WATCH ICE FLOES FOR PHANTOM SHIPS

Eskimos Believe Lost Fleet Will Return.

Nome, Alaska.-While American newspaper readers have their attenion centered on the feats and perils of Arctic aerial exploration, Eskimos of the north Alaskan coast search the horizon for another reason.

They seek every returning spring or one or more of the phantom fleet, the frozen, lost ships, drifting with the sinister ice pack from which, sooner or later, some of them must emerge as the great floes break with the seasons,

Whether the fleet is legendary or really exists is one of the problems haunting Arctic navigators for years. Vessels have disappeared into the unexplored polar basin ever since the beginning of the Arctic navigation. In one great swoop, the death fanged ice pack in 1876 carried off 30 whaling boats from the waters of the American continent. All but 70 of the men | then escaped to Point Barrow but the ships were frozen hard and high into the pack. The ice fields covering a million square miles rotates around the central pole slowly in the same direction of the earth's movement and in cycles brings objects gradually back to certain spots.

Eskimos who have escaped from the ice pack after being carried far north nto the unexplored wastes have rerned with tales of silent ships hard and fast in the white bergs. Some tells of seeing a ship sitting alone in a vast solitude. Others report several boats close together but frozen solid miles and miles in the Arctic

In the hope that some day the ice or more of the phantoms Eskimos each spring eagerly scan the returning open waters. Should one of the old boats escape in good condition and be east on shore near the native villages they might revel in the wealth of wood, steel and iron instruments and various stores. Once solidly frozen in the Arctic, food, clothing, rope, tools, and weapons are preserved for all time and return to usefulness when thawed.

The first breakup of the polar seas schools. also brings Eskimos a great offering of driftwood in which are found a varied and more or less useful assortment of articles.

Harbor Waters Give Up Bodies of Many Failures

Borton,-For the most part, nobody cares. You can tell that by the clothing. Even the professional sobbers who can find tragedy most anywhere and in almost anything don't pay much attention. The police perform their cold professional rites-file reports in the red-brick police station on Commercial street-and then turn the whole matter over to the medical

But every case is a real tracedy Every case meant a million heart iches before it became a "case" and the tragedy may be lessened a bit by the ending.

During the last two months the harbor police handled a dozen of the they use the term "floater" to describe the cases. It is not used in fisrespect. It's just a term coined for want of a better expression. It means a body found in the water of Boston harbor after the sea decides that it is time to give up its dead.

Of the dozen, one was un unfortunate woman. The rest were men who, for the most part, carried their stories of tragedy and twisted lives to a waall of them took their own lives, in the belief of the police, last winter, Practically all of them chose night and the cloak of secrecy that darkness gives to Boston harbor on winter

Town Uses Soda Water for Street Cleaning

Altheide, Germany,-The city cou il voted to use soda water exclusively for street cleaning purposes.

Henceforth, under the new measure. soda fountains will be hauled through the streets and plazas with sprinkler attachments.

Althelde's mineral springs spout 2,000,000 quarts of the stuff every day and most of it is wasted. Ordinary water is expensive and it was decided that soda could do the work more efficiently and cheaply.

Magnet Saves Life

Guthrie, Okla,-A magnet saved the ife of Fred Perdue, a young farmer, in an operation here. Perdue complained of severe pains in his back An X-ray photograph revealed the point of a broken needle was beneath one shoulderblade and working toward his heart. Surgeons used the magnet to withdraw the steel.

Tainted Blood Strain on the Financial Resources | KEEL LAID FOR of the United States

By HARRY OLSON, Chief Justice Chicago Municipal Court.

TALF of every dollar of taxes in the United States goes to pay for the results of defective blood streams in the population. Punishment of crime and care of defectives consume half of all taxes because the feeble-minded and the emotionally abnormal continue to multiply, many of them inevitably becoming lawbreakers.

The policeman, the lawyer and the judge have been dealing with a medical problem about which they know nothing. Law enforcement cannot solve the problem because the normal people don't need law enforcement and the mental defectives won't pay any attention to it. A borderline class exists, nevertheless, for which enforcement of law is a deterrent.

The juvenile court will have to be abandoned for something else. Although the juvenile court is an advance over the police court in dealing with children, it fails to straighten out crooked emotions and wavering ellect in children born defective.

emotional defectives. Their acts make news, because they are out of the asylum. If they were in the asylum nobody would pay any attention to In the next ten-year period there will be two or three times as many

The press frequently makes news out of the condition of mental and

murders unless we adopt a new method. Look at the fool idea we've had in education that you could take all sorts of children, put them into the public schools like a clean sheet of paper into a printing press, and have them all come out alike.

Nation's Public Schools Must Set Moral as Well as Educational Standards

By DR. MARTIN G. BRUMBAUGH, Ex-Governor of Pennsylvania.

The hope of tomorrow lies in the public schools. What's needed is not that the schools should teach arithmetic-but teach being honest. pack will break up and release one Not that the schools should teach to parse—but to behave.

The American people went into a jazz spree after the war. We bought things whether or not we had money to pay for them. We became the most extravagant people the world has ever known.

But when men become extravagant and wasteful their morals decay. When Sweden gave physical examination to its young men of military age last May, only 8 per cent were rejected. In the United States, at the beginning of the World war, 27 per cent were rejected-and with a 000 inhabitants, Washington retains a much lower physical requirement. The explanation is that for a genera- generous supply of wild life of the tion the Swedish youth has been given careful physical instruction in the

Any child who buys an education at the cost of health pays a price too high either for the individual or the state. We haven't yet seriously approached that problem.

What are we doing to solve our Americanism problem? All immigrants who don't learn English in five years should be sent back.

Our churches are losing membership-not on their rolls, but in their pews. The home has failed to take up its share of the moral problem. It's not a boy-and-girl problem we face, but a mother-and-father problem. And now in the schools you've got to set the moral as well as the educational standards. America is suffering for need of great spiritual lead- may be large delegations running

Impossible to Prove Fact of Immortality by Any Scientific Reasoning

By DR. WARNER FITE, Princeton University.

There is no use arguing over the question of immortality on a scientific basis because there can be no scientific proof one way or the other. tragedies. For the sake of brevity If we do believe in life after death we shouldn't do so on any grounds which the spiritualists can offer because no one can tell whether their "messages from the dead" are true or false.

If we stand by the standpoint of science, we are virtually driven away from any belief in immortality. It seems to me any such argument is more or less naive, and we can keep on talking till doomsday without proving anything.

As long as we stand by scientific fact immortality is not visible, and is something utterly difficult to reconcile with the scientific point of tery grave in the barbor. Practically view. To my mind any believer in immortality cannot accept the scientific world of fact. I do not see how anyone can be a thoroughly convinced scientist and a believer in the other world at the same time.

Religion of Today Too Intent on the Advance of Moral Hazards

By REV. DR. SCHERER, New York.

Religion is a desperate sortie into the things that ought to be. Our religion at its best is an adventure in the friendship of Jesus; and He knew nothing of security. He condemns anxious precaution as heathenish. He knew no safe life and no safe truth. The only caution He ever exercised was against living by bread alone, which is materialism; against worshiping himself and the devil, which is cynicism. Such risks He did not care to take. He gave Himself to higher hazards. His life electric fluid and produce the death was a reckless fling for goodness, for which He gave all.

Religion of today is too tame, too timid, too tepid. It lacks the heroic note. Most of us refuse to take any intellectual hazard. We are afraid of new truth, lest it disturb faith. In the same way we shun all moral hazards, for fear they will unsettle us.

Mere Instilling of Book Knowledge Not First Principle of Education

By AGNES BOYSEN, Minnespolis School Principal.

Educators are not satisfied with the work of many of our graduates. Some of these boys and girls go out into the world and do not succeed; in fact, some are absolute failures.

Emphasis must be placed on honesty rather than accuracy, the knowledge of how to serve rather than the acquiring of mere information, and the desire to serve rather than a certain number of 100 per cent

Superintendents, principals, teachers and pupils must unite in this common interest and must sacrifice, if necessary, the old traditional standards of gaining much useless information. Academic subject matter may be the means to the end, but never the end in itself.

LARGEST VESSEL

New White Star Liner Will Be 1,000 Feet Long.

London.-The biggest ship in the world was begun in Belfast recently when the keel was laid for a giant White Star liner to cost \$30,000,000. She will be more than 1,000 feet long. with a beam of 100 feet and tonnage of about 60,000,

The ship will not be ready for salling until 1932, and experts have yet to decide what type of machinery will be installed in her.

When the new ship is added to the White Star fleet she will be called the Oceanic. The six largest steamships in service at the present time, all in the Atlantic trade, are:

The Leviathan of the United States ines, 59,957 gross tonnage, 907 feet long and 100 feet 3 inches beam. The Majestic of the White Star line,

claimed by some to be the largest liner afloat, on the basis of the builder and designer's prewar measurements, which are 56,551 gross tons, 915 feet and 5 inches long and 100 feet and 1

The Cunarder Berengaria, 52,226 gross tonnage, 833 feet 5 inches long. 98 feet 5 inches beam.

The White Star Olympic, 46,439 gross tonnage, 883 feet 5 inches long. 92 feet 5 inches beam.

The Cunarder Aquitania, 45,647 gross tonnage, 868 feet 7 inches long

The new French liner, He de France, 43,500 gross tonnage, 757 feet 8 inches long and 91 feet 8 inches beam.

Only 15 Grizzlies

Left in Washington Olympia, Wash. - Fifteen grizzly

bears in the national forests of this state represent the last stand of this vanishing species of wild life. There remain there also 50 head of caribou and possibly 80 mountain sheep.

But, notwithstanding a population of nearly 2,000,000 in the state, with various cities of from 100,000 to 450,primeval wilderness, contained largely within prescribed boundaries, According to a census completed by the federal forest service, deer are the most common animals in the forests, 22,-500 of them having been seen and counted, with 8,500 elk and 5,600 black bears. The mountain goat is by no means in danger of extinction, for more than 200 of them were recorded by the rangers.

All of these animals, from the little company of grizzlies to the legion of deer, were noted by rangers while in the line of regular duty, and there about in privately owned forests and in the more inaccessible parts of mountain ranges. In addition, Washington has 11 kinds of fur bearers so numerous that trappers have been in the business from generation to generation since the Lewis-Clark days, The wolf and the coyote roam in large numbers, and cougars, wildcats and lynx inhabit the snowy sections

of the mountains, All states in the Pacific Northwest report an abundance of wild life, said to be balanced so well that the specles succeed in keeping check on each

Find Signs of Electric

Lamps in Ancient Egypt Munich.-That electricity must have een knowr to the ancients has been many times asserted, but cow comes forward an electrician at Munich, one Stadelmann, who has been in times past an archeologist, to assert that he found in Egypt, in burled walls, indications denoting the use of electric lamps. He claims that Moses brought electricity from Egypt and that there are biblical paragraphs which will bear him out in his statement that lightning rods were in use in the temple af Jerusalem. Stadelmann believes that the serpent of bronze of Moses was nothing more nor less than an ordinary lightning rod such as is in use today.

He points out, further, that the ark of the covenant, made as it was of wood and adorned inside and out with gold, constituted a veritable leyden jar which communicated with a lightning rod on the roof, and that it was so arranged that, under determined conditions, it could be charged with of any ignorant person daring to enter the sacred precincts of the ark without necessary precautions,

Courtesy at Any Cost

GIGANTIC MERCHANDISE MART TO BE TWICE SIZE OF WORLD'S LARGEST BUSINESS BUILDING

New Project for Chicago's Great Central Market to Cost \$30,000,000-Involves the Greatest Single Development of Air Rights in the West.

Foremost Manufacturers, Wholesalers and Importers Will De Housed Under One Roof in New Wholesale District; Inbound and Outbound Freight Station on Ground Floor of Building; Club in Tower for Nation's Merchants.

Chicago, (Special).-Chicago is to have a gignntic Merchandise Mart will be twice the size of the largest business building in the world. This mammoth structure, two city blocks in length, 18 to 23 stories high, is planned for the service and convenience of merchandise buyers of the United States and to achieve for Cldcago a still greater prestige as a Great Central Market, it was declared today. It will cost \$30,080,000. Construction will begin immediately.

The project will be the largest single development of air rights. The property of the new building except for calssons begins 23 feet above

is now done mainly in concentrated oco market places, as evidenced by the Carment Center and Cotton Goods Center in New York City, automobile rows in all leading cities, financial buildings, and the Furniture Mart in manner and under Ideal conditions. Business men have learned that the nearer they are to the centers of these market places, the greater is their opportunity for volume and profit

The establishment of the Merchandise Mart is a dramatic development in the program to make Chicago the Great Central Market, a movement which the Chicago Association of Commerce started a number of years ago and a goal toward which it has been devoting its energies continuously ever since, under the leadership of

Located on River Front. This great Mart, which will house sales quarters and merchandise displays of several hundred of the cogntry's foremost manufacturers, wholesalers and importers, will be located in the rapidly developing new river district, and will occupy a distinctly conspicuous position just across the river from Wacker Drive at Wells street, where the southern facade of the structure will be visible for blocks. The site was formerly that of way Company's passenger station The building will extend 724 feet on Kin-Franklin streets. It will be set back from the river about 80 feet to accommodate a broad upper level drive

main entrance of the building will face the river and the drive. The Merchandise Mart will have a total floor space of about 4,000,000 square feet as compared with slightly less than 2,000,000 square feet, which is the floor area of the Furniture Mart, the next largest building. Each of the eighteen main floors will have an area of more than 200,000

Within the walls of this huge edifice the retail merchants of the United States, Canada and foreign countries will be able to see, under one roof, hundreds of lines of the world's best merchaudise. The manufacturers' exhibits will include textiles, ready-to-wear, toys, laces, gloves, corsets, millinery, silverware, glass, rugs, knit goods, hosiery, shoes, men's wear, fancy goods, sport goods, art and antiques, jewelry, trunks, tollet articles. ouse furnishings, office equipment and cores of other merchandise displays.

of both the gravity and endless chain type and quick horizontal distribution on every floor. Probably no building in the world

ments of engineering science, includ-

ing fast elevators, freight conveyors

will have such facilities for receiving and shipping merchandise as the new Merchandise Mart. The entire ground level below the street floor will be a modern freight station. Private tracks for incoming carload freight will ex-The Chicago and North Western Rallway will operate an inbound freight station for less than carload lots, as well as an outbound station, which will connect with all other roads through its new Proviso yards. The merchandise as it comes into this big

wholesale and manufacturing sales departments of Marshall Field & Com-

Time Saver for Merchants. Every possible facility will be provided for the comfort and convenience

of the retail merchant, who under one roof will be able to see bundreds of lines, thus saving time and money by doing in a few hours what ordinarily would take him days to accomplish On all floors of the Mart will be

great corridors, with all the appearance of boulevards, more than 650 feet in length, on either side of which will be the shops displaying their varled lines-veritable "business streets." These great corridors will be impressively treated architecturally and with the large space available it will be possible to house the selling activities and warehousing of many allied concerns on one floor, thus attaining the advantages of concentrated group-

The facilities for handling merchandise within the building will embody the best and most modern achieve

Bird's-eye View of Chicago's New Business District Carrying Out the City Beautiful Theme in Which the Mercantile Mart Will Be a Dominant Factor Among the largest tenents will be the shows may be held from time to time. As the plans are worked out, many

other features may be decided upon. Within recent years Chicago's central business district has been developing northward across the Chicago river. East of State street, along north Michigan avenue, Cass, Rush and other streets, this development has reached impressive proportions. evidenced by more than twenty large buildings. To the west of State street. a comparable development is under way. The site of the new Merchandise Mart is in the direct path of this new northward movement.

In the new river district where the Merchandise Mart is to be located, many great buildings have been erected, and others soon will be begun. Builders' Building, the Engineers' Building, the Chicago Evening Post Building, have been completed oppo-site the new Mart on Wacker Drive. The new Chicago Daily News Building and the great new opera house of the Chicago Civic Opera Company are being constructed on the three blocks south.

appraising look he gave her, a look

that swept her from leather boots to

leather cap, and then he turned about

in his chair and looked at Ronald

His voice was a dangerous purr.

"This, Mr. Ingram, is a flagrant in-

fraction of rules, as you know very

well. You have deliberately disobeyed

the one order to which I have held

every one around me in all of my va-

rious sailings .- No women aboard is

my rule-and no women aboard ap-

plies right now." There was a slight

return to something of suavity be-

"Madame, I am sorry. I can under-

stand that a woman may have quite

as good reasons as a man for wishing

to sail without the fanfare of pab-

licity. The ladies, madame, have my

sympathy, but they do not sail on my

ship." He bowed mockingly, the red

lips curving into a derisive smile.

The charm of your presence, the

warmth of your beauty, the brightness

of your eye, serve to strengthen me

in my conviction that women play the

devil on shipboard. Sorry. I have

"But-I am aboard," sald Gay

"You are, yes. Worse luck to all

alled a boner bringing that fool on board." he said softly.

at am I to do with him?" rry, but I had to bring him. I tida't let him go. He had been ping about, and I didn't know

much he had picked up." "Why didn't y u-" The captain's contle voice trailed off suggestively.

"Two reasons, and both d-d good s. We couldn't get rid of him in that cove. You ought to know that .-My God, I'll never forget poor Blakely, and how he kept coming in on every wave.—That cove, I tell you, is a trap. The tide gets nothing out, brings evcrything back.-Five times Blakely came in-the men cursing and praying -crossing themselves .- And at the ast we had to keep him there in the shack till be rotted. I tell you, rotted. -Besides," he said, "that was my ergain with you. I told you in the eginning that I stuck at murder, and still do. D-d if I'll kill them uness I have to."

"A good preacher was lost in you. Ronnie," the captain said affection-"You've got a conscience-or weak stomach-same thing.-Why. what's one crook more or less in a world full of 'em?"

Blakely was no more a crook than 1 am." Ronald muttered doggedly. The captain laughed jovially, "Well,

us, boy, what else are you?e, have more coffee,-You've got be blues." He touched the bell. The tain glanced at the list of names his hand. "Bring Mr. Rivers," be cald to the seaman who answered.

"There's a reward of three thousand him, but he had plenty on him, so

One of the men from the Little club o in, his hat in his hand. The two ficers nodded to him curtly, without ffering him a chair. He laid his papers before the captain.

"John D. Rivers. London, Passports, visas, birth certificate, every-thing O. K.—Ninety dollars, Mr. Riv-I understand you are going home this old freighter because of the nomy .- Sorry we can give you no better accommodations," he said suave-"but we do not cater to passen gers, really .- Fare, ninety dollars,"

The man Rivers without a word counted out five thousand from his

wallet, and laid it on the table. Ingram handed him a receipt for the

One after another the men from the Little club were ushered into the captain's room, their papers examined with great attentiveness, their money taken-usually fat rolls of bills for which a form receipt was given in exchange.

When the last man had gone out the captain figured swiftly on the back of an envelope for a moment. Then, etaching a small amount from the ap in his open drawer, he counted out a portion of it, and put it in a ection of the wall safe beside the

"One thousand eight dollars for the good ship Roger Williams," he said. Twelve stalwart passengers at ninety dollars a head."

The rest of the money he tucked ickly into a steel box, and touching secret spring in his table, fitted the box within it, closed it again. "And for the brains and blood behind the Roger Williams -a wee mile more,"

They smoked for a moment in st-The captain poured out fresh "The papers were good," the otain said in a tone of satisfaction. e's getting better and better,-We ed to keep a friendly oversight on him. He's getting almost too good. Well, let's turn in. I'm tired. You onk like the face on the bar-room Ronnie. Cheer op Things are oking up to heaven. That takes

care of everything, doesn't it?" One instant they both paused, on edges of their chairs, for a final all of their elgarettes. And in that ont Gay wriggled out from beth the bunk sliently and took one but fearful step toward them. loesn't take care of-me," she red weakly.

why he had purchased the clubhouse

"Yes, I-I loved him, and I had to find out from the plazza floor and crawled under and peeked through the oilcloth over the window and-I saw everything."

"And knowing - everything - still you took a chance and came along?" "I could not bear to-to let him go away-into such danger-alone. Besides-it is all your fault," she said accusingly, but there was no very convincing quality in the accusation. You are older than he, you are magnetic, powerful. You led him into it."

The captain laughed softly at that, but frowned again in a moment. "This is a devilish kettle of fish,"

"Where are her papers?" "She has no papers, sir. She only decided to come tonight." "How do you expect to get ber

"She won't go ashore, sir. She is an American citizen, so am L She will stay on board when we are in foreign ports. And when we come back we can land her at the island .- I couldn't come away-without her." The captain lighted a cigarette, and

bit the end of it thoughtfully. His mildness of manner had returned. "I'm not blaming him, you underneath his anger as he turned to Gay. stand, Miss-Miss-'

"Gay is my name, Gay Delane." "Gay. That's dee. Like that. Call you Gay then, right off, since you'll sort of be my mate-in-law as you might say .- You'll have to keep in your cabin, out of sight of the men .-

Why Do Women Have to Blab Every thing They Know"

You understand how men are, miss, advice in Ronald's pleading eyes, she when they're at sea, no women, you desire was to intimidate the captain. know-goes to their heads-nice. show him her power, make him rethought of a roman goes right to

"I-I wouldn't cause trouble for anything," Gay said quickly, and hope sprang into her heart again. "I am sorry I came. I see now how foolish it was. But things just-went to my showed in the captain's black eyes head, too, I suspect .- Perhaps you'd be ar just put me off and send me ashore in a small boat."

"I'd like to," the captain said pleasantly, and a smile showed in the dark mild eyes, "I'd like to first rate. But it's too late now. No, you'll have to stick it out with the Roger Williams this trip. Keep her in your cabin. Ronald, until- You'll have to be married! That's the dope. The men don't have much regard for women, but they show : ome respect to a wife."

Gay flashed a frightened, appealing look at Ronald. Married! "The captain marry us," he stammered. "At sea. Captain's privilege. Yes, that would be-best." But he

did not meet her eyes. "Yes. And me ntime, keep her in your cabin, and out of sight." The captain's eyes wandered to Gay again. warmly appraising slowly approving. 'Maybe she'd better stay here. My cabin is safe snough, for woman, child or beast. I'll keep her for you." "No. She'll be all right in my

cabin.-She-she is very nervous; Imust console her." "I could console her," said the cap tain, smiling broadly.

Punishment Not Given for the Child's Good

That most children are punished not | cope with all the varieties of their to make them better but because the parent is angry or has had his ego wounded is revealed by Winthrop D. Lane, writing in the Delineator Maga-

"Parents have certain pictures of themselves," points out Mr. Lane, "certain conceptions of themselves, and they do not like to have these disturbed. Even a child, if he steps on an adult's ego, is likely to regret it. And then we have to admit that chill dren are nuisances. Love them as we may, cherish them as tenderly as we wish, they annoy us tremendously. They make us climb the stairs at night to give them drinks; they disobey us; they endanger our property by striking matches. They break things -they lose things. They pile all the chairs in one corner of the room and call it a steambost. They trail mud ough the house; they leave marks on the walls. They break out in new

enduct every day. We cannot

mischief.

"And so we punish them. We punish them because they make us angry, interfere with our plans and cause us worry. No parent likes to have his day knocked into a cocked hat."

Peculiar Roman Sauce

The use by the Romans of the sauce which they caued "garum" and which consisted of the thoroughly rotted entrails of the tunny fish, must mean that despite the fact that the Roman laws forbade selling in the market any fish that had ceased to glisten, and for that reason forbade the wetting of fish after it left the water, much unclean fish was eaten and needed therefore to be flavored with a sauce made

of decayed fish. Garum cost in the days of the Ros empire about what a good bottle of brandy costs in France today.—Scrib-

Ronald answered with a straight de-flant stare. He stepped quickly to the door and opened it, then, after a moment's pause while he waited for a seaman to pass through the corridor, he took Gay's hand.

The captain, miling, gave her a friendly touch on the shoulder. "Don't be frightened, little girl," be said. "I'm going to take care of you. I am the captain here. Don't be fright-

"Th-thanks," stammered Gay weakly, and then, hurried by Ronald who held her hand, the ran, a boyish slim figure beside him, down the corridor to the farther cabin, and the door closed behind them.

Safe in their retreat, Gay faced Ronald Ingram defiantly, chin sturdily upturned, hands in pockets, eyes stubborn. She was not afraid of Ronald Ingram.

"What-what in the-the name ofheaven and earth-" he began wildly, he grumbled anxiously to Ronald. "what in the name-of heaven-"

"You said that once," she interrupted coldly. "Don't be silly," And then she wilted suddenly. "D-don't scold me. I-I-feel just-terrible. I -1 know I'm going to cry." Then, remembering Rand, she stiffened, faced him furiously again, drove the quiver from her lips. "Where is he," she cried, "where is Randolph Wallace? What have you done with him?"

"Oh!" Ronald Ingram looked white and sick all at once. "Oh, the Cavaller!-So that's it. I might have known. Fool that I was, for a moment I believed it-I thought-I believed you really did come-because you loved me-" His voice broke, and his eyes were smartingly bright. But Gay was heartless. She caught

his arm, held it in wrenching, strong young fingers. "You tell me," she commanded. "If you have burt-one hair of his head-" "I haven't seen him, Gay. I don't

know anything about him. What has he to do with-us?" Gay wilted again, broke into soft painful sobs. "Rand, Rand," she whispered through tears.

"Don't cry. Don't. He-he's all right. D-n him. I don't know where he is, but he's all right. Nothing ever -only us poor-devils-who-get-Don't cry, Gay." He put his arm about her tenderly, but Gay wept passionately and would not be comforted.

"What the dickens did you tell him all that for?" he broke in at last impatiently. "Nice mess you've got yourself into. Why didn't you keep your mouth shut, as I gave you a sign? Why do women always have to blab everything they know?. You put yourself in his power by your own words. If he thought you were innocent, knew nothing, he would send you ashore. But now, knowing you have his life in your hands, you are his slave for life. You'll never get out of his sight as long as you live. He wouldn't dare let you go."

"I was afraid of it," she said faintly. "I knew I had made a mistake when I saw his eyes. I was very foolish. I was never-very wise," she admitted pathetically.

"No. But you are-very sweet," he said sadiv.

"Help me, Ronald. Won't you help chaps, our men, fine chaps-but the me? You said you-liked me. I only came because I thought-'

"You thought that chap-the Cava-"I thought you would kill him, so I

you would let us die together." "I will help you, Gay. It is putting risk, but I will do what I can. We

must think, we must plan it out. You Dictionary of the English Language." must pretend to be in love with mehe will insist that you marry me. I away back there in 1828 was a notealmost hope he will." "Oh, po; oh, po."

"You could easily have it annulled Gay, don't be foolish-marriage would protect you-until you reach home. I would not-bother you. Gay, watch the captain. Do not think he would stick at murder? Don't you know that when a man is facing exposure, capture, death, he is mad---quite mad? Well, you mean those things to the captain, Gay, exposure, capture, death. He will keep you in his web like a spider. Remember Blakely-" "Blakely," she said sadly. "Poor

Blakely !" "You stand where Blakely stood. Watch the captain, and do not cross him, or you'll lie where Blakely lies. Blakely got in a mess-with a woman. too-no wonder Garman rules the women out; we've lost three good men because of them. Well, Blakely tried to swing Garman in to clear himself. You saw the end of Blakely. I tell you, Gay, watch the captain, and do not cross him."

"But, Ronald, I can't marry you. -I love- I can't marry you."

"Sh!" He signaled her into slience, his manner changed. "I know, dear est," he said clearly, "but don't cry. Don't be afraid of him. We were very wrong to do this, and put him to such a position, but he has promised to take care of you and he will keep his promise." He indicated for her to take her

"I-I am afraid, Ronald," she said faintly at first, but gaining courage as she spoke. "I-I wish I could go nome. Oh, why did you let me come?

Why didn't you warn me? He bates

me, I know. He looked very fiercely

at me. He is bandsome, is be not?

But I know he hates me." A brisk tap at the door, and it opened. The captain entered, and, one of the bravest of men, not without his smirk of satisfaction. His eyes upon Gay were amorous.

By ELMO SCOTT WATSON F, WHILE you're reading, you come across a word, the meaning of which you do not know, what do you do? The chances are that you ask somebody to tell you what it means, and the chances are, also, that that somebody will tell you to "look it up in the big book"

or to "consult Mr. Webster." For that is what Americans have been doing now for exactly a hundred years -"looking it up in the big book" or "consulting Mr. Webster." For it was "To intercede for him-to save just one hundred years ago this summer that a scene of unusual activity "Alas, no, I had no hope. I thought was taking place in the print shop of Hezekiah Howe in New Haven, Conn., and just one hundred years ago this my nose behind the bars to run the autumn there came forth the first edition of Noah Webster's "American

Now, the issuing of a dictionary is keep away from the captain-fear him not in itself a unique event, but the more than the men. Gay, I am afraid | issuing of Noah Webster's dictionary worthy event, and in some respects the book itself was unique. Heretofore the English-speaking world had depended upon Dr. Samuel Johnson's tor authoritative spelling and definition of words. But when the edition of 2,500 copies of the new dictionary, each consisting of two bulky quarto volumes of more than 1,000 pages each, appeared, Doctor Johnson's work was already obsolete. For Webster's book listed, defined and fllustrated with appropriate quotations somewhere between 70,000 and 80,000 words and included 12,000 words and nearly 40,000 definitions which had never before appeared in any dictionary of the English tongue. Most of the definitions Webster had coined anew, doing virtually all of both the nental and manual labor involved unassisted. He also did some revising and simplifying, and it is to him that we owe the fact that we write it "honor" instead of "honour" and "traveler" instead of "traveller." But more than that, his dictionary was almost an encyclopedia in which he set a standard for accuracy and completeness of definition which governs the lexicographer's art of this date. In fact, nearly all of the later dictionarles have been based upon Webster's work and have preserved his identical words in a large number of their defi-

millions of dictionaries which are to be found in the homes, schools and offices of the English-speaking world of today, and every one of these dictionaries whether it bears his name on its cover or not is a monument to Noah Webster, the Yankee schoolteacher and lawyer, who devoted forty-eight years of his life to a task which has enriched our language im-Although the words "Webster" and "dictionary" are synonymous in the minds of most of us, but few of us know much about the man, Noah Webster. Nine out of ten perhaps would confuse him with his distant relative, Daniel Webster, the orator and statesman. Yet it is not too much to say perhaps, that the contribution of Noah Webster to American life will be an important one long

after that of Daniel Webster will have been forgotten entirely. Noah Webster was the son of a poor New England farmer of West Hartford, Conn., who in 1774, when Noah, Jr., was sixteen years old, mortgaged his farm to pay his son's expenses in Yale college from which the boy was graduated four years later. Upon the day of his graduation his father gave him an eight-dollar Continental bill (worth about four dollars at the time) and told him that he could do no more for him. Although young Webster had intended to become a lawyer, he had no means to continue his studies into that field, so he had to resort to teaching to make a living while he studied law by himself-so successfully, it proved, that he was admitted to the bar in Hartford in 1781. He was unable to wait for a practice, however, so he again engaged in school teaching, this time at Goshen, N. Y., where he established a classical school.

There in 1782, foreseeing that America, after separation from the mother country would need to have its own school texts, he planned a "Grammatical institute" to include a speller, a reader and a grammar. The speller was issued first, in 1783, followed in 1784 by the grammar, and in 1785 by the reader. The success of the nowfamous "blue-back speller," still familiar to the older generation of Americans of today, was instantaneous and must have been amazing to the young schoolmaster. In preparing it, he had shown the same skill and sound sense which characterized his dictionary later. It was arranged

From that little edition of 2,500; in a more logical and serviceable mancopies issued in 1828 have grown the | ner than Dilworth's speller, the work of an Englishman previously used, and instead of dry passages from the Scriptures, he used interesting, if homely, anecdotes which appealed immediately to the children who for the next hundred years were to be im-

pressed by the moral of these stories. By 1815 the sales of the speller were averaging 286,000 copies a year. By 1828 they had risen to 350,000 copies annually, and by 1848 they were t to 1,000,000 a year. As late as 1880 it was still going strong, and it has been estimated that more than 100. 000,000 copies have been sold since 1783. Webster's fame may rest mainly upon his dictionary, but in a sense the dictionary owes its existence to the speller, for during the remainder of Webster's life, and especially the twenty years he spent in compiling the dictionary, most of the support of his family came from the profits of this little blue-backed 15-penny book. In 1800 he gave up all his other work to devote himself to his dictionary. His original plan was to correct the errors and supply the omissions in older dictionaries, especially Johnson's. So be spent a number of years collecting words. Then really ag his own lack of knowledge as to the origin of words he changed his plan. For the next ten years he devoted himself to a comparative study of words, and when he was sixty-six years old, having exhausted all the resources of libraries in this country, he went to France and England to complete his work.

Finally his great task was done, and in the autumn of 1828, it came from the press. Not content to rest after a quarter-century of incessant labor on one exacting task, the sturdy old Yankee set about revising some of his earlier works. In 1840 he published a revised edition of his dictionary and he was in the midst of a second revision in 1843 when death came to claim him.

So the next time you come across word whose meaning you do not understand, before you ask somebody what it means, think of the admonition of one chronicler of Webster's career-"If there is one too lazy to take the half-dozen steps necessary to reach the dictionary, let him picture the Connecticut scholar spending twenty-five years pacing about before his huge semicircular table, laden with dictionaries of all languages from Arable to Icelandic, so that he might give his great work to the world."

Bubble in a Sapphire

There is exhibited in the British museum a sapphire weighing nine carats and containing a bubble that appears and disappears with changes of temperature. It is believed that a cavity in the gum incloses a quantity of carbonic acid gas under great pressure. When the temperature is such as to for the gas, under the particular pressure to which it is subjected in its

brilliant prison house, it liquefies and | Pineapple fiber is also employed in becomes visible as a bubble.

Valuable Nettle

Nettles are usually associated with unpleasant sensations, but a species of the plant is widely cultivated in China for the manufacture of a soft silk-like fabric for textile purposes. In strength, beauty and texture it is said to compare favorably with the finest grades of silk and is less cost-

the manufacture of handkerchiefs and other articles.

Air Sickness Antidote

An apparatus has been installed at for passengers suffering from air sickness. Any passenger who fears that he may become airsick may inhale the antidote, which consists in the main of oxygen and cinnamon. The mixture ly. A Beautiful Evening Wrap.

Yes, there is no doubt about the dyed all-over laces now in vogue being among the lovellest media the mode has to offer for dine, dance and afternoon frocks.

Still another thing which glorifies these flattering lacy confections with super-charm, is the manner of their styling. The very beauty of these cobweblike colorful textures is a challenge to stylists to bring into play their finest and most ingenious creative ideas. There is, per example, the lovely dinner gown in this picture-an original Chanel model of lavender lace. With what beguiling simplicity is it fashloned. The sleevelike drape over one arm only, is individuat in its treattistically uneven, as it must be to comply with the dictates of the formal

evening mode. The ablest couturiers are doing some fetching things with lace these days, l omitting no intriguing detail such as mark the season's styling. They employ flounces, tiers, capelets, deep berthas, fluttering scarfs, fitted hiplines which slope to the back, most of are becoming more and more them accenting either scallops or ed in the evening wrap as a points, and so the list might be con

is a fascinating chapter which to do with lace of cobwebby are and in delectable colorings. summer is writing in the book shion for 1928. Lace, always airs and lovely, is infinitely more so it takes on, as it does this seathe tint of the rose or the tone wood violets, or reflects a radiant ch shade, or a dainty powdery blue,

ernists' dressmaking art are more than words can convey.

Pale beige is a favorite shade for the lace dress of cobweb texture. Am ber is another color which is very smart. In fact the brownish tones for sheer evening frocks are very much

in the limelight of fashion. On the theory that "one cannot have too much of a good thing," fashionist are complementing garden party and dinner frocks with wraps of matching lace. Some take the form of graceful capes, others of handsome three-quar ter length coats.

JULIA BOTTOMLEY. (E. 1928, Western Newspaper Union.)

FORGER, TRAPPED BY COMMA, TO BE FREED

Tiny Mark Proves Will to Be a Fraud.

Albany, N. Y .- Sent to Sing Sing two years ago, George Starin Cowles, gray-haired Yonkers architect, who forgot to clip the tall of a comma from the letterhead on which he forged a will naming himself the largest beneficiary of the estate of As uncle, is soon to receive a conditional pardon.

Supreme Court Justice Tompkins of Nyack, who sentenced Cowles to serve eight to sixteen years, recommended that the sentence be commuted. District Attorney Arthur Rowland of Westchester and Special District Attorney Sydney A. Syme of Mount Vernon, who prosecuted Cowles, have con-

curred in the recommendation. "I feel that the ends of justice have been served in the Cowles case," Justice Tompkins explained.

Plotted for Years. For 25 years, according to the plea for clemency made by Cowles' lawyer when his client was sentenced, the Yonkers architect plotted to steal the fortune of his uncle. Edwin A. Oliver. part owner of the Yonkers Statesman, and writer of a humorous column The birth of the idea, the attorney said, came when Cowles discovered that his grandfather, John W. Oliver, instead of willing him \$250,000, named Edwin A. Oliver, his son, as chief

eneficiary. At that time Cowles was engaged to narry Nellie Drummond, daughter of Yonkers business man. The wedding was postponed while Cowles brooded over devices to gain the noney he felt was rightfully his. Then the younger Oliver died and Cowles discovered that only a small part of the fortune had been left to him.

Studied Long at Library. He studied days and nights at the New York public library and finally submitted a will which, he said, was Oliver's last testament. The genuine will also was filed.

In preparing the fraudulent will, Cowles cut off the name of the printer of the legal sheet, but inadvertently left the tall of a comma. Further investigation showed that the blank on which the fake will was drawn had been printed in October, 1924, while the will was dated a month earlier.

Cowles' accomplice, Miss Drummond, at whose home he had been living for years, and William Weeks, Olivers' chauffeur, confessed they had wit nessed the fraudulent will and Cowles pleaded guilty of forgery. Weeks and Miss Drummond were freed.

After he had been in prison several onths, the real Oliver will was probated and revealed bequests of only \$46,000, instead of the \$250,000 Cowles had expected would be his. To Cowles was left \$3,867, but he never received ment. Of course the hemline is ar. a cent because of his legal expenses in contesting the real will.

Huge Helium Discovery

Makes Gas Plentiful couldn't change my nature.

natural gas fields which have a high belium content, together with im provements in the method of extrac tion, has placed this gas on the open market for the first time.

Hellum, used chiefly for floating balloons from the penny toys to American dirigibles like the Los Angeles, has until now been under government control. Besides the field at Fort Worth, Texas, which has been supplying the government with 500,000 cubic feet of helium a month, a new one is now be ing opened at Amarillo, Texas. This new field will provide practically an unlimited supply, certainly enough for the needs of the War and Navy departments, according to officials of the

oureau of mines. This gas, besides floating balloons, essens considerably the danger of caisson work by shortening the recompression time and reducing the number of cases of "bends" and also makes it possible for deep-sea divers to work safely at much greater depths. Since it is available commercially it is being used in metallurgy and for filling radio tubes and glow lamps. Other uses are developing as the supply becomes generally available.

Just Italian Football;

Reads Like Real War an area the size of Greater New Rome .- "In the name of Italy, in York to a height of 11,000 feet took the name of august Rome, by command of the duce, strong in a falta ing to Popular Science Monthly and which wavers not, conjoined as it is was discovered by mere accident. with a faith in the destiny of the Twenty-five years ago a submarine new Italy, our magnificent lads fought cable was laid across the Atlantic a stern battle, won a hard, a longed. ocean, passing near the British island for and a glorious victory. The great of St. Helena. When laid, the cable heart of Rome kept them erect, a rested on the bottom of the sea, about heart that beat with agony, but never 14,760 feet below the surface, Rewith despair even in the darkest mo ments when a gloomy shadow of de pair the cable it was discovered that feat hung over them."

This quotation from one of the Ro man papers is extracted from a description of a football match between Italy and Hungary, and it means that Italy beat Hungary by four goals to three after Hungary had led at half
