ATWATER ENT RADIO

"I know that manthat is exactly the way he talks"

SHE was listening to a demonstration of an Atwater Kent. Turning the FULL-VISION Dial from one station to another, suddenly she heard the voice of a friend she had not seen for years. She listened eagerly. It was "exactly the way he talked."

"I'll take the set," she said. "This radio tells the truth."

Anyone can convince himself that Atwater Kent receivers and speakers do give faithful reproduction. Listen to an orchestra and pick out the individual instruments. Each has its own character-its own identity.

Turn to a male quartet, a piano solo, a radio drama with all the varying voices and inflections-or to the President when he speaks. Every sound is true to the original. That is the standard of Atwater Kent performance.

Atwater Kent gives it to you for less money. Less money because Atwater Kent Radio is manufactured in great quantities, making economies of production possible. Yet this huge output does not affect quality in the slightest. For every set, besides being made of the finest materials, has to pass 222 tests or inspections in the course of manufacture.

Turn the FULL-VISION Dial and listen to "the radio that tells the truth."

How many people you know end their colds with Bayer Aspirin! And how often you've heard of its prompt relief of sore throat or tonsilitis. No wonder millions take it for colds, neuralgia, rheumatism; and the aches and pains that go with them. The wonder is that anyone still worries through a winter without these tablets! They relieve quickly, yet have no effect whatever on the heart. Friends have told you Bayer Aspirin is marvelous; doctors have declared it harmless. Every druggist has it, with proven directions. Why not put it to the test?

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Sallcylicacid

PLAN CHAIN OF AIR **SCHOOLS FOR NATION**

Miss Earhart Urges U. S. to Fix Standards.

New York .- A chain of aviation schools, with fields and instructors in strategically located cities in all parts of the country, is one of the major developments in American aerial progress to be expected in 1929, according to Amelia Earhart, first woman to fly the Atlantic, and now aviation editor of Cosmopolitan.

The schools, which will offer complete courses in flying to sportsmen and women as well as those training for commercial flying, will be sponsored by one of the principal companies now operating commercial air

Tuition Has Dropped. The price of learning to handle . plane already has dropped to an average of \$250 in the established flying schools, as a result of the increased interest in flying among people in all walks of life and the development of a large body of competent instructors within the past two years, Miss Earhart finds, surveying the rapid changes in aviation n the current issue of the magazine. At the end of the World war no air training could be obtained for less than \$1,000, but recently the fee has twice been cut in half. Today the cost is hardly more than the fee of a first-class dancing instructor, since the \$250 covers 10 to 12 hours of actual flying, spread over 20 to 25

Urges U. S. Inspection.

Miss Earhart, however, warns prosective amateur flyers against the barnstorming" flying instructor and the poorly equipped and inefficiently

"There are excellent flying schools and excellent private instructors in the country, but it still is difficult to distinguish the good from the bad," says her Cosmopolitan article. "It is the opinion of many flyers that the Department of Commerce should make a classification similar to that of the American Medical association, which gives its approval after inspection to hospitals which maintain certain standards. Given time, flying schools will acquire reputations, but it might be easier for students if there were a published rating now. One distinguishing mark, however, is already available. You can be sure the planes used are licensed by the Department of Commerce. And be sure that they

are inspected frequently. "The student also should have a physical examination, paying special attention to the eyesight, by a De-partment of Commerce physician."

Double-Time Tractors Add to Farm Profits Washington. - By working their it at once. RubMusterole tractors night and day during the "peak" seasons thousands of farmers on the congested are getting double the value out of

The idea developed on the Pacific light all the towns and cities in the coast, where 23-hour days for one state and run all its street cars, trains tractor and two operators have been and factories. The big problem is to common for years. This year agridraw off the steam and harness it to cultural engineers have seen the pracpower units. Dr. E. T. Allen of the fice spread to the grain belts of the Carnegie institute has had six wells Middle West, where both the seeding

their machinery and, economists say,

Under the glare of convenient spot lights tractors roar through the night, bringing their work year up from 2,000 to 5,000 hours. The average American tractor work year of 400 hours has been multiplied so frequently that it no longer is remark

In the Imperial valley of California, where cantaloupes and head lettuce are grown so efficiently, the big tracklaying tractors run for months on capacity hour schedules in spite of 120degree temperatures, clouds of dust and desert winds.

Chile Bars Girls Sitting Next to Bus Drivers

Iquique, Chile .- To curb one armed driving, authorities here prohibit any woman passenger in Iquique's motor buses from riding next to the driver. Seats are arranged so that passengers sit with the chauffeur, but any woman taking the place next to him must move before the bus starts or the driver will be fined. The official explanation was that girls "distracted the operators' attention."

0000000000000000000000000 Deity in Knickers

Resented at Theater Frankfurt-Am-Main, Germany. -Public objection to representation of the Delty on the stage took a drastic form at the Mo nicipal theater recently when a production of Walter Hasenclev er's comedy, "Mariages Are Made in Heaven," provoked a hombardment of vile-smelling

bombs and tear-gas grenades. The company finished the play to an empty house. Police ejected several disturbers. This caused free-for-all fighting in the street outside.

The play, in which the Deity was represented as wearing golf clothes and knickerbockers, had previously caused a scandal in Berlin, Hamburg and other German cities.

SAME PRESCRIPTION **HE WROTE IN 1892**

When Dr. Caldwell started to practice medicine, back in 1875, the needs for a laxative were not as great as today. People lived normal lives, ate plain, wholesome food, and got plenty of fresh air. But even that early there were drastic physics and purges for the relief of constipation which Dr. Caldwell did not believe were good for human beings. The prescription for constipation that he used early in his practice, and which

he used early in his practice, and which he put in drug storee in 1892 under the name of Dr. Caldwell's Syrup Pepain, is a liquid vegetable remedy, intended is a liquid vegetable remedy, intended for women, children and elderly people, and they need just such a mild, safe bowel stimulant.

bowel stimulant.

This prescription has proven its worth and is now the largest selling liquid laxative. It has won the confidence of people who needed it to get relief from headaches, biliousness, flatulence, indigestion, loss of appetite and sleep, bad breath, dyspepsia, colds, fevers. At your druggist, or write "Syrup Pepsin," Dept. BB, Monticello, Illinois, for free trial bottle.

Daddy's O Evening Fairy Tale A MARY CRAHAM BONNER

A GOOD NAME

"I hate to see these creatures who let the mothers do all the work," said Mr. Tumble Bug,

the beetle. Tumble Bugs always lay their eggs in a ball, which is a curious habit they have. "So many ani-

continued Mr. Tumhelp their mates." "No one could be any kinder than said Mrs. Tumble

They Kept said Mr. Tumble Bug. "You are such Pulling.

much of you that I simply can't help working with you. "It gives me pleasure to assist you." Mr. Tumble Bug wiggled his legs is he said this, and Mrs. Tumble Bug was tremendously pleased.

"All the Tumble Bugs help their vives," she said. "Ah," said Mr. Tumble Bug, "that s because there are such nice Tum-

ble Bug ladies. "We cannot do anything else but be nice. We would not be gentlemen beetles if we were rude, you know." "And you take an interest in the eggs, too, don't you?" said Mrs. Tum-

ble Bug. Mr. Tumble Bug bowed his beetle

Then they started to work at once They took the ball in which were colled all the eggs. Mr. Tumble Bug began pulling at the ball, for he thought that was the bardest part of the work.

Mrs. Tumble Bug pushed as hard as she could.

They kept on pulling and pushing, Mr. Tumble Bug always trying to do the heaviest part of the work, until they tumbled their ball of eggs into a hole in the ground which they had planned as their children's nursery.

That is the reason Mr. and Mrs. Tumble Bug and their relations are all called Tumble Bugs instead of beetles, for they always tumble their children into a hole, where they come out-later on-as Tumble Bug chil-

Mr. and Mrs. Tumble Bug are extremely pleased that they are not called plain, ordinary beetles, for they think in this way they are most dis-

"I think the children will be a fine lot, this time," said Mrs. Tumble Bug. "You always think so," said her husband, smiling a beetle smile.

As they looked about them they saw other Tumble Bug families tumbling e rolling their halls of eggs into

holes in the ground. The daddy was always pulling and the mother pushing.

"You see," said Mr. Tumble Bug. "we bugs can't help being nice to you. It is the habit of overy one of us to

help ou. dear little beetle mates." All the mother beetles felt very proud that they were looked after and assisted with the housekeeping and the bringing

up of the children. So Mr. and Mrs. Tumble Bug took a fine nap and every little while another daddy Tumble Bug was helping a mother to tumble the eggs into a hole.

For, as they both do the same work, they both deeres the name of

Tumble Bug. They are glad They Both Deand proud to have serve the Name.

be able to always live up to their

name, and from the way they work, I feel sure they always will. Oh, they consider their name a very good one.

Mama Wanted Him Mrs. E., living next door to a kin-

dergarten school, has a small Boston bull dog. The children at the school are fond of it and will take any kind of a chance to get it away from the The other day Mrs. E. came out on

the porch and saw the dog following some small boys down the street and she immediately called it. One of the boys stopped and looking at the dog seriously, said: "Run on back now, your mamma wants you."

Natural History Lesson The teacher was examining the class

to see how much they remembered of a natural history lesson given the day before,

"Now, Johnny," she said, "which animai do you remember?" "The warmer," replied Johnny. "Nonsense! There's no such ani-

mal. Sit down!" "Please, miss, I know what 'e means," said another boy. "'E means the otter."

Denotes Concealed Evil "There is something rotten in Denmark," is said of a concealed evil. Thousands of persons use this saying continually without having the least suspicion as to its source. It is based on a passage in Shakespeare's "Hamlet." In the fourth scene of the first act of that play Marcellus, an officer of the watch, says to Hamlet's friend Horatio: "Something is rotten in the state of Denmark." The remark was made after Hamlet followed the ghost of his father from the platform before the castle.

THE DOUBLE CROSS

CHAPTER I

Early L. the afternoon of a certain Saturday Jim Stanley stood at one of the windows of his lofty office looking out at a panorama of which he seldom tired. Away, through the haze of the late afternoon, he could see a glimpse of New York harbor, with its busy traffic, and in the far background a huge dim figure vaguely stabbed the murk with its uplifted torch. He gazed upon it in silence for a time and then with a sigh and a gesture of impatience he turned, sat down and began to dicate somewhat irritably to the audiphone upon his desk.

"Of course there is always the possibility of error in these calculations. and it would be wise to allow a cousiderable margin of safety, therefore but on the whole we are in a position to say that we think well of the proposition. If you wish, I shall be glad to discuss the matter at length and in detail. Very sincerely yours."

He switched off the machine, took another letter from the heap awaiting his attention, and attempted to pit his mind on it. For some reason he was unable to do so. He fidgeted a mo ment, rose and walked again to the window and looked upon the far-flung panorama of Manhattan.

Now, this indecisior or, better, perturbation, was not as all characteristic of this young man. Anyone who knew him well, watching him now, would have sensed that something had disturbed him deeply. He ran his hand through his brown hair with a gesture of discontent and turning at length again to his desk ne rang the bell and said to the gray-haired little man who

"Frank, when you leave the office this afternoon you will find O'Hara waiting with the car. I shan't need him again today. Take the audiphone and all this heap of correspondence on the desk, hand them to O'Hara, and tell him to take the whole lot down to the country and have Jefferson put them on the desk in the library."

"But I understood, sir," objected the secretary, "that you had planned to spend the week-end playing golf at

"That's so, Frank," responded Stanley, "but I find I can't do it. Please get Mr. Roberts on the phone and explain to him that unexpected and im perative business will detain me. Be as apologetic as you know how. Grovel for me, Frank, grovel." Wilson smiled. "Yes, sif." be, said.

"I shall grovel abjectly."

"Great invention the audiphone," continued Stanley, casting an interest ed eye upon the machine. "You can dictate for hours without having a stupid stenographer around saying. 'What's that, sir?' or 'How do you spell cat, sir? Talk as fast as you please, talk as slowly as you please. the machine doesn't get restless. It doesn't fix its hair or tap the floor with its foot, and thank God it doesn't chew gum !"

tainly has some advantages over the female of the species, but doesn't it sometimes get out of order?"

"Well," replied Stanley, "the female of the species has been known to do

Employer and employee smiled together at this feebie jest. You would have guessed that relations between them were not wholly formal and officlai, and you would have guessed right. Wilson was more than secretary, he was a thoroughly confidential assistant. In fact he knew much more about the business of the firm than Rollin Waterman, who was not only Stanley's partner but his lifelong friend as well. And it was not only the business of the firm with which he was well acquainted. He knew much more about the private lives of both the members of the firm than either of them guessed-perhaps a good deal more than one of then would have liked, and he was thinking of that particular one when Stanley turned and mentioned his name.

"Frank," he said, "Mr. Waterman hasn't come in yet?" "Not yet, sir."

Stanley besitated an instant, and then tossed his head with an air of decision. "When he does, say I'd like to see him."

"Yes, sir, I will," answered the sec

The door had scarcely closed behind Wilson when upon the other side of Stanley's office another door opened and there entered briskly a young woman, clad in the business tweeds of Wall Street. She was a dark, goodlooking girl of twenty-three or twentyfour, with assurance written large om her eyes of Spanish black.

Stanley turned upon her entrance Well, Miss Morgan?" be said.

me to call your attention to." He took the letter and read it swiftdissatisfaction as he said: "Why. this is dated three days ago. It should

of the sort, sir." Stanley looked at her with curiosity but whatever he was thinking he passed over the impudence. "Hm." he said reflectively, and then, "is that

"Yes, sir."

"Good." She turned and went out. He vas still tooking after her in a puzzled sort of way, when the opposite door opened and Rollin Waterman came in. breezily, as usual. Perhaps that was one of the secrets or his charm-he with him.

In the Street these two men were known variously among their intimates as Damon and Pythias, Park and Tilford, or liver and bacon, and

he office than in it. Their friendship dated from the days when they wore pinafores and played together in the park whil their nurses gossiped on a nearby bench, presumably, if we credit the professional humorist, with hand some policemen. It is true that the credit side of the tedger of this friend ship showed a heavy balance in favor of Jim Stanley, but it is equally true. too, that his opportunities for benevolence far exceeded those of his friend.

Jim and Waterman were about the same age. They had many points in common. They were both well born, of an old New York stock, they were at school together and at college. Jim's father, however, had been a canny and successful business man. and when he died had left a fortune of incommon size entirely to his son. Waterman's sire, on the contrary, had been an able but erratic person who dissipated the fortunes of his family and left his son a beritage of debtsnot that anyone could ever see, however, that 'bese debts weighed noticeably on the mind of their inheritor. "Hello, Rolly," said Stanley, "a bit

"Why, does it matter? Lively day

on the floor, you know." "Yes, another million share day Glad we held on to that B. & O. last

"Yes, that will do us a bit of good. Er-Wilson said you wanted to see

"On, yes, I-oh, by the way, why do you keep that secretary of yours?" "What's the matter with Miss Morgan?" inquired Waterman, 'ith just the least indication of surprise.

"Well," said Stanley, "the's careess, and she's impudent. Aside from his medicine as best he can. What that she's first class."

Waterman laughed and answered 'Oh, she's all right if you understand her, and she's intelligent, which covers a multitude of sins. That what you wanted to see me about?"

The smile died from Stanley's face. slowly, "no, no, it isn't."

"Well, then, shoot," adjured his friend. "What the deuce is it? You look as glum as a parson's face on a Monday morning."

great spirits of the American Revolu-

"I was about to suggest something | It was clear that Stanley was embarrassed. This was a thing that sei dom happened to him and he didn't like the feeling. However, it had to be done, and now was the time.

"Rolly," he said, "I've had some thing o my chest for quite awhile and now I'm going to get it off. We've been pals for a good many years. I hope we always shall be."

"I hope so, too," responded his part-"Why not? Anything gone wrong? Have I done anything?" "No, no, not a blessed thing," said Stanley hastily, "Don't misunder always seemed to bring the ou-doors stand me. I think that ours is the kind of friendship that nothing could

spoil, with possibly one exception."

"I can't imagine what the exception could be," laughed Waterman. "The possible exception," responded the other, "is an exception that has ruined more than one friendship be-

fore now. I mean a woman "Oh." said Waterman blankiy. He rese from the desk on the corner which he had been sitting, took one urn up and down the room and topped in front of his friend: "I sup ose you're talking of Doris Colby." Stanley shrugged his shoulders.

"Well," said the other, "what about

"Just this. Here we are, you and I. pals-same school, same college, same clubs, and now for two years part ners; and as if that were not enough for us to hold in common, it looks to me as if we had gone and fallen in we with the same girl. Of course ve've never talked about it-"

"People don't, as a rule," muttered Waterman.

"True, but we must." "Why so?"

"I'll tell you, Rolly. It would be easy enough to let things drift along and take their natural course, but I've been thinking a lot about it and here's how it stands. Many a friendship has been wrecked on just this kind of a reef Now I don't want our friendship to be wrecked, no matter what happens. I may be all wrong when I say that we both love the same giri. I can only speak for myseif, and if I am wrong, just say so and we'll drop it."

He tooked inquiringly at his friend, who presently dropped his eyes and shrugged his shoulders.

"All right, then," Stanley went on. Now it is clear to me that it's begun to get on our nerves. We haven't been ourselves in each other's company for quite a while. It has both ered me a lot, this-this barrier that's been rising between us. Let's break ing." it down. I think that Doris is fond of both of us, though perhaps in different ways. And for the moment there's apparently no one else in the

"No," agreed Waterman, "not since Monsieur Le Comte d'Estrelles took ship for home with a refusal in his uggage.

"But," continued Stanley, "she can't marry as both, and it may be that she hasn't the slightest idea of marry ing either of us; but I have cerfhin notions of my own upon the point, as no doubt you have also. Some time she must make a choice. So far as we're concerned, the sooner the better. It is my besofted idea that I am the husband designed for her by an allwise Providence, and you appear to be nourishing designs of your own not precisely in line with that view. Is

that right?" "It is," said Waterman briefly. "Very well, then, I propose thiswe shall each go to her this very evening, one at nine o'clock, and one at nine-thirty. Each of us shall ask her to marry him and the loser shall take

dr you say?" 'aterman took another turn upon the rug. Then he thrust both hands deep into his trousers pockets, and thoughtfully fingled a few coins there-Somehow he seemed to gather determination from the sound. At all "No," he said shortly, and then added events, he turned again to Stanley and bserved, succinctly, "It's a bet,

> Stanley breathed a sigh of relief. "Good," he said, "and whoever wins, it's to make no difference whatever in his relations with the other."

A writer in the Detroit News pays I spoke boldly, demanding to be shown

this splendid tribute to one of the any reason for argument or delay. He

"Waterman jingled the coins again "Right," said he.

"Fine," cried Stanley, his face light ing up. He put out his hand. Water man took it

"And now." sall Waterman, "who goes first?"

"We'll toss for it." Stanley decided "Suits me," grinned Waterman, producing one of the jingly coins, "You

"You toes," directed Stanley, "Th "Right. Here goes!" He tossed the

call it, or shall 1?"

"Heads!" cried Stanley, as it felt apon Waterman's palm. Stanley in spected the coin briefly, then his face fell a trifle. "Tails it is," said he. "You win. All right, old boy, you go first. But I know that you'll forgive me if I don't wish you tuck."

Waterman grinned. "Under the circumstances, yes," said he. "All right," said Stanley briskly, "I know she's to be at home tonight, for

she told me so." Waterman grinned again. "Yes," said he. "so I heard," and they grinned

together. "Well," said Stanley, "that's that," and made for the wardrobe closet. whence he took his hat and stick. "Awful loke on us." he remarked, "If she turned us both down."

"Can happen," answered Waterman philosophically.

"Anyhow, I'll be d-n glad to get it over."

"Me too," "All right, then-you at nine, and at alne-thirty enter, so far as you're concerned, the villain. Of course if you've won I'll know it the moment I come in, and it won't be necessary for me to say anything but, bless you, my children. But, best of all, it's going to be a square deal."

"Surest thing you know!"

"Till tonight, then, old man. Win or lose it's all right, and-good luck to-one of us," and with that Stanley smiled again and departed.

The remaining partner gazed reflectively after him. Then he lighted a eigarette and sat down. He had a good deal to think about.

CHAPTER II

"Well, Rolly, do you mean it?" Waterman started. The speaker stood behind him and he had not heard her enter. It was one of her accomplishments, this swift and silent ap

once more. Waterman's hand was not to be forced.

"Do I mean what?" he said. "That you're going to ask Miss Colby to marry you?"

Waterman blew the ash from his

cigarette. "What if I am?" he said.

The girl's mouth tightened, her face hardened, her black eyes flashed "Just this," she said. "You can't do that kind of thing to me."

"No. Mr. Rollin Waterman, not after all that's passed between us-no." "Why," he said, "what could you do about it?" Though he spoke with a jeer, he was far from comfortable, for

he knew well enough that she could and would do something about it Wherefore his remark was not so much a gibe as a genuine request for infor-Information was promptly mation forthcoming.

"I'll tell you what I can do about it. Do you suppose a girl like Doris Colby would have any use for you if she knew the truth about me?"

"Do you mean that you will tell "That's just what I mean. You will

promise me here and now to give up l all attempts to marry her, or I'll go to her and tell her the precise truth about you and me." "Hm," said Waterman. "Black-

A forgotten Hero of the Revolution

By ELMO SCOTT WATSON

FTER more than a century of neglect of his unmarked grave, tardy honors have at last been paid to a forgotten hero of the American Revolution, whose services were of inestimable val-

ue to the cause of liberty, a man who was one of George Washington's closest personal friends and to whose lot It fell to close the dying eyes of the Father of His Country.

This man was Dr. James Craik, chief physician and surgeon of the Continental army. After Doctor Craik's death in 1814, he was buried in the churchyard of the old Presbyterian meeting house in Alexandria, Va. With the passage of years the old burying ground was neglected; weeds covered it and finally all trace of Doctor Craik's grave was lost. Several years ago a movement was started to locate the grave of this patriot and erect a suitable marker. This was done and a small brass tablet was provided by the Alexandria Chamber of Commerce. Through an error, however, this tablet was placed in the wrong spot.

But last year the project was taken up by the Presbyterian Meeting House Restoration committee of Alexandria. and as a result an imposing granite monument, paid for by his descendants, was recently unveiled over Doctor Craik's grave.

Doctor Craik had had a distinguished career even before he became chief medical officer for the patriot army in the Revolution. What that career was is shown by the following sketch of his life, provided by the restoration committee:

Upon the organization of the Virginia Provisional regiment in 1754. Craik was appointed surgeon. The command was at the same time tendered to Maj. George Washington who modestly declined but accepted the lieutenant colonelcy, the command going to Col. Joshua Fry. The regiment was not brought together until, upon the death of Fry at Wills Creek, Washington succeeded to the leadership and the headquarters joined him at Fort Necessity. Here was begun that lifelong intimacy between Washington and Craik, so much treasured by both.

Craik, as medical officer of his regiment, was present at the battle of Great Meadows in 1754 and rendered surgical aid to the wounded in that action. His service extended also over the period of the ill-fated expedition of Braddock toward Fort Duquesne, and he participated in the battle of the Monongahela, where he dressed the wounds of the comander of the British forces and many others of the injured upon that bloody field. Here he witnessed the singular impunity which attended his youthful chief as he performed his duties first as aide and later as commander of the disheartened remnants of the British troops.

When, then, on August 14, 1755, some six weeks after the operations on the Monongahela, Washington was appointed to the command of the Virginia provincial army and assigned to the duty of protecting the Virginia and Maryland frontier from French and Indians, Doctor Craik still remained as his chief medical officer. The operations thus begun continued

for more than three years, during which all the hardships and privations of the hardy frontier troops were shared by the young surgeon, whose service ceased only upon the disbandment of the little army after the capture of Fort Pitt on November 25, 1758. Upon his retirement from the Vir-

ginia provincial service, Craik purchased an extensive plantation at Port Tobacco, in Charles county, Maryland. and erected upon it a spacious mansion which was described by his grandson, Daniel Jenifer, in 1849 as even then one of the "largest, most comfortable and agreeable residences in the country." Here on the 13th of November, 1760, he brought his young bride, nee Mariamne Ewell of Belle Air, in Prince William county, Va., and here he passed in active medical practice the years which elapsed until of them together." he again followed his friend at his country's call. During this time the Craiks and the Washingtons never relinquished their intimacy, and the interchange of visits between Port Tobacco and Mount Vernon were the source of the sincerest pleasure to both.

When the occurrences arose which culminated in the War for Independence, Doctor Craik was an active patriot. As early as 1774, t.e was conspicuous in a meeting of the citizens of his county at Port Tobacco, at which were adopted a series of resolutions in which the people pledged | for the materialization of which was selves that if th liament to blockade the port of Boston was not promptly repealed the inhabitants of the county would join with the several counties of Maryland and the principal colonies of America to break off all commercial communication with Great Britain and the West Indies. Craik was a member of the committee of correspondence selected to carry out these resolutions.

So valuable to the cause was the presence of Craik in Maryland and so deeply were planted the rootlets of his social and professional relations that Washington hesitated a considerable time after assuming command of the American forces to ask his old friend to again place his medico-military experience at the disposal of his country. But in April, 1777, in a most cordial letter he tendered to him his choice between the positions of "senlor physician and surgeon of the hospital with pay of \$4 and six rations per day and forage for one horse" and "assistant director general, with pay of \$3 and six rations per day and two horses and traveling expenses found" in the middle depart-

- The latter position the doctor accepted and soon entered upon his duties. On the arrival of Count Rochambeau and his forces Craik was ordered to join them at Newport, R. I., and to organize their hospital department, a task which te accomplished with the most complete success.

On the reorganization of the medical department, October 6, 1780, Doc tor Craik was appointed the senior of the four "chief hospital physicians and surgeons," being the third officer in rank in the Medical corps, and upon the resignation of Director General Shippen and the promotion of Dr. John Cochran, "chief physician and surgeon of the army," he was advanced to the second place under the latter title. This position he held un-

war, in 1783, after personally participating in many of its most important events, including the capitulation at Yorktown.

At the close of the war, he returned to his home at Port Tobacco, but shortly after, at the earnest solicitation of his late chief, he removed to Alexandria, near Mount Vernon, where Le continued in agreeable association with the Washingtons until his death. In 1798, when war with France seemed inevitable and Washington was again summoned to lead the army, he made the appointment of Craik at the head of the medical department one of the conditions of his own acceptance of the command, remarking, "I have already been applied to by a gentleman, to recommend him for director of the hospital, which I have refused, as well on general grounds as because I should prefer my old friend, Doctor Craik, who, from forty years' experience, is better qualified than a dozen

Craik was accordingly commissioned physician general of the army, July 19, 1798, with the pay and emolu ments of lieutenant colonel, but without rank. With the proverbial negligence of military legislation, the act organizing the provincial army provided only for regimental surgeons and surgeon's mates. Fortunately, towever, James McHenry, the secretary of war, had himself served as a medical officer during the Revolution and in him Craik found a strong support in developing a properly organized "medical establishment," an act passed by congress, March

The determined attitude of the United States, her prompt resort to arms and the reappearance of her Illustrious soldier at the head of the army, however, was sufficient to repress the warlike ardor of France, and, peace speedily prevailing between the two nations, the army was disbanded, Physician General Craik's services officially terminating on June 15, 1800.

Long before the latter date, how ever, he had returned to his beautiful Virginia home, where · in December, 1799, it fell to his lot to close with his own hand the dying eyes of his faithful and famous friend, General Washington.

Of that solemn hour, Craik himself wrote: "I, who was bred amid scenes of human calamity, who had so often witnessed deatt, in its direst and most awful forms, believed that its terrors were too familiar to my eye to shake my fortitude; but when I saw this great man die it seemed as if the bonds of my nature were rent asunder, and that the pillar of my country's happiness had fallen to the

Washington's own testimony to the relations between them was witnessed by the clause of his will which specified that: "To my compatriot in arms, and old and intimite friend, Doctor Craik, I give my bureau (or as the cabinet makers call it, tambour secretary) and the circular chair, an appendage of my study."

Doctor Craik survived this event 15 years, the latter portion of the time in honored retirement, being remembered by his grandson at this period as "a stout, hale, cheery old man, perfectly erect, fond of company and of children and amusing himself with light work in the garden." He remained vigorous to the last and passed away February 6, 1814, at the age of sixty-four.

Another "Tong" War

A policeman was walking his beat in a residential district when a badly battered house-to-house salesman

rushed up to him. "Say, officer," he panted, pointing to a red-headed iceman, who had just climbed on his wagon, "I want that man arrested. Just look what he did

Stalking majestically into the street the policeman waved the ice-wagon to

you hit this man?"

"Ol did," was the shameless reply. "What for?"

"Allenation ov affections," replied the iceman. "He sold Bridget Nolan's missus wan av thim electric ice-boxes."

Crocodile's Dinner-Call

In Njango, a village on the shores of Lake Victoria, Uganda, an African by the use of a peculiar call can sum mons an 11-foot crocodile from the

halt, and demanded of its driver, "Did | depths of the lake and make it eat fish from his hand! On Saturdays and Sundays, when hundreds of natives arrive at the little village from the surrounding territory, the African exercises his peculiar power, making the crocodile eat scores of fish supplied by the admiring crowd. This sale of fish is making the na-

tive a rich man, and so strange is the sight that motor buses are now making special runs to Njango.

"Here is a letter," she said in her Origin of the Polka was of great importance, although ipped voiced, "which Mr. Waterman none of his many writings indicate that he had a gift for practical statesmanship. His words burned every-19. Then he faced the girl with a glance where with a large and splendid ardor for American ideals, for liberty,

to use the words that now echo over the whole world, 'The United States of America.' As one of the leading lights of the American Revolution, be equality, and the right to happiness. "His pamphlet, 'Common Sense printed in 1776 and followed by the various numbers of 'The American Crisis,' stirred and spurred Americans to the road to freedom more than any other words produced in those days by tongue or pen, unless they were those of the Declaration of Independence. When all men were

jealousies and local narrowness be forgotten: 'Our great title is Americans-our

preached federal union, that petty

inferior one varies with the place."

A Hungarian dancing master on walking tour in the 1830s stopped at a small village in Poland where he saw a peasant girl dancing a folk dance that particularly pleased him He brought back the new steps to Prague, where the dance immediately won great popularity, and named it polka for the land of its origin.

The polka was introduced to Amer ica about a decade later, when James K. Polk was a Presidential candidate Because of the similarity of names the polks became a campaign dance Articles of various kinds were named hesitating over the audacity of final for the dance—polka scarfs, pol separation from Great Britain, he gloves and finally the polka dot. for the dance-polks scarfs, polks

When your Children Cry for It

There is hardly a household that hasn't heard of Castoria! At least five million homes are never without it. If there are children in your family, there's almost daily need of its comfort. And any night may find you very thankful there's a bottle in the house. Just a few drops, and that colic or constipation is relieved; or diarrhea checked. A vegetable product; a baby remedy meant for young folks. Castoria is about the only thing you have ever heard doctors advise giving to infants. Stronger medicines are dangerous to a tiny baby, however harmless they may be to grown-ups. Good old Castoria! Remember the name, and remember to buy it. It may spare you a sleepless, anxious night. It is always ready, always safe to use; in emergencies, or for everyday ailments. Any hour of the day or night that Baby becomes fretful, or restless. Castoria was never re popular with mothers than it is today. Every druggist has it.

Fletchers CASTORIA

Absolute Serenity

PINTO STILL KING IN TEXAS CORNERS

Sections Use Ponies for Fast Transportation.

Dallas, Texas .- Railroad development in Texas has kept step in recent years with the state's march of progress in an agricultural and mineral way, yet so vast has been a last frontier of southwestern border counties that eight still await the steel rails that will bring to the region a fast and uninterrupted transportation it has never known.

The group where the automobile and pinto pony are still the only means of conveyance embrace an area fifteen times as large as Rhode Island, but the population in this undeveloped section is only one-seventh of that of Providence.

So great are distances from some of the cattle ranches that it is necessary to drive stock more than eighty miles to a railroad for shipment to packing houses or the feed lots of

Although much of the region still is largely in a pastoral state, due to the scarcity of rainfall and ownership of land in tracts too large for development, it is the center of the country's best wool and mohair area and the breeding ground for thousands of cattle each year. Oil resources have been developed in Crane county only. but land prices and bank deposits have risen rapidly since the World

Live stock values in Crockett coun ty exceed those of any other county in Texas, and Edward county, one of the group, leads the country in the

number of goats raised annually. Transportation companies have watched with interest this domain and plans have been discussed for an ex tension that will connect at least four counties-Mason, Kimble, Sutton and Crockett-with the outside world. A road also has been proposed for Edwards county, but for several years Glassock, Crane and Bandera probably will not witness what would be the novel sight of a locomotive rumbling across the region.

Electricity Now Runs

World's Oldest Clock Rouen, France.-The world's oldest clock, built in 1389, today ticks by

Not only does electricity run the clock, but it also rings Rouen's historic curfew, "Cache Ribaud," which was instituted by William the Conqueror and which for nearly eight centuries has sounded at nine o'clock each night the warning to all to return to their homes and put out their

For even the Rouen clock could not operate forever on its old machinery. The bulky wheels and weights ran the clock for more than 500 years before they recently collapsed under the strain and appealed for help.

So an expert in electrical clocks was called in. He tore out the antiquated works and substituted a small, black box. This box now not only operates the clock, but also rings the curfew.

The clock has only one hand-never has had another. But the great copper dial bears minute graduations and the machinery causes the chimes to strike every 15 minutes, as well as on the hour.

Attributes Long Life

to Horizontal Position

Vienna.-A certain Dr. Julius Tichwehr who recently died here at the age of one hundred nine, often declared that the secret of his longevity consisted in taking a horizontal position as often as possible during the day, and naturally, every night, Whenever it was possible through-

out the day, he would place his head in the direction of the North pole and thority, who tells us that too much the remainder of his body parallel to rich food forms acids which almost the meridian line.

The doctor affirmed that this posttion coresponded to the direction of the magnetic current running through the surface of the earth and thus per- kidney region, sharp pains in the back mitted a kind of magnetism of the or sick headache, dizziness, your iron mass contained in the body.

Connecticut Churches Tax Exempt 200 Years

freeing religious bodies from taxation during the night. has rounded out two centuries in Connecticut and is beginning a third.

Church of England churches in the Connecticut colony were granted exemption for taxation in 1727. A few years later the Baptists and Quakers also were exempted.

It is now 220 years since provision was made for dissenters from the es- made from the acid of grapes and tablished church. The general court in 1708 granted permission for the Presbyterian system of church government to be used by churches that to neutralize the acids in the system dissented from the Church of Eng-

FLASHLIGHT BIG AID IN CULLING

Shows Many Loafers Among ment in kind. No money to the work-Layers in Hen Flock.

Literally catching the loafers napping is an excellent method of culling the poultry flock, if the culling process is carried on from week to week. Extension specialists in poultry at the Oblo State university suggest that the weekly culling may be done very conveniently with a flashlight when the birds are on the roost at night.

Birds showing shriveled combs or molt, or having empty crops, should be culled. Absence of yellow pigment is one of the indications of a good producer, and it may be difficult, under a flashlight, to determine the coloring of the eyerings, earlobes, vent, beak and shanks. If there is doubt, the birds can be isolated and examined again by daylight. The heavy egg producers will have lost yellow color from the body parts mentioned. How ever, the color will return should the bird cease to lay.

In the low producer, the comb is pale, small and shriveled, the vent is yellow, shrunken and dry. Eyes are smell and shrunken, turning in toward the beak. Shanks are yellow, round and full, the pelvic bones close to-gether, hard and rigid. Space between the pelvic bones and the breast bone is shallow or full of hard fat, The skin is thick and underlaid with fat. The bird is generally narrow across the ribs and hips, and the body is shallow and round.

How Much Does Pullet Cost Till Able to Lay?

The North Carolina State college has conducted several tests to determine the amount of feed required to start a Red, Barred Plymouth Rock or Wyandotte laying pullet. In one series of tests the entire animal feed was milk and in the other meat meal. In the case of the milk-fed pullets it required 20 pounds of feed from the time the pullets were hatched till they began to lay 21 weeks later. This feed cost 71 cents. In the meat meal flock, nine and one-half pounds of mash and nine and one-half pounds of grain were used and the cost was 57 cents. Adding the cost of the chick, and oth er costs, the S. C. Rhode Island Red, Barred Plymouth Rock or White Wyandotte pullets just in lay would cost \$1.50 when milk fed and \$1.17 when meat meal fed. These pullets sell for \$2 each at laying time. If you have surplus milk, feed it to the growing birds.

For Early Winter and

Late Fall Production

With most ordinary flocks only 50 aged hens, the other half being pullets, and the purpose of this is to provide for early winter and late fall egg pro duction. Pullets, when hatched early and properly fed, will begin laying in October or November and lay quite heavily during this season of the year Hens that are one year of age or older rarely begin laying before late December or early January. They do their heaviest laying during the late winter and early spring months. Therefore to balance egg production it is neces sary to have approximately half the flock old hens and half the flock

***************** Poultry Facts

Birds that are not fit to be kept over as breeders should be disposed of at once.

Moldy or spoiled feed is always dangerous. It causes loss of appetite, diarrhea, fungus growth in the "Innards," and often kills the

Don't be afraid to feed oats, especially if you can get heavy white They are a great poultry feed, unless too much bull and not enough

If taying fowls lose weight, give them more grain. If they're lazy, heavy, and laying poorly, cut the

Corn, also barley, if fed, should be given in the evening, because these feeds provide needed heat for the and stimulate sluggish kidneys; also birds during cold nights on the roosts.

Improve your flock next year by getting some good males to breed with them. Start right now to looking or writing around and locate some good ones.

Turkeys will begin laying indoors, even in the late winter months, if they are well sheltered and given a good laying mash.

There is plenty of room for more poultry meat and it pays to keep a flock of good meat fewls that have

been bred for egg production. Don't think you have to keep Leghorns to get eggs. Any breed or variety can be bred for egg production. It is a matter of strain more than

Pay Roll Simple in Italian Rice Fields

A customary preliminary to harvest lime, which begins in early September in Italy's rice-growing center surrounding the city of Alessandria, in the Piedmont, is that the farmers and peasants arrange for wages and other labor matters. Last year the respective syndicates of workers and growers reached an agreement based on

er; he shall be paid with rice. Thus peasant lads from fourteen to fifteen years of age receive 171/2 pounds of rice a day, those from fif teen to sixteen earn 23 pounds a day, and boys from sixteen to seventeen years get 35 pounds. Girls from fifteen to sixteen earn 20 pounds of rice for the eight-hourday, while the

compensation by nature" or emolu-

women's stipend is 261/2 pounds. Should a laborer insist on cold cash, the grower will be troubled with the necessity of utilizing his arithmetic. For he must take the number of pounds the worker is entitled to and multiply it by the current market price, which is about 3 cents a pound

Old Writings Found

Shed Light on Past From Rabat, Morocco, comes a re port of the discovery of cunelform writing dating back to the Sixth century before the Christian era. The MSS., tending to show that the Assyrians or the Medes conquered and colonized Morocco, has been found, it is stated, by Captain Odinot, a French explorer, 22 miles north of Fez, the

sultan's capital. The inscriptions, which were discovered in subterranean galleries in the mountains, resemble in many respects the Babylonian writing found at Ur in Chaldea. Captain Odinot believes that the inscriptions prove that the Berbers were not the original inhabitants of Morocco, but that the modern Moors are the descendants of the Assyrians, Medes, and Persians and great warlike nations of Biblical

Outstanding Chevrolet of Chevrolet History

- a fix in the price range of the four!

represents 4 years of Development and over a Million miles of Testing

Years ago, the Chevrolet Motor Company designed and built its first experimental six-cylinder motor. This far-sighted step was taken because Chevrolet engineers knew that the six-cylinder motor is inherently the most perfectly balanced motor - the ideal power plant to meet the growing public demand for greater reserve power, faster get-away and, above all-smooth, quiet performance.

During the last four years, over a hundred six-cylinder motors were built by Chevrolet engineers and tested on the General Motors Proving Ground. Day and night, through winter's cold and summer's heat, the incessant testing went on -until the present motor was developed and finally pronounced correct.

At the same time other Chevrolet engineers were perfecting other parts of the chassis. And another great automotive organization-the Fisher Body Corporation-was devoting its gigantic resources to the creation of the finest, sturdiest and most beautiful bodies ever offered on a low-priced automobile.

As a result, the Outstanding Chevrolet offers an order of well-balanced excellence-a combination of performance, comfort, beauty and handling ease that is truly remarkable - with a fuel-economy of better than 20 miles to the gallon of gasoline.

You owe it to yourself to see and inspect this remarkable car. Come in today!
