Mrs. F. L. DesLandes has been in town the past week from the ranch near Teenus visiting with friends.

Mrs. S. C. Bodkin returned the latter part of last week from Fort Worth, where she has been the past several weeks with her daughter, Mrs. T. E. Bryan, who has been ill. Mrs. Bodkin states that her daughter was able to leave the hospital and was doing fairly well when she left.

Mrs. Charles Harrell left last Friday for Temple, where she will visit relatives and undergo medical treatment at the Temple Sanitarium for several weeks. She was accompanied to Temple by her brother, Jack.

Born, Thursday, February 3, to Mr. and Mrs. Lee Cook, a boy. The Ladies' Auxiliary to the Presbyterian Church will meet Monday at the home of Mrs. J. W. McKee.

Baptist W. M. U. will meet Monday, February 14 at 3 o'clock with Mrs. E. P. Halley for Bible study. Lesson theme, Joel, everybody be on time with a good lesson.

Mrs. Luella Lemons, S. J. Kellogg and M. A. Boling motored to Marathon Sunday afternoon. They were accompanied home by Miss Kate Blakett, who will visit relatives here.

Mr. and Mrs. F. B. Carter, Mrs. Troxie Daugherty and Miss Kate Frazier motored to Alpine Sunday, where they spent the day with friends.

Mrs. Stella Sherod and son left Sunday for El Paso, where they will visit relatives.

Mrs. J. M. Turner of Alpine spent several days here the past week with her son, Madison Turner and family.

Dr. W. H. Doty was a business visitor in Del Rio Tuesday.

Mrs. M. Beezer left Sunday for El Paso, where she will visit her daughter, Mrs. Howell, for several weeks.

Mr. and Mrs. Fred Yeates returned Sunday from San Antonio, where they have been visiting relatives.

Mrs. Oscar Cain Honored.

Mrs. Ed Downie and H. R. Laurence were hostesses to a delightful bridge party given at the home of Mrs. Ed Downie last Saturday afternoon honoring Mrs. Oscar Cain of Del Rio. The high score prize for the afternoon, a Dresden doll powder box, was won by Mrs. A. E. Creigh; the second high score prize, a Japanese candy dish went to Mrs. J. W. McKee. The honoree, Mrs. Cain, was presented with a hand painted card table cover as guest prize. Table prizes were doll pin cushions.

The hostesses served angel food cake with whipped cream and hot coffee.

ALTAR AND ROSARY SOCIETY MET FRIDAY

The Altar and Rosary Society met on Friday last week with Miss Catherine Daniels, Father Bergant congratulated the hostesses for having had the greatest number of members of any meeting.

Many plans of interest were talked of and the society hopes for a successful future.

Refreshments were served at the close of the meeting.

Resolutions.

Whereas, it having pleased our Heavenly Father to call from his earthly abode the father of our beloved Sister Jennie Qualtrough;

Be it, Therefore, Resolved: That the officers and members of Terrell Lodge No. 369, Ladies' Auxiliary to the Brotherhood of Railroad Trammens, extend to our bereaved sister our sincere sympathy.

Beautiful life is that whose span is spent in duty to God and man. Beautiful calm when the course is run:

Beautiful twilight at the set of sun;

Beautiful death with a life well done.

Be it further resolved that a copy of this resolution be sent to our bereaved sister, a copy be spread on the minutes of the Lodge and one copy published.

IMA STIRMAN,
ADAH SURREATT,
JOHNNIE WILLIAMS.

EAGLES SPLIT 2-GAME SERIES WITH ALPINE

The Sanderson High School Eagles completed their home schedule of basketball here Friday and Saturday of last week by splitting two games with the Alpine High School Bucks. Both games were very close, and finally contested, and the crowd on the side lines was given many thrills and some very good exhibitions of basketball. These games furnished both teams excellent experience for the coming district tournament to be held at Sul Ross College, February 11 and 12, and incidentally gave both teams and their coaches a chance to take up the abilities of their first opponent in the big meet, for the Eagles and Bucks will face each other again in their first game in the elimination contest. This promises to be an exciting contest, and either team will have to exert itself to the utmost to put over a win. Let's to Alpine and root for the Eagles—then they will win! Put them on an equal basis with Alpine, giving them the proper encouragement from the sidelines and they can't help winning.

Sanderson, Alpine 28.

The game day afternoon was one of the best ever seen on the local court and the actual outcome was far absolutely certain until the final whistle. The game started with a rush when the Eagle took the ball from the tip and a series of quick passes drove into their territory. The shot at goal was missed, but Chas. Landers of the Eagles made one of the prettiest covers to the local boys the first cover. Alpine didn't wait long either, too, had counted and the score, Skevington, the lumberer of the visitors, then shooting from all angles, seen deadly accuracy that the end of the half the Bucks had the lead 12 to 8. In the second half the Eagles came with renewed vigor and started in cutting down Alpine's lead until the score stood 24 to 11.

At this point in the game Landers, the Eagle captain, was ejected from the game because of four personals. Paid throughout the game, the mainstay of the local offense, and had at that time been the most consistent man on the offensive. He placed in the guard position, vacant by Landers. The Eagles, however, missed the defense as well as the offensive guard their captain and were unable to continue their rally. During the remaining minutes of play the Eagles were unable to score while the Bucks added five points to their score, the game ending with the visitors in possession of the big end of the score to 23 count.

The outstanding star for the Eagles in this game was Landers. He did some fine guarding and at the same time was high point man for his team with eight points. Miller and Franklin view with each other for second honors, both making six points. Miller was second only to Landers in his defensive game, and considering the fact that he was playing a forward's position, his work along this line deserves that much more praise. Franklin played a very consistent game, and was especially quick on the break from defensive to offensive. The only thing to mar his pretty game at the forward post being the fact that from four tries at the foul line he was unable to register a single counter.

The work of the entire team deserves credit, both for their individual ability and fight, and their splendid work as a unit. Strange played the best game he has played this year, and bids fair to be the most aggressive and hardest fighting guard on the squad. The work of Skevington, Alpine center, should not go unnoticed, either. His offensive game was by far the outstanding thing in the entire game. The Sanderson boys were unable to keep this lanky center from registering 13 out of the 23 points that Alpine made, and it was due to this fact that Alpine left the court victors.

(Continued on last page)

THEATRE AUDIENCE EXCITED WHEN FILMS BECAME IGNITED

Wednesday night as moving picture operator at the Princess Theatre was changing from one machine to the other the film he had just run was ignited. The fire dropped off this film on to seven or eight other films on the floor which threw flames all over the booth and out the door. On seeing so large a blaze the audience became frightened and excited and it was but a few minutes when the theatre was empty.

By means of fire extinguishers the flames were quickly subdued before any serious damage was done. The light meters and connections for the entire building was in the booth and all were burned out, throwing the building in darkness the rest of the night. It is thought that both of the machines were damaged and all the films were totally destroyed.

The operator escaped with no injuries or burns.

Chas. P. King, a reader of note will be here Monday evening, February 14, at 8 o'clock at the High School Auditorium. Don't fail to hear him. This splendid entertainer is being brought here by the Parent-Teachers' Association. Admission, Adults 50c and children 25c.

Spring! Spring! Spring! Spring on this opportunity and some get measured for your Spring suit today. Priced from \$15.00 to \$75.00.

WHY—good managers pay by check

It is modern, efficient, safe way to handle funds

Because:

It always gives an exact record of what has been paid out.

It eliminates mistakes in amount.

It helps tremendously in operating a budget.

It always shows where you stand as to current finance.

It helps you refrain from trivial, unnecessary expenditures.

It saves time and trouble in making payments.

It cuts down the danger of losing small or large sums.

It commands the respect of people with whom you deal.

That is why thrifty, progressive pay by check!

Today this bank offers its depositors positive protection against check raisers.

Without cost, without trouble, without expense and both of mechanical or chemical devices.

Come in and find out about it.

Fort Worth Barber Wins 6-Year Fight

Racked by illness, now splendid specimen of vigorous manhood. Credits come-back to Tanlac.

E. C. Mitchell's barber shop at 1310 N. Houston St. is well known in Fort Worth, Texas. "For six years," says Mr. Mitchell, "life was a nightmare to me. Chronic indigestion ruined my appetite and what little I ate caused hours of agony. Gas, bloating, and knife-like pains kept me in misery. Robbed of restful sleep, morning found me tired and listless.

"Six years of that life nearly wrecked me. The very first bottle of Tanlac showed surprising results, and after a few more bottles I was soon my old healthy self.

"I give Tanlac full credit for the splendid health I enjoy today, and recommend it to all my friends. I never expected to enjoy life again as I have enjoyed it since taking Tanlac."

Start on Tanlac today. Let this natural remedy made from herbs, roots and barks, build you up to sturdy rugged health. Your druggist has Tanlac. Get a bottle today. Over 52 million bottles have already been sold.

DON'T NEGLECT

Reversible Names

After reading about the reversible name of one Mr. Plannip, Harrah J. Reynolds of Stonington, Conn., comes forward with his genealogy, wherein a dozen reversible names are disclosed.

"My grandfather was Asa Reynolds. He married Hannah Wells. They had 12 children; all lived to get married. Their children's names were Hannah, Asa, Emma, Irl, Azina, Anna, Zerua, Axa, Atta, Allia, Numan, Harrah. Harrah was my father."—Boston Globe.

Heed the Danger Signals

Headaches, Dizzy Spells, Neuralgia, Bad Breath, Indigestion and even Fits are Nature's warning that there is an obstruction on the track. That obstruction is usually an inactive liver. When these signals appear, don't let another night pass before taking one Bond's Pills at bedtime. You will wake up well next morning.—Adv.

The Truth

"Are you the defendant?"
"No, I've got a lawyer. I'm the guy who stole the car."

Mothers, Do This—

When the children cough, rub Musterole on their throats and chests. No telling how soon the symptoms may develop into croup, or worse. And then when you're glad you have a jar of Musterole at hand to give prompt relief.

As first aid, Musterole is excellent. Keep a jar ready for instant use.

It is the remedy for adults, too. Relieves sore throat, bronchitis, tonsillitis, croup, stiff neck, asthma, neuralgia, headache, congestion, pleurisy, rheumatism, lumbago, pains and aches of back or joints, sprains, sore muscles, chilblains, frosted feet and colds of the chest (it may prevent pneumonia).

To Mothers: Musterole is also made in milder form for babies and small children. Ask for Children's Musterole.

CASCARA QUININE
Get Red Box with parrot

ACQUIRED SIX WIVES; YOUTH HELD INSANE

Scion of Wealthy Family Victim of Leisure.

Fort Worth, Texas.—Married six times during the last year and a half without having obtained a divorce, Thomas W. Wharton, twenty-three years old and scion of a wealthy Texas family, has been declared insane by a jury, which recommended incarceration in an asylum. Wharton is a son of A. B. Wharton and a grandson of W. T. Waggoner, multimillionaire banker and rancher.

Both father and grandfather were in the courtroom of Judge Emmett Moore when the jury returned its verdict. Attorneys and physicians had been employed by the family in its effort to prove that the young man is mentally unsound. His mother was the late Electra Waggoner Wharton, several times married and divorced. Only a few days ago Mrs. Doris Edna Day of Abilene, Texas, latest of his six wives, filed a suit against Wharton for \$150,000 damages.

Testimony developed that Wharton's first marriage was to a California girl in 1925, whose name was not disclosed, while the other marriages were to Isa Riley, June 1, 1926, at Palm Beach, Fla.; Mary Melton, November 9, 1926, at Dallas; Irene Rolfe November 24, 1926, at Bartlesville, Okla.; Leona Murray, October 15, 1925, Colorado Springs, Col.; Doris Edna Day, December 4, 1926, at Abilene.

Unmoved by Trial.

Young Wharton, appearing at least ten years older than his twenty-three years, apparently took little interest in the proceedings and was unmoved in the proceedings and was unmoved. Testimony by Mrs. Henry T. Smith, Jack H. McLean, Wilmer Allison and R. O. Braswell was to the effect that Wharton had become mentally deranged through excessive use of liquor and frequent participation in wild parties.

"Up to the time Tom was fifteen years old he was one of the brightest, healthiest and handsomest boys I ever saw," Doctor McLean said on the stand. "But two years ago his condition became terrible and he has grown worse. His emotions are developed far beyond his intellect and will power and his condition is directly traceable to his excesses."

"The great trouble with this young man," the doctor testified, "is that he has never had anything to do. He was like any other boy, with a lot of energy and ambition, but since he was not put to work he expended his surplus energy in a dissolute life and this is the result. He was given an unlimited expense account and all he had to do was to kill time and spend a fortune any way he pleased. So he isn't altogether to blame. It is this very thing that is America's greatest problem today, but if wealthy parents would make their sons work, nothing can be done about it."

Grandfather Big Rancher.

W. T. Waggoner, the grandfather, owns one of the largest ranches in Texas and early in life knew what it was to be poor and to work hard for a living. Oil wells, located on his ranches, have made him a millionaire many times over. The family owns two of Fort Worth's skyscrapers.

When young Wharton's mother died several months ago in New York, members of the Wharton family employed a special train to make the trip to New York to reach her bedside before death.

China Shy of Machines; Hires Men for All Work

Peking.—Labor-saving devices are scarce in China, where manpower is abundant and wages low.

Two men working with a large, two-handled saw, will spend a day cutting one plank from a rough fifteen-foot timber. A mechanical saw, which would do the job in a matter of minutes, is looked upon with disfavor by the Chinese employer.

Peking's streets are sprinkled the year round by men with tubs and shallow bamboo baskets on the end of a pole. They have been sprinkled in that manner for generations from wells at intervals along the streets. Thousands of men would be thrown out of work if modern methods were substituted for the old practice.

The jarickasha pullers' guild and the wheelbarrow-pushing water peddlers oppose the encroachments of street cars and waterworks upon their business.

Four Sets of Twins Born Out of Total of 23 Births

Moberly, Mo.—A new record for a rural community like this one was established in November when four sets of twins were born out of a total of 23 births, breaking all previous records along that line. The twins were born to Mr. and Mrs. J. H. Grove, Mr. and Mrs. John L. Smith, Mr. and Mrs. Karl L. Bloss, and Mr. and Mrs. Warren Benton.

Invents "Railplane"

Glasgow.—George Bennis, a Scotch engineer, has invented a system of "railplane" transport, by which cars on an elevated track are propelled by electrically driven airplane propellers.

Co-eds Lead

Ann Arbor, Mich.—Women students outranked men students at the University of Michigan last year. The scholarship average for all women was 78.111 and for all men 73.742.

Women, if They Would Be Really Influential, Must Take Politics More Seriously

By SARAH SCHUYLER BUTLER, New York Politician.

THE day of the feminist crusader in the United States is definitely over and the only way now for women to function fully in the political field is for them to start at the bottom and learn the game from the ward canvassing stage on up.

There are only two ways for a woman to get invited to important political conferences. One is for her to be so influential that she is necessary, which is unlikely, and the other is to inspire the leaders with confidence in her political judgment. Women need practical experience in the chores of ward and district work, and they should be judged only by results, as men are.

There is a great need for women in politics, and they are taking more interest every year. They do detail work, painstakingly, and they are capable of great loyalty.

Frequently they are likely to consider politics the main interest of life, and not as only one of the necessary elements of being a good citizen.

To devote the whole of one's life to politics is to warp one's point of view. Yet we find that if we don't keep our women workers busy with campaigns we lose them to other organizations, other drives, entertainments and movements, which will make use of their surplus enthusiasms.

One of the greatest lessons which women should learn is party loyalty. Women should realize that the two-party system, with all its faults, is the best instrument to date for democratic government.

Modern Science of Great Help in Bringing about Realization of God

By DR. HENRY VAN DYKE, Chicago.

Men of science are helping more than men of theologian bringing about a recognition of God in His universe and to utilize our wabbling times. This age is afflicted with spiritual unrest, sterility and general wabbliness, because we have learned a lot about a world but have not made a corresponding advance in how to use that knowledge without abusing it. It is a time of high velocity, vague reaction and unreliable control, producing mental agitation and some spiritual collapse.

The only cure is real religion. To be without God is to be without hope, and men of science are helping more than men of theologian bringing about a realization of God in His universe. Science is proving that everywhere is the reign of law, and you can have that without a lawgiver.

Many are asking now about the future of the church. The church must have its ups and downs, but it will not die if it does its duty, sticks to the task of making the world better, discards the signs of the times and accepts the facts science has proved.

Many Lawyers Unfit Because Lacking in Information and Culture

By HERBERT FORDHAM, New York Official.

Four-fifths of the new lawyers are unfit to be lawyers for lack of information and culture. Most applicants have had of Daniel Webster, though many know little about him. Some do not know where he lived or that he ever held an office. One applicant who was a member of congress from Pennsylvania. Another that he was a lawyer from Kentucky. Another, that he was a leading statesman during the Revolution. Another, that he was prominent during the Civil war. Another, that he held no office, but took part in debates primarily in the South. Another, that he was a southerner who favored strict construction of the Constitution.

Few can name more than one or two members of the President's cabinet. One man named William Jennie Bryan, but placed him in the cabinet of Theodore Roosevelt. Another said that Mr. Hughes and Mr. Baker are now in the cabinet of President Coolidge and that Chief Justice Marshall served as chief justice until he was succeeded by William Howard Taft. Many know almost nothing of English or American literature.

Slang Enriches Tongue by Its Workableness and Its Vividness

By PROF. G. R. POTTER, University of California.

Slang is not the sign of a degeneration of the tongue. It is a development of expression which enriches rather than cheapens the language.

Shakespeare used slang words and phrases in his writings, and so did O. Henry and a number of our writers whose productions are now considered the classics of literature.

Language must change constantly to express the feelings of the people. Many colloquialisms and phrases are more workable and vivid than those grammatically sanctioned.

Grammar is not scientific and it is natural that it changes according to the times. Of course, many of the slang expressions of the day soon die, but the really worthwhile ones, those which best express a certain thought, live and become incorporated into the language.

Christianity Shown to Be Gaining, Even if Orthodox Is Palpably Lagging

By REV. CHARLES STELZE, New York.

While churchianity may have lost out with the people, Christianity has a stronger grip upon them than ever.

The results of a questionnaire sent out by a leading New York newspaper show that the church has no monopoly on religion in this country. Large numbers of people who are not members of the church and who never attend church services expressed sincere belief in the value of religion, accepting the fundamental doctrines which the church advocates.

It is quite apparent, however, that while the church may lay claim to about three-fourths of the population in our cities because of membership within the church, the church as a whole has lost its grip upon a very large percentage of its members.

For some reason, either its message or its program is inadequate. Added to this is the failure of the church to win that great mass of people who believe in religion but have never affiliated with any religious body.

Let's look at the facts. New York is the greatest mission field in God's world.

OPEN DEATH VALLEY TO MOTOR TOURISTS

Winter Months in Sink Permitted to Sightseers.

San Lake City, Utah.—Death valley, noted as the most desolate, the most dangerous and one of the strangest places on this earth, the lowest point on the American continent, is opened up to tourist sight-seeing traffic. Automobiles, buses, criss-cross the great sandy desert and transcontinental tourists may, in comfort, cross the mysterious valley which used to mean death to the emigrant who, beguiled by its numerous mirages, and its patches of salt, which looked like cool water, attempted to cross its desert wastes.

May 15 is to see the last tourist of the season out of the valley. Hereafter, the season will open in the fall, but always, by May 15 the last tourist must be out of the place. For Death valley, so pleasant in the winter, becomes a perfect inferno with the return of the summer sun and temperatures run up to as high as 140 degrees and more. A modern hotel has been built at Furnace creek, and this will be headquarters for the tourists.

Pullman cars are operated to Death valley junction, and gasoline motor cars on the Death Valley railroad go to within 12 miles of the entrance to the valley itself. From this point the automobile buses operate to and through the valley of death. The Death Valley railroad, Tonopah and Tidewater railroad and Union Pacific railroad is the combination which has opened up Death valley to tourist traffic.

Many Perished in Valley.

Death valley's significant name was given it by the very first party of emigrants to look down upon it from the surrounding mountains. There were 30 men, women and children in the party. They thought they saw a silvery stream of water and attempted to cross. When they reached the stream it was just white salt and not a drop of water. With the full fury of the summer sun heating the sandy furnace to 140 degrees, and no water, the trek became a panic. Wagons, cattle, everything was abandoned and groups ranged along the Panamint mountain range at the western edge trying to find water or agress from the inferno.

About a dozen of the party got through Emigrant Wash, found sweet water and survived. That was in 1850. In 1850, ten years later, a prospecting party under Dr. Darwin French, found wagons, guns, cooking utensils, children's toys, etc., lying just where they had been abandoned. They also found human skeletons, some within 300 yards of a water hole. The skeletons were buried by the party.

There are many graves scattered over the desert. Few names are on the markings. "He ran out of water" is the usual lettering.

But when one of that first party of emigrants got to water he found in his hand a piece of pure silver ore. He remembered breaking the shiny "rock" from a ledge of the same material.

That little piece of silver was made into a sight for the finder's rifle. And since that time that lost silver mine has been known as the "Gunsight" mine. Hundreds of prospectors have searched for it. None have found it. Many have found death instead.

Must Lost Mines.

But still there are prospectors in Death valley, and tourists there will see some of them.—In fact, will almost certainly be asked to "grubstake" some old desert personality. "Breyfogle's" butte of gold is just over the mountains here somewhere, the tourist will be told. "I saw it one day a-shining in the sun, but I couldn't get to it. But I'll find it some day. Worth more than all the gold coin in the world, too."

And the "Breyfogle" legend is but one of many. There are many lost mines of fabulous richness still awaiting rediscovery in Death valley.

Three hundred and ten feet below the level of the sea is the floor of its deepest point, and from this point up 11,045 feet above sea level rises Telescope peak, and a little farther on is Mount Whitney, 14,501 feet in elevation, the highest point in the United States. From the same point the tourist will see the lowest and the highest points in the country.

Paris Night Life Cost Up Despite Franc Rise

Paris.—The cost of night life in Paris remains high despite the mounting exchange value of the franc.

A small holiday supper for two at one of the less expensive Montmartre resorts costs: Couvert charge 10 francs; consommé, 25 francs; foie gras, 40 francs; two bottles champagne, 300 francs; government taxes, 120 francs; total, 575 francs. That recently made about \$22 in American money, of which the luxury tax totaled \$4.01.

Last year, with the franc at approximately the same exchange value, the cost of the supper would have been about \$12.50.

Tune In America

London.—British radio listeners want more jazz. They complain that one-third of the programs are lectures, discussions and dissertations.

Expect Speed

London.—British air experts are hopeful that one of the three new planes under construction will attain five miles a minute.

No Fear Now of Offense!

So Sweet and Clean Inside! No Offensive Vapors From the Pores

Once a person realizes the wonderful properties in cascara, no other laxative in the market would ever be considered. It's no trick to "clean out the bowels." Dozens of things will do that. But a little natural cascara purifies the system clear through. Cleanses even the pores of your skin. Removes perspiration as offensive as so much dew! The old-fashioned way was "salts." They get action, but they take the mucous membrane along with the waste matter! Mineral oils are gentler, but they leave the bowels with a film of poisons for the blood to carry off through the pores. But when you gasarize the system, you get rid of all the poisons by normal muscular action of the bowels.

If you have the habit of taking medicine for constipation, or even for auto-intoxication, stop it. For a candy cascara is a delightful form in which to take cascara; children love them, and the taste tempts most grown-ups to have "more."

And what a comfort to know you are in that clean, wholesome condition that does away with any need of deodorants, even in warmest weather! Try a cascara tonight—see how you feel next day, and for days after! With the skin fresh and fragrant. All druggists, 10c and 25c.

CASCARETS

"MY OLD DREAD of unpleasant vapors when I was excited or warm used to spoil a party for me. It was even worse after a purging. It was a good friend who told me the wholesome sweetening of one or two—"

Not a Mechanical Ailment

Recently, a rather nervous young man entered a downtown typewriter establishment. When asked by the office girl what he desired, he replied, "There's something wrong with my typewriter, and I wish you would send some one over to fix it." The girl called the service manager who inquired as to what the trouble might be so the repair man would have an idea as to what to look for.

With an earnest look on his face, the young man replied, "I am not sure, sir, but it doesn't seem to spell right."

Clean Kidneys By Drinking Lots of Water

Take Salts to Flush Kidneys if Bladder Bothers or Back Hurts

Eating too much rich food may produce kidney trouble in some form, says a well-known authority, because the acids created excite the kidneys. Then they become overworked, get sluggish, clog up and cause all sorts of distress, particularly backache and misery in the kidney region, rheumatic twinges, severe headaches, acid stomach, constipation, torpid liver, sleeplessness, bladder and urinary irritation.

The moment your back hurts or kidneys aren't acting right, or if bladder bothers you, begin drinking lots of good water and also get about four ounces of Jad Salts from any good pharmacy; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys may then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for years to flush clogged kidneys and stimulate them to activity; also to neutralize the acids in the system so that they no longer irritate, thus often relieving bladder disorders.

Jad Salts can not injure anyone; makes a delightful effervescent lithia-water drink which millions of men and women take now and then to help keep the kidneys and urinary organs clean, thus often avoiding serious kidney disorders.

Improving Physically

The public health service says that as a whole American children of today are probably a little taller than the children of the same age were one generation back, because of improved sanitary conditions and health habits.

By doubting we come at the truth.—Cicero.

A Girl's Critical Age

READING between the lines, it takes a mother or sister to divine the needs of a girl just budding into womanhood: "My sister was not very strong and had been taking all sorts of pills and stuff for constipation. She was fourteen and of course embarrassed with pimples. So I bought her a large bottle of Syrup Pepsin. She has had no constipation since her complexion is good and she is much stronger, healthier and happier. Now I always recommend Dr. Caldwell's Syrup Pepsin." (Name and address will be sent on request.)

Has Brought Up Entire Families

Syrup Pepsin is a mainstay from infancy to full growth. Sour, bilious stomach, headache, coated tongue, colds, feverish day bills—all vanish. Children play right after a dose. Mothers stop their own terrible sick headache, indigestion, constipation. Makes old folks happy, contented. Truly a family medicine in its highest meaning. Get it today—any druggist, anywhere.

For a free trial bottle send name and address to Pepsin Syrup Company, Monticello, Illinois.

CHAPTER IX

By Harold MacGrath

(By Mail Syndicate) WNU Service

"Mansfield Comes Home." Betty and Cathewe stood alone, being each other for a moment. "Suppose we return to the greenhouse?" she suggested.

He led the way, closing the door gently. "I have tried to avoid this moment, but it was inevitable."

"Why do you hate my father?"

"I do not hate him. We have different ideals."

"I was just beginning to like you!"

"And now?"

"Oh, I don't know! Something dreadful seems to have happened to me. Has my father ever wronged you or yours?"

"No."

"Then why do you attack him?"

He was silent.

"I love my father, and he loves me. He will not stoop to defend himself from calumny. Different ideals! My father has made this city prosperous. What have you, an outsider, done?"

"Not an outsider, just an outcast," he answered.

"Well, I'll give you a surprise. After January first you will no longer direct the policies of your despotic newspaper."

"And what miracle will happen to prevent me?"

"It has already happened. At this moment I control the majority of the stock." The level quality of her tones was Mansfield-like—cold and implacable.

As he was trying to comprehend the significance of this there came a series of rumbles like thunder in the distance. The greenhouse trembled, and there was the crisp tinkle of falling glass. Instinctively both of them wheeled and stared through the glass at the sky in the east. They saw it grow lurid then sharply ruddy.

"The munitions," he gasped. And ran toward the door.

When the cub reporter fell in a faint on the paper-littered floor of Cathewe's office, Cathewe became affected by a strange tightness in his throat. He fell to musing upon the elusive human attribute called loyalty.

"Say, chief," he whispered, "there's something I've got to tell you."

"Well, what have you done?"

"The other day they sent me on a fake interview with Mansfield. Of course, I was kicked out. So this morning I cut out all the news stories and editorials concerning him and mailed them to Miss Mansfield, with an unsigned note that everything was true. Well, the moment I dropped the stuff in the post office, I got cold feet. I tried to get it back, but there was nothing doing. I'm horribly sorry."

"So am I," said Cathewe, gravely.

"All right; I'm fired."

"No. What you did tonight squares that. You're going on the payroll at twenty a week. There's a taxi for you below."

Cathewe called to the city room for someone to help the boy to the cab; and as soon as this was done, the harried editor fell to pacing.

The old man of the sea was still on the shoulders of Digby Hollowell's son, he thought. He would have to start all over again, somewhere, somehow, thanks to the efforts of Miss Mansfield. He would sell the little home and turn back the proceeds to his mother. And what would she do—return to Florence or follow his future fortune?

"Ah, Matthews!" he cried, as a man about his own age came in. "Give me the gist of it. I've been holding up the editorial page for two hours."

"Five dead and forty-seven injured. The biggest story that ever struck this town, Mr. Cathewe, and there is a phase to it I just don't know how to handle. I want your view first."

"What is it?" asked Cathewe.

"Mansfield said that stunning girl of his. That girl goes sailing out there in her dinner gown and turns her big limousine into an ambulance, and makes twelve trips to the hospital."

"The place was totally wrecked. Four tanks of N. T.—you know we had four separate fields of them, so that if an accident happened to one field, the others would be immune—the four fields exploded simultaneously. The girl is in the city hospital—"

"Hurt?"

"No. Just watching at the side of her father's cot. Seems Mansfield was out there inspecting the work on the pipeline when the place blew up. He wasn't touched, but he hung around, giving orders."

"But the hospital?"

"I'm coming to that. What he did was as brave a thing as might happen in France. One side of his face will be badly scarred and his left hand crippled. Dashed into a blazing shack for three Slav kiddies that had been deserted by their terror-stricken father. Coming out, the door frame fell upon him. But he staggered through into the safety zone. He was badly burned, but the kiddies escaped with nothing more serious than singed hair."

"And then?"

"Not a sound from that crowd! First-off, that struck me as rather hard and cruel. But I got the rights of it shortly. Stunned. When they awoke, he was on his way to the city hospital. Looks as if, as if our capital has suddenly been wiped out. We can't jump on the old free-boater hereafter."

"Thank God for that!" said Cathewe. "I'd like nothing better than to go up there and shake his good hand."

"Then the lid is off?"

"Squeeze all you can out of the story. Let the town realize that Dunleigh Mansfield has come home."

"Here's the real climax. The girl carried eleven men to the Good Shepherd. When she got there with the twelfth, there wasn't room. So she had to take the man to the city hospital. She saw to it that the man was given the best aid obtainable. When they had got him all swathed up in cotton, she chanced to turn toward the next cot—and there lay her father!"

Cathewe caught his star man by the shoulders and pushed him from the room. He himself had work to do. He sat down and wrote the editorial which was talked about long after the fire was forgotten. This editorial was headed: "Mansfield Comes Home."

CHAPTER X

The Truth.

Betty, who had slept in the chair beside her father's cot, spread out the Times and with heavy eyes scanned the black headlines.

"Daddy!" she cried exultantly. "You're a hero! The whole town is talking about your deed. Listen." She began reading the account.

"What paper is that?" he asked.

"The Times."

"Get a Herald and see what that paper has to say."

She obtained one and opened the newspaper to page four. "There is an editorial here," said Betty.

"Read it to me."

When she had done—with a voice that had been strong at the beginning but which presently lost its resonance—

"Not an Outsider, Just an Outcast!" He Answered.

nance and broke frequently toward the end—the paper slipped from her hands to the floor and she stared across the row of cots.

"I don't understand," she said, addressing nobody in particular. "Daddy, I bought the controlling interest in the Herald yesterday morning. And last night at Nancy's I told Mr. Cathewe that his successor would be appointed in January."

The light in Mansfield's eye broke into many little points, and the lids worked rapidly. "Betty, you have met him?"

"Twice, accidentally. He remained unknown until last night. He—he said he warred against you because your ideals were different."

"That was sportsmanlike. What do you propose to do with the paper?"

"I don't know now. I don't suppose I had any plans mapped out for the future. I just wanted the attacks against you stopped. He says you have come home. What does he mean by that?"

"I'll mull it over and tell you what I think of it this afternoon. You run along home, and climb into bed. You're about done, honey. And I'll be rested, too, when you get back."

"I am tired. But there is something I—must tell you—before I leave. For more than three years I have been receiving letters. Love-letters, daddy. I can speak now, because the affair has come to an end. When I go up to the house I shall destroy those letters."

"A writer—with a little money," whispered Mansfield, his gaze directed toward the ceiling.

Betty arrived home and went to her room. As the maid was helping her to undress, a crumpled envelope fell to the floor. Betty suddenly recollected that it was the letter Nancy had given her. She started to rip open the end, but desisted. Both her body and mind seemed drugged.

"Call me at one promptly," she said, as her head touched the pillow.

Four hours later she awoke, refreshed and saw the mail on the bed-stand. She reached for it. Fate decided that she should open the large envelope first. Newspaper clippings. She caught a single line in the top

clipping—"The Lord of Polygon Hill Is Always Safely Within the Law."

One by one Betty read them, now burning with fury, now cold with implacable hate. She came to the last clipping. It was the story of an inventor whom her father had betrayed and permitted to die a pauper; a terrible narrative of the ruthlessness of business, of the callousness of self-interest. And yet she knew it could not be true.

The truth! To whom might she go? Not to her father in his present critical condition. . . . Maddox! She flung herself out of bed and ran to the extension telephone. Yes; he could give her a few minutes, but he was hard pressed. Finally he arrived.

She pushed him into a chair and laid the clippings on his knee. "Read them," she said.

He pretended to glance over them. "Yes; all these things are true, little lady. But what your father did last night cleans the slate. In the eyes of God as well as man. You baby! Don't you dare sit in judgment on your father at this moment."

"And I—I have misjudged Brandon Cathewe?"

"I'll tell you. A few hundred years ago he would be wearing a surcoat with a cross on it and he would be outside the wall of Jerusalem. I loved that boy. I wish God had given me a son like him. And your father admires him secretly. He tried to advise you because he didn't want you to know him as he is. It would have made you doubt your father. You have met his mother. He couldn't be very bad with such a mother. He misjudged you, too. He thought you had deserted France, that you were only a giddy butterfly."

"Whereas—I am an ant. Who is he, really? From where does he come?"

"There's only one way to find that out. Go to his mother."

"Go to his mother," repeated Betty, dreamily. "But I am keeping you from your patients!"

"I'm mighty glad you called me in. I don't know who could have mailed you those clippings, but he's done a fine service for us all. Good-by, little lady. And remember!"

After the doctor had gone Betty remained motionless for a space. A new thought had occurred to her. Brandon Cathewe. She would give him back his newspaper. Having come to this decision, she returned to her room. It was then she espied once more Nancy's letter. This time she opened it.

She had to approach a window to decipher this scrawl: "From George Cottar to Nancy Maddox, his friend."

It came to her, upon this second perusal, that the handwriting though in pencil, was strangely familiar. Then she came upon a little cross where a period should have been.

There fell upon her senses a roaring like the falling of mighty waters. Until this died away, she was powerless to move. When she could impart mobility to her feet, with her heart fluttering wildly she ran to the precious Florentine box. She opened a letter and laid it beside the sheet of manuscript. The same hand had written them both.

Immediately she flew out of the house and rushed off to Nancy's.

"Oh, Nancy! Where can I find him?"

"You want father?"

"No, no! I want George Cottar—the man who wrote those letters?"

Nancy led the way into the living room and stopped only when she reached a window from which the street was to be seen.

"What do you see from this window?" she asked.

"From here? I seem to be very stupid, for I don't see anything."

"See, then, that temple of fine dreams and music—the little white house with the picket fence. For the man who wrote those letters to you, and George Cottar, and Brandon Cathewe—they are one, Betty. Why don't you go over?"

"All right, I will," answered Betty and with the impetuosity of ardent youth she again dashed out of the house.

Betty crossed the street, opened the gate and latched it behind her, and approached the fateful door.

Mrs. Cathewe came forward and, with that interpretative insight which was the quality of her genius, gathered the girl in her arms.

When they were seated upon the divan, Betty locked her fingers tightly and began.

"I did not know until last night that he was the editor of the Herald. I was very stupid through it all. Then last night at Nancy's the truth came out. I was hard and bitter to him. I did not know then that my father—"

A hand flew toward her lips. "You shall not say it!" cried Mrs. Cathewe. "Your father was magnificent last night. You should have heard sonny praise you both. He was happy over it."

"Happy?"

"Yes. A phase of his task has come to a happy ending. We can leave Bannister now, content."

"Leave Bannister?—because I told him that after January he—No, no! He shall have his newspaper back."

"Did—he ever tell you about some letters he wrote to me?"

"Yes. Between sonny and me there are no secrets."

"Did he mean what he wrote?" asked Betty, miserably with shame.

(TO BE CONTINUED.)

The "wild goat" mentioned in the libbie is an ibex.

AMERICAN CITIES BELOW SEA LEVEL

Scene of Recent Earthquake an Unusual Region.

Washington.—The most recent North American earthquake which affected the territory around Calexico, Calif., and Mexicali, Mex., on the international border, inflicting heavy damage on both towns, occurred in one of the most unusual regions on the continent. A bulletin from the Washington headquarters of the National Geographic society describes this unique area.

"The twin cities, one in the United States, one in Mexico, lie near the southern edge of the great Salton sink or more properly now, the Imperial valley, which, with its numerous towns, is almost entirely below sea level," says the bulletin. "The sea level line runs between the two towns most affected by the earthquakes, Calexico being only a foot or so above the sea, and Mexicali being a few feet below."

An International Bonanza.

"Until the beginning of the Twentieth century the valley on both sides of the border was little better than a desert, uninhabited and given up to mesquite and other bushes of the arid region, and to coyotes and rattlesnakes. It was long realized, however, that the soil was exceedingly fertile and that, since the land lay below the level of the Colorado river, 35 miles east of the edge of the valley, gravity irrigation was easily possible from that large stream. In 1901 water was turned into the depression for the first time. Since then population has flowed in and the valley has become one of the most valuable farming sections of the United States.

"Due to the unusual life of the land the whole development has been to a large extent international. The main canal, starting in the United States near Yuma, dips into Mexico, runs roughly parallel with the border for 45 miles, and then turns back into the United States near Calexico. In 1905 floods in the Colorado washed out the canal headgates. Practically the entire flow of the great stream turned into the canal, washed it into a deep new stream bed, and cut its way across country to the deepest part of the Salton sink, creating there a large inland sea. It was only after a long and costly battle by engineers that the river was turned back and property worth scores of millions of dollars was saved.

"The Salton depression is over 250 feet below sea level. Drainage from the irrigation canals and ditches seeps into it, and the sea is still more than forty miles long and ten miles wide. Between the south end of the sea and the international border, 30 miles south, lies the more highly developed of the valley's irrigated farms and its most thriving towns.

"There is an intimate relation between the Imperial valley country and the Grand canyon of the Colorado, not suspected by the casual observer. This was the great dumping ground for the hundreds of cubic miles of material washed from the plateau of Arizona and Utah through the centuries as the huge canyon was dug out. The farmer who today raises his cotton or garden truck or cantaloupes on the rich silt of the valley, has the Grand canyon to thank for his prosperity.

"At one time the long, narrow Gulf of California extended inland beyond the present northwestern end of Salton sea. Into this body of water the Colorado dumped its vast cargo of silt until the growing land dammed off the northern end of the gulf, and the river turned south of the barrier of its own building. Behind its dam the Salton sea then covered all the present Imperial valley. The old beach line can be seen today running along a few feet above the line which survivors' instruments now mark out as sea level.

"Since that distant geological day, the waters of Salton sea have evaporated and it has shrunk to its present, relatively small proportions. But for the interposition of man after the break of 1905-6 the sea would have grown again to its old size, drowning a region which now produces close to \$100,000,000 worth of crops each year. Because of the great values at stake and the possibility of another break, a canal will probably be constructed entirely inside the United States border. In spite of the expensive cutting that will be necessary through high ground.

"It is believed that the famous San Andreas fault passes through the Imperial valley and comes to an end at Black Butte or Cerro Prieto, 20 miles south of Calexico. Adjustments along this fault are supposed to be the cause of the recent earthquakes, and news dispatches have stated that Black Butte itself has given forth vapors. There are other evidences of at least secondary volcanic activity in the region. Small mud volcanoes spatter away in the edge of Salton sea, and there is another group on the Mexican side hardly a stone's throw from Black Butte. 'Mud Volcano' is in a way a misnomer for these little mounds of boiling mud—a fact that is sometimes recognized by calling them 'mud geysers.' Most of them, in the matter of size, bear to true volcanoes the relation of the proverbial molehill to the mountain."

Strange Friends

Herrick, Pa.—A dog and a crow, living in apparent perfect peace, compose the strangest pair of friends hereabouts.

"Did He Really Say It?"

By ELMO SCOTT WATSON

NE of the favorite beliefs of the American people—probably because of the subtle flattery which it implies—is that Lincoln once said, "You can fool all the people some of the time, and some of the people all the time." Although some persons confuse this quotation with P. T. Barnum's "the people like to be fooled," probably ninety-nine out of every hundred who have occasion to quote this epigram believe implicitly that the words are Lincoln's.

But did Lincoln ever really say it? Rev. W. E. Barton, probably the best-

ABRAHAM LINCOLN

"You can fool all the people some of the time, and some of the people all the time, but you can't fool all the people all the time."

late John Dickinson Sherman, feature writer for the Western Newspaper Union until his death in 1925, then Hyde Park correspondent for the Chicago Tribune, and his friend, Clarence P. Dresser, Hyde Park correspondent of the City Press, succeeded in boarding the Vanderbilt special when it stopped at Michigan City, Ind., for water. After the train was on its way they were admitted to Mr. Vanderbilt's private car and granted an interview.

In the course of the interview Mr. Sherman put this question to the railroad magnate: "Do your limited express trains pay or do you run them for the accommodation of the public?"

"Accommodation of the public!" exclaimed Mr. Vanderbilt. "The public be damned! We run them because we

GEN. W. T. SHERMAN

"War is hell!"

informed man of the life of Lincoln today, whose investigations gave to the world last year the truth about Lincoln's famous Bixby letter, recently set out to learn the truth about the "fool the people" quotation, which is said to have been uttered at Clinton, Ill., between the second and third joint debates with Douglas. His conclusion in the matter, as given in an article in a recent issue of the Dearborn Independent, is incorporated in the following statement:

"To my mind the strongest negative argument is not that so few people remember hearing Lincoln say those words, but that, if he really said them at Clinton when Douglas was not present, he did not repeat so apt a phrase in one or more of the five remaining joint debates. He missed five excellent opportunities to use effectively an undeniably apt expression.

"Nevertheless I incline to the belief that Lincoln actually used those words

ADMIRAL W. S. SIMS

"We can start at once. We made preparations on the way."

and at Clinton. The evidence is far from conclusive, but it is not lacking in probability. It sounds like Lincoln, and the occasion alleged is one in which the words might appropriately have been used.

But if Lincoln never spoke this clever apothegm, then it would almost seem possible to fool all the people all the time; for all the people, virtually, believe these words to have been Lincoln's.

If "the people" remember that Lincoln said they couldn't be fooled all the time, because they like to believe that, then "the public" well remembers that it was once damned by a Vanderbilt, probably because of popular prejudice against Wall Street and men of money. The "public be damned" phrase is one over which there has been much dispute. It is usually, and erroneously, ascribed to "Commodore" Cornelius Vanderbilt, and members of the Vanderbilt family have often denied that it was ever uttered by one of their number. There has also been some dispute as to the circumstances under which it was uttered, but the facts in the case are these:

In 1882 William H. Vanderbilt, son of the "Commodore," was on his way to Chicago on a special train. The

CORNELIUS VANDERBILT

"The public be damned!"

HORACE GREELEY

"Go West, young man, go West."

tain that Sherman never said it, but that the expression was first used by Charles Francis Adams at the thirtieth annual dinner of the Confed-

erate Veterans' camp of New York on January 25, 1903. It has never been found in any of Sherman's sayings or writings. So there you are!

Horace Greeley was not the first to say, "Go West, young man, go West!" although history says that he did. The man who first said it was John L. B. Soule, editor of the Terre Haute (Ind.) Express. In an editorial about the West's opportunities for young men he declared that Horace Greeley could never have given a young man better advice than contained in the words, "Go West, young man." This was stated merely as Soule's opinion of what Greeley might have said, but newspapers all over the country repeated the saying and credited it to Greeley. Finally the famous editor of the New York Tribune reprinted Soule's editorial with this footnote: "The expression of this senti-

ADMIRAL GEORGE DEWEY

"You may fire when ready, Gridley!"

ment has been attributed to the editor of the Tribune erroneously. But so fully does he concur in the advice it gives that he indorses most heartily the epigrammatic advice of the Terre Haute Express and joins in saying, "Go West, young man, go West."

Admiral Dewey, standing on the bridge of the Olympia at the battle of Manila bay and watching the oncoming Spanish fleet, remarked quietly, "You may fire when ready, Gridley." So says history, and it has become one of our favorite quotations. But in an interview published in the Chicago Evening Post of October 25, 1920, Dewey is quoted as saying "that the American policy toward Arguinolds should be 'straight from the shoulder' with plenty of force behind it, that he did not tell Gridley to fire when ready, and that he does not want to be President."

And it is now known that Pershing did not stand before the tomb, make

GEN. JOHN J. PERSHING

"Lafayette, we are here!"

an appropriate gesture and say, "Lafayette, we are here!" That yarn originated when Colonel Stanton of Pershing's staff stood before the tomb and said, "Lafayette, nous sommes la!" But it was soon tacked onto the commanding general, and even President Wilson in a speech before the French chamber credited it to Pershing. The general himself has denied that he ever said it, as he has denied that his offer of American troops to General Foch was made in the form of the historic, "All that we have is yours." However, he did say in 1917, "Germany can be beaten, Germany must be beaten, Germany will be beaten."

When a British admiral asked Admiral William S. Sims when the first division of American destroyers could be ready for business, he replied, "We can start at once. We made preparations on the way." Or so the newspapers reported it at the time. But in a letter to the New York Times, dated February 21, 1919, from London, the admiral denied positively that the question was ever asked him or that he ever made that reply.

Saint Valentine's Day

It is a popular error to assume that February 14 is to be associated with a single saint. The day belongs to no fewer than seven persons in the comprehensive ecclesiastical calendar, and the head of an eighth is venerated at this time. They came from France, Belgium, Spain and Africa, and the best-known members of the group were a bishop of Umbria and a priest of Rome, both of the Third century, A. D.

History and legend are vague in reciting the details of their personal history. The lover's festival is apparently to be connected not with the birthday of these holy men but with an early pagan festival that was part of the Roman Lupercalia. The medieval custom in England and on the continent was to put the names of young men and women in a jar and draw them out on Saint Valentine's eve. Those whose names were thus linked had to make presents to each other and agree to be each other's

valentines for the ensuing year. By and by the women were released from the obligation to make gifts and only the men sent presents or missives expressive of affectionate sentiment.

Famous English River

Caesar says that at the time of his invasion of Britain the River Thames in England was called "Tamesa." Other early writers call it "Tamesa." In early Saxon times the river was called "Thamis." The Thames above Oxford often is called "Isis."

Texas, Texas.—I was in a serious condition of health when I arrived at middle life and as I had heard of so many being wonderfully benefited by Dr. Pierce's Favorite Prescription at that age I decided to try it. It proved to be the proper medicine and I cannot praise it too highly for the benefit I received. It relieved my aches and pains—saved me a lot of suffering, and left me in good health which I still enjoy.—Mrs. C. E. Shipp, 307 Oak St.

All druggists, Tablets or Liquid. Send 10c to Dr. Pierce's Invalids' Hotel in Buffalo, N. Y., for a trial pkg. of the tablets and write for free advice.

FOR OVER 200 YEARS

haarlem oil has been a world-wide remedy for kidney, liver and bladder disorders, rheumatism, lumbago and uric acid conditions.

correct internal troubles, stimulate vital organs. Three sizes. All druggists. Insist on the original genuine GOLD MEDAL.

Test of Spiritualism
A delicate instrument has been invented by Prof. Harry Price, director of the National Laboratory of Psychological Research in London to establish definitely whether alleged spirits of dead persons do actually speak from space, as is contended by spiritualists at seances. Scientists are eagerly awaiting the first trial of the new machine.

Children's Colds
Safely and quickly relieved—the exclusive Luden menthol blend is soothing—healing—and does not upset the stomach. Children love them. **MENTHOL LUDEN'S COUGH DROPS**

New Skyscraper Idea
A 108-story skyscraper is being planned in New York city. Certain features of the steel design are being patented, notably a method of connecting each column to the girders in such a way as to make the building rigid and proof against swaying in a gale more than many other buildings of half the height. Heretofore most skyscrapers have relied solely on wind bracing in the side walls.

A simple, old-fashioned medicine, as good today as in 1817, is compounded in Wright's Indian Vegetable Pills. They regulate the stomach, liver and bowels. ADV.

RADIO

Radio Beacon to Aid Ships at Sea

Device Will Obviate Danger Hovering Over Ocean-Going Vessels.

Collisions between ships passing in a storm or fog will be avoided in the future by the use of a new radio invention. This announcement was made by Federal Brands, Inc., following exhaustive tests along the Pacific coast by the United States Light-house service, the Standard Oil company and the Federal Telegraph company, of California, and has created a stir in shipping circles.

The new device, which has proved satisfactorily that it will remove the danger hovering over vessels at times of low visibility, causing loss of life and valuable shipping, has been named the Kolster mobile radio beacon in honor of its inventor, Dr. F. A. Kolster, who also invented the radio compass. It is described as a low power automatic radio transmitter, which sends out a characteristic signal over a short distance.

Installed in Pilot House.

Installed in the pilot house, independent of the ship's radio telegraph, it is "turned on" in thick weather. The radio signal it transmits is heard by any ship within a short distance, which by the use of the radio compass or direction finder, determines the position of the approaching vessel.

The official tests were made by Captain Rhoades, superintendent of light-houses, on board the lighthouse tender Sequoia; by Dr. Kolster, who was formerly chief of the radio division of the bureau of standards, and by

the Standard Oil tanker J. C. Fitzsimmons, between San Francisco bay and San Pedro harbor. Reception of the instrument's automatic signal was declared as satisfactory for tracing a ship's course as seeing the craft's lights on a clear night.

The mobile beacon is about as large as a radio receiving set placed on a living room table and will be inexpensive. It can be placed anywhere in a pilot house and does not require an experienced operator.

"It is a well known fact that danger is ever present, in foggy weather, of ships coming together," said E. C. Bennett, chairman of the technical committee of the American Steamship Owners association, in commenting on the invention.

Inventor Is Distinguished.
"The present method of one ship locating another by attempting to note the sound of the siren, whistle and bell is at best primitive. Any device that will permit one vessel to locate accurately another vessel in foggy weather, as the Kolster mobile radio beacon gives promise of doing, will be welcomed by all who are engaged in the shipping business."

Doctor Kolster, the inventor, has become distinguished in the development of radio during the last 25 years. He invented the radio compass, the decremeter for measuring wave lengths, and the radio fog signal. The small rotating loop now used on broadcast receivers originated in his radio compass as a direction finder. In 1912, while in charge of radio in the bureau of standards, he was appointed technical adviser to the American delegation at the International Radio convention in London. At present he is in charge of the research laboratories of the Federal Telegraph company at Palo Alto, Calif.

SIMPLICITY OF RADIO

By POWEL CROSLY, JR.

RADIO WAVES

For today's discussion we had best go down to the old swimming hole, for there we can study at first hand some analogies of important radio phenomena. We will pick up some stones from the edge of the pond, and toss them out into the clear, still water. As each pebble splashes through the surface it will start a train of circular waves, traveling out in all directions toward the shore. In a similar manner the radio waves from a broadcasting station travel out in all directions.

How Radio Waves May Be Linked to Water Waves.

If we can find a small board, or piece of wood, we will perform an experiment that will clear up another point. When we throw this board into the pool it will bounce up and down several times, sending out a train of waves. Now we may picture a vibrating electric current sending out radio waves in a similar manner. The radio waves are supposed by some scientists to travel in a certain invisible substance, called the "ether," that pervades all space, and all material bodies. Now we may picture the vibrating currents bouncing up and down, and splashing the surrounding "ether" up and down, so that a train of waves is formed in it. Whether or not this "ether" idea is perfectly accurate scientifically does not matter. At least it gives us a picture to help us understand how radio transmission is possible.

Radio waves seem very strange and mysterious because we cannot see them, nor hear them, nor feel them—like water waves, for instance. But, after all, when one talks into a telephone one cannot see, nor hear, nor feel the electrical energy traveling along the wire to the other party. Nevertheless, when our friend at the other end of the line calls us several kinds of names for waking him up so early in the morning, we are inclined to believe that something—whatever it is—did travel along that little wire. Scientists tell us that this something is an electric current, controlled by the voice of the speaker; and we accept the scientists' word for it, and regard it no longer as a mystery. Now it is just as logical to accept the scientists' word for the existence of radio waves, and to regard them as intimate friends rather than as mysterious strangers.

After all, many every-day experiences are due to waves, or wave motions. Heat, light and X-rays, as well as radio, are supposed to travel as waves. Sound is known to be due to vibrations, or waves (a wave may be said to be simply a traveling vibrating motion) in the air and other material

substances. Strike a key on your piano and with your finger you can feel the string vibrate as it sends out sound waves.

So the mechanism in one's telephone transmitter picks up the sound, and, by means of it, controls the strength of an electric current traveling over a wire; and when this electric current reaches the receiving station it creates sound in the telephone receivers. In a radio system, on the other hand, space is substituted for the wires, and radio waves for the electric current. Otherwise the action is the same.

Many Kinds of Radio Tubes Now on Market
The great variety of tubes on the market today makes a confusing problem for the uninitiated. There are amplifier, detector, ballast and rectifying tubes, and in each of these classes there are many subdivisions. As a general rule, any tube except an amplifier, rectifier, or ballast tube may be used most anywhere in the set. A tube such as the 201-A or the 301-A will operate as a radio-amplifier about as well as when it's used as a detector or audio-amplifier. The peculiarities of individual tubes may cause one to operate a little better in one position than in another, but by switching them around you will soon discover where they are most efficient.

Tubes? There were never so many different kinds as there are today, and at such low prices. It wasn't so long ago that a tube cost \$7 or \$8; now they almost give them away.—The American Boy Magazine.

277 Stations Operating Outside United States

A total of 277 broadcasting stations are now being operated outside of the United States, as against more than 500 stations that are licensed in the United States, according to the most recent statistics of the electrical division of the Department of Commerce. In addition to these foreign stations there are approximately 30 other plants now projected or actually under construction in all parts of the world.

The most important of these new stations will be the two voices of the Irish Free State at Cork and Dublin and the station that is being erected by the International Esperanto association at Geneva. Madrid has two new plants that are expected to be opened this winter. Milan and Naples are erecting their first stations and Austria is developing a project for the installation of five new stations.

Wave Trap Is Not Cure for Poorly Made Set

A properly connected and operated wave trap will eliminate the signals of an unusually strong and nearby station that causes interference, but it cannot compensate for broadness of tuning inherent in the receiver itself. If the dial settings for all stations are rather broad do not look forward to a wave trap as a cure-all for the trouble. Overhaul the set and make arrangements for a more selective circuit.

Radio in Russia

The progress of radio in Russia is shown by the installation of more than 6,000 receiving sets in workers' clubs and nearly 12,000 sets in public reading rooms.

Special Offer to Victims of Indigestion

Your Druggist Says Pleasant to Take, Elixir Must Help Poor Distressed Stomachs or Money Gladly Refunded.

You can be so distressed with gas and fullness from poor digestion or dyspepsia that you think your heart is going to stop beating. Your stomach may be so distended that your breathing is short and gaspy. You are dizzy and pray for quick relief—what's to be done.

Just one tablespoonful of Dare's Mentha Pepsin and speedily the gas disappears, the pressing on the heart ceases and you can breathe deep and naturally.

Oh! What blessed relief; but why not get rid of such attacks altogether? Why have them at all?

Especially when any druggist anywhere guarantees Dare's Mentha Pepsin, a pleasant elixir, to help you or money back.

As to Efficacy

Idea of what constitutes efficacy are purely a matter of geography, according to Frederick Thiels in an article in Liberty. "Chinese women wear long trousers that fit tightly around the waist and hips," he points out. "So do sailors in the American navy. Therefore, it is evident that a Chinese woman, so dressed, observing the toughest tar of the battle fleet, would consider said tar effeminate and beneath the notice of a woman."

FRENCH RAILROADS ADOPT ELECTRICITY

Scarcity of Domestic Fuel Causes Change.

Washington.—France is making a strong bid for leadership in mileage of electrified railroads," says a bulletin from Washington headquarters of the National Geographic society.

"More than five hundred miles of French railroads, formerly traversed by the steam engine, have been electrified. This is about one-third of the mileage of electric railroads in the United States.

"Almost simultaneously with the celebration of the electrification of a portion of the Illinois Central in the vicinity of Chicago, recently, came the report from Orleans, France, that the first through electric train arrived from Paris, 75 miles northwest of the 'City of Joan of Arc.' The train was drawn by an American-made electric locomotive.

"Electric trains are not new to the inhabitants of either Paris or Orleans for the P.O. (as the Paris-Orleans railroad is familiarly known to the Frenchman) has been electrified for 60 miles in the dense traffic sections in the neighborhood of both cities for several years, corresponding to the sections of the New York Central, the Pennsylvania, and the New York, New Haven & Hartford railroads running into New York city.

"The completion of the remaining 15 miles and purchase of new equipment was made possible by loans from the United States.

"The rapid increase in electrification in France is largely due to the scarcity of domestic fuel and the high cost of transportation, particularly to the railroads and industries of the South and West. France imports large quantities of coal.

"In Germany, Switzerland, Norway and Sweden, where electric railroads are owned by the government, power is generated for the road's use only. France plans to install equipment which will also supply light and power to cities and villages along the right of way, thus saving the enormous tonnage of coal used in electric power plants.

"Paris has long desired to bring about economies in coal consumption by making use of the water supply of the central plateau. This desire dominated the movement to hasten the completion of the Paris-Orleans line."

Mad Prairie Dog Runs Amuck, Bites Children

Austin, Texas.—Not infrequently patients are received at the State Pasteur Institute here for serum treatment to prevent rabies after having been bitten by mad dogs, cats, and even coyotes, but not until the other day was it known that prairie dogs are subjected to the dread malady.

Ordinarily a prairie dog is a meek creature. When one of these little animals, which was kept as a pet by T. T. McDermitt of Levelland, Texas, far out toward the New Mexico line, 500 miles from Austin, became ferocious and ran amuck in the little town, biting more than a dozen children, the matter was immediately reported to the Pasteur institute.

The head of the prairie dog was sent here for examination and it was found to be afflicted with rabies. Three children of Prof. and Mrs. J. W. Wells and a child of Mr. and Mrs. W. C. Cogburn, all of whom were bitten by the mad animal, were brought here for treatment. Several other children who were bitten did not take the rabies treatment.

Airplanes Aid Drive Against Malaria in Cuba

Havana, Cuba.—Airplanes will be used to assist in stamping out malaria fever in eastern Cuba, where several thousand cases have been reported, if plans of Dr. Fernando Rensoll, director of sanitation, are put in force. The airplane will be used for spraying the breeding places of mosquitoes.

Doctor Rensoll also plans a general drainage of swamp land and the free introduction into rivers and streams of larva-destroying fish. A commission with full power to act in the cases of immigrants affected by malaria will be recommended.

The plan calls for a yearly appropriation of \$3,000,000 to carry on the work.

Bar Fat Men

New York.—Fat fellows can't be firemen. A 248-pounder lost court proceedings for his reinstatement.

Each Package Weighed Alike, Sizes Differed

Seattle, Wash.—Striking examples of the disparity in specific gravity of two objects was shown here when the steamer Northwestern from Seward, Alaska, docked. In her cargo were two items weighing exactly the same, but which for size seemed all out of proportion. One was a five-pound box of tin ore from newly developed mines on the Kuskokwim river measuring five inches each dimension; the other five pounds of sidle-down, the minute feathers plucked from breasts of a species of Northern duck. The bag of duck feet measured three feet thick x feet long.

Carrying a big load? SHREDDED WHEAT

will lighten it by insuring easy digestion and bodily strength—crisp shreds of baked whole wheat

Forgot Year Zero

Whether the year 1930 or the year 1931 A. D. is the two thousandth anniversary of the year 70 B. C. is a subject that has been agitating the British press. The Times says 1930 but one of its correspondents, Doctor Glover by name, maintains that it is 1931.

The latter view is based on the theory that, among other errors, historians have mistakenly omitted the year zero from their computation of time on an A. D. and B. C. basis. The system now is that the morning after December 31 B. C. was January 1 A. D. But astronomers know better and insist on inserting a zero year at this point.—Living Age.

Lift Sunday Restriction

In Scotland, where the Sabbath is rigidly observed, the municipality of Glasgow, in spite of protests of Sab-batarians will allow children's swings in public parks to be used on Sundays.

"DANDELION BUTTER COLOR"

A harmless vegetable butter color used by millions for 50 years. Drug stores and general stores sell bottles of "Dandelion" for 35 cents.—Adv.

Bananas as Staple Diet

The pulp of the banana is nutritious and constitutes an important food. In some of the Pacific islands it forms almost the staple diet of the natives.

Safe

Accept only "Bayer" package which contains proven directions. Handy "Bayer" boxes of 12 tablets. Also bottles of 24 and 100.—Druggists.

Private Gas Well

E. C. Hamilton, who lives east of Independence, Mo., has earned a name as a resourceful fellow. He decided that a gas well would be a handy thing to have about his yard, so he went about 50 feet from his house and dug one. His well, which has a pressure of 475 pounds, has been used and the gas is piped to Hamilton's house, being used for heating, cooking and lighting.

Fashion Note

There is only a year's difference in the ages of Thelma and Edna, so Edna usually falls heir to Thelma's outgrown dresses.

As her mother put another one on her she sighed: "I wish I'd grow faster than Thelma's dresses!"

The handwork of eight men is claimed to be equalled by a Michigan inventor's wall plastering machine.

CHILDREN CRY FOR FLETCHER'S CASTORIA

MOTHER:—Fletcher's Castoria is a pleasant, harmless Substitute for Castor Oil, Paregoric, Teething Drops and Soothing Syrups, especially prepared for Infants in arms and Children all ages.

To avoid imitations, always look for the signature of *Wm. C. Fletcher* Proven directions on each package. Physicians everywhere recommend it.

"RUSTLING FOR CUPID"

—Get the best and cheapest Peerless fence sold in Texas exclusively through C. W. Innes, State Agent, San Angelo, Texas.

CARD OF THANKS.

The management takes this means of their sincere thanks to the many kind people who assisted in extinguishing the fire at the Princess Theatre Wednesday night. Without your help it might have resulted in a disastrous fire. Patrons who were at the show Wednesday night will kindly call at the box office and we will refund your money.

Sincerely yours, PRINCESS THEATRE.

—Let me have your fence problems. I will finance them on long time at wholesale prices. C. W. Innes, State Agent, San Angelo, Texas.

LOST.
A new basket ball with initials R. K. on it. Lost between 3-mile and Big Hill. Finder please return same to Jim Kerr and receive reward.

NOTICE!

Dr. A. Hodges, Dentist, has arrived in Sanderson and will have his office across the street from the Bohlman Confectionery. Make your appointments early.

You wear a shirt one time, and it's soiled. Your suit is soiled also, but does not show. Steam kills every germ in a garment. If you care nothing about your appearance, at least protect your health.

EMPIRE TAILORS.

NOTICE!

Both our ranches have been made State Game Reserves. Anyone hunting thereon is subject to prosecution by State Law. T. M. PYLE, CHAS. DOWNIE.

—I am better able to handle your fence problems now than ever before. A large factory set aside to handle my business first. Plenty capital to finance your fence deals. Write me. C. W. Innes, State Agent, San Angelo, Texas.

Plaiting skirts, panels, ruffles; hemstitching; covered button tailored buttonholes. Mrs. C. S. Houston, Uvalde, Texas.

How Doctors Treat Colds and the Flu

To break up a cold overnight or to cut short an attack of grippe, influenza, sore throat or tonsillitis, physicians and druggists are now recommending Calotabs, the purified and refined calomel compound tablet that gives you the effects of calomel and salts combined, without the unpleasant effects of either.

One or two Calotabs at bed-time with a swallow of water,—that's all. No salts, no nausea nor the slightest interference with your eating, work or pleasure. Next morning your cold has vanished, your system is thoroughly purified and you are feeling fine with a hearty appetite for breakfast. Eat what you please,—no danger.

Get a family package, containing full directions, only 35¢. At any drug store. (adv)

DRYDEN NOTES

Mr. and Mrs. Boyd Cox motored to McCamey Saturday, taking as their guest Mrs. W. D. Chandler.

A dance was given Friday evening at the Arnet Ross ranch. Quite a few people from Dryden attended.

A. D. Brown and children were in Dryden for a brief visit Sunday from Sanderson.

Miss Elsie Chandler returned Wednesday from San Antonio. Mrs. Alfred White was a Dryden visitor Friday.

Mrs. H. D. Johnson spent Sunday in Sanderson with Mrs. C. H. White.

Mrs. Grant W. Wheaton spent the week-end in Marathon as the guest of the W. R. House family in Marathon.

Mrs. Elmo Taylor visited in Dryden Sunday.

Mr. and Mrs. W. A. Lattimer, Mrs. M. Miller, Mrs. John Reynolds and baby, and Mrs. J. C. Bailey and little Dorothy Bailey enjoyed a motor trip to Langtry Sunday afternoon.

Mrs. W. D. Chandler left Dryden Tuesday for a brief visit in Del Rio.

—I will give you wholesale prices on Peerless fence delivered anywhere in America. I do not sell dealers but will give ranchmen wholesale prices. C. W. Innes, State Agent, San Angelo, Texas.

Bridge Party.

Mrs. E. P. Franklin was hostess to the regular Wednesday bridge club last week at the home of Mrs. W. H. Savage.

After playing the usual tables of bridge scores were added. The high score prize, a hand embroidered dresser scarf was won by Mrs. W. H. Savage. The second high score prize, a hand embroidered vanity dresser set went to Mrs. E. F. Howard.

Raisin pie with whipped cream and hot coffee were served by the hostess.

S. C. Bodkin has returned from El Paso, where he has been the past week visiting friends.

—The only way to get full value out of your farm or ranch is to fence it properly. I sell Peerless fencing direct from factory at wholesale prices. I have the money to finance your fencing problems. Write me. C. W. Innes, State Agent, San Angelo, Texas.

NOTICE TO PUBLIC

After February 1st, our professional charges will be as follows:

Obstetrical cases in town \$50
" " " country \$50 and mileage
Day visits in town \$3.00
Night visits in town \$5.00
Prescriptions \$2.00
Trips to country \$1.00 per mile one way.

W. H. DOTY, M. D.
P. F. ROBERTSON, M. D.

Eagles Split a Double-Header
(Continued from page 1)

Line-up:

Sanderson (23) (26) Alpine
Franklin—F (6) (2) F—Smith
Miller—F (6) (5) F—Watson
Qualtrough—C (2) (13) C—Skev'ton
Landers—G (8) (4) G—Lease
Strange—G (0) (4) G—Roberts
Substitutes: Eagles, Hall, G (1).
Referee—Walter Grigsby.
Umpire—Sonny Carter.

Sanderson 17, Alpine 16.

The second game of the series with Alpine was not nearly so fast as the first. Neither team played the same brand of basketball that they had exhibited the day before.

The game opened with a great deal of fight, but after a few minutes, both teams apparently showed signs of weariness. The Sanderson boys seemed determined to avenge their defeat of the day before, and in the first quarter this tended to make them over anxious, and many crisp shots were missed. The score at the end of the half was 9 to 8 with Sanderson leading.

At the opening of the second half, both teams guarded furiously, and the entire third quarter was scoreless. Early in this third quarter Qualtrough, Eagle center, gave completely out, and had to be taken from the game. This hurt the Sanderson offensive to some extent. Qualtrough was re-entered in the fourth quarter, and it was his two field goals together with one by Franklin that finally gave the game to Sanderson. In the first part of the fourth quarter the Bucks gave the local fans a scare when they piled up a five point lead. The Eagles seemed too tired to make any great effort to turn back their attack, and it was only by using several substitutes that the tide was finally turned.

Franklin was the outstanding star of the Eagles in this game. He made nine out of the 17 points of the Eagles and was the only man on the team that played with any consistency. Qualtrough played well for parts of the game, but seemed to lack the stamina to hold up. None of the Sanderson men stood up well under the strain and it was their loose playing, and lack of ability to cover up at critical moments, that enabled Alpine to run the score as close as they did. Landers did not play his usual good game either as a guard or as the offensive star of the locals. In fact, no man on the team played up to form, and all showed that they still lacked that very necessary element "wind." Alpine didn't play up to the form they exhibited in the game Friday. Watson was their offensive star with seven points.

Miller deserves mention for his guarding during the latter part of the game. His efforts probably kept down the score of the tall center of Alpine, who was apparently the biggest scoring threat of the Bucks.

The Line-up:

Sanderson (17) (16) Alpine
Franklin—F (9) (7) F—Watson
Miller—F (2) (2) F—Smith
Qualtrough—C (6) (4) C—Skev'ton
Strange—G (0) (2) G—Roberts
Landers—G (0) (0) G—Lease
Hall—G (0) (0) G—Treadwell
Kerchville—F (0) (0)—Moss
Referee: Tom Williams.
Umpire: Hayz Cavender.
