SANDERSON TEXAS, FRIDAY, MAY 29, 1931

NO. 12

American Legion to Hold Rodeo Ranchmen and Merchants Help

June 19, 20, Is the
Date, Big Crowd
Expected Here

At a meeting held last Saturday night at the Court House plans were made for a big rodeo to be held here on June 19th and 20th at the American Legion Field. A large number of citizens, as well as ranchmen, met with the local American Legion and all were enthusiastic over the rodeo. The Clarence Hallie Mulkey Post No. 160 of the American Legion will sponsor the rodeo and will have the support of ranchmen and business people in staging the event.

Plans were made for one of the best rodeos yet held to be put on in our little city. All the usual rodeo attractions will be had both afternoons. The crowds will be entertained by bronco riding, steer riding, calf and goat roping, bull-dogging and all other rodeo events. Both mornings there will be a baseball game for the entertainment of those who enjoy these sports. Each night's attraction will be a dance and good music will be secured.

A free barbecue will be given each day by the Eat More Lamb Club.

A parade will be the first feature for both days and all business firms are being invited to participate in the parade and are asked to enter a float representing their business. The committee on arranging the parade are: R. H. Lewellen, G. J. Henshaw, Buster Edwards and C. V. McKnight.

The following were placed on committee to arrange the rodeo events, decide on purses, entrance fee and arrange all programs: W. A. Banner, Leo Bishop, Jess Haley, Milton Smith, Charley Turk, Lee Hayes, Elmo Taylor, and Carl Cochran. Tom Breeding, Bernice Hallsell, Herman Pauli, and John O'Dell were placed on the committee to get the local field and park in readiness. Tennessee Wilburn and Prince Dishman were the committee on arranging and deciding the date.

This rodeo promises to be the best attraction and one of the best events ever held here. Already champion goat ropers, bull ropers, bulldoggers have signified their intentions of being here and giving the crowd plenty of thrills and entertainment. Some of the wildest and worst outlaws in the way of horse flesh has been promised to be cowboys to ride.

All neighboring towns are invited to come and spend two days in our little city and enjoy good rodeo.

MISS KATE FRAZIER ELECTED TREASURER

Last Monday evening at the special board meeting of the First Methodist Church, Miss Kate Frazier was elected treasurer of the First Methodist Church of Sanderson. Miss Frazier was also elected a member of the official board of the church.

A slow rain commenced to fall early Wednesday night and continued most of the night. Thursday more rain fell, and the temperature dropped considerably. Reports are that the rain is fairly general over the county and will be of benefit to the range.

Miss Jernigan and Mr. Harrell Marry

Mr. and Mrs. Frank Kendrick Harrell Jr., who were married Saturday afternoon in St. John's Episcopal Church, left after the ceremony for a wedding trip to South Texas and Old Mexico, and will return to Sanderson to make their home. Mrs. Harrell, who was Miss Fleta Belle Jernigan, is the niece of Mrs. Fred Linington of Irwin Avenue.

The church was decorated in palms and fern, brightened with vases of gladioli. It being Whit-sunday, the sanctuary was covered with red roses and purple larkspur, and just outside the altar rail were tall baskets filled with the flowers. The pews were marked with tiny bouquets of fern and flowers.

Miss Frances Rourke at the organ accompanied Mrs. George Rozelle, who sang "Oh Promise Me," and "At Dawning," also playing the wedding march. The ceremony was said by Rev. Bertram Smith, rector of the church.

The attendants were gowned in organdy frocks and garden hats in rainbow shades. Miss Enda Maie Waltrip wearing yellow; Miss Kathryn Williams, pink; Miss Nadine Woodlock, green; Mrs. R. V. Reynolds, matron of honor, peach; and Miss Lorine Harrell, maid of honor, blue. The flower girl, Barbara Ann Shotts, in a pink organdy frock, carried a white basket tied with pink tulle, filled with rose pedals.

The bride, who entered with Mr. Linington, was attired in an empire gown of white chiffon, with small tight-fitting cap of Swiss tulle. She wore long, white kid gloves and white slippers, and carried a shower bouquet of bridesroses and valley lilies.

The bridegroom, his best man, Mr. Bud Kincaid of Ozona, and the ushers, Messrs. Irvin Herbert, George, Merrill and Clifford Williams, were dressed in suits of white linen.

Mrs. Harrell was complimented with parties almost every day after the announcement of her engagement.—Fort Worth Star Telegram.

The bride who was a popular member of the grammar school faculty this past year, made many friends here who wish her well.

The groom is one of Sanderson's and Terrell county's most promising young men.

Following his graduation from the local high school he attended Schreiner Institute. The past two years he has been engaged in the ranching business, making quite a success.

The Times joins with the many friends of this popular young couple in extending congratulations and best wishes.

Enjoy Fishing Trip

J. E. Munroe, district passenger agent of the T. & N. O. with headquarters at El Paso, arrived on train 104 last Saturday. He and J. Neal of the car department of the T. & N. O. in this city, left that morning for the Banner ranch on the Pecos, where they spent that day and Sunday fishing. They report a wonderful trip and that plenty of fish were caught.

Mr. Munroe returned to El Paso on train 103 Monday morning.

To Hold Meeting At M. E. Church

H. L. COCHRAN

Rev. H. L. Cochran of Sherman, Texas, whose picture appears above, is returning from a revival campaign in the states of Virginia, West Virginia, N. Carolina and S. Carolina, to hold several meetings in Texas.

Several churches have united in securing the services of the Rev. Cochran to come to Texas.

Rev. Cochran was here four years ago in a week's meeting and many remember him and are rejoiced to hear of his return. Rev. Cochran is loved by all Christian people of the various denominational groups. He will preach at the First Methodist Church building from Sunday, May 31, through Sunday, June 14, at 8 o'clock each evening.

Every one is invited to attend these meetings, as the Rev. Cochran is a man of deep gospel convictions, preaching gospel fundamentals on which all Christians believe, and the non-essentials have no place in his ministry.

All ministers are earnestly solicited to come during these meetings and sit on the rostrum and join in hearty with earnest prayers and work that Rev. Cochran's coming richly bless all churches in Sanderson.

Old Time Reunion and Rodeo Fun

Two big days and nights of entertainment are promised every one who attend the ranchmen's reunion and rodeo that is to be held at the Charlie Chandler ranch on Independence, June 11th and 12th.

This is a picturesque place with shade trees, pure spring water and given up by hundreds to be one of Texas' most beautiful playgrounds.

Every old timer within a radius of 100 miles is invited and is expected to be there.

A big free barbecue, trimmings thrown in, will be given and good eats are assured every one. In fact, if a certain old time round up cook can be found that can "shore nuff kook," sour dough biscuits may be on the menu, provided he can cook enough to supply the demand.

All the cowboys from the forks of the creek will be there and some of the toughest horse flesh on earth or any where else will be on hand rarin' and ready to give the boys a ride for their money.

Liberal prizes will be offered and, in fact, it is hinted that the slowest roping will be given a bottle of lightning oil.

A big dance with music by a seven piece orchestra will be held each night.

Everything to entertain you will be found at the Charlie Chandler ranch and every one is expected to be there.

Judge Roy Bean Immortalized In Lloyd Biography

San Antonio, May 23—At last the colorful, pictureque and resourceful "Judge Roy Bean" is to come into his own. Twenty-eight years after the famous self-styled "Law West of the Pecos," Justice of the Peace, saloon keeper, wit, jester and grande alcaide of a far-flung though mythical jurisdiction, passed away at Langtry, he is the subject of a rather elaborate and entertaining biography by Everett Lloyd, San Antonio editor and writer.

The title of Lloyd's book is "Law West of the Pecos: The Story of Roy Bean," the first edition of which will be released to the book trade and libraries in June by the University Press, Inc., 419 Main Avenue, San Antonio.

The Bean biography contains nearly 200 pages, 20 of which are devoted to rare illustrations made from authentic photographs hitherto unpublished. So striking are the illustrations that they may be said to constitute one of the most valuable features of the book. However, the book itself has everything in its favor. Some idea of its completeness is afforded by the chapter contents which include, in addition to a prologue—which is a highly creditable piece of descriptive background—chapters on "The Trail of Roy Bean," "How Much of What is Written and Told of Roy Bean is True," "Lillie Langtry and Roy Bean," "Roy Bean and W. H. Dodd," "The Life and Times of Roy Bean," "Justice of the Peace—Law West of the Pecos," "The Death of Roy Bean," and "The Saga of Roy Bean."

During recent months, the Saturday Evening Post and several other magazines have carried articles dealing with Roy Bean. Interest in the man and his unique system of dispensing law and liquor alternately, is constantly increasing. For several years, Everett Lloyd has been collecting material and photographs for the Bean biography and he is the first to assemble in book form all the genuine, worthwhile Roy Bean stories, farcical and ludicrous decisions and rulings which have become a part of our humorous legal folklore, familiar to lawyers and laymen alike. The chapters dealing with the life and times of Bean accurately cover all the events of his career.

Although three different New York publishers agreed and wanted to bring out Everett Lloyd's book on Roy Bean, the author felt that as the book deals with a famous Texas character and was written by a Texan, it was fitting that it should be published by a Texas publishing corporation.

Almost simultaneously with the announcement of the release date of "Law West of the Pecos," tentative offers were made by a well known Hollywood picture producer to make the book into a talkie at the option of the author. A second and third edition of "Law West of the Pecos" has already been scheduled by the publishers, and arrangements are pending looking to its future publication as a syndicated serial.

Everett Lloyd was educated at Tulane University and the University of Texas. As a newspaper reporter, he worked on various papers throughout the country, and for five years was staff writer of the National Magazine, Boston. His home is in San Antonio, where he is the editor and publisher of Lloyd's Magazine.—Del Rio Evening News.

Preacher Romps on Unbalanced Educational Policy of Today

Scholastic Census Is Completed

Mrs. Theresa Dawson, who has been taking the scholastic census, has just recently completed her work. According to the report made to the ex-officio county superintendent, G. J. Henshaw, Sanderson and Terrell County has 648 children within the school age. This is the same number as was reported last year. However, several children were missed and with new ones coming in there will in all probability be an increase of about 50 or 60 pupils.

Sanderson and Terrell County has made much progress in the educational development of their students this past year. A new high school was erected and the most modern and up-to-date building in this section of the state. New school buildings were also erected in Dryden, at the Charley Chandler ranch and at the R. N. Allen ranch.

REV. H. L. COCHRAN WILL TRAIN CHOIR

Beginning Monday, June 1, the Rev. H. L. Cochran, one of the outstanding choir directors of the South, of Sherman, Tex., will for two weeks have a training period each day for those who care to regularly and systematically give their talent by church choir singing in Sanderson.

The divisions of the choir will be as follows: Mrs. Katherine McLymont in charge of altos; Mrs. W. W. Hodges of Greensville, S. C., in charge of sopranos; Rev. B. M. Stradley, bass; Mrs. A. P. Utterback, tenor. Miss Hazel Powell will direct the junior choir group.

These five divisions will all be under the general direction of the Rev. H. L. Cochran. Any person in Sanderson, or this section, who will give their talent to the Lord by regularly singing in some choir, or who attends some church regularly, is eligible to come for these expert instructions.

Absolutely no denominational lines will be drawn but it is open for people of any and all denominations that Sanderson talent may be better trained and more fully dedicated to the service of the Lord in some church in Sanderson.

Nothing but sacred music will be sung. All who care to take advantage of Rev. Cochran's teaching will please hand in their names without delay to either Mrs. A. P. Utterback, Mrs. Katherine McLymont, Mrs. M. E. Wilson, or Rev. B. M. Stradley.

Night Bridge Club

Mr. and Mrs. Al Creigh were hosts to the members of the Night Bridge Club at their home last Saturday night.

Mrs. C. M. Breeding made high score for the ladies while to Jim Nance went the men's high score prize.

A salad course was served to Messrs. and Mesdames Max Bogusch, Clyde Griffith, Lewis Lemons, Jim Nance, John Stovell, R. S. Wilkinson, C. M. Breeding and C. P. Peavey.

Mrs. Ira Harrison left last Saturday for San Antonio where she will meet her parents, Mr. and Mrs. W. E. Hughes of Abilene. Following several days visit there they will return here with Mrs. Harrison for a further visit.

Large Crowd Hears Local Pastor Deliver Good Sermon

Rev. B. M. Stradley, pastor of the First Methodist Church, preaching Sunday evening to a filled church on the subject, "Power to Live," in his remarks at the introduction of the sermon said what God wants is not human ability but a receptive attitude, and action for Him—better a snail crawling than a sleeping jack rabbit in a race. "I am not asking you what you have been, or what you expect to be, or what you expect to do in the Lord's name, I ask you the question of questions: What are you now? What are you doing for God now? You say I can't live a Christian life in this age of manifold complexities and demands. No you can't live a Christian life, no man has ever lived a Christian life. The question is did Christ live a Christian life, and if he did then He will give Devine power to live. Yes, thank God, to live!"

The preacher took off his gloves and gave a straight punch at the educational policy today. He said: "Oh Mr. Coach, you the hero of college heroes, drawing three times the salary of the consecrated man of God carrying the burdens of the school."

The order in the progress of Christianity is moral, and spiritual first, and physical last. In the wisdom of 20th Century folly we have turned topsy turvey and are today in colleges and high schools throughout our land woefully neglecting the necessities of fundamental education to live, and foolishly magnifying the secondary or the tributaries, the non essentials."

The preacher came to his climax with a picture of the old Godly home putting first things first. Then he made a direct application, giving the invitation for home dedication.

Two united with the church Sunday, and one family came forward for home dedication.

Rev. Stradley, pastor of the First Methodist Church, and Rev. H. L. Cochran of Sherman will be together beginning Sunday, May 31, in a two weeks gospel campaign at the First Methodist Church building, Sanderson.

Rev. Stradley, pastor of the First Methodist Church, and Rev. H. L. Cochran of Sherman will be together beginning Sunday, May 31, in a two weeks gospel campaign at the First Methodist Church building, Sanderson.

Wednesday Bridge Club

The members of the Wednesday Bridge Club and a few invited guests motored to Dryden last Wednesday where they were entertained by Mrs. F. B. Carter at the Dryden Hotel. The living room was decorated with bouquets of various cut flowers.

Following the playing of the usual tables of bridge the high score prize was awarded to Mrs. D. A. Pollard. Mrs. Herbert Buchanan won the second high score prize.

Refreshments of chicken salad on lettuce, saltines, fruit punch, ice cream and cake were served to the following: Mesdames Breeding, Pollard, Buchanan, James, Lowe, Jim Kerr, Creigh, Happle, Lemons, Savage, Bodkin, McKnight, Bogusch, Griffith, Nance and McKee.

C. A. Morland and Miss Kate Sharp attended the school of appliance meeting which was held in Pecos on Monday for employees of the Texas Louisiana Power Company.

Sleeveless Dresses for Hot Weather

(Prepared by the United States Department of Agriculture.)—WNU Service. Perhaps you have had a child try naughty Marjorie's solution of hot weather discomfort. Marjorie simply took her mother's big shears and cut the sleeves right out of one of her play dresses! Probably Marjorie was punished for such an act of apparent vandalism. But should she have been? Shouldn't her mother have realized that both Marjorie and the season were several jumps ahead of her preparations for warm weather? And that

skirt part is loose and full, so the young wearer can be as active as she likes. The fullness is kept away from the shoulders and face by flat, inverted, box pleats, set on a round, fitted yoke, which serves instead of a collar. The inverted pleats are held in place by faggoting, done in a contrasting thread. The same thread is used to outline the round yoke. It is best to cut the yoke single, binding the neck and front opening, and over-casting the yoke line so that all raw edges are covered. The neck line is rounded out for coolness and freedom, its edge finished by plain stitching. The armholes are bound, also the front opening. Two flat buttons fasten by means of firm crocheted loops. With this little dress the child wears four-button French panties of matching material.

A commercial pattern can be bought from which this little dress can be cut.

Sleeveless Print Summer Dress.

Marjorie probably had no idea that little girl's clothes are not left with raw edges, like doll clothes, or that she was destroying some useful cloth by cutting the sleeves?

If Marjorie's mother were a very wise woman, she might even have been able to explain the matter to her child, so that Marjorie would want to help repair the damage by hemming the cut-off parts, or by helping to hem lining on the armholes. There are ways to use almost any happening in a child's day to give her new ideas and a better understanding of the reasons behind the things that grow up on us.

The mother who believes in preparedness would, of course, have had on hand a supply of comfortable sleeveless wash dresses for her little girl. She would have made them of lightweight, attractive prints, or cool, smooth cotton broadcloth, or other suitable warm weather washable fabrics. With a lightweight coat or thin sweater worn during the cooler periods of the day and bare arms started on their spring sun baths when the temperature mounted, any little girl of five or so would have been spared the need of taking matters into her own hands.

For the mother who is taking summer clothes, here's a sleeveless dress recommended by the bureau of home economics of the United States Department of Agriculture. The body or

All Around the House

Some sweet pickle relish makes raw cabbage a more popular dish.

Plenty of vegetables and fruits help make all-over meals attractive and wholesome.

The meringue on pies will be fluffy and will hold its shape better if it is not beaten too dry and is baked in a moderate oven.

To save time in doing the home laundry fold towels after the last rinsing, run through the wringer smoothly and hang straight to dry; they will not require ironing.

In caring for floors, remember that the less water used on a wood floor the better. The spot on which something has been spilled should be cleaned as quickly as possible.

Some Good Things for the Table

By NELLIE MAXWELL

Search thy own heart; what pinches thee in conscience, in thine own breast.—J. G. Whittier.

I don't think much of a man who is not wiser today than he was yesterday.—Abraham Lincoln.

There is an old saying that "an apple a day keeps the doctor away," and an onion a day keeps everybody away. A good time to indulge in the odoriferous bulb is at a time when you will not annoy others. Onions are such wholesome vegetables that they should be served at least twice a week in some form during the entire season. An onion strip cannot be expected for a cough, and a positive of

chopped raw onions, mixed with eye flour with a bit of vinegar to moisten, makes a remedy for any lung trouble. This is not pleasant, but it is very effective.

Baked Stuffed Onions.—This makes a most satisfying main dish. Peel and cook the onions in boiling salted water for ten minutes. Take out the centers, drain well. Parboil a small green pepper and remove the seeds, peel 12 large mushrooms caps, cook in three tablespoonsful of butter with the onion scraped from the centers, finely chopped. Add one-half cupful of bread crumbs, salt pepper and a tablespoonful of butter; mix well. Fill six medium-sized onions and top each with a mushroom cap. Put into a baking dish with a little water, cover and bake in a moderate oven about one hour. Remove the cover the last 15 minutes and brown. They are delicious without mushrooms or with a bit of sausage.

Lemon Pudding.—Mix one cupful of flour, two egg yolks well beaten, one lemon, juice and rind, one teaspoonful of melted butter, and one cupful of milk. When well blended fold in the well-beaten whites of the eggs and bake in a shallow baking dish set into hot water. Bake three minutes. Serve hot or cold.

Steamed Spaghetti.—Cook three cloves of garlic in four tablespoonsful of olive oil, add one cupful of dried mushrooms that have been soaked in water. Add the water to the mushrooms with four tablespoonsful of butter. Now add two cupfuls of steamed veal, two cupfuls of tomatoes, a bay leaf, one-half teaspoonful of thyme,

salt and pepper to taste. Simmer for two hours, stirring occasionally. Cook one and one-half cupfuls of spaghetti in salted water until tender. Put a layer of the spaghetti in a buttered baking dish, add a layer of meat and gravy, continue until all the materials are used. Bake in a moderate oven for half an hour.

Walnut and Salmon Salad.—Scrape into slices one-fourth of a cupful of canned salmon. Take one-half cupful of walnut meats coarsely chopped. Shred three-fourths of a cupful of cabbage, let stand in cold water to crisp. Drain, mix with the salmon and nuts, add one cupful of cooked salad dressing and serve on lettuce and you have something good.

Cheese Balls.—Cream two cream cheeses with enough thin cream to make into balls. Roll each ball in colored or toasted coconut and arrange three or four balls in a nest of lettuce for each serving. Garnish with mayonnaise.

Minerals in Sugar. The bureau of plant industry says that in raw cane sugar there are traces of molasses in which are found certain salts and minerals. In refined sugar all the molasses, salts and minerals contained in it are removed.

No Doubt About It. "Our ancestors left us gold, silver and words of wisdom," said H. H. Ho, the sage of Chinatown. "There has never been doubt as to which of them have been most valued by each generation."—Washington Star.

Jackets Are Favorite Fashion

By CHERIE NICHOLAS

This little jacket went to a garden party, this little jacket went to a high tea, this little jacket went to a tennis tournament, this little jacket promenaded on the avenue, this little jacket went shopping and this little jacket stayed at home preferring to pose over a gorgeous printed pajama costume and so the hosts of cunning jackets which have invaded the style realm are telling a continuous story of romance as well as a practical tale as they enliven the summer program.

Either a costume has a jacket all its own, this season, or else there are several which by clever interchange make the wardrobe seem more extensive than it really is. When it comes to tuning a costume to occasion, the little hip-length jacket made in a thousand ways and of as

example, after a game of tennis the red and white coin-dotted shantung dress in the picture becomes a smart ensemble for the country club porch by adding a little flaring jacket of Lyons-type velvet in bright red to match the dots. The sleeve detail which involves intricate seaming and the unique tab-fastening at the front which forms a low effect, contribute in no little degree to the chic of this handsome jacket.

Notwithstanding its frivolous ways the little jacket is really a most economical proposition. With its advent every dress is made to have a two-fold if not a three-fold and "then some" mission. Hence it stands to reason that a collection of jackets in the summer wardrobe will pay big dividends in that one frock may be made to serve the purpose of many according to the way it is jacketed.

Some of these little jackets which fashion is highlighting so definitely are made of satin, other of taffeta or crepe and the medium which leads in favor is velvet, either the transparent weaves or Lyons type of a medium weight. Designers are having lots of fun choosing the right colored jacket to go with this or that frock. Black velvet, white velvet, white taffeta for these jackets come first and then follows as fascinating a list of tones and tints from which to choose as fancy ere can picture.

Asparagus Should Be Cooked Without Delay

(Prepared by the United States Department of Agriculture.)—WNU Service.

Asparagus toughness and loses flavor very rapidly if allowed to stand. It should therefore be cooked as soon as possible after it is cut. In cities, this is not easy, but it is a good plan to buy asparagus on the same day it is to be used, rather than a day or so beforehand, as is often done with other vegetables.

To prepare asparagus for cooking, trim off any tough ends, brush carefully, and scrape off the larger scales. Wash so as to remove all sand and particles of earth which may have lodged under the scales. Fresh, tender, home-grown asparagus does not need scraping.

Cook in slightly salted water, either whole, or cut up in inch lengths. Very young asparagus, cut up, may require only five to ten minutes' cooking; 20 or 25 minutes at most should be enough. Season with salt, pepper, butter, and a little cream, if you have it. Let stand in a warm place a few minutes, and then serve, either as it is or on toast. Hollandaise or white sauce may accompany the asparagus, or mayonnaise or french dressing.

Cooked asparagus may be added to soups, stews, or vegetable salad. It may also be used in making scalloped dishes, croquettes, fritters, vegetable loaf, or timbales. A very good combination is asparagus scalloped with spaghetti. Asparagus with new dried creamed potatoes is also excellent, or asparagus with peas. Smaller amounts of asparagus can be used for these dishes than when the asparagus constitutes the chief vegetable. An asparagus omelet is delicious for luncheon.

Guarding Royal Succession It has been the custom from very early times to have an official of the state present at the birth of a royal child that may eventually succeed to the throne, to prevent the possibility of any substitution.

Necessary to Success When men say to me, "I have no time to read," I reply, "Then you have no time to succeed," says John G. Lonsdale, president of the American Bankers' Association, in the American Magazine.

WHEN YOU CAN'T QUIT

Fatigue is the signal to rest. Obey it if you can. When you can't, keep cool and carry-on in comfort.

Bayer Aspirin was meant for just such times, because it insures your comfort. Freedom from pains that nag at nerves and wear you down. One tablet will block a threatening headache while it's still just a threat. Take two or three tablets when you have caught a cold, and that's usually the end of it.

Carry Bayer Aspirin when you travel. Have some at home. It will often "save the day."

From a grumbling tooth to those rheumatic pains, Bayer Aspirin is ready with its quick relief—and it always works. Neuralgia, Neuritis. Any nagging, needless pain.

Get the genuine tablets, stamped with the Bayer cross. Why experiment with imitations costing a few cents less? The saving is too little. There is too much at stake. But there is economy in the purchase of genuine Bayer Aspirin tablets in the large bottles.

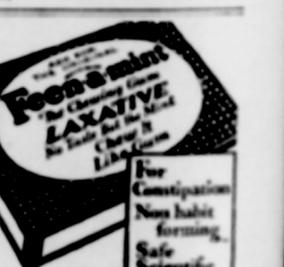

BEWARE KNIFE

Lancing of epiglottic abscesses is a dangerous condition. Get relief today from the only medicine that has been proved to be effective. Get it at once. Write to Dr. J. P. G. for a free medical advice.

"I HAVE GAINED ten pounds in weight and I always feel lively. But before I started taking St. Joseph's G.F.P. I was losing weight continually, my back ached and I was weak and run-down. I can never praise G.F.P. enough for the help it has given me."

St. Joseph's G.F.P. The Woman's Tonic

The new English tanker *Clyde* will have frequent occasion to carry a cargo of oil through the tropical regions and in order to prevent the possibility of any explosion of gas, owing to the heat, provision is made for keeping the deck cool by an artificial rainstorm. A row of fountain stretchers from bow to stern and when occasion demands there will be a constant stream of water from these which will cover the entire deck, which is exposed to the sun's heat.

For Constipation, Nervous habit, Safe Scientific

Publicity Agents "Are you in favor of women taking part in public affairs?" "It's all right if you really want the affairs made public."—The Sun.

Better purposeless moaning to drive off restlessness than drinking liquor for the same.

Woman's Dreaded Forties

PHYSICIANS call this period "Menopause." It is the dreaded Change of Life. Women should face the period with well-balanced health, or dangerous symptoms may appear. This is the time when delicacies in general health must be helped. Every woman approaching middle age should take Dr. Pierce's Favorite Prescription, that splendid herbal tonic.

STOP THAT SPRING COLD

Don't continue to sneeze and sniffle, to feel feverish and miserable because of your Spring cold. Stop it with St. Joseph's Lax-A-Na (double strength). This doctor's prescription contains both cold and cough relievers known to science together with quick-acting laxatives. And it's doubly effective because it is double strength. Overweight results or money back. At all drug stores.

Good Combination of Ice Flavors

Mold of Lemon Ice With Strawberry Ice Cream Center.

(Prepared by the United States Department of Agriculture.)—WNU Service. If you have a fancy-shaped ice cream mold such as a "melon" or a "hulk," you may wish to serve an extra festive dessert some day. Molds are often filled with two kinds of ice cream, or with a fruit ice and ice cream combined. A strawberry ice cream center in a shell of lemon ice makes a particularly good combination of flavors.

You might use either strawberry ice cream made by the first recipe, or strawberry meringue, made by the second, in your mold. Both of these recipes, and the one for the lemon ice, are furnished by the bureau of home economics of the United States Department of Agriculture. If you plan to have two flavors in the mold, it will be necessary to freeze each separately and then fill the mold and pack it in ice and salt for several hours before serving.

When both the ice and the strawberry filling are ready, line the mold with the lemon ice to a depth of about one inch, then pack the ice cream into the center as firmly as possible. After putting on the lid of the mold, seal the opening by drawing tightly over it a strip of cloth dipped in paraffin, so that the salty water cannot leak in.

Let it stand in the ice and salt mixture two hours or more.

Strawberry Ice Cream

1 qt. strawberries 1/2 tsp. salt 1/2 pt. double cream Lemon Juice if desired

Wash and cap the berries. Chop them and cover with the sugar and let stand in the refrigerator for two or three hours. Press the sweetened fruit through a colander. Add the cream which has been whipped, and the salt, and freeze. Use a freezing mixture of one part salt and four to six parts of ice, and turn the crank of the freezer slowly.

Strawberry Meringue

1 cup double cream, 1/16 tsp. salt whipped 1/2 cup sugar 1 cup crushed 1 egg white, well beaten

Combine the sugar and the crushed fruit and stir until the sugar is dissolved. Fold the sweetened fruit into the whipped cream. Fold in the beat egg whites to which the salt has been added. Pack and freeze.

Lemon Ice

1/2 cup lemon juice 1/2 cup sugar, or more if desired 1/2 cup water 1/2 tsp. salt

Prepare a strip of the water and sugar and boil for two minutes. When cold add the strained lemon juice and

Story for the Children at Bedtime

By MARY GRAHAM BONNER

The red-breasted grosbeak birds wear black and white, with handsome vests of rose color, and under their wings they have the same decorations. At least, this is the way Mr. Grosbeak dresses. The ladies do not look so handsome. They wear brown frocks, not unlike those of their cousins, the sparrows.

They have some fine relations, too. There are Mr. and Mrs. Blue Grosbeak, and again this Mr. Grosbeak is very beautiful.

He wears a deep blue suit and his shoulders are trimmed with chestnut-colored feathers.

Mr. Grosbeak is of grayish brown and grayish white, having the top side of the second color.

Then there are the evening grosbeak family. Mrs. Evening Grosbeak is paler than her husband but their coloring is not so different from each other as in the other members of the grosbeak family.

The evening grosbeaks are of brown and yellow with touches of very dark brown and white tipped wings.

And there are the pine grosbeak families. Mr. Pine Grosbeak is of a wonderful shade of red, while Mrs. Grosbeak is of yellow and gray.

The pine grosbeaks are fond of the winter and are not afraid of the cold. In fact they are not afraid of anything, and they trust people and let them come close to them.

They have low, warbling voices and whistle in a beautiful, clear fashion. The evening grosbeaks have very large bills and eat many seeds, berries and insects. But they can sing and whistle, too.

The pine grosbeak family sing, too, in a nice warbling fashion of their own.

It is a song not unlike the song Mr. Indigo Hooting sings, but Mr. Grosbeak's is a little stronger and louder—a little more of a song.

They probably like to sing songs that are somewhat the same as they are both blue birds, and so they have the same tastes in color and in music.

Oh, they are wonderful—all the members of the grosbeak family. They can sing. They eat insects. They have lovely feathers, and they are nice, nice birds.

Do you ever see some of them? (© 1911, Western Newspaper Union.)

The Grosbeak Family.

NETTA AND HER HUSBAND

By FANNIE HURST

IF SHE had ever thought about it at all in that light, Netta would probably have thought the problem of her marriage unique. As a matter of fact, it was such a universal problem that it is not at all unlikely that in the 45 identical houses, five rooms, sleeping porch, built-in washtrubs, that occupied the little suburban street where she had her home and being there was a startling repetition of her self-same problems. Netta had been married for six years. There were no children. Her husband was an architect, with offices in the city. He was junior partner in a growing but not large concern and was a nice, clean, average example of a little community of men who get the 8:10 train at the little station six mornings a week.

If he was a rather deadly average as to his politics, his religion, his creeds, his pastimes, his home life, neither he nor Netta realized it.

She fell into the ointment of the average married life of this average American couple, living the standardized routine of the hundreds of thousands of other couples, appeared rather suddenly in the sixth year of what might well be called a congenial marriage. Suddenly it came over Netta, whose interests in her pretty little home were normal ones, whose activities in her little suburban community were neighborly ones, whose prettiness had rather increased since her marriage than diminished—suddenly it came over this energetic little wife in her snug little home, in her snug little suburban development, that she was married to a husband.

It came over Netta one morning as she stood in front of her little dressing table, with her bare arms raised in the act of brushing her smooth culture of bobbed hair, that she had no lover. It was five and one-half years since the young architect, Frazier Maughn, to whom she was married, had so much as commented on any of the personal qualities that had seemed to capture him during the period of their engagement and the brief subsequent term of the honeymoon.

Almost immediately Frazier had committed the error that is typical of thousands of American men of his class. In the terms of his own father, who had once been rebuked by his own mother for a similar defection and had replied: "After you have run for a car, you sit down," Frazier had "sat down." He had begun the dangerous, the disconcerting mental habit of taking Netta for granted.

What was taking place between Netta and her husband was taking place in practically every one of those 45 identical houses on the standardized street of that standardized town.

The women used to talk about it at their bridge parties, at their afternoon gatherings, as they rode into town on their shopping expeditions. They talked about it wistfully and vicariously. The matter that took place among them was of starlings. Motion picture heroes who indulged their women in pleasant superlatives across the screen fascinated them. They were fond of saying among themselves that foreign men were so fascinating. It was wonderful to have your hand kissed. Fanny John kissing one's hand! He would explode all over with laughter. Ah, me, yes, foreign men did have that something—

Bitterly, there came welling up into the little heart of Netta one day the realization that Frazier's morning kiss was a peck; that Frazier's evening kiss was a peck that sometimes actually stung and bit her on the top of her nose. Demonstration between them had ceased. They no longer even walked the streets arm in arm.

Let Netta come downstairs for a dinner party and a bridge in the neighborhood, radiant in a new little frock she had assembled for herself, and not so much as a cheep out of Frazier unless in the key of "Say, you better go upstairs and put on a petticoat," or, "Rub some of that circus paint off your lips."

Never a tribute to her skill, her economy, her prettiness. Just rub-a-dub-dub of routine. Just lovelessness. Sometimes it seemed to Netta that her heart was dying of starvation. More and more bitterly she withdrew into herself, and yet, so far as Frazier was concerned, there was never a ripple on the equanimity of his consciousness.

Their life together had just become routine. There was no romance, no demonstrativeness. No unexpected show of interest and appreciation. Just one day after another of placid

acceptance of things as they were by Frazier. One day after another of increasing bitterness and resentment on Netta's part.

It was Frazier's calm acceptance of things that was so maddening to Netta.

Netta was there to see to it that his dinner was hot and well served, that it consisted of the things he liked, that they were cooked to his taste.

Crisp were his shirts. His clothes in orderly array. Spotless his abode. All things arranged as he liked them, with neatness, cleanliness and—only he was blind to it—charm. Netta was a good housekeeper, a good home maker, a woman who imposed her personality on her surroundings.

Because of Netta, Frazier started off to work each morning with cheerfulness and a feeling of well-being that a good breakfast gives. And Netta was there to be pecked good-by in the morning.

In other words, Netta was always there. Frazier took her as much for granted as he did his morning paper spread before his plate at breakfast, or his comfortable chair placed wherever the weather made it most comfortable—before a cheerful fire when the weather was raw, where it caught such breeze as there was when the evenings were warm.

Curious, but as the months stalked by there crept into the festering little soul of this woman a rebellion and even a sullen hatred of this sharer of her destiny. She used to turn her cheek for him to kiss in the morning as if it were so much leather. She used to stand within a radius of the embrace of his arms, glorifying in her anger at the stupidity of the man.

And still Frazier went his way, rejoicing, attending his baseball games, doing his eighteen holes on Saturday afternoon, shellacking the little two-seated sedan, trailing bushes up the garden trellis. If he noticed a change that had come over this woman of his choice, he noticed it without comment. He took it all apparently as the normal procedure of two people whose lives have become welded.

Slowly there took shape in Netta's mind the determination to estrange herself from this so-called sharer of her woes and joys; to withdraw into herself; to let the circumstances of their alienation reach a climax. She yearned for admiration, the kind of admiration to which her L. and L. levelness was entitled. She was not yet ready to be finished with the exhilaration of youth. Frazier was.

One Saturday afternoon, however, something happened that nipped her whole plan of procedure in the bud. A trivial incident and yet it was to open Netta's eyes. In the end, it was to lessen her terrific disappointment in Frazier's inability to keep life a much fairer thing than he had succeeded in doing. It revealed to Netta that she had built her judgment on superficial sands.

The estrangement which she had contemplated was never to happen—all because of this trifling incident.

On the Saturday afternoon in question, Frazier was crouching on the lowest step of the veranda, sprinkling the rose bed with a garden hose. Netta, sullen, henry-hearted, was sitting upstairs in a crisp organdy frock which she had just made for herself, reading a novel.

There came up to Frazier a door-to-door woman canvasser. From her window, Netta could observe the conversation. She knew the scheme. It was an old one. A city photographer would make a life-sized copy of a cabinet photograph for a nominal sum, provided you paid the canvasser a deposit of two dollars. Then you were to receive a twelve-dollar portrait upon an additional payment of three dollars.

"I am not interested," said Frazier. "Surely," said the canvasser, "there is some member of the family whom you would like to surprise with a portrait. How about your wife?"

"Nonsense," said Frazier.

"Upstairs, anger smoldered in Netta. "It won't cost you anything to let me see a picture of your wife," said the canvasser, a well-worn woman of intelligence.

"I don't know where one is," said Frazier.

"You don't know where there's a photograph of your own wife?"

"I hate them."

"Upstairs, in her pretty frock, hot, swollen tears formed in Netta's eyes. "Well," said the canvasser, "that's a confession. And you don't want a picture, then, I take it."

"No," said Frazier, "you're right, I don't."

"There never was a portrait could get her coloring or the kind of something that's caught up in her blue eyes or the woman in the world ever had but Netta. I should say her face isn't a portrait that could do her justice."

After the canvasser had gone, Netta, with bright pink spots on her beautiful cheeks, came downstairs, cool, crisp and radiant.

"Go upstairs," said her husband, who was sprinkling the lawn, "and put on a petticoat."

(By McElroy Newspaper Syndicate)

Asparagus Valuable Forward Truck Crop Well-Cared for Plantation Is Profitable for Years.

(Prepared by the United States Department of Agriculture.)—WNU Service. Within the last ten or twelve years asparagus has become perhaps the most important of all the perennial vegetable crops in this country and one of the most valuable early truck crops, the United States Department of Agriculture says.

Between 1918 and 1928 the asparagus acreage of the country increased from 30,500 acres to 94,900 acres. More than 95 per cent of this acreage is in the six states, California, New Jersey, South Carolina, Georgia, Illinois and Maryland. More than half of it is in California alone. About half the asparagus is grown for fresh consumption and half for canning. The Sacramento and San Joaquin river valleys of California grow almost all the asparagus for canning.

A well-cared for plantation may yield profitable crops for 15 to 20 years, but as a rule it is advantageous to renew the beds after eight or ten years.

Ross C. Thompson, associate horticulturist in the office of plant industry of the department, outlines conditions of soil, climate and culture necessary for successful asparagus growing in Farmers' Bulletin 1646-F, Asparagus Culture. This bulletin, which supersedes an earlier publication on asparagus, may be obtained free by applying to the office of information, United States Department of Agriculture, Washington, D. C.

Comparatively Easy to Raise Healthy Chicks

Lyman G. Neal, extension poultry specialist at Clemson college, South Carolina, points out that poultry and well-developed pullets can be raised only if proper attention is paid to the details of poultry culture.

In order to make it comparatively easy to raise healthy chicks, Neal sets down seven essentials for growing healthy chicks. The seven points in the chick raising program consist of the following practices:

1. Start with vigorous, disease-free chicks.
2. Hatch chicks at proper season.
3. Use clean range, separate from mature flock.
4. Use clean portable house with dependable brooder.
5. Use clean, well-balanced feed.
6. Separate cockerels and pullets at hatching age.
7. Brood each hatch separately.

Making Profit or Loss in Feeding of Cattle

Profit or loss per steer is frequently used as a standard of measurement in determining the profitability of cattle feeding. This method is satisfactory, and probably preferable on those farms where the major portion of the feed is purchased. The majority of farms on which cattle are fed feed home-grown corn and hay, and purchase protein supplements. It sometimes happens that the feeder is actually ahead financially when his actual cost shows a loss per steer after charging market prices for feeds, as compared with other years, when the cattle pay market prices for feeds and a reasonable profit.

Deficiency of Lime

Soils deficient in lime are unable, even with liberal fertilizer treatment, to produce hay of good quality, tests at the Pennsylvania state college revealed. Lime with manure produced 16 per cent more total clovers in the hay mixture and 29 per cent more red clover than the hay produced with manure alone.

Emergency Hay Crops

In considering emergency hay crops for this year it is well to remember that oats, wheat, soy beans, and other crops can be used. Using last year's meadows for hay again this year is another possibility, even if it does upset the rotation. In most cases a heavy yield can be expected if the field is fertilized early in the spring.

FARM NOTES

The best seasons to cut trees for fence posts are late fall, winter and early spring.

When fields are too stony or too poor to grow crops, they should be made to return profit by growing trees.

It is poor economy any time to cut and sell the smaller trees which will double their own value in a few years.

In order to get the most efficient and economical use of a piece of farm machinery, it is important to keep it working as many days in the year as possible.

Necro and internal parasites in pigs are best prevented by sanitary management, by which we mean keeping the organisms and eggs which propagate the two apart from the pigs.

Curculio overwinters in brush, stone walls, and the like. The removal of these hiding places will help control. You know that trees near woods are never as clean as others. A cleared area will help.

Machines That Are Almost Human

By E. C. TAYLOR

The "Thinking Machine"

PROBABLY the nearest approach to a machine that can think for itself is a device in the Massachusetts Institute of Technology in Boston, Mass. This machine has the power to rapidly and accurately solve problems in higher mathematics that are beyond the powers of the human brain as yet demonstrated.

Its technical name is the Michelson-Stratton harmonic analyzer and was invented to aid Prof. Charles A. Michelson of the University of Chicago in his studies of the speed and curves of light.

This wonderful machine won't have anything to do with problems in simple arithmetic or algebra. But it does on calculus, that highest branch of mathematics which is a short cut in solving problems by means of mathematical equations.

Any problem can be submitted to this machine, and the correct answer will be forthcoming in a few minutes. It would take human beings anywhere from a month to a year to get the answers to these same problems, provided the human being could get them at all, and the machine is absolutely accurate. It eliminates weeks and months of intensive thought. Think of the saving it effects in the wear and tear on the brains of scientists and engineers!

All engineers must know accurately beforehand that if certain work is done in a given way, it will produce the result they desire. This often necessitates a waste of time, labor and materials.

Scientists themselves call the Michelson-Stratton device a real "thinking machine." It takes almost any differential equation of the second order in calculus and by a combination of mechanical and electrical means perfects the computations. It does this beyond the power of the human brain so far demonstrated. And it does it in from five minutes to half a day, where it would take expert mathematicians from weeks to a year to attempt to get the answer.

The manspinner of the device is the common meter by which the flow of electric current into homes and factories is measured.

The problems to be solved are submitted to the machine as questions in the form of calculus equations. Each equation is written on a separate piece of paper, and one operator is at hand for each question asked.

These sheets of paper are fastened to a series of moving tables above which are mounted pointers which can be moved perpendicularly to the tables and which increase or diminish the flow of electricity through the meter.

The meter traces a curve to show the result as the tables move under the pointers, and it is a simple task for mathematicians to translate the curve into the mathematical equation that is the answer to their problem.

One of the first problems placed before this remarkable machine proved its value to scientists and engineers. An engineer had drawn complete plans for a new type of electric motor. He wanted to know all about its performance in advance. So he asked the Michelson-Stratton harmonic analyzer.

The machine was asked how fast the motor could go; the best speed at which it should be operated; how long it would last if operated at different speeds, and similar questions that naturally arose in the mind of the inventor.

The questions were placed in the machine, the tables moved, the curve was drawn, and the engineer had his answer. The machine replied to them all, and told him in a short time how his motor best should be built and best operated. Tests of the actual motor made during the next two years showed that the machine was absolutely accurate in its answers.

This is the only machine of its kind in the world. Other harmonic analyzers have been built and some are in use in other scientific institutions, but they cannot approach the Michelson-Stratton "thinking machine" in their ability to solve problems that task the human brain.

(By 1931, Western Newspaper Union.)

Where Clemenceau Died

While the question whether the apartment in the Rue Franklin, Paris, where Georges Clemenceau died is to have official status as a national museum remains unsettled, it is actually being maintained as an unofficial museum by "The Tiger's" faithful old valet, Albert. Hardly a day passes that a number of persons apply to Albert for permission to see the study where his master worked on his memoirs almost up to the moment of his death. Albert has jealously seen to it that everything is just as it was the day M. Clemenceau died. Even the desk calendar remains untouched, marking the date of November 24, 1929. The old-fashioned quill pen M. Clemenceau preferred reposes under the desk blotter. One of his reference books is open at the page he last consulted.

Stamping Out Disease

The public health service says that the system of control of domestic ports and of medical inspection at foreign ports was so good last year that no instance of the importation of a quarantinable disease occurred. A few cases of contagious diseases occurred upon shipboard, but were isolated at quarantine hospitals.

Valuable Protein Is Found in Skimmilk High-Grade Cottage Cheese Offers Outlet for Product.

(Prepared by the United States Department of Agriculture.)—WNU Service. Profitable utilization of milk by-products is now more important than usual to the farmer and the dairy industry, and the bureau of dairy industry, United States Department of Agriculture, is trying to find profitable uses for skimmilk, says O. E. Reed, chief of the bureau.

"In one year's volume of dairy by-products, which includes skimmilk, buttermilk, and whey—skimmilk being by far the most important—there is about 600,000,000 pounds of valuable food protein, a large part of which is not being utilized to the best possible advantage," says Mr. Reed. "Cottage cheese, which is made from skimmilk and which is largely protein, is, when properly made and merchandized, one of the most profitable outlets available to the dairy products plant for utilizing the skimmilk. In the past many plants have lacked a standard method for making a uniform, high-grade cottage cheese. The bureau of dairy industry has, by experimental work both in the laboratory and on a commercial scale, demonstrated a method which has consistently produced excellent results.

"This method produces what is called the low-acid rennet-type of cottage cheese. When this type is made properly it has a rich, creamy appearance, a low acidity, good keeping qualities, and distinctive curd particles, and is a product attractive to the consumer.

The bureau is issuing a mimeographed circular which gives detailed information on how to make this type of cottage cheese. The title of this circular is 'The Manufacture of Low-acid Rennet-type Cottage Cheese.' Copies may be obtained free by writing the bureau of dairy industry, Department of Agriculture, Washington, D. C."

Cow's Health Indicated by Coloring of Her Eye

When buying cows or heifers—or any kind of animal for that matter—it is well to look carefully at the eyes. Many a man has gone painstakingly over an animal's side and bought when a single look at the eyes would have warned him of trouble to come. The normal eye is full and bright. The secretion of fluids about the eye should be normal. If an eye is swimming in water, the animal may be going down with a cold and, when chronic, may be indicative of tuberculosis. Look out for "pink eye," a very contagious disease that soon spreads to all members of the herd into which the infected animal may be introduced. The affected eye is pearly gray in color. A dull eye may indicate that the cow is anemic or temporarily off feed. This is just another point to remember when buying new members for the herd.

Allow Ample Space for Moisture Among Trees

In planting currants and gooseberries, it is quite common to find these set over against the fence or grass growing border of the garden. In some few instances this plan is all right; but where moisture is scarce these plants should be set in rows where they can be cultivated on both sides, having a space of nearly 10 feet between any plant and other crops. If planting apple trees at the same time—and setting these rows 30 feet or more apart, as they should be to do the best in later years—one row of the small fruits may be planted midway between each two rows of apple trees. These will have passed their best years by the time that the apple trees have reached a size that requires all the space between for drawing on for moisture, so they may be dug out.

FARM NOTES

Single stalls protect the cows and help make them comfortable.

A honey bee must visit 50,000 clover blossoms to make a pound of honey.

If poison ivy is troublesome, start an early campaign against it with calcium chloride.

Pasturing the farm woodlot is a poor practice. Trees and live stock do not mix. The trees are likely to suffer more than the stock.

Damping off of vegetable seedlings can be controlled by treating seed or soil with chemical solutions. Ask your county agent about this.

No planting is ever quite complete—that is what makes gardening such an alluring adventure. What modern touches will you add to your grounds this year?

Fattening cattle which get good legume hay—clover, alfalfa or soy bean—and corn will make excellent gains for three or four months without the addition of such feeds as cottonseed meal or linseed oil meal.

In general, shallow cultivation of corn is best. It does less damage to the corn roots which grow close to the surface. Deep cultivation may cut and tear out the roots, stunting the growth of the plants.

Dodge Old Age

HAVE weariness, "nerves," and sleeplessness made you old in the prime of life? You can recover youth—and hold it—in spite of the passing years. All you need to do is to help Nature keep up your vitality. Perhaps your system lacks certain valuable elements, which Fellows' Syrup will restore. Soon you can eat, work, play, and sleep—as heartily as when you were twenty-one.

After the first few doses you become more cheerful and energetic. Your stamina increases. Ask your druggist for the genuine Fellows' Syrup, which physicians have been prescribing for years.

Chance for Pa and Ma. Mother—You know, Geoffrey, Norma is nearly seventeen years old, so today I had a frank discussion with her about the facts of life. Father—Ah! Did you learn anything new?—Everybody's Weekly.

Kill Rats Without Poison

A New Extremator that Won't Kill Livestock, Poultry, Dogs, Cats, or even Baby Chicks. K-R-O can be used about the home, barn or poultry yard with absolute safety as it contains no deadly poison. K-R-O is made of Squill, as recommended by U.S. Dept. of Agriculture, oven-dried under the Comstock process which insures maximum strength. Used by County Agents in most rat-killing campaigns. Money-Back Guarantee. Inset upon K-R-O the original Squill stemmer. All Druggists, 25c. \$1.25. Direct from dealer cannot supply you. K-R-O Co., Springfield, Ohio.

K-R-O KILLS-RATS-ONLY

HABITS CHANGE

Buying habits continually change. The public is anxious to get their money's worth for every dime they spend, and when they see an unusual product at an unusually attractive price they recognize the many advantages it offers. This keen sense of values applies to practically everything people need, clothing, food, furniture, and even aspirin. That is one reason why more than nine million boxes of St. Joseph's Aspirin have been sold in a single year, why thousands of people every day walk into drug stores everywhere, put down their dime, and ask for St. Joseph's Genuine Pure Aspirin. St. Joseph's Aspirin is both genuine and pure and it meets every government standard. No wonder people are realizing that it is neither sensible nor necessary to pay more than 10c for 12 tablets of "St. Joseph's" genuine pure aspirin.

COSTIVENESS

CONFINING indoor work—skilled work with the hands that does not include plenty of physical exercise for the body, often results in the bad feeling and unpleasant signs of faulty bowel movement. W. S. Conant, a saddler and harness maker living in Somerset, Ky., says: "I had to take something for costiveness, as I would just get so tired, or have a dull feeling. After I heard of Black-Draught and began taking it, I avoided this trouble. I take it in small doses and it is most satisfactory." See

BLACK-DRAUGHT

Brief Fashion Notes of Interest to Women

"White with" is the formula for smart color combinations. Necklines are much higher, this is also true of those on evening dresses. Yellow is forging ahead not only as an important evening color but also for sport. Organza bridal gowns are being ordered, and an interesting sidelight on this fashion is that there are organdy mitts to complete the costume.

Multi-strand necklaces are very much worn. Many redingotes are cut with a bolero at the front only. Among the new hats launched by Agnes are those with a chignon effect none in straw braid. Circular lines disguise the formal pajama silhouette but nevertheless the formal pajama is being discovered at many smart parties.

**BASEBALL BOYS GIVE
 BIBLES AND TESTAMENTS
 TO THOSE IN JAIL**

The Metho-Terian baseball team, composed of boys attending regularly and working in the church, gave Bibles and Testaments to those in the Terrell County jail last Monday.

The Metho-Terian baseball boys will hold a meeting in the county jail once a week, and will do this in every town where they visit this summer.

These boys will have their weekly scripture lesson each week beginning next week, taught by the Rev. B. M. Stradley.

TERRELL COUNTY OIL NEWS

By J. Calvin Stansell

The Trans-Pecos Development's, Keck Pecos Trust, test No. 1, situated on Section 6, cert. 100, in Cedar Springs Block is now drilling in full blast. The exact depth not obtainable, as all information is being kept strictly private due to the drill penetrating a very favorable formation.

There are five other tests for oil and gas also drilling in the county, and a few other locations being made.

Several new geologists are now doing reconnaissance work in the county for major and independent companies who have not heretofore purchased oil and gas leases in this district. These men are using the stadia hand level, Locke Level, Brunton pocket transit, and compass, note book, pencils and scales, etc. One of the geologists remarked that a certain locality in Block D-10, T. C. Ry. Co. survey about eleven miles south of the town of Sanderson, Texas, was situated on a wonderful structure somewhat similar to the Cushing Field in the State of Oklahoma.

A recent find on the E. W. Hargrave ranch situated in this county about twenty-five miles northeast of this city, was discovered by a boy yet in his teens was quite a large deposit of Resins commonly called by most prospectors resin-jack. A paleontologist who was traveling in a westerly direction stopped at the office of J. Calvin Stansell in the Princess Bldg. and inspected the sample and stated that the same was a fine sample of Resins and contained organic substances mostly of vegetable origin, which includes many minerals which are the products of extinct vegetation. A few weeks ago the same boy found a large deposit of highly powered limestone on the E. W. Hargrave ranch which a local geologist thought was Pumice, and samples of same were submitted to Dr. E. H. Sellards, of the Bureau of Economic Geology who made a careful examination and classified same as being Calcium Carbonate and further stated that same was very useful on acid oils. Since that time information from other sources divulges the fact that same has many other useful usages. Several weeks ago a geologist brought in a nice large specimen coming off of an out-crop on the E. W. Hargrave ranch, which seems to be almost a solid mass of petrified oyster and mussel shells, and other kinds of marine mollusks.

A communication has recently been received from a very important man in Long Beach, Cal. who is in the oil industry, stating he contemplates putting his geologist and land man in the field in this county with the view of purchasing quite a number of oil and gas leases. Other communications from men connected with the industry at Kilgore, Tyler, and Nacogdoches, Texas, indicate that they are very much interested in the future possibilities in the western portion of Val Verde County, and the entire county of Terrell, and that portion of Brewster County south of the railroad.

It is reported that Mrs. Jessie McPhee of the city of Los Angeles, Cal., is endeavoring to purchase an option on an oil and gas lease of the E. M. Gatlin ranch situated in Blocks D-10 and D-9, T. C. Ry. Co. surveys in this county, with the view of sinking several test wells for oil and gas.

A geologist by the name of Wilson has been contemplating on leasing the Joe Kerr ranch situated in Block A-2, G. H. & S. A. Ry. Co. survey with the view of sinking at least two test wells for oil and gas and other minerals, and is very favorably impressed with the fault displacements on section 56, in said block.

The Unchanged and Unchangeable Law of God

Jehovah is the God of order and law. The heaven and the earth are proof enough of this proposition. His natural law changes not. As proof of this next proposition I submit Gen. 1: 25, "And God made the beast of the earth after his kind, and the cattle after their kind, and every thing that creepeth upon the earth after his kind: and God saw that it was good."

The same is true with reference to things that grew out of the earth. Hear Him: "And God said let the earth bring forth grass, the herb yielding seed, and the fruit tree yielding fruit after his kind, whose seed is in itself, upon the earth: and it was so. And the earth brought forth grass, and the herb yielding seed after his kind, and the tree yielding fruit, whose seed was in itself, after his kind: and God saw that it was good." Gen. 1: 11, 12. This shows that the law of God with reference to nature is unchanged and unchangeable. There is one human family covering the race of man. There is one God. He gave law and promises to Adam, law and promises to Abraham, law and promises to Moses and He has given law and promises to all peoples of this last dispensation of time.

(To be continued)
R. E. GRIFFITH,

THE METHODIST CHURCH

"A hearty welcome awaits you in the name of the Lord."

10 a. m.: Sunday school—A class for every age, and a trained teacher for every class. "A whole family Sunday school."

11 a. m.: A worship program in which the entire Sunday school will take part.

7 p. m.: The Junior Epworth League meets in the parsonage reception hall.

7 p. m.: The Hi Epworth League meets in the church auditorium.

8 p. m.: Rev. H. L. Cochran, of Sherman, Texas, will preach the first sermon of our two weeks revival. The men's quartet, W. A. Powell, Carlton White, John Nichols and Lowry Stradley, will sing the male quartet number, "Just Outside the Door."

Several special requests have come to Mr. White, leader of the quartet, to render this number. Congregational singing led by Rev. H. L. Cochran.

Come with a prayer on your heart that our Father use us in bringing many souls to Him to give their lives to His service in the denomination of their own choice during these revival meetings.

B. M. Stradley, Pastor

W. M. S. Meet

The Womens Missionary Society met Tuesday afternoon with Mrs. L. A. Lowe. There was twelve members present.

Mrs. H. C. Goldwire was the leader for the interesting program that was given. Mrs. Utterback gave an interesting talk on Russia, and Mrs. Stradley on Poland.

After the program a delicious lunch was served to Mesdames Goldwire, Garrison, Stradley, Utterback, Allen, Lattimore, Grigoby, Freeman, Lowe, White, Watts, and Miss Kate Frazier.

IN THE MATTER OF COUNTY FINANCES IN THE HANDS

of Frank K. Harrell, Treasurer of Terrell County, Texas, Commissioners' Court, Terrell County, Texas, in regular session, May Term, 1931.

We, the undersigned, as County Commissioners within and for said Terrell County, and the Hon. G. J. Henshaw, County Judge of said Terrell County, constituting the entire Commissioners' Court of said County, and each one of us, do hereby certify that on this, the 12th day of May, A. D. 1931, at a regular term of our said Court, we have compared and examined the report of Frank K. Harrell, Treasurer of said County, for the period beginning on the 1st day of February, A. D. 1931, and ending on the 31st day of March, A. D. 1931, and finding the same correct have caused an order to be entered upon the minutes of the Commissioners' Court of said County, stating the approval of said Treasurer's Report by our said Court, which said order requires separately the amount received and paid out of each fund by said County Treasurer since his last report to this Court, and for and during the time covered by his present report, and the balance of each fund remaining in said Treasurer's hands on the said 31st day of March, A. D. 1931, and have ordered the proper credits to be made in the accounts of the said County Treasurer, in accordance with said order as required by Articles 1448-1449-1450 and 1451, Chapter 1, Title 29, of the Revised Statutes of Texas.

And we, each of us, further certify that we have actually and fully inspected and counted all the actual cash and assets in hands of the said Treasurer belonging to Terrell County at the close of the examination of said Treasurer's Report, on this the 31st day of March, A. D. 1931, and find the same to be as follows, to-wit:

JURY FUND	Dr.	Cr.
Balance on hand as shown by Treasurer's Report on the 31st day of January, 1931	\$ 2,600.57	\$
To amount received since said date	81.56

Witness our hands, officially, this 12th day of May, A. D. 1931.
G. J. HENSHAW, County Judge.
W. E. STIRMAN, Commissioner Precinct No. 1.
EUGENE PEPLER, Commissioner Precinct No. 2.
J. C. MITCHELL, Commissioner Precinct No. 3.
R. E. FRED, Commissioner Precinct No. 4.

Sworn to and subscribed before me, by G. J. Henshaw, County Judge, and W. E. Stirman and Eugene Pepler and J. C. Mitchell and R. E. Fred, the County Commissioners of said Terrell County, each respectively, on this, the 12th day of May, A. D. 1931.
(Seal) F. L. BURNSIDE, Clerk County Court, Terrell County, Texas.

Kelly Tires

Are good tires—in fact we believe they are the best tires money can buy. They will give you thousands of miles of trouble-free service. Tire prices are cheaper than they have been in years. This is an opportune time to re-tire all the way round. Look at these prices:—

KELLY LOTTA MILES

4.50-21 \$5.65
5.00-19 \$6.95
5.25-19 \$8.15

The only thing cheap about Kelly Lotta Miles is the price. The construction is that of a high grade tire. They are built to give you miles and months of the kind of service you have a right to expect. Let us re-tire your car. We will mount them free.

THE KERR MERC. COMPANY
SANDERSON, TEXAS

SERVICES AT DRYDEN SUNDAY, MAY 31st

Dryden Community Church will move into their new church next Sunday at 3 p. m. The old school has been remodeled, fully equipped on the interior for seating 75 to 100 people, and the Dryden people will turn out in full force Sunday afternoon to the initial meeting in the new building.

Dryden Community Church is fully organized, having a church council composed of three denominations, are paying the pastor a regular monthly salary, and are holding regular services every Sunday.

Sunday, May 31, at 3 p. m., the Rev. H. L. Cochran will preach, and the Sanderson male quartet will render the "Old Harbor Bells" male quartet number, directed by W. A. Powell. Mrs. A. P. Buchanan will direct the singing at this service.

We earnestly solicit all people of the Dryden community to attend now, as heretofore we have had inadequate seating capacity, but now in the new building we can take care of 100 people.

We rejoice that all denominations of Dryden are supporting the Dryden Community Church with their presence, their talents, and their money.

—Dryden Church Council.

Mrs. O. C. Traweck and son, Brady, left last Saturday for Nacogdoches, Texas, where they will visit with her mother, Mrs. H. B. Ballard and other relatives.

Miss Eva Clare Stafford, who has been teaching at Whitesboro, came in last Sunday to spend the summer with her sister, Mrs. A. P. Utterback.

Honoring the "Maid of Grand Pre"

HISTORIC EVANGELINE OAK ON BAYOU TACHE

By ELMO SCOTT WATSON

Other day several thousand people gathered in the little town of St. Martinville, La., to participate in a ceremony which rolled back the pages of history to events that took place more than 175 years ago. The ceremony was the unveiling of a statue and when it stood revealed there was recalled once more a great tragedy in American colonial history, and one of the tenderest love stories in American literature, the story of the quest of Evangeline for her lover, Gabriel, immortalized in a poem by Henry Wadsworth Longfellow. For the statue was a life-size image of the famous "Maid of Grand Pre" and most of those who had gathered there to pay her honor were her own people—Louisiana descendants of the eighteenth century Acadians and a delegation of several hundred Acadians from Montreal, Grand Pre, Montreal and other Canadian cities and towns who make a pilgrimage to this shrine for this occasion and who were also receiving a visit made by the Louisiana Acadians to Canada last year.

Errecting the statue over the spot near the left wing of the old St. Martinville Catholic church in St. Martinville where the real Evangeline lies buried is one of the steps in the project of establishing a national reservation there to be known as the Longfellow-Evangeline National Memorial park, a public recreation center which will perpetuate the memory of the American poet and the Acadian girl, in particular, and the Acadians, their sufferings, their romance and their faith, in general.

The name of the real "Evangeline" was Emmerline Labiche, the faithless "Gabriel" was Louis Arsenault, and their life story is a part of the tragic tale of the simple folk of Acadia who were deported by British soldiers from their homes away back in 1755. The Acadians were French colonists, who had settled in what is now Nova Scotia in 1697, and who lived a happy, contented existence in their homes in the New world until caught in the confusion of world politics, stirred up by the contest between England and France to decide which nation was to dominate the North American continent. In the series of wars between the two countries which began in 1750 Acadia was a pawn on the international chessboard, now held by the French and now by the British.

At first the Acadians themselves, they were in the main neutral. In fact they were often referred to in the official papers of the time as the "Neutral French." While the sympathies of most of them go doubt leaned toward their own countrymen and some of them supported the French cause, for the most part they wished to be left alone in their peaceful pursuits as farmers and fishermen.

In that year the British, who then held Acadia, decided that the Acadians were "an enemy encamped in the heart of the province" and determined to get rid of them. Accordingly this was done by methods which seem to have been unnecessarily harsh.

The principal responsibility for this rests upon the lieutenant governor of Nova Scotia, Charles Lawrence, who was acting governor until the lords of trade in London should pick a successor to Gov. Peregrine Hopson, who had resigned.

By harvest time in 1755 the expulsion of the Acadians began when Colonel Monckton, acting under Lawrence's instructions, gathered in 400 of the inhabitants of Chignecto. Colonel John Winslow will live in history as the officer sent to "the little village of Grand Pre, on the shore of the Basin of Minas."

Winslow arrived at Grand Pre on August 19, September 2 Colonel Winslow issued a proclamation informing the people that the lieutenant-governor had a communication to impart to them. The men were ordered, therefore, to appear in the church at Grand Pre at 3 o'clock in the afternoon of Friday, September 5.

On that fateful Friday a strange sight greeted the 418 men as they filed slowly into the church that had been familiar to them from their youth. Stern-faced soldiers with gleaming bayonets and red coats guarded the door and in the middle of the church a table had been placed and around it other armed soldiers were drawn up.

THE NEW EVANGELINE EMMERLINE LABICHE

nor had a communication to impart to them. The men were ordered, therefore, to appear in the church at Grand Pre at 3 o'clock in the afternoon of Friday, September 5.

On that fateful Friday a strange sight greeted the 418 men as they filed slowly into the church that had been familiar to them from their youth. Stern-faced soldiers with gleaming bayonets and red coats guarded the door and in the middle of the church a table had been placed and around it other armed soldiers were drawn up.

As Colonel Winslow entered, attended by his staff, a deep hush fell upon the people. Without any preliminaries, he proceeded to deliver his address in English. Immediately afterward it was interpreted to the assemblage in French.

With the pronouncement of the terrible words, "That your lands and tenements, cattle of all kinds and live stock of all sorts are forfeited to the crown with all your other effects, saving your money and household goods, and that you yourselves are to be removed from this, his majesty's province," a murmur of anguish escaped the gasping Acadians.

Until grieved by the stern command of an officer, the bewildered inhabitants sat mute and staring, although unable to comprehend the significance of the fate they were assigned to. Recovering from the shock of Winslow's words, the Acadians' first thoughts were of their families, with whom they had no means of communication and who would not understand the reason for their detention.

After a lengthy conference Colonel Winslow permitted the prisoners to choose 20 of their number to break the news to the families and to bring the news to the prisoners. They were in fact to be held responsible for the behavior and safe return of the 20.

An effort was made to keep families intact. But a lack of transport; the natural confusion and terror that necessarily followed; Winslow's fierce determination; the Acadians' fear that his force, greatly outnumbered by the British, might be overpowered, and the barrier of language all contributed to the separations that made the sufferings of the exiled Acadians so tragic.

Three ships, the first to sail, left the Basin of Minas October 15, bound for Maryland, Virginia and Pennsylvania. The last ship to leave Acadia sailed southward December 20. To prevent any stragglers that occupied the forests from finding a place of refuge, squads of soldiers attended to the work of burning every house, barn or building that would in any way furnish shelter.

In all from Grand Pre and other places more than 6,000 Acadians were deported. They were scattered to the English colonies from Maine to Georgia and in both France and England. Many died; many, helpless in new surroundings, sank into deplorable poverty. Some reached people of their own blood in the French colony of Louisiana and Canada.

Among those who came to Louisiana was young Louis Arsenault who had become separated from his sweetheart, Emmerline Labiche, and who settled on Bayou Tache, a stream which winds in and out like a snake,

before its name, which is the Indian name for snake. Here, too, ten years later came Emmerline Labiche, who had been mourning the loss of her lover.

At last Emmerline found him, and tradition says that the meeting took place beneath the historic Evangeline oak on the Bayou Tache, where she learned that her faithless lover had married another.

There is some variation in the accounts of how Longfellow came to write the story of Evangeline. According to one story it was Nathaniel Hawthorne who first gave the poet the hint of the romance which he wrote into his poem. Under the date of October 24, 1838, we find the following memorandum in Hawthorne's American Note-Books: "H. L. C.—heard from a French Canadian a story of a young couple in Acadia. On their marriage day all men of the province were summoned to assemble in the church to hear a proclamation. When they assembled they were seized and shipped off to be distributed through New England, among them the bridegroom. His bride set off in search of him, wandered about New England all her lifetime, and at last when she was old, she found her bridegroom on his deathbed. The shock was so great that it killed her likewise."

H. L. C. was Horace Lorraine Condit, then a neighbor of Hawthorne at Salem. He had been rector of St. Stephen's Protestant Episcopal church in South Boston. The Hawthorne was possibly in error in stating that Condit obtained the story directly from a French Canadian.

At any rate some time later Hawthorne took Condit to dine with Longfellow at Cambridge. During the dinner the story was told Longfellow that he had been trying in vain to get Hawthorne to write a story based on an incident told him by Mrs. George M. Halliburton, a former parishioner, who had formerly lived in Nova Scotia. Condit then related the story briefly. Longfellow said to Hawthorne: "If you really do not want this incident, let me have it for a poem." The friend willingly consented, and "Evangeline" was the result.

The other account—and this is the one which you will hear in the Acadia country of Louisiana—is that Longfellow, while he was an instructor at Harvard, was told the story by a handsome young Acadian, then a student at Harvard, Edward Simon, later a judge in Louisiana, who had learned it from his friend, Judge Felix Voorhies. Judge Voorhies had been told the story by his grandmother, Madame Anne Bastarache, who brought Evangeline to the Teche country. Madame Bastarache died in 1820 at the age of 103.

It was Madame Bastarache who told how Emmerline Labiche sprang forward with a glad cry when she met her former lover and of how the faithless lover told her that he had married another and was happy.

On the banks of the ancient Duke DeLafite Blanc Louis Arsenault settled with his bride and there many of his descendants live today. The heartbroken girl, Madame Bastarache told her grandson, lost her reason and, still death came to her, she wandered about the banks of the Teche, gathering the water hyacinths and weaving bride's wreaths of them.

Improved Uniform International Sunday School Lesson

(By REV. F. B. FITZWATER, D. D., Member of Faculty, Moody Bible Institute of Chicago, (E. 1911, Western Newspaper Union.)

Lesson for May 31 JESUS IN GETHSEMANE

GOLDEN TEXT—Saying, Father, if thou be willing, remove this cup from me; nevertheless not my will, but thine, be done.

LESSON TEXT—Luke 22:39-54.

PRIMARY TOPIC—Jesus in the Garden.

JUNIOR TOPIC—Jesus in the Garden.

INTERMEDIATE AND SENIOR TOPIC—Obeying God at Any Cost.

YOUNG PEOPLE AND ADULT TOPIC—The Meaning of Gethsemane.

I. Jesus at the Mount of Olives. (v. 39).

He went from the upper room under cover of the night to the Garden of Gethsemane, a favorite resort on the slope of the Mount of Olives, a short distance east of Jerusalem (Matt. 26:30). It is a place where the oil was crushed out of the olives. Gethsemane means "oil press." Olive oil was precious, being used both for food and lighting. The bruising and crushing of Christ in this Garden has yielded the largest blessings to the world.

II. His Companions (vv. 39, 40).

Peter, James and John, who had been with him on the Mount of Transfiguration, were permitted to go with him into the deep shadows of the Garden (Matt. 26:37). He took those who were best able to apprehend the meaning of the tragic hour to be his sympathizing companions. This was needed to prepare them as his witnesses. Knowing the peculiar trial through which they would soon pass when the Shepherd should be smitten, he needed to prepare them for it. They needed to taste the bitter cup of which he drank and of which they, too, later should drink.

III. Jesus Praying (vv. 41-43).

1. Withdrawal from the disciples (v. 41). Even those members of the inner circle could not now go with him. He tore himself away from them, for he must be alone in this darkest hour. He knelt down and prayed.

2. What he said (v. 42). "If thou be willing, remove this cup from me." The cup did not mean primarily the physical sufferings of the cross, though they were exceeding great. He did not now desire to escape from the cross and thus to stop short of his redemptive work, for this was the supreme purpose of his coming into the world (John 1:14). He was so completely identified with a sinning race that the judgment of a holy God which rightfully would have fallen upon it was about to strike him—the Father's face was actually turned from him. The cup, therefore, meant his death as the bearer of sin. He came to Gethsemane with the full knowledge of what it meant, and earnestly brought his human will into accord with the divine will. He bowed in submission to the Father's will. So great was his agony that he sweated, as it were, great drops of blood. In this crucial hour an angel from heaven strengthened him. He won the victory in submission to his Father's will, and from henceforth went with unflinching steps to the cross.

IV. The Disciples Sleeping (vv. 45, 46).

They had boasted of their fidelity (Matt. 26:35), but could not watch with him for an hour. He had issued a word of warning to them (Luke 22:34), but they were so benumbed with sorrow that they failed to keep awake. He gently rebuked them and commanded that they should arise and pray lest they enter into temptation.

V. Jesus Betrayed (vv. 47, 48).

1. The betrayer (v. 47). It was Judas, one of the twelve. He had enjoyed the most intimate relations with the Lord; eating with him, listening to his teaching, witnessing his marvelous miracles, and enjoying his confidence. These privileges intensify the horror of the deed. He even guided the mob to arrest Jesus.

2. The sign of betrayal (v. 47). It was a kiss, the token of the most tender affection and friendship.

3. Jesus' tender words to him (v. 48). These words to the infamous disciple reveal the infinite tenderness of the Lord's heart. Many professing disciples today are proving their disloyalty to Jesus and even are betraying him. All who bear the name of Christ, and especially ministers and teachers, who deny the virgin birth, deity, and vicarious atonement of Jesus Christ, are following in the footsteps of Judas.

VI. Jesus Arrested (v. 54).

The multitude led by Judas invaded the sacred precincts of the Garden and arrested Jesus and brought him before the High Priest. Peter followed him afar off. Peter's downfall may be traced to his self-confidence.

Faith a Necessity
There is only one door into heaven; that door is faith. There is only one ship that sails for the skies; her name is Faith. There is only one weapon with which to contend with opposition; that weapon is faith.—Talmage.

A Great Mistake
There is no greater mistake than to suppose that Christians can improve the world by compromising with it.—Cotton.

Pipe Lines of Glass

Thanks to recent advances in the technology of glass manufacture, the familiar laboratory glassware of the chemist is now available for the large scale operations of the factory. Glass pipe lines of pyrex are being used for handling many liquids because such pipe does not corrode, is heat resistant, and permits constant visual inspection of rate flow, color and consistency. Pyrex fittings permit the same flexibility of layout as metal pipe and fittings. Installation requires no specialized skill, no tool other than a wrench. A section of glass pipe in one modern chemical plant runs through the office of an executive who is thus able to see the condition and rate of flow of the liquid by merely glancing up from his desk.—Scientific American.

Want Color in Vegetables

Connecticut, envious of the bright-colored carrots grown in California, has taken steps to reproduce the same attractive hue in its own produce. The Connecticut agricultural experiment station has laid out several acres to determine whether it is the California seed or sunshine that makes them that way. Experiments will also be conducted with California beets, lettuce and tomatoes.

GIRL'S DIZZY SPELLS

"When I was a girl, I suffered from pains in my back and sides," writes Mrs. A. L. Frier, of 121 Williams St., Columbia, S. C. "My face would burn and I would get right dizzy. My mother was taking Cardui, and thought it might help me. After taking it a short while, the pain was gone and I quit having the dizzy spells." Cardui is a purely vegetable medicine and may be safely taken by women of all ages.

CARDUI

AGENTS: TO SELL, read's specialty, will be wanted; price and quality will sell. Cardui is a purely vegetable medicine and may be safely taken by women of all ages.

Dr. Peery's

Great Short for WORMS Vermifuge

A Bid for Notice
"They tell me you have discovered an underworld down to Golden Gate City."
"Yes," answered Farmer Cornsuet. "You ought to see the people that stop to look us over."
"What are you doing? Reforming?"
"No, Advertising."

Patriot
It was a beautiful Sunday morning. Simpson, having finished reading a paper printed with an invention made in Germany, set out with his wife for the morning house of a faith founded in Palestine. Contemplating the beauty of the land,

which had been discovered by an Italian in the employ of a Spanish queen and meeting on the liberty it possessed thanks to the help of a French navy, his bosom swelled with pride. "Thank God," said Simpson fervently in a language imported from the British Isles, "I am a 100 per cent American."—Life.

No Person Really Wicked?
"I do not think I have ever met a really wicked man or woman," declared the bishop of Chelmsford while speaking in a London motion picture theater recently.

Comforting Knowledge
Whoever is really brave has always this comfort when he is oppressed, that he knows himself to be superior to those who injure him by forgiving them.—Pope.

Can't PLAY Can't REST —child needs Castoria

WHEN a child is fretful and irritable, seems distressed and uncomfortable, can't play, can't sleep, it is a pretty sure sign that something is wrong. Right here is where Castoria fits into a child's scheme—the very purpose for which it was formulated years ago! A few drops and the condition which caused the trouble is righted; comfort quickly brings restful sleep.

Nothing can take the place of Castoria for children; it's perfectly harmless, yet always effective. For the protection of your wee one—for your own peace of mind—keep this old reliable preparation always on hand. But don't keep it just for emergencies; let it be an every-day aid. Its gentle action will ease and soothe the infant who cannot sleep. In more liberal doses it will effectively help to regulate sluggish bowels in an older child.

All druggists have Castoria; it's genuine if you see Chas. H. Fletcher's signature and this name-plate:

CASTORIA

Tomorrow Morning! Shave with Cuticura SHAVING CREAM

Note how it softens, soothes and refreshes.

At your druggist or send post card on request to: Address: Cuticura, (Shaver's Cream), Boston, Mass.

Don't go moping about through life, dragging one foot after the other. Acquire the spirit and dash of good radiant health by taking LYKO, the great general tonic. It will put spring into your step, smiles upon your face, and rich, red blood into your veins. Get a bottle TODAY! Tomorrow the world will be brighter, more sunny. All druggists sell it, and it's a treat to take it. A5-42

Sunshine and Grief

IN SOUTHERN CALIFORNIA
where the sun shines brightly and the air is warm and clear, the people are happy and contented. Sunshine and Grief is a story of a young girl who has lost her father and is struggling to find her way in a new world. It is a story of hope and courage.
