G. I. A. Celebrates Third Anniversary

A very pleasant afternoon was spent on Friday of last week at the home of Mrs. J. C. Green, when the G. I. A. to the B. of L. E. celebrated their third anniversary, being entertained by Mrs. Green and Mrs. S. E. Petersen.

The afternoon was passed in playing buncos, many high scores being made.

Delicious refreshments was served of chicken salad, fruit jello and cake, and the surprise of the afternoon was a very artistic birthday cake made by Mrs. H. G. Newton, representing the emblem of the division, the star and crescent.

All departed expressing a very delightful time and wishing for many more birthdays for the division.

Joe Kerr Not Improving

Word from El Paso is to the effect that Joe Kerr is not getting any better and that if anything he is suffering more pain now than when he arrived in El Paso.

Some time ago Mr. Kerr took sick with something like the flu. After a few days he began suffering from a severe pain in his head, which pain continued without abatement. Mr. Kerr went to San Antonio and remained for several weeks but received no benefit and returned home. His condition here grew steadily worse and about ten days ago he went to El Paso to be treated, but with no change for the better up to the present time.

Say "Chevon" Not Mutton

Beef is the meat of the cow, Mutton is the meat of the sheep and Chevon is the meat of the goat.

So when we have an edible sheep we call him a "mutton sheep" and when we have an edible goat, it should be called a "chevon goat" not a mutton goat, we could say, we have some nice "beef sheep" for sale, but we don't for it would sound funny. We all have gotten in the habit of saying mutton goat because we had no commercial name for this meat. But it has been named Chevon and lets all use the word "Chevon."

CHEVON

"This Chevon meat is good to eat.

When barbecued it can't be beat.

If you would help the goat to fame,

Just make this word a household name." Contributed

Wear made-to-measure clothes and you will always appear well dressed. Call at the Royal Tailor Shop and let us show you some of the "smartest" samples for suits you ever seen. The cost is low and satisfaction guaranteed.

Former Sanderson Flyer in Del Rio

Lieut. Selzer, one of the army aviators that recently won international fame in a successful flight from Kelly Field to Porto Rico and thence to Washington, arrived in Del Rio last Monday to join Mrs. Selzer who had been with her parents, Mr. and Mrs. John Almond here while the Lieutenant was out on the hazardous air voyage. After a few days rest in this city they will return to Kelly Field this weekend. - Val Verde County Herald.

Lieutenant Selzer was stationed at the Sanderson Aviation Camp for more than a year and has many friends here who were glad to hear of his successful flying trip to Porto Rico and return.

DELIGHTFUL BRIDGE PARTY

Mesdames Dave and Vance McLymont entertained with a delightful bridge party Wednesday afternoon at the Kerr Hotel. The room used for the occasion was fragrant with baskets of lilies and roses, arranged to give a most pleasing effect.

After four games were played, the prizes were awarded, first to Mrs. John Stovel, second to Miss Sybil McKee and cut prize to Mrs. Edward Downie.

A dainty luncheon of chicken sandwiches, pineapple salad, potato chips, olives, jello with whipped cream, angel food cake and coffee was served to Mesdames J. W. Happle, J. Green, Max Bogusch, H. R. Laurence, Paul D. Lowry, Sims Wilkinson, Edward Downie, James Kerr, F. B. Carter, W. T. Carpenter, J. Stovel and Miss Sybil McKee. Platé favors to each guest were vari-colored Japanese flowers.

Heavy Rains and Hail Does Some Damage

The recent hail and heavy rains did considerable damage to the stockmen of Terrell county. The heaviest loss was at the Big Canon Ranch and the Prosser & Brown Ranch. On the latter ranch A. D. Brown lost 299 head of sheep in the flood, and on the Big Canon Ranch more than 25 head of cattle were drowned.

Mr. Appel, manager of the Big Canon Ranch, said that as he rode out to look over the ranch to see what damage had been done to the stock, that he noticed the canyons were literally strewn with jack rabbits, hawks and buzzards that had been killed by the hail.

Fences were washed down in some places and a few tanks damaged. Notley Scott had one tank to wash out.

Phone No. 6, for cleaning and pressing in the most up-to-date and satisfactory manner, and at greatly reduced prices. Clothes called for and delivered.

Former Sanderson Citizen Will Defend Accused Man

A man giving his name as D. E. Corrigan was arrested in El Paso, charged with the murder of George Marsh, a taxi driver at Seattle, Washington, on April 3. El Paso Police are trying to identify an automobile found in Corrigan's possession as the one taken from Marsh. A preliminary hearing has been set for today before justice of the peace R. B. Rawlins in El Paso, and A. T. Folsom, formerly of this place, and his brother Clarence Folsom, will represent Corrigan at the hearing.

ROSS-COLLINS

John J. Ross and Miss Isabelle Collins were married on Thursday evening of last week. Rev. P. F. King officiating at the Christian church parsonage. The groom is employed as bookkeeper at the Grant Lumber Company office in this city and is a young man of splendid character with a promising future. He is the son of Engineer and Mrs. W. H. Ross. The bride is the very charming niece of Mrs. W. S. Eibbons, with whom she has made her home for some years. The many friends of the young couple extend congratulations and good wishes. - Val Verde County Herald.

Johnnie Ross was formerly a resident here and has a host of friends who wish his success and happiness.

Vance McLymont made a business trip to Del Rio the past week.

Gets Four Years in Penitentiary.

In the District Court at Ozona last week, the jury sitting on the case of the State of Texas vs. Juan Hernandez brought in a verdict giving Hernandez four years in the penitentiary.

Hernandez is the Mexican who shot John Tippett on his ranch near Sheffield about three months ago.

W. J. Banner was in from the ranch Wednesday, on business. Mr. Banner said that the recent heavy rains had demolished the road between his ranch and the county road and that he had put ten men to working the road so he could get to town. In some places, he stated, they had to cut out an entire new road. Mr. Banner said that he only lost about a dozen chickens in the flood but the hail killed most of his chickens as they roosted in the trees.

Elmo McLaughlin is here this week, shaking hands with his large circle of friends. Mr. McLaughlin has been on the work train at Alpine for the past few weeks. He stated that Mrs. McLaughlin was in San Antonio at the bedside of her father who is very ill, having recently undergone an operation and the doctors say will probably have to be operated on a second time.

Pay by Check

Florida Discovered Again by Ponce de Leon

The 412th anniversary of the discovery of what is now Florida by Ponce de Leon on Easter day, 1512, was celebrated at St. Augustine April 4, 5 and 6 by an elaborate pageant. These photographs show Ponce de Leon and his standard bearers taking possession of the new land, and the man who represented the Spanish explorer.

ANNUAL REUNION OF CONFEDERATE VETS

Memphis Selected for 1924 Convention City—General Halderman, Commander.

New Orleans, La.—General William B. Halderman of Louisville, Ky., was elected commander in chief of the United Confederate veterans at the closing business of the annual reunion at New Orleans Thursday, and Memphis, Tenn., was selected as the 1924 reunion city.

Three names were offered for the post of commander in chief when nominations were called for, those of General Halderman, General William A. Collier of Memphis and General E. W. Kirkpatrick of McKinney, Texas. The name of General Collier was withdrawn before the voting began, leaving the field to the Kentuckian and the Texan. General Halderman polled 771 and General Kirkpatrick 368 votes.

Only Memphis and Dallas were in the contest for the next reunion and the Memphis speakers were reinforced with a petition more than 100 yards in length asking the veterans to the Tennessee city. It was a nip and tuck race between the two as the balloting progressed, but Memphis always kept a jump in the lead, and when the roll call had been completed had polled 620 votes to 512 for Dallas. A number of the veterans had argued that the reunions, because of the age of delegates, always should be held in a central city of the South in order that the journey might not be too hard on those residing in the more distant states.

W. McDonald Lee was re-elected commander in chief of the Sons of Confederate Veterans in session at New Orleans Thursday. He defeated B. H. Richardson, commander of Camp Beauregard, New Orleans, by the vote of 243 to 51.

TWENTY BILLION DOLLARS PAID BY GERMANS SO FAR

Washington.—Germany has paid the allies in cash, ships, lands and materials of various kinds a total of one hundred billion marks, gold, equivalent to about twenty billion American dollars, gold, according to figures prepared by the German treasury department and transmitted to Washington.

Included in this total is an allowance for the relinquishment of Alsace-Lorraine. Other items included in the compilation are: For deliveries from material on hand since the armistice, 25,294,000,000 gold marks; payments and deliveries from national capital and current production, 11,113,000,000; cash payments, 2,140,000,000; other payments and deliveries, 2,371,000,000; expenditures and losses within Germany, 10,482,000,000.

Furnishing Oil Tanks.

Washington.—Oil companies wholesaling gasoline can furnish retailers tank and pump equipment under an agreement that the equipment will be used exclusively for handling the gasoline of the company owning the equipment, the supreme court held Friday in cases brought by the federal trade commission.

Replies to Canada.

Washington.—The right of the shipping board to sell its ships subject to the condition that they shall not be used by the new owners as rum runners has been sanctioned by the state department in its reply to objections raised by the government of Canada.

American Delegation in Berlin.

Berlin.—Ten members of the American delegation to the congress of the International Chamber of Commerce recently held in Rome have arrived in Berlin to obtain information on Germany's economic position from financial and industrial circles.

New Postmaster at Schulenburg.

Schulenburg, Tex.—Herman Eck, the newly appointed postmaster, has taken charge of the local postoffice, relieving Acting Postmaster Gus Brauner. Mr. Brauner served for four months after the resignation of Rudolph Nordhausen.

Russian Grain Exports.

Moscow.—One hundred million pounds of Russian grain were exported from the 1922 crop, according to a report issued by the soviet department of statistics and published in the Labor Gazette. (A pound is equivalent to about thirty-six pounds avoirdupois.)

Greece Not to Pay Turks.

Paris.—Greece has irrevocably decided not to pay a farthing of indemnity to Turkey, declared M. Alexander, foreign minister of Greece, in an interview Friday. If Turkey insists upon an indemnity, Greece will not sign the peace treaty, he asserted.

Texas Girl Dances Fifty Hours.

New York.—Miss Alina Cummings of San Antonio, Texas, created a new world's record Monday when she completed fifty hours of continuous dancing.

City Election at Houston.

Houston, Tex.—Mayor O. B. Holcombe and the entire democratic city slate was returned to office Tuesday by a two-thirds majority. Bond issues totaling \$1,250,000 for civic improvements also passed.

Texas News

The farmers of Navarro County report wheat and oats are doing well, corn coming up to a good stand, and cotton planting well under way.

Water works bonds totaling \$54,000 for the city of Rule, Haskell County, were approved by the attorney general's department this week.

There are 1,265 school children in Cameron, divided as follows: Whites 722, colored 543, according to a census report.

The state fire insurance commission has awarded good fire record credits to three towns, the maximum of 15 per cent being given Mesquite, Harrisburg and Crosbyton.

The commissioners of Jackson County have ordered a tractor and a one-man grader, which will be used on state highway No. 12, the main public road through Jackson County.

Production of lignite coal in Texas during the past year was estimated at 892,000 tons, and bituminous output at 261,000 tons, in the annual report of State Mine Inspector Bruce Gentry.

Approval of Cass County road district bonds totalling \$20,000 has been made by the attorney general. These bonds mature in 30 years, are redeemable in 20 and bear 5 1/2 per cent interest.

Houston taxpayers will be asked to increase their taxes on May 7 when an increase of 25c in the school tax will be submitted at a special election along with the projected \$3,000,000 bond issue for building schools.

Work on the highway, east to west, through Liberty County is to begin within a few days. Several carloads of material and equipment have reached Sheeks, a small station near the boundary line of Harris and Liberty Counties.

Permit to do business in Texas has been granted to the Parks Producing Company, a West Virginia corporation, to operate a plant at Parks, Stephens County, to manufacture hydro-carbon gas, carbon black and byproducts from waste casinghead gas. Capitalization \$500,000.

Citizens of Vernon, Wilbarger County, which is an applicant for the location of the Texas Technological College, in a brief filed with the locating committee, offer a tract of 2,000 acres of land at a price not exceeding \$150,000. This land lies a half mile south of Vernon.

The Bryan-College Interurban Railway, an electric road between Bryan and the A. and M. College, was sold at auction a few days ago. The S. S. Hunter estate of Shreveport, La., bought the property for \$40,000. The Hunter estate was the largest original bond holder connected with the road.

A bond election has been called by the city council at El Campo to vote on the issuing of \$15,000 worth of bonds, \$10,000 for the purpose of building a city hall and fire station, \$3000 for street improvements and \$2000 for improvements in the city auditorium. The election has been called for May 15.

Approving bonds of depository banks for state funds approximating \$500,000 has been completed by the state depository board, Treasurer Terrell has announced. Terrell said that no further bonds of applicant banks will be considered by the board, the time for receiving bonds having expired on April 5.

At the instance of the controller, the attorney general is preparing forms for the collection of the 1c tax on gasoline. This tax began to run on April 1, and the controller expects to have the blanks for its collection by the end of the month. It is payable by the wholesalers. When the tax became effective on April 1 the price of gasoline advanced in varying amounts in different cities.

The state treasury has just paid the second \$100,000 warrant for the maintenance of the state prison system, leaving \$400,000 of the \$600,000 appropriation yet to be paid. It was said in the treasury that it would be some days before sufficient funds will accumulate to pay the third \$100,000 installment.

State Superintendent of Public Instruction Marrs says that it is probable that an additional \$1 of the scholastic apportionment can be paid next month out of the state school taxes. The transfer will be made on Tuesday, May 1. Of the \$13, the schools have received \$10.50 of the apportionment. With \$1 paid in May only \$1.50 will remain unpaid.

The San Antonio, Medina Lake and Western railroad was granted a charter recently by the secretary of state following approval of incorporation papers by the attorney general. The new road is capitalized at \$190,000 and will run from San Antonio to San Angelo, connecting with the Orient at Sonora. The new road will complete a distance of 195 miles, giving San Antonio an outlet to the plains country not heretofore enjoyed.

The attorney general's department has ruled that the statutes passed by the thirty-eighth legislature require county judges, county commissioners, sheriffs and county clerks to execute new and different bonds within thirty days after the new acts take effect, even though such officers have already executed bonds and qualified for the present term of office. It was further held that such acts do not purport to operate on past conduct and are not retroactive legislation within the meaning of the constitution.

WOMEN OF MIDDLE AGE

Much Interest Being Shown in the Large Number of Women Safely Carried Through the Change of Life by Lydia E. Pinkham's Vegetable Compound

The Following Letters Are Impressive

Owing to modern methods of living, few women approach this perfectly natural change without experiencing very annoying and often painful symptoms. These dreadful hot flashes, nervousness, headaches, melancholia and irritability are only a few of the symptoms incident to this trying period of a woman's life, and the following letters prove the value of Lydia E. Pinkham's Vegetable Compound to overcome these abnormal conditions.

"Fisherville, Ky.—'For several months I was under the doctor's care as he said my nervousness, chills, hot flashes and weakness was caused by the Change of Life, but I did not seem to get any better. I was not able to work and spent most of my time in bed. A friend called to see me and asked me to try Lydia E. Pinkham's Vegetable Compound, and I cannot tell you how much good the medicine did me, as I had such a hard time before taking it. I can only advise every woman passing through the Change of Life to take Lydia E. Pinkham's Vegetable Compound, as it did so much for me.'—Mrs. EDWARD B. NAAL, Star Route, Fisherville, Ky.

A Michigan Woman Helped

onia, Michigan.—'I was passing through the Change of Life and had been under the doctor's care without any relief. A friend in Lansing, Mich., asked me to try Lydia E. Pinkham's Vegetable Compound and I feel fifty per cent better already. If any one in this condition doubts the ability of Lydia E. Pinkham's Vegetable Compound to help them I will gladly answer their letters.'—Mrs. MAX W. HARR, 537 N. Jefferson Street, Ionia, Mich.

A New York Woman Helped

Syracuse, N. Y.—'I was used up with nervousness, weakness and hot flashes so I could hardly keep around, and could not get out much on account of those awful prickly feelings. I read about Lydia E. Pinkham's Vegetable Compound helping another woman with symptoms like mine. My husband got some for me, and after taking it five months I can get around and even do my housework, washing and ironing included, and my friends can see what a change it has made in me.'—Mrs. SIDNEY HURRY, 133 1/2 Burnet Avenue, Syracuse, N. Y.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent you free upon request. Write to the Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

CONSTIPATION

Take a good dose of Carter's Little Liver Pills—then take 2 or 3 for a few nights after. They cleanse your system of all waste matter and regulate your bowels. Mild—as easy to take as sugar. Genuine bear signature—Small Pill. Small Dose. Small Price.

Scuffed Shoes.
When shoes become scuffed and peeled rub them with the white of an egg. It will paste the broken places down.

Cuticura Soothes Itching Scalp.
On retiring gently rub spots of dandruff and itching with Cuticura Ointment. Next morning shampoo with Cuticura Soap and hot water. Make them your everyday toilet preparations and have a clear skin and soft, white hands.—Advertisement.

Keeps Off Rust.
A few drops of linseed oil applied with a cloth to the outside of the gas stove or the inside of the oven will keep the stove from rusting and will make it easier to care for.

Hair Thin?
You need Q-Ban Hair Tonic to make it grow and to keep it from falling out. It stimulates the roots and stops hair falling out. It holds spots rapidly. Try it! At all good drug stores. Write direct from Q-BAN, Omaha, Neb., Va.

Wanted—Single or Married Ladies,
each city and town, to handle oriental novelties, apply to: J. B. Bockley, 1216 Broadway, New York, N. Y. Write for samples and particulars. China Importing Sales Co., San Antonio, Texas.

EYES SORE? Use DR. ISAAC EYEWATER
A reliable and speedy remedy since 1792. Buy at your druggist or John J. Bockley, 1216 Broadway, New York, N. Y.

Views of One.
"I don't like these motor horns."
"Pedestrians require a warning."
"It doesn't sound so insulting."

Aged Sisters Get Together Again

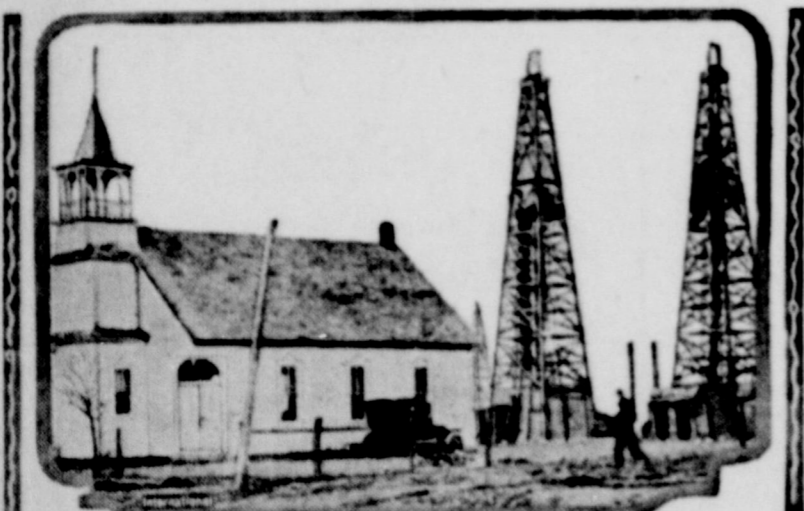

After sixty-six years three sisters had a get-together in San Francisco when Mrs. Rebecca Guyer Marsh, eighty-three, and Mrs. Lucy B. Guyer Thomas, seventy-eight, went from the Yakima valley in Washington to San Francisco to call upon Mrs. Elizabeth Guyer Hyland, ninety-one, who had not seen her sisters since 1857, when she left the family home at Carroll Springs, O., for California.

RICH LAD IS A BUS BOY

Going to his daily labor as a "bus boy"—setting tables, fetching water, sweeping up the crumbs, etc.—Carl E. Bergson punches the time clock at the Waldorf-Astoria, New York. Yet Carl is the heir to a millionaire's fortune, and now lives on exclusive Madison avenue, having recently moved from the very hotel where he works—and where he lived in an \$18 a day suite. Although only sixteen, he speaks excellent English and German, as well as Swedish. His father is a high officer in the Swedish army and his mother a well-known singer. When he has finished learning the hotel business, from bus boy to general manager, he'll go back to Sweden.

Church Members Object to Oil Wells

Members of the congregation of the little country church at Tonkawa, Okla., are up in arms against oil prospectors who have drilled wells in the yard of the church property, as pictured. The oil well operators assert their lease on the property permits them to drill wells in the churchyard and cemetery, and seek to have the courts sustain their claims. Members of the congregation are on guard at all times, and seek to prevent the operators from drilling. They have refused thousands of dollars offered for the property, which is one of the richest oil centers in the state of Oklahoma.

Mexican Soldiers Have Flag Rush

This photograph apparently shows a riot, but it is nothing more than a flag-rushing contest between rival groups of Mexican soldiers at the recent presidential review in Mexico city. Plenty of action and no hard feelings, knives or the like, but clean sport.

WORTH REMEMBERING

More than 10,000 books were published in England last year. The port of Seattle boasts of two of the largest piers in the world.

In Paris is a library composed solely of books written by women. The longest average of human life is to be found in Norway. The first paper mill in England was erected at Dartford, Kent, in 1090.

SURE, HE CAN SHOOT

After decorating five army nurses with the Distinguished Service Medal, General Pershing was asked by a movie man to do a little shooting and he ground out a few feet of film registering the heroines he had just decorated.

Mercury Has a Fall.

I was the president's stenographer and the oldest girl in the office, so was conscious of my dignity. One day when we thought all the men were gone for a long lunch hour the girls began to amuse themselves by striking the poses of various statues. Entering into the fun, I said, "I will be Mercury."

I stepped upon my chair, balanced myself nicely with one hand and one foot well up in the air like the breezy god, when the door opened and in walked our president. At the scream of laughter that arose from the girls I turned quickly, the chair whirled with me, and I fell, wounding my dignity almost beyond recovery.—Chicago Tribune.

CHAPTER XI.—Continued.

The Indian led off into one of the gray notches between the tumbled streams of lava. At the apex of the notch, where two streams met, a narrow gully wound and ascended. Yaqui led Diablo into it, and then began the most laborious and vexatious and painful of all slow travel.

The disintegrating surface of a lava bed was at once the roughest, the hardest, the meanest, the cruelest, the most deceitful kind of ground to travel. The fugitives made slow progress. They picked a cautious, winding way to and fro in little steps here and there along the many twists of the trail, up and down the unavoidable depressions, round and round the Loles. At noon, so winding back upon itself had been their course, they appeared to have come only a short distance up the lava slope.

It was rough work for them; it was terrible work for the horses. Blanco Diablo refused to answer to the power of the Yaqui. He balked, he plunged, he bit and kicked. He had to be pulled and beaten over many places. Mercedes' horse almost threw her, and she was 'put upon Blanco Sol. The white charger snorted a protest, then, obedient to Gale's stern call, patiently lowered his noble head and pawed the lava for a footing that would hold.

The lava caused Gale toil and worry and pain, but he hated the choyas. He came almost to believe what he had heard claimed by desert travelers—that the choyas were alive and leaped at man or beast. Certain it was when Gale passed one, if he did not put all attention to avoiding it, he was looked through his chaps and held by barbed thorns. The pain was almost unendurable. It was like no other. It burned, stung, beat—almost seemed to freeze. It made useless arm or leg. It made him bite his tongue to keep from crying out. It made the sweat roll off him. It made him sick.

Moreover, bad as the choyas were for man, it was infinitely worse for beast. A jagged stab from this poisoned cactus was the only thing Blanco Sol could not stand. Many times that day, before he carried Mercedes, he had wildly snorted, and then stood trembling while Gale picked broken thorns from the muscular legs. But after Mercedes had been put upon Sol Gale made sure no choya touched him.

The afternoon passed like the morning, in ceaseless winding and twisting and climbing along this abandoned trail. Gale saw many waterholes, mostly dry, some containing water, all of them catch-basins, full only after rainy season. Little ugly bunched bushes, that Gale scarcely recognized as mesquites, grew near these holes; also stunted greasewood and prickly pear. There was no grass, and the choyas alone flourished in that hard soil.

Darkness overtook the party as they unpacked beside a pool of water deep under an overhanging shelf of lava. It had been a hard day. The horses drank their fill, and then stood patiently with drooping heads. Hunger and thirst were appeased, and a warm fire cheered the weary and footsore fugitives. Yaqui said, "Sleep." And so another night passed.

Upon the following morning, ten miles or more up the slow-ascending lava slope, Gale was in the rear of all the other horses, so as to take, for Mercedes' sake, the advantage of the broken trail. Yaqui was leading Diablo, winding around a break. His head was bent as he stepped slowly and unevenly upon the lava. Gale turned to look back, the first time in several days. He thought, of course, of Rojas in certain pursuit; but it seemed absurd to look for him.

Yaqui led on, and Gale often glanced up from his task to watch the Indian. Presently he saw him stop, turn, and look back. Ladd did likewise, and then Jim and Thorne. Gale found the desire irresistible. Thereafter he often rested Blanco Sol, and looked back the while. He had his field-glass, but did not choose to use it.

"Rojas will follow," said Mercedes. Gale regarded her in amaze. The tone of her voice had been indefinable. If there were fear then he failed to detect it. She was gazing back down the colored slope, and something about her, perhaps the steady, falcon gaze of her magnificent eyes, reminded him of Yaqui.

Many times during the ensuing hour the Indian faced about, and always his followers did likewise. It was high noon, with the sun beating hot and the lava radiating heat, when Yaqui halted for a rest. The horses bunched and drooped their heads. The rangers were about to slip the packs and remove saddles when Yaqui restrained them.

He fixed a changeless, gleaming gaze on the slow descent; but did not seem to look afar.

Suddenly he uttered his strange cry—the one Gale considered involuntary, or else significant of some tribal trait or feeling. Yaqui pointed down the lava slope, pointing with finger and arm and neck and head—his whole being seemed to have been animated and then frozen.

"Shore he sees something," said Ladd. "But my eyes are no good." "I reckon I ain't sure of mine," replied Jim. "I'm bothered by a dim movin' streak down there."

Thorne gazed eagerly down as he stood beside Mercedes, who sat motionless facing the slope. Gale looked

and looked till he hurt his eyes. Then he took his glass out of its case on Sol's saddle.

There appeared to be nothing upon the lava but the innumerable dots of choyas shining in the sun. Gale swept his glass slowly forward and back. Then into a nearer field of vision crept a long white-and-black line of horses and men. Without a word he handed the glass to Ladd. The ranger used it, muttering to himself.

"They're on the lava fifteen miles down in an air line," he said, presently. "Jim, shore they're twice that an' more accordin' to the trail."

Jim had his look and replied: "I reckon we're a day an' a night in the lead."

"Is it Rojas?" burst out Thorne with set jaw.

"Yes, Thorne, it's Rojas and a dozen or more," replied Gale, and he looked up at Mercedes.

She was transformed. She might have been a medieval princess embodying all the Spanish power and passion of that time, breathing revenge, hate, unquenchable spirit of fire. If her beauty had been wonderful in her helpless and appealing moments, now, when she looked back white-faced and flame-eyed, it was transcendent.

Gale drew a long, deep breath. The mood which had presaged pursuit, strife, blood on this somber desert, returned to him tenfold. He saw Thorne's face corded by black veins, and his teeth exposed like those of a snarling wolf. These rangers, who had coolly risked death many times, and had dealt it often, were white as no fear or pain could have made them. Then, on the moment, Yaqui raised his hand, not clenched or doubled tight, but curled rigid like an eagle's claw; and he shook it in a strange, slow gesture which was menacing and terrible.

It was the woman that called to the depths of these men. And their passion to kill and to save was surpassed only by the wild hate which was yet love, the unfathomable emotion of a peon slave. Gale marveled at it, while he felt his whole being cold and tense, as he turned, once more to follow in the tracks of his leaders. The fight predicted by Belding was at hand. What a fight that must be! Rojas was traveling light and fast. He was gaining. He had bought his men with gold, with extravagant promises, perhaps with offers of the body and blood of an aristocrat hateful to their kind. Lastly, there was the wild, desolate environment, a tortured wilderness of jagged lava and poisoned choyas, a lonely, fierce and repellent world, red stage most somberly and fitfully colored for a supreme struggle between men.

Yaqui looked back no more. Mercedes looked back no more. But the other looked, and the time came when Gale saw the creeping line of pursuers with naked eyes.

A level line above marked the rim of the plateau. Sand began to show in the little lava pits. On and upward tolled the cavalcade, still very slowly advancing. At last Yaqui reached the rim. He stood with his hand on Blanco Diablo; and both were silhouetted against the sky. That was the outlook for a Yaqui. And his great

shallow, others deep, and all red as fire. Yaqui circled close to abysses which yawned sheer from a level surface, and he appeared always to be turning upon his course to avoid them. The plateau had now a considerable dip to the west. Gale marked the slow heave and ripple of the ocean of lava to the south, where high, rounded peaks marked the center of this volcanic region. The uneven nature of the slope westward prevented any extended view, until suddenly the fugitives emerged from a rugged break to come upon a sublime and awe-inspiring spectacle.

They were upon a high point of the western slope of the plateau. It was strange to Gale, and perhaps to the others, to see their guide lead Diablo into a smooth and well-worn trail along the rim of the awful crater.

Gale looked down into that red chasm. It resembled an inferno. The dark cliffs upon the opposite side were veiled in blue haze that seemed like smoke. Here Yaqui was at home. He moved and looked about him as a man coming at last into his own. Gale saw him stop and gaze out over that red-ribbed void to the Gulf.

Gale divined that somewhere along this crater of hell the Yaqui would make his final stand; and one look into his strange, inscrutable eyes made imagination picture a fitting doom for the pursuing Rojas.

CHAPTER XII

The Crater of Hell.

Presently Gale, upon turning a sharp corner, was utterly amazed to see that the split in the lava sloped out and widened into an arroyo. It was so green and soft and beautiful in all the angry, contorted red surrounding that Gale could scarcely credit his sight. Blanco Sol whistled his welcome to the scent of the water. Then Gale saw a great hole, a pit in the shiny lava, a dark, cool, shady well. There was evidence of the fact that at food seasons water had an outlet into the arroyo. The soil appeared to be a fine sand, in which a reddish tinge predominated; and it was abundantly covered with a long grass, still partly green. Mesquites and palo verde dotted the arroyo and gradually closed in thickets that obstructed the view.

"Shore it all beats me," exclaimed Ladd. "What a place to hole-up in! We could have hid here for a long time. Beldin's was shore right about the Indian. An' I can see Rojas' finish somewhere up along that awful hell-hole."

Camp was made on a level spot. Yaqui took the horses to water, and then turned them loose in the arroyo. It was a tired and somber group that sat out to eat. Mercedes was calm, but her great dark eyes burned in her white face. Yaqui watched her. The others looked at her with unspoken pride. Presently Thorne wrapped her in his blankets, and she seemed to fall asleep at once.

Little of Yaqui's purpose or plan could be elicited from him. The rangers and Thorne, however, talked in low tones. It was absolutely impossible for Rojas and his men to reach the waterhole before noon. That the next day, and long before that time the fugitives would have decided on a plan of defense.

"What stuns me is that Rojas struck to our trail," said Thorne, his lined and haggard face expressive of dark passion. "He has followed us into this fearful desert. He'll lose men, horses, perhaps his life. He's only a bandit, and he stands to win no gold. All for a poor little helpless woman—just a woman! I can't understand it."

"Shore—just a woman," replied Ladd, solemnly nodding his head.

"Then there was a long silence, during which the men gazed into the fire. Those were cold, hard, grim faces upon which the light flickered.

"Sleep," said Yaqui. Thorne rolled in his blanket close beside Mercedes. Then one by one the rangers stretched out, feet to the fire. Gale found that he could not sleep. His eyes were weary, but they would not stay shut; his body ached for rest, yet he could not lie still. The Yaqui sat like an image carved out of lava. The others lay prone and quiet. Would another night see any of them lie that way, quiet forever? Gale sat up after a while and again watched the fire. Nell's sweet face floated like a wraith in the pale smoke—glowed and flushed and smiled in the embers. Other faces shone there—his sister's—that of his mother. Gale shook off the tender memories. This desolate wilderness with its forbidding silence and its dark promise of hell on the morrow—this was not the place to unnerve oneself with thoughts of love and home.

Toward dawn Gale managed to get some sleep. Then the morning broke with the sun hidden back of the uplift of the plateau. The horses trooped up the arroyo and snorted for water. After a hurried breakfast the packs were hidden in holes in the lava. The saddles were left where they were, and the horses allowed to graze and

wander at will. Canteens were filled, a small bag of food was packed, and blankets made into a bundle. Then Yaqui faced the steep ascent of the lava slope.

The trail he followed led up on the right side of the fissure, opposite to the one he had come down. It was a steep climb, and encumbered as the men were they made but slow progress. At length the rim widened out and the red, smoky crater yawned beneath. Yaqui left the trail and began clambering down over the rough and twisted convolutions of lava which formed the rim. It was with extreme difficulty that the party followed him.

The choyas were there to hinder passage. Finally the Indian halted upon a narrow bench of flat, smooth lava, and his followers worked with extraordinary care and effort down to his position.

At the back of this bench, between bunches of choyas, was a niche, a shallow cave with floor lined apparently with mud. Yaqui spread blankets inside, left the canteen and the sack of food, and with a gesture of awe and respect set that of a chief. He invited Mercedes to enter. A few more gestures and fewer words disclosed his plan. In this inaccessible nook Mercedes was to be hidden. The men were to go around upon the opposite rim, and block the trail leading down to the waterhole.

Ladd chose the smallest gun in the party and gave it to Mercedes.

"Shore it's best to go the limit on belt's ready," he said, simply. "The chances are you'll never need it. But if you do—"

He left off there, and his break was significant. Mercedes answered him with a fearless and indomitable flash of eyes. Thorne was the only one who showed any shakiness of nerve. His leaving-taking of his wife was affecting and hurried. Then he and the rangers carefully stepped in the tracks of the Yaqui. He strode on up the trail toward a higher point, where presently his dark figure stood motionless against the sky. The rangers and Thorne selected a deep depression, out of which led several runs deep enough for cover. Here the men laid down rifles and guns, and, removing their heavy cartridge belts, settled down to wait.

Jim Lash crawled into a little strip of shade and bided the time tranquilly. Ladd was restless and impatient and watchful, every little while rising to look into the far-reaching slope, and then to the right, where Yaqui's dark figure stood out from a high point of the rim. Thorne grew silent, and seemed consumed by a slow, sullen rage. Gale was neither calm nor free of a gnawing suspense nor of a waiting wrath. But as best he could he put the pending action out of mind.

It came over him all of a sudden that he had not grasped the stupendous nature of this desert setting. There was the measureless red slope, its lower ridges finally sinking into white sand dunes toward the blue sea. The cold, sparkling light, the whitish sun, the deep azure of sky, the feeling of boundless expanse all around him—these meant high altitude. Southward the barren red simply merged into distance. The field of craters rose in high, dark wheels toward the dominating peaks. When Gale withdrew his gaze from the magnitude of these spaces and heights the crater beneath him seemed dwarfed. Yet while he gazed it spread and deepened and multiplied its ragged lines. No, he could not grasp the meaning of slope or distance here. There was too much to stun the sight. But the mood in which nature had created this convulsed world seized hold upon him.

The hours passed. As the sun climbed the clear sky, steely lights vanished, the blue haze deepened, and slowly the glistening surfaces of lava turned redder. Ladd was concerned to discover that Yaqui was missing from his outlook upon the high point.

Jim Lash came out of the shady crevice, and stood up to look on his cartridge belt. His narrow, gray glance slowly roved from the height of lava down along the slope, paused in doubt, and then swept on to survey the whole vast eastern dip of the plateau.

"I reckon my eyes are pore," he said. "Mebbe it's this d—n red glare. Anyway, what's them creepin' spots up there?"

"Shore I seen them. Mountain sheep," replied Ladd.

"Guess again, Laddy. Dick, I reckon you'd better flash the glass up the slope."

Gale adjusted the field glass and began to search the lava, beginning close at hand and working away from him. Presently the glass became stationary.

"I see half a dozen small animals, brown in color. They look like sheep. But I couldn't distinguish mountain sheep from antelope."

"Lemme that glass," suddenly said Jim Lash. "I'm seein' red, I tell you. Well, pore as my eyes are they had it right. Rojas an' his outfit have left the trail. Laddy, I'll be danged if the Greaser bunch hasn't vamooseed. Gone out of sight! Right there at a half mile away, the whole caboodle—gone!"

"Shore they're behind a crust or have gone down into a rut," suggested Ladd. "They'll show again in a minute. Look sharp, boys, for I'm goner! Rojas'll spread his men."

From time to time the rangers looked inquiringly at Gale. The field glass, however, like the naked sight, could not catch the slightest moving object out there upon the lava. A long hour of slow, mounting suspense wore on.

"Shore it's all goin' to be as queer as the Yaqui," said Ladd.

Indeed, the strange men, the silent action, the somber character of the Indian had not been without effect upon the minds of the men. Then the weird, desolate, tragic scene added to the vague sense of mystery. And now the disappearance of Rojas' hand, the long wait in the silence, the hoding certainty of invisible foes crawling, circling closer and closer, lent to the situation a final touch that made it unreal.

"I'm reckonin' there's a mind behind them Greasers," replied Jim. "Or mebbe we ain't done Rojas credit. If somethin' would only come off!"

That Lash, the coolest, the most provokingly nonchalant of men in times of peril, should begin to show a nervous strain was all the more indicative of a subtle pervading unreality.

"Boys, look sharp!" suddenly called Lash. "Low down to the left—mebbe three hundred yards. See, along by them seams of lava—behind the choyas. First off I thought it was a sheep. But it's the Yaqui! Crawl in swift as a lizard! Can't you see him?"

It was a full moment before Jim's companions could locate the Indian. Flat as a snake, Yaqui wound himself along with incredible rapidity.

"He's Raisin' His Rifle Slow, Lord, How Slow He is!"

His advance was all the more remarkable for the fact that he appeared to pass directly under the dreaded choyas. Sometimes he paused to lift his head and look.

"Shore he's headin' for that high place," said Ladd. "He's going slow now. There, he's stopped behind some choyas. He's gettin' up—no, he's kneelin'." "Now what the h—!"

"Laddy, take a peek at the side of that lava ridge," sharply called Jim. "I guess mebbe somethin' ain't comin' off. See! There's Rojas an' his outfit climbin'! Don't make up no hosses!"

"Dick, use your glass an' tell us what's doin'." "I'll watch Yaqui an' tell you what his move means."

Clearly and distinctly, almost as if he could have touched them, Gale had Rojas and his followers in sight. They were totting up the rough lava on foot.

"They're almost up now," Gale was saying. "There! They halt on top. I see Rojas. He looks wild. By—!" follows, an Indian! It's a Papago Belding's old herder!" "The Indian points—this way—then down. He's showing Rojas the lay of the trail."

"Boys, Yaqui's in range of that bunch," said Jim, swiftly. "He's raisin' his rifle slow—Lord, how slow he is!—He's covered someone. Which one I can't say. But I think he'll pick Rojas."

LIVE STOCK

TO MAKE PROFITS WITH PIGS

Wise Grower Stimulates Growth Before Litter Is Farrowed by Good Care of Sows.

(Prepared by the United States Department of Agriculture.)

"The profitable pig," says the United States Department of Agriculture, "is the one that never stops growing from the time it is farrowed up to the time it is hauled to market." The wise hog grower stimulates growth in the pig before the litter is farrowed by keeping the sow in good condition. It is assumed that the sire and the dam are of the right type, big and growthy.

Pasturage of good quality, shorts or middlings, fish meal or tankage to furnish protein, with sufficient corn

As Soon as Pigs Are Weaned They Should Be Kept on Full Feed.

or barley to keep them in fair flesh, make up a list of desirable feeds for breeding hogs. Alfalfa, soy beans, or clover hay are valuable additions for winter feeding and may be scattered out so as to induce the sows to take exercise daily, a great necessity for breeding hogs.

Sows must be well fed to raise good pigs, but this does not include the day before farrowing and the day after farrowing. For 24 hours before and after farrowing the sow should have no feed, but tepid water should be constantly available. After this fast, feed should be given in small quantities at first, then gradually increased up to full feed within ten days.

Even before the pigs are weaned they should have access to shelled corn in self-feeders as a supplement to the milk from their mothers. As soon as they are weaned they should be kept on full feed, either on self-feeders or by hand. Pigs that are well fed and have enough exercise will reach market weight at about eight months of age.

DIRTY LOTS CAUSE LAMENESS

Condition is of Rheumatic Nature Involving Joints Around Hams and Shoulders.

The veterinary department of Purdue university has been investigating reports of lameness in hogs. "The condition is of a rheumatic nature," says Dr. L. C. Kigin, "involving the joints and muscular regions around the hams and shoulders. On observing several affected hards I found that the animals had access to filthy lots that had been used for years. At one place I found a large wallow at the base of an old straw stack. The organisms which cause this disease thrive in such places and the way to prevent the trouble is to keep the porkers on pasture and close up the lot and barn until the place can be cleaned up."

The mortality from the rheumatism is low but the loss comes from the setback in condition and the waste in feed resulting. Cleanliness has produced favorable results for scores of men.

CARROTS FOR PIG PARALYSIS

Trouble is Very Common and Probably Caused by Lack of Some Particular Vitamin.

Paralysis in hogs is very common, according to the veterinary department of Colorado Agricultural college. It is presumed to be a deficiency disease; that is, something needed for nutrition is not present in the food. In answering a question from a farmer recently the veterinary department stated that the substance in this particular case that was probably lacking was vitamin B. A recommendation was made to try a ration consisting of plenty of milk and carrots. Results under experimental work with this ration in cases of pig paralysis have been remarkable.

Alfalfa for Cotts.

Alfalfa hay is especially valuable for feeding growing colts because it contains a high percentage of protein and tends to produce more growth of bone and muscle than does timothy or prairie hay.

Clean Wallow Hole. The clean wallow hole is important. Hogs may use the muddy wallow if no other is available, but if clean water is provided in a concrete wallow they will prefer it to the mud hole.

DOES HOUSEWORK LIKE IT WAS PLAY

Mrs. Little Declares Tanlac Restored Full Strength After Overcoming Indigestion.

"Since taking Tanlac my troubles have left me, and I never tire of telling about it," declares Mrs. Johanna Little, 3032 N. 17th St., Kansas City, Mo.

"My food often caused me much distress from gas, sourness and heartburn, and I scarcely ever wanted to eat. Headaches, biliousness and pains in my back kept me in hot water, and I hardly ever got any restful sleep. My nerves were excited and I was so run down it was all I could do to look after my housework."

"I searched the city for the right medicine, and consider it fortunate that I found Tanlac. Indigestion, sleeplessness and nervousness never bother me now, I can do my housework like it was play, and am strong and happy. Tanlac is simply grand. Tanlac is for sale by all good druggists. Over 85 million bottles sold.—Advertisement.

Ambition so often asks one to perform a selfish act.

Instant relief from CORNS without risk of infection

Safety! You can end the pain of corns in one minute. Dr. Scholl's Zino-pads will do it, for they remove the cause—friction-pressure, and heal the irritation. Thus you avoid infection from cutting your corns or using caustic acids. Thin, antiseptic, waterproof. Sore for corns, callouses, bunions. Get a box today at your druggist's or shoe dealer's.

Dr. Scholl's Zino-pads

Made in the laboratories of The Scholl Mfg. Co., makers of Dr. Scholl's Foot Comfort Appliances, Ark. S. W. S. S. Co.

Put one on—the pain is gone!

Sloans

Stops Backaches at once—so comforting. A tiring day on your feet. Standing, lifting, running up and downstairs—does your back feel tired and painful knots? Apply Sloan's to those sore, tired muscles. That warm, penetrating glow brings immediate comfort. Almost before you realize it the pain and stiffness are gone.

Wherever congestion causes pain—use Sloan's. Sloan's is protection against pain. All druggists carry it.

Sloan's Liniment—kills pain!

For rheumatism, bruises, strains, chest colds.

Grove's Tasteless Chill Tonic. Invigorates, Purifies and Enriches the Blood. 60c.

Tutt's Pills. SPEEDY RELIEF FOR CONSTIPATION.

Someone Will Take Him. "Do you think I am going to be an old bachelor?" "It should be sure of it but for one thing."

"And what is that?" "You have money."—Houston Chronicle.

CASTORIA For Infants and Children In Use For Over 30 Years Always bears the Signature of J. C. Ayer & Co.

A Vision Across the Years From Arbor Day, 1923, to Arbor Day, 1973

By JOHN OLIVER CURWOOD, American Tree Association.

THE man who has been able to command a perspective has ever been the man who has won success—not only for himself alone, but often for countless numbers whose welfare has depended upon him. Among the great problems of today which demand a perspective from every intelligent man and woman in the country is the problem of this nation's reforestation. A vision across the years between the Arbor Day of 1923 and the celebration of this day fifty years hence, in 1973, should be an inspiration to every one of us.

The men, women and children of the country who celebrate Arbor Day of 1923 by planting trees could in no other way bequeath so rich a heritage to future generations. Human life is absolutely dependent upon wild life and forests. Without these things we would become extinct as a race.

If all vegetation, all wild life, and all forests should disappear tomorrow the human race would become extinct upon the face of the earth within one year. Without wood we could have no agriculture, no manufacture, no commerce. Civilization, as we know it, would come to an end. It is not so greatly a matter of dollars and cents—it is most surely a matter of life.

So let us as a Nation, on this Arbor Day of 1923, and the Arbor days which we may live to celebrate in the future, take our shovels in hand, go forth and plant trees.

"Mais Non, American Girls Do Not Understand Our Beautiful Frenchmen"

By COUNTESS DE LA MARE HAMBIQUE, French Actress.

Frenchmen? Ah, oui, they are, what you say, ze big cheese. Americans—I like them, oh, yes, but they cannot come up to the little finger of my dear countrymen. I mean, mostly, in chivalry to women.

It gets them in trouble sometimes. American girls abroad are treated so nice by Frenchmen. Frenchmen are so very, very gallant. They compliment the girls. Sometimes they say: "You are very beautiful. I would like to marry you." But they do not mean quite that. They are so gallant, the Frenchmen. It is only a pretty compliment that they say.

You American men are more serious. When you ask a girl to marry you you have a bank account and perhaps a little home already furnished. And so, the American girl thinks the Frenchman is serious. And she gets very, very angry.

Mais non. American girls do not understand our beautiful European men. Devotion to feminine persons, lovely devotion, is part of the Frenchman's education and life. His father before him taught him that and he is not crude.

At Present Conservative Leaders of Labor Do Not Demand a Third Party

By WILLIAM E. SWEET, Governor of Colorado.

Any political program to be successful in America must reckon with labor.

If a labor party is not to be formed in America, then labor's cause must be championed by one or the other of the two political parties in a much more definite way than has ever been done before. Unquestionably labor figured largely in the recent election and, having felt its power, it will press forward for greater recognition.

At present the conservative leaders of labor are not demanding the formation of a third party, but are content to endorse for election those candidates of either party who will stand for their principles. There are, however, able labor leaders who will not rest until they form a third party, believing that there are evils in our present economic structure which neither party will assail.

Labor makes three fundamental demands; namely, the right to a living wage, the abolition of the abuse of court injunctions in the case of strikes and the recognition of its inherent rights to collective bargaining.

Winter Draws Its Mountain Pictures With a Sharp and Simple Line

By DEAN BABCOCK, Artist, Long's Peak, Colorado.

Winter draws its pictures with a sharp and simple line. The first snowfall transforms the aspect of the mountain landscape, as though it had been rendered with an etcher's needle. The structure of rocks is emphasized, the architecture of cliffs and canyons boldly delineated. Shapes of trees are separated and outlined asserting their individual character until in the distance they merge in the dark mass of the forest.

As the white spaces spread and solidify, the great planes of the topography are revealed in their true relation, and the unity of nature's larger design becomes apparent. All vertical forms, from a bush or bit of dry herbage in the foreground to a distant precipice on the range, assume a decorative significance, new and unexpected.

Color becomes of secondary importance, and under certain conditions of atmosphere is almost eliminated. In the clear light of mid-day the scene suggests the crisp black and white of an old wood-cut; in the mists of twilight, the subtle and luminous monochrome of a Chinese ink painting.

"When My Ship Comes In" Means Pretty Much the Same Thing Still

By P. H. W. ROSS, National Marine League, U. S. A.

Years ago, in the days of our grandfathers and great-grandfathers, when "most everybody" in New England had a share in some sturdy ship sailing the high seas, a man would promise to pay a debt, or to buy his wife a necklace, "when my ship comes in." The years passed, as did the gallant sailing craft. The custom waned, but the expression survived; and we still promise to meet our obligations "when my ship comes in."

A very different world is this we live in, and far more complex, than that of our forefathers, who simply had to use their eyes in order actually to see their ships gaily entering the home port. No eye, no telescope is strong enough to bring a ship within the vision of a resident of Peoria, Ill., for example.

Nevertheless, so far as important results are concerned, the freighter enters Peoria and every other American community—no matter how far inland—just as surely as she docks at a Brooklyn pier.

EXPORTS FROM U. S. SHOWING INCREASE

The Gold Inflow Continues to Show a Declining Tendency.

Washington—Exports from the United States during March were valued at \$250,000,000 in a preliminary estimate Saturday by the commerce department. The total compares with \$307,104,350 for February and \$329,979,817 for March, 1922.

For the nine months ending with March, total exports were \$3,903,819,728, or \$193,818,395 in excess of the exports during the corresponding nine months ending with March, 1922.

During March there was a net import of gold of \$5,559,257, which compares with \$32,524,843 for March, 1922. While the total gold imports during March, 1923, amounted to \$15,951,357, there were gold exports of \$10,392,100. The old inflow, which has fluctuated markedly during the last two years, continued to show the declining tendency which officials and financial circles have announced could be expected.

The gold exports during March have only been exceeded by the exports of one other month in the period running back to July, 1921.

There was an excess of silver exports over imports during March, 1923, amounting to \$105,329, the department added, total silver exports being \$4,731,705, while imports were \$4,626,376.

State Education Board Purchases School Bonds

Austin, Tex.—The state board of education at its regular monthly meeting at Austin purchased school bonds aggregating \$54,400. The list of bonds bought follows: Cass County Common School District No. 52, \$1,000; Denton Common School District No. 28, \$5,000; Fayette County Common School District No. 46, \$1,000; Floyd County Common School District No. 21, \$8,000 and No. 4, two issues of \$4,500 each; Freestone County Common School District No. 24, \$2,000 and No. 36, \$1,500; Harris County Common School District No. 9, \$3,000 and No. 45, \$10,000; Henderson County Common School District No. 55, \$1,500; Johnson County Common School District No. 44, \$5,000; Mitchell County Common School District No. 3, \$1,000; No. 16, \$1,000; No. 4, \$3,000; No. 7, \$1,400; and No. 27, \$2,000; Pecos County Common School District No. 4, \$2,000; Rosenberg Independent School District, \$4,500; Sherman County Common School District No. 12, \$1,500; Scurry and Fisher Common County Line School District No. 36, \$5,000; Taylor County Common School District No. 23, \$1,000, and No. 53, \$1,000; Van Zandt County Common School District No. 5, \$1,500; Waller County Common School District No. 14, \$10,000; Bosque County Common School District No. 64, \$2,000.

MEAN TEMPERATURE FOR STATE IS 54.8 DEGREES

Houston, Tex.—The monthly mean temperature for the state in March, as shown by the records of 115 reporting stations, was 54.8 degrees, which was 41 degrees less than the state normal, according to the condensed climatological summary, issued by the United States weather bureau.

The highest monthly mean was 67 degrees at San Benito and the lowest 39.9 degrees at Dalhart. The highest daily temperature was 99 degrees at Mission on March 11, and the lowest 4 degrees at Dalhart on March 18. The monthly range within the state limits was 95 degrees, and the greatest daily range 63 degrees at Lieb on March 18.

The average rainfall for the state, as shown by the records of 201 stations, was 3.07 inches greater than the state normal. The greatest monthly amount was 11.21 inches at Matagorda and the least 1.8 inch at Dundee. Excessive amounts of 2.50 inches or more in 24 consecutive hours occurred at 45 stations, the greatest being 9.30 inches at Matagorda on March 27. The greatest monthly amount of snowfall was 4.4 inches at Amarillo. The average number of days with 0.1 inch or more of precipitation was 6.

The average number of clear days was 15, partly cloudy 7, cloudy 9. The prevailing direction of the wind was from the north and the highest velocity recorded at regular weather bureau stations was 55 miles an hour from the southwest at El Paso, March 14th.

Increase Immigration.

Washington.—Addition of a possible 3 per cent to the present 3 per cent limit on immigration, with extension of authority to the president to regulate the admission of the additional immigrants on the basis of serial and economic needs, is favored by the immigration committee of the Chamber of Commerce of the United States.

Legislative Tax Bills Problem. Austin, Tex.—The attorney general's department is busy constraining the various tax measures passed by the 38th legislature. Whether or not any of these measures will be held unconstitutional is not yet known. It is known, however, that some of the measures are badly muddled. Whether it is the gasoline, sulphur or highway tax measure is not known. It will be several days yet before any definite announcement is made on this subject, it was announced.

NATIONAL CAPITAL AFFAIRS

High Naval Officers May Be Shifted

WASHINGTON.—The biggest shifting of command officers in years, involving practically all of the high ranking officers of the navy, is to be made in the next few months, according to capital gossip.

Admiral Coontz, chief of operations since the signing of the armistice, is to go to sea, probably as commander-in-chief of the United States fleet, succeeding Admiral H. P. Jones, who will complete his sea duty in June or July, so say the "insiders."

The successor to Admiral Coontz as chief of operations, the highest office in the naval establishment, has not been definitely selected, but is likely to be Admiral E. W. Eberle, commander-in-chief of the battle fleet, so they say.

It is regarded a foregone conclusion that Admiral Coontz will be given the highest command at sea, that of the United States fleet, comprising practically all the navy except the units overseas.

Rear Admiral Thomas Washington will complete his four-year term as chief of the bureau of navigation August 5, next. He has been ill, and it is possible that he will go on sick leave in June or July. It is generally expected that Capt. Richard H. Leigh, the assistant chief of the bureau, will succeed Admiral Washington. If promoted, he will be given the grade of rear admiral.

Who will succeed Admiral Eberle in his present position as commander-in-chief of the battle fleet has not been determined. Among those who may be chosen, according to reports, are Rear Admirals Samuel S. Robinson, R. H. Jackson and Philip Andrews. Admiral Robinson is now on the general board. Previously he was the military governor of Santo Domingo. Admiral Jackson commands a battleship division in the battle fleet. Admiral Andrews is commandant of the Norfolk navy yard.

Vice Admiral John D. McDonald will terminate his services as commander of the scouting fleet, it is said.

The other vice admiral who will be given a new assignment is William R. Shoemaker, second in command of the battle fleet. He has had a good record in the Pacific and may be made commander of a naval district on the west coast. His possible successors as vice admiral of the battle fleet include one of the two officers who fall to receive the assignment as commander-in-chief of the battle fleet or Rear Admirals William V. Pratt of the general board; Thomas P. Magruder, now commandant of the New Orleans naval district; or S. E. W. Kittalle, now in command of a destroyer squadron in the Atlantic.

No less than six rear admirals on sea duty will be relieved and given shore duty.

Greater Economy in Coal Production

GREATER economy in the underground production of coal is one of the essential needs of the industry to reduce the cost to the consumer. In the opinion of Chairman John Hays Hammond and members of the United States coal commission. This conclusion was reached as the result of personal investigation of mine conditions made by members of the commission, particularly in the bituminous district of Alabama. The mines need: A greater substitution of machine for hand labor in the cutting of coal to enable the individual miner to get out more coal in a working day. More adequate underground transportation to facilitate movement of the coal from the mine to the tipple. Employment of experienced mining and mechanical engineers to systematize underground production and increase efficiency.

Generally, however, the commission found a high class of development in the fields inspected; the larger companies, it was found, provide excellent housing, cheap supplies for their workers and favorable working conditions. The commission is procuring the cooperation of every possible government agency, including the interstate commerce commission, internal revenue bureau, bureau of mines, geological survey, census bureau, fuel distributor's office, coal division of the Department of Commerce and the public health service.

The internal revenue bureau is giving the commission valuable information in its study of earnings of coal companies as revealed through tax and excess profits returns.

The interstate commerce commission is exchanging facts on questions of car supply and transportation. The census bureau furnishes statistics on production and consumption. More technical questions of mining are treated by the bureau of mines and geological survey. The fuel distributor is giving the commission the benefit of information it has assembled during the present coal season on supply, consumption and cost of fuel.

The Department of Justice also is lending its aid on the legal phases of joint ownership of producing, transportation and distributing agencies, particularly in the Pennsylvania anthracite fields.

National Good Roads Essay Contest

FOR the fourth successive year high school students of the nation have been given opportunity to win the largest single educational award offered in the United States under the auspices of the highway education board. The award is the H. S. Freestone four years' university scholarship, providing not only tuition, but room, board, books and special fees for the student writing the best essay in the annual good roads essay contest. The assigned subject of the essays to be written is "The Influence of Highway Transportation Upon the Religious Life of My Community." Essays are limited to 700 words and should be submitted to the high school principal by May 1.

The contest, known to thousands of students throughout the United States and territorial possessions as the "annual good roads essay contest" is the most sustained competition of its kind. Inaugurated in 1920, it has provided a college education for three students, one boy and two girls, and its maintenance from year to year is assured by the donor of the scholarship, Harvey S. Freestone, Akron, O.

This year the subject is regarded as unique and unusual, bringing up for discussion the relation of improved transportation to the moral tone of the religious life of the community. The subject for 1922 dealt with the improved transportation and the growth of the community as a whole.

Previous winners have been Miss Katharine F. Butterfield, Keiser, Idaho, 1920; Miss Garland Johnson, Bridgeport, W. Va., 1921, and in 1922, Earl G. Pearson, Washington, District of Columbia. Miss Butterfield is in Northwestern university. Miss Johnson and Mr. Pearson have both remained in high school. They both will enter college this year. Miss Johnson at the University of West Virginia, and Pearson at a university in Kansas, his home state.

The best three essays from each high school are to be submitted to state headquarters, where the best essay from the commonwealth will be chosen. One essay from each state and territory will then come to the board at Washington, D. C. there to be handed a national committee to be named by Dr. John J. Tigert, United States commissioner of education. The national committee will award the scholarship.

CROP CONDITIONS THROUGHOUT STATE

General Conditions Prevailing Over the State Are Now Considered Favorable.

Houston, Tex.—Notwithstanding the severe setback given to all crops by the low temperatures of the 18th and 19th, the general conditions prevailing over the state are now favorable and only somewhat below the average for this time of the year, it is reported by the division of crop and live stock estimates. March had started with prospects excellent for an early season, most sections of the state had ample soil moisture, grass and weeds had soiled and early crops were making good growth, but all of this was changed with the coming of a cold spell on the 16th which culminated in freezing weather on the 18th and 19th. The south section was the only one to escape damage, all other sections suffering losses proportionate to the amount of tender growth exposed.

The fruit crop has suffered in varying degrees, ranging in the aggregate from slight damage in the case of apples, pears, grapes and berries, to severe losses in figs, peaches and plums. Potatoes and corn that had come up were frozen back and wheat, oats, barley and pastures suffered a setback. There were some losses of young live stock and cattle were drawn considerably by the cold. Pastures and range were put back at least two weeks.

The condition of wheat is July 29 points above what it was a year ago, but not quite up to the ten-year average. The freezing weather and high, drying, cold winds retarded the growth of the crop, but since the 20th of March considerable improvement has taken place. The long period of drought from July to early this year gave the wheat on the north plains in particular a very poor start and many acres were abandoned. Durum wheat was sown on some of this land during the last few months, but the remainder will be used for feed crops principally. A most disquieting element is introduced by the presence of greenbugs in Wichita, Wilbarger, Young and Parker counties, a condition that may become bad with a continuation of cool weather which favors the pest, but is unfavorable to the development of the insect enemies which normally hold the greenbug in control.

Upon the assumption of average abandonment of wheat acreage and average influences on the crop to harvest, the April 1 condition in the United States forecasts a production of about 572,347,000 bushels, which compares with 586,204,000 bushels in 1922. The scarcity of feed and the increased price have had an influence upon the number of breeding sows in the state. At the Fort Worth stockyards 512,068 hogs were received during 1922 as compared with 384,271 in 1921.

In the pig survey made last fall it developed that 97.1 per cent represented the sows bred for 1923 spring litters as compared with the 1922 farrowings. In the corn belt the probable increase in farrowing this spring is 28 per cent; most of the Southern States show a prospective decrease. The number of breeding sows in Texas is reported as 97 per cent of those on hand on April 1, 1922; in the United States, 106.7 per cent.

The supply of farm labor this year is 93 per cent of the normal supply, which compares with 100 per cent on April 1, 1922; the present need compared with the normal need is 93 per cent, last year it was 80 per cent; and the supply expressed as a per cent of the demand is 102 per cent, which compares with 125 per cent on April 1, 1922. While the need for farm labor is not great now, in sixty days when farm operations are nearing their maximum capacity the demand will be considerable. Where there is much building being done, new road construction and oil field activity a shortage of farm labor is already noticeable. Conditions were good for winter plowing and most farmers are well up with their work; they are hiring with caution and mindful of the hardships and losses of recent years.

Brownville Wins Honors. San Benito, Texas.—Brownville again carried away all the honors in the track and field event held in the border city recently. Brownville won by an overwhelming majority of 92 to 19 by San Benito and 19 by Harlingen. Out of the 13 events Brownville took 11 first places.

Name Lueder Postmaster. Washington.—Appointment of Arthur C. Lueder, defeated republican candidate for mayor in the recent Chicago municipal election, as acting postmaster at Chicago was decided upon Thursday at a conference between President Harding and Postmaster General New.

Bulgars Expatriated. Paris.—The Bulgarian legation has issued a note claiming that the Greek army is continuing at the point of the bayonet to expatriate the Bulgarian population from Western Thrace.

Italy's Princess Weds. Rome.—Princess Yolanda, eldest daughter of King Victor Emanuel and Queen Helena, was married Monday to Count Calvi de Bergolo, a captain of cavalry, who holds a decoration for bravery in the world war.

After EVERY Meal

give your digestion a "kick" with WRIGLEY'S. Sound teeth, a good appetite and proper digestion mean MUCH to your health.

WRIGLEY'S is a helper in all this work—a pleasant, beneficial pick-me-up.

Mothers of the World! Mothers!! Write for 32-Page Booklet, "Mothers of the World"

Lloyd Loom Products. Use This Coupon. The Lloyd Mfg. Company. Name: _____ Street: _____ City: _____ State: _____

Try a pipeful or two direct from the factory

Not that it will be any better than the Edgeworth you buy in a store, but we want you to have your first Edgeworth smoke at our expense.

You may repay us by finding that Edgeworth just suits your taste. And if it doesn't—for there are some few men to whom Edgeworth is not just the thing—there's no harm done.

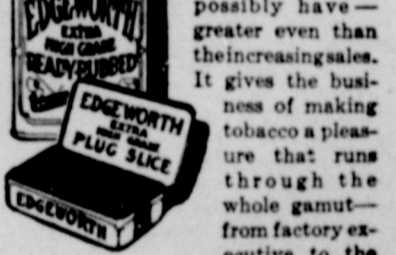

We are glad enough to send free samples in the same spirit that we'd hand you our pouch if circumstances permitted. We wish it were possible to save you even the little trouble of writing for Edgeworth.

Edgeworth is a likable smoke. Men who have tried it and found it to be the right tobacco for them never think of smoking other tobaccos. They'll tell you there are many good tobaccos—and there are. And when you offer them your pouch with "stranger" tobacco in it, they may use up a pipeful just to be friendly.

But notice how quickly they get back to their beloved Edgeworth!

Day after day Edgeworth fans write to us. They tell us human little stories, friendly anecdotes centering around Edgeworth. Often it is the number of years they have smoked Edgeworth that prompted them to write.

Knowing how hard it is for the average man to write letters, we consider these unsolicited messages the greatest tribute to Edgeworth we could possibly have—greater even than the increasing sales. It gives the business of making tobacco a pleasure that runs through the whole gamut—from factory executive to the smoker in the backwoods.

If you have never tried Edgeworth, let us repeat our offer, "Try a pipeful or two direct from the factory." All you have to do is to write "Let me try a pipeful or two" on a postcard, sign your name and address and send the postcard to us. The address is Larus & Brother Co., 67 South 21st Street, Richmond, Va. If you want to add the name of your tobacco dealer, we'll make sure that he has Edgeworth in stock.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-ounce carton of any size of Edgeworth Plug Slice or Ready-Rubbed for the same price you would pay the jobber.

10MATS, FRUIT-PROOF CANNAGE, BIRDSEED, ONION, sealed plants—\$10.00, \$15.00, \$20.00, \$25.00, \$30.00, \$35.00, \$40.00, \$45.00, \$50.00, \$55.00, \$60.00, \$65.00, \$70.00, \$75.00, \$80.00, \$85.00, \$90.00, \$95.00, \$100.00. W. N. U., HOUSTON, NO. 16-1023.

AVOID SKIDDING BY TWO METHODS

Rough Tread Tires or Chains Will Prevent Trouble to Considerable Extent.

Why an automobile skids is of interest to a motorist, but what to do to prevent skidding and what to do when the car is skidding are equally important topics.

The main cause of skidding of rear wheels of motor cars is due to the action of the brakes operating through the rear wheels. Skidding, of course, normally occurs only when the roads are slippery.

An automobile wheel rotates and progresses over the highway in but one direction or plane. This direction for the rear wheels is determined by the front wheels under control of the driver. While the rear wheels grip the ground and rotate they control the direction of the car. However, as soon as the rear wheels are locked by the brakes they begin to slide and as they slide sideways practically as easily as forward, they lose the power to direct the car.

Little Friction Locks Wheels. It takes comparatively little brake friction to lock and slide rear wheels on slippery roads because there is little friction between the tire and the road surface. When once the driving wheels begin to slip the car is kept in motion by the force of inertia acting at the car's center of gravity or mass.

This forward motion is opposed by the resistance of all four wheels on the ground, a resistance that is greater in the rotating front wheels than in the sliding rear wheels. Unless the combined ground resistance of all wheels, tending to stop the car, acts on the same point as the force of inertia tending to carry the car forward, the result is what is called "force couple," which causes the car to skid or spin around.

After the wheels once start to slip a very small "force couple" will produce skidding, and the skid distance is dependent upon the magnitude of the "force couple" which in turn depends on car speed and weight.

Turning the front wheels in the direction of the rear wheel skid helps to reduce skidding because it reduces the magnitude of the "force couple." Also periodically releasing and re-applying the brake so the rear wheels can get a grip offsets forward slip and consequent side skid.

Ways to Prevent Skidding.

Two means are employed to prevent skidding in motor vehicles. The use of nonskid or rough tread tires and of anti-skid chains. Nonskid tires are designed to give forward traction and to prevent side slip. As long as there is traction the rear wheels will turn, and as long as the rear wheels turn there will be no serious side slip, unless the front wheels are blocked.

Nonskid chains accomplish the same purpose as the nonskid tire tread, that is, give additional traction and reduce side slip. Nonskid chains should supplement nonskid tires only when road conditions absolutely require them.

RIGHT FIRING OF CYLINDERS

If Not Working Properly Gasoline is Being Wasted—Learn to Use Screwdriver.

Are all your cylinders firing properly? If not, you are wasting gasoline and filling the dead cylinder with oil, which will carbonize when you get it firing again. Give the engine a little more gas while idling and open the pet cocks to look for flame. If no flame spurts out the cylinder is dead. If you have no compression cocks learn how to use a screwdriver to short-circuit the spark plugs. If it does not affect the running of the engine it is a dead cylinder.

Avoid Soft Tires.

Don't drive your car with tires that are soft or not properly inflated or you will be well started on the road to tire trouble, with the following results to your tires and your pocket-book:

Tire heating, which destroys the valuable chemical elements necessary to both rubber and fabric.

Cracking of the side walls and rim cutting and in some cases pinching of the tube.

Sliding of the tire on the rim when the brakes are applied suddenly, causing the tube to tear around the valve stem.

Thread loosening from the fabric due to arc of bend in transverse direction to arc of circumference.

Tires puncture more easily when not properly inflated.

Creates a drag and the car is slow to pick up speed.

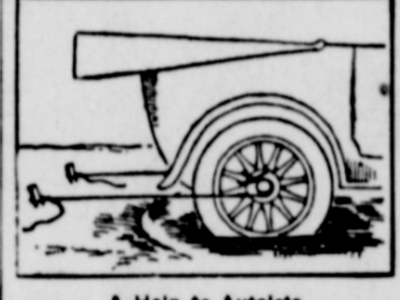

If on the front wheels steering is made harder.

Motor has to work much harder; gasoline consumption is greater and many other effects make themselves known.

SCHEME FOR PULLING MACHINE OUT OF MUD

Unique Plan Employed to Get Automobile Out of Hole.

While riding one day with a neighbor in his car we were unfortunate enough to run into a mud hole. The rear wheels, even with the chains on, absolutely refused to take hold, either going ahead or back. It seemed to me at first that we were in to stay; but I found that my friend was prepared for just such emergency. He produced from the tool box two pieces of

ropes about ten feet long, two wooden stakes about 18 inches long and a three-pound sledge. I wondered just what was "coming off," but I soon learned. He drove a stake behind each rear wheel where the ground was solid. A rope was then tied to each stake, close to the ground, run under the hub and tied to a spoke, as the cut shows. My friend started his engine, threw it into reverse, and the engine easily backed itself out of the mud hole.

It is worth any autoist's time, especially when traveling on country roads, to add these inexpensive articles to his equipment.—V. A. Gallier in the Michigan Farmer.

DON'T THROW AWAY USED OIL

By Adding 50 Per Cent of Kerosene to This Waste an Excellent Lubricant is Obtained.

Most car owners drain the oil out of the crank case about three times a year, and as a general rule this used oil is simply thrown away. By adding 50 per cent of kerosene to this waste oil an excellent spring lubricant is obtained. The method of using the mixture is to spray it over the springs once a week. The oil furnishes the lubricating means while the kerosene keeps the springs free from rust.

What Killed Carnarvon—Tut-Ankh-Amen's Curse?

LADY EVELYN HERBERT, LORD CARNARVON, HOWARD CARTER, B. G. GALLIER.

Misfortune dogs the footsteps of him who disturbs the sleep of a Pharaoh.—Ancient Egyptian Superstition.

By JOHN DICKINSON SHERMAN

OH! CARNARVON is dead. Lord Carnarvon uncovered the tomb of Tut-Ankh-Amen, Pharaoh of Egypt 3,273 years ago. What killed Lord Carnarvon—was it the curse of Tut-Ankh-Amen on him who should disturb his sleep?

LORD CARNARVON

LADY EVELYN HERBERT

Egypt very generally believes in a curse of the Pharaohs that wrecks dire vengeance upon those who disturb their last sleep. So all Egypt is now saying what corresponds to the American, "I told you so." And all Egypt does not hesitate to speculate in public whether this vengeance will be satisfied by the death of Lord Carnarvon or will be wreaked upon others.

Modern medical science says that Lord Carnarvon died of pneumonia, following blood-poisoning caused by the bite of an insect during the excavation of Tut-Ankh-Amen's tomb.

And noted physicians summoned to Lord Carnarvon did all that modern medical science knows to save his life. Respiration was artificially maintained as long as possible and his heart action was stimulated. But modern medical science could not save him.

Tut-Ankh-Amen, Pharaoh of Egypt, 1358-50 B. C., master of the ancient world, caused his royal tomb to be cut into the living rock of the cliff of the Valley of the Kings, near Luxor. He caused chambers to be filled with golden, jewel-studded funerary furniture; with preserved food; with his personal apparel and ornaments; with his portrait mannikin for the trying-out of clothing; with everything necessary for the use of his mummy when it should be laid away in the royal sarcophagus. After only eight years of rule he died. The sacred college of embalmers was busy over his mummy for 70 days. His mummy was placed in the sarcophagus, which stood in a separate chamber, elaborately decorated and inscribed. About the sarcophagus were built case after case, magnificently decorated, until the chamber would hold no more. The connections between the several chambers were then walled up and sealed. The passage to the chambers was filled. A wall was built across its outer end and sealed. The stairway of twenty steps in the living rock to the outer world was filled. A wall was built at the top step and sealed. This wall was covered with desert sand and hidden from the eye of man. And the mummy of Tut-Ankh-Amen, Pharaoh of Egypt, was left to lie in peace and safety through the ages until the shade of Tut-Ankh-Amen should return to assume mortal shape for the remainder of his long journey through the next world to the final state of bliss.

George Edward Stanhope Moynoux Herbert, fifth earl of Carnarvon, a nobleman of the British empire, A. D. 1923, caused that hidden and sealed outer entrance to be broken through. He excavated the stairway. He entered through the second sealed wall. He forced his way through the passage and into the outer chamber. He stopped not at the sealed wall of masonry into the chamber containing the royal catafalque. He laid alien hands on that catafalque. He even opened the doors of the outer case. And then he stepped—because of reverence for the dead Pharaoh? Not at all. He stepped because he could not get

farther into the catafalque without destroying it. To take the catafalque carefully apart it would be necessary to demolish a wall of the chamber. And that wall was covered with decorations and hieroglyphs which must be photographed and studied. All of which would take much time—and there would be cooler weather for the work in the fall!

The ordinary, everyday American would naturally say, "Why pick on Carnarvon? Carter, the American, is the man most responsible for the opening of the tomb."

Howard Carter was riding a good American "hunch." He believed he was "wise" to the approximate location of the hidden tomb of Tut-Ankh-Amen. His enthusiasm kept Carnarvon "bucked up," as the Englishman put it. And Carter's "hunch" was "the goods." Twice he dug in front of the large and elaborate tomb of Ramesses VI, an unimportant king of the XX dynasty, which all the tourists visit. And twice he missed it by a few yards only. The third time, last fall, he hit the exact spot. Then he called Carnarvon, who hastened to Luxor. It was Carter who supervised the excavation. It was Carter who cut through the walls to the catafalque chamber with his own hands.

Why Carter's persistence in his hunt for Tut-Ankh-Amen's tomb? Every Egyptologist was keen to find this particular tomb, which was believed to be the last of importance in the Valley of the Kings. For Tut-Ankh-Amen was the son-in-law and successor of Akhnaton, the famous "Heretic King" of the XVIII dynasty (1357-1378 B. C.). This "Heretic King" renounced polytheism as conducted by the priests of Amon, declared for "one god," refused to make war, abandoned his capital at Thebes, built a new capital city not far away at Tel-el-Amarna, wrote hymns to Aton, his new "god of love" and "comforter of them that weep" and instructed his court artists to quit conventional Egyptian art and to picture things as they appeared to the eye. In short, he was an all-around reformer who established an Egyptian Utopia. Carter found his rifled tomb in 1907. His city is now being excavated.

Tut-Ankh-Amen at first called himself Tut-Ankh-Aton and accepted the god of his father-in-law. Then he abandoned the new capital, went back to Thebes, restored the Amon priests with added privileges and changed his name to Tut-Ankh-Amen. Truth to tell, the Egyptologists were keen to find his tomb largely in the hope of getting data about Akhnaton, who is believed to be the first man in history to declare a "one-god" religion. Does Tut-Ankh-Amen's tomb contain this much-dreaded data? Nobody knows. The contents have been examined only

in part. The hieroglyphs on the walls have not been read. The catafalque has not been opened. There may be other chambers. Incidentally the archaeological value of the objects examined to date is estimated at \$15,000,000. Lord Carnarvon thought the total might run to \$90,000,000. It is the greatest archaeological "find" in all the years of Egyptian exploration.

True it is that the ancient Pharaohs did lots of "cursing." They posted many a curse on stone and tablet in public building and temple. These curses, however, were mainly directed against those who should fail to carry out the Pharaoh's will in respect to those buildings and temples. As to their tombs, the Pharaohs relied upon the care with which they were hidden and the skill with which entrance was blocked rather than upon curses upon possible disturbers of their last sleep.

The use of poison in ancient Egypt was an old story, but there seems to be no record of the poisoning of funerary furniture.

Nevertheless, superstitious Egyptians express fear for the safety of the immediate family of the dead man—his widow; his son, Lord Portchester, who succeeds him—his countless is an American woman, formerly Miss Catherine T. Wendell of New York; his daughter, Lady Evelyn Herbert. They also think it quite within the possibilities that all who participated in the opening of the catafalque chamber are in danger.

At the actual opening of the chamber there were present several Americans of note: Howard Carter; Professor Charles Breasted of the University of Chicago; Director Winlock of the Egyptian expedition of the Metropolitan Museum of Art, New York, and Curator Lythgoe. Lord Carnarvon of course was and Lady Evelyn Herbert. Among the others were Sir William Garstin and Dr. Allan H. Gardiner, British Egyptologist. At the public opening of the chamber three days later others present included the Dowager Sultana Malak of Egypt; Morton Howell, American minister to Egypt, and his wife; Queen of the Belgians and Prince Leopold; Viscount and Viscountess Allenby.

Some of the more superstitious of the Egyptians assume that the curse will even fall upon all who have received from Lord Carnarvon gifts of objects from the tomb. This list is said to include Lady Elizabeth Bonaparte, fiancée of the Duke of York.

Lord Carnarvon was born in 1859 and succeeded his father in 1890. He was educated at Cambridge and married in 1885 Almina Wombwell, a Chesterfield and a god-daughter of one of the Rothschilds. He was very rich, owned about 30,000 acres and had a racing stable. He was a collector of books and prints and a noted photographer.

BEFORE THROWING IT IS WELL TO WARM UP

This May Be Best Done by Two Players Tossing the Ball Back and Forth.

(By CARL LUNDGREN, Baseball Coach, University of Illinois.)

Before throwing the ball with any speed the players should always warm up well. This may best be done by two men throwing the ball back and forth between them at first for a short distance and later for a longer distance. Ball players almost always throw too much and too hard in practice. The result is they have dead arms or arms that are permanently injured.

In throwing, the player should concentrate his attention on the target. If he has acquired the proper form in throwing he can center his thought on the spot to which he is throwing.

The overhand throw for most purposes is better than any other method. With this form the player can throw more accurately and with greater speed and with less chance of injuring his arm than with the side-arm or underhand throw. In using the overhand throw the ball should be held with the first two fingers and the ball goes over the ends of the fingers. In making the throw the hand starts behind the head and is brought straight over the shoulder. As the hand and arm are drawn back the left foot is stepped forward, and as the throw is completed the right foot steps forward with the arm motion.

The underhand throw should be used on some occasions among which may be mentioned the following: 1. The shortstop uses the underhand throw when making a short throw to second base or after fielding slow hit grounders and the throw is to first or home. 2. The third baseman uses the underhand throw on bunts and slow hit grounders. 3. The second baseman frequently needs to throw underhand, but he likewise may be called upon to throw with side-arm or overhand motion.

The catcher uses the overhand throw when throwing to bases except sometimes on bunted balls, and most of the throws made by the infield should be of the overhand variety. The outfielders should throw overhand.

Changes His Gloves and Is Now Big Star

When Tyrus Cobb became manager of the Detroit team in the spring of 1921 there reported to him in San Antonio (Tex.) training camp Sammy Hale, an infielder.

Cobb liked Hale because he could hit, but Hale's fielding was the first big worry of the new manager. Hale's hands were anything but sure. He played ground-hit balls badly and he fumbled more frequently than not.

Finally Cobb decided that Hale was unable to field because the glove he wore was too small. He tried to induce Hale to adopt a large, loose-fitting fielder's glove, but Hale stuck to his little brown one, claiming that it felt more comfortable.

Hale did not change his glove, his fielding failed to improve and Detroit released him soon after the start of the season.

Detroit still had a claim on Hale, but when a chance came to get Herman Piliette and Sylvester Johnson from the Portland club for \$40,000 cash and five players, Hale became one of the five that Portland got, and it is the same player whom Connie Mack bought for his Athletics at a fancy figure.

Since going to the coast he has developed into a good fielder and continues to sing the ball.

Goulet Has Scored Eight Big Victories

Alfred Goulet added to his fame by his victory in the recent 6-day bicycle race in Madison Square Garden. He has scored eight victories in New York since his first with Joe Fogler in 1913, as well as other triumphs in Paris and Chicago and the one-mile sprint record of 1:47.45.

Pitcher John Cooney

John Cooney, late of the New Haven club, pennant winners in the Eastern league, is being rated as the likeliest left-handed pitcher in organized league baseball. Johnny won 17 games last year and dropped but three. It was his pitching that won for New Haven over Baltimore. Johnny is an offspring of Jim Cooney, star shortstop of the old days, playing with "Pop" Anson.

MOTHERS, DO THIS—

When the Children Cough, Rub Musterole on Throats and Chests

No telling how soon the symptoms may develop into croup, or worse. And then's when you're glad you have a jar of Musterole at hand to give prompt relief. It does not blister.

As first aid, Musterole is excellent. Thousands of mothers know it. You should keep a jar ready for instant use. It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frost-bite and colds of the chest (it may prevent pneumonia). 35c and 65c jars and tubes.

GREEN MOUNTAIN ASTHMA COMPOUND

quickly relieves the distressing paroxysms. Used for 50 years and result of long experience in treatment of throat and lung diseases by Dr. J. H. Gildred, FREE TRIAL BOX, Treatise on Asthma, its causes, treatment, etc., sent upon request. Cost, and \$1.00 at druggists. J. H. GILDRED, RUPERT, VT.

A Moment of Diffidence.

"When you made your first public speech did you have stage fright?"

"No," replied Senator Sorghum.

"But I had it the first time I talked to the man who was putting up my campaign fund."—Washington Star.

Insulted.

She (dreamily)—"Do you cure for children?" He—"No; what do you think I am, a nursemaid?"

Sure Relief FOR INDIGESTION

BELL'S 6 BELL'S Hot Water Sure Relief

25c AND 75c PACKAGES EVERYWHERE

OLD FOLKS NEED NOT BE FEEBLE

If you are "getting along in years" you don't need to sit in a chimney corner and dream of the days when you were full of life and vitality. Keep your blood rich and pure and your system built up with Gude's Pepto-Mangan, and you will feel stronger, younger and livelier than you have for years. Get it today and watch the result.

Your druggist has Gude's—liquid or tablets. You prefer.

Gude's Pepto-Mangan Tonic and Blood Enricher

DON'T DESPAIR

If you are troubled with pains or aches; feel tired; have headache, indigestion, insomnia; painful passage of urine, you will find relief by regularly taking LATHROP'S GOLD MEDAL CAPSULE.

The world's standard remedy for kidney, liver, bladder and uric acid troubles and National Remedy of Holland since 1696. Three sizes, all druggists. Guaranteed. Look for the name Gold Medal on every box and accept no imitation.

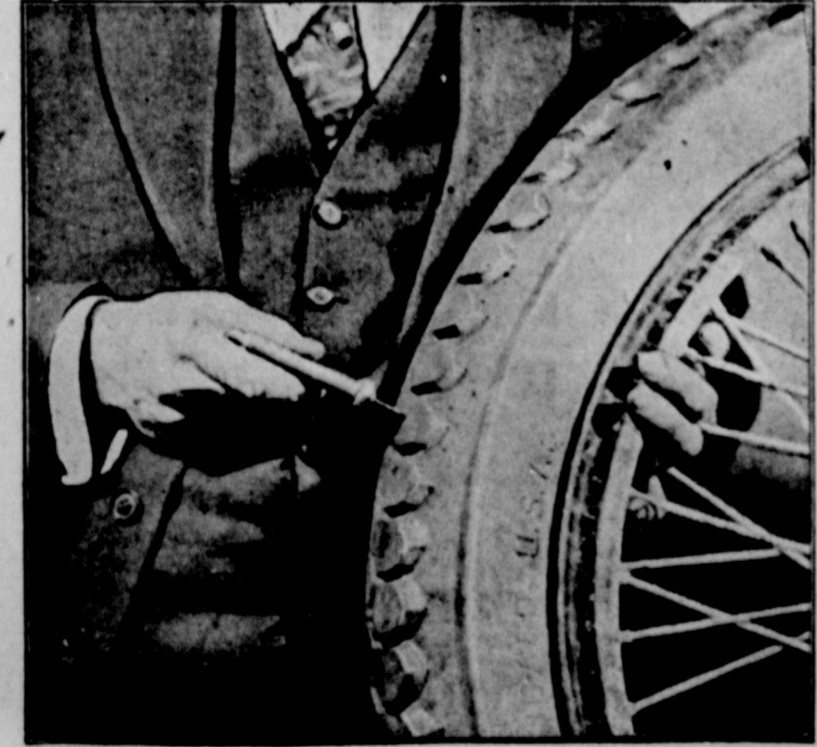

CORNS

Doesn't hurt a bit! Drop a little "Freezone" on an aching corn, instantly that corn stops hurting, then shortly you lift it right off with fingers. Truly!

Your druggist sells a tiny bottle of "Freezone" for a few cents, sufficient to remove every hard corn, soft corn, or corn between the toes, and the calluses, without soreness or irritation.

WE NOW HAVE VALVELESS TUBE

Automobile owners will be interested in knowing that Mr. Chas. H. Hughes of Chicago, the inventor of tear gas, has just completed a new invention that will do away with the necessity of valves in automobile tires and tubes. Mr. Hughes has arranged a mixture that will go inside the tube, and when a puncture occurs, the mixture will flow to the opening and immediately close it and prevent the escape of air. When the air in the inner tube does escape, with his filling needle, it is possible to refill it and upon the withdrawal of the needle the glue on the inner tube will immediately seal the hole.

Wonderful Linguist

In the knowledge of languages, the famous Cardinal Mezzofanti, librarian of the Vatican, excelled. Mezzofanti could read, write and speak in over fifty languages, and was conversant with many of their dialects as well. It was his boast that he could talk in their own tongue with natives from almost every corner of the globe. The poet Byron, for it was in his day the paragon lived, who met Mezzofanti,

spoke of him as "a monster of languages, a walking polyglot, who ought to have existed at the Tower of Babel as universal interpreter," adding that he had tried him "in all the tongues of which I knew a single oath, and egad! he astonished me even in my English."

Revelation.

In his noble essay on Dante, Carlyle says: "Coleridge remarks very pertinently somewhere, that wherever you find a sentence musically worded, of true rhythm and melody in the words, there is something deep and good in the meaning too. For body and soul, word and idea, go strangely together here as elsewhere. . . . It is only when the heart of him is rapt into true passion of melody, and the very tones of him, according to Coleridge's remark, become musical by the greatness, depth and music of his thoughts, that we can give him the right to rhyme and sing, that we call him a poet, and listen to him as the heroic of speakers—whose speech is song."

Which Is Larger the Sun or a Cent

The sun is the largest but you can hold the cent so close to your eye that you'll lose sight of the sun. Don't let a cheap price or a big can baking powder make you lose sight of quality.

CALUMET The Economy BAKING POWDER

Is the quality leavener—for real economy in the kitchen, always use Calumet, one trial will convince you.

The sale of Calumet is over 150% greater than that of any other baking powder.

THE WORLD'S GREATEST BAKING POWDER

Dancing Taught Early by Spartans. The Spartans had a special law which compelled them to train their children in dancing from the early age of five years.

Starting in Young. The civics teachers at a certain school in Indianapolis recently required their pupils to hand in statements showing their schedules of classes.

BABIES LOVE MRS. WINSLOW'S SYRUP
The Infant and Children's Register. Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly cures colic, diarrhea, flatulence and other like disorders. The open published formula appears on every label.
At All Drug Stores

One boy noted on his slip a course in "forgery." His teacher was much astonished. Investigation showed the boy had forging in one of the foundry classes.

WHY TAKE LAXATIVES?

Discovery by Science Has Replaced Them.

Pills and salts give temporary relief from constipation only at the expense of permanent injury, says an eminent medical authority.

Science has found a newer, better way—a means as simple as Nature itself. In perfect health a natural lubricant keeps the food waste soft and moving. But when constipation exists this natural lubricant is not sufficient. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication. As Nujol is not a medicine or laxative, it cannot grip and, like pure water, it is harmless and pleasant. Nujol is used in leading hospitals. Get a bottle from your druggist today.—Advertisement.

Polliteness of some men causes them to be looked upon with suspicion.

Wise men are wrong more frequently than fools are right.

IMPORTANT AIR

"I don't like to boast," said the Air, "but I really am pretty important."

"Yes, that is the truth, and I do not mean to be conceited when I say so."

"You're not conceited," said Mr. Sun. "If some were in your place how they would go about boasting."

"They'd say how they had accomplished this and that, and how much the world owed to them, and how they were great and must have many followers."

"Oh, some would be very conceited if they were in your place, Air."

"Yes," said the King of the Clouds. "That is so. There is nothing so important as you are, Air."

"You are needed when people want to be cool and refreshed. You are needed if people are to be healthy. If a person has fainted away the first thing said is:

"Give her air! Give her air!" "And you're so generous, Air. You're never selfish. If people shove you out of the way and build up so that you can hardly get in, it isn't your fault."

"Of your own accord you are just as generous as generous can be. You never act selfishly."

"In all the years and years and years and years you've been about you have never said:

"Oh, dear, what do I care about all these people. I'm not going to bother about them. I'm not sure that they appreciate me, and so I won't bother any more."

"No, Air, you've never said anything like that."

"Well, I'd be horribly selfish if I did say anything like that or if I ever thought of anything like that," said the Air.

"Ah, just as I said," the King of the Clouds remarked, "you aren't selfish. You couldn't be selfish if you tried."

"And oh, how much good you do," said Mr. Sun.

"You do a lot of good yourself," said the Air.

"You're always so ready to praise others," said Mr. Sun.

"Well, for that matter, so are you," the Air answered.

"Ah, but what you do is the greatest work of all," Mr. Sun continued.

"You're important, just as you said, and you certainly were not conceited in saying that. It is just a fact."

"Well," said the Air, "I do think it is a fact that I am important, and that I am needed, but it is for those reasons that I wouldn't want to be selfish and keep from doing my important work."

"Oh, Air," said Mr. Sun, "how every one loves you and needs you. How good Air is." How often have I heard that speech!

"You make people sleep without getting headaches by going right in their windows when they open them."

"You make them wake up feeling so refreshed."

"You are the guest of honor at a picnic and on trips to the woods you are so loved."

"You seem to go about to such nice places, Air."

"In fact you are wherever you are not crowded out."

Just then along came the Queen of the Fairies and she said she had just received such a compliment from the Fairies. They had liked her costume of pale green and silver. It was of such filmy material.

And they had told her she looked "so nice and airy," and she had been delighted with the compliment.

"But, Air," she said, "to me one of the most wonderful things about you is that you do so much and yet you have no arms or no legs."

"You can't run hither and thither, and here and there, and yet you certainly do get about!"

"You have no arms, and yet you carry health with you all the time!"

"You have no head, and yet you know how to do so much that is wise and good and that will help people to keep well and strong."

"Yes, Air, you are remarkable, remarkable!"

And then the Fairy Queen picked up her long trailing skirt and did a lovely, lovely dance, waving her wand and singing this song as she danced:

Beautiful Air
Here and there!
and everywhere
Beautiful, wonderful Air!

FINISHED LAMBS IN GOOD DEMAND

Young Animals in Farm Flock Should Be Ready for Market When Four Months Old.

TRY TO AVOID STOMACH WORM

Make More Rapid and Less Expensive Gains While Young Than When Older—It Is of Utmost Importance to Feed Properly.

(Prepared by the United States Department of Agriculture.)

Lambs in the farm flock should be ready for market when about four months old, according to specialists of the United States Department of Agriculture. Reasons for pushing the lambs as fast as possible in order to market them at this early age are as follows:

Average market prices are higher in the spring and early summer.

Lambs will make more rapid and less expensive gains in flesh while young than when they are older.

Less labor and less pasture will be required for the flock.

Escape Internal Parasites.

Lambs marketed in the early part of the season escape the heat of the summer and the ravages of the stomach worm and other internal parasites. This is very important, say the specialists, as it has been found that in most instances the weight of lambs remains practically at a standstill from mid-summer until fall. If they become infected with stomach worms, as is usually the case in the farm flock, they will lose weight during this period and a large number of the animals may die.

Proper Feed Is Essential.

In order to produce lambs of desirable quality and weight for the market at this early age it is necessary to feed properly both the ewes and lambs. The ewes should be brought to the lambing season in good flesh so that a large milk flow is assured. It has been found that it is not essential to feed grain to ewes suckling lambs if they are on good pasture. If the pasture is short, however, or if the ewes are on dry feed the daily addition of 1 to 2 pounds of grain per head to their ration is advisable. The lambs should be taught to eat at as early an age as possible. They will usually begin nibbling at feed when they are from 10 to 15 days old. A creep should be prepared so that they can get away from the ewes and the best quality of alfalfa or clover hay should be kept before the lambs in this creep. They should also be given small amounts of such feed as crushed corn, oats or barley with a little wheat bran and oil meal.

It is important that the grain be clean and fresh and that the troughs are kept clean. After the lambs have learned to eat they should be given twice daily, as much grain as they will eat within a few minutes' time.

If the general practices outlined above are followed by the farm flock owner it will be very easy for him to put his lambs on the market at an early age with sufficient weight and condition to satisfy the buyers and to assure him of good returns.

PLANTS TO BE TRANSPLANTED

Harden Off Gradually, Giving Fresh Air and Avoid Sudden Changes of Temperature.

If plants are kept growing at a rampant pace in the warm hotheds right up to the time they are to be transplanted in the open garden they are likely to be sorry and spindling. Harden them off gradually as transplanting time approaches, give them a breath of fresh air frequently, and do not subject them to sudden changes of temperatures. If this is done losses will be less, the plants will start off much more readily and will remain thrifty throughout the season.

DANGEROUS GARDEN DISEASES

It Pays to Carefully Examine Plants Before Setting Out—Look for Yellows on Cabbage.

Many dangerous diseases are carried into gardens on plants. It pays to examine plants before setting them in the garden. Cabbage plants, for example, should be turned upside down and examined carefully for a disease known as yellows, which has been common in midwestern gardens during the last few years. Those with yellow leaves are probably diseased. Dwarfed, twisted leaves, with a dark brown streak in the sap tubes, are other symptoms of yellows.

Beware of Noxious Dodder

Slogan Which Seed Growers Must Adopt If They Wish to Stay in Business.

"Beware of dodder" is a slogan which clover seed growers must adopt if they wish to stay in the game. There is no weed that is causing clover seed growers more anxiety than field dodder. New infestations are being discovered each year. Like many other weeds dodder may grow unnoticed by the farmer until it has obtained a foothold that is hard to break.

The Unexpected

By CLARA DELAFIELD

(© 1922, Western Newspaper Union.)

A MILLIONAIRE at thirty-two, unmarried, clever, refined, a soldier of distinction in the war, Claude Harvey was naturally in great demand among the girls. He had all the attributes of the hero of a popular novel.

He had piercing blue eyes, and a rare smile that went straight to the heart. But he was cold, ruthless, some said. No wonder the girls admired him.

He happened to be alone in his sumptuous duplex apartment in the most fashionable part of the city that night. Haro, his Jap valet, was away. Haro was at the marriage of his brother.

Anyway, Claude was alone, and just about to retire to sleep, after dipping into "Psychology of the Unconscious" and "A Thousand Facts About Plain Salesmanship," two literary treasures that were always at his bedside. When he had read one he read the other. His mind was curiously balanced between the poetical, typified by "A Thousand Facts," and the practical, typified by—

Oh, yes, Claude heard a slight sound downstairs in the direction of his library, giving him the confused, pleasurable impression that a ton of nitroglycerin had exploded in the safe in which he kept a hundred thousand dollars' worth of bills and negotiable securities, in addition to a priceless necklace of antique cat's eyes, valued at nearly three hundred dollars.

Hastily, but without undue emotion, Claude arose, donned his dressing-gown of flowered antique satin, which had been given to him by his maiden aunt on the occasion of his tenth birthday, took his automatic and descended the stairs.

As he went down he was oddly aware of a certain subconscious instinct reflected in a peculiar physical sensation, as if cold water were being poured down his spine, while, at the same time, his hair displayed a tendency to straighten itself and project vertically upon his cranium, and—

As he went down he was conscious of a fear which he repressed as unworthy of a Harvey. Gripping his automatic closer, he went to the door of his library.

A tiny gleam of light arrested his attention. Looking through the crack of the door he saw a human form outlined against the massive door of his safe.

Stepping into the living room, he quietly got into touch with police headquarters, and asked that an officer be sent up immediately to arrest a burglar. Then he went back.

From the door he saw the burglar deliberately folding away his bills and securities in a large flat case. Too proud to fight, he just looked on until the gleam of the cat's-eye necklace arrested his attention.

A low moan escaped his lips. The burglar leaped to his feet—her feet.

Before him stood a beautiful girl, in all the glory of her young womanhood. The cat's-eye necklace in her hand shone like cat's eyes.

Covering her with the automatic, Claude drawled: "Well?"

"Well?" responded the girl coolly.

"So you have come here, a common thief, to steal?"

She leveled a finger full of reproach at him. "Do you talk of stealing?" she retorted, "you whose pockets are lined with the tribute wrung from the oppression of your wage slaves?"

Harvey hung his head. "I am the victim of the capitalist system," he retorted. "Does that justify you in stealing, bursting open my invincible safe and taking my bills and securities and cat's-eye necklace?"

She advanced scathingly. "I have simply taken back what you have stolen from the proletariat, say he returned. "All the proceeds of this sale will be given to the poor. Let me pass, you monster!"

Overcome by her sincerity, Claude stepped aside. "Won't you let me keep the cat's-eyes?" he pleaded. "They were a legacy from Aunt Tabitha."

"Scornfully the girl fung the necklace at him. For a moment Claude felt an irresistible impulse to take her in his arms. Then, hearing a sound outside the door, he stepped aside and opened it for her.

Two officers stood there.

"What's this about a burglary, Mr. Harvey?" they demanded.

The girl glanced at him in piteous appeal.

"Oh, yes, this is the burglar," answered Claude.

"Why, if it ain't Chicago Mame!" exclaimed the elder of the two men. "I guess we want her pretty bad anyway."

"Well, I don't want her," said Claude, retrieving the large flat case with its contents. "See that she gets the limit."

The Isle of Pines.

The Isle of Pines, some 40 miles south of Cuba, and belonging to it, has become one of the most American communities on foreign soil. Cuban officials administer the government as a part of the province of Havana, but Americans own nearly all of the land and pay nearly all of the taxes. The island is about half the size of Long Island, N. Y. Grapefruit, lemon and pineapple plantations cover much of the area, and from the general atmosphere a visitor might imagine himself in Florida or California.—Youth's Companion.

GRIMES BOILS OUT AT HOT SPRINGS

Here is Burleigh Grimes, pitcher of the Brooklyn Dodgers, while at Hot Springs boiling out in preparation for the opening of the baseball training season.

Clarice MacLevy

Oldest Among Owners

Barny Dreyfuss of Pittsburgh and Charles H. Ebbets of Brooklyn are the oldest club owners in the majors. Dreyfuss has controlled the Pirates since 1900 and Ebbets was elected president of the Brooklyn club in 1908. The Giants passed into the hands of Charles A. Stoneham in 1919. The Cincinnati Reds have been handled by August Herrmann for twenty years. William F. Baker and others took hold of the Phillies in 1913. George W. Grant bought the Braves four years ago. William Wrigley and partners purchased the Chicago Cubs franchise in 1916, and Samuel Bronson became the principal owner of the Cardinals in 1920.

Sporting Squibs of All Kinds

France boasts 10,000 association football teams.

The optimism of the baseball fan seldom hits less than 480.

Penn will endeavor to form an intercollegiate baseball league for 1924.

Fifteen per cent of the people play golf, says an expert. If you call it golf.

Babe Ruth couldn't make harder work of his reduction schedule if it were a war debt.

Percy Haughton has assumed charge of football at Columbia. They always come back for more.

Pittsburgh university has purchased eight acres of ground toward providing a stadium for sports.

Home runs in the spring don't count, but they sound just as loud as those in the championship season.

Sacramento is to have a first-class fighting arena, if plans being discussed by promoters are carried out.

In the 45 years of its existence the Pastime Athletic club of New York has developed more than 50 champions.

During the coming summer New York boxing fans will have an opportunity to see virtually all the champions in contests.

Although Dave Shade received the decision over George Ward in Boston, Hub fans are not convinced that Shade is the better fighter.

It is hard to believe that a man named Luis Angel Firpo can be a large, rough prize fighter, but that is what the sporting pages say.

"This is going to be one smart ball club," says Mr. Cobb, meaning possibly that most of the Tigers' concrete this year has gone into the new stands.

Vincent Richards, America's "boy wonder," and the third player on the United States tennis list, will compete in the British national championships at Wimbledon this summer.

It is reported that Columbia is to pay its football coach \$15,000 a year, and, judged from past performance, it may require the services of a superman to produce a winner at Columbia.

Gilmore Doble, grid coach at Cornell university, has accepted an invitation from Robert Zuppke, coach at University of Illinois, to share with him the teaching of football in the summer school for athletic coaches at Champaign, Ill., June 18 to July 23.

New York Authorities Regard McTigue Champ

The stand of the French boxing federation that Battling Siki still retains his title because he did not make the weight in his bout with Mike McTigue is rejected by New York authorities.

Clark Griffith More Optimistic Than Ever

Clark Griffith, president of the Washington ball club, never was more optimistic than this year.

"The Yankees are not going to win the pennant this season," he said recently. "Neither will the Browns. Neither team has been strengthened. Look out for a dark horse this year. Cleveland, Washington and Detroit have added a lot of new material, and of the three, Washington has the best prospects. Just keep your eye on us."

British Olympic Plans

The British are rapidly rounding out their plans for the Olympic games at Paris next year, and more than one-fourth of the proposed fund of £30,000 for support of the team has been raised.

Each town of 5,000 population has been asked to contribute at least £10 to the fund. So far London has subscribed £3,000.

**Mode in Chic Millinery;
Accessories Made of Ribbon**

A FINE milan straw expresses the very aristocracy of millinery, and this is the type which is greatly in evidence this season. Of course this milan hat must be a distinctive shape with trimming of simple elegance to assure its individuality.

The poke may be said to be the favorite among favorites this season, and it is indeed charming when of finest milan braid. There are so many versions of the poke bonnet, they

the realm of fashion. The pictures herewith tell of the magic which lurks in a length of ribbon.

Just now the Deauville bandanna is the subject supreme in the way of dress accessories. It has a rival in the ribbon kerchief drape, such as is pictured in the small circle. The way to make this interesting novelty is to take four pieces of wide ribbon, miter them at the corners and join by double hemstitching or fagoting. This pretty

MILAN SHAPES SMARTLY TRIMMED

present in themselves an interesting study. Among others, the very deep but not wide flare is repeating its Parisian triumph in America. Milan novelty "Continental" are exceedingly good style.

All shades of brown and black, of course, predominate in the milans as now worn. However one of the outstanding features of the season is purple milan straw. Ever so many cunning shapes are developed in deep purple and various orchid tones, also the lighter browns and cocoa shades are very fashionable.

Here's a secret, too good to keep. In regard to the group of milan braid hats shown in this picture: Two of them have a snap-on trimming. That means the bows and ribbon garnitures

"ribonette", as it has been aptly called, can be worn as a square, pulled around so that one point comes down in the front with each shoulder and the back adorned with the other points. A pleasing variation is to knot one point in kerchief effect.

Fancy girdles—what a sensation they are creating among dress accessories, and how gracefully ribbon lends itself to the general scheme! The picture tells, in two views, how to fashion the cleverest sort of a hip-scarf or girdle out of about one and three-quarters yards of wide ribbon. Two pieces are mitered to make a corner, the one three-fourths-yard in length, the other one yard. The process is shown in the section held to view by the young woman, who afterwards

THE HIP-SCARF OR GIRDLE

are removable at one's instant fancy. It also visions vast possibilities matching one's millinery to one's costume. Ribbon lends itself wonderfully to this removable trimming and one can revel in a number of ornate cocardes, bows and the like, each a different color.

The hat with the fanlike frill is just so in the picture, but concealed in the box from whence it emerged are several sets of bows which may be snapped on in place of the trim it now carries. The model to the left has snap-on trimming, of crushed bows of ombre ribbons in wood tones, with a band across the top of the crown. The deep milan cloche is dark purple with lavish bows of wide ribbon, for ribbon is the leading trimming item this season.

"Make it of ribbon" is apparently the prevailing sentiment throughout

knots it about the hips, point over right hip, as the standing figure displays.

Among other ribbon novelties is a very effective can for the bodice. A yard and a half of ribbon 6 or 7 inches wide is required. Fold it to find the center, shir here in five vertical rows, so as to draw down to conform to the head. To one side measure 12 inches, at which point cut a slit or button-hole almost across the ribbon. Overcast this with floss, so it will not unravel. In adjusting, pull the other end of the ribbon through at the back of the head. Bring both ends forward and treat the front in a butterfly bow.

Julia Bottomley
(© 1922, Western Newspaper Union.)

Seven Scrub Chasers

1. Sell that scrub bull for beef.
2. Make an exchange for a registered bull calf.
3. Exchange scrub bull in part payment toward a purebred bull of serviceable age.
4. Hold a registered bull sale, encouraging scrub owners to buy a bull at their own price.
5. Form a bull club or a bull association.
6. Ask your county breed secretary and county agent to assist in replacing that scrub with a good purebred bull.
7. Encourage scrub bull owner to borrow a good purebred bull from his neighbor for him to keep to be used for two years service, then return him to original breeder.—A. J. Cramer, Wisconsin College of Agriculture

TAKING INTEREST IN STOCK IMPROVEMENT

West Virginia Active in Campaign for Better Sires.

One Day 100 Enrollment Blanks Were Filled by Owners Who Had Planned Operations on Strictly Purebred Basis.

(Prepared by the United States Department of Agriculture.)

Unusual interest in live stock improvement in West Virginia is evidenced by records of the "Better Sires—better stock" campaign conducted by the various states and the United States Department of Agriculture. In one day recently West Virginia filed with the department 100 enrollment blanks, each filled out by a live stock owner who had placed his breeding operations on a strictly purebred sire basis for all kinds of stock kept. The enrollments were from 12 counties.

This voluntary activity is of additional interest in view of purebred sire legislation which became effective in West Virginia January 1, 1923. The state law requires that all sires, including stallions, jacks, bulls, rams, and boars kept for public service be purebred and registered. Violations are punishable by fine or imprisonment. Participation by West Virginia live stock owners in the "better sires—better stock" movement, according to specialists in the bureau of animal industry, United States Department of Agriculture, is an excellent indication of favorable sentiment in support of purebred sire legislation.

ACID PHOSPHATE ON MANURE

Shown Conclusively That Addition Has in Many Cases Doubled Producing Power.

It has been shown conclusively that the addition of acid phosphate to manure has in many cases doubled the producing power of the manure over that not so treated, and in no instance has the practice failed to pay better than to apply the manure and phosphate separately. The plan in general use is to scatter some acid phosphate over the manure in the stalls every day, a good handful to each animal of average size per day being sufficient. The phosphate keeps down the ammonia smell so common to stables, a smell that is proof that the nitrogen in the form of ammonia is escaping, and the phosphate prevents this loss. This matter has been brought to the attention of readers before, and sometimes we wonder how many have paid any attention to it, or have put it into practice. No danger of losing any of the plant food, in the phosphate, for it has been determined long ago that phosphoric acid does not leach out of soil, hence to use it in the stables and let it go out with the manure is the easiest and the safest way to apply it.

CUTTING POTATOES FOR SEED

Usually Growers Slice for Number of Eyes Rather Than for Any Definite Size.

Many different ideas concerning cutting potatoes are held by farmers. Usually growers cut for the number of eyes rather than for a definite size seed piece. Commercial growers know that the size of the seed piece is an important factor in securing vigorous plants and good stands. Experiments have proved that as you increase the size of the seed piece you increase the vigorosity of roots and tops and consequently the yield. With this in mind pieces weighing about two ounces or the size of an egg are generally recommended and planted by successful growers.

PRODUCING WOOL IN STATES

In 1922 Total of 219,095,000 Pounds Was Reported—Wyoming and Texas in Lead.

Wool is produced in every state in the Union, according to reports of the United States Department of Agriculture. In 1922 production totaled 219,095,000 pounds (not including pulled wool), compared with 225,546,000 pounds in 1921. Wyoming and Texas led in production in 1922, having produced 22,500,000 pounds and 19,800,000 pounds, respectively.

Current Wit and Humor

INDIFFERENT SWEARER

"So you played golf on earth?" asked St. Peter of the applicant for a harp and a halo.

"Yes."

"Hum, I'll have to look into your record a little more closely."

"I think I know what is on your mind," said the applicant, "and I can truthfully say I was no good at the language."

Affluence.
When Alken met Payne, back in the old home town, he inquired:
"How is Umson; and how is Amley?"
"Umson is so prosperous he rides in his own machine."
"Yeah—?"
"And Amley is so well off, he walks for exercise."

Safer.
"Jim," she said, as he settled down for a comfortable smoke, "I've got a lot of things I want to talk to you about."
"Good," said her husband. "I'm glad to hear it. Usually you want to talk to me about a lot of things you haven't got."—Lawyer and Banker.

Heartless.
Josephine (reading aloud conclusion of long letter)—Then I will come home and marry the sweetest little girl on earth.
Juliet—What a dirty trick! After being engaged to you!

An Old-Fashioned Home.
"Home is a place where some woman darns socks," says the San Francisco Chronicle. The fellow who wrote that line must have had an old-fashioned home in mind.

NOT RECIPROCAL
"Ah, Miss Duke! I hope I find you well."
"I'm that so. Well so for myself, I'm sorry you find me at all."

Loved Her Figure.
He fell in love with her figure—
She constantly dwelt in his thoughts.
No wonder he loved her so madly—
Her figure was four and six nougats.

In Time.
"Move to Mudville."
"Why?"
"You can be one of the 400 there."
"What's your population?"
"About 380 just now."

Not at the Table.
Landlady (trying to start the conversation)—May I ask you if you are fond of the antique, Mr. Sanders?
New Boarder (suspiciously)—Um—er—not when it is at table.

Heavy Footwork.
Clancy—Dear, I could go on dancing like this with you all night.
Nancy—Oh, so, you couldn't possibly. Both my ankles would be broken after five minutes more of it.

As an Example.
"Charley, dear," said young Mrs. Torkins, "don't you think a woman should be guided by the tastes of her husband?"
"Of course."
"So do I. That's why I'm going to have my hair cut short and learn to smoke."

The Natural Inference.
"Prosperity seems to spoil some people."
"What rich friend has denied your request for a loan now?"

Easily Remedied.
Lady of the House—Yes, I have an old pair of my husband's trousers, but I'm afraid they're too large around the waist for you.
Hungry Higgins—Well, couldn't yer gimme a dinner dat would make 'em fit?

Confusion of Tongues.
Asked by his Sunday school teacher about the Tower of Babel, Tommy said:
"Wasn't that the place where Solomon kept his 500 wives?"

Mean.
"What sort of a fellow is he?"
"I'll tell you how bad he is. His wife sued him for divorce and put all the things she could think of in her bill of complaint and the things she called him actually flattered him."

Method in It.
"Mr. Fubdub heard you were sick."
"Well?"
"He calls up every day to see how you are. I did not think he was such a good friend of yours."
"Aw, he wants an apartment."

PE-RU-NA
FOR CATARRH OF THE HEAD AND NOSE

"I began using PE-RU-NA Tablets three years ago for catarrh of the head and nose. Was unable to do anything. I saw a decided improvement after one box and after

NO RETURN OF THE DISEASE IN TWO YEARS

using five boxes believe I am cured as there has been no return of the disease in two years." Fifty years of usefulness is the best guarantee of Pe-ru-na merit.

STUDY SECRETS OF NATURE
Writer Suggests Effective Method of Making Work for Hands That Are Idle.

Dispersing clouds by magnetized sand is only half the trick. How to make 'em is the other half. Probably making clouds is the more difficult half, although it is only evaporation on a large scale. It is a problem in heat and moisture. All these matters are something on which to busy the infinite human mind. And yet millions of us think our most satisfying endeavor is to "kill time."

Couldn't we kill time quite as effectively by studying some of the secrets of nature? Here are men who have been doing intellectual stunts in trying into those secrets.

For want of "nothin' else to do," why can't we all dabble a little in the same pastime? Give us a laboratory and let us go to work with due safeguards against blowing ourselves up. May not thousands more of us play at chemistry, physics, mechanics and so on?—St. Louis Globe-Democrat.

The Real Issue.
"Doggone it, Bringsley, I don't know what is going to become of the country. Things are going to the dogs."
"Your business slow?"
"No, not that; but last night my partner led the king when I held the ace, and when I came back with the ace to hold lead and kill the suit she trumped my ace, and then got the idea diamonds was trumps when I had made it hearts. I tell you, women are getting too darned independent!"

The less she means it the louder a woman can laugh.

The man who has nothing to live for can afford to loaf.

WINTERSMITH'S GILL TONIC
SOLD 50 YEARS
A FINE GENERAL TONIC

Famous Puritan Writer.
Sir Thomas Browne (1605-1682) was a physician and writer of the Puritan age, noted for the staidness and rhythm of his style. His leading work is "Urn Burial."
The Fat and the Lean.
Fat Girl—"I have an appetite like a centaur."
Thin Girl—"Yes, you have! You eat a peck at a time."

**IF BILIOUS, SICK!
TAKE NO CALOMEL**

"Dodson's Liver Tone" Straightens You Up Better Than Salivating, Dangerous Calomel and Doesn't Upset You—Don't Lose a Day's Work—Read Guarantee

You're bilious! Your liver is sluggish! You feel lazy, dizzy and all knocked out. Your head is dull, your tongue is coated; breath bad; stomach sour and bowels constipated. But don't take salivating calomel. It makes you sick; you may lose a day's work.

Calomel is mercury or quicksilver, which causes necrosis of the bones. Calomel crashes into your bile like dynamite, breaking it up. That's when you feel that awful nausea and cramping.

If you want to enjoy the nicest, gentlest liver and bowel cleansing you ever experienced just take a spoonful of harmless Dodson's Liver Tone to night. Your druggist or dealer sells

For a bottle of Dodson's Liver Tone for a few cents under my personal money-back guarantee that each spoonful will clean your sluggish liver better than a dose of nasty calomel and that it won't make you sick.

Dodson's Liver Tone is real liver medicine. You'll know it next morning because you will wake up feeling fine, your liver will be working, your headache and dizziness gone, your stomach will be sweet and your bowels regular. You will feel like working; you'll be cheerful; full of vigor and ambition.

Dodson's Liver Tone is entirely vegetable, therefore harmless and can not salivate. Give it to your children.

**Girls! Girls!!

Nothing to Speak Of.
"Howdy, Gap?" saluted an acquaintance from over beyond Presbyterian Hill, upon meeting Gap Johnson of Rumpus Ridge in the county seat.
"Anything coming off, out your way?"
"How're you, 'Lije?" was the reply.
"Well, no; there ain't nuthin' in the racketter happened lately on the Ridge. Of course, there's been some fighting, but no great sight, and a little shooting, such as it was, and some marring and dying, and such like, and a few runaways, including some feller's wife and an agent for something or nuther, but nuthin' in the way of real news, that I know of."—Kansas City Star.

Sensible Chap.
There was a man who never wrote an acceptance to an invitation without adding W. P. His friends asked him what the letters meant—if they stood for "weather permitting."
"No," was his reply; they stand for "wife permitting."—Boston Evening Transcript.

Even if a man fights but one duel he has a second.

Here's the Food-Iron Nature intended you to have

Grape-Nuts
Made of Wheat and Barley
Furman Cereal Company, Inc.
Dartmouth, Mass., U.S.A.

KIND and skilful Mother Nature planted under the outer coat of the kernels of her best food-grains a store of iron for human use. Many present-day foods are robbed of this and other vital qualities in the extra "refinement" of preparation.

Grape-Nuts, that famous wheat-and-malted-barley food, supplies iron, phosphates and vitamin from the natural grain; and in its splendid, well-rounded nutriment and easy digestion it is a wonderful builder of health and energy.

There's a delightful charm of crispness and flavor to Grape-Nuts—a welcome serving at any meal. Ready to serve, with cream or milk.

Order from your grocer today. There are many servings, providing exceptional nourishment, in a package of this truly economical food.

HEALTHY PRODUCT
Made by Furman Cereal Co., Inc. Battle Creek, Mich.

 MR. AND MRS. M. A. BOLING
 Owners & Publishers
 HENRY GATES, Editor.

Entered as second class matter July
 22nd, 1905, at the post office, San-
 derson, Texas, under the Act
 of March 3, 1879.

Statement of Ownership

(As required by the Act of Con-
 gress, to be published in April
 and October of each year.)

Before me, a Notary in and
 for Tarrant County, Texas, per-
 sonally appeared M. A. Boling
 and Addie Lee Boling, who hav-
 ing been sworn, deposes and says

that they are the publishers of
 the Sanderson Times and that
 the names of the publishers,
 editor and owner are as follows:
 Publishers: M. A. Boling and
 Addie Lee Boling.
 Editor: Henry Gates.
 Owners: M. A. Boling and Ad-
 die Lee Boling.
 Bondholders and mortgagees:
 none.

(Signed) M. A. Boling,
 Proprietor.
 Sworn to and subscribed be-
 fore me this 11th day of April,
 1923.
 (Seal) Lewis H. Lemons,
 Notary Public.

Mrs. Dave McLymont spent a
 few days of last week in Del Rio
 visiting friends and relatives.

Mrs. F. S. Garrison and son,
 Fred left last week for Del Rio
 to visit friends and relatives.
 While in Del Rio Fred will have
 a tonsillectomy operation per-
 formed on him.

Mr. Ralph Seal came in the
 latter part of last week from Spur,
 Texas and relieved W. A. Seale,
 as the local Western Union man-
 ager.

Mrs. J. C. Green spent a few
 days this week in Valentine visit-
 ing home folks.

Come in and look over our
 snappy styles for that new
 Spring suit at the Royal Tailor
 Shop.

**Church News
 of Sanderson**

(This column is devoted to the inter-
 est of our churches and will be
 run each Saturday)

Methodist Sunday School open-
 ed with 33 present, several being
 absent from Bible class. "Come
 we miss you."

The Ladies Aid of the Metho-
 dist church met at the church
 on Wednesday the 18, with Mrs.
 Landers as leader. Opening song
 No. 37. Subject, "Evangelism
 Through Hospitals in Korea."
 A good study was had. Closing
 hymn was No. 95. The next
 meeting on May 2, with Mrs. N.
 Taylor as leader.

Bro. Bledley filed his appoint-
 ment last Sunday, preaching two
 excellent sermons. At the eve-
 ning service two little Junior
 Leaguers sang a duet entitled
 "I Think God Gives the Child-
 ren." Both did well.

Presbyterian Sunday School
 opened last Sunday (15th) with
 72 present. On the 6th there
 were 79 present instead of 71
 as given in last week's paper.
 We certainly do miss those who
 are absent from their classes.

Our Sunday School superin-
 tendent, Mrs. Jack McKee, gave
 out the first books from our
 Sunday School library last Sun-
 day, to be returned in one week
 so others may read. We would
 appreciate the kindness and
 favor if any have books and
 would like to help by giving them
 for the benefit of the Sunday
 School children, from the "little
 tots" up. (Thank you.)

The Ladies Auxiliary of the
 Presbyterian church met at the
 home of Mrs. W. E. Lea, with 14
 present. There was a mission
 study with Mrs. Archie Cochran
 as leader. It was an enjoyable
 and instructive meeting. Sever-
 al completed garments were
 turned in to be sent to our "little
 adopted orphan girl" when all
 are finished.

Next Sunday (22nd) is Bro. A. C.
 Adams appointment. All are
 cordially invited to come.

The Ladies Aid of the Baptist
 church met at the Presbyterian
 church on the 18th. It being
 "work day" all came prepared,
 with scissors, thread, thimbles,
 etc. Quilt scraps were cut and
 put together to furnish quilts for
 the Buckner Orphan Home.
 The next meeting will be at
 Mrs. Eldridge's on the 25th.

The Bible Class was carried
 over from Friday to Monday the
 16th, with Mrs. Strange and
 Mrs. V. Ellis as leaders. It was
 a good meeting with good lesson
 and song service.

FOR SALE.

For Sale—One folding daven-
 port. Call 118 for particulars.

Mr. and Mrs. Hy Laurence
 motored to Fort Stockton Fri-
 day for a few days visit with
 their daughter, Miss Sidney.

Mrs. Max Bogusch and son,
 Jack returned Sunday from a
 visit with friends and relatives at
 Rock Springs and San Antonio.

Forty cars of cattle were ship-
 ped Sunday and sixty cars were
 shipped Tuesday from the Pyle
 ranch at Longfellow to Summit,
 Kansas.

Mrs. J. W. Savage left Satur-
 day for El Paso to visit her
 daughter, Mrs. H. P. Stanton.

**4 TIMES Around the World with ONE OILING
 100,000 Miles Without Stopping for Oil**

An inventor who could develop an automobile, a railroad car or any
 other conveyance on wheels which would perform such a feat would
 be considered a wonder. But such is the record of regular
 accomplishment by the Auto-oiled Aermotor during the past
 eight years in pumping water.
 Did you ever stop to think how many revolutions the wheel
 of a windmill makes? If the wheel of an Aermotor should roll along the surface
 of the ground at the same speed that it makes when pumping water it would
 travel on an average 2 1/2 miles per day or about 30 miles per hour for 7 hours each
 day. An automobile which runs on that pace day after day needs a thorough
 oiling at least once a week. Isn't it marvelous, then, that a windmill has been
 made which will run 2 1/2 times as long as the best automobile with one oiling?
 The Auto-oiled Aermotor after 8 full years of service in every
 part of the world has proven its ability to run and give the most reliable service
 with one oiling a year. The double gears and all moving parts, are entirely
 enclosed and flooded with oil all the time. It gives more service with less attention than
 any other piece of machinery on the farm. To get everlasting windmill satisfaction buy the
 Auto-oiled Aermotor, the most efficient windmill that has ever been made.

School Notes

(This department is edited by stu-
 dents of the Sanderson High School.)

The winners in declamation
 and athletics left on No. 109 for
 Alpine yesterday, where they in-
 tended to make a good showing.

Miss Olline Stansell visited
 relatives and friends in San
 Antonio this week.

A holiday was given the school
 Friday which was appreciated
 very much by the pupils, but
 more so by the teachers.

Kangaroo Court will be held
 soon for the purpose of trying
 two girls of the Senior Class.

Miss Swift left Thursday even-
 ing for Floresville for a few days
 visit with home folks.

Miss McKee left Thursday
 evening for Austin to visit her
 sister, Miss Merle McKee.

Friday afternoon of last week
 the school children held an elimi-
 nating contest to decide who
 would go to Alpine for the Inter-
 scholastic meet on April 20th
 and 21. The winners of the
 events were as follows:

TENNIS

Boys doubles, Hays Cavender
 and Minton White; boys singles,
 Malone Mitchell.
 Girls doubles, Nona Bell and
 Lorette Lemons; girls singles,
 Nona Bell.

TRACK EVENTS

Broad jump, Madison Turner.
 High jump, John Ferner.
 12 lb. shot put, John Ferner.
 Disc throwing, Hays Cavender.
 50 yard dash, Charley Harrell.
 100 yard dash, Charley Harrell.
 440 yard dash, Madison Tur-
 ner.
 800 yard dash, Madison Tur-
 ner.
 Mile run, Hays Cavender.
 Mile relay, Hays Cavender, Er-
 vin Grigsby, John Ferner and
 Madison Turner.
 Pie eating contest, Professor
 J. A. White.
 Friday night in the school
 auditorium the declamation con-
 test was held. The following
 were winners:
 Senior boys, Madison Turner;
 Senior girls, Garnet Worcester;
 Junior girls, Grace Lemons, Ju-

RATTLE OF THE RAIL.

Geo. Brown's water service
 gang arrived from Alpine Thurs-
 day.

Engineer R. M. Gillespie came
 down from El Paso Tuesday to
 work on the extra list here.

The wrecking outfit was called
 to Hijo Monday to clear up a
 small derailment.

Fireman P. Anderson has gone
 to El Paso.

T. J. McDaniel has taken a regu-
 lar run on the fireman's board
 out of here.

Boiler Inspector Downum was
 here Tuesday.

Roundhouse Foreman McCon-
 nell made a flying trip to San An-
 tonio Monday night.

Harry Arfman made a short
 visit to Del Rio Wednesday.

Fireman T. B. Moseley has
 taken a work train run at Mc-
 Kee.

Engineer A. V. Boyce has re-
 turned from a trip to Houston
 and has resumed his passenger
 run on the Del Rio division.

Henry Gail and H. Crabtree
 were down from El Paso a trip
 on passenger this week.

MICKIE SAYS--

 PAPER HAS, GUY WE DON'T
 GIVE ONE UP. GOSH-DARN
 FER HIS OPINION!"

**SANDERSON GIRLS
 WIN AT ALPINE**

Just as we were going to
 press a telegram was received
 from Alpine stating that Lorette
 Lemons and Nona Bell won in
 double tennis and Nona Bell won
 in singles. On to Austin for
 Sanderson.

Firestone

**will not increase prices
 until May 1st**

**Firestone Prices on Fabric and Cord Passenger
 Car Tires and Tubes, also Solid and Pneumatic
 Truck Tires Will Advance May 1st**

The postponement of this price revision
 is possible only because of our realization
 of the price danger in the British Crude
 Rubber Restriction Act which became
 effective November 1, 1922. We were
 fortunate in our rubber purchases before
 the Restriction Act increased the price of
 crude rubber 100%.

We have always endeavored to cham-
 pion the cause of better made tires de-
 livered at lowest cost to the tire user by
 economic manufacturing and distribu-
 tion. And we are glad of the opportu-
 nity to give the car-owner the additional
 saving at this time.

Firestone Cords embody certain special
 processes which result in their producing

mileage records, heretofore unheard-of
 in the industry. Among the more im-
 portant of these superior methods are
 blending, tempering, air-bag cure and
 double gum-dipping.

Firestone Dealers are co-operating
 with us in our movement to supply your
 needs at present prices as long as their
 stock lasts and we have advised our
 dealers that we will supply them with
 additional tires this month only so far
 as our output will permit.

See the nearest Firestone Dealer.
 Purchase a set of these Gum-Dipped
 Cords. Prove for yourself their re-
 markable mileage advantages and easy
 riding qualities.

**Small Cars
 and the World's
 Most Popular
 Tire**

The largest factory of its kind
 in the world is devoted solely
 to the production of Goodyear
 Tires, sizes 20x3, 20x3 1/2, and
 20x4. Isn't this immense
 production, day after day, a

positive indication to you of Goodyear's high ability
 and honesty of purpose in building the best Clincher tire on the
 market. THINK IT OVER. These tires, as well as other
 sizes, are here for your inspection. They cost no more than
 ordinary tires. Our helpful tire service will increase your
 mileage. It costs you nothing and saves you money.
