Silk Sox Win From Langtry

One of the best games of base ball ever seen on the local diamond was played here Sunday between the Langtry Lobos and Captain Fred Yates' Silk Sox.

The Langtry team arrived on No. 109 Sunday morning and the game was called promptly at three o'clock by umpire Rufe Stirman. The game opened with Langtry at bat and Sanderson in the field with Ralston on the mound. The Langtry boys proved themselves to be classy players and they also showed good team work, and the Sanderson fans realized early in the game that if the Silk Sox beat the Lobos they would have to play semi-professional baseball. And as though fully realizing this fact themselves every man on the home team settled down to playing a first-class game of ball. With good support behind each of them, both pitchers did yeoman service and the game soon developed into a pitcher's battle. The odds, however, were in favor of Ralston, the twirler for the Silk Sox, and he allowed the Lobos only two hits and struck out eight of their batters. Gray, who twirled for the Langtry team, pitched a remarkable game; he allowed only six hits and struck out eight of the Sanderson players who faced him.

Sanderson made one run in the first inning, after that it was a shut out until the fourth inning when the home team made one more run, thus making the score 2 to 0 in favor of the Silk Sox. It was a shut out from this time on until the eighth inning when Sanderson scored two more runs thus bringing the score up to 4 to 0. At this stage of the game Langtry came to the bat for their last trial. Every man on the Silk Sox team was "on his toes" playing ball, they were determined to make it a shut-out game for Langtry; two men went down, the third man up knocked a little fly right over Ralston who caught it, and then let the ball bounce out of his hands, thus losing the chance of a shut out game. In this last inning the Lobos made two runs, making the final score 4 for the home team and 2 for the visitors.

A large crowd was out to witness the game and there was lots of "rooting" for the home boys. Everyone was well pleased with the game and many expressed themselves as wishing they could see other games here of like character.

Following is the box score, also the score by innings and summary of the game:

BELL-FLETCHER

On Wednesday, August 8th, at 4 p. m. at the Methodist Parsonage in Valentine, Rev. J. W. Slade united in marriage Miss Cecil Fletcher and Mr. John Bell of that city.

Miss Cecil is the daughter of Mr. and Mrs. J. H. Fletcher who formerly resided here, but recently moved to Valentine. Her congeniality and charming ways has won for her a host of friends who wish her success and much happiness.

Mr. Bell is the son of Mrs. W. E. Bell of Valentine, and was formerly in the ranch business there, but is now employed by the G. H. & S. A. Railway Co. as fireman.

The young couple came in last Saturday morning and are now at the home of Mr. and Mrs. Tom Holbeke where they are receiving the congratulations and best wishes of their many friends.

COMMISSIONERS COURT

The Commissioners Court of Terrell county met Monday morning, August 13th, in regular session, with all members of the Court present. Monday's work was devoted to the approving of bids, paying of bills, etc. and Tuesday the Tax Assessor's rolls were gone over and were approved by the Court. The following business was transacted:

Approved County Treasurer's Quarterly report.

Approved the bond of Fred P. Holt, Highway Contractor.

Accepted the bid submitted by Herman Paul for the painting the roof of the Court House.

Ordered that J. E. Landers be employed to turn on the street lights in the evening and to turn them off in the morning.

It was approved by the Court that an election will be held Saturday, September 22nd, 1923, for the purpose of voting for a Stock Law.

Ordered that Court advertise for bids on the purchase of a 10 ton tractor, caterpillar type, Grader with 8, 10 or 12 foot blade, with or without Scarifier.

Court was adjourned Tuesday evening.

Doc Turk and son Charley were in from the ranch Monday, on business. Doc did not intend to stay in town but a little while, however when he got here he found James K. Fulton, county commissioner from the Dryden precinct, and as James K. is not used to being alone in a large town, Doc stayed over to protect the bachelor commissioner from the "flappers" and other dangers of our city.

Gus Collins and family returned the latter part of last week from Lordsburg, New Mexico, where they went several weeks ago. Gus was working in the railway shops there but owing to dull business a lot of men were laid off, Gus among them, so the family returned to Sanderson.

Walter Dunlap, one of Terrell county's prosperous ranchmen, has purchased a new Dodge touring car.

Mrs. P. F. Robertson and sons Frank and Charles visited friends in Rocksprings this week.

NOTICE OF BIDS

THE STATE OF TEXAS,
County of Terrell.

Notice is hereby given that sealed bids will be received by the Commissioners Court of Terrell County, up to 3 o'clock p. m. September 15th, 1923, for the purchase of one Ten Ton Tractor or its equivalent in power of the Caterpillar Type, and one Road Grader with 8, 10 or 12 foot Blade, with or without Scarifier and back sloper (price of each separately should be given) to be used upon the public roads of said county.

Bidders shall be required to bid on conditions of satisfactory demonstration of said Tractor or road machinery in said Terrell county. All bids shall be accompanied by a certified check of 5 per cent of the purchase price; addressed to the County Judge of Terrell county, Sanderson, Texas, and marked, "Sealed Bid."

The Commissioners Court reserves the right to reject any and all bids.

G. J. Henshaw,
County Judge, Terrell County, Texas.

Attest:
Luella Lemons, County Clerk, Terrell County, Texas.

HARDING LAID TO FINAL REST IN HOME TOWN

Marion Funeral Ceremonies for Her Beloved Citizen Are Simple.

IMPOSING CAPITAL SERVICES

Impressive Military and Civilian Procession From White House to Capitol—School Children Strew Flowers—Body Lies in State in Rotunda—Vast Crowds Line Streets and Pay Tribute at Bier.

Marion, O.—Followed by a throng of mourners, the highest in the land and the humble who also had been his friends, the body of Warren G. Harding was taken to the Marion cemetery Friday and placed in the receiving vault.

No imposing ceremony, no military display, no marching of organizations marked the mournful event, because Mrs. Harding wished it so, but as the simple services were being held in the cemetery, in every town and village, every home of the broad land the people of America were paying tribute to the memory of their chief whose life truly was sacrificed in their behalf. Barter and trade, financial business and every other worldly activity that could be suspended ceased for the time, all sports and pastimes were abandoned—the nation mourned.

Great Throngs in Marion.

Here in Marion were gathered a host of prominent persons, from President Coolidge down and including the leading government officials, senators and representatives, governors of the states and delegations from hundreds of cities and organizations. All day Thursday and on Friday morning special trains brought in the throngs, and other thousands of Ohioans came by automobile. So great were the crowds that it was necessary for the state officials to arrange to have the roads for miles around Marion patrolled to prevent accidents.

Thursday morning the funeral train arrived from Washington, and Mr. Harding's body was taken at once to the residence of his father, Dr. George T. Harding. From 2 until 10 p. m. that day and from 9 a. m. until 1 p. m. Friday opportunity was given Ohioans to view the face of their dead friend. Then, quite without pomp, the casket was borne to the cemetery. Following the hearse were the members of the Harding family; next the President of the United States with members of the cabinet and other high officials; then came Mr. Harding's close friends and neighbors, and after them a great concourse of mourners.

Simple Services in Cemetery.

It was Mrs. Harding's wish that all who wished should have a place in the funeral procession. Among those who sadly accepted the invitation were all the employees of the Marion Star who had worked for Mr. Harding for years, and the Ohio newspaper publishers, members of the Associated Ohio Dailies, in which organization Mr. Harding had taken an active part. The Star had suspended publication for the day, and indeed all business activity in Marion ceased throughout Friday. Not as a part of the funeral procession but to preserve order and direct the heavy traffic, 3,000 troopers of the Ohio National Guard were present.

Reaching the cemetery about three o'clock, the cortege proceeded to the receiving vault, and there the brief services were held. Prayers, readings from the Scriptures and the singing of Mr. Harding's favorite hymns—that was all. It was simple and dignified, as was befitting the obscurity of a distinguished citizen of Marion. The services were in charge of Rev. George M. Landis, pastor of Trinity Baptist church, of which Mr. Harding was a member. He was assisted by Rev. Jesse Swank, pastor of the Methodist Episcopal church, Mrs. Harding's pastor.

Troops Guard the Casket.

Instead of being interred in the family plot, the body of Mr. Harding was placed in the receiving vault, and there it will remain until a mausoleum has been erected to receive it. As the weeping family and friends moved away from the vault, National Guard soldiers stepped forward and took their place on guard. In a few days they will be replaced by the guard from the regular army, that will stand around the vault for the regular period of six months. The detail for this purpose will consist of an officer and twenty-five men from Fort Hayes at Columbus.

The presidential party from Washington, which came on a special train Friday morning, started back for the national capital almost immediately after the conclusion of the ceremonies.

Mrs. Harding, who had borne so well her difficult part, also returned to Washington, on the same train that brought her and her dead. It was announced that she would remain in the White House until she has finished the supervision and removal of the effects of the late President. This probably will take about three weeks.

Services at Capital.

Washington.—Warren G. Harding, twenty-ninth president of the United

States of America, most powerful and wealthiest country of the world, received a magnificent tribute Wednesday from official Washington, capital of the nation, preliminary to the final interment of his remains at Marion, O., his home city.

The ceremonies consisted in official transfer in the morning of the body from the White House to the Capitol, where it lay in state until six o'clock in the evening. The American people participated by marching in the funeral procession and by passing by the bier in the rotunda of the Capitol and by lining the funeral route in vast, reverent crowds. Ten thousand school children carpeted with flowers historic Pennsylvania avenue.

The body left the White House, where it had lain during the night, at 10 a. m. Gen. John J. Pershing, general of the United States army and commander of the military escort, led the procession to the Capitol.

Guard of Honor.

Six generals of the army and six admirals of the navy acted as an immediate guard of honor to the caisson bearing the remains.

Seven senators, including President pro tem. Cummins, and seven representatives, including Speaker Gillette of the house, acted with members of the Harding cabinet as honorary pallbearers.

Senator Lodge of Massachusetts, marshal of the civic procession, the clergymen in charge of the services, and the physicians who attended President Harding at his last illness were assigned to places immediately in advance of the caisson.

Chief Justice Taft participated as a former president instead of as head of the Supreme court. Ex-President and Mrs. Wilson were placed behind him.

Procession Makeup.

Behind Mr. Wilson in the procession were placed, successively, ambassadors of foreign governments, associate justices of the Supreme court, foreign ministers and charge d'affaires, senators and officers of the senate, representatives and officers of the house, governors of states and territories and commissioners of the District of Columbia and acting secretaries of the various departments of the federal government.

The following also were included in the official section of the procession:

Circuit Court of Appeals, Court of Claims, Court of Customs Appeals, Court of Appeals and Supreme Court of the District of Columbia, under-secretaries and assistant secretaries of federal departments, assistant postmasters general and assistant marshals general, United States marshal and United States attorney.

The chairman or senior member of the following groups:

Federal Reserve board, Interstate Commerce commission, Civil Service commission, various mixed commissions dealing with international problems and other agencies of the federal government.

Next in line came patriotic and civic organizations, headed by men who have won the Congressional Medal of Honor for heroic deeds in the service of their country by land or sea. They were followed by army officers, led by Assistant Secretary of the Navy Roosevelt.

Next came officers of the coast guard and public health service, headed by the assistant secretary of the treasury and officers of the coast and geodetic survey, under command of the assistant secretary of commerce.

Delegations not to exceed ten persons, representing the following organizations, also were permitted to participate in the civic procession, among others:

American Legion, World War Veterans, Knights Templar (detachment), Knights of Pythias (detachment), American Red Cross, Sons of the Revolution, Daughters of the American Revolution, Colonial Dames, Sons of the American Revolution, Society of the Cincinnati, Sons of Colonial Wars.

The services in the rotunda of the Capitol were as follows:

Invocation, Dr. A. Freeman, assistant pastor of the Calvary Baptist church, of which Mr. Harding was a member.

Hymn, "Lead, Kindly Light," male quartet of Calvary Baptist church.

Scripture: Twenty-third Psalm, Micah, sixth chapter, eighth verse.

Revelation, twenty-second chapter, first to fifth verses.

Quotations.

Prayer, Dr. James Shea Montgomery, chaplain of the house of representatives.

Hymn, "Nearer, My God, to Thee," male quartet.

Benediction, Dr. Anderson.

The body then lay in state and from four to six the general public was admitted.

Beautiful Seattle Dancers in Beautiful Setting

Art is not being neglected in the faraway northwest corner of the United States. The picture shows dancers of the Cornish school, Seattle, Wash., presenting a rhythmic pageant on the sylvan stage of the Beaux Arts esthetic colony on the shore of Lake Washington. The woodland theater is a part of the James S. Ditty landscape garden.

Our Navy Is in Their Hands

With Secretary of the Navy Edwin Denby away from Washington, Assistant Secretary Roosevelt, left, and Admiral E. W. Eberle, right, are guiding the affairs of the Navy department. Admiral Eberle recently succeeded Admiral Coots as chief of naval operations.

"Flying Miner" and His Airplane

Edmond Enriquez, the "flying miner" of Gates, a mining town of Pennsylvania, does all his traveling in his own airplane—a new Sopwith camel. Enriquez is an Englishman, but has lived here for the past year, was a member of the royal flying corps during the war. The Sopwith represents some \$1,500 of his hard-earned money.

Paris Receives the Bey of Tunis

The bey of Tunis has been paying an official visit to Paris, where he was received by President Millerand and was accorded full military honors. In the photograph he is seen (left) riding with the resident general for France in Tunisia, M. Lucien Salot.

MEXICO TO FINANCE ORIENT EXTENSION

Head of System Has Conference with Obregon and Obtains Aid.

San Angelo, Tex.—The Mexican government will finance and extend the Kansas City, Mexico & Orient Railroad from Palomir, in that state, across the Concho River to within 20 miles of Presidio, Tex., thereby making restitution in part for the damage done Orient properties in Mexico during the years of revolution.

This was announced in San Angelo this week by C. W. Kemper, of Kansas City, receiver for the Kansas-Oklahoma division of the Orient and president of the Texas system, en route home from Mexico City, where he obtained aid in conferences with President Alvaro Obregon.

Extension northeastward of the Orient in Mexico will shorten to less than 100 miles the 161-mile gap between Alpine and the line in Chihuahua, the principal bar of fulfillment of the dream of Arthur E. Stillwell for a great transcontinental trunk line with a low grade and 300 miles shorter than any other.

The grade and bridges already built on the new extension toward the Rio Grande and the money advanced by Mexico will be used for laying steel and doing a small amount of work on the fill. Mr. Kemper said. With the Conchos crossed, a highly productive valley will be made available for agricultural development. Its products can then be shipped over the Orient to Chihuahua City and on to Mexico City and the increased revenues will hasten the day when the line can be constructed south from Alpine, the present terminus, through Presidio County, across the Rio Grande and to a connection with the road from Palomir.

The only gap remaining to be closed to complete the transcontinental line will be between Sanchez, the present western terminus of the Chihuahua division, and Fuerte, across the Sierra Madre Mountains, the present eastern terminus of the branch out of Topolobampo, the Pacific coast port, and the Orient's greatest goal. The distance from Sanchez to Fuerte is 205 miles. Aid of the Mexican government later in building this line may be obtained.

"The problem for the Orient management now is to meet operating expenses on its line in the United States," said Mr. Kemper. "We've got to cut out expense at every possible point and get every pound of freight we can from every town along the line. If we can ever get our heads out of the water we will see this dream come true."

"I am better impressed with Mexico every time I go there," Mr. Kemper continued. "Since attending the inauguration of President Obregon in December, 1920, I have a trip to the republic every few months. Everyone has always been aware of the great natural resources of Mexico, but some have been doubtful if these resources could be capitalized and brought into world commerce because of the unfortunate rule of the country."

"President Obregon is deeply interested in the Orient. He realizes what its completion will mean to Mexico. He is helping us from the federal treasury, liberally, in proportion to the funds he has available."

Mr. Kemper promised that when the Orient attains completion, as projected, towns along it will be well paid for their loyalty to the road and all citizens who have considered the Orient a community enterprise will be rewarded for the efforts they have expended in its behalf. San Angelo, the largest city between Wichita, Kan., and Chihuahua City, Mexico, will benefit immeasurably, he declared.

Nominated Three Years Ago.

Marion, Ohio.—Last rites over the body of President Harding Friday lacked one day of being exactly three years since he first left his home in Marion as the presidential nominee of his party. His first speech away from the famous porch here was delivered at Worthington, Ohio, a small village between Marion and Columbus. In that first address away from home, he made a plea for "greater understanding."

Stop Broom Corn.

Washington.—To prevent spread of the European corn borer, amendment of the federal horticultural board quarantine regulations, announced Friday and effective September 1, forbids importation of broom corn through any ports except Boston throughout the year and New York during the four months, November to February.

Fort Worth Stock Market.

Fort Worth, Tex.—Based on the sale of a string of fed steers at \$7.25 to \$7.50 the fat cattle trade was 25c lower Friday. Common to medium steers were unchanged, and butcher stock was steady. The calf market was slow, but such sales as were made, were steady. Receipts were 1,800 head of cattle and 500 calves. Heavy steers sold at a range of \$7 to \$7.50 good cattle \$5.75 to \$6.75 and fair to medium steers, \$3.35 to \$4.50. Canner cows sold around \$1.50 to \$1.75. Less than a car of fat cows brought \$4.

St. Louis smoker moves into second place

With 405 cans to his credit Mr. Thurston smokes his way towards the lead

Mr. Byron Thurston of St. Louis is more than qualified for membership in the Edgeworth Club. But his position in the championship-smoker class is not so well established. Mr. Thurston's interesting letter follows:

Hotel Garret, St. Louis, Mo. Larus & Brother Company, Richmond, Va. Gentlemen: I have smoked 405 cans of Edgeworth Plug Slice size without changing. Now if you know of any better record I would be glad to hear from you. I smoke one can of tobacco in two days and enjoy every pipetful.

Yours truly (Signed) Byron Thurston.

More than a year ago an Edgeworth smoker from Burlington, Vermont, Mr. H. F. Baldwin, wrote in suggesting that he had smoked more Edgeworth than any other living man. At that time he had smoked over 1,000 cans of the same size purchased by Mr. Thurston, distributed over a period of nearly a score of years.

So while it appears today that Mr. Thurston is well behind the leader, if he continues smoking a can every two days, it may be only a matter of years before he will be well in advance of the entire field.

Still, it is a big country and there are a lot of Edgeworth smokers. You can never tell when a new record will be hung up to be the envy of all smokers.

Edgeworth has something about it that holds smokers. Not that everyone likes Edgeworth, but those who do generally remain steadfast in their loyalty to the tobacco year after year.

If you have never tried Edgeworth, Larus & Brother Company will be glad to send you free samples of both Edgeworth Plug Slice and Ready-Rubbed.

Then you can smoke a few pipefuls and judge for yourself whether or not the tobacco is as good as a great many veteran pipe smokers claim it is.

Just drop a postcard to Larus & Brother Company, 67 South 21st Street, Richmond, Va., and the free samples will be forwarded to you promptly.

If you will also include the name and address of your regular tobacco dealer, your courtesy will be appreciated.

Edgeworth is sold in various sizes to suit the needs and means of all purchasers. Both Edgeworth Plug Slice and Ready-Rubbed come in small, pocket-size packages, in attractive tin humidor and in handy in-between sizes.

To Retail Tobacco Merchants: If your jobber cannot supply you with Edgeworth, Larus & Brother Company will gladly send you prepaid by parcel post a one- or two-dozen carton of any size of Plug Slice or Ready-Rubbed for the same price you would pay the jobber.

Drab Life.

Harold Bell Wright, the successful novelist, was defending, at a dinner in New York, the idealistic as contrasted with the realistic school of fiction.

"Let us have idealism and romance in our books," he said. "It is the only place where jolly things are to be found, you know. Life itself is drab and ugly and uneventful."

Mr. Wright laughed, then added: "In life nothing ever comes off except buttons."

BABIES CRY FOR "CASTORIA"

Prepared Especially for Infants and Children of All Ages

Mother! Fletcher's Castoria has been in use for over 30 years as a pleasant, harmless substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups. Contains no narcotics. Proven directions are on each package. Physicians recommend it. The genuine bears signature of

Chas. H. Fletcher

Won't Change Woman's Dress. Scientists—Some day the earth will become so cold that man will not be able to live upon it. Fozzleton—Yes, but I suppose the women will go on dressing just about the same as they do now.—New Bedford Evening Standard.

Usually, when a philosopher praises science he is thinking how good it is for him.

Cuticura Talcum is Fragrant and Very Healthful

Keep It, Obtain It and Use It, Tolson, Ill.

LAD RUNS RESTAURANT

Leo Braverman of New York, twelve years old and a pupil of public school 106, spends his vacation managing a restaurant at 447 Seventh avenue. Leo, who has an average of 95 per cent in his school work, finds no trouble in giving 100 per cent service to the patrons of his restaurant, and those who work under him proclaim him a good boss.

HER CROWNING GLORY

Miss Lillian Stewart of Chicago is said to have the most beautiful hair in the world. Experts who have examined her hair declare that while it is not the longest, it is of a very fine texture and the heaviest they have ever dressed.

NEW ROOSEVELT STATUE

What is said to be the best statue of Theodore Roosevelt is the one done by Bryant Baker of Boston, Mass. Mr. Baker is an Englishman, but has lived here for some time. He is shown above, beside the finished statue.

Wasps and Birds Alike. Nature photographers know birds are easiest to approach and photograph at their nests, and so it is with wasps, says Nature Magazine. In addition they are not unlike birds in that they may be attracted by putting up proper houses for them.

The Secret Adversary

By AGATHA CHRISTIE

(Copyright Dodd, Mead & Company)

WHO IS MR. BROWN?

SYNOPSIS—Realizing that she has a possible chance of being saved, as the Lusitania is sinking, a stranger gives a young American girl a package which he asks her to deliver to the American ambassador in England. She is saved. In London, former Lieut. "Tommy" Beresford and Miss Prudence Cowley—Tuppence—discharged army nurse, form an organization, "The Young Adventurers, Ltd." They are both broke and consequently ready for unorthodox methods. They write out an advertisement. Tuppence makes a business appointment with a man, Edward Whittington, who offers her easy employment, but on giving her name as "Jane Finn," which she had heard on the street, Whittington disappears. In answer to an advertisement signed "Jane Finn" the two receive notes from "Mr. Carter" and "Julius P. Hershellmer." Carter, a high government official, speaks of a mysterious "Mr. Brown" as head of the Hershellmers in England, and engages the pair to find Jane Finn, whom he is seeking for important reasons of state. Next day the pair visits Hershellmer, American millionaire. He is looking for his cousin, Jane Finn, who had disappeared after landing from the Lusitania's boats, and employs them to search for her. They discover a Mrs. Vandemeyer is a Lusitania survivor. Tuppence recognizes Whittington in a caller on Mrs. Vandemeyer. Tommy trails him. Whittington leaves for France. Hershellmer follows him. Tommy trails Boris, Whittington's companion, to a house in Soho. He overhears details of a Bolshevik and labor plot to overturn the government. Success apparently depends on finding a secret treaty made between the allies during the war. Tommy is caught listening and knocked senseless. Sensing sinister relations between Whittington and Mrs. Vandemeyer, Tuppence disguises herself and becomes a parlor maid. During a conversation between a visitor, "Boris," and Mrs. Vandemeyer, in which the name of Sir James Peel Edgerton, famous criminal lawyer, is mentioned, Tuppence hears talk of an "ornamentation." Next day Edgerton visits Mrs. Vandemeyer, and an leaving advises Tuppence to give up her position, but refuses to give a reason. On her "day off" Tuppence goes to see Hershellmer, who has discovered nothing of importance in France. Tommy's continued absence worries Tuppence. They visit Edgerton and tell him the whole story. He promises to assist her, making an engagement to visit her that evening at the Vandemeyer home. Returning to the parlor, Tuppence finds she has been discovered. Mrs. Vandemeyer tries to make her drink poison.

CHAPTER VII—Continued.

"Then I shan't drink it," said Tuppence firmly. "I'd much rather be shot. At any rate, that would make a row, and someone might hear it. But I won't be killed off quietly like a lamb."

"Don't be a little fool! Do you really think I want a hue and cry for murder out after me? It's a sleeping draft, that's all. You'll wake up tomorrow morning none the worse. I simply don't want the bother of tying you up and gagging you, the alternative—and you won't like it. I can tell you! I can be very rough if I choose. So drink this down like a good girl, and you'll be none the worse for it."

In her heart of hearts Tuppence believed her. The arguments she had adduced rang true. It was a simple and effective method of getting her out of the way for the time being. Nevertheless, the girl did not take kindly to the idea of being tamely put to sleep without as much as one bid for freedom. She felt that once Mrs. Vandemeyer gave them the slip, the last hope of finding Tommy would be gone.

Tuppence was quick in her mental processes. All these reflections passed through her mind in a flash, and she saw where a chance, a very problematical chance, lay, and she determined to risk all in one supreme effort.

Accordingly, she lurched suddenly off the bed and fell on her knees before Mrs. Vandemeyer, clutching her skirts frantically.

"I don't believe it," she moaned. "It's poison—I know it's poison. Oh, don't make me drink it—her voice rose to a shriek—"don't make me drink it!"

Mrs. Vandemeyer, glass in hand, looked down with a curling lip at this sudden collapse.

"Get up, you little idiot! Don't go on drizzling there. How you ever had the nerve to play your part as you did I can't think." She stamped her foot. "Get up, I say."

But Tuppence continued to cling and sob, interjecting her sobs with incoherent appeals for mercy. Every minute gained was to the good. Moreover, as she grovelled, she moved imperceptibly nearer to her objective.

Mrs. Vandemeyer gave a sharp impatient exclamation, and jerked the girl to her knees.

"Drink it at once!" Imperiously she pressed the glass to the girl's lips.

Tuppence gave one last despairing gasp.

"I Don't Believe It, She Moaned; 'It's Poison.'" data-bbox="180 675 290 685"/>

"I don't believe it," she moaned; "it's poison." She moaned; "it's poison."

"Money—"

Mrs. Vandemeyer started. Clearly, the reply was unexpected.

"What do you mean?"

"I'll tell you. You said just now that you had a long memory. A long memory isn't half as useful as a long purse! Revenge is very unsatisfactory. Every one always says so. But money—well, there's nothing unsatisfactory about money, is there?"

"Do you think," said Mrs. Vandemeyer scornfully, "that I am the kind of woman to sell my friends?"

"Yes," said Tuppence promptly. "If the price was big enough, I should suggest—a hundred thousand pounds."

Her economical spirit did not permit her to mention the whole million dollars suggested by Julius.

A flash crept over Mrs. Vandemeyer's face.

"What did you say?" she asked, her fingers playing nervously with a brooch on her breast. In that moment Tuppence knew that the fish was hooked.

"A hundred thousand pounds," repeated Tuppence.

The light died out of Mrs. Vandemeyer's eyes. She leaned back in her chair.

"Bah!" she said. "You haven't got it."

"No," admitted Tuppence. "I haven't—but I know some one who has."

"Must be a millionaire," remarked Mrs. Vandemeyer unbelievably.

"As a matter of fact, he is. He's an American. He'll pay you that without a murmur. You can take it from me that it's a perfectly genuine proposition."

Mrs. Vandemeyer sat up again.

"I'm inclined to believe you," she said slowly. "What does he want to know, this friend of yours?"

Tuppence went through a momentary struggle, but it was Julius' money, and his interests must come first.

"He wants to know where Jane Finn is," she said boldly.

Mrs. Vandemeyer showed no surprise. "I'm not sure where she is at the present moment," she replied.

"But you could find out?"

"Oh, yes," returned Mrs. Vandemeyer carelessly. "There would be no difficulty about that."

"Then—Tuppence's voice shook a little—"there's a boy, a friend of mine, I'm afraid something's happened to him, through your pal Boris."

"What's his name?"

"Tommy Beresford."

"Never heard of him. But I'll ask Boris. He'll tell me anything he knows."

"Thank you. There's one thing more."

"Well?"

Tuppence leaned forward and lowered her voice.

"Who is Mr. Brown?"

Her quick eyes saw the sudden pallor of the beautiful face. With an effort Mrs. Vandemeyer pulled herself together and tried to resume her former manner. But the attempt was a mere parody.

She shrugged her shoulders.

"You can't have learnt much about us if you don't know that nobody knows who Mr. Brown is."

"You do," said Tuppence quietly.

Again the cold deserted the other's face.

"What makes you think that?"

"I don't know," said the girl truthfully. "But I'm sure."

Mrs. Vandemeyer stared in front of her for a long time.

"Yes," she said hoarsely, at last. "I know. I was beautiful, you see—very beautiful—"

"You are still," said Tuppence with admiration.

Mrs. Vandemeyer shook her head. "Not beautiful enough," she said in a soft dangerous voice. "Not—beautiful—enough! And sometimes, lately, I've been afraid. . . . It's dangerous to know too much!" She leaned forward across the table. "Swear that my name shan't be brought into it—that no one shall ever know."

"I swear it. And, once he's caught, you'll be out of danger."

A terrified look swept across Mrs. Vandemeyer's face.

"Shall I? Shall I ever be?" She clutched Tuppence's arm. "You're sure about the money?"

"Quite sure."

"When shall I have it? There must be no delay."

"This friend of mine will be here presently. He may have to send cables, or something like that. But there won't be any delay—he's a terrific hustler."

A resolute look settled on Mrs. Vandemeyer's face.

"I'll do it. It's a great sum of money, and besides—she gave a curious smile—"it is not—wise to throw over a woman like me!"

For a moment or two, she remained smiling, and lightly tapping her fingers on the table. Suddenly she started, and her face blanched.

"What was that?"

"I heard nothing."

Mrs. Vandemeyer gazed round her fearfully.

"If there should be some one listening, I tell you I'm frightened. You don't know him?"

"Think of the hundred thousand pounds," said Tuppence soothingly.

Mrs. Vandemeyer passed her tongue over her dried lips.

"You don't know him," she reiterated hoarsely. "He's—ah!"

With a shriek of terror she sprang to her feet. Her outstretched hand pointed over Tuppence's head. Then she swayed to the ground in a dead faint.

Tuppence looked round to see what had startled her.

In the doorway were Sir James Peel Edgerton and Julius Hershellmer.

CHAPTER VIII

The Vigil.

Sir James brushed past Julius and hurriedly bent over the fallen woman.

"Heart," he said sharply. "Seeing us so suddenly must have given her a shock. Brandy—and quickly, or she'll slip through our fingers."

Julius hurried to the washstand.

"Not there," said Tuppence over her shoulder. "In the tantalus in the dining room. Second door down the passage."

Between them Sir James and Tuppence lifted Mrs. Vandemeyer and carried her to the bed. The lawyer fingered her pulse.

"Touch and go," he muttered. "I wish that young fellow would hurry up with the brandy."

At that moment Julius re-entered the room, carrying a glass half full of the spirit which he handed to Sir James. While Tuppence lifted her head the lawyer tried to force a little of the spirit between her closed lips. Finally the woman opened her eyes feebly. Tuppence held the glass to her lips.

"Drink this."

Mrs. Vandemeyer complied. The brandy brought the color back to her white cheeks, and revived her in a marvelous fashion. She tried to sit up—then fell back with a groan, her hand to her side.

"It's my heart," she whispered. "I mustn't talk."

She lay back with closed eyes.

Sir James kept his finger on her wrist a minute longer, then withdrew it with a nod.

"She'll do now."

All three moved away, and stood together talking in low voices. One and all were conscious of a certain feeling of antipathy. Clearly any scheme for cross-questioning the lady was out of the question for the moment. For the time being they were baffled, and could do nothing.

Tuppence related how Mrs. Vandemeyer had declared herself willing to disclose the identity of Mr. Brown, and how she had consented to discover and reveal to them the whereabouts of Jane Finn.

"Well," said Tuppence, with an attempt at cheerfulness, "we must wait, that's all. But I don't think we ought to leave the flat."

"What about leaving that bright boy of yours on guard?"

"Albert? And suppose she came round again and looked it. Albert couldn't stop her. She seemed very frightened of Mr. Brown. Said even walls had ears."

"Miss Tuppence is right," said Sir James quietly. "We must not leave the flat—if only for Mrs. Vandemeyer's sake."

Julius stared at him.

"You think he'd get after her? Between now and tomorrow morning. How could he know, even?"

"We have a very formidable adversary, I believe, if we exercise all due care, that there is a very good chance of his being delivered into our hands. But we must neglect no precaution. We have an important witness, but she must be safeguarded. I would suggest that Miss Tuppence should go to bed, and that you and I, Mr. Hershellmer, should share the vigil."

Tuppence was about to protest, but happening to glance at the bed she saw Mrs. Vandemeyer, her eyes half-open, with such an expression of mingled fear and malice on her face that it quite froze her words on her lips.

For a moment she wondered whether the faint and the heart attack had been a gigantic sham, but remembering the deadly pallor she could hardly credit the supposition. As she looked the expression disappeared as by magic, and Mrs. Vandemeyer lay inert and motionless as before. For a moment the girl fancied she must have dreamt it. But she determined nevertheless to be on the alert.

She hesitated a moment by the bed. The intensity of the expression she had surprised had impressed her powerfully. Mrs. Vandemeyer lifted her lids. She seemed to be struggling to speak. Tuppence bent over her.

"Don't—leave—" she seemed unable to proceed, murmuring something that sounded like "sleepy."

Tuppence bent lower still. It was only a breath.

"Mr.—Brown—" The voice stopped. But the half-closed eyes seemed still to send an agonized message.

Moved by a sudden impulse, the girl said quickly:

"I shan't leave the flat. I shall sit up all night."

A flash of relief showed before the lid descended once more. Apparently Mrs. Vandemeyer slept. But her words had awakened a new uneasiness in Tuppence. What had she meant by that low murmur, "Mr. Brown"? Tuppence caught herself nervously looking over her shoulder. The big wardrobe opened up in a sinister fashion before her eyes. Plenty of room for a man to hide in that.

Half-ashamed of herself, Tuppence pulled it open and looked inside. No one—of course! She stooped down and looked under the bed. There was no other possible hiding place.

"I know Mr. Brown's somewhere in the flat."

(TO BE CONTINUED.)

Make Homes in Clay Huts.

The native of Kirdi-Massa, on the west coast of Africa, builds his home of a stiff clay much like the adobe used by Mexicans and Indians, says Popular Science Monthly. This is poured over a framework of slender wooden poles used as reinforcements, and allowed to dry in the sun. The design is worked on with a crude trowel-like tool while the mud is moist. The houses look like huge ant-hills, with only an inadequate opening for a door in the side and a small round chimney hole at the top to admit light and air. The design on the outside is often elaborate and worked out with the greatest pains, for it serves to identify the owner of the hut, and is virtually "copyrighted" by him.

Swiftest River.

The Amazon can lay claim to being the largest river in the world, but the swiftest flowing is the Sutlej, in India, which rises 15,200 feet above the sea and falls 12,000 feet in 150 miles.

MANY THINGS TO AVOID WITH CAR

Careless Driver Will Often Neglect to Lubricate Various Parts of Mechanism.

(By ERWIN GREER, President Greer College of Automotive Engineering.)

Don't—

Try to start the engine with switch turned off or without gasoline in the tank.

Forget that using the starter a certain number of times will exhaust the supply of current in the battery, unless the engine is run sufficiently to recharge it.

Fill the lubricator in the engine and neglect to lubricate all other parts of the car.

Neglect the lubrication of any part of the car.

Advance the spark when starting the engine.

Allow the clutch to engage suddenly.

Apply the brakes suddenly when it isn't all necessary.

Push in the starting button when the engine is running.

Blame the starter when the engine doesn't start, without looking into the gasoline tank.

Neglect to inspect battery.

Neglect to inspect the level of the acid in the storage battery, even after two or three weeks have gone by, and overlook a supply of distilled water needed.

Shift from third to second or first gear when the car is running at a high speed.

Shift reverse gear when the car is moving ahead.

Neglect to investigate any unusual sound which may develop in the car.

Drive fast and attempt to stop suddenly on a wet pavement.

Overlook keeping the tires properly inflated.

Release the clutch when the throttle is open very wide.

Benignly allow every Tom, Dick and Harry to drive the car, without admonition or chiding.

Use the starter to run the car, even while understanding that excessive overload on the battery is very injurious.

Allow our car to stand in puddles of oil or water, while perfectly aware that neither one is good for our tires.

Overlook the fact that gas, engine and other mechanical parts of a car should be kept clean.

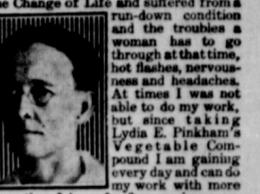

Turn corners too fast, liking to be

WOMEN FROM FORTY TO FIFTY

Will Be Interested in Mrs. Hooker's Recovery by Use of Lydia E. Pinkham's Vegetable Compound

St. Paul, Minn.—"I was going through the Change of Life and suffered from a run-down condition and the troubles a woman has to go through at that time, hot flashes, nervousness and headaches. At times I was not able to do my work, but since taking Lydia E. Pinkham's Vegetable Compound I am gaining every day and can go my work with more ease than I have for five or six years. I owe it all to your great medicine."—MARTHA HOOKER, 114 College Avenue, St. Paul, Minn.

When women who are between the ages of forty-five and fifty-five are beset with such annoying symptoms as nervousness, irritability, melancholia and heat flashes, which produce headaches, dizziness, or a sense of suffocation, they should take Lydia E. Pinkham's Vegetable Compound. It is especially adapted to help women through this crisis. It is prepared from roots and herbs and contains no harmful drugs or narcotics. Write to Lydia E. Pinkham Medicine Co., Lynn, Massachusetts, for a free copy of Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women."

Mrs. Hooker's Recovery by Use of Lydia E. Pinkham's Vegetable Compound

AUTOISTS OVERLOOK OILING VITAL SPOTS

Lubrication of Chassis Is Too Often Neglected.

The modern motorist by this time has become, as a rule, well educated in the care of his car, save in the single respect of attending to the lubrication of the chassis. The average motorist has learned, perhaps, by the experience of paying \$40 or \$50 for a new battery, that it pays to attend regularly to its filling and testing.

He has learned, perhaps, through paying for new bearings for his motor that it pays to keep plenty of oil in his crank case.

But it is the average motorist who does not realize the importance of chassis lubrication, because he never has realized sharply just what his neglect in this respect costs him.

He is more apt, very humanly, to blame it upon the maker of the car, and tells his friends that his car has not "stood up" the way it should. If there were some way of making the motorist realize that it is nothing more or less than his own neglect of chassis lubrication that has been the cause of most of his troubles it would go a long way toward prolonging the life and the satisfactory service of most motor cars.

COMFORTS OF HOME RUN ON WHEELS

All the comforts and conveniences of home are included in "Beau-Camp," the palatial automobile in which George W. Beauchamp, a retired Chicago business man, arrived at the Potomac Tourists' camp, Washington. With the owner and builder of the house are Mrs. Beauchamp, their daughter and son-in-law, Mr. and Mrs. Edward Cavert, a pet dog. The party is making a cross-country tour. An icebox and a stove are the features of the kitchen conveniences.

DEVICE TO PREVENT THEFT COTTON TAPE IS BEST COVER

License Number and Make of Car Cannot Be Changed Without Attracting Attention.

The Scientific American illustrates and describes an automobile attachment, invented by P. J. Rideout of Silver City, N. M., as follows:

The object of this invention is to provide for automobiles an attachment that will show to the public and police the make of the car and the license number of the same, both being inter-related in such a manner that neither can be changed without breaking or affecting the other, and being so connected with the parking and tail lights that the removal of the device will turn out both lights, thereby attracting the attention of the police.

Odorous Exhaust.

When the carburetor is working perfectly, the exhaust gas is colorless and almost entirely odorless.

Automobile Stealing Made More Hazardous.

Makes Most Satisfactory Repair in Binding Up Break in Electric Insulation.

Electric tape is not the best material with which to patch leaky insulation on the high tension wires, as it is loosened by oil getting on it. This is because oil dissolves the rubber compound which makes it stick. Use ordinary cotton tape to bind up the break in the insulation, and afterward apply shellac liberally. This does not look so well, but makes a more satisfactory repair.

AUTOMOBILE NEWS

Before the leather upholstery becomes brown and shabby, it should be washed with soap and water and, when dry, given a treatment with leather dressing.

A "periscope" automobile danger signal, which warns motorists of the approach at night of cars or trucks around a curve or corner, is now used in Ohio.

After the water has been drained out of the cooling system the engine should be run for a few minutes thoroughly to evaporate all moisture remaining.

Don't make the mistake of taking it for granted that it makes little difference whether or not a cap is used on the tire valve and when a cap is lost use the tire without one.

MOTHER! GIVE SICK CHILD "CALIFORNIA FIG SYRUP"

Harmless Laxative for a Bilious Constipated Baby or Child.

Constipated, bilious, feverish, or sick, colic babies and children love to take genuine "California Fig Syrup." No other laxative regulates the tender little bowels so nicely. It sweetens the stomach and starts the liver and bowels acting without griping. Contains no narcotics or soothing drugs. Say "California" to your druggist and avoid counterfeits! Insist upon genuine "California Fig Syrup" which contains directions.—Advertisement.

Size Did Not Matter.

The doctor on his round of golf was crossing the field with his small negro caddy, when the latter opened the conversation with, "Doctor, ain't you got some shoes up yonder in yo' locker you don't want. I needs some bad."

"Maybe so," said the doctor. "What size do you wear?"

"I dunno, sah, 'cause I ain't never bought none date-way—I either kin git in 'em or I can't."—Life.

BEGIN TONIGHT

Cleansing your system of poisonous waste, bile and undigested particles. Start the liver, clean out the bowels and avoid summer complaints. One DOAN'S LIVER PILL at bedtime will do this in a mild and efficient manner. Only 25c.—Advertisement.

Misconstrued.

"Say, old chap, will you let me have your check for a hundred dollars?"

"Certainly. Where's the hundred?"

It takes money to start a business, but it will stop without any.

Is Your Work Hard?

Is your work wearing you out? Are you tortured with throbbing back-ache—feel tired, weak and discouraged? Then look to your kidneys! Many occupations tend to weaken the kidneys. Constant backache, headaches, dizziness and rheumatic pains are the natural result. You suffer annoying bladder irregularities; feel nervous, irritable and worn out. Don't wait! Use Doan's Kidney Pills. Workers everywhere recommend Doan's. They should help you, too. Ask your neighbor!

A Texas Case

A. V. Dye, carpenter, Merkel, Tex., says: "Pains in my back were severe and nights I had to get up often. The kidney secretions passed too frequently." He used Doan's Kidney Pills and was entirely cured of kidney trouble. I haven't had the slightest return of that complaint. I recommend Doan's to everyone suffering from kidney complaint."

Get Doan's at Any Store, 50c a Box

DOAN'S KIDNEY PILLS
FOSTER-MILBURN CO., BUFFALO, N. Y.

EYES HURT?

Don't ignore the danger signals of itching eyes, red lids, smarting, watering, or burning. Use Doan's Eye Salve restores irritations, redness, itching, and burning. Get Doan's Eye Salve at any store.

Change in Relation of Woman to the Social and Political Organization

By PRESIDENT HARDING, in Helena Address.

THEN came the war, and all at once even the most dubious among us realized that the women, everywhere, constituted the first line of industrial reserves upon which society must fall back in its great crisis.

Rather, we must recognize that no other influence can possibly be substituted for that of motherhood; and we must make it possible for the mothers to co-operate with these social institutions of the new order.

Nations Must Depart From Selfish Individualism and Inhuman Isolation

CHRISTIAN CITIZENSHIP CONFERENCE Address to World Rulers.

The nations of the world must depart from selfish individualism and inhuman isolation. They should unite in creating new standards which are based upon the teachings of Jesus.

It should be recognized that nations are accountable to the same Christian principles as those which pertain to all Christian men and women as individuals.

We believe that the divine right of sovereignty and civil authority is vested in the nation, and that the nation is an intelligent moral entity which God holds responsible for the use of the sovereignty and authority which He has vested in it.

We believe that God's judgments can be averted only by national obedience to the laws of love and brotherhood and fair play, as taught by Jesus, and that such obedience will bring peace to the world, and a restoration of prosperity and happiness to all the peoples.

We further believe that civil rulers are His ministers as certainly as are the rulers of the church, and that these rulers are directly and immediately responsible to Him for their official conduct.

Supreme Court Cannot Help Becoming Stormy Petrel of Politics

By CHIEF JUSTICE TAFT, Chase Memorial Dedication Address.

During the incumbency of Chief Justice Salmon P. Chase popular feeling was strongly aroused against the court. From time to time, by reason of its jurisdiction, and its proper exercise, the court cannot help becoming the stormy petrel of politics.

More than this, the court's duty to ignore the acts of congress or of the state legislatures, if out of line with the fundamental law of the nation, inevitably throws it as an obstruction across the path of the then majority who have enacted the invalid legislation.

It is convincing evidence of the sound sense of the American people in the long run and their love of civil liberty and its constitutional guaranties, that, in spite of hostility thus frequently engendered, the court has lived with its powers unimpaired until the present day.

Where the Once Limpid Water Broke Into Jeweled Riffles on Rocky Ledges

By DR. JAMES ALEXANDER HENSHALL, in Outlook.

Last summer, in the leafy month of June, I visited a stream in southwestern Ohio that was once a famous black-bass stream and one of my favorite fishing resorts. I had not fretted its surface with feathered lures for nearly forty years.

Floating with the lazy current were patches of greasy scum, and the water was far from clear, though not turbid. Instead of the old-time woody smell of the stream and its banks, there was a decidedly unpleasant odor from the stream and its banks.

Casting my fly never so gently and carefully over likely places, my efforts seemed useless, for the fish were either not there or had lost their old-time eagerness and failed to respond to the most seductive casts.

BOBBY JONES IS WINNER OF OPEN GOLF CHAMPIONSHIP

The golfing genius of the age, Bobby Jones of Atlanta, Ga., has prevailed against the gods of mean luck that have been smirking at him so long. He won the twenty-seventh national open championship from Bobby Cruickshank.

Baseball Notes

The name of Ham Hyatt again appears in the line-up of the Vernon team.

Pitcher Blume, a right hander, has been secured from the New York Nationals by Memphis.

The first baseball league in Australia was organized this year. It consists of eight clubs.

Three of the first four hitters in the National league batting averages are members of the Brooklyn team.

Elmer Belger, veteran pitcher of the Vernon club of the Pacific Coast league, has been unconditionally released.

Art Treffy, Charlotte outfielder, who was sold to Birmingham at the close of last season, is back with Charlotte.

A baseball pessimist says that an observation of no importance is that Pat Ragan has been named captain of the Phillies.

Cy Fried, veteran pitcher of the Eastern league, has been shipped by the New Haven club to Wilson of the Virginia league.

Outfielder Clarence Pitt, who has been hitting close to .400 all season, has been claimed by the Baltimore Orioles on waiver.

Ed Barney, pinch hitter on the Seattle team of the Pacific Baseball league, has been sold to the Galveston club in the Texas league.

Urban Shocker of the St. Louis Browns can beat all in the American league except the Yankees, the team he most desires to humiliate.

Bob Wright, pitching ace of the Toledo American Association club, jumped his contract to go with the Nash club of Kenosha, Wis.

Arthur Sullivan, a product of the independent fields of Greater Boston and mentioned as a big league prospect, has been taken on by Pittsfield for trial.

Jimmy Doyle (Farrington), who has been with Beaumont and Houston for the past three seasons, has been shifted to the Waco team of the Texas association.

The Pittsfield team wasn't in bad enough shape, but bad luck had to be piled on when Howie Baker broke a leg. Baker was the leading hitter on the team.

A mark that probably is a record for shortstops was set by Joe Boley of the Baltimore Orioles when he played two consecutive games without having an assist.

Colgate baseball nine, by reason of successes of exceptional merit including victories over Princeton and Yale, will receive in addition to the 'varsity' letter, gold baseballs.

Jack Hendricks of Indianapolis made a good deal when he put over the swap with Columbus that gave him Bill Burwell, for Bill is pitching mighty good ball for the Hoosiers.

Paul Speraw, third baseman, once with Evansville on option from the St. Louis Browns, then shipped to Mobile, which club still has a technical claim to his services, has been taken on by Peoria.

San Francisco's young pitcher from the Sox, Timothy Patrick Buckley, who has been the subject of much comment because of his interesting personality, has been shipped to Omaha in the Western league for 'seasoning.'

Danny Long, scouting for the Chicago White Sox, is reported as having told Manager Kid Gleason that Paul Strand of the Salt Lake team is just the man needed for the Sox to put them in the American league pennant fight.

Own Wallop Is Fatal

A variation of that rare occurrence in pugilism—the knocking out of a boxer by a blow delivered by himself—was reported from Monroe, La., where Ewell Paul of Lawton, Okla., put himself to sleep.

It was a scheduled 12-round bout with Grady Franklin of Shreveport. The first round had been under way less than two minutes when, breaking out of a clinch, Paul aimed a healthy swing at Franklin. Paul failed to register, lost his balance, and as he fell his chin struck Franklin's knee. The Oklahoman was unconscious when he reached the floor and Referee Kenneth Elliot counted him out.

Versatility of Haney Is Decidedly Unusual

Billy Evans, the umpire, pays this tribute to Haney of Detroit:

"The fact that versatility among infielders is almost a forgotten art makes the play of Fred Haney of Detroit stand out as decidedly unusual. Haney is unquestionably one of the most valuable utility players in either major league. It means considerable for a club to have a player of Haney's type in its lineup.

BASEBALL SHOULD BE FORM OF RECREATION

Game Can Work Serious Injury to Mind of Some Fans.

Baseball, except for those that play it professionally and regard it as their bread and butter, should be merely a form of recreation, a game to go out and watch on an occasional afternoon. It should never be allowed to exclude everything else from one's thoughts, writes William Kirk, in the Baltimore News.

There are thousands of fans, however, that are literally mono-maniacs on the subject of baseball. Nothing else matters. Baseball is their life food. Destroy it and you will destroy them with it.

There is no doubt that an exaggerated idea of the game's importance can work serious injury in a mind that might otherwise have remained normal enough. We have known hundreds of fans that never seemed to give a thought to anything outside of a baseball park, not only during the regular playing season, but the year around!

One naturally wonders how such mental mania can exist, for there is no monetary reward that goes with being a baseball fan.

To this extent baseball is a dangerous thing. It would be hard to estimate the exact amount of damage that

Babe Ruth.

has been done by the game along these lines, unintentional damage, of course, but damage nevertheless. Thousands of young fellows who are at an age when they should be paying serious attention to their own futures are sweating blood and worrying about whether Babe Ruth is going to bang out as many homers this season as he made last year.

Baseball rooters should try to put their pet game in the mental pigeon-hole where it belongs. They should never allow it to hog the whole mental desk.

No game that takes all of a fan's thoughts and mental energy has anything which it can give him in return for the sacrifice.

STATEWIDE INDUSTRIAL SURVEY TEXAS MADE

Dallas, Tex.—Work is under way on the statewide industrial survey of Texas which is being undertaken by Burt C. Blanton, industrial engineer and manager of the industrial department of the Texas chamber of commerce. The survey will include cotton textile mills, cotton gins, cotton seed oil mills and other types of industrial plants.

Data being compiled in the survey includes number of manufacturing plants in Texas, number of employes, total value of products manufactured, payroll of plants and amount of capital invested.

To carry out the work of the survey, approximately 350 local chambers of commerce have been asked to co-operate and furnish information. Each city and town has been requested to inform the state chamber of commerce of industrial and manufacturing plants desired to be located there.

There are approximately 5700 manufacturing plants in Texas at present, Blanton estimates. Increase of this number three times is the goal set by the chamber for the next 10 years.

RECONSTRUCTION IN WAR TORN SECTIONS GOES ON

New York.—Official French figures covering the progress of reconstruction of the war devastated regions of France show that on June 30, 20,900 of the 22,900 factories destroyed had been rebuilt, 590,000 houses out of 741,993 demolished had also been reconstructed, and 7,875,000 acres of land had been restored to cultivation out of 8,250,000 acres ravaged by the German invasion.

According to official statistics of the ministry of the liberated regions received by the Bankers Trust Company, of New York, from its French information service, the population of the above district is now only 400,000 below the prewar population. M. Reibel, head of the ministry, has reported that the French parliament that tax revenue contributed by the restored population amounted in 1922 to approximately 2,600,000,000 francs as compared with 600,000,000 francs in 1919.

The French chamber of deputies has voted a special budget of expenditure during 1923 amounting to 13,314,000,000 francs in furtherance of reconstruction work and other outlays chargeable as recoverable expenses from Germany under the peace treaty.

CUT TO BE MADE IN FEDERAL EXPENDITURES

Washington.—A warning has been issued by the budget bureau that sharp cuts must be made in federal expenditures during the coming months to bring the government's expense for the current fiscal year within three billion dollars. While the July expenditures which were larger than receipts represented a reduction as compared with July a year ago, Director Lord, in a formal statement declared greater reductions must be brought about in carrying out the policy of economy.

The deficit shown by this year's operations for July was regarded by the director as unimportant. The condition, his statement said, was temporary and although likely to continue through August would be corrected in September when the next quarterly payment of income and profits taxes is due.

Income and profits taxes yielded only \$73,000,000 in July and December, Lord said, such an amount could not be taken as representative of receipts from that source since July was not a month in which heavy payments are made.

Tornado Damages Kansas Town.

Scott City, Kan.—Thirty-five persons were injured, three severely, and thousands of dollars' worth of damage was done by a tornado that almost wiped out Leoti, thirty-five miles west of Fort Scott, Sunday. Only one building, a bank, was left standing undamaged in the business district of the city, and nearly all the residences were destroyed, or damaged, to some extent.

Cotton Injured by Leaf Worm.

Moore, Tex.—The leaf worms and boll weevils are doing the cotton much damage. Some farmers are using the boll weevil catcher to get rid of the weevils and are poisoning the cotton to get rid of the leaf worms. The extreme hot weather is also helping to rid the cotton of the worms and weevils.

Kansas Wheat Crop Stumps.

Topeka, Kan.—The Kansas wheat crop has slumped to an average yield of nine bushels per acre and a crop of 79,596,000 bushels, which makes it rank definitely as the second from the smallest in ten years record, according to the monthly crop review issued this week by E. C. Faxton, federal crop statistician for Kansas. In contrast to wheat, Faxton declared, the corn outlook for the state is still bright and promises to be the third largest crop in ten years.

Texas News

Local cotton men have made a complete survey of the cotton in Delta County and report an estimate of 30,000 bales this year. Delta County produced 24,000 in 1922 and 19,000 in 1921.

Cherokee County will hold a fair October 12-13 at Rusk, the county seat. This will be the first fair to be held in the county in several years.

Hundreds of tons of hay have been stored for the winter at Alvin during the last month.

By a vote of 41 to 0, the Miranda City independent school district was created at a special election held last week and a bond issue voted to construct a modern and first class school building.

During the month of July 58,310 cattle were dipped in Austin County, and among this number only one was found infested with fever ticks, according to the report given out by John Q. Oldham, inspector in charge.

With almost every gin in Nueces County running at full blast, picking under way in all fields, and wagons lining highways in every part of the county the result shows a total of 20,590 bales of cotton ginned in the county up to Saturday.

Contracts for supplies for the state eleemosynary institutions were completed recently by the board of control. The contracts let aggregate nearly \$2,000,000. Bids on several articles were rejected as unsatisfactory by the board and will be re-advertised.

Since the beginning of the cotton harvest season at San Benito a total of more than \$45,000 in delinquent flat rate payments has been made to the local irrigation company. It is expected that about \$20,000 additional payments will be made from proceeds of the cotton crop.

A permit to operate in Texas has been granted to the Coltex corporation of Baltimore, Md., capitalized at \$1,000,000, and organized for the purpose of manufacturing carbon black. Texas headquarters are at Parks, Stephens County. Two permits to manufacture carbon black in Stephens County were granted recently by the railroad commission.

Showing a shortage of more than 500,000 bales of cotton, according to the government report, George H. Terrell, commissioner of agriculture in Texas, has issued a report of cotton and corn crops in the state to Aug. 1. On the basis of one-quarter bale to the acre, he estimates the Texas crop at 3,590,000 bales. Corn production is estimated slightly lower than last year's crop.

Charter of the Rio Grande City and Northern Railway company of Rio Grande City has been approved by the attorney general's department and filed with the secretary of state. The company proposes construction of a line from San Fordyce, Hidalgo County, to Rio Grande City, Starr County, thence north to a point on the Texas-Mexican railway in Webb County a total distance of 85 miles. The railway company is incorporated for \$440,000 capital stock.

Twenty-nine persons were killed or injured in Texas on railroad-highway crossings during May, according to reports made to the railroad commission. Nine were killed, of whom seven lost their lives in automobile accidents. The 20 injured persons all figured in automobile accidents. Two pedestrians were killed. There were 15 accidents, resulting in the nine deaths and injury to 20 persons. In the 13 accidents involving automobiles at grade crossings, seven persons were killed and 20 injured or casualties of more than two persons per automobile accident.

At the meeting of the board of directors of the Marshall Chamber of Commerce a resolution was passed requesting the interstate commerce commission to grant a permit to the Marshall Elysian Fields and Southern Railroad to extend its line from Elysian Fields to Lorraine. The Texas railroad commission has granted the request for extension and it is now up to the interstate commission. It is stated that the extension would be a great benefit to Harrison County.

In spite of their strenuous efforts, it begins to look as if the farmers are making a losing fight against the ravages of leafworms which are stripping cotton of foliage on many farms near Cuero. The first worms were killed without very much trouble, but new worms keep hatching out. It feared the entire section will be swept bare of cotton foliage shortly. In the Port Lavaca and Edna sections the fields already are stripped, with little cotton made upon the stalks. The leafworm is doing far greater damage than the boll weevil and all other cotton pests combined.

The \$50,000 life saving station that has been in course of construction at San Benito for some time is practically completed and will be occupied by Captain Wallace Reed in the next two or three weeks. The entire structure is built of reinforced concrete on concrete piles sunk deep into the sand. The piles will be further strengthened by steel braces. The building will contain every feature needed for the comfort and convenience of the coast guard men. The captain will have individual quarters for himself and family.

NATIONAL CAPITAL AFFAIRS

Did German Spies Burn This Elevator?

WASHINGTON.—A demand that the German government produce its official records showing the activities of its spies in the United States during the war is made in a brief filed with the mixed claims commission on behalf of the Kentucky Public Elevator company.

The elevator company is claiming damages of \$1,000,000 for the destruction by incendiary bombs of a wooden elevator with a capacity of 500,000 bushels of grain. It is charged that the elevator was destroyed as a part of the activities of the spies of the German government.

Increased Trade With Latin America

WITH exports to Europe declining as industries of the war-stricken countries get back on their feet, department of commerce officials are impressed with the opportunity of American business men to increase their trade with Latin America.

Increased funds available for the bureau of foreign and domestic commerce of the Department of Commerce have given a new opportunity for expanding the promotion work on behalf of American exporters, which is being done in Central and South America.

Exactly twice as much money is to be available during the fiscal year which has just commenced for promoting commerce with South and Central America as the bureau had for this purpose during the fiscal year 1919-20. The new appropriation for this one purpose is \$200,000. Secretary of Commerce Hoover recommended to the budget bureau an appropriation of \$250,000 for this purpose, but the budget director cut the sum to \$200,000, which met the approval of congress.

Reserve Officers Urge Larger Army

INCREASE of the regular peacetime army of 15,000 officers and 150,000 men in order to permit all-year-round instruction of "civilian components of the army of the United States" was urged in a resolution adopted unanimously by the national council of the Reserve Officers' association in Indianapolis. The resolutions were received by Secretary Weeks and sent to the War department budget committee, which is laboring with next year's estimates.

Uncle Sam Tests Finished Products

THE most complete composite manufacturing plant in the world, where the manufacturing processes of cement, leather, rubber, paper and textiles are duplicated on an experimental scale, is now being operated by Uncle Sam in the bureau of standards. In this plant also tests of the most practical character are made on the finished product during the investigation of the design, fabrication, uses and properties of structural and miscellaneous materials, such as metal, wood and concrete structural shapes, cement, stone, lime, gypsum, etc.

responsibility." Although the United States was not a party to the treaty of Versailles, it is declared that the obligations of Germany under the treaty are pledged to the United States in the treaty of peace approved Oct. 18, 1921, and the agreement of Aug. 19, 1922.

The grain elevator of the Kentucky Public Elevator company was destroyed on Feb. 25, 1917, before the United States entered the war. It is contended that the total destruction of several large grain elevators in various sections of the United States was a part of the plot of German agents to buy up all the grain, or, failing in that, to destroy the available wheat supply in America.

"The scope of the activities of German spies in the United States was very wide," says the brief. "It embraced at least 21 crimes or unfriendly acts committed upon our soil. This work was organized, financed and directed by the official representatives of Germany. As early as July 10, 1914, preliminary instructions were given to 31 men in Berlin who were assigned for duty in the United States for purposes of distributing German propaganda."

There is a marked similarity in reports received from all sections of the state. Brown, McCulloch, Parker, Wichita, Floyd and other counties in West Texas; Ellis, Hill, Navarro, Dallas, Collin, Cooke, Grayson, Fannin, Lamar, Red River, Kaufman and other points in North Texas; McLennan, Bell, Travis and Milam counties in Central Texas; Smith, Miller, Harrison and Nacogdoches counties in East Texas, and many points in South Texas, all report cotton deteriorating for lack of rain.

Other crops have also suffered from the drought, and corn has been cut in many sections and stored for fodder. Paed crops in West Texas are reported to have yielded better on the average than other sections, due to that section receiving timely rains.

The business outlook on the whole is considered optimistic and it is believed conditions this fall will be upon a sounder basis than for the last three years. Merchants visiting Dallas and other markets are reported buying large stocks, and wholesalers report an increased business over last year. It is expected this increase will be extended to all lines of retail business during the autumn and winter.

Activities in other lines are also reported increasing. Building operations are gaining in many cities of the state after the lull of the summer. Oil activities are regarded as satisfactory in consideration of curtailment of production and the closing of refineries in many Southwestern fields because of overproduction.

Business generally has been little affected by the sudden and unexpected death of President Harding, other than a temporary cessation while the nation paid final tribute to its fallen leader. Wall Street and stock markets throughout the country show a steadiness which manifests faith in President Coolidge. All indications are business in Texas and throughout the nation this fall will show a marked improvement over last year.

The resolution also provides for development and maintenance at high efficiency of a plan "which will provide in the event of an emergency" for a selective service system that will insure swift and sure supply of personnel to the armed forces, declared the support of the National Guard to be "essential to the perfection of the national defense" and urge reserve officers to work for "active co-operation and support of the people in support of the National Guard."

For the organized reserves, the national council asked especially that congress provide \$4,000,000 next year to "permit the establishment and maintenance of the efficiency of all units," and endorsed the plan for "unit training" of the reserve as being worked out by the War department.

COTTON CROP SHOWS SOME DEPRECIATION

All Sections of State Affected But Business Prospects Good.

Dallas, Tex.—The outlook for a bumper cotton crop in Texas in one-fourth to one-third less than it was two weeks ago, due to the dry, hot weather which has prevailed without interruption in most sections of the state for the last two months, according to reports.

Many points in different parts of that state report that the cotton in those sections is past relief, but the majority of opinion is that a general rain could yet bring much improvement in most places.

The rain must come soon, however, it is generally agreed, for the hot, dry weather is causing the cotton to open rapidly everywhere and virtually all sections have received their first bale. Cotton picking is well under way in South and Central Texas, and is beginning to increase in other sections of the state.

While farmers and business men are disappointed over the outlook, they are not discouraged, and it is generally believed that the cotton crop in most sections of Texas will be better than last year, especially if a general rain falls within the next week. The lowest estimate placed on the crop in any section of the state is above that of last year.

There is a marked similarity in reports received from all sections of the state. Brown, McCulloch, Parker, Wichita, Floyd and other counties in West Texas; Ellis, Hill, Navarro, Dallas, Collin, Cooke, Grayson, Fannin, Lamar, Red River, Kaufman and other points in North Texas; McLennan, Bell, Travis and Milam counties in Central Texas; Smith, Miller, Harrison and Nacogdoches counties in East Texas, and many points in South Texas, all report cotton deteriorating for lack of rain.

Other crops have also suffered from the drought, and corn has been cut in many sections and stored for fodder. Paed crops in West Texas are reported to have yielded better on the average than other sections, due to that section receiving timely rains.

The business outlook on the whole is considered optimistic and it is believed conditions this fall will be upon a sounder basis than for the last three years. Merchants visiting Dallas and other markets are reported buying large stocks, and wholesalers report an increased business over last year. It is expected this increase will be extended to all lines of retail business during the autumn and winter.

Activities in other lines are also reported increasing. Building operations are gaining in many cities of the state after the lull of the summer. Oil activities are regarded as satisfactory in consideration of curtailment of production and the closing of refineries in many Southwestern fields because of overproduction.

Business generally has been little affected by the sudden and unexpected death of President Harding, other than a temporary cessation while the nation paid final tribute to its fallen leader. Wall Street and stock markets throughout the country show a steadiness which manifests faith in President Coolidge. All indications are business in Texas and throughout the nation this fall will show a marked improvement over last year.

Giant Swordfish Captured.

Brownsville, Tex.—A huge swordfish, said to be the largest ever captured on the Texas coast, has been on exhibition at Point Isabel. Members of the coast guard at Brazos Island saw a fight in progress in the Brazos Pass between a school of sharks and the great swordfish. Though a gallant battle was put up by the sea monster, the sharks drove the swordfish into shallow water, where he was captured by the guardsmen by throwing a rope over the sword, and he was towed to Point Isabel. He measured 18 feet, 2 inches.

Elimination of 12-Hour Day.

New York.—The 12-hour day in the plants of the Carnegie Steel Company, the largest subsidiary of the United States Steel Corporation, will be eliminated on August 16, Elbert H. Gary, chairman of the latter's board of directors, announces. Workers shifted from a 12-hour to an 8-hour day will receive a flat increase of 25 per cent in their hourly pay. It was said at the local office of the steel corporation.

Swims Channel.

Dover, Del.—Henry Sullivan of Lowell, Mass., finished the swim across the English Channel tonight, landing in front of the Calais Casino. His time was twenty-six hours and fifty minutes.

Coolidge Heads Red Cross.

Washington.—President Coolidge Thursday accepted the presidency of the American Red Cross, a position always held by presidents of the United States.

A total of 3,125,000 head of cattle in Texas passed through dipping vats in the battle to exterminate fever ticks during July, according to the report of tick eradication completed Saturday by Dr. Harry Grafke, inspector in charge of Texas for the bureau of animal industry.

Fortune Telling Up-to-Date

By H. IRVING KING

The gypsies came to Hopkinton and James Rogers had his palm read for a silver quarter. James was clerk for Simon Ronger, general store keeper, and expected to be soon taken in as partner.

Also James was in love with Sarah Fellows and she with him. The "gypsy queen" delivered her usual patter. Seeing that James was a blonde she told him he was going to marry a dark-haired girl and warned him against a light-haired girl and a dark-haired man. That night he told Sarah, laughingly, of his interview with the gypsy.

"It's plain you the dark-haired girl," said Sarah. "You were mighty attentive to Clara Mason at the church lawn party, I noticed, and her hair is as black as night."

"Oh, as to that," replied James. "Jasper Dodge would fit in for the black-haired man and he did not seem to mind squandering his money buying you ice cream."

"And the light-haired girl you are to beware of, I suppose, is me—thank you," said Sarah. "That started a lovers' quarrel. Sarah cried herself to sleep that night and James lay awake thinking of what a cold and heartless woman this was."

The next day James took his delivery truck into town to bring out supplies for the store. As he passed through a side street he saw a sign reading, "Madame Cleopatra, Fortunes Told."

"Hang the fortune tellers!" he thought; "that gypsy got me into trouble last night. I wonder if a real city fortune teller—? A few minutes later James was seated across a broad table from Mme. Cleopatra, seeking confirmation or disapproval of the gypsy's warning. Mme. Cleopatra was rather short, very stout, had three chins and a red, round face with sharp, twinkling eyes.

She examined James' palm, gave a noncommittal "Humph," and then taking a pack of cards dealt them face up two or three times, examining them closely as she did so. Cleopatra wore pinned on one side of the corsage a huge bouquet; and every now and then she buried her face in it as if smelling the flowers, or laid her ear crossly upon the blossoms.

"The lines of your palm," said she at length, "are confused; and the cards don't seem to be running well today."

"Suppose I give you a little clairvoyance—'twon't cost you nothin' extra." And leaning back in her chair she closed her eyes, and after two or three deep sighs spoke as follows: "You are from the country. Hopkinton—that's the place. I seem to see you working in—yes, I see—it's a general store. The man you work for is named Si—Simon—yes, Simon Ronger. I seem to see you and him parties before long. And what's this? Gypsies! And one of 'em is telling your fortune. She's all wrong—don't know about the future at all. I see a light-haired girl—you two are in love and you are a-goin' to marry her."

"You've had a quarrel—seems to me 'twas about something the lyn' kypsy said. But that don't amount to nothin'—you'll make up tonight. Don't be jealous of nobody. You've been warned against a dark-haired man. Don't you worry—he ain't a-goin' to cut you out. And whatever you do, son, don't have no more truck with gypsies—they ain't with it. You and the light-haired girl are goin' to be married and goin' to be mighty happy, too."

Opening her eyes, she said in a business-like manner, "Two dollars, please." James, who had listened with wide-eyed wonder as the seeress made her mystic revelations, paid the \$2 cheerfully and made his delivery truck hum as he speeded homeward, cheerful and happy now that the Fates were on his side. For majesty of Egypt went into a back room to drink a cup of tea with a young woman, whom she was taking on as apprentice to the fortune-telling business.

"Why, auntie," cried the young lady, "I listened, as you told me. How do you do it?" "Easy enough, Luella," replied Cleopatra. "I got a little wireless telephone by which Jake, the boy, can talk to me from the closet under the stairs, me havin' the receiver hid in the great bouquet I wear."

"When customers come in Jake goes out to see if they have left any auto or carriage standing in the street; and if they have comes back and tells me all about it. This time he found a delivery truck round the corner with 'Simon Ronger, Meats, Groceries and Dry Goods, Hopkinton,' painted on it. Anybody could see the boy was from the country, and there was a streak of molasses on his coat sleeve. Likewise he smelt of gasoline and groceries. His age said clerk instead of proprietor."

"Soon's Jake telephoned me about the truck I had him. He's a smart sort of chap, and smart chaps in country stores always expect to be taken into partnership, or plan starting a rival shop, unless they leave before they get as old as this fellow. I have from the way he put out his hand for me to read his palm without being told that he'd had his fortune told

before. Yet 'twas easy to see that he wa'n't a regular; the regulars don't look so healthy."

"I know the gypsies were at Hopkinton—always keep track of your rivals in the business—and guessed at once he'd had his fortune told by one of 'em. Now, the gypsy patter is always the same—a light-haired man is going to marry a dark-haired girl, and he must beware of a light-haired woman and a dark-haired man. Now, if he'd just had his fortune told by the gypsies, why did he come to me to have it told again right off? Because, of course, what the gypsy had told him bothered him—didn't agree with his feelings in the case."

"Consequently his gal must be a light-haired one. Now, naturally, he'd told his gal what the gypsy had said, and, naturally, she'd been nagging about the dark-haired girl and there'd been a little quarrel. I know boys and girls, dearie. If they hadn't had a quarrel he'd laughed away the gypsy warnin'. But, as 'twas, he thought to try another fortune teller. It's all plain, ain't it, dearie?"

"But, auntie, how did you know his name began with J?" asked the apprentice.

"How? Why, he had on a pair of cuff buttons as big as saucers, with a 'J' on 'em. Give me another cup of tea, dearie?"

That night, as Sarah lay with her head reclined on James' shoulder, the lovers having thoroughly "made up," the young man told her of all that Mme. Cleopatra had said to him. And the happy girl exclaimed, "Ain't it just wonderful, Jimmie, how they can tell?"

The moral of this story seems to be that you can't really pry the lid off of the future for 25 cents—it costs at least \$2.

TELLING SPEED OF THOUGHT

Subject Has Been Made the Base of Calculations Which Are Absolutely Correct.

Until recently it was generally considered that a thought occurred with the speed of lightning. But modern methods of measurement have shown that the speed of thought is not by any means exceptional.

The time taken for a nervous impulse to travel from the elbow to the brain and thence to the wrist proved that it did so at about 180 feet a second, says London Tit-Bits.

Similarly a frog thinks at the rate of about 90 feet a second, and it takes two seconds for a whale 150 feet long to realize that he has been harpooned in the tail and to lash out with it.

In some peculiar way, however, the speed of thought seems to depend upon the temperature of the body. If a man's body is warm he is able to think quicker than if he is cold; and if his nerves are frozen they will not conduct impulses at all.

A frog at seventeen degrees will think only half as quickly as another at thirty-five, while if the frog be warmed to the temperature of a man the animal will think equally as quickly.

A cold-blooded creature like the fresh water mussel thinks only about two and a half inches a second. One of the cuttlefishes thinks at the rate of three feet a second in winter, and the octopus in summer three to five times as quickly.

Many drugs, as well as cold, will decrease the speed of thought—chloroform obviously, and ether and alcohol less obviously.

The ability to think quickly seems to vary, too, with temperament. A melancholy or lethargic man thinks more slowly than a choleric individual. In all cases, however, it is practically impossible to tire out the nerves. They will always think, though the brain which receives the impulses may be too tired to deal with them.

Ovens Used Since 1690.

Built in 1690 and used constantly ever since, the ovens of the oldest bakehouse in London are to be closed down. These brick ovens, constructed in Cornhill, year after year have played a prominent part in the lord mayor's banquet, producing the gigantic meals that were such a source of wonder years ago, and the smaller but nearly as sumptuous repasts of the present day.

Having served the purpose of providing food for civic banquets in seven reigns, the ovens have at last succumbed to the march of progress and are being superseded by new electrically heated baking equipment.

LUBBOCK CHOSEN TEXAS TECH SITE

Location Board Makes Decision After Survey of 37 Towns.

Fort Worth, Tex.—The Texas technological college location board unanimously awarded to Lubbock the new million dollar institution, which was authorized by the last legislature. The board reached its decision Wednesday.

Many towns which lost and which had delegations at the meeting at Fort Worth, took the award without criticism, in every instance voicing the sentiment that their town people would support the new institution at Lubbock to the fullest degree.

Thirty-seven towns entered the contest for the institution. One withdrew at the last moment. That was Claude. It threw its support to Amarillo. Every one of the 36 towns was visited, the sites inspected thoroughly and the claims of each given due consideration. The brief of each contestant was thoroughly studied before the board started out on its trip, that consumed nearly four weeks and covered more than 3,000 miles by automobile and railway.

The official statement issued by the technological board shortly after it reached its decision in the cactus room of the Texas hotel reads:

"We, the members of the locating board for the Texas technological college, in conformity with the law creating such college, having made careful study of the original and supplemental briefs, having visited and inspected the sites offered by the 36 applicant towns, having given consideration to the relative merits of the propositions submitted by the several towns, do hereby unanimously select and designate Lubbock, in Lubbock County, Texas, as the official location of the Texas Technological college."

The document was signed by all members of the board: S. M. N. Marrs, State superintendent of public instruction; S. B. Cowell, chairman of the locating committee; Dr. W. B. Hazell, president of the Texas Agricultural and Mechanical college; Dr. F. M. Braley, president of the College of Industrial Arts; Dr. William S. Sutton, acting president of the University of Texas; W. R. Nabours, secretary of the locating board.

U. S. AND TURKEY SIGN TWO TREATIES

Lausanne.—With the ratification of two treaties signed Tuesday the relations between the United States and Turkey enter upon a new era. Joseph C. Grew, the American representative, in a brief address after the signature, declared that the conventions permit of close and use co-operation between the two countries.

Mr. Grew recalled that during the past few years Turkey has been the scene of events of far-reaching significance and as a consequence her relations with other countries have been greatly modified. Her system of government and political ideals changed and it seemed fitting that these changes should furnish the occasion and reason for the conclusion of treaties with the United States.

Janet Pasha laid emphasis on the ties of democracy binding the United States and Turkey. He depicted Turkey as a new Turkey, and a land whose government was based on the will of the people; hence his pleasure on entering on friendly and co-operative relations with the great American republic.

U. S. Labor More Prosperous.

New York.—The American wage-earner is more prosperous now than he was during the so-called "peak" period of 1920, the national industrial conference board announced Monday, basing its conclusions to a study of conditions in plants employing more than 600,000 workers.

Insurance Left by Harding.

New York.—President Harding's life was insured for \$52,100 with six companies, according to a statement made public Friday by the Insurance Press. The largest policy, for \$15,000, was with the Mutual Benefit, on the 15-payment life plan, and was taken out in 1914.

Cattle Shipments.

San Angelo, Tex.—Shipments exceeding 60 cars of live stock were made the first week in August out of San Angelo from points west on the Orient and Northwest on the Santa Fe.

Present Value of German Mark.

New York.—One million German marks could be purchased in the local foreign exchange market today for 28 cents, or only 4.2 cents more than the price of a single mark before the war.

Fear Tanker Is Lost.

Los Angeles, Cal.—Fears that the Mallory Line tanker Swift Star had gone down with all hands were expressed in shipping circles here Friday following receipt at the government station of a radio message from her with the words "Swift Star" stencilled on it and containing the body of a man, believed to be that of a member of the crew, had been washed ashore on St. Andrews Island, 300 miles north of Colon, in the Caribbean Sea.

WRIGLEYS

Take it home to the kids. Have a packet in your pocket for an ever-ready treat.

KILLS PESKY BED BUGS P. D. Q.

Just think, a 5c box of P. D. Q. (Pesky Bed Quarters) makes a quart, enough to kill a million Bed Bugs, Roaches, Fleas or Cooties, and stops future generations by killing their eggs, and does not injure the clothing. Liquid fire to the Bed Bugs is what P. D. Q. is like. Bed Bugs stand as good a chance as a snowball in a justly famed heat resort. Patent sprout fire in every package of P. D. Q. to enable you to kill them and their nest eggs in the cracks.

Look for the devil's head on every box. Special Hospital size, \$1.50, makes five gallons, containing three sprouts. Either size at your druggist or sent prepaid on receipt of price by Owl Chemical Works, Terre Haute, Ind.

DOG BOOK FREE

32 page book—how to keep your dog well—how to care for him when sick. Worth of \$5 worth of experience with every known dog disease. Includes: How to train your dog. H. CLAY KLOVER, V. S. 120 West 20th St., New York

SWEET DREAMS

Praise Too Faint. "Why do you want the press agent discharged? He says you are the greatest singer alive." "It isn't so," coldly rejoined the prima donna. "He should have said I am the greatest singer that ever lived."

Baby Was Soon Playing With Daddy Again

"My baby cut two teeth at 4½ months and cried so much I could hardly quiet her. Really I did. I know what to do till a friend said give her Teething, which I did, and in a day or two she was laughing and playing with Daddy again. She has cut several teeth since and they never gave her a bit of trouble," writes Mrs. Charles H. Partin, 221 Shell Road, Mobile, Ala.

Many a distracted mother would find comfort and relief if she would give her baby Teethinga all through its teething time. It soothes the inflamed gums and relieves every distressing symptom.

Teethinga is sold by leading druggists, or sent 35c to the Moffett Laboratories, Columbus, Ga., and receive a full-size package and a free copy of Moffett's illustrated Baby Book—Advertisement.

The "Eyes" Have It.

"There are women who can no more help making eyes than they can help having eyes."—From "Time Is Whispering," by Elizabeth Robins.

Making the Farms Popular.

A few more country clubs and the problem of what to do with the farms will be solved.—Indianapolis News.

THE SANDMAN STORY

MR. PEACOCK'S LESSON

WHEN Mr. Peacock came to the big farm to live he was greatly disappointed. He did not like at all the barnyard fowl or Mr. Dog or any of the animals. The only time he was happy was when he was on the lawn in front of the big house with his tall spread and thought he was being admired.

One day he decided that the reason the barnyard folk did not seem to admire him was because they were jealous of his beauty. "Poor things," he

"Remember, 'Handsome is That Some Does.'"

said to himself, "I really should pity instead of disliking those ugly creatures."

Up in a tree by the stone wall sat Tommy Blue Jay, who is handsome himself and thinks no one else quite so fine. He dearly loves to "scrap" with his neighbors and does not bear a very good name with his kind.

Tommy Blue Jay cannot sing at all, but he tries to drown the sweet songs of other birds with his harsh screams and shrieks.

This day he spied Mr. Peacock in

THE ROMANCE OF WORDS

"MAVERICK"

USED on the Western plains as a term for unbranded or ownerless cattle, the term "maverick" owes its birth to a man named Sam Maverick, a native of Massachusetts who settled in Texas in the middle of the last century and entered the business of stock-raising.

Because he believed in the honesty of his neighbors and also because, on humanitarian grounds, he did not approve of branding his cattle with a red-hot iron, the calves born on the Maverick ranch were allowed to run wild and unbranded. As a result, the less honest cattlemen would add these animals to their own herds, placing their distinguishing mark upon the flank in the approved manner. In time the expression became current "Unbranded?" It must belong to Maverick," and the term spread throughout the cattle country, gradually extending its meaning until it was used to signify anyone who refused to recognize a master, a man who was broad in his views and owed allegiance to no one.

Impoverished by the lack of care of his cattle, Maverick died a number of years ago—but his name usually appears at least once in every Western story which has any claims to atmosphere.

"What's in a Name?"

MILDRED MARSHALL

FACTS about your name; its history; meaning; whence it was derived; significance; your lucky day and lucky jewel

DORCAS

THE quaintest and most charming of old-fashioned names is Dorcas, now regarded as a Puritan name, but once in general and wide-spread usage. It signifies "a gazelle" and, curiously, its significance has become so much a part of the name that its psychic emanations would seem to influence its wearer toward modesty and shyness of bearing.

Dorcas comes from the Greek word which indicates the full, dark eye of the gazelle. St. Luke makes Dorcas identical with the Aramian Tabitha, another name very popular in Puritanical nomenclature. According to the Scriptures, Dorcas was a woman raised from the dead by Peter at Joppa. She was a Christian disciple who had made "coats and garments" for the poor. For this reason, church sewing societies are frequently called Dorcas societies and the stars of charity surround the quaint little name.

The diamond is the talismanic gem assigned to Dorcas. It is said to give

her superior strength, fortitude and courage, and, if worn upon her left arm, will protect her from all adversity. Sunday is her lucky day and 6 her lucky number. The violet, signifying modesty, is her flower.

Herbert Rawlinson

His winsome, dimpled smile, his blue eyes and brown curly hair, added to his six feet and 170 pounds, make Herbert Rawlinson, "movie" star, popular with his many admirers. He was born in Brighton, England, some thirty-odd years ago. Before entering the screen field he spent a number of years with stock companies, road shows and in vaudeville. He is a great swimmer and a champ among the Hollywood golfers.

"We are all doing something to pay the farmer for keeping us, and if your work is only to add beauty to the lawn by spreading your beautiful feathers, just remember we are the ones that help to pay for your keep and don't hold your head so high."

Poor Mr. Peacock! His pride was quite crushed. Tommy Blue Jay had made fun of his feet and voice and now Madam Duck had told him his beauty meant very little unless he could do something worth while.

He had been told his real worth, and now he decided he had better be on friendly terms with the barnyard fowl, so he began to walk around the yard with them, picking up corn as if he had never felt himself above them.

The Right Thing at the Right Time

By MARY MARSHALL DUFFEE

SUMMER BEVERAGES

THERE is no reason why iced drinks of summer should not be served with straws and why those straws should not be used, but there is every reason why you should not abuse them.

Undoubtedly lemonade or any other cool drink served with chopped ice is difficult to drink and it is really better to use the straws. Two straws are usually served, preferably placed beside the glass on the service plate or coaster. However, they should not both be used. The second one is to be used only in case the first one becomes disabled. And of course care should be taken that there is not the slightest sound of sucking during this operation. You should raise the glass up high enough to make it unnecessary to stoop over unduly in imbibing the beverage and you should, of course, avoid any desperate effort to suck up the very last drop of fluid from the bottom of the glass.

Remember that when strawberries or slices of fruit are served in a beverage they are there for garnish only.

To put your fingers into the glass to fish out the slice of lemon or orange is sometimes a temptation but usually results disastrously. If you have a spoon with your beverage it is permissible to take out berries that can be eaten gracefully, but the orange and lemon sections had better be left untouched. It is extremely awkward to take pieces of ice in your mouth, nor should you scrape the sugar from the bottom of the glass by means of the long spoon.

Smoking in the Dark.

Why don't I like smoking in the dark? It is just imagination. The ordinary man is unconsciously accustomed to watch the smoke from the pipe or cigarette, and to gauge his puffs with his eyes. He may not know that he watches it, but he does, and, deprived of the opportunity, his subconscious self soon tells him that he can't see the smoke. Accustomed as he is to enjoy the sight, taste and smell of the smoke, when one sense fails him he can no longer believe that he is smoking at all. He could, of course, easily train his will to depend upon taste and smell alone, but most of us are never forced to such need, and so continue without knowing it, to watch our smoke with our eyes.—Exchange.

Mrs. H. Van Buren Magonig, president of the National Association of Women Painters and Sculptors of America, is one of the three women members of the National Society of Moral Painters.

The Alternatives.

A married man has two choices:
1. To be boss in his home and be hated.
2. To be bossed in his home and be despised.—Richmond Times-Dispatch.

A LINE O' CHEER

By John Kendrick Bangs

THE BALM OF MUSIC

NO MATTER what my woe may be
Whatever trials poster me
A bit of music with its strains
Will ease the smarting sting and pain
And sweetest of the songs I hear
Is that which falls upon my ear
As in some quiet nook I woo
Forgetfulness, and listen to
The piper of the summer rain.
(© by McClure Newspaper Syndicate.)

ENGLISH COTTAGE TYPE OF BUNGALOW

Design That Is "Homely" in Right Sense of the Word.

IS MEETING POPULAR FAVOR

Charm Is Undeniable and Structural Features Are Such as to Make Construction Present No Unusual Difficulties.

By WILLIAM A. RADFORD
Mr. William A. Radford will answer questions and give advice FREE OF CHARGE on all subjects pertaining to the subject of building, for the readers of this paper. On account of his wide experience as Editor, Author and Manufacturer, he is, without doubt, the highest authority on all these subjects. Address all inquiries to William A. Radford, No. 1827 Prairie Avenue, Chicago, Ill., and only inclose two-cent stamp for reply.

It is doubtful whether in any country attention has been devoted to the cottage and small residence in much the same way as in England. There is something "homely" in the right English sense of the word about the English type of cottage or small house; it snuggles down into its surroundings and becomes one with the other details of the landscape.

In the cottage bungalow illustrated the timbered handling of the gable ends lends character to the stucco exterior and variety is gained still further by intelligent handling of the brick details. One would look naturally for a weathered brown finishing of the exposed timbering, and it may be said in this connection that this timbering is not a necessary requisite for the wall; the effect of timbering can be

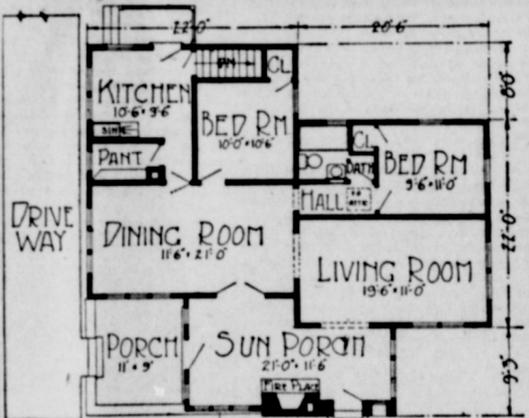

room, and which hall likewise seems to give entrance into the bathroom.

Since we have to deal with an English handling of the exterior of this home, suppose we consider how it would be to have an English feeling in the interior arrangements. Our English cousins naturally prefer the open fireplace, and the fireplace in this home should be a real one, capable of burning wood or coal. The fireplace fittings need not be of brass; its care demands too much time from our bustling American day. Excellent andirons, tongs and buckets can be had in finishes which look well and do not demand the care that bright brass fittings do. Our furniture in this home gives a wide choice. Hickory or maple furniture in the modern replicas of early American designs, a wing armchair for the fireplace corner, flowered wall paper, woodwork painted or varnished or stained, and framed hunting scenes or old prints of the days of crinolines and stocks—all these would be very timely here. Our window curtains should not be too elaborate, plain material will appear to the best advantage. And if one wished to, the ceilings could be timbered to show living like the outer walls and the living room or dining room paneled in wood in a way that would bring reminiscences of long ago.

"LIE" TEA DESERVES NAME

Fearful and Wonderful Mixture Which the Chinese Compound for the "Foreign Devil."

The ingredients of what the Chinese candidly call, in pidgin English, "lie" tea, are chiefly pulverized quartz, dry leaves, magnetic oxide of iron, and fine dark sand. These materials are carefully blended, and a kind of glue of starch paste is added, the tiny pellets being prodded into fragments of the shape and size of the particular tea to be imitated. If gunpowder tea is to be faked, the pellets are colored with turmeric, clay and Prussian blue.

Floor Plan.

gained by the nailing of inch lumber over the brick or block or tile wall and stuccoing in between the outlined spaces.

The windows help carry out the quaint character of the exterior. In a cottage bungalow of this type one should refrain from using any of the more modern fancy type of windows. Casement windows would go very well here, and if the housewife wishes to overlook the extra care that diamond-paned leaded glass casements require, she would be the gainer by having her windows help out to the last degree her endeavor to make her house a quaintly comfortable home. After all, with casement windows or the plain sliding sash type, choice depends altogether upon fitness; where one type fits in the best, there is the place to see that it is installed.

There are six rooms, including the sun porch, for the latter is really integral with the house. Realization of this fact comes when you note the arrangement of the fireplace; it is not in the living room but in the sun porch. For this reason it may be preferable to have the dividing wall between the sun porch and the living room removed, or treated with glass doors in such a way as to permit the least unobstructed view and passage from one room to the other.

The dining room is off the sun porch and the living room and its three windows give excellent light and ventilation. The pantry is between it and the kitchen, permitting room for a service shelf to save the housewife's steps at meal times.

We have two bedrooms, each situated conveniently in relation to the house as a whole. One is reached from the dining room and the other from a hall opening off the dining

room, with black lead or plum-bago.

Another form of "lie" tea is formed of about half genuine tea dust and the other half a mixture of magnetic oxide of iron and various powdered leaves of bamboo, willow and shrubs. Mica and indigo have been found in it by microscopical analysis, and even powdered soapstone. The iron is not added for weight, but to darken the brew when it is dissolved by hot water. It also renders the tea bitter and gives it the tang beloved of the foreign "devil."

Use for Worn-Out Currency.

Worn-out United States currency representing millions of dollars, cut up and pulped, has been shipped to the Forest Products Laboratory at Madison, Wis., to be used experimentally in the manufacture of paper. Prior attempts at the laboratory resulted in paper of a poor quality, but it is expected that with a new cleaning process a more satisfactory product will be obtained. As much as two to three tons of paper money are discarded and destroyed on occasion at the treasury in Washington. If the experiment proves successful, the government will continue the pulp shipments.—Popular Mechanics Magazine.

Give Him Credit.

"Stab between the ribs," bellowed the drill sergeant to the stout and clumsy rookie, "and remember always always keep to the right of your enemy."

"That's all right," the rookie replied, mopping his forehead. "Yeh that's all right with you standin' here and the dummy swingin' there, but don't you figger my enemy's got some sense, too?"—American Legion Weekly.

Aspirin

Say "Bayer" and Insist!

Unless you see the name "Bayer" on package or on tablets you are not getting the genuine Bayer product prescribed by physicians over twenty-two years and proved safe by millions for

Colds Headache
Toothache Lumbago
Earache Rheumatism
Neuralgia Pain, Pain

Accept "Bayer Tablets of Aspirin" only. Each unbroken package contains proper directions. Handy boxes of twelve tablets cost few cents. Druggists also sell bottles of 24 and 100. Aspirin is the trade mark of Bayer Manufacture of Monocetene-diesters of Salicylic acid.—Advertisement.

Electricity Aids Fishermen.
Are you an electrical fisherman? If not, all you need in order to class yourself in this category is the new artificial minnow, which is made luminous by electricity and resembles a wriggling worm when cast into the water. It is reputed to attract fish day or night. Fine wires protect the bait from breakage and an electric battery supplies the current.

Cuticura for Sore Hands.

Soak hands on retiring in the hot sods of Cuticura Soap, dry and rub in Cuticura Ointment. Remove surplus Ointment with tissue paper. This is only one of the things Cuticura will do if Soap, Ointment and Talcum are used for all toilet purposes.—Advertisement.

Grandpa and Grandma.
"When I was a young man," said grandma, "we used to be reproved for reading dime novels."
"Yes," rejoined grandpa, "and now you pay a dollar and a half for worse."

If a man does not seek wisdom he will never be very wise.

It doesn't take a very large trouble to worry the small mind.

A Fine Tonic. Builds You Up. Prevents and Relieves Malaria - Chills and Fever - Dengue

TWO-PIECE OUTFITS; ON CORRECT CORSETING

WHEN in the course of fashion events it becomes necessary to declare one's independence of newer modes in order to retain a style that is becoming, comfortable and altogether charming, the declaimer may well consider those waist-and-skirt, or blouse-and-skirt combinations that are now so popular, and apparently are destined to play a considerable part in later fashions. Certainly these outfits provide a common-sense answer to the desired qualities of simplicity, charm and comfort in summer costumes, and

anticipated and provided for. Corsets now must be shapely, comfortable and sanitary—made so that they can be kept clean—and they must add to the comeliness of the figure, without hampering or injuring it. Gradually the low-top corset, like that shown in the illustration, has replaced the old-style model, which extended above the waistline to the bust. The low-top corsets or girdles are in general demand and have everything to recommend them—they do not interfere with one's breathing apparatus

TWO DISTINCT VARIATIONS OF THE MODE

they permit so many individual treatments that they do not become monotonous. The two outfits shown here represent two distinct variations of this mode. The all-white costume at the left is made in the simple slip-over pattern, with round neck and perfectly plain waist, that extends over the plaited skirt. It is finished at the waist with a belt of the material. A monogram is embroidered below the pocket. Chinese embroideries provide the inspiration for the all-over design shown on the blouse at the right. The pattern is worked out in jade green and light blue against a background of white crepe-de-chine. The straight plaited skirt is of green crepe-de-chine

in the least, they are cool, and elastic, so that they give to the play of muscles while they support the figure correctly. Cotton and silk brocades, surgical webbing and elastic are the mediums used by corset makers mainly. Corsets for special purposes, as well as regulation styles, are turned out by the manufacturers. For sports and athletic requirements there is the corset and there are girdles of various sorts. Both the front and back-lace corsets have their devotees, with back-lace outnumbering the front-lace fans somewhat. With the modern corset it is necessary to wear a brassiere, and these are made in considerable variety.

THE LOW-TOP CORSET

edged with two bands of white. The collar and short sleeves are finished in the same shade of green as that in the skirt.

Hats and accessories are chosen with the idea of being in complete harmony with the costume. The young lady in white has a parasol covered with ribbon petals and wears a close-fitting millan hat trimmed with two large ribbon rosettes posed at the front. The hat at the right is of white crepe de chine trimmed with a band of the same material edged with French knots of green silk.

Whoever doubts the progress of women in artistic sense, and in good common sense, has only to study the history of corsets for the last decade or so. Women have grown discriminating, exacting and sensible in their demands of corset makers and corset making has more than kept pace with them. Their needs are an-

of light-weight brocades, or heavy laces, of webbing and of lighter materials. The newest ones have diaphragm supports introduced in the design and are anchored to the corset, so that they will stay properly adjusted. A very pretty, fancy brassiere of plaited crepe, overlaid with embroidered chiffon, is shown in the picture. The very foundation of good style in dress, is proper corseting. It is marvelous how much can be done to make the figure trim and gracious by choosing the right corset, and the new models have done much toward the success of the straight-line and artistically-draped dresses that distinguish the modes of today.

Make Fight on Insects and Diseases in Summer
Summer is the time to begin to look after the borers. The para-chlorobenzene has established itself as an efficient control for borers in peach and plum orchards. If, as now rumored, this same substance may be of some benefit in controlling root insects on strawberries and possibly the woolly aphids on the apple, it will prove to be a great boon to a new class of growers.

Much Improvement of Kentucky Live Stock

Chief Work of Association Is Eradicating Scrubs.

(Prepared by the United States Department of Agriculture.)

Rapid improvement of live stock in Kentucky is taking place largely as a result of the Live Stock Improvement association, formed last winter through the agencies of the State College of Agriculture and the Louisville Live Stock exchange. In a recent letter to the United States Department of Agriculture, Wayland Rhoads, field agent in animal husbandry in Kentucky, describes the activities of the organization, which includes among its members bankers, commission men, live-stock breeders and farmers.

"The main idea of the association," he states, "is the improvement of live stock in Kentucky, and the chief line of work will be in eradicating scrub sires and putting in pure breeds. At present we have one full-time field man with the association. He is an old auctioneer, and in the past has been largely instrumental in promoting pure bred live-stock sales. We have decided here to use any or all means toward live-stock improvement and a big change is already being noted."

The results of the association's activities are evident also in the records of the "Better Sires—Better Stock" campaign, conducted by the state and the department. In an active ten-days' campaign with meetings and farm visits in Union county, Kentucky, the number of persons using pure bred sires exclusively on their farms increased from 73 to 270. Similar work is in progress in several other counties. Every person enrolling in the better-sires campaign receives a suitable emblem of recognition showing his participation in live-stock improvement work.

Raspberries Subject to Troublesome Ailments

The red raspberry, as well as the blackcap, is subject to a number of diseases, neglect of which may prove to be quite troublesome, but if healthy plants are secured, it should be possible to keep the plantation in a healthy condition for quite a number of years, and they will be found quite remunerative.

It is not quite uncommon to find fields of the blackcap raspberries which have been fruiting for ten or more years and which are practically free from raspberry diseases.

Many of the failures are due to planting upon unsuitable locations. Sometimes the soil is poorly drained, which is always fatal to the growth of the plants, and in other cases the plants are set on light sandy soils almost devoid of humus and plant food. It can hardly be expected that good results will be obtained, especially as the plants growing under these conditions are not likely to receive the care that would be given them when they are yielding profitable crops.

Cane Fruits Need Care After Crops Harvested

As soon as the crops of blackberries, raspberries or loganberries are harvested, the old vines should be cut out and burned. These old vines carry over many disastrous diseases. Any plant that looks suspicious in any blackberry or raspberry patch should be burned. Summer pruning can be carried on in the young canes of blackberries and black raspberries. As soon as the canes are two or three feet high they should be pinched back, forcing out laterals. If these laterals become too rangy, they can be cut back slightly in the spring of the year.

More Nectarines Should Be Grown in Orchards

New York agricultural experiment station believes that more nectarines should be grown. They are recommended by the experiment station. The trees of this variety are described as being large, vigorous, hardy, healthy and productive. The fruit is said to be large, handsomely colored and very good in quality. It is believed that this nectarine should be grown in all the home orchards and might have good commercial possibilities if planted on a small scale.

Blossoms of Strawberry of Two Different Kinds

Strawberry blossoms are of two kinds. One kind is called perfect, staminate, or male, and the other kind imperfect, pistillate, or female. Some varieties have perfect blossoms and other varieties have imperfect blossoms. Those with perfect blossoms produce pollen which will fertilize both perfect and imperfect blossoms and enable them to bear fruit. The varieties with imperfect blossoms cannot set fruit without receiving pollen from perfect blossoms.

Make Fight on Insects and Diseases in Summer

Summer is the time to begin to look after the borers. The para-chlorobenzene has established itself as an efficient control for borers in peach and plum orchards. If, as now rumored, this same substance may be of some benefit in controlling root insects on strawberries and possibly the woolly aphids on the apple, it will prove to be a great boon to a new class of growers.

TIMES CHANGE

"You know," said Duke Mulligan, thoughtfully, "when I was a small boy it was considered bad manners to stuff your mouth full of food." The audience listened. "Yes, bad manners then," continued the duke. "Just shows how times change. It was bad manners to stuff your mouth full of food then, but these days, at the present prices, it's practically impossible!" — Richmond Times-Dispatch.

By Easy Stages.
"You're at the wrong place," said Cerberus. "This is the gate that leads to the infernal regions, while this is a passport to heaven that you have handed me." "I know it," said the departed shade, wearily, "but it allows me a stop-over here. You see I'm from Texas, and I've got to make the change gradually."

History of Human Woe.
A newspaper man met a friend at the corner of Vesey street. "What are you doing now?" said the former.

"Nothing," he said demurely. "Good man!" exclaimed the wage-earner wistfully. "Do you want a collaborator?" — New York Evening Post.

THE REASON

First Neighbor—You borrowed our victrola last night. How was it? I didn't hear any music?

Second Neighbor—That's why I borrowed it. My husband wanted a good night's rest.

The Moral is Plain.
"I can't give you a kiss," said modest Ann Dunnal. "But there's no law against your stealing one."

Jazz Contortions.
"The leading trombonist in this jazz orchestra is a hard-working chap." "I wish he wouldn't twist his horn this way and that, now holding it between his knees and the next moment raising it above his head."

"He reminds me of a man trying to draw a cork out of a bottle with his teeth."

Always at Home.
Policeman (to first tramp)—Where do you live?
First Tramp—I ain't got no home.
Second tramp—And where do you live?
Second Tramp—Me and him live together; we're partners.

Breaking It Gently.
Daughter—May I go to a wedding, father?
Father—Must you go?
Daughter—I suppose so. I'm the bride.

TOOK IT BACK.
Wife—Whenever I kiss you, you ask me if it's a new dress I want. You are unfair.
Hubby—Well, perhaps I am. After all, it may be only a hat.

A Timely Epitaph.
For Julius Jinks
Let's kneel in prayer;
He told a cop
To take the air.

Light That Failed.
Wife—You used to say I was the light of your life.
Hubby—Yes, but I didn't suppose you were going to get put out at every little thing.—Philadelphia Evening Bulletin.

Studio Staff.
"Great artists have no country," said the egotistical but impetuous third-rate dauber. "The whole world is my town."
"And all that's lacking, I suppose, is mercy a little creature."

An Incompetent Lot.
"The one I am now getting in my thirteenth cook."
"Aren't you a little superstitious regarding her?"
"Not a bit. She couldn't possibly turn out worse than the other twelve."

Low-Grade Fruit Should Be Dried

Serves to Increase Returns by Utilizing Product Excluded From Market.

(Prepared by the United States Department of Agriculture.)

The practice of evaporation of fruits when developed in any given territory serves to increase orchard returns by converting fruit excluded from market grades by superficial blemishes into salable products and to maintain fresh-fruit prices by absorbing a portion of the marketable grades in years of overproduction. The drying of fruits as practiced at the present time is largely a farm industry carried on by the fruit growers themselves as a part of the routine of harvesting and disposing of the crop. The plants in which the work is done are mainly small, their size being most frequently determined by the size of the owner's orchard, and there is great diversity in the drying apparatus, the accessory equipment, and the details of drying methods employed, with a consequent absence of definite standardization of the product. This would be expected in view of the fact that 252,289 farms reported the production of dried fruits in the census of 1919. The primary need of the industry is for such a standardization of equipment and application of labor-saving devices to the handling of the material as will enable the production of a better grade of product at lower costs.

Types of Evaporators.
Various types of artificially heated evaporators found by test of actual use to be best suited to specific purposes are described in detail in Department Bulletin 1141, just issued by the United States Department of Agriculture on evaporation of fruits. The bulletin includes a description of model installations of labor-saving machinery, as well as a somewhat full discussion of improved methods of handling the various fruits in preparation for drying as well as during the drying process. The drying installations are the most modern in character, but are of such moderate size and cost as to be suited to the means and needs of a particular case.

Community Plant Suggested.
In many communities in which growing of fruit is not a primary industry the aggregate quantity of unmarketable fruit may be such as to make advisable the construction of a community drying plant to which every grower in the vicinity may bring his surplus to be worked up. A number of considerations, which should be kept clearly in mind when the project of a community or co-operative evaporator is under discussion, are mentioned. Those interested in the subject of evaporation of fruits will find this bulletin of value and may secure a copy as long as the supply lasts by addressing the United States Department of Agriculture, Washington, D. C.

Campaign Among Farmers for Cream Improvement

Creameries suffering losses due to poor grades of butter are urged by A. J. McGuire, dairy specialist with the agricultural extension division of the University of Minnesota, to put on an educational campaign among their patrons for improving the quality of their cream. "Interest can be aroused in having all cream delivered at least twice a week and in improving the methods on the farms for greater care and cleanliness so that pure sweet cream will be delivered," he says. "The wide difference in price between good and poor butter results in serious losses under present conditions and can be prevented." A continuous loss in the price of butter because of poor quality has led to the failure of creameries, Mr. McGuire asserts.

Straw Not Recognized as Valuable Cow Feed

Oat straw is not generally recognized as a valuable food for dairy cows; yet if given in reasonable quantities every two or three days they will clean it up with a relish, whereas if given them exclusively as a roughage they will push it over the manger and become as thin as a string of shad.

Plan Outlined to Kill Rats in Chicken House

If your chickens are being killed by rats, send for the government's new free bulletin No. 1302, "How to Get Rid of Rats." With some of the remedies recommended in this bulletin a whole family of rats can be killed in a single night. Two or three rats can kill dozens of chickens in a few hours.

Excessive Amounts of Corn Not Recommended

The statement that huckle corn is not good for cows is one of the half truths that often do considerable harm. Where cows are fed an excessive amount of corn, it makes what is known as narrow ration, which tends to produce flesh rather than milk.

Sprayed Potatoes Show Great Increase in Yield

Does it pay to spray potatoes? Last year in over 400 demonstrations where sprayed potatoes showed an increase of 74 bushels per acre, and the use of disease-free seed resulted in an increase of 69 bushels per acre.

Motor to Church in Comfort

The Chevrolet 5-Passenger Sedan is most popular for family use, because it affords comfort, weather protection and the home atmosphere all the year 'round for five people—yet may be economically operated with only one or two passengers.

Its power, reliability and low upkeep appeal to men. Women like its handsome lines, fine upholstery, plate glass windows with Ternstedt regulators, and fine finish. Everybody appreciates its great value at \$860, f. o. b. Flint, Mich.

Black Alkali.

Investigations have been made of the almost complete loss of fertility of from 40,000 to 50,000 acres in the San Luis valley of Colorado, and this condition is attributed to the so-called "black alkali," composed largely of sodium carbonate. This carbonate is carried in the waters of the valley, including the rivers and the artesian wells, and the practice of subirrigation has brought it to the surface by capillarity and evaporation. It is suggested that the remedy lies in a conversion of the carbonates into sulphates by the use of a liberal amount of gypsum—about nine pounds of gypsum to one pound of black alkali—and downward washing by means of surface irrigation with furrows or by flooding.

More Likely.
"Newspapers make use of some very strange expressions," remarked Mrs. Snagg.

"Do they?" replied her husband. "For instance, here is an article which speaks of speculators pocketing their losses, when I should suppose that they really unpocketed them."

One has to reach a rather "don't care" state of mind, not to be prejudiced.

Cruel Words.

The wife had been away from home all afternoon, and when she returned husband was reading. She dropped wearily into a chair and closed her eyes for a rest when her husband began to ask questions.

"Oh, don't talk to me," she begged, "I'm so tired."

"I wanted to rest myself," he returned, "but was kept from doing so by the noise you made."

"I was away," she said. "But there were echoes," he returned.

His Statement Doubted.
Teacher—Who signed the Magna Charta?
Youngster—Please, ma'am, 'twasn't me.

Teacher (disgusted)—Oh, take your seat.
Skeptical Member of Rural School Board—Here, call that boy back. I don't like his manner, I believe he did do it.

It takes a very clever man to pick up an umbrella and walk off with it just as if it belonged to him.

Some people never succeed in finding out which side of their bread is buttered until they let it fall.

Ever stop to think of this?

We are what we eat!

It's a startling fact, yet a simple truth. This is the reason every one should know that his food is really nourishing—not merely filling.

Grape-Nuts—made from wheat and barley—is one of the few cereal foods that includes the vital mineral salts so necessary for supplying proper nourishment for nerve and bone structure.

In Grape-Nuts, too, is retained the important vitamin-B of the wheat.

No food has greater influence in strengthening the body of a growing child than Grape-Nuts. And remember, children need the very best there is in the way of nourishment.

Grape-Nuts is just as delicious as it is healthful, whether served right from the package as a breakfast cereal with milk or cream, with fresh or stewed fruit, or made into an appetizing recipe. Try the suggestion given below.

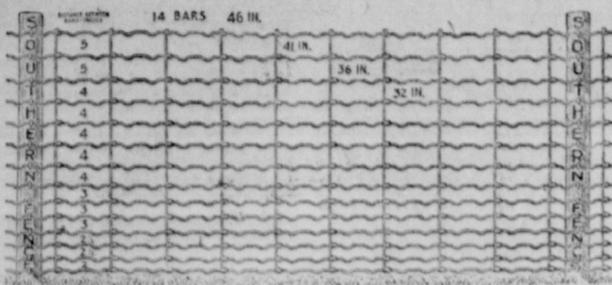

GRAPE-NUTS ICE CREAM
Prepare plain flavored ice cream in the usual way. Just before the cream hardens in freezing, add Grape-Nuts as it comes from the package, in the proportion of one-half cup of Grape-Nuts to one quart of ice cream. If you buy ice cream ready-made, add Grape-Nuts in place of nut meats. You'll find the resulting flavor unique.

GRAPE-NUTS
Made of Wheat and Barley
Puritan Cereal Company, Inc.
Belle Mead, N. J., U.S.A.

A FOOD
Containing the essential vitamins of Wheat and Barley
ECONOMY
One half cup of GRAPE-NUTS for the amount of a cup of cereal in the ordinary sense. This may be used in any recipe.

Where you don't find Grape-Nuts, you won't find people—

Small Cars and the World's Most Popular Tire

The largest factory of its kind in the world is devoted solely to the production of Goodyear Tires, sizes 30x3, 30x3 1/2, and 30x4. Isn't this immense production, day after day, a

positive indication to you of Goodyear's high ability and honesty of purpose in building the best Clincher tire on the market. THINK IT OVER. These tires, as well as other sizes, are here for your inspection. They cost no more than ordinary tires. Our helpful tire service will increase your mileage. It costs you nothing and saves you money.

MUSSEY BROS.

John Droomgoole of Del Rio arrived here Tuesday with a car load of fine "billies" which he placed in the stock pens for the purpose of selling to Terrell county goat raisers.

Charley Chandler was in from the ranch Tuesday, on business. He reported everything fine in his neighborhood and water-melons plentiful.

The latest and smartest Fall and Winter samples of made-to-measure suits have arrived and open for your inspection at the Royal Tailor Shop. Prices are low with guaranteed satisfaction.

E. M. Drew has taken a 60 day leave of absence and will go to New Orleans where he will be joined by Mrs. Drew and they will proceed to Florida where they will spend their vacation on Mr. Drew's fruit farm.

Misses Winifred and Bernice Atkinson returned last Sunday to their home in Big Springs, after a pleasant visit with Jim Haley and family.

Mrs. J. W. Daughtry and son of Alpine accompanied by Miss Bessie League came in Saturday to visit Mrs. Daughtry's mother, Mrs. J. E. Carter at the Carter ranch.

M. H. Goode was in town Tuesday, on business.

Miss Avis Crozier of Yoakum, Texas came in Wednesday morning to visit her sister, Mrs. Sims Wilkinson.

Mrs. C. E. Darnell and daughter, Virginia left Wednesday for Comstock to visit Mrs. Darnell's sister, Mrs. Clyde Deaton.

Mrs. Madison Turner Jr., spent several days in Del Rio this week on business.

If you want to be dressed up wear made-to-measure clothes. Call at the Royal Tailor Shop and let us fit you up to a nifty suit. The cost is low and satisfaction guaranteed.

E. A. Waldron, organizer of the Waldron Quicksilver Co., was here the first of the week in the interest of his organization.

Walter Qualtrough killed two big rattlesnakes a few nights ago at No. 1 switch. One of the snakes had 10 rattles.

Ed Downie bought a bunch of horses from Callie Stansell recently. The horses were delivered at six-mile well Wednesday.

Miss Mary Ables of Marfa is a guest at the home of Hy R. Laurenon. Miss Ables will teach in the Marfa school this coming term.

Your clothes will always look neat and clean if you have them pressed and cleaned at the Royal Tailor Shop. Phone No. 6, and we will call for your package and deliver when finished.

C. E. Franks and mother were in town Thursday, shopping. Mr. Franks said everything was fine out on the ranch.

Miss Lorette Lemons returned Sunday from Sheffield after a two weeks visit with friends.

Church News of Sanderson

Rev Bickley has returned from the 10 days meeting at Marathon and reports a good meeting with excellent attendance both at the morning and evening services.

Bro. Adams assisted Bro. Bickley in the protracted meeting at Marathon.

Prayer meeting Wednesday night was well attended. Rev. J. Bickley leader. Lesson, Rev. 6th Chapt. 1-8. Several good old songs were sung with a fairly good sized choir in attendance.

Next Sunday is Rev. Bickley's regular appointment. All are welcome.

There were no church services last Sunday, except Sunday school at the Presbyterian and Methodist churches.

Auxiliary ladies of the Presbyterian church completed their first quilt top last Monday for the orphans home, at Mrs. Jack McKee's. Blocks were cut for two other quilts. Miss Myrl McKee served iced lemonade and cookies, which was very refreshing. Many thanks, Miss Myrl.

The Womans Missionary Society will meet with Mrs. White next Tuesday evening. Mrs. N. Taylor leader. Social and Bible study, also 25c package sale. All members please come; everyone welcome.

The ladies of the W. M. U., quilted on their first quilt for the Buckner Orphans Home, on last Wednesday at the home of Mrs. Stewart. Delicious refreshments of ice cream and white cake were served by the hostess.

The W. M. U. will meet at the home of Mrs. Eldridge, August 22nd, for a social and business meeting. There will be a 25c package sale also at the same time. A hearty welcome to all. Come and have a good time.

The ladies of the Presbyterian Auxiliary will meet again next Monday, August 20th, with Mrs. Jack McKee to continue their work on the quilts for the orphans home. The meeting is being held at Mrs. McKee's instead of the church so that we can have the use of sewing machines.

Hall's Catarrh Medicine

Those who are in a "run down" condition will notice that Catarrh bothers them much more than when they are in good health. This fact proves that while Catarrh is a local disease, it is greatly influenced by constitutional conditions. HALL'S CATARRH MEDICINE consists of an Ointment which quickly relieves by local application, and the Internal Medicine, a Tonic, which assists in improving the General Health. Sold by Grocers for over 40 Years. F. J. Cheney & Co., Toledo, Ohio.

Mrs. Ray Caldwell returned from St. Louis Sunday where she has been visiting relatives and friends the past month. She was accompanied home by her sister, Miss Mildred Jones.

Judge Henshaw in company with County Commissioners W. J. Banner, J. M. Corder and W. A. Cochran spent a few days in Marfa on business.

Mrs. Lee Grigsby and sons, Irvin and Walter, left Thursday morning for Carrizo Springs where they will visit relatives and friends.

Our slogan is "The Sanderson Times in every home in Sanderson."

America's Marvels NATURAL AND OTHERWISE

By T. T. Maxey

THE BOWERY

Perhaps no other street in any other city in America has had a more intensely interesting or varied career, has housed a more notorious population or is known so far and wide as is The Bowery in New York City. "Bowwiewie" is a Dutch word which corresponds to our word "farm." The extensive estates of Great Bowwiewie of Governor Peter Stuyvesant whom his lordly records was the last and best of the governors of the Dutch colonies in America were located along the upper east side of New Amsterdam (now New York city). Bowwiewie Lane was the main road leading north from the wall behind and protecting the city to Governor Stuyvesant's Bowwiewie. It extended from about where Chatham square now stands to the vicinity of the present junction of Third and Fourth avenues. Bowwiewie Lane was subsequently shortened to Bowwiewie Lane, which name in turn (about 1807) gave way to The Bowery which was handed down to and is used by the present generation.

A tavern, known as Bowwiewie House, was built on this road. The village surrounding it gradually came into existence. The location of this community was between Second and Sixteenth streets and east of and along Second avenue near the location of the present Stuyvesant square. The Bowwiewie (Bowwiewie Lane) was one of the first named streets in the "New World."

The Bowery, notorious in the extreme for years and years, as the hangout of lawless boys and others of a questionable character, has in more recent times taken on a new and a better life. The street of the present time is made up and patronized by a population of many nations and of many walks in life and is lined with a seemingly endless string of cheap stores, amusement houses, lodging places and pawn shops. Into the latter are brought by shiftless individuals anything and everything that can be gotten rid of which has a payable value. I once heard about an old Bowwiewie who had a wooden leg which he pawned daily as he started out on a round of begging, reclaiming his leg with the same regularity as he returned to his hangout at night.

Governor Stuyvesant died in 1672. His body was buried in the little cemetery on his bowwiewie. When St. Marks church at Second avenue and Eleventh street was constructed in 1795 the painstakingly inscribed tombstone over his grave was built into one of the walls.

Mr. and Mrs. O. L. Birdine and children returned the latter part of last week from Dallas, Ft. Worth and other Texas points after a few weeks visit with friends and relatives.

Notice of Estray Sale

Notice is hereby given that on the 4th day of September, 1923, the said month, I will sell at public auction, to the highest bidder in front of the Court House door in Terrell county, between the hours of one and three o'clock p. m., the following Estray animal, viz: One brown horse mule about seventeen years old and about thirteen and a half hands high, branded S N and 9 D on left thigh; the same as Estrayed by me before H. L. Gates, a Justice of the Peace in and for Precinct No. 1, Terrell County, Texas, on the 17th day of August 1922.

W. A. Cochran.

Captain James T. Elliott, Editor, publisher and owner of the Sheep and Goat Raisers Magazine announces that the August 1923, number of the Magazine will be the final number issued under his direction, as he has planned for the sale of the Magazine to the firm of Holcomb-Planton-Printery of San Antonio, Texas, who will, with the September number become its editors and publishers. We wish for the new owners of this Magazine a good success as Captain Elliott has made of it in the past 3 years when it was first organized by him and wish for Mr. Elliott a success in his private life.

NOTICE

Notice to Officers and Members of Sanderson Review No. 72, W. B. A. of M., August dues are now due, pay before August 21st inst.

Ella Lee, collector.

If you are not subscribing for the Sanderson Times call 29 and have your name put on the mailing list. Same price \$2.00 a year.

Rob's Calomel of Nausea and Danger

Medicinal Virtues Retained and Improved—Dangerous and Sickening Qualities Removed. Perfected Tablet Called "Calotabs."

The latest triumph of modern science is a "de-nauseated" calomel tablet known to the drug trade as "Calotabs." Calomel, the most generally useful of all medicines thus enters upon a wider field of popularity, purified and refined from those objectionable qualities which have heretofore limited its use.

In biliousness, constipation, headaches and indigestion, and in a great variety of liver, stomach and kidney troubles calomel was the most successful remedy, but its use was often neglected on account of its sickening qualities. Now it is the easiest and most pleasant of medicines to take. One Calotab at bedtime with a swallow of water—that's all. No taste, no griping, no nausea, no salts. A good night's sleep and the next morning you are feeling fine, with a clean liver, a purified system and a big appetite. Eat what you please. No danger.

Calotabs are sold only in original, sealed packages, price thirty-five cents for the large, family package; ten cents for the small, trial size. Your druggist is authorized to refund the price as a guarantee that you will be thoroughly delighted with Calotabs. (Adv.)
