflowers can be produced, and with your cooperation we can prove they can be produced profitably.

### FIRST FLOYD SUNFLOWERS AT LOCKNEY

Robert Carthel of Lockney harvested the first marketable load of sunflower seeds in Floyd County, arriving at Lockney Cooperatives' Sterley Elevator Wednesday afternoon with a 9,000-pound load that measured 9.50 per cent moisture and had a test weight of 27 1/2 pounds per bushel.

Carthel brought more sunflower seeds to the elevator Thursday afternoon, a 9,860-pound load with 8.90 per cent moisture and a test weight of 29 1/2 pounds per bushel.

Carthel harvested the seeds from a "hailed-out" field about three miles northeast of Lockney. He estimated the yield at over 1,200 pounds an acre although the field received a "real bad hail" earlier in the summer. A yield of a ton per acre is considered excellent.

### Tennis Club To Elect New Officers

President of the Floydada Tennis Club, Maurice Goodwin, urges every member to attend the monthly meeting Tuesday night at 7:30 in the Lighthouse Electric community room to elect officers for another year.

He said the club would also discuss the club's proposal to the Floydada school board to help pay for two more tennis courts at the Floydada high school.

A nominating committee will present the new officers for the club's vote.

### Labor Day Floydada Holiday

According to the Floydada Chamber of Commerce Monday, September 1 is an official holiday for Floydada business firms.

Labor Day will also be a holiday for Floydada schools.

However, it is expected that all grocery stores, service stations, and restaurants will be open on Labor Day.

Floydada schools will turn out at 2:30 on Friday preceeding the Labor Day weekend.

### County Budget \$691,952

1976 Floyd County filed with county clerk by county auditor O. and is open for public proposed budget is

aring has been set for 8, 1975 in the

rate is 85 cents per evaluation...the total is now \$2,859,880.

\$449,308 in tax money operation. This \$338,261 in 1974.

1974 tax money was

inadequate before the year was finished.

In the proposed budget the tax money will be used as follows: jury 2 cents, road and bridge fund 13 cents, road and bridge special fund 15 cents, general 38 cents, permanent improvement 13 cents and library 4 cents. The county has no bonded indebtedness.

Additional revenue will come from the various office fees, licenses, traffic fines and other assessments.

Watson said there were no salary increases or new programs in the proposed budget, the increase was due to inflation. He said each precinct was budgeted around \$69,000.00.

### Rock Chat By Wendell Tooley

GRAHAM CRUSADE in is just around the only plan to attend, now to pray for the Crusade. We also hope the prayer groups, see this page.

believe that Big Time's the church much quicker ed! Needless to say he chastised for his a result.

The big problem, for the prospective students and their parents, is how to pay for it.

THE FLOYDADA YOUNG HOME-EMAKERS will be working with Jerry Lewis Telethon which begins Sunday night August 31 and has declared this week "Floydada Muscular Dystrophy Week."

They will sponsor a "Rockethon" Friday night at the Dairy Queen and will rock continuously for 24 hours. We will have complete details on this Thursday's Hesperian.

Anyone who wants to help with the "rocking" should call 983-5377.

JAMES LOVELL AND COMPANY have a good project going in tearing down old houses in Floydada and rebuilding them. I wish I had a "before and after" picture of the house he is rebuilding on Missouri street.

### Bigger College Bills Face Floyd Parents

NEW YORK. — For young men and young women in Floyd County who want to go to college this year, getting enrolled will not be as difficult as in other years. With registrations running below normal at many colleges, there is ample room for them.

Based upon the new rate schedules and the number of local residents expected to attend, Floyd County parents will be shouldering a \$1,167,000 load for the coming academic year.

That will cover tuition, fees, room and board, books, transportation and miscellaneous expenses.

A partial offset to the rise in college costs is the financial aid being made available to students. More scholarships, grants, loans and job programs than ever before are being offered.

Over \$857 million in such student aid programs has been awarded for the coming academic year by the U.S. Office of Education, \$40.6 million of it in the

result.

Some time talking on the results!

VOLUME 80 FLOYDADA, FLOYD COUNTY, TEXAS 79235 SUNDAY, AUGUST 24, 1975 NUMBER 87

## Big Plans Made For County Fair

Several new features are in store for Floyd County Fair-goers this year, according to fair board president Buster Terrell: the floor of the entertainment building will be cemented (work is expected to be finished sometime this week); aisles in the main fair barn will be painted; a "Consumer Information Day" is replacing "Woman's Day"; a square dance will be held Friday, September 12; and a Lubbock County 4-H group will play for another dance to be held Saturday, September 13 after the annual Fair Queen contest.

The Floyd and Surrounding Counties Fair opens its annual three-day run Thursday, September 11, when judging will be conducted and the Fair Parade through downtown Lockney is scheduled at 4:30 p. m. Fair catalogs were distributed last week.

There have been some changes in the variety show/talent contest scheduled Thursday at 7 p. m. in the entertainment building. There will be four categories this year—"Grades 1-6"; "Ages 13-18"; "Age 18 and Over"; and

"Groups-3 or more persons, any combination of ages".

\$10 cash awards will be given to the first-place winner in each category. Second and third-place winners in each category will receive ribbons. The "overall talent winner" will receive a plaque. Deadline for entries in the talent contest is September 9.

"Consumer Information Day" at the fair, Friday, September 12, starts at 9 a. m. Special speakers will be on hand, including Dr. Roland Roberts, area vegetable specialist, Texas Agricultural Extension Service, Lubbock, who will talk about "Tailor Made Home Gardens"; Michael Wortman, interior designer with Cagle Furniture, Lubbock, whose topic will be "Interior Design and The Consumer"; Xie Collins, Southwestern Public Service Home Service Advisor, demonstrating

"The Marvels Of Microwave"; Arch Keys, Keys Flower Shop, Plainview, "Plants For Interior Decor"; Mrs. Dru Lewis, Amarillo, "Stretch 'n' Sew"; and Mrs. Lucille Witten, Plainview, "Creative Crafts." Door prizes will be given at the close of the morning and afternoon sessions.

All the regular fair favorites are scheduled this year, too. In addition to the "Consumer Information Day" and square dance on Friday, there will be a sheep breeders show at 2 p. m. The "big day" of the fair, Saturday, will see the quarterhorse show and junior showmanship contest at 9 a. m.; livestock judging at 9:30; children's pet show at 10:30; Miss Floyd County Queen contest preliminaries at 2:30 p. m.; tractor driving contest at 4; Queen Contest finals at 7:30; and the dance at 9.

### Kids: Enter Fair Pet Show Now!

Children 12 and under are urged to get their pets ready for the pet show at the Floyd County Fair Saturday.

September 13. Youngsters may send entry blanks to the fair pet show chairman, Linda Kidd, Box 534, Lockney, Texas 79241. Entries should be received by September 8.

Prizes will be given in 15 categories: Smallest pet, largest pet, longest tail, shortest tail, happiest face, saddest face, longest ears, biggest eyes, curliest tail, furriest pet, most roly-poly, most unusual, best trick, best showmanship, and spots.

Pets entered in the show must be in a cage, on a leash, or similarly confined, and the child must be able to handle the pet.

PICTURED WITH NEW BAND HALL DOOR PAINTING are (l to r) Russ Pratt, Robin Roberts, Grant Hambright and Billy Marquis. (Staff Photo)

### Whirlwind Band Number One Supporter Of Football Team

Ready to go....

If you haven't heard them yet, be patient, the Floydada High School Marching Band will soon be playing you out of house and home as they get ready for the 1975 marching season.

Every night for 2 weeks there has been a practice held at the "Pride of the Whirlwind Band" hall in preparation for the first football game. Fundamentals on marching have been taught to the new-comers in band, also the music has been passed out and the sound is

amazing! The band hall is wall-to-wall sound this year with close to 90 kids signed up to be in band.

Spirit is great as always, after all, our high school band is the No.1 supporters for the football team. Yes, Floydada is going to have another fine band this year that will go as far as our support will take them.

Please don't fail in giving these kids your support, they do a great job and very seldom get thanked for it. Every team needs a town behind them, so does every band.

## Corn Growers May Lose Vital Insecticides

year ago. A total of 17,500,000 bushels is anticipated for 1975 compared with 8,100,000 bushels in 1974. Acreage for harvest this year is set at 650,000 compared with 374,000 acres a year ago.

Rice: Production will be down slightly from 1974, about one and a half per cent. A total of 24,885,000 hundredweight is expected this year compared with 25,258,000 hundredweight a year ago.

**CROP HARVEST CONTINUES** at a good pace throughout the state. Cotton harvest percentage-wise is about on schedule with the past three-year average. About five per cent of the crop has been gathered thus far, and Blackland area harvest is just beginning. Prospects on the High Plains continue good despite some insect problems. Cotton root rot is also a problem in Central Texas.

Sorghum harvest for the state is about half finished. A number of areas in Central Texas are turning out yields considerably lower than expected. Rains have slowed harvest in some southern sections, and insect problems are prevalent on the Plains.

Rice harvest is at the 50 per cent completion mark. Harvest is making satisfactory progress along the Upper Gulf Coast and in South Central Texas.

Peanut harvest is about five per cent complete and is about on schedule with last year.

Soybeans are making good to excellent progress across the state.

Sunflower harvest is fast approaching on the High Plains; harvest of this new crop is finished in Central Texas and the Brazos bottoms. Yields generally were not up to expectations, but observers still believe that sunflowers offer a good potential as an alternate crop.

Unless corn growers, farmers and farm leaders act quickly, they may soon lose two more of their important weapons for fighting destructive and costly corn insects, warns Robert M. Morris, president and chairman of the board of Velsicol Chemical Corporation.

If the action taken recently by Russell Train of the EPA (Environmental Protection Agency) in his "Notice of intent to suspend" is upheld, sales of chlordane and heptachlor for crop use could be cut off completely in the next two to three months--and this, Morris continues, could wreak havoc with next spring's corn crop.

The need for concerted action is urgent, Morris said, because Train has resorted to the most expeditious measures possible. With this fast-handed approach, it is evident he hopes to keep resistance by farmers and consumers at minimum.

Filing for public hearings immediately after Train's announcement, Velsicol is doing all in its power to help farmers save chlordane and heptachlor, Morris assured. The hearings, which started in mid-August, will help bring the facts before the public. However, they are limited to only 40 days of testimony--plus 10 more days at Russell Train's sole discretion.

With 25 years of accumulated scientific research data, it is obvious the hearings will have to be skimpy and sketchy, Morris said. This is why the help of every corn grower and farmer, and every interested farm organization, is needed. Telegrams and letters should be sent to individual congressmen and senators at once.

"First it was DDT. Then aldrin and dieldrin. Now chlordane and heptachlor

are under fire. Already Russell Train has singled out his next target. Clearly the strategy of advocacy groups, fanatics and Train is to pick off these vital working tools of agriculture, one by one, stripping the farmer of all freedom of choice in how he runs his business," Morris explained. "Even if you do not use chlordane and heptachlor, you still have a stake in saving these two highly effective insecticides, because the insecticide you do use may very well be next."

Last spring, it's estimated over 1,500,000 acres of corn were damaged or destroyed by cutworms, wireworms and armyworms, due to a shortage of chlordane and

Contracts have been let and aerial insecticide applicators are expected to take the air about August 25 in the twelfth year of the High Plains Boll Weevil Control Program. Mass spraying of weevil infested cotton along the eastern edge of the High Plains to protect the vast cotton fields to the west has been carried out annually since 1964. The program, initiated and coordinated by Lubbock-based Plains Cotton Growers, Inc., has been widely cited as one of the most successful of all large-scale insect control efforts. Entomologists at Texas A&M calculate that the program has saved control costs, yield and quality losses over the 11-year span amounting to at least \$400 million. Cost of the program for the 11 years has been less than \$12 million, giving a benefit-cost ratio of well over 300 to 1.

SEE COTTON PAGE 6

### Many Cattlemen In Financial Trouble

**COLLEGE STATION** -- Nearly four out of 10 cattlemen are in "bad" to "moderate" financial trouble. Those in "bad shape" (about one out of 10) probably won't survive financially, according to a survey of 300 bankers across the nation.

And these lenders say that almost 20 per cent may not survive another year of calf prices equal to those of April-May, 1975, reports Dr. John A. Hopkin, Stiles professor and head of Texas A&M University's Department of Agricultural Economics. Hopkin presented these facts as part of a report to the American National Cattlemen's Association Board of Directors at its recent mid-year meeting in Denver.

He made the study in cooperation with lending institutions in the U. S.

"The Texas Agricultural Extension Service and ANCA should encourage continued heavy culling of cows in order to halt the increase in cows and total cattle numbers," says Hopkin, who is chairman of ANCA's Council of Economic Advisors. "Such culling should be done while supplies of competitive meats are down."

Although agricultural lenders will have access to sufficient funds to finance agriculture, some cattlemen will have difficulty qualifying for adequate credit, warns Hopkin.

Many cattlemen have obtained or will obtain needed liquidity through refinancing of real estate. But Hopkin recommends that ANCA join with universities and lending institutions in informing cattlemen and bankers of the merits and mechanics of the revised Emergency Livestock Loan Program. Producers may obtain more details from the Farmers Home Administration or local Production Credit Associations.

Also, he warns, it is unlikely that cattle numbers and price fluctuations will be eliminated, and financing programs should consider cash flow requirements of individual operations over the entire cycle.

Even though Americans are eating record amounts of beef, the industry is still in trouble, says Hopkin. He attributes the conflicting currents that are causing this to high prices of feed and other supplies and record numbers of beef cattle, with larger numbers currently moving to market off grass.

Until this large inventory of beef animals is worked off, cattlemen can expect relatively low profit margins, says Hopkin

## CONGRATULATIONS TO CONNIE BEARDEN

### PRODUCER OF OUR FIRST LOAD OF SUNFLOWER SEED

THIS FIRST LOAD OF SUNFLOWER SEED WAS HARVESTED ON THE LEE TRICE FARM WEST OF FLOYDADA AND WAS PLANTED IN MARCH. JOHNNY ROBERTS AND MELVIN JOHNSON ARE THE COMBINE OPERATORS.

WE LOOK FORWARD TO HANDLING OUR AREA FARMERS' SUNFLOWER CROP AND WE APPRECIATE THEIR EFFORTS IN PRODUCING A NEW CROP THAT WILL POSSIBLY HAVE MERIT AND PROVE TO BE A PROFITABLE CASH CROP FOR OUR AREA.

Miss Wendy Alcott

## Wendy Alcott, Stanley Pierce

### Plan September 30th Vows

The engagement and approaching marriage of Wendy Alcott to Stanley Pierce is being announced. Miss Alcott is the daughter of Mr. and Mrs. A. J. Alcott of Hobbs, New Mex., and the

prospective bridegroom is the son of Mr. and Mrs. Thomas Pierce of Floydada. The couple will be married at 3 p. m., September 20 in the First United Methodist Church in Hobbs.

### Orval Newberry

#### Honored With Dinner Party

Orval Newberry, recently retired postal employee, was honored Sunday night, August 17, with a dinner and party given by present and former postal employees.

The dinner was held in the community room of Lighthouse Electric with Mr. and Mrs. Randy Gafford, Mr. and Mrs. Kyle Glover and Mr. and Mrs. Doyle Turner in charge of arrangements. Jerry Finley was master of ceremonies.

Attending the dinner with the honoree and his wife, were their children and grandchildren, Mr. and Mrs. Rex Jones, Rex Ann and Von

### Senior Citizens Have Luncheon

Floydada Senior Citizens enjoyed a bountiful salad luncheon at their regular meeting Wednesday held in the community of Lighthouse Electric.

The program consisted of special songs and testimony by Johnny Brown. After lunch games were played in the afternoon.

Mrs. Edna Phillips presided over the business meeting and named Mrs. Menard Field to head the Sunshine Committee. Happy birthdays were extended to four members who observe August birthdays.

The next meeting will be Sept. 17 at the Baptist Encampment. Those attending are to bring a covered dish and meet at Lighthouse Electric at 10 a. m. and travel together in cars and bus. The group is hoping to have Crosbyton Senior Citizens as their guests.

of Lubbock and their son and family, Mr. and Mrs. Dale Newberry and son, Robert of Lamesa.

Retired employees and their wives attending the dinner included Mr. and Mrs. N. W. Williams, Mr. and Mrs. Lorin Leibfried, Mr. and Mrs. Fred Stewart, Mr. and Mrs. W. O. Baker and Mr. and Mrs. Burl Huckabee.

Gifts and momentos were presented to Newberry by Jerry Finley, Doyle Turner, Bill Baker, N. W. Williams and Randy Gafford.

Newberry served 38 years, eight months and 20 days in the U. S. Postal Service, with 22 years and 10 months of that time as a rural carrier. He began his work at the Floydada Post Office Nov. 11, 1936 under Postmaster Barbara Smith. He retired July 31, 1975.

The retiree and his wife plan to catch up on some traveling and are in Arkansas this week where Newberry is more than likely trying out his new spinning reel.

### Floydada Young Homemakers

#### To Stage Rock-A-Thon

Floydada Young Homemakers are staging a "rock-a-thon" for Muscular Dystrophy beginning Friday, Aug. 29th. Location of rock-a-thon will be announced in Thursday's Hesperian.

Any one wishing to "rock" for Muscular Dystrophy are asked to call Kathy Emert 983-5377. The help of everyone is needed in this project, and high school students are especially wanted.

#### "You Are What You Eat"

"What's the big idea?" In nutrition education there is only one big idea: "You are what you eat!" And soon 240 elementary students will be learning about "Big Ideas" in nutrition following a Dairy Council, Inc. inservice training session for eight Floydada teachers.

The workshops, presented by Mrs. Lynn Perrin, nutrition consultant, Lubbock, were held at A. B. Duncan Elementary and R. C. Andrews Elementary through the cooperation of A. E. Baker, superintendent. Four second grade and four fifth grade teachers learned the lessons in their respective units through role-playing.

The achievement level for the second-grader involves modifying his food classification system. In 10 lessons, the student learns to classify foods from his environment using the Four Food group system: milk, meat, fruits, and vegetables, breads and cereals. With this knowledge, he then proceeds to

Homemakers will be soliciting donations during this time and fish bowls will also be out for contributions.

All proceeds will be presented during the Muscular Dystrophy telethon over a Lubbock Television Station.

#### FLOYD DATA

Juanita Phillips of Virginia returned home by plane Thursday after visiting here with her mother, Mrs. Edna Phillips.

the selection of a balanced meal.

"The ultimate goal of the Dairy Council's program is to teach people to make wise food choices," Mrs. Perrin explained. And in the fifth grade, the student then learns to use the Four Food Group System to select foods which meet the minimum daily requirements.

As the fifth-grade teachers learned through the program objectives, identifying serving amounts, knowing the number of daily servings needed from each food group, and the ability to analyze one's daily food selections, just become an integral part of not only the elementary student's, but everyone's daily eating habits.

Dairy Council, Inc. aims to not only train teachers in nutrition education programs for classroom use, but hopes to educate the community about nutrition. Mrs. Perrin emphasized the fact that the ideal time for introducing a child to nutrition education is at the initial onset of formal education.

Dairy Council, Inc., a non-profit, health and nutrition education organization, and a National Dairy Council affiliate, coordinates its five-state, 19-office area in San Antonio, Texas. The program, carried out by a professional staff of 35 nutrition consultants and dietitians, is totally supported by the area dairymen.

### Miss Thurston President Of Organization

Johnnie Thurston, daughter of Mr. and Mrs. Joe Thurston of Floydada, who is a senior elementary education major at Abilene Christian College, has been elected president of the Campus Service Organization.

Miss Thurston is a graduate of Floydada High School and is a member of Texas State Teachers Association; vice-president of Kappa Delta Pi, an education honor society; and Gata Women's Social Club.

The Campus Service Club assist the school in events such as homecoming, lecturership, speech tournaments, high school day, parent's day and school elections.

YARD OF THE WEEK... The spacious yard of Kinder Farris, 800 W. Kentucky, was selected by members of the Women's Division of the Floydada Chamber of Commerce.

### Yard Of The Week

"Our yard was planned not only to compliment our home, but to be functional, interesting, and to be enjoyed by as many people as possible," said Mrs. Farris when the Women's Division of the Chamber of Commerce chose the home at 800 West Kentucky as the YARD OF THE WEEK. The spacious and restful yard has a variety of trees

including Sycamore, Maple, Honey Locust, Fruitless Mulberry, Mimosa, and Willow that were meant for shade and climbing in the summer; Youpon Holly, Mugoet Pine and the tall Ponderosa Pine for green in the winter and decorating with Christmas lights! A

thick and hardy green lawn has withstood many a game of "touch football" and Frisbee.

The beds at the front and around the sides of the house are edged with low hedges and contain an evergreen Sedum groundcover. The midget pines and cypressanthem clumps give a "woody" effect. A low Nandina hedge is immediately in front of the porch; and two beds by the street are edged with Bufordi Holly and filled with Dianthus and Alyssum.

Each summer during Girl Scout Day Camp, groups of Brownies and Juniors have come for a nature study through the yard, finding

Meeting in Ruidosa, New Mexico over the weekend for a McKinney family reunion are Mrs. Helen Solomon, Mrs. Emma Lou Whitaker, Mrs. Dovie Kendrick, and Mrs. G. M. Armstrong of Floydada; Peggy McKinney, Plainview; the Bill Snell family and the Clyde Rogers' of Lubbock and Mr. and Mrs. Jack McKinney of Clovis.

### Floydada Women's Disaster Aid Group Has Meeting

Floydada Women's Disaster Aid group met recently at the fire hall. Attending were Rhonda Gurhrie, Kathy Emert, Laura Rowan and Richard Thomas, group leader.

Thomas presented the program on home disasters and first aid. He pointed out the importance of having a fire escape plan for the home and gave booklets on each describing how to plan such an escape.

Home first aid kits were also discussed and members urged to outfit their home with such and also one or

two fire extinguishers.

A film "Checking For Injuries" was presented, then discussed on what procedures to use in checking an accident victim for possible injuries. The film stressed the importance of protecting the victim from more injury while he or she is examined.

The meeting was adjourned with a reminder that the next session would be August 27th, at 7 p. m. in the firehall. Anyone interested in attending or joining the group is welcome and urged to attend.

#### FLOYD DATA

Mr. and Mrs. Tommy Battey of Ruidosa, New Mex., have been here visiting relatives and friends.

Getting off scot-free has nothing to do with Scotland. It comes from the old English word scopt meaning a municipal tax. Getting off scot-free is tax evasion.

Let us then be up and doing, With a heart for any fate; Still achieving, still pursuing, Learn to labor and to wait.

THE CITY OF CAESAREA IN ISRAEL WAS FOUNDED BY KING HEROD IN 22 B.C. IT WAS THE ROMAN CAPITAL FOR 500 YEARS AND LATER BECAME A CRUSADER CITY!

### Wagon Seat Now Open

The "Wagon Seat", 504 North 2nd in Floydada is now open. Operated by Mrs. A. C. Carthel, the shop will be open from 10 a. m. until 6 p. m. six days each week.

The store offers customers Indian turquoise jewelry, Mexican turquoise jewelry, gifts, some antiques, glass ware and home crafts.

#### COOKWARE CARE

Pots and pans come in a variety of materials; as a result, they can cook food differently and they require different care, too. But it really isn't necessary to consult a cookware directory every time you cook. Try these basic rules to keep your pots and pans in good condition:

\* Do not run cold water into a hot pan. Cold water can warp a metal pan and crack glass and earthenware.

\* To remove greasy residue, don't use harsh abrasives and metal scrapers which can scratch some pans. Instead, just squirt on Grease relief™ degreaser, wipe with a damp sponge and rinse. Also, add degreaser to dishwashing water to boost its grease-cutting strength and to make cleaning easier.

### Women's Tennis Day At Plainview

All area women are invited to the monthly tennis play day Tuesday, September 2 at the Plainview high school tennis courts.

Floydada women are asked to meet at the FHS tennis courts at 9 a. m. that day to share cars to Plainview.

Plans will be made for a different host town each month including: Peters

## Lockney Locals

Dwight Cox of Bovina, Tex. entered Methodist Hospital Tues. Aug. 19. He will have surgery on a foot that was injured in a school bus accident when he attended Lockney Jr. High School. This will be the second skin graft. He will appreciate cards. Room #763 Methodist Hospital, Lubbock.

Mrs. Ethyl Mitchell visited in Hemet, Calif. with her sister and family, the Ray L. Beezer's recently. She enjoyed the tours and beautiful scenes.

Mrs. Max Marble and Marlin from Hart visited with the Johns Cox Tues. Aug. 12.

## Education Committee

### Six Interim Topics

Coordinating Board has authority to disapprove building projects financed by the available fund for the University of Texas at Austin and A&M at College Station.

The four other topics to be reviewed include: Tuition Equalization Grants, post-secondary needs of the deaf, providing doctors for underserved areas, and merging Pan American University with the U. T. System.

### VETERANS' QUESTIONS

Q - I am a veteran. Will the VA give me a physical examination, including x-rays?  
A - If you are in need of medical attention, you may report to the nearest Veterans Administration hospital where you will be examined to determine need for treatment. Routine physical examinations are not conducted by the VA.

Q - Can both the widow and surviving child of a veteran who died of a service-connected disability receive dependency and indemnity compensation (DIC) and educational benefits?  
A - widow is entitled to both DIC and educational benefits from the Veterans Administration. If the child elects to receive educational benefits, he cannot receive DIC.

Q - What is the maximum educational loan a veteran can borrow?  
A - Loans up to \$600 in one academic year are authorized veterans who have exhausted efforts to obtain student loans administered by the Department of Health, Education and Welfare and met other eligibility criteria.

### College Accredited Courses Start In Floydada Sept. 4

Infested acreage is sprayed from one to seven times each year, as determined necessary by extensive insect surveys, with ultra low volume Malathion. The base "control zone" in 1975 is expected to encompass some 250,000 acres, with the aggregate acreage requiring treatment projected at 680,000.

Cost of the program is borne jointly by the High Plains cotton producers who benefit from it, the U.S. and Texas Departments of Agriculture. USDA matches dollar for dollar the contributions of producers and the TDA. Producer contributions, collected on a voluntary, per bale basis as a part of compress receiving charges, have ranged from 50 cents per bale in 1964 down to the 25 cents per bale set for 1975.

Total cost of the program in 1975 should come to about \$1.65 per acre treated, according to PCG Field Service Director Ed Dean, "meaning we'll probably spend between \$1.2 and \$1.3 million this year, about half of which will come from producer funds and half from Federal funds."

In 1974 it was possible to complete insect surveys, trap cropping, spraying and other phases of the operation for about \$1.38 per acre, Dean notes, "but the cost of Malathion in 1975 is up from \$5.84 per gallon to \$9.02, and other costs have increased along with general inflation, including application costs this year of \$3.04 per gallon as compared to \$2.08 per gallon last year."

Extreme care will be taken in 1975, Dean notes, to conduct weevil spraying activity on a schedule that will not aggravate this year's unusually high incidence of boll worm infestations. "There is a danger that early spraying for weevils in some instances would kill off boll worm predators and open the door to more economic damage from worms than would be expected from weevils," he said, "so in fields where data gathered by survey teams indicate that this is a probability, spraying for weevils will be delayed until that possibility no longer exists."

Low-bid contracts for spraying were awarded August 12 by PCG and USDA to D&D Aero, Inc., of Rantoul, Kansas; Euding Flying Service of Vincennes, Indiana; and Kimmel Aviation, Inc., of Houston, Mississippi.

College accredited courses will be offered in Floydada starting September 4. South Plains College, through the Regional Occupational Center in Plainview, will register students Sept. 2 and 3rd from 7 p. m. until 9:30 p. m. in the Floydada High School. Ten students will be required for a course. Tuition will be \$58 for a 3 hour course; \$76 for a 6 hour course; \$1.05 for 9 hours; and \$140 for 12 hours. This does not include books or lab fees.

Classes will meet Monday through Thursday nights at 7 o'clock until 9:30, from Sept. 4th until Dec. 19th, 1975 in Floydada High School.

A high school diploma or GED certificate is required for admission. Persons with neither may apply for probationary acceptance to: Director, ROC, Plainview, Tex.

Monday evening classes will include: Business math; college reading skills; western wear merchandising; legal terminology and medical terminology. Tuesday classes will consist of: Business machines; communication skills; principals of nutrition; credit and collections and applied psychology.

Wednesday evening classes include: Business law; basic technical writing; American studies; functions of supervisors; and principals of real estate. Thursday classes are: Basic accounting I; introduction to fashion; basic reference material; small business management; management seminar and introduction to social work.

Explanation of courses and degree requirements are available at the Floyd County Historical Museum. Forms for Basic Education Opportunity Grant applications are also available at the museum. These must be sent to Washington, D. C. which takes four weeks for processing. They are being accepted for students who

plan to attend college in January.

Students who apply for grants this summer for fall term enrollment are now receiving notice of acceptance. Several thousand dollars in B.E.O.G. funds are

### Former Floydada Patrolman New Chief At Olton

James T. Isbell, 35, of Ralls has accepted the job as new police chief at Olton. Isbell is a former chief of the Paducah police force and served as patrolman in Floydada at one time.

already being received by middle income students in Floydada, as a result of summer application.

All courses taught are transferrable to other Texas Colleges and are taught under the supervision of the Texas Education Agency.

### Local Scouting Units Eligible For Awards

Freedoms Foundation at Valley Forge, in cooperation with the Boy Scouts of America, will recognize Cub Scout packs, Scout troops, and Explorer posts for bicentennial achievement, according to Jack Baker, President of the local South Plains Council.

For the first time, Freedoms Foundation will have a Scouting division and will award George Washington Honor Medals and Valley Forge Honor Certificates. The unit activity is to be conducted between September 1, 1975 and August 31, 1976, Baker said.

"Freedoms Foundation o-

ver the years has recognized Americans and various organizations for constructive words and deeds which support America, suggest solutions to basic problems, contribute to responsible citizenship, and inspire love of country," Baker said.

Nomination forms are available from the South Plains Council service center, No. 30 Briercroft Office Park in Lubbock.

All but one of America's dental schools is dependent to some extent on advanced facilities in Veterans Administration hospitals.

### Consumer Food News

COLLEGE STATION—Upcoming pork supplies will dip to levels below those of many years, and this means higher retail prices, Mrs. Gwendolyn Clyatt said this week.

"USDA reports confirm the decline in pork supplies—and it might be nearly another year before increased supplies reach the retail

market," she added. "Only a few features may be found on end chops, semi-boneless hams, frankfurters and liver."

Mrs. Clyatt is consumer marketing information specialist with the Texas Agricultural Extension Service, The Texas A&M University System.

Beef counter specials show emphasis on chuck roasts and steaks, round steaks, ground beef and liver, she said.

"In poultry sections, the egg market is settling down after some price increases, so eggs continue as an easy, economical protein source for menus.

"Current turkey supplies, however, may consist of more mature birds. These big birds are nutritionally as good as younger ones—but drier," Mrs. Clyatt said.

She advised use of moisture in cooking—or a sauce for serving mature turkey.

Peak-season vegetables this week are summer squash (soft shell) and okra.

Others worth considering, pricewise, are cabbage, carrots, corn, cucumbers and cshaw.

Fruit buys include cantaloupe and watermelon, which are plentiful with prices more attractive.

Grapes, peaches, nectarines, bananas and oranges are other choices.

Dairy features are scattered, but some appear on low-fat milk, sour cream, cottage cheese and yogurt.

CONSUMER WATCHWORDS: Think twice before by-passing boneless meat.

Although it has a higher price, it may be a thrifter choice—even though it costs more per pound, there is no excess fat or bone, so every bit of meat adds up to more servings.

### Tax Reform

The American economy is faced with a vast shortage of capital funds. This translates into sorely-needed investment capital to produce 10 million new jobs by 1980.

According to some estimates, the nation in the next decade will require \$4.5 trillion—more than three times our current gross national product, all we produce in goods and services each year.

From where will the money come?

One of the major sources of such funds is the profits that business plows back into its enterprises. But corporate profits have been declining as a percentage of national income—from 6.8% in 1965 to 3.3% in 1973.

The Chamber of Commerce of the United States, along with top economic advisers of President Ford, believe our tax laws are mainly at fault because they discourage incentives to capital formation.

"To encourage growth of capital," says the National Chamber, "we need to

### OBITUARY

#### Essie Griggs

Funeral rites for Mrs. Essie Rhodes Griggs, 93 year old former resident of Floydada, were conducted Saturday, August 23rd in the First Baptist Church in Amherst. Burial will be in Floydada Cemetery under the direction of Payne Funeral Home.

Mrs. Griggs died Wednesday night about 8:30 in South Plains Hospital in Amherst following a lengthy illness. She was a native of Texas and had resided in Floydada 55 years before moving to Amherst.

She was preceded in death by her husband, J. L. Griggs in 1947, an infant son and one daughter, Mrs. Myrtle Permenter of Floydada.

Survivors include four daughters, Mrs. Claudia Neeley of Amherst, Mrs. Mae Jones of Stockton, Calif., Mrs. Gertrude Jones, Lakewood, Calif., and Mrs. Johnnie Bell Neeley of Mountainair, New Mex.; two sons, Cecil Griggs of Floydada and Troy Griggs of Conova Park, Calif.; 13 grandchildren, 13 great grandchildren and one great grandchild.

Pallbearers were Johnny Neeley, Robert Neeley, Bob Neeley, J. C. Griggs, Freddie Moore, Johnny Moore and J. W. Permenter.

Pastor of the church, Rev. Glenn Willson, officiated for the rites, assisted by Rev. Bob Neeley of California.

### Social Security Benefits

Everyone who was in receipt of Social Security benefits became eligible for an automatic 8 percent increase in payments effective June 1, 1975. These additional benefits came as the result of the increase in the cost of living. Under current law, Social Security payments will be increased

in time. The 8 percent increase was first shown on the checks which Social Security recipients received July 1, 1975. Persons who are in receipt of VA disability or death pension benefits need not worry about reporting this increase to the VA at this time.

The current "end of the year rule" states that when income is increased because of unexpected amounts, it will not be counted through that calendar year. If the laws are not changed, however, the VA will be required to adjust pension payments next year based upon the new Social Security rate.

Earlier this year the Congress enacted, and the President signed, Public

and continuous.

The Chamber document is changing, indeed. Many Americans, for example, have a thing about profits and construe tax changes of benefit to business as a "tax break." Before we can change our tax laws we must overcome the syndrome that profits and greed are akin to one another.

We also must recognize that for every job there is a price in capital investment. According to a 1975 Fortune magazine survey, the median investment for each job in U. S. industry is \$33,658. Tax reform must start somewhere. Why not start with these challenges?

CALVES—TOP MEAT BUY A weaning age calf will make a top meat buy, believes a livestock and meat specialist for the Texas Agricultural Extension Service. Although the meat

Lend me your ears;  
Especially if your water heater  
has a lot of years.  
It's easy to forget  
An appliance such as this,  
But cold water at those urgent  
Could be a real crisis.  
Your Reddy friends remind you  
With this little poem  
An electric water heater's perfect  
For each and every home.

Improving Economy Indicates Stronger Cotton Markets

than 1,000 bales a day over the May level, Cox reports. Cox also points out that several polyester fiber producers recently announced a price increase of about five cents a pound, indicating they view the textile market as healthy enough to absorb their price increase. "With each passing day, things look a little more favorable," Cox says. "Col-

SEE COTTON PAGE 9

RALEIGH--The textile economy is improving substantially, pointing to increased domestic cotton use and a stronger cotton market, say economists here at the Cotton Incorporated research center. The most recent government and trade statistics indicate a strengthened

textile economy in the months ahead, according to David Cox, Cotton Incorporated vice president for economic research and development. Cox cites several indicators for an improved year: sharp reductions of textile inventories, stronger retail sales of cotton-related tex-

tile items, and increasing consumer income. Raw cotton inventories at mills June 30 reached their lowest level in 36 years. Retail sales of cotton-related items on a poundage basis were greater in May this year than in May 1974. "Retail sales of cotton-related textile items have held

up quite well during the past six months," Cox says. "It seems likely that Cotton Incorporated's earlier projection of domestic cotton use of 6.5 million bales during 1975-76 can be surpassed." During June mill use of cotton was 23,700 bales a day, an increase of more

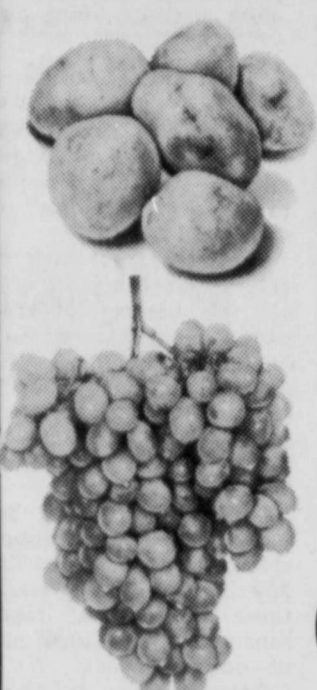

Christens Fourth USS Texas

threw up her arms, jumped up and down and shouted exuberantly. "I did it! I did it right! I've got champagne in my hair, but I don't care! Isn't she beautiful?" The band of the commander-in-chief of the Atlantic Fleet struck up "Texas, Our Texas" as the great cruiser slid down the ways to the James River. "The Eyes of

Texas," "The Yellow Rose of Texas" and other songs followed as the USS Texas settled in the water. Among the laughter were many tears, especially from the old salts who had served aboard the Battleship Texas during her long career. Something about his own ship makes a sailor love her.

**Nine Accidents, One Death On Rural Roads**

The Texas Highway Patrol investigated nine accidents on rural highways in Floyd County during the month of July, 1975, according to Sergeant Thurman Keffler, Highway Patrol supervisor of this area. These crashes resulted in one person killed and three persons injured.

The rural traffic accident summary for this county during the first seven months of 1975, shows a total of 36 accidents resulting in two persons killed and

19 persons injured. The rural traffic accident summary for the 60 counties of the Lubbock Department of Public Safety Region for July, 1975, shows a total of 568 accidents resulting in 22 persons killed and 398 persons injured as compared to July, 1974, with 485 accidents resulting in 18 persons killed and 280 persons injured. This was 83 more accidents, four more

19 persons injured. The rural traffic accident summary for the 60 counties of the Lubbock Department of Public Safety Region for July, 1975, shows a total of 568 accidents resulting in 22 persons killed and 398 persons injured as compared to July, 1974, with 485 accidents resulting in 18 persons killed and 280 persons injured. This was 83 more accidents, four more

22 traffic deaths for the month of July, 1975, occurred in the following counties: two each in Clay, Haskell, Randall, Jack, and Sherman; and one each in Floyd, Garza, Hale, Hockley, Lubbock, Montague, Carson, Collingsworth, Moore, Parmer, Potter, and Wheeler.

**CORN FROM PAGE 3**

heptachlor in some areas. This shortage was largely caused by the previous cancellation of aldrin and dieldrin.

Next spring, with no chlordane and heptachlor at all, the number of acres damaged or destroyed could run into many millions. This would be disastrous to thousands of corn growers, and eventually result in higher food costs for consumers.

"We're not fighting just because we manufacture chlordane and heptachlor," Morris asserted. "Actually, these two chemicals represent a relatively small part of our business. We're fighting because chlordane and heptachlor are essential to modern agriculture, and our farm friends and customers need them to produce corn profitably."

In 25 years of research there is no evidence that chlordane and heptachlor pose any significant threat to the well-being of people or animals, Morris continued. And a majority of the scientific community agrees.

Even though Velsicol has repeatedly urged Russell Train to cooperate in submitting all research data to a completely independent Scientific Advisory Committee for evaluation, he refuses. Thus it seems evident, Morris said, that Train is more interested in

spectacular headlines, designed perhaps to coerce Congress into voting more funds, than in the facts. And more interested in a suspension action where he is the sole prosecutor, judge and jury, than in the unbiased truth.

But the real victims of such a bureaucratic ploy are the corn growers, Morris concluded, and they should lose no time in letting their congressman and senators know how they feel.

**The Floyd Philosopher Reflects On Last Week's Grain Crop Estimate, We Think**

Editor's note: The Floyd Philosopher on his Johnson grass farm reflects on last week's grain crop estimate, we think.

Dear editor: At 3 o'clock one day last week the whole world nearabout was on needles and pins to hear what the Agriculture Department estimated the U. S. grain crop will be for this year.

That is, everybody but the Russians; they apparently already knew and had stocked up on U. S. grain at a satisfactory price a few weeks ahead of time. I guess if the CIA hadn't had all its men tied up trying to overthrow governments in other countries it could have spared a few to check up on weather conditions in Russia and find out that the Soviets would be in the market for grain and let's see if we can't out-trade them just this once

at least. Looks like somebody sometime would think of swapping some of our grain for some of their oil, but the trouble is they buy our grain in the summer time and it's not till winter time we find out we're short of heating oil.

But what I started out to say was that crop estimating, which makes the farmer's grain market go up or down, ought to be applied to other things. Why should farmers and ranchers, not counting the speculators, be the only ones to grab a newspaper or listen to the radio every morning to find out whether the price of their crops and livestock has gone up or down over night?

For example, the government ought to estimate the number of cars and pickups coming out this year, so the manufacturers could wake up in a sweat every morning

**New rates for long distance calls within Texas.**

With Discount Periods and a new One-Minute Rate, you may be able to save money.

Rates for Long Distance calls within Texas have just changed.

For you—the telephone customer—it means most rates are going up.

But you may be surprised to learn that rate changes won't necessarily bring higher telephone bills.

Because with our new discount for dialing your own calls, you can better control your Long Distance costs.

In some cases, you may be able to save money on your Long Distance bill by taking advantage of these rates.

For example, there's a new one-minute rate on all calls that you dial yourself—without the operator's help.

Under the old rate, the initial rate period was for three minutes. Now on One-Plus dialed calls the initial rate period is one minute.

That means you can save by reducing the length of your call.

	Mon	Tues	Wed	Thurs	Fri	Sat	Sun
8 a.m. to 5 p.m.	Day Rate Period Full Rate						
5 p.m. to 11 p.m.	Evening Rate Period 30% Discount						Eve. 30% Discount
11 p.m. to 8 a.m.	Night and Weekend Rate Periods 40% Discount						

NOTE: The Evening rate applies all day on the following holidays: New Year's Day, July 4, Labor Day, Thanksgiving and Christmas Day, except in instances where the holiday falls into Night/Weekend period. In this case, the lower rate applies.

\*On operator-assisted calls, the same rate applies at all hours on all days.

Nights and Weekends there will be a 40 per cent discount.

So, if you call later in the day or night, or on weekends, you're going to get the lowest rates possible.

But if you place calls through an operator, rates for these Zero-Plus calls will be higher, at any time—night or day. These include calls from a coin phone, collect, credit card and calls billed to a third number.

The initial rate period of three minutes will continue for these and other operator-assisted calls.

And, person-to-person calls will cost more than any other type call.

	#One-Plus	Each Additional One-Plus Minute
DAY RATE	50c or less	41c or less
EVENINGS 30% Discount	35c or less	29c or less
NIGHTS AND WEEKENDS 40% Discount	30c or less	25c or less

#One-Plus charges for 1 minute.

NOTE: One-Plus rates also apply on station-to-station calls placed with an operator where One-Plus facilities are not available.

\*Rates quoted do not include taxes.

Simply put, if you dial the call yourself, you are going to get a lower rate. If you place your call through an operator, it will cost more.

Now our new rates offer you a choice.

By dialing your own calls and by taking advantage of our discount rate period, you can still get low rates and fast service.

**COTTON**

FROM PAGE 7

negative factors, and they will favorably influence cotton use and prices in the months ahead."

Cox recommends that producers watch new crop developments, the economic

recovery, and the movement of the remaining 1974 crop. As the market continues to gain strength, producers should recalculate production costs and again evaluate new crop marketing plans, he advises.

The analysis of the current cotton outlook is in the July 1975 "Cotton Summary" published by Cotton Incorporated, the fiber company of U. S. cotton producers.

lectively, the signs indicate a better market in the months ahead."

The Cotton Incorporated economists believe the forces that contributed strongly to depressed cotton prices during the last part of 1974 and early 1975 are rapidly fading.

What killed cotton prices, Cox explains, was a chain reaction of a drop in real consumer income in 1974, a slowdown of retail sales, ballooning inventories, difficult export problems, and sharply curtailed fiber purchases.

"But now these factors are gone or are diminishing rapidly," he says.

Cox cautions that cotton prices will be moderated by the large domestic and foreign carryover on August 1 this year and that the general economic recovery could be slowed if inflation is rekindled.

He adds, however, "There are more positive than

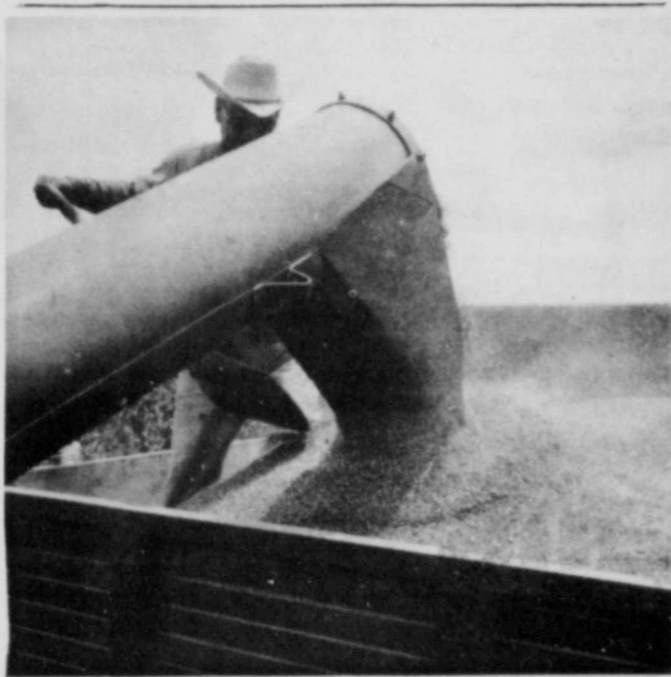

More than one-fifth of all owner-occupied private residences today were built under the GI home loan program administered by the Veterans Administration.

About 2 million more people than attend National Football League games during a regular season receive treatment annually in outpatient visits to Veterans Administration medical facilities.

**LAW PROTECTS PLANT VARIETIES**—The Federal Seed Act of 1970 protects plant breeders, seed companies and owners of varieties from exploitation by others. The Act provides for certification of particular varieties just as individuals

or companies apply for patent rights to inventions. Thus plant breeders and variety owners can control for a period of years the sale and distribution of the seed they have developed so that they can recover most of the

development cost. The Act should boost breeding programs, and the end result should be better adapted crop varieties for the future, says a cotton specialist for the Texas Agricultural Extension Service.

**GRAIN IS POURING IN** from fields across the state. Agriculture Commissioner John C. White reports that though carry-over stocks are down in Texas, this year's production of sorghum and wheat are expected to fill the elevators and farm silos.

# WHAT

has your dollar over a barrel--- and you in one?

As high as taxes are, they don't cover **ALL THE COSTS** of government spending

**YET** the government continues spending beyond its means

Anyway (deficit spending) which lowers the value of your money

So...

you don't get full use of the money you earn because

of **TAXES** and **INFLATION**

GOVERNMENT SPENDING MEANS

**1 TAXES** which reduce the amount of money you take home

**DID YOU KNOW** that 52.7% of all individual income taxes paid come from people with annual incomes between \$5,000 and \$15,000?

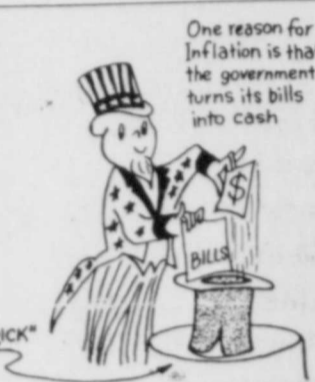

...AND DEFICIT SPENDING FEEDS

**2 INFLATION**

which lowers the purchasing power of your money.

Better than the "RABBIT TRICK"

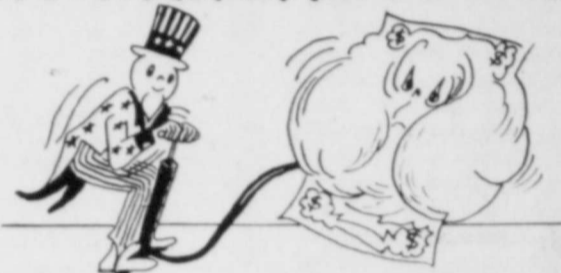

Here's how it works...

- When the government spends
- the treasury issues IOUs.
- Normally part of the IOUs are used by the Federal Reserve to increase the lending limits of the banking system
- This creates money out of debt. etc., etc., etc. year after year contributing to inflation!

If this keeps up **YOU MAY GO BROKE**

or **OUR MONEY MAY BUST!**

So...

to keep taxes in line and stop inflation---

the government must **ECONOMIZE**

HERE'S HOW IT CAN BE DONE!

- GET A PRIORITY for spending that relates to income.
- DETERMINE which existing programs can be dropped or cut back.

**3 EVALUATE** all proposed programs in terms of value received.

IF WE---

citizens and voters--- continue to tolerate unwise and wasteful government spending **WE are to blame!**

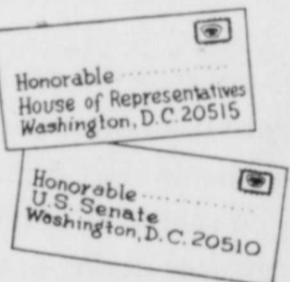

HELP AROUSE OTHERS to the situation---

- TELL them about it
  - ASK them to read this article
- and...

WRITE YOUR REPRESENTATIVE AND SENATORS

let them know your feelings about the government's need to **ECONOMIZE**

"... control of public spending rests with people who create public sentiment and elect public officials of Government... Congress is not going to practice restraint unless the message comes through loud and clear from the people..."  
Hon. George H. Mahon (D. Tex.) Chairman, Appropriations Committee House of Rep.

Reprinted with the permission of the Public Information Department of the National Association of Manufacturers.

## Carry-Over Wheat Stock Down From Last Summer

AUSTIN--Stocks of carry-over wheat in Texas are 42 per cent below those of last summer, Agriculture Commissioner John C. White has reported.

An old-crop carry-over of 10.2 million bushels is recorded for the state in the July quarterly report of Texas stocks of grain on and off the farm, compiled by the Texas Crop and Livestock Reporting Service. This total is 7.5 million below that reported in 1974. The statistics cover grains produced in 1974 and before.

Except for 1974, stocks of wheat in the U.S. are the lowest July holdings since 1952, a year of severe drought. Current holdings are 27 per cent below those in 1973. U.S. farm stocks totaled 126 million bushels of wheat on July 1, 41 per cent above a year ago, while off-farm stocks at 193 million are up 22 per cent.

Other grain stocks are also lower in Texas, reflecting the impact of the drought in Texas in 1974. Fluctuations in demand for cattle feeding have reduced disappearance totals for all grains except corn and rye.

Total stocks of grain are down in Texas, about 50 million bushels from a year ago with sorghum estimated at 27.1 million, less than a third of the stocks reported in July 1974.

Corn stocks hit 12.5 million bushels, far below the 21.7 million on hand last year. Oats, barley, and rye stocks also show drastic decreases.

Though projections on yield have not been made for grain sorghum this year, planted acreage has increased 7 per cent, White said. Harvested acres are estimated to be 6,800,000.

"Harvest of sorghum has been helped by warm weather the past few weeks. The Lower Rio Grande Valley crop is in; harvesting is going full blast in the Coastal Bend and the Blacklands," White said.

A record wheat crop of 132 million bushels is expected for Texas this year, 2 1/2 times higher than last year's.

AG CREDIT SOUND IN TEXAS - - - The average size of agricultural loans has increased, interest rates are lower, and more than half the banks in Texas are seeking new farm and ranch loans. These conditions are reflected in a recent survey of agricultural credit conditions by an economist for the Texas Agricultural Extension Service. Operating loans showed a sharp increase, followed by machinery and crop storage borrowing. Feeder cattle loans were down markedly.

**Gin Records Lead**

**To Better Management**

RALEIGH—Cotton Incorporated engineers are perfecting an inexpensive new electronic record-keeping device that logs minute-by-minute activities of important cotton gin functions.

"With it gin managers will be able to obtain detailed, unbiased information on which to base management decisions affecting productivity and profits," said Dr. W. F. (Bill) Lalor, manager of systems and cost engineering at the Cotton Incorporated Research Center here.

"Good management is based on good information," said Lalor, "and good management can increase gin output and cut costs by as much as 50 per cent."

Lalor says the new gin recorder logs when each gin stand is in or out of operation, when each bale of ginned cotton is pressed out, when the suction pipe is feeding the gin, when the mechanical gin feeder is operating, total ginning time, and moisture content of seed cotton entering the gin.

"Its cost will be only about \$2,000.00, and it can be very easily wired into the gin console," said Lalor. "Its simplicity and low cost will make it an effective item for gin managers."

Lalor pointed out that a modern gin is a million-dollar-plus investment which demands good management. Through good management a gin can easily achieve its rated output and cut its costs per bale.

He said that the new Cotton Incorporated gin recorder, installed at a modern gin last year, revealed that lost time for six gin stands ranged from a low of 17 per cent to a high of 83 per cent.

The engineer said the new gin recorder will be available to ginners who want it for the 1976 season.

Details of the benefits of the new gin recorder are contained in an "Agro-Industrial Report" just published by Cotton Incorporated. It is entitled "Productivity and Profits in Ginning."

As an example, Lalor cited what happens to power costs at a 10-bale an hour gin when production falls below capacity.

"At six bales an hour, the power cost is \$1.50 a bale," he calculated.

"At the same gin, output of 10 bales an hour means a power cost of 70 cents a bale."

Lost gin time always means unused gin capacity, Lalor said.

Dr. Lalor is one of three authors of the report. The others are J.K. ("Farmer") Jones, associate director of agricultural research for mechanization, and Dr. George A. Slater, vice president of agricultural

**Breeders' Directory Organized**

AUSTIN—Queries will be mailed soon to gather information on breeding stock for sale for the Texas Livestock Market News Directory, published by the Texas Department of Agriculture.

The Directory contains over 3,000 entries from registered breeders of livestock in the state who have stock for sale. It is mailed to buyers throughout Texas and foreign countries. Livestock included are cattle, sheep and goats, horses, and swine.

Letters are sent to all registered breeders whose associations release mailing lists for such purposes.

"Some breeders may be omitted from the Directory because they do not receive the inquiries. If persons wish to be included in the Directory and do not receive a request in the next two months, they should contact our export office," Agriculture Commissioner John C. White stated.

Export office personnel request that the name of the ranch and the breeder's name be included in requests for cross-checking purposes. The address is Export Office, Texas Department of Agriculture, P.O. Box 1119, Brenham, Texas 77833.

The Directory is part of the expanded export program initiated by the Texas Department of Agriculture.

**Hunting, Fishing Licenses**

LUBBOCK—Now is the time to purchase your new 1975-76 combination hunting and fishing license at the same bargain price you paid for it last year.

The combination license provides a savings of seventy-five cents over the cost of purchasing separately a resident hunting license at \$5.25 and a fishing license at \$4.25.

The new license, valid Sept. 1, 1975, through Aug. 31, 1976, are available at all P&WD enforcement offices and bonded license sales deputies such as major sporting goods stores throughout the Panhandle and South Plains.

Non-resident hunting license are \$37.50.

Fishing licenses purchased separately at anytime of the year are valid for one year from the date of purchase.

Three turkey tags and

four deer tags are on the new hunting licenses and must be used according to regulations.

New licenses are printed on a special paper which is resistant to tears and water—something which should prove useful to both outdoorsmen and game wardens trying to decipher licenses dunked in water and otherwise roughly handled.

Both deer and turkey tags

are easily separated from the rest of the license by perforations and there is also a perforation on the edge of each tag where a string or wire can be inserted for attachment to the harvested game.

Sept. 1, 1975, is the date when new hunting and fishing combination licenses will be required.

The Veterans Administration program of policies with a \$90.8 billion.

Some 35 per cent of the nation's capital is provided by the Administration system.
