Decrease in Farm Population Necessary, From U. S. CLEANS UP an Economic Standpoint

By DR. WALTER BURR, Kansas State Agricultural College.

HE decrease in the population of America's farms is due to sound economic processes, and there is nothing alarming in the situation. The shifting in population is due to the installation of more efficient machinery on the farms, thus lessening the demand for

The decrease in farm population has been necessary from an economic standpoint. When you get rid of the necessity of an average of about 20,000 men in a wheat harvest, then there isn't anything else for the people to do in the country except farm. Of course, in order to have a sound, economic state, a large number of other people will have to get out of the farming area. This is the thing that has been happening in our agricultural area throughout the entire Middle West, and it isn't a thing about which we need feel discouraged.

I have also heard it said that the small town in the Middle West is becoming decadent; that it is being wiped off the map. As a matter of fact, the Rockefeller Institute for Research recently made an extensive study of the small towns of America, and their conclusions were that in the last ten years an added number of towns have been built in America, and that the population of these towns has been increasing.

"Jazz Journalism" Is of the Past; Era of More Intelligent Press Here

By KARL A. BICKEL, United Press Chief.

The era of "jazz journalism" is over and a period of new and enormously more productive and powerful journalism is setting in. New factors of great potency are at work upon the minds of the news consumers of America.

The World war was one of these forces. For the first few years after the war the youth of America wanted, above everything else, to forget the war. But a change is everywhere apparent. Today the man parts of the yard and house.' who was overseas is beginning to interpret the news he reads in the American press from abroad in the light of his own experiences with the people he came in contact with while abroad. And he is a new and very definitely interested consumer of foreign information.

The editor no longer has to fear that his newspaper will be too intelligent for his readers. If he is really wise, his fear will be that he won't be able to keep his paper intelligent enough.

The age of the jazz newspaper is over. You can't sell bonds, grand pianos and automobiles in a cabaret—and you can't sell advertised goods in a newspaper permeated with the artificial high-powered, hopped-up atmosphere of the cabaret. When a newspaper reader is seeking primarily amusement, shock, emotional thrill, he is not in the mood to think of purchasing a home or a new pair of shoes.

United States Ahead of England in Offering Opportunity to Young Men

By LORD ROBERT CECIL, English Statesman.

America offers better opportunities than England to the poor young man. We have solved the problem of liberty as well as you, but you have solved the problem of equality better than we have.

If you are well-to-do in England and can afford to wait, practically all careers are open to you. If you are poor, it is a different story, of course. I don't think we have solved in England the question of "open careers" or opportunities for young men as well as you have in the United States. Unlike you, we are a crowded country.

Apart from special circumstances, I am convinced that in the end a man generally does what he desires to do and I believe that is more true in the United States than in England. If with sufficient strength he desires to do a special thing, he will finally accomplish it.

Broadly speaking, there are two objects of desire: To be something to do something. If you want to be something, for example, a rich man, or President of the United States, or judge of the Supreme court, well, . that's one form of life. But if you want to do something, then you must be on your guard as, far as you can against caring what you are. You must not bother about what will happen to you. If you would struggle to be things, then you must abandon hope of doing things.

Much Criticism of American School System Not Promotive of Sound Education

By DR. DAVID KINLEY, President University of Illinois.

Criticisms of the "school faults of children" should be directedagainst parents rather than school teachers. Too often we are inclined to blame the teachers, rather than our children or ourselves, when teachers find it necessary to tell us that our children are not doing as well as

The fault lies with us or our children, and for that reason we should strive to sympathize with the teachers in their work, especially in their | The heart of Richard the Lion Hearted difficulties, and should make it our business to support their policies so

There is a good deal of agitation about our school system, our methods of education, the school curriculum, is management, and many other subjects in the field of education. My own study of much of this discussion has led me to the conclusion that most of it is uncritical, ir rational, impulsive and subversive, rather than promotive of sound edu-

History of Human Race Directly Contradicts the Theory of Evolution

By DR. W. B. RILEY, President Fundamentalist Association.

History reveals the fall of man, and the decay of civilization instead of telling a story of evolution and human progress. The history of the human race reveals the reversal of the theory of evolution. History, the one science dealing with the subject involved in the controversy between the fundamentalists and the evolutionists, favors the story

According to the prophet Daniel, man is degenerating, and governments are going down and civilization will end in catastrophe. According to Darwin, the evolutionist, man is coming up toward the superman, and civilization is improving. I would predict the ultimate failure of human government and the second coming of the Messiah to inaugurate · world kingdom under the reign of the Son of God.

FARMERS' HOMES

Fight Red Paint as Blot on Landscape.

Washington.-Through the ministraions of the home demonstration agents of the Department of Agriculture, farm women have put the ban on unsightly homes.

The lavish use of red paint, associfrowned upon by her field agents, says Miss Grace Frysinger, head of the home demonstration work in the Central states

Federal employees are trying to point out to the farmers' wives that paint cannot make up for the landscape-blotting qualities it has when tive ambitions. daubed informally upon all buildings

on the property. Classes are being conducted in all the states, with the co-operation of county agents, state universities, and gazers. their departments of agriculture, in methods of beautifying the farm home, both internally and externally.

"This present campaign, we hope," Miss Frysinger says, "will result in a unity of color in the buildings, and also the clearing up of the front

"Women are being shown demonstration homes, where the yard is free from the plowshare; the clothesline and the garbage pall. The model homes have neat, clean front yards, shrubbery covering unsightly outbuildings, and plenty of trees for shade. The buildings are all painted one color or at least in colors that have some relation to one another. The fences are mended and upstanding, and chickens and live stock are kept behind pens or wire fences, and are not alowed to roam generally through all

Crippled Boy Gains Eagle Scout Honors

Los Angeles, Calif.-Despite the fact that he has one artificial leg and walks with a crutch and that both his hands are crippled, with middle finger nissing, Lester Plunket of Los Angeles has won the Eagle badge of the Boy Scouts of America. The record of his accomplishments is one of the most unusual and heroic in the history of the boy scout movement.

The scouts have provided achievement badges for handicapped boys who cannot meet the exacting requirements of the first-class scout. Young Plunkett, however, undertook to pass the tests set for robust boys. A firstclass scout must earn 21 merit badges to become an Eagle scout, which means he must also have a working knowledge of 21 different vocational or scientific subjects. Eleven of the merit badges which he earns are required, while the other len may be by experts,

Several of the requirements seemed impossible for him to meet, but he that the crystal ball is the abiding the bottle drifted into the north equatook them over and over again until place of one's ancestors. It is be- torial current setting westward, its passed with a perfect score.

Lester hiked 21 miles at a stretch. known as the scout's pace test, but he taken bonors as a life saver and swimmer, although he can use but one hand in such an endeavor.

Curators Battle for

Heart of Queen Nantes, France,-Disputed posses-

slob of a queen's heart has started a feud between the scholarly curators of the museums of the city of Nante and the Loire Inferleur.

It is a heart of gold, containing supposedly, the vital drgan of Anne of Brittany, queen of France, born in Nantes in 1477. She willed it to the

city of her birth in medieval fashion The quarrel arises over which museum most truly represents Nantes, the capital city of the department of Loire

There are many examples of great and near great French men and women who are separated from their hearts in their last rest. Often, as in Anne's case, the heart was returned to the city of childhood. Souretimes, as in the case of St. Louis, king of France. the heart is buried in holy ground.

Lost Dog Comes Home After 500 Mile Trip

Minden, Neb .- Last summer Tony, Airdale dog belonging to Dixie Virginia Samples, eight, and Marjorle Ann Samples, four, of Minden, strayed from the family car while they were vacationing at Bricelyn, Minn., 500

miles from hor The girls and their parents mourned the dog as dead or hopelessly lost until recently he trotted up to the door whining and barking joyously. It had taken the dog nine months, and and it was estimated he must have traveled thousands of miles

Tony's feet were sore and his claws worn off. He was gaunt and hungry.

Tony has been in the Samples family since he was six weeks old. Now he is six years old, and will remain in the family until he dies a natural death, all members agree.

RARE GLASS GLOBE IN CAPITAL MUSEUM

World's Largest Crystal At tracts Lawmakers

Washington .- Resting on its circufar base, the world's most perfect crystal stands ready to reveal whatever secrets of the future may be desired. Appropriately enough, this rare globe ated in the past with farms, is of glass, nearly 14 inches in diameter and weighing 110 pounds, is in Washngton's National museum.

To this perfect orb come thousands to gaze, and, if possible, obtain a message from the mystic future or a warning based on events of the past. even the slightly lower price of red Here, too, might be found the answer to political hopes and legisla-

Crystal gazing has long appealed to umanity. Congressmen are not the only illustrious persons who find solace and comfort in its visions. Roger Bacon has told in his writings of the crystals possessed by the friars 'in which events happening at far distant places were mirrored.

Rival Nurses Strive to Please Till It Hurts!

Mexico City.-Fights between ambulance crews of the Red Cross of Mexico City and the "Green Cross," rival charitable organization, each striving to outdo the other in the number of accident cases handled have resulted in further injuries to patients already hurt and being taken

The Red Cross chapter complained to police that Green Cross ambulance men have attacked Red Cross ambu lances bound for a hospital with accident victims. It was alleged that in some cases the injured had been forcibly removed from a Red Cross ambulance by the staff of a Green Cross

Police plan to assign zones to each ambulance service to prevent further

19-Year-Old Oklahoman Is Champion Farmer

Jones, Okla.-Although he is only nineteen years old, Ed Loop is a champion farmer,

He has won \$1,150 in cash prizes in the last seven years at agricultural exhibitions, and has received 460 ribbons. His exhibits included 87 farm crops, three breeds of chickens, pigs and sheep.

Competing against adults, Ed won third place for two successive years in a corn growing contest sponsored by the Oklahoma City Chamber of rce, and last year be crowned his efforts by taking the grand prize. The youth enjoys an income of \$700 a year from only two of his ventures

egg and honey production.

He now is attempting to graft paer-shell pecans on native pecans and English walnuts on black walnuts.

SOLVE MYSTERY OF FLYING FISH

Both Flapping and Soaring Methods Used.

New York .- That troublesome quee tion "How do flying fishes fly?" is pestering scientists, although many attempts to solve the mystery

have been made. J. T. Nichols, curator of recent Natural History, and C. M. Breeder, Jr., research associate of the New York aquarium, find some truth in both sides of the argument as to paper men asked: whether these fishes sustain their flight by flapping of the wings, or problem of your life?" pectoral fins, or whether they merely soar as gilders.

Writing in Natural History, the museum's journal, the ichthyologists

"The flight is largely a planing one, of each week, the oracle of the crystal but at certain times and under certain conditions a definite wing mo-The largest crystal bull in the world, thon may enter into and contribute to guarded closely, came originally from it. The enlarged pectoral fins or

Find Greased Shoe Stays Dry and Wears

Washington.—Farmers who grease their shoes to make them last longer are following a sound scientific principle and not a "fallacy of the hinterland," the Department of Agriculture

Greasing shoes, experts say, not only prolongs their life, but belps to keep the feet dry. They recommend neat's-foot, cod and castor oils, tallow and wool grease or mixtures of

Shoes worn on the farm get particularly hard wear, since they are subjected to mud and water and at times to extreme dryness. All these, it is observed, ruin leather, whereas oll and grease preserve it.

1 Out of 5 Weddings Gets Airing in Court

New York .- A least one ery five new marriages in the United States results so deplorably that the case comes to court according to reports handed to the meeting of the joint committee on Domestic Relations Courts of the National Probation asociation. The matter is so serious, the report of the United States children's bureau in Washington on the Domistic Relations court of the United States affirms, that the bureau has made exhaustive study of the problems underlying family disruption and divorce and ls-formulating methals of correction

The Clancy's Are Conservative in Their Tastes

By PERCY L. CROSBY

The greatest of joys is in giving, I think.
You will surely find gladness that way:
But I'm willing to give without thought of reward
I'm feeling so preachy to-day.

STORY FROM THE START

On the verge of nervous col On the verge of nervous col-lapse, due to overwork, Gay De-lane, successful New York artist, seeks rest at Idle Island. She rents a cottage, the "Lone Pine," from an island character, the "Captain," and his sister, Alice Andover, "administrator," Gay Andover, "administrator." Gay finds the cottage is tenanted by an elderly lady, "Auntalmiry." other abode, the "Apple Tree." an exploration of the island Gay, standing on the seashore, is hor-rified by the appearance of the drifting body of a drowned man, she nerves herself bring to the shore. A bullet wound in the temple shows the man to have been murdered, Gay makes her way to the "Captain' with the story. Returning with him to the shore, they find no body there, and Gay's story of the incident is set down to an attack of "nerves." Gay, unable to convince her neighbors of the truth, draws a picture of the face of the dead man, intending to send it to the authorities. She meets a stranger, to whom she tells the story and shows the picture. He asks her to let ...im take it, but Gay refuses. Next day Gay finds the picture has been taken from the cottage "Rand" Wallace, wanderer, and considered something of a "black sheep" by the islanders, surprises Gay at household tasks. Gay's acquaintance with Rand ripens into affection, Rand leaves the island on business. Gay determines to stay for the winter

CHAPTER VI-Continued

"Didn't he ever come back?"

"He died, dearle. Died away. But I had Buddy then. But Buddy went, too. Could I have a little more sugar. dearle?"

That was all. They talked of other things. Auntalmiry's gentle interest was just as it had always been, her easy amiability, but after that flush of feverish hope she seemed pale and worn with her age.

The next day Rand came, and they two, Gay and Rand, drifted into a routine of joyous companionship and that hand? Stretched outlove. Frankly and trustfully they professed full sympathy and understanding in each other's whims. Gay foved to be in love, but brooked no thought of marriage, demanding freedom, she said, freedom for work. Rand, too, admitted satisfaction in the errangement, craving freedom from the very thing that she desired freedom for freedom's sake, he called it.

If sometimes Gay wondered if love built on foundation so slight could long endure, she hushed her doubts. She was very happy, and she dreamed of long years of this same happiness for both, freedom for each for the things that each desired. She would come to him, he would come to her. they would summer together in this cool and lovely place.

September drew swiftly, goldeniy toward its close. September is the death of summer in the northland. The hotels on the Island were already closed for the season, the summer shops locked into their storm windows, the shore cottages deserted. Still Gay Hngered. Between herself and Rand had been no suggestion of parting, no hint that the season was over, the time of separation at hand. The island was lovely in September. levely and wistful and wilting. Gay would not let herself think of leav-

She sat alone in her window-seat one afternoon and watched the sunset as it faded swiftly and darkness crept over the .and. An hour passed, two hours. The dusk had deepened to night. And then, with one of her impulsive changes, she sprang to ber feet, wanting brightness, wanting Hght. With her hand outstretched to press the button, she stopped, suddenly motionless, holding her breath.

Pressed hard against her window on the eastern side, the side of the forest, she saw it again, that face of yellow parchment with the seamed ocar beneath the slanting eyes. As she looked it faded away into the darkness from which it had come. With its disappearance came sud

den activity, flaming anger. She ran to the window and flung

"Hello," she called. "Hello there!" There was no answer to her call, out, staring intently, she saw among the shadows of the wood one shadow that moved silently farther into the recesses of the forest, and merged ot last into black. She closed the window thoughtfully, locked it and lowered the blinds.

Gay had a pistol, a handsome mon ogrammed one, which it was her pleas ant concell to keep loaded, well con oned, ready for emergency use the drawer of her desk near at She had bought it during that uresome visits to London pawn

shops, and with a sort of boyish van ity had carried it with her ever since. But it is indicative of the absolute confidence of her nature that in an emergency she always entirely forgot the weapon, reverting to the more

ing or locking doors. When she saw the yellow face at her window she did not so much as think of the boasted pistol, which she affectionately dubbed the Raby, until she was safe behind the lowered blinds. Then she opened the drawer and looked at it.

feminine defense of screaming, call-

"You're a useless old thing," she said impatiently. "Why don't you go off when there is some occasion for you, and scare the Peeping Toms?"

Expecting Rand, who came at his own caprice and kept her alert with expectation, she was not startled when, an hour later, there was a light knock at her door. It was past nine o'clock, but as his hours always suited his convenience, she only smiled tolerantly at his tardiness as she opened the door. But when she saw in the shadow, not Rand, but Ronald Ingram, she was startled into a little frightened cry, for which she quickly apologized with friendly laughter.

"Oh, you startled me. 1-1 was expecting some one else. Do come in. I am glad to see you again." "What luck to find you," Ronald

Ingram said with a warmth there was no mistaking. "I had no idea you would still be here. You are rather outstaying the summer, are you not?" "Well-yes-a little, perhaps. But I was-quite III, and I need-oh, a great deal of rest." Her face flushed with her feverish explanations, and Ronald Ingram studied her keenly.

"So many of the summer people have gone," he said slowly. "I should think you would be afraid to stay on Especially after your experialone. ences here. Was it in this room you saw the light-that night after you found the body in the cove?"

"Yes. In that window, right there. "And the hand? Are you sure of

"Of course I am sure. And when I came up in the morning, the sketch drawer." She lightly pulled out the drawer of the desk. Her pistol, bustnesslike, important, tay in full sight "It was here. And the next morning it was gone. Doors locked, windows barred, just as I left them. But the sketch was gone. So I knew the poor dear wished to be left in peace and undisturbed "

"By George, you make my hair stand on end. And after all that, you stay on here, alone, unprotected-" "Oh, he was a gentle spirit. He would not harm me,"

He smiled and dropped the subject. He said he had come to Portland en business, and had come to the island with only a faint hope that he might find her, or, failing to find her, to get her address in the city. He said he could not bear to drop the little acquaintanceship, which to him had proved so sweetly charming.

Then he went quickly away, waving back to her as she stood in the lighted doorway beneath the tall pine, Gay waited about for a while, hoping still that Rand would come, but

whether an acquaintance would prove

a good companion, there is one in-

fallible sign by which you can make

sure of the matter. When you talk

to him notice whether he tells you

first of something he likes or dislikes.

If he is prone to air his dislikes you

may be sure he will not prove a very

cheerful companion. His mind is de-

structive. He is more concerned with

pulling to pieces than with building

up. Such a person has a tendency to

shut up one's mind or put it on its

guard against impulses and innova-

tions. He has a sensitive nature that

withdraws itself into its shell on the

least impact of the common things

about him. One will get nothing from

him but grumblings and animadver

The digestion of an ostrich is said

sions.

finally she went upstairs and kicked off her slippers rather crossly. When, a little later, she heard his quick knock on the door below, and his blithe whistle above it, she caught up her slippers in her hand and ran downstairs, laughing, to let him tn. "Oh, good!" she cried. "A minute

later and I'd have been in bed." "I'd have been earlier, but-1 was detained. You are all right, are you? Nothing has happened-yo haven't seen anything unusual?"

Gay sensed an undertone of anxiety beneath the lightness of his voice. "Why, of course I'm ail right. Of course nothing has happened. Why not? Or why?"

"Well, I saw a chap hanging about in the woods near your windows, sort of spying, sneaking around. I started up to see who it was, and he ran. Of course I chased him, and the two of us have hot-footed it all over the island. He was playing with me. Got me down to the city landing, and dropped me like a hot cake. You haven't-"

"Oh, that must have been the Chinaman !"

"The Chinaman!" Rand's amaze ment was unbounded. "The Chinaman! What under heaven-"

"Oh, I must have told you about the Chinaman," she said evasively. "You know darned well you never

What about him?" "Well, come and sit down. It's a ong story- You are quite sure I aven't told you?"

Rand laughed. "Quite sure, you ttle liar, and so are you." "Well, you weren't here when I

came in. I was so tired, and sick. was a perfect wreck. Auntaimiry was here, and while she packed up I lay down on the couch here, and slept.

'Didn't He Ever Come Back?"

Slept! It was the sleep of death for weariness.-She wakened me for diner, and I ate, and went to sleep sleeping.-Well, it was evening. And You know how one feels things in one's sleep?-1 felt eyes looking at me. I could hardly squeeze a look out beneath my lids, for the weariness. But I did. And in the dusk, faint and yellow, I saw the face of a Chinaman, thin pinched features, sianting eyes and a small seared sear beneath one eye. As I looked the face just melted backward into the darkness, so I knew it was a dream. and went to sleep again."

Rand lighted a cigarette hastily but said nothing, and Gay went on.

"Well, you know how sometimes sit, just dreaming, as the sun sets until it is dark .- I did tonight. And jumped up suddenly to light the lights, although it was not entirely dark, and I saw it at my window, that vindow-same face, the very same. So it could not have been a dream." "When was that?"

"Oh, hours ago! Just before the final darkness."

"But it was late when I found

him-about an hour ago,-In the

fine stimulating companion. He is

meantime, what? Any noises? Were you afraid-"

"No. Mr. Ingram was here." Rand flecked the ashes from his cigarette thoughtfully. "Ah, Mr. Ingram.-Mr. Ingram.-1 suppose you told me all about him, too. May one inquire, who is Mr. Ingram?"

"He is the man who- It was be who- It was Mr. Ingram who-Gay closed her lips stubbornly. She had often wished to tell him of the affair in the cove, but resentment had always forbidden the confidence. He should have asked her. She glanced at him furtively. His chin was set, and his eyes were anxious. Gay relented.

"Well, Rand, I suppose the family females told you-what happened in the cove?"

Rand smiled faintly, his fingers caressed her arm. Gay hardened again. "I know they thought I was out of my head, but you surely do not believe any such nonsense."

"They thought you saw driftwood. log or a barrel."

"Hew about my bandkerchief? Did they think I put it on a piece of driftwood?"

"They thought- Now, remember, Gay, you did not mention the hand kerchief until they reported there was no body. They thought-well, they thought you made it up to sort of carry out your story, make it hold water."

"What did you think?" "I thought," he said tenderly, "that

some time, in a moment of great confidence, my Gay would tell me about herself, and then I should know all." Gay laughed, bent suddenly and kissed his hand. "You work me, outrageously," she said.

"And Mr. Ingram-" be prompted

"Well, then .- No, the cove comes first.-The reason I like Mr. Ingram is because if he is interested in any thing, be talks about it. If he wants to know anything, he asks. He doesn't think other people are crazy just because they happened to see something he didn't happen to see himself.-Like the state of Maine," she said vindle-"And the cove-"

"Well, then. I slid down the rocks into the cove."

"Why, Gay, why? With a whole island full of accessible shore, why silde down the worst cliff in the bay?" "Because I thought I couldn't," she answered promptly. "Because every

ody said one couldn't get down .- Se I did." Rand rolled his eyes beavenward. "A woman," he said devoutly, "is heaven's greatest miracle.-She did.

because she couldn't.-Go on.-Like your Mr. Ingram, I understand per-"Well, I tried to get into the clubhouse, and I couldn't. And into the

boathouse, and I couldn't." "You should have burned them to the ground.-If you couldn't get in.

you should have." Gay laughed. "Don't be silly .-Well, it was lovely in the cove, and I stood there and saw-It-coming in -Rand, it was a man. He came in and with my two hands I pulled him up on the sand. There was a rope about one ankle, a stout rope, with one end dangling loose. He had been shot in the temple-here." She touched he brow with a slender finger. "The blood was washed away, but the hair was clotted about it. I jaid his hand upon his breast, and put my handkerchlef over his face. I called for help, but of course nobody heard me,

what happened." Rand was impressed. She could see that.

So I went for the Captain. You know

"It sounds very-reasonable." "Oh. Rand! When I went back the sand was wet where the body had tain. I showed it to the Captain, and

he said it had splashed there. It couldn't have splashed. It hadn't splashed anywhere else."

"And Mr. Ingram-" Gay smiled at his persistence. "Well, I sent the captain away, could see every line of the poor, tired anxious face, and the long tine hand and the drenched hair. I took my drawing pad, and drew it, line for line. I was going to send it to the police department, so they could try to trace him .- Mr. Ingram was looking for a way down to the shore, and went up and took him back through the woods the other way. I showed him the sketch, and he was greatly

newspaper man." "And now he comes again-" "Oh, he came before-"

interested. He wanted it. He is a

"Oh, I see." Rand's voice was quiz-

"Oh, no, you don't see. Well, met him on the rocks beyond the Little club one day-he is very nice, so gentle, gentlemanly, sympatheticso I brought him home, and we had a iong talk. He was thinking of buying up part of the Island for exploitation. to build and sell, you know, things like that. He is very nice."

Rand's face was very stern. "Why didn't you tell me all this before?" be demanded curtly.

"Because If you want to be so darned close about everything, I will be darned close myself," she said smartly. "Rand, he felt terrible about the sketch.-Oh, I didn't tell you about that."

"What? What about it? What did the police-"

"Now, Rand, now is your chance to decide once and for all that I was entirely out of my head-am still, perhaps- But Auntalmiry can swear to part of it, if she will, though she made me promise not to tell. She said folks would think queer of it." "Gay !"

CTO BE CONTINUED.

"What's in a Name?" every fond mother hoped that standing resolves his son will have no ! such cause of lamentation. Thus the tle Teddy would some day be a man as the hero of San Ju next generation of the family may

By ELMO SCOTT WATSON

once asked Will Shakespeare, and then in reply to his own question declared that a rose under any other title would have the same fragrance. thus giving us the axiom that names after all are matters of comparatively ttle importance. But Shakespeare's dictum is not necessarily true when applied to the naming of children. Names are an important part of personality, and since they must be kept for a lifetime they should be satisfactory to those who own them and have to answer to them through all the

years of their existence. Several thousand years ago Socrates said: "The giving of names is no small matter, nor should it be left to chance or to persons of mean abilities." Of course, no fond parent of a new baby-no doubt the most wonderful baby that ever was born-would admit that he or she is a "person of mean ability" when it comes to selecting a name for their offspring. But the offspring themselves might have different views on the matter, and many of them doubtless wish that they had some say in selecting the "handle" by which they are known by their fellow men. Prof. George R. Stewart, Jr. of the University of California, who has completed a survey of thousands of Christian names to determine the popularity trend from 1870 to the present time and coupled it with a study of names, declares that three out of every four men bear . secret grudge against their parents for the name that was fastened on them when they were young and defense-

'There are few men who don't wish they had a different first name," says Professor Stewart, in reporting on the results of his survey in an article in the magazine, Children. "This is due principally, I believe, to the fact that they are tired of their Christian title just as a person may become tired of always seeing the same face when he looks in the mirror. But it rests more substantially, in cases, because parents have placed on them either too 'highfalutin' or too common place names, as the individual taste or self-rating may vary. A father who has bemoaned having to bear 'Percival Algernon' all his life is quite likely to term his offspring 'John' or 'James, while one who has found George irksome as inadequate to his dignity or

sign it 'Reginald Willoughby Smith' and be equally dissatisfied." "What's in a name?"-a great deal,

at least so far as numbers are concerned in the case of certain names Take Mary, for instance. If you could stand on a mountain top and in a voice that could be heard from Maine to California, should call "Mary!" an army of 2,000,000 women and girls would answer. And if you shouted "William" from that same eminence, approximately volces would answer.

Despite- the preponderance Marys, however, that name is gradually losing its popularity, accordingly to Professor Stewart. In 1905 Mary led the list of girls' names, one in fourteen. Today she is gradually giving way to Elizabeth, who now ranks first. Next to Elizabeth and Mary in order, are Helen, Dorothy, Marie, Katherine, Louise, Ruth, Eleanor and Evelyn. In 1905 Anna, Grace, Emily, Alice, Caroline, May, Emma and Mable were very popular names. but they seem to be losing out now.

Usually there is some direct reason for fashions in names as witness the case of Edna. Up until 1870 Edna was a comparatively rare name. Then came the publication of the book "St. Elmo" with its saintly beroine, Edna Earl. Immediately there was a boom in Ednas which has continued to this day. How do you account for the recent popularity of Jeans and Joans? Easy! The millions of men who served over there from 1917 to 1919 brought back with them the memories of France, which has resulted in a veritable deluge of these two names.

As for men's names there does not seem to have been as great changes in popularity as in women's names. Forty years ago William and John were the commonest names, and today they still lead the list. The only three common names that have shown much decrease are Henry, Frederick and Thomas, and they have been replaced to a large extent by Harold, Arthur and Francis. However, masculine names occasionally reflect current fashions just as do their sisters. If you are introduced to a man named "Dewey Jones," you can guess his age at thirty years and you won't be more than a year or so off. For it was just thirty years ago that the hero of Manila bay was the popular idol in the United States, and hundreds of parents found no difficulty. whatever, in selecting a name for their boy bables. And those who weren't called "Dewey" were called by the more imposing name of Theodore because

utonniere likewise con-

for a clientele which , tume depends upon a happy selection er in the debutante of the material from which it is to be made. Silk sults are the "last word" for summer town and country club wear. Se why not choose silk? The ideal is a silk which washes, and which tailors perfectly. If it has every appearance of an exquisitely fine sulting, so much the better. It is of just such a silk fabric that the to look after them. fetching four-piece in this picture is made. There is a bit of wool in its weave-just enough to give it a handsome appearance and to entitle it to King. Don't weep too much. Weep the suggestive name of antelope

mode for the trans- silk Of course, the usual thing would be ower-trimmed lustrous to say that the street ensemble pletured is in beige or in gray. On the t which tops madam's contrary this silk which has the apjuite as smart as fashpearance of fine kasha and which tubs so perfectly, is a lovely "dusty" pastel pink, one of the favorite shades this season. It is too fetching for latest dictates of the words, thoroughly conservative and in every way in good taste for street good. wear. It might just as well have been in the very new aquamarine blue, or a soft grayish green, for fashion is indorsing just such shades for those who wish something other than neutral gray, or beige. Perhaps the smartest of all shades for the summer slik tailleur, is white which is not really I designs and subdued white, but a shade once removed, rainy days and

"If you will wait, I will be glad to

be this way, but I have no choice."

through the open door, her father's deep laughter loudest, Then the would-be process server came out, and she skipped in.

When she returned, her hold-up man was far down the road swinging with steady strides townward. She slid hurriedly into her car, pressed the throttle, and soon caught up with him. He turned a smiling face, and it dawned upon her that he was a good winner and besides a good loser.

"What, Mischief, did you do with those papers?" he asked, a man's broad grin on his face.

She laughed. "I just gave them to father! I have always thought he ought to go and testify-and the other reason—well, I just plain like you! Will you ride with me?"

"Will I?" The frank adoration in his eyes averted hers. "I certainly will because I want to show you my careman ancestor is about a million years old!"

wise the now-so-stylish moire, bengaline or crepe satin coats are in excellent taste for the "stylish stout" figure.

Another member in the ensemble family is announced. With the addition of the sleeveless short jacket here is the way the count standsblouse, skirt (sometimes the two merge into a one-piece dress), long topcoat, and the aforesaid jacket. The practicality of such a "foursome" need not be stressed. It speaks for itself.

As chic as they are utilitarian, are these four-piece ensembles. Among women who know a good thing when they see it, the idea is meeting with utmost enthuslasm. Much of the real service and enjoy-

semble in the picture is that it is not a formal made affair which requires the skill of an expert couturier. The pattern used for this ensemble is such as one can secure at any pattern department, and it is extremely simple

to follow. Note that the frock has a diagonal stitching and fashioning. Also a belt of self fabric. As to the coat, it has the inevitable scarf collar.

Pongee is another silk favored for the making of the tailored washable ensemble. Since printed pongee is available it is effective, made up with plain. Another clever effect is to trim with groups of machine stitching done

EVERY-DAY-IS-NICE

Of course you know about the Every-Day-Is-Nice club which was started by Peter Gnome.

bers of the club did something interesting every day and they grew to love al kinds of weather, the wild, stormy days, the interesting windy days, the soft rainy days, the bright sunshiny days,

have so many different kinds of games and parties this way, and they all thought Peter Gnome's idea was such a good

They could

All of the mem

But the Cloud King had been grumbled about a great deal of late and he

was feeling very sad. Peter Gnome talked to him so as to cheer bim up. "Oh, Cloud King," he said, "you

mustn't be discouraged. You mustn't be unhappy. "What would the farmers do without you? Think how you help the

"And think, too, how the flowers love you. You make them grow. "You give them drinks of water. And the grass, and the moss in the woods, the shrubs and the trees-how hot and

dry and thirsty they would be all summer long if it weren't for you. "How often, too, I have heard the birds chirp for water. Their little mouths would be so dry and they would open their beaks and beg you

"What would the streams and lakes and pends do without you! "Lots of things love you, Cloud

tears of joy, but not tears of un-

happiness." "Oh, said Cloud King to Peter Gnome, "I Yeel better now that you have talked to me.

"You have done my damp beart

"I am glad you think I am of use "Sometimes feel no one likes

me at all. They Cloud King Felt complain of the Much Happier.

"And oh, dear me, It hurts my feelings to hear them call me bad!" "Dear Cloud King," said Peter

Gnome, "you must cheer up. You mustn't pay any attention to weather grumblers.' Cloud King felt much happier and he pattered down to the earth most

joyfully. But above all he rejoiced to hear of the Every-Day-Is-Nice club, for he felt it would help him greatly.

RIDDLES

What has only one foot?-A stock-

When is a rope like a stick of wood? -When it is knotted.

Why are feet like fables?-Because they are legends (leg ends). As long as I eat I live, but when

I drink I die. What am I7-Fire. Why is the nose in the middle of

the face?-Because it is in the center

(scenter). Why is a sentence like an obstinate mule?-Because it usually comes to

a full stop. What is that by losing an eye (1) has nothing left but a nose?-The

word "No-i-se." What color are the winds and waves in a storm? The winds blew (blue) and the sea rose.

If a caterpillar walks on twelve legs, and an elephant on four, what does on one?-A stocking.

Small boys who have had to wiggle 13. The fare is the equivalent to two cents in American money.

Poetry on Production Basis

Two high school boys called on William Herschell, poet of the Indianapolis News, asking him to honor their yearbook with a poetical introduction. "Why, yes, boys, I'd be glad to write a little verse or two for your annual. When do you want it?" "Oh," replied the boys, "we'll just sit here and wait for it."

Years of Service

Model T Fords

Expenditure of few dollars may enable you to get thousands of miles from your old car

THE Model T Ford is still a great car. It led the motor industry for twenty years and it is used today by more people than any other automobile. More than eight million Model T Fords are in active service in city, town and country, and many of them can be driven for two, three and five years and even longer at very small up-keep expense.

The cost of Model T parts and of necessary labor is unusually low because of established Ford policies.

New fenders, for instance, cost from \$3.50 to \$5 each, with a labor charge of \$1 to \$2.50. Tuning up the motor and replacing commutator case, brush and vibrator points costs only \$1, with a small charge for material. Brake shoes can be installed and emergency brakes equalized for a labor charge of only \$1.25. A labor charge of \$4 to \$5 will cover the overhauling of the front axle, rebushing springs and spring perches, and straightening, aligning and adjusting wheels.

The labor charge for overhauling the average rear axle runs from \$5.75 to \$7. Grinding valves and cleaning carbon can be done for \$3 to \$4.

A set of four new pistons costs only \$7. For a labor charge of \$20 to \$25 you can have your motor and transmission completely overhauled. Parts are extra.

All of these prices are approximate, of course, because the cost of materials needed will depend on the condition of each car. They show, however, the low cost of putting the Model T Ford in shape for thousands of miles of additional service.

See the nearest Ford dealer, therefore, and have him estimate on the cost of re-conditioning your Model T Ford. He will tell you, in advance, exactly how much the complete job will cost.
