

# Big Rodeo at Sanderson, June 19-20

## THE SANDERSON TIMES

VOLUME 24

SANDERSON TEXAS, FRIDAY, JUNE 5, 1931

NO. 13

### High School Band to Lead Legion Rodeo Parade

#### Oldest Cowboy in Texas to Be Here For Rodeo

The Sanderson High School Band will lead the parade that will be given both afternoons of the big rodeo that is to be put on here by the American Legion on Friday and Saturday, June 19 and 20. The parade is scheduled for each afternoon, starting at 1:30 and will be under the direction of G. J. Henshaw and Dick Lewellen, Grand Marshals.

This band, which was only organized this past school year by M. K. Sandifer, is one of the best high school bands in this section. It is composed of 35 youngsters. The past several days the members of the band have been practicing and are very proud of the fact that they will take part in the rodeo.

Complete plans were made this week for the rodeo and two days of fun have been promised every one who attend. At their meeting last week the Eat More Lamb Club decided on the barbecue and this will be the first day only and free to everyone. The club has also secured Sol Meyer of San Angelo to make an address at noon. The barbecue will be at the court house ground. Each morning there will be a baseball game and in the afternoon the rodeo events will be held. Both nights at the C. A. C. hall there will be a big dance.

Jeff Vaughn, well known West Texas will be here to direct the events and the oldest cowboy in Texas, George Adams, has notified the American Legion that he will be here, young and spry as ever to take part in the parade.

### RATTLE OF THE RAIL

Engineer R. Kunz recently received injuries at his home in El Paso and is in hospital at Hotel Dieu.

Pump repairer Lee Grigsby is laid up with a bruised foot by a piece of timber falling on it Wednesday.

Three melon trains, the heaviest of the season passed through Tuesday.

Quite a number of assignments have been made recently due to increased business, all assignments not having been made at this writing.

Trainmaster T. S. Stewart was here from Del Rio Wednesday.

Fireman J. H. Lochausen was assigned to a yard engine in El Paso this week.

A work train goes on today. Rosenfield and west for picking up old steel, will be on several days.

Boiler inspector H. L. Downum was here from El Paso this week.

Mrs. Lindsey Hicks had as her guest last week Dr. Foley of New York City, Low Frodham of St. Paul, Mrs. Jas. Waddell and Mrs. Wm. Scheeman of San Angelo.

### Warning Is Issued Against Fraudulent Scales Inspectors

#### State Department of Agriculture Warns Retail Merchants

Austin, Tex., June 4.—Retail merchants are warned by M. S. Frazier, weights and measures chief in the department of agriculture, that imposters are traveling over the State charging a fee for inspection of weighing and measuring devices.

According to reports made by accredited inspectors for the division, these men have represented themselves as authorized State inspectors of weights, demanding the right to test scales. Usually they found something wrong with the scales, and charged a fee for making adjustments.

Accredited State inspectors are not permitted to accept a fee either for inspections or for repairs. They do not, however, make repairs, except in cases where only minor adjustments are needed which take only a short time; and in any event are not allowed to accept a fee for their services.

Official inspectors carry identification cards countersigned by State officials and stamped with the State seal.

One imposter, it was found, threw scales off balance by placing buck shot on the bottom of the scale, out of sight, holding it in place with a wad of chewing gum. He then charged a fee for putting the device back in balance.

### GOOD CROWDS ATTEND THE COCHRAN MEETING

The revival meeting now in progress at the First Methodist Church is drawing filled church congregations at each meeting.

Rev. H. L. Cochran is the opposite of the sensational type evangelist, being more on the Dwight L. Moody style—humble, lovable, but standing four square against sin, and on gospel truth. Rev. Cochran has been heard in gospel song by many Sandersonians who have radios.

Rev. Cochran is kept busy in the East portion of the United States when in that section on meetings, broadcasting gospel song solos, and many people were delighted Sunday evening when he rendered one of his popular radio numbers at the church. Rev. Cochran has one of the best voices ever heard in Sanderson.

He will be in Sanderson at the Methodist Church through Sunday, June 14, preaching every night at 8:15, holding a senior-intermediate young people's meeting at 7:45 every evening, a Bible exposition every morning at 10 a. m., and a junior young people's meeting every afternoon at 3.

The Methodist Church building will seat with the extra seating provided only 175, and it is planned to provide seating for 250 and hold outdoor meetings if the weather permits, or if the weather is inclement, and the Methodist Church building proves inadequate, for the crowds to move to the Presbyterian Church building.

The pastor of the Methodist Church, Rev. B. M. Stradley, Rev. H. L. Cochran, the evangelist, and the members of the Methodist Church, express a deep sense of gratitude for the loving fellowship and spirit of co-operation manifested by those of other denominations in joining hands and hearts in the work of the Lord in Sanderson.

### XEG Listing of Villa Acuna Radio Station

#### Work Rushed on Big Plant. Wave Length 735 Kilocycles

Work on the broadcasting station being erected in Villa Acuna, Mexico, just across the Rio Grande river from Del Rio is being pushed to completion. A staff of men, numbering approximately 100, are working. Concrete forms have been poured and this past week work on the 300-foot tower of galvanized steel was started.

The base of the giant tower has been concreted three yards above the ground. The steel construction work is being pushed as rapidly as possible.

XEG is the station call as listed and announced by the Mexican authorities and will have a wave length of 735 kilocycles.

When completed the station will be the largest in the world.

### John L. Newton Painfully Injured

John L. Newton, who is a brakeman for the T. & N. O. on the Sanderson-Valentine division, suffered painful body injuries when he was thrown from the top of a fast moving freight train near Valentine last Saturday afternoon about 7:45.

Soon after the train had left Valentine, Newton encountered a negro hobo on top of one of the cars. Without warning the negro pushed him off the fast moving freight. He suffered a dislocated left shoulder and right knee. The train was stopped to pick him up and the negro then made his escape. Newton's injuries were dressed at Marfa and he was brought in here on train 104 Sunday morning. So far he is doing nicely and is able to be about town, however it will be several months before he is able to work.

The negro was captured and taken to Valentine.

### HI-EPWORTH LEAGUE HAVE PICNIC

Twenty-five or thirty members of the Hi-Epworth Leaguers had a delightful picnic on Tuesday afternoon of last week when they motored to the Kendrick Harrell ranch, as their usual semi-monthly vacation seasonal social.

### Dryden Airport News

Lt. Edmonston, pilot, with Lt. Kennedy, passenger, from Dodd Field, stopped and refueled at this station and later departed for El Paso.

Lieuts. Lichenberger, Atkinson and Arnold, each flying a training aircraft from Brook's Field to a National Guard unit in Colorado, stopped and refueled at this station.

Lt. T. O. Foster as pilot with Col. A. G. Fisher, passenger, stopped at this station and made an inspection, later departing for their home station in San Antonio.

Pvts. Ritter and Mooney returned from San Antonio where they spent several days the past week.

Lt. Sgt. McCabe spent several days at Marfa this past week and upon his return he and his wife and son motored to San Antonio and then to Galveston to spend several days.

### Fight Starts In Earnest On Bitterweed

#### Ranchmen Co-operate With Government to Eradicate the Weed

With the passing of a \$20,000 appropriation by the State Legislature to aid in the fight on bitterweed found in various sections of West Texas, means that intensive work by scientists will begin immediately. A bitterweed laboratory will be established at the Ranch Experiment Station near Sonora, to aid in the work.

A. B. Clawson, government poison weed expert, has been in the vicinity of San Angelo, for some time determining methods of eradication. The Federal government will probably send men down real soon to assist in the work.

All ranchmen in the affected area are co-operating and are anxious that this weed be exterminated.

### Cowboys Will Play Longhorns

Del Rio will be host to Uncle Billy Dusch's Long Horn baseball team for three days, Saturday, Sunday and Monday, June 6, 7, 8.

The Lions and Rotary clubs will entertain them at a joint luncheon Monday noon, and several other social functions will be held in their honor including a dance at the country club.

The Del Rio "Cowboys" have been undefeated this year and have beyond a doubt the strongest team they have ever had, however the Long Horns have a very strong team, being champions again in their district, and will give the Cowboys a very hard battle for honors.

Fans will remember that in past years "Uncle Billy" has been able to put it all over the Cowboy aggregation and no doubt he has the utmost confidence in again doing it this year.

It will be worth your while to witness these games. All business houses in Del Rio will be closed on Monday afternoon at 4 p. m. in order that the employees may witness this tussle.

### LOCKE-BABB WEDDING

Last Sunday evening after the service at the First Methodist Church, several cars remained in the church parking space after the service, and when the congregation had gone Miss Elsie May Locke and Mr. Lewis O. Babb of Sanderson were united in holy matrimony by the Rev. B. M. Stradley, pastor of the First Methodist Church, assisted by Rev. H. L. Cochran of Sherman, who is here conducting a revival meeting at the Methodist Church.

These young people have a host of friends who wish them a long and happy married life. Their future home will be made at the Babb ranch west of Sanderson.

Mrs. P. D. Lowry and son, Pat, arrived in the city last Saturday to spend several weeks visiting her parents, Mr. and Mrs. J. E. Landers.

Mrs. P. F. Robertson came in last Saturday morning from San Antonio for several days visit with friends and relatives.

### Work Begins on Grading Road on Highway No. 82

#### Contractors Will Use Two Steam Shovels on Project

Pelphrey and Keller, Dallas contractors, who were awarded the contract for the grading and drainage of 4.5 miles on highway 82, between Ft. Stockton and this city, have been busy this past week moving in their machinery in preparation for beginning their work.

On Tuesday of last week they received two portable steam shovels, of one and one-fourth yards capacity, which will be used in cutting down the steep hills. These shovels were bought from the Bucyrus Steam Shovel Co., of Milwaukee.

They will commence work on the road at a point 17 miles north of here and work to the Pecos-Terrell county line which is near the 41 ranch.

Pelphrey and Keller were low bidders on this job and received the work on their bid of \$51,142. In all probability four months will be required to complete the work.

### L. A. LOWE NEW CHARGE LAY LEADER

At the conference of the First Methodist Church, Sunday night, L. A. Lowe was elected Charge Lay Leader, filling the vacancy of H. L. Stuckey.

At the joint meeting of the official board and Workers' Council, Mrs. Katherine McLymont was elected superintendent of the young people's division to fill the vacancy of Mrs. H. L. Stuckey.

H. C. Goldwire was elected recording steward to fill the vacancy of H. L. Stuckey.

Mrs. A. P. Utterback was elected chairman of the local board of Christian Education to fill the vacancy of Mrs. H. L. Stuckey.

Miss Kate Frazier was elected secretary of the official board to fill the vacancy of Mrs. H. L. Stuckey.

H. C. Goldwire was elected teacher of the Men's Fellowship Bible Class, taking the place of H. L. Stuckey, who has moved to Sabinal.

### MISS STRADLEY GOES TO SCHOOL OF MINES

Miss Bessie Stradley, daughter of Rev. and Mrs. B. M. Stradley of Sanderson, who finished her work at the Texas Women's College, receiving her B. A. degree last week, leaves Monday for El Paso to take a summer post graduate mathematics and philosophy course at the School of Mines in El Paso, which is now a branch of the Texas University.

Miss Stradley will return to Sanderson August 1.

### Lunch Room Opens

The Blue Bird Lunch Room, located on Oak street and recently built by Mrs. C. F. James, opened for business last Saturday. They will serve sandwiches of all kinds, hot and cold drinks and ice cream.

### To Remodel Store

Work was begun Monday on remodeling the Sanderson Mercantile Company store building on Oak street. New plate glass fronts will be put in and the interior will be re-arranged and made more convenient.

C. M. Breeding, local contractor, is doing the work.

### Bessie Sharp Carried To S. A. Hospital

#### Alleged Poisoner Undergoes Major Operation

Bessie Mae Sharp, who has been in jail here awaiting indictment and trial for the poisoning of her husband, W. Telefus Sharp, was carried to San Antonio Saturday night on train 102 by Sheriff Lee Cook and Mrs. J. A. Ivy, her mother.

Mrs. Sharp has not been well for a week or more. Saturday, Dr. Robertson was called in and advised that she be taken to a hospital at once.

On Monday she underwent a major operation at the Medical and Surgical hospital.

### TERRELL COUNTY OIL NEWS

By J. Calvin Stansell

It is reported that several truck loads of equipment of derrick and drilling supplies has just been unloaded on one of the newly made locations for an oil and gas well for Mrs. Jessie McPhee of Los Angeles, Calif.

Jones, et al. No. 1 Packenham, on the center of southeast quarter of northwest quarter of section 43 in block 122, C. C. S. D. & R. G. N. G. Ry. Co. survey, is now drilling to a depth of 1100 feet.

The Trans-Pecos Development Company's Keck Pecos Trust No. 1, Hamilton, on section 6, certificate 100, Cedar Springs block, is drilling in full blast around 3200 feet.

The Mid-Kansas Oil & Gas Company's No. 1, M. H. Goode, Sr., on section 26 in block 161, G. C. & S. F. Ry. Co. survey, is reported to soon resume operations.

Reports from the other three test wells for oil and gas is not obtainable at this issue of the press.

A local well driller encountered about 200 feet of Iron Pyrites in a water well situated in Brewster County about 40 miles northwest of this city some time ago. A floating geologist says that this mineral is very valuable in the manufacture of sulphuric acid and ferrous sulphate, and vermillion paints, and for rings, scarf pins, trinkets, etc.

A local prospector recently found quite a large quantity of black manganese ore over in Brewster County about ninety miles southwest of this city. An assayer, who is now in this city, states that this black manganese ore is a metal of commerce and is a substance largely used in the manufacture of chlorine, and in making black enamel for pottery, and the manufacture of glass. It is also used in dyeing and printing. The metal forms valuable alloys with aluminum, copper, iron and mercury. It is used in iron and steel, and is said to greatly increase their elasticity and hardness, and even one per cent of manganese will render cast steel more tenacious.

A sample of some kind of ore and asphalt coming off of the Light and Jones ranch approximately 40 miles from this city, has been submitted to the American Smelting and Refining Company for correct assay determinations.

J. C. Green Jr., who has been attending Schreiner Institute in Kerrville the past year, came in last Saturday and is now in Valentine visiting with relatives.

# White Jacket Popular Fashion

By **CHERIE NICHOLAS**

In the white jacket which tops the dark frock or skirt, a distinctly new trend of thought has been opened to the world of fashion. This movement reflects the influence of the vogue which calls for sharp contrast at the same time that it responds to the insistent demand of the mode for costume detail which is dashing white.

Now that the white-jacket vogue has been set in motion, its popularity is increasing with leaps and bounds. In developing the theme, designers are employing materials of every description. Cottons, linens and such are as much in favor for these smart little immaculate white jackets as are the handsomest of silk crepes, satins and velvets.

One notes in the style parade maybe a white velvet jacket here, a white crepe jacket there, with many a jacket of white all-over eyelid embroidery here, there and everywhere, each one of them posed over a skirt or dress of navy, black or brown as the case may be. The clever jacket to the left in the picture is of squishy eyelid embroidered batiste. It is smartly belted with black patent leather. Its shapely peplum and flowing elbow length sleeves are outstanding details. The

top the white jacket which is worn with a dark costume.

Competing with the jacket which is pure white is the jacket which contrasts the dark color of the dress with bright color. The arresting costume illustrated to the right is designed in black and yellow wool crepe. The close fitting jacket is worn over a blouse of yellow flat crepe that has sleeves half-in-half black and yellow. The scarf tied at the neck is also in black and yellow.

One after another these striking contrasts between jacket and skirt are to be seen wherever fashionables gather. Sometimes it is white, which enlivens black or navy. Then again comes along a jaunty white summer fur coat or bolero worn with gray, for gray with white is very smart.

(© 1931, Western Newspaper Union.)

## This and That

A man is generous to a fault when he fails to correct it.

Miami University, Oxford, Ohio, was founded 122 years ago.

A small rent in a reputation soon becomes a large hole.

It's their crooked ways that enable some men to make ends meet.

The man who is in love with himself has no fear of being jilted.

The rooster is a tidy bird. He invariably carries a comb with him.

Collected modern proverbs are so often mere platitudes.

You can't escape criticism, even if you never say or do an unpleasant thing.

## Cretonne, Linen Used to Cover Chairs

(Prepared by the United States Department of Agriculture.—WNU Service.)

When we speak of slip covers we generally have in mind the dust covers of cretonne, linen, and other washable materials that are used to make the house look cooler in hot weather, or to protect the furniture.

There is, however, another very useful type of slip cover which is made as a substitute for upholstery. These covers are removable, but they are much more snug fitting than the dust-cover type. A slip cover of this kind is intended to be a permanent part

Removable Slip Cover Snapped On.

of the chair, but because it is detachable, it can be removed and cleaned or laundered when necessary. Another advantage of these removable upholstery covers is that if the chair is wanted in a different room a new slip can be made for it at relatively little expense to harmonize with the new surroundings.

Many materials are suitable for slip covers. Cotton fabrics are particularly adaptable to this purpose because they are easy to handle, and launder well. However, if the slip cover is to take the place of upholstery, the heavier cotton fabrics such

as rep, denim, and crash are to be preferred. Any materials for a cover of this kind should be preshrunk.

The illustrations show how the bureau of home economics of the United States Department of Agriculture has used slip covers over the worn and faded upholstery of some padded chairs in a room with bright-colored figured window draperies. A plain blue green cotton rep which repeated one of the colors in the hangings was chosen for the slip covers. Ready-made black sateen cording in the seams gave character to the covers and repeated the color of the painted chair frames. Before making the slip covers, the bureau specialists improved the chairs, originally a drab green shade, by painting them with two coats of black enamel. When finished, therefore, the chairs were in harmony with the other furnishings of the room.

"In making a slip cover of this kind," says the bureau, "fit the material right on the chair, wrong side up, unless there is a pronounced figure which must be centered. Mark lines for seams with pencil or tailor's chalk. Cut out the fabric with liberal allowances. Sew the cording first to the straight edge of the side strips or 'boxing,' as these strips are called; then carefully baste this strip to the front and back sections, keeping the filling or crosswise threads of the material always parallel to the floor. In

Removable Red Slip Cover for Chair.

most materials, the rounded corners can be slightly eased onto the straight strip.

"Cut the front section of the back cover long enough to pass under the lower edge of the frame and snap to the lower edge of the back section."

### Scarf Now Entrenched

Whether or not scarfs would become as firmly entrenched in evening affairs as in daytime ones is something we were not certain of until we saw some of the latest evening gowns. There they were, each frock had its own scarf that could be wound about the throat or worn trailing out in back. A most intriguing idea.

## Some Homemade Candy Recipes

By **NELLIE MAXWELL**

There is no moment like the present. The man who will not execute his resolutions when they are fresh upon him can have no hope from them; afterwards they will be dissipated, lost, and perish in the hurry and scurry of the world, or sunk in the slough of indolence.—Maria Edgeworth.

A piece of home-made candy is always a welcome addition to any meal.

**Date Nut Roll.**—Boil one cupful of evaporated milk with two and one-half cupfuls of sugar to the soft ball stage. Add one package of dates sliced and stir well into the mixture, cooking for a few minutes; now add two cupfuls of nuts chopped. Cool, turn out on a buttered

platter and knead until creamy and stiff. Shape neatly into a roll, wrap in a damp cloth, place in a covered container and keep cold until sliced.

**Maple Fudge.**—Boil together one cupful each of granulated sugar and maple sugar, one tablespoonful of corn syrup, a few grains of salt, one-half cupful of water and when the mixture is a thick sirup add one-half cupful of evaporated milk. Stir and cook until it tests for the soft ball. Let stand to cool. When the candy is cool enough to hold the hand on the bottom of the pan, it is ready to stir. At the first sign of stiffening turn into a buttered pan; it will be smooth and glossy; when cool enough cut into squares.

**Pralines.**—Boil together one-half cupful of cream, one and seven-eighths cupfuls of powdered sugar and

with buttered, spiced crumbs. The United States Department of Agriculture has tested the following proportions:

4 lbs. melted butter or other fat  
1/4 tsp. salt  
1 quart fine, dry bread crumbs  
1 quart sweetened rhubarb sauce, or 2 quarts raw sliced rhubarb, sugar to sweeten  
Cinnamon or nutmeg

Mix the fat and salt with the crumbs. Place the rhubarb and the crumbs in alternate layers in a greased baking dish and sift the cinnamon or nutmeg over the top. Bake the pudding in a moderate oven. If rhubarb sauce is used, this will require about

20 minutes. If raw rhubarb is used, cover the baking dish at first and bake for 25 minutes, or until the rhubarb is tender. Serve the pudding hot with or without hard sauce.

### Kill Clothes Moths

Clothes moths can be killed in a handy way by using a noninflammable mixture of three parts of ethylene dichloride and one part carbon tetrachloride. The mixture is put in pans above the clothes or high up in the closet and left for 24 hours to evaporate without opening the door or lid. Use one quart to 200 cubic feet of space.

### Rhubarb Betty Liked as a Dessert

(Prepared by the United States Department of Agriculture.—WNU Service.)

Here are two old friends who, in a good many homes, have never met each other. Rhubarb, by itself—served as sauce—is sufficiently familiar to need no introduction; in fact, this is almost the only form in which many people know rhubarb. Even when they enjoy rhubarb pie, the rhubarb is sauce before it is pie. "Betty"—bread crumbs and fruit, baked in alternate layers—is most often "apple betty," sometimes peach or prune betty. There is no reason, however, why rhubarb betty should not vary the spring desserts and be popular with the family. It may be made with sweetened rhubarb sauce or raw sliced rhubarb, sprinkled with sugar and alternated

## Fairy Tale for the Children

By **MARY GRAHAM BONNER**

### SEA FAIRIES

The sand fairies went rushing out to the sea fairies. The sea fairies laughed as they fell right over them with their boats of foam in which they were riding.

"Ah," said the sea fairies, "aren't you glad you joined us? Our boats are going so well today.

"There are no boats in the world like the breaker boats."

"They seem to have rather rough names," said the sand fairies. "Of course," said the sea fairies, "and they are good and rough, too."

"Although of course it is the ocean that helps. These boats will not come out unless the ocean is just right."

"When the ocean is just right they do what the ocean tells them to do."

"We think old Mother Ocean is pretty powerful. She rules the waves."

"She rules the breakers. And she rules the boats which we call the breaker boats."

"Some people just call them breakers, and others call them high waves or angry waves, or waves covered with whitecaps and foam."

"Here, here, here," whistled a voice from above. It was the voice of old Mr. Wind.

"Now, don't you start saying that Mother Ocean does all the work. I do some of it myself."

"I am a friend of Mother Ocean, I am, and I like to help her."

"Oh dear, oh dear," laughed the sea fairies. "The wind must always get some praise, too."

"Of course I must," said the wind. "There are so many people who abuse me."

"They talk about the 'frightful

sometimes by giving Mother Ocean all the praise."

"It never fails to make you very angry."

"I suppose that is what you like," said Mr. Wind.

"Of course," said the sea fairies. "Then you blow up into a rage and we have more fun than ever, and the breaker boats go so wonderfully."

"I should say they did," said one poor little sand fairy, who had been knocked over and over all the time by the sea fairies.

But she really didn't mind. It had all been quite jolly. The sea fairies wore their fluffy white dresses and their green shoes and stockings. Such gorgeous green shoes and stockings as they were.

And their collars and hats were like glorious white ruffles—all made by Mother Ocean.

All of the sea fairies were now back in their boats and how the breaker boats did toss and break! They roared with the fun, and the low, deep voice of Mother Ocean murmured all the time:

"That is right, my children. Enjoy yourselves. You are so beautiful, so young and so active. It does my old watery heart good to see you."

And the sea fairies went on rolling back and forth in their breaker boats.

And as they went they played with the sand fairies on the beach.

"Enjoy yourselves."

wind, and the 'terrible wind' and the 'great gale' that I am blowing up."

"Oh, well, well," said the sea fairies. "You can't please every one. We're satisfied, so that's enough praise for you today, Mr. Wind."

"And we know you help Mother Ocean. But we like to tease you

## An Attractive Way to Serve Chicken

Dishes a la King Require Crisp Accompaniment and Little Other Starchy Food.

(Prepared by the United States Department of Agriculture.—WNU Service.)

Dishes "a la King" are characterized by a large proportion of mushrooms, a sauce made of pure cream or rich milk, and various flavoring ingredients among which green pepper is generally included. The resulting rich and delicious mixture is served on patty shells in restaurants, but individual pastry cups baked in muffin rings are satisfactory if patty shells cannot be obtained. Or the chicken mixture may be served on toast. "Chicken a la King" was named for the hotel chef who first served chicken in this way, but the same sauce may be used for other "a la King" dishes. All of them are rich and need some crisp raw vegetable such as celery hearts, or radishes, or both, as an accompaniment.

**Chicken a la King.**

1 fowl, 4 to 5 lbs. 1 1/2 tenn. minced onion  
3 cups cream 1 1/2 tbs. lemon juice  
6 tbs. butter 1/2 cup paprika  
2 tbs. flour 1/2 cup salt  
2 small green peppers 1/2 cup chopped (cut in pieces) pimiento  
1 1/2 lbs. mushrooms  
3 egg yolks

Put the dressed chicken on a rack in a kettle, add one-half teaspoonful of salt, barely cover with hot water, partly cover the kettle and simmer for two to two and half hours, or until the chicken is tender. Let cool in the broth, then drain, remove the meat from the bones and cut into even-sized pieces. The broth can be utilized for soup.

Heat the cream in a double boiler. Blend the flour with three teaspoonfuls of the butter, and stir into the cream until thickened. Melt the remaining butter in a skillet, add the green pepper and mushrooms, and cook for a few minutes over low heat. Beat the egg yolks, stir a small quantity of the thickened cream into them and add to the rest of the sauce. Add remaining ingredients and heat thoroughly. Serve in patty shells or on crisp toast.

Chicken a la King is often served as the main dish of a formal luncheon or buffet supper, but the family will like it just as well for dinner. The recipe has been tested by the bureau of home economics of the United States Department of Agriculture.

## Machines That Are Almost Human

By **E. C. TAYLOR**

### Mechanical Men

FOR ages man has aspired to build with his own hands mechanical men, birds, beasts and fish that would perform at his bidding.

Today there are mechanical men that see, hear, feel and talk. Planes have been flown without a human hand touching the controls. Boats have been sent on voyages without a human being aboard.

More wonderful than these, even, are "thinking machines" that surpass the human brain in ability to solve difficult problems.

Man has constructed marvelous machines that can perform all his tasks better than he can perform them himself, and hundreds of these machines are in constant use throughout the country. But they lack one thing that has placed man above other animals. They cannot really think for themselves. They must be directed by their human creators.

A short time ago the duke of York was scheduled to open the annual exhibition of model engineers in Royal Albert hall, London. He found he could not get back from Scotland in time, so Capt. W. R. Richards, a British scientist, built a mechanical man to take the duke of York's place.

Eric Robot—so Captain Richards named his creature of wheels and batteries—stood before the gathering of engineers and scientists, spoke for four minutes, and then sat down. He could have spoken for four hours or four days, his inventor said.

Eric Robot later toured the United States. He didn't smoke, chew or swear, and made many friends. In appearance, he looked like a knight in armor. He weighed 140 pounds and was built entirely of aluminum. He could do everything but walk, apparently. He talked, and rose and sat down when told to. He had a set of aluminum teeth to aid his voice, and his speech was much better than that of most lecturers.

He was operated by electricity, of course, and his highly sensitive mechanism responded to sound. When spoken words reached his microphone, the vibrations started machinery inside him that carried out the spoken directions. He even gave imitations of George Bernard Shaw and H. G. Wells during his appearances on the lecture platform.

The "televox," which gave the power of speech to mechanical men, was invented by R. J. Wensley of the Westinghouse Electric and Manufacturing company in 1928. Previously mechanical men could only hear and obey. Mr. Wensley found a way to make them talk back.

He demonstrated the robot's ability to answer by attaching a televox to a telephone; "Televox speaking."

Mr. Wensley's televox can even imitate a conversation. If something goes wrong, for instance, at a power substation where it is on duty it can lift a telephone receiver and say:

"This is televox calling for Main 5000."

When the telephone connection has been completed, Mr. Televox will continue the conversation in buzzer code. In place of vocal cords, this mechanical man has a talking film introduced among its vital organs. The words to be spoken are recorded on a film, and are projected when the mechanical man is called upon to speak.

"Rastus" is another mechanical man produced by the Westinghouse laboratories. He was built by Dr. Phillips Thomas, and has performed before scientists several times.

Rastus not only can answer back, start conversations, sit or stand as he is bidden, but can answer questions and greet his callers almost like a human being. He is built to resemble a man, with legs and arms and a head, with a face like a dark-skinned minstrel. Hence his name.

Eric Robot and Rastus, of course, are for exhibition only. They were built to show how near to creating a mechanical man science has progressed. The devices that operate them, however, are in daily use in industries, safeguarding lives and guarding property.

(© 1931, Western Newspaper Union.)

### One-Sided

Joseph E. Sheedy, president of the United States Steamship lines, was discussing communism.

"The Russians can propagandize all they want to," he said, "we'll never have communism in this country."

"The average American's idea of Russian communism, and a pretty accurate idea it is, comes out in a little anecdote."

"He's a Communist, ain't he?" one young laboring man said to another.

"He is, for fair. He borrows my money, he helps himself to my tobacco, and now I'm darned if he don't want to write to my girl."

### Black Walnut Becomes Pest

The black walnut of California is properly named because it is the black sheep of the walnut family, according to L. R. Cody, Santa Clara county horticultural commissioner. The black walnut shell is hard to crack, so the nuts are not acceptable commercially, but the trees are used for ornamental purposes. The result is that these trees, in some instances become breeding places for pests which spread to the commercial groves of English walnut trees.

# Learns Law in Cell; Wins Out

**Son of Famous Woman Is Branded as Most Dangerous Prisoner.**

New York.—"I think it did me good. When a man has seen the worst, life doesn't hold any terror for him."

Thus spoke Roy Sloane, boy prodigy, after being released from a year prison sentence last December.

Now, three months later, police are wondering if the sentence did the good Sloane said it did. They have hopes that another and longer term in Sing Sing will do what the first failed to do, although keepers there doubt it.

Detectives say they caught Sloane at the Miller building at 562 Fifth avenue, a few minutes after a \$25,000 jewelry holdup had been staged. They are sure the twenty-six-year-old boy wonder was the brains behind the holdup, although Sloane, with devastating calmness that has caused police no end of despair, denies any connection with the "job."

**Mother World-Famous.**

His mother, Mrs. Anna Hogenhold Sloane, world-famous educator and founder of the Arts and Crafts Institute in Washington, is sticking by her boy, just as she has stuck by him through the years since he crossed the path of the law.

"Roy couldn't do that. They're trying to get him, I'm sure. They're jealous because he bested them. They're trying to put him back in prison," she insists.

There's no doubt that the minions of the law are jealous of Sloane. He's bested them all—prosecutors, judges, detectives and policemen.

And what's more, Sloane is convinced that he's going to come out on top once again in spite of evidence that at the very moment three men were binding three employees in the office of Karos & Stein and taking the jewelry, Sloane was in the same building. Furthermore, police say, victims have identified him. Later the hat was found scattered over the building. An identified accomplice, Jack Giller, was caught within a few minutes after the stickup.

Sloane, with a brilliance that astounded veterans of the bar has talked himself out of jail before, but the cops say he's in a tougher spot this time.

Whether he can talk himself out of a second sentence—police are sure that they have enough on him to bring about an indictment and trial—remains to be seen.

**"Twisted Makeup."**

A peculiar twist of make-up, one of those things psychologists try to explain but somehow never impressively, and there you have the story of Roy Sloane.

Mrs. Sloane, holding degrees of B. A., M. A., Ph. D., from various universities, a former investigator for the Department of Labor, and author of several books, had wanted him to be an engineer. From her Sloane had inherited his brilliance.

While a student at Carnegie Tech

young Sloane suddenly astonished his professors and friends by getting mixed up in activities involving stolen goods. For these activities he served a sentence at the Pennsylvania Training school.

Mrs. Sloane, who before Roy's birth, concentrated her thoughts in hopes that the child would be brilliant, after his release helped him along. While selling automobiles he took extension courses at Columbia university.

Then Mrs. Sloane suffered a severe shock. Her boy had been picked up in a stolen automobile and found with, according to the police, "the most complete set of automobile keys it has ever been the dismay of the New York police to see."

For this he got five years, but was resentenced to serve ten when the term at the Pennsylvania institution was revealed. That was in 1927.

Sloane seemed a model prisoner at Sing Sing for a while. Then, an alert guard found that parts of Sloane's cell bars had been cut and filled with putty which blended almost perfectly with the coloring of the real bars.

A key, made with a file and radiator valve handle, an imitation revolver fashioned out of another piece of metal, a keeper's hat, sixteen one-foot lengths of pipe, and other paraphernalia contrived to aid his and other's escape from the prison, were turned up by the authorities in quick succession.

Then Sloane got himself "in dutch" sure enough. Guards found a pair of brass knuckles on his person. Ordinarily, one found with such a weapon is guilty of a misdemeanor. It becomes a felony when found on one serving a prison sentence.

Brought back to White Plains to face trial for this possession of unlawful weapons, Sloane, just as the proceedings were about to commence, waved his astonished lawyer, Stewart Baker, aside. Although he had at the time never studied law, he asked permission to conduct his own defense.

**Fought Own Battle.**

Before an astonished judge, and jury, dressed in prison garb with a stripe on his arm signifying his "isolation" as a prisoner, Sloane questioned and objected, called this and that irrelevant and fought over admission of certain evidence.

A letter from his mother, at that time in India gathering material for a book, Sloane said, dissuaded him from attempting a jail break and at the time he was caught, he said, he was removing the implements so that steel pigeons wouldn't see him.

"If I had intended to escape," he cried, "I could have got a real pistol at the prison. It is easy to get a pistol at Sing Sing. Instead of making a hacksaw, I could have got a real good one there."

And to prove that he could, Sloane produced from his garments a complete set of tools, two chisels and a screwdriver!

The jurors went out. It was reported that they had stood six for acquittal and six for conviction. They

## GIVEN CIVIC PRIZE

Dr. Paul Philippe Cret, professor in the University of Pennsylvania School of Fine Arts and famous architect, shown with the \$10,000 Bok award which is conferred each year upon the person who contributes the greatest service to the advancement of his fellow men. Doctor Cret has assisted in the designing of war memorials throughout the United States and Europe.

Sled back, asking to see the weapon. Sloane had sworn that the brass knuckles, carved from a valve of the top of a steam pipe, had been meant to be used as a lever in opening the lock of his cell door. A juror discovered that the weapon had been filed so as to permit the insertion of fingers. The result was a verdict of guilty and an additional sentence of seven years for Sloane.

**Studied Law in Prison.**

Sloane went back to Dannemora as a dangerous convict. There he studied law, preparing for the appeals from his first conviction.

Finally he won out. He convinced a jury that he had not been connected with an automobile stealing ring. In summing up his side of the case, Sloane argued for more than two hours.

Sloane thought he had won complete freedom and when County Judge Frederick P. Chase wouldn't free him and urged him to work on another appeal, Sloane returned to Sing Sing.

By a gradual series of appeals which took him through court after court and even into the federal tribunals, the court of appeals ruled that Sloane should not have been convicted of a felony but of a misdemeanor for carrying the brass knuckles. Therefore, should have been sentenced to only one additional year.

Having already served three years, Sloane was therefore a free man.

## English Vet, Blinded in War, Passes Exam to Bar

London.—Capt. Ian Fraser's passing of the bar examination is a tale of pluck and a hard fight against blindness. Captain Fraser lost his sight during the war. When he got back to England he set his mind on becoming a lawyer. He had his friends and family read him hundreds of books on law, and these he succeeded in memorizing. His brilliant mind aided him in passing the examination.

## THE CRANDALLS AND THE STENDHALS

By FANNIE HURST

THE house of the Crandalls in Wittegar street was one of those massive brick-and-stone affairs that looked as if it had been built and passed on for a few generations from father to son. And so it had, except in the case of the Crandall branch now in occupancy, it had been a case of from father to daughter.

Martha Crandall had married Deeping Johnson in her father's home and remained there after her marriage, and after the death of the elder Crandall.

Martha Crandall Johnson's daughter Adeline had been born in that same house, in the same stately, high-ceilinged, wainscoted bedroom in which she herself was born.

You felt about the house of the Crandalls that the people who inhabited it had not made their money overnight, so to speak. Crandalls, ever since Crandalls had lived there, had been able to afford the substantial things of life.

Little Adeline Crandall Johnson grew up in that environment, as blithely as if the somber old house had been a rose garden. She danced through its halls, she danced through its dark corridors as brilliantly as a butterfly, caught in some strange netherworld environment.

She was something quite so alien to them and yet so inconspicuously fascinating. She had been born in the chill autumns of their lives, when Martha was forty-two and her husband fifty. Almost any way you looked at her she was a phenomenon, the last creature in the world you would have expected to spring from the union of two such angular souls as Martha Crandall and Deeping Johnson.

Unconscious of the incongruity of her young presence in the deep brown plush of the Crandall-Johnson environment, Adeline rushed into the flush of her adolescence.

By this time the Crandall-Johnsons were at the peak of the financial history of all the Crandalls who had occupied that house on Wittegar street. Not only had Martha come into a vastness that ever accumulation of Crandall's monies, but Deeping Johnson had practically cornered one of the most important cotton markets in the history of the industry.

When Adeline Crandall Johnson was seventeen she was heiress to seven million dollars. More than that, and with an obsolete kind of solemnity of which they were totally unconscious, the parents of Adeline had picked out for her in marriage the son of another local millionaire. It was one of those predetermined affairs about which there had not been much family discussion. It is doubtful if Adeline herself, in those years when she and the fat young boy were so consciously sent to dancing school together, was even conscious of the import of what was happening.

Certainly she never took Donald Dugan seriously enough to even resent him. The fact that at seventeen and eighteen they were unofficially considered engaged, glanced off her bright young conscience with scarcely an impact.

One night, however, in the great deep brown plush parlor, the young Dugan, probably on the crest of his first fierce wave of ardor, caught her into his short round arms and kissed her wetly, patly, roundly, and with possessiveness on the lips.

Four weeks later Adeline Crandall Johnson eloped with her music teacher.

For three months the great, solemn, brown doors were closed to Adeline and her slender blond husband. Then solemnly, inevitably and rather terribly, with the news that Adeline was with child, they swung open, taking into the silent maw of that house on Wittegar street, the young figures of Adeline and Jacques Stendhal.

Promptly it swallowed them. Promptly it engulfed them. Promptly the solemnity of that environment flowed around them in rivers brown as mud. The young Frenchman who had married Adeline because to him she was a flower almost too sweet to pluck, pulled in the beginning against the drag of this environment.

But in the end he, too, began to succumb.

By the time Adeline's baby girl was born, the young pair were part and parcel of the house located on Wittegar street.

It cannot be said for Jacques Stendhal that he was of the stuff that parents would select as the husband of a loved daughter. He was a frail fel-

low, probably in character, too. A constitutional dilettante, unstable by nature, playful, and in a way that was forever to be adorable to Adeline, dependent upon her for decision.

Then, too, he loved her. There was no doubt of that. This volatile Frenchman, full of traditions that were alien to the very life and being of Adeline, had one quality of stability that was impeccable.

He loved Adeline.

It was curious, but within that household, slowly, surely, steadily, as relentlessly as the progress of a Greek drama, unspoken plans for the destiny of Adeline Stendhal began to shape themselves in the mind of Martha Crandall and her husband Deeping Johnson.

This catastrophe that had come to them was not to be borne. This frail, blond, volatile, young outsider, with the stage-like name of Jacques Stendhal, music teacher, was not to be endured within the substantial walls of the Crandall mansion.

And it must be admitted, that as time marched on, Jacques himself gave justification to their enormous resentments against him. He twaddled away his days. After his marriage, his slight income from the teaching of piano, fell off entirely. It was nothing for him to spend hours on end in the narrow strip of garden behind the Crandall house, dandling his baby girl on his knees.

In vain Adeline, as if she sensed the menace that was forming between them, pleaded with him to stabilize his life; to either resume his own profession of piano instruction, or adapt himself to some form of work in her father's vast cotton organizations.

It was no use. To all intents and purposes, Adeline had married a ne'er-do-well.

When the baby was three years old, a phantom of delight if ever there was one, affairs in that household began to shape themselves toward a climax. For thirty months Jacques Stendhal had not turned his hand in an earning capacity, the threats, the aspersions, the abhorrence of his parents-in-law notwithstanding.

For thirty months, until her sweet eyes were rimmed with weeping, Adeline had implored, begged, coaxed, and to what end? To the end that after these importunings, Jacques, remorseful for the moment, would promise, and the scene would end in one of play; the young father, the young mother, their child between them romping in their youth and vitality through the somber rooms of the somber mansion.

It was at the end of the fourth year, however, that the elder Crandalls did succeed in creating a schism. It was finally borne in upon even Adeline herself that life with this play boy was unendurable; it was not only unfair to herself and to her parents, but to the youngster at their knees, to continue as his wife.

Just why it was unfair, Adeline never stopped to ask herself, except, that according to all the traditions of the Crandalls and the Johnsons, every man must produce. It never occurred to Adeline that the fact that the Crandall-Johnsons had seven millions should be more than sufficient to offset the congenital shortcomings of Jacques.

When the little girl was four years to the day, Adeline consented to the divorce. Curious, but the reality of the situation never seemed to come home to Jacques. He could not take seriously the fact that this sweet girl of his life and heart was about to walk out of them. And yet she did.

One year after Adeline's incredible acceptance to a divorce Jacques found himself back in his humble studio as piano teacher, pounding out his living at the keyboard.

The situation in the Crandall-Johnson house had progressed. With an acquiescence which seemed to denote that the strength for conflict had flowed out of her heart, Adeline resumed life according to the dictates of her parents. Not even the prospect of their designs for an approaching marriage with Donald Dugan seemed to penetrate the icy stolidity that had encased her since her official separation from Jacques Stendhal.

Life resumed its even flow. She had her child, a small beauty, who was permitted by court agreement, to visit her father once every month, and Donald Dugan as eager as ever to marry her was reconciled to taking the little step-daughter along with his marriage contract to Adeline.

Two nights before the wedding Adeline, still in what seemed to be her icy mantle of reserve, walked out of the Crandall-Johnson household with her child in her arms. At ten o'clock that same night she eloped with Jacques Stendhal and was remarried to him in the office of a local magistrate.

The Stendhals, there are five of them by now, are a playful, unstable, hilarious group. There are a pair of solemn brown doors that remain closed against them.

The Stendhals, both Jacques and Adeline, try to feel solemn about that. Somehow they cannot.

## Fashion Notes That Will Appeal to Milady

The elbow length sleeve in jacket costumes is another Paris preference. Organdie is first choice for the bridesmaid's gown this spring, with net next.

A new and striking type of costume consists of a black silk frock worn with a white satin hip-length jacket.

One of the Paris milliners has made small toque-shaped hats with wide brims that may be taken off or put on as you will.

Combinations of emerald green and navy are reported as being widely worn.

White cotton pull-on gloves, heavy and big, are now considered exceedingly smart for street wear.

Collars are prominent in the neckline achievements, and tendency to fluffiness may be noticed in the soft ties and scarfs that finish collar lines on the afternoon frocks.

## "BACON AND COFFEE ALWAYS UPSET MY STOMACH"

BACON and coffee—what a delightful combination—but they often cause heartburn, indigestion, gas—that "uneasy feeling." Most everyone has some favorite foods that disagree. Here's a pleasant new way for quick relief. Just eat Tums, the delicious new Antacid mints that neutralize acid conditions—sweeten breath—end heartburn, sour stomach, gas, acid indigestion. Blunch a few Tums after meals and stop trouble before it starts. Get a handyroll today. At all druggists. Only 10c.

TUMS ARE ANTACID—Not a Laxative  
For a Laxative, use the safe, delicious TUMS Vegetable Laxative  
TUMS (Nature's Remedy). Only 10c.

Luxuries for Hunters

Johnny Jones, big game guide in the Yukon, carries a bathtub and a French cook, among other things, when showing wealthy tourists where to bag game. Jones makes thirty to sixty-day trips into the wilds. His headquarters are at Skagway, where he keeps a string of forty horses. "A guide to be successful should arrange the best for his parties," Jones said. "Sportsmen make the trip with me usually in pairs, never more than five. I take a complete outfit for camp convenience, including a stove and bathtub. French cooks are the best, and I always have one along."

The Test  
Mother (at table)—Now, are you sure you got your hands good and clean?  
Wife—(already under way)—Well, I just peeled a hard-boiled egg and, look, it came out without any spots on it!

"I COMPLAINED  
—all the time, I knew it was hard on my family but I couldn't help it. I was tired and run-down and I suffered from pain continually. I had just about given up hope when I tried G.F.P. This splendid tonic helped me right from the start and now my pains are gone and I am strong and healthy again."

Drinking in Music  
Negro Patient—Doctor! doctor! I was playing the mouth organ, an' swallowed it!

Doctor—Keep calm, sir, and be thankful you were not playing the piano.

Lasting "Signatures"  
Ancient Chinese documents were sometimes signed by fingerprints impressed into clay seals.

## CLEANSING LAXATIVE

"For fully 30 years I have, by using it, known Black-Draught to be a great medicine," says Mr. A. L. Cone, of Perkinston, Miss. "I found it so satisfactory, I haven't seen any need to change. When I get constipated, I feel all out of sorts, and tired and sluggish. I take a few doses of Black-Draught. It regulates my bowels and I get all right. It will cleanse the system and help you, if you use it as we have."

## High Tides and Gales on Atlantic Coast

This scene on the Boston waterfront indicates the conditions that prevailed all up and down the Atlantic coast due to abnormally high tides and violent gales.

## LOVE BRIDGED 3,000 MILES AND 16 YEARS' SEPARATION

Poet is Now Happily Married to Girl He Met in Lodging House Kitchen.

New York.—Three thousand miles and 16 years separated Benjamin DeCasseres, poet and cynic, from the woman he loved—but they overcame the obstacles of space and time and now are happily married.

The facts of this strange love affair have just been revealed by DeCasseres himself. As to his present happiness:

"If every couple on the planet were going to get a divorce tomorrow, the gods themselves would gamble that Benjamin would not," he writes in the Cosmopolitan.

The marriage of the poet and Mrs. Mary Adele Terrill Jones (she is Indian-quarter Indian, and Bio is her Indian name), has lasted 11 years. "In our

11-year marriage, the first 10 years were the hardest," DeCasseres declares.

The poet met Mrs. Jones in 1902, when he was working on the old New York Sun. He worked nights, and one November morning, when he returned to his East Thirty-fourth street lodging house, he saw her for the first time. She was in the kitchen, sipping a cup of coffee. She wore a fiery-red jacket.

"From that November morning until she left in March, 1903, I saw her only four times, each time briefly," he says. "In that time I never touched her hand. I—reputed to be a brilliant and dynamic talker—was a perfect idiot in her presence."

Mrs. Jones was the wife of Henry C. Jones. With her husband, she moved West, living on the Tonopah desert, in Los Angeles, San Francisco, Berkeley and Reno. For 15 years she

and DeCasseres wrote almost daily letters.

"They were like a pavement of paper between the West and the East over which our hurrying and lovingly feet sped as fast as thought and passion could travel," the poet says in his Cosmopolitan article.

## Belled Buzzard Rings Way Into Old Haunts

Hagerstown, Md.—The belled buzzard was back in its old haunts recently, according to Leshner Kreps, Williamsport, who saw the famous old bird near Woodport. The men were driving along the road when they saw the bird, flying low, and distinctly heard the bell.

The buzzard is believed to be the same one captured along the Potomac river last year and kept in captivity for a while and then released.

The bird has a large bell around its neck, secured with a wire. It has been seen in many parts of the country for the past 25 years, but always comes back to this valley early each spring.

Matchless economy

with six-cylinder smoothness

"Better than 20 miles to the gallon." "Its cost-per-mile is the lowest of any car." "Never have to add oil between crankcase changes." "Drove from Ohio to California on a repair expense of \$1.05." "It just runs and runs and runs."

—typical comments from owners of the Chevrolet Six

Chevrolet's 127" frame supports the load through out its entire length.

1. Efficient Engine Design makes Chevrolet fuel consumption so low that 20 miles to the gallon of gasoline is nothing unusual for a Chevrolet owner.

2. Modern Chassis Design—evidenced by Chevrolet's long heavy frame, four parallel-mounted springs, and smooth-running six-cylinder engine—increases the ability of the Chevrolet Six to run dependably, day after day.

3. Excellence of Manufacture also adds to Chevrolet dependability and long life. Chevrolet pistons, for instance, are built so carefully, and held true to such close limits of pre-

cision, that many owners have gone 20,000 miles or more without having their motors opened for major servicing.

4. High-Quality Materials are used throughout the Chevrolet car—costly nickel steel, chromium-vanadium steels, chrome-nickel steels—to assure trouble-free, low-cost service for tens of thousands of miles.

5. Economical Nationwide Service, with its low flat-rate charges on labor and genuine parts, is available at 10,000 dealers throughout the country, who also offer the protection of the most liberal owner's service policy ever to back a low-priced car.

Chevrolet's Owner's Service Policy is the most liberal ever offered in connection with a low-priced car.

Remember—in addition to all these basic economies—Chevrolet offers the extra dollars-and-cents advantage of one of the lowest delivered prices on the market. And this cost may be spread over a period of many months by the liberal C.M.A.C. plan.

NEW CHEVROLET SIX

The Great American Value

New low prices—Chevrolet passenger car prices range from \$675 to \$680. Truck chassis prices range from \$355 to \$390. All prices f. o. b. Flint, Mich. Special equipment extra. Low delivered prices and easy terms.

 7 p. m.: Junior Epworth League meets in the parsonage reception parlor.

7:15 p. m.: Hi Epworth League meets in the church auditorium.

7:45 to 8:15 p. m.: Special Intermediate and Senior meeting conducted by Rev. H. L. Cochran.

8:15 p. m.: Preaching service. Sermon by Rev. H. L. Cochran. Music directed by Rev. Cochran. At this service the Rev. Cochran will render a special vocal solo with violin and piano accompaniment.

B. M. Stradley, Pastor

The Presbyterian Church.

Dr. John V. McCall and wife are moving this week to Sanderson from El Paso. Dr. McCall will be pastor of the Presbyterian church and will preach Sunday at 11 o'clock. We welcome these good people to our town.

DRYDEN COMMUNITY CHURCH

B. M. Stradley, Pastor.  
 Services, Sunday, June 7:  
 Sunday afternoon, June 7, we will again hear Rev. H. L. Cochran in sermon and in song. Our services begin promptly at 3 p. m. Every Sunday afternoon at the Dryden Community Church building which is the old school house. This building has been overhauled, new doors and windows, new benches, and we hope soon a new piano will be provided for.

All denominations have joined hands and hearts that Dryden might have regular Sunday services. We have all our bills paid to date, and our pastor is paid a regular monthly salary, subscribed to by all denominations in Dryden, paying in the church budget regularly each month, or each week, and it seems at last our prayer will be answered that we have regular services in our community.

These services are arranged to meet the needs of a whole family worship service. Please come praying that Sunday's service with Brother Cochran with us will be a service of rich blessing to all attending.

—Church Council.

Mr. Chambers is also the authorized Frigidaire Service-Man and carries a full line of parts with him and is at your service day or night with the exception of Sunday.

### The Unchanged and Unchangeable Law of God

In a former article, in fact, in last week's issue of the Sanderson Times, attention was called, in the closing of said article, to God having given law and promises to all peoples of earth. There is one God. Necessarily, then, He would have one law—one government for His people. "The law was given by Moses, but grace and truth came by Jesus Christ." Jno. 1:17. Christ is greater than Moses and His law greater than the law of Moses. "Grace and truth" constitute the law of Christ. See Gal. 6:2. All people should be under the law of Christ. At the birth of the Christ there was also born a new hope. Christ grew to manhood and in Him many prophecies were fulfilled. Of Him Josephus the historian wrote, "Now there was about this time Jesus, a wise man, it is lawful to call him a man; for He was a doer of wonderful works, a teacher of such men as receive the truth with pleasure. He drew over to Him both many of the Jews and many of the Gentiles. He was (the) Christ. And when Pilate, at the suggestion of the principal men amongst us, had condemned Him to the cross, those that loved at the first did not forsake Him; for He appeared to them alive again the third day; as the divine prophets had foretold these and ten thousand other wonderful things concerning Him. And the tribe of Christians, so named from Him, are not extinct at this day." Hist. of Josephus, page 535.

This confirms Acts 11:26; 26:28. The man who follows Christ is lead to be a Christian and to live the Christian life.

If a man can not today live a Christian life, as some affirm that he can't, then we have the wrong book. Who will affirm that we have the wrong book? I affirm that we can and must live a Christian life.

R. E. GRIFFITH.

For Rent—A five room house, good location.

2tpd B. M. Doak.

Mrs. W. E. Lea and children spent the week-end in Del Rio visiting relatives.

—FOR SALE—A dandy five burner oil range with built-on oven. Will take half price. Call Mrs. C. C. Chambers at Dryden.

Mrs. Herbert Buchanan left last Saturday for Cleveland, Ohio, where she went as a delegate to the National Convention of the Ladies' Auxiliary to the B. of L. F. & E.

Today! see the greatest improvement in hosiery in 10 years!

You'll hardly believe your eyes! No stocking you've ever worn has looked so beautifully sheer—or made your ankle look so beautifully slim! And these Phoenix dill stockings wear much longer! For evening and daytime wear in the newest shades.

\$1.95 \$2.50 \$2.95

Here are some of the essentials to smart and servicable hosiery:

- All parts subject to wear are well reinforced. Slenderness and snug fitting.
- Their weave is crystal clear and flawless. Slenderized and pointed heels.
- Particularly lovely new shades.

# "I'll Call Her Old Glory!"

FAMILY OF CAPT. DRIVER'S MONUMENT IN OLD CITY CEMETERY, NASHVILLE, TENN.

By ELMO SCOTT WATSON

THE American flag, whose birthday we celebrate on June 14, is known by a number of figurative names. It is probable that it was called "The Red, White and Blue" or "The Stars and Stripes" very soon after the first flag was made in accordance with the resolution passed by the Continental congress on June 14, 1777. "That the flag of the United States be 13 stripes, alternate red and white; that the union be 13 stars, white in a blue field, representing a new constellation."

The name "The Star-Spangled Banner" dates from 1814 when Francis Scott Key, watching the British bombardment of Fort Mifflin, was inspired to write the poem which was later set to music and became the official national anthem. But the name "Old Glory" is a more recent one. It was just a hundred years ago that a Yankee skipper had the inspiration which resulted in that affectionate name being bestowed upon our national colors. Here is the story of how "Old Glory" got that name:

From the beginning of New England maritime history the Driver family of Salem, Mass., had been leaders in the shipping trade, not only as shipbuilders but as owners, captains and sailors of their own vessels. In the year 1831 Capt. William Driver was carrying on the family tradition. As a boy of twelve he had shipped on a sailing vessel for Europe and before he was twenty he was master of the brig, Charles Baggett, one of that invulnerable fleet which sailed the Seven Seas and carried the name of Salem to every corner of the earth.

In September of that year Captain Driver was preparing to sail for a trip around the world. Just before leaving a party of his friends gathered to present him with a farewell gift, an American flag, because he was noted for his love for the national colors and what they betokened. Captain Driver was on deck to receive them and a sailor, carrying the flag, folded in triangular form, stepped forward and began a carefully memorized speech.

"In ancient times, when an ocean voyage was looked upon with superstitious dread," he said, "it was the custom on the eve of departure to roll the banner in the form of a triangle. When ready the priest stepped forward and taking the banner in hand, sprinkled it with consecrated water and dedicated it to 'God the Father, God the son and God the Holy Spirit,' turning the point of the triangle upward at the name of each, thus calling on that unity of Creator, Redeemer and Sanctifier to bless the national emblem and prosper the voyagers and their friends. The flag thus consecrated was then hoisted to the masthead."

He then adjusted the flag to the halyards and hoisted it to its position at the masthead. Captain Driver, overcome with emotion, was silent for a moment. Then as he looked aloft and saw the flag which he loved so well floating in the breeze he exclaimed: "I'll call her Old Glory, boys! Old Glory!" And thus was the Amer-

ican flag christened with a new name for he was the first to use that name and by no other did he ever refer to it.

The voyage which was thus so appropriately inaugurated carried the original "Old Glory" into many harbors throughout the world and into even more during the next six years while Captain Driver sailed the seas. During one of his voyages into the Orient he had made a camphorwood sea chest, brass-bound and decorated with nailheads, in which he placed the original "Old Glory" when it was not floating at the masthead of his ship. And this flag had an even more thrilling later history than its early one.

In 1837 Captain Driver retired from the sea and went to Nashville, Tenn., to make his home, but when he sold his ship he did not sell "Old Glory." Safe in its camphorwood chest it went to Tennessee with him. On patriotic occasions and on his own birthday—St. Patrick's day, for he was born March 17, 1803—it was taken from the chest and hung to the breeze for all to see and to reverence. And Captain Driver invariably saluted it with these words, "My country, my flag—Old Glory!"

As the dispute between the North and South became more intense and the Civil war drew nearer and nearer, Captain Driver became increasingly unpopular with his neighbors in Nashville because of his outspoken devotion to his country and his flag. During the Presidential campaign "Old Glory" was displayed on a rope stretched from his home to a tree across the street but the bitterness of that campaign brought to Captain Driver's ears unmistakable hints that his flag might be stolen or destroyed, so he bought another flag for display and retired "Old Glory" once more to its camphorwood chest.

After the secession of Tennessee from the Union, the captain began to fear for safety of his flag at the hands of the Confederates. So he took it by night to the house of a Union sympathizer named Bailey and asked Mrs. Bailey and her daughters, Mary and Patience, to hide it for him so that it could not be found and destroyed if the Confederates searched his house. At the time Mary and Patience Bailey were making a comfort, padding it heavily with cotton, and thus suggested an ideal hiding place. So Captain Driver folded "Old Glory," placed it between the layers of cotton in the comfort where the Bailey girls tucked it in and sewed up the outside covering. Again at night Captain Driver took the comfort to his home and placed it in a large iron wash kettle in the attic of his home.

There "Old Glory" stayed until Union troops occupied Nashville in February, 1862. Immediately thereafter, after Captain Driver and a group of soldiers ripped open the comfort, took out the flag and hoisted it over the state capitol to the strains of "The Star-Spangled Banner," played by a regimental band. It remained there for hours, but so fearful was Captain Driver that his flag might even then be injured by a hostile hand that he stood guard over it day and night. In the morning "Old Glory" was taken down and replaced with another Amer-

ican flag. By this time it was very old, much worn and the captain feared that a strong wind would whip it to pieces.

After this "Old Glory" was always kept in the captain's house and late in his life he gave it to his daughter, Mrs. M. J. Roland of Nevada, where, so far as is known, it still is. In 1907 the flag had become so worn that Mrs. Roland placed it on a piece of sheeting and stitched it fast to the cloth to preserve it for future generations of the family. Captain Driver died March 2, 1880, and was buried in Old City cemetery in Nashville.

Just as it was a Yankee sea captain which gave to our flag its name of "Old Glory," so it was that another Yankee—a soldier, instead of a sailor, however—who took another "Old Glory" on one of the most romantic expeditions in our history. Bates was his name and he had served as color sergeant in the Twenty-fourth Massachusetts regiment during the Civil war. In 1872 Color Sergeant Bates had an idea which he proceeded to put into effect in a dramatic fashion.

At that time there was much talk in this country of the hostility of Great Britain toward the United States. Determined to find out for himself whether this talk was fostered by politicians for their own selfish ends or was a genuine antipathy, Bates resolved to cross the Atlantic, start from the northern border of England and march to London bearing aloft an unfurled American flag just as he had done on the battlefields of 1861-65. His reception by the people of England would show whether or not there was any foundation for this talk of John Bull's hostility toward Uncle Sam.

Cloth in his uniform of blue, Sergeant Bates on November 5—Guy Fawkes day and the anniversary of the Battle of Inkerman—left Edinburgh for Gretna Green. At Sark bridge on the border line between Scotland and England he unfurled "Old Glory" and stood beneath it with uncovered head. Then he started on his march. That evening he tramped into Carlisle where a group of commercial travelers at the Bush hotel gave him a hearty welcome. More than that; they set word on ahead of his strange pilgrimage and when he came to the mining towns of Penrith and Shap, great crowds of miners were on hand to cheer him.

The warm welcome given Bates there was repeated in every place through which he traveled.

The London daily press gave much space to the American soldier on December 2. A dense mass packed the Guildhall yard, where a British sergeant was carrying the English standard. Bates was borne on the shoulders of men into the crowded Guildhall, and then back to the carriage, from which he made a speech before refurling his flag.

Bates' reception in London was the crowning touch to his pilgrimage. There was no longer any doubt of John Bull's friendliness toward Uncle Sam, at least so far as the common people of England were concerned.

## Delay in Immunizing Hogs May Be Costly

### It Should Be Done Shortly After Weaning Pigs.

(Prepared by the United States Department of Agriculture.)—WNU Service.

The objection of many farmers to having their swine herds immunized against hog cholera on account of cost comes principally from those who wait until the hogs are full grown before using the treatment, says Dr. T. P. White, of the division of hog-cholera control, bureau of animal industry, United States Department of Agriculture. In sections where hog cholera is more or less prevalent year after year, Doctor White adds, the serum treatment is the only safe method of protection. In those localities the immunizing of the herd should be a regular practice just as castrating, docking, dehorning, and other common livestock operations. As in the case of those operations that are practiced early in the life of the animal, it is preferable to immunize early.

In experimental tests and under certain field conditions pigs a few days old have been immunized against hog cholera. In general practice, however, opinion seems to favor immunization not long before or soon after weaning. Even at that period, when the pigs may weigh from 50 to 40 pounds, the amount of serum and virus necessary to confer immunity are much less than for grown hogs. The cost is correspondingly lower, a pig of that age requiring in some cases only a third of the expense necessary to treat a full-grown hog. Also the veterinarian finds it easier to handle young pigs. If a young pig dies the loss is small compared with that of a larger hog.

## Pure Bred Sire Signs Popular With Stockmen

In conducting the "Better Sires—Better Stock" campaign in co-operation with the states for the improvement of domestic live stock, specialists in the United States Department of Agriculture have observed the evidence of unusual interest of farmers and stockmen in the lithographed barn signs being offered to persons who are improving their herds with pure-bred sires. The department regularly grants certificates of recognition to these progressive stockmen, and, on request, also furnishes a barn sign, measuring 10 by 14 inches, bearing the words "Pure Bred Sires Used Exclusively on This Farm." Enrollments received in the campaign in March showed that 71 per cent of the stock owners requested these signs in addition to the regular certificates. The sign is printed on heavy weather-resistant cardboard and is lithographed to resemble a bronze tablet.

A recent development in the campaign for pure bred sires is the interest which several county agents and live stock specialists have shown in holding meetings and distributing the signs to stock owners qualifying for them.

## Bees Get Pollen From Different Forest Trees

Many forest trees are as valuable to beekeepers for their pollen as for the nectar of their flowers. Without pollen, for which no satisfactory substitute has been found, bees will fail to raise new brood. Pollen furnishes meaty, nitrogenous elements in the diet of the larvae. The barely noticeable flowers of many trees are often rich in pollen, as well as in nectar. Willows, maples, black locusts, tulip or yellow poplar trees, tupelos, basswoods, sour gums, and wild plums are important sources of both pollen and nectar. Elms and aspens are also pollen producers, although not considered to be nectar plants. The presence of certain hardwood pollen-bearing forest trees thus becomes an important consideration in the choice of sites for apiaries.

## Blueberry Crop

Blueberries are much less perishable than any of the bramble berries or strawberries. They do not have to be picked often, often once a week and can be shipped long distances without refrigeration. So far the large-sized cultivated berries have sold at attractive prices. To a certain extent this is due to their scarcity and novelty. Picking costs are somewhat less than with wild fruit due to the large clusters. Ordinarily they will be grown nearer a supply of pickers, an advantage over the wild fruit.

## Farm Hints

Timothy and alsike clover can be sown successfully up to October 1.

Trees may be used to good advantage on bits of land unfit for cultivated crop.

One hour out of every ten that the tractor is used should be devoted to keeping the machine in good condition.

Losses of seedlings on land that is not adapted to alfalfa is what makes alfalfa expensive. Be sure your land has enough lime.

When plants "run out" blame it on some virus disease. You control such diseases by roguing and by planting susceptible crops far enough away from host plants carrying the disease.

## Improved Uniform International Sunday School Lesson

### Lesson for June 7

#### JESUS CRUCIFIED

**GOLDEN TEXT**—But he was wounded for our transgressions, he was bruised for our iniquities; the chastisement of our peace was upon him; and with his stripes we are healed.

**LESSON TEXT**—Luke 23:33-46.

**PRIMARY TOPIC**—Jesus' Death on the Cross.

**JUNIOR TOPIC**—Jesus Taking the World's Guilt.

**INTERMEDIATE AND SENIOR TOPIC**—What We Owe to the Lord Jesus.

**YOUNG PEOPLE AND ADULT TOPIC**—Love's Supreme Sacrifice.

I. The Place of Crucifixion (v. 33). They led Jesus away to Calvary, a hill north of Jerusalem resembling a skull. Calvary is the Latin word and Golgotha is the Hebrew. This is a most significant name for the place where man's redemption was accomplished. The skull is an apt picture of man's condition as the result of sin—life and intelligence gone, leaving only the dark empty cavern which once contained them. Jesus was not crucified in the city for he was to suffer without the gate (Heb. 13:12).

II. His Companions on the Cross (v. 33). Two malefactors were crucified with him. This was in fulfillment of the Scripture, "He was numbered among the transgressors" (Isa. 53:12). He was sinless, but became sin for us.

III. His Forgiving Love (v. 34). He cried, "Father forgive them." He not only had in mind the soldiers who acted for the government, but the Jews who in their blindness were ignorant of the eternity of their crime.

IV. The World Revealed (v. 34-43). Jesus Christ on the cross is the supreme touchstone of human life. It is at the cross that the world's heart is revealed. Take a cross section of the world at any time since Christ was crucified, and representatives of the various classes therein were found around Jesus on the cross. In a real sense the cross is the judgment of this world (John 12:31).

1. The Covetous (v. 34). They gambled for his seamless robe right under the cross where he was dying. This represents those whose primary interest in Christ is a means to get gain. If they had had eyes to see they could have beheld a robe of righteousness being provided in his death to cover their sinful nakedness.

2. The Indifferent (v. 35). "The people stood beholding." They gazed upon him with indifference. The great mass of the world still gazes upon the Crucified with stolid indifference.

3. The scoffers (v. 35-39). a. The rulers reviled him for his claim to be the Savior (v. 35). They wanted a savior but not a crucified savior. Many today are religious but have only contempt for a salvation which centers in an atonement made by blood. They uttered a great truth when they said, "He saved others, let him save himself." He could not save himself and others, because God's plan was to save others by giving himself.

b. The soldiers reviled him for claiming to be a king (v. 36, 37). The title "King of the Jews" had been placed over him in bitter irony, but it was true, for, by right of the Davidic Covenant he shall one day be King over Israel (II Sam. 7:8-16). Through his death he came into the place of Lordship over all who will acknowledge him. The fact that the super-scription was in Greek, Hebrew, and Latin shows that he was to be King over all the world.

c. The impatient malefactor (v. 39). This brutal man joined in reviling the Savior, even though he personally was under condemnation.

4. The penitent malefactor (v. 40-43). This conscious sinner who discerned the heart of the Savior prayed for mercy. He saw that the dying man was the forgiving God. The fact that he acknowledged his sin as against God showed that he was penitent. His request for Christ to remember him when he came into his kingdom shows that he recognized that the One who was dying on the cross was making atonement for sin and that he would one day come to reign as King. The salvation of this penitent thief was immediate. Christ said, "Today shalt thou be with me in paradise."

V. The Death of Christ (v. 44-46). So shocking was the crime that nature herself threw around the Son of God a shroud to hide him from the godless crowd. Darkness was upon the land at noonday. When the price of sin had been paid, he cried with a loud voice, showing that he still had vitality, that his death was not through exhaustion but by his will.

## HEALTHY COMPLEXIONS

Healthy complexions come from healthy systems. Free the body of poisons with Feen-a-mint. Effective in smaller doses. All druggists sell this safe, scientific laxative.

## WINTERSMITH'S CHILL TONIC

For over 50 years it has been the household remedy for all forms of Malaria Chills and Fever Dengue. It is a Reliable, General Invigorating Tonic.

Getting Out of It  
Federal Judge Anderson said of a suspicious failure:  
"When a man falls like that I always think of a millionaire named Hank."  
"Hank was talking about his past one day. He said:  
"Yes, that concern was shady. As soon as I realized it was shady I got out of it."  
"He puffed on his cigar a minute. Then he said:  
"I got eighty thousand out of it."

## Ride the Interurban FROM Houston to Galveston

Every Hour on the Hour  
Express Service—Non-Stop Trains  
9:00 a. m. and 3:00 p. m.

Substantial Building  
Engineers estimate that the new Empire State building in New York city, the tallest so far constructed, can withstand 4,250,000 pounds of pressure, a greater pressure than has been exerted by any recorded earthquake.

## DO YOU FEEL DIZZY, UPSET?

Is your tongue coated, your appetite off, your head dizzy and your stomach upset? Just take St. Joseph's Lax-ana (double strength) tonight and jump out of bed tomorrow feeling fine and fit. Lax-ana is great. It acts as a Laxative, Tonic and Appetizer, and brings overnight results because it is double strength. All drug stores sell St. Joseph's Lax-ana on a money-back guarantee.

## LAX-ANA DOUBLE STRENGTH

Hard to Find  
"What's the matter with the girls?"  
"They want some girlish girl to take a girl's part in the college play."

## BUILD UP TO PREVENT PAINS

How a Missouri woman was benefited by taking Cardui is described below by Mrs. Joe Schumier, of Cape Girardeau: "I suffered with irregularity. For weeks at a time I was so weak I could not work. I had aches in my back and head and legs—I ached all over. I would get dizzy and feel faint. I had read about Cardui, so I got some and took it. I improved a great deal. After I had taken four bottles, I felt like a different person."

W. N. U., HOUSTON, NO. 23-1931.

**PRINCESS THEATRE**

SANDERSON, TEXAS  
HOME OF THE BEST IN TALKING PICTURES

SATURDAY, MONDAY, June 6, 8

George Bancroft in

**"Derelict"**

The picture with a thrill a minute featuring the screens most popular portrayal of hard boiled underworld parts.

TUESDAY AND WEDNESDAY, June 9, 10

Richard Barthelmess in

**"THE LASH"**

See the stupendous stampede of a thousand steers! see the burning of villages, the plundering of ranches! See Dick as a cattle thief—and lone thief! See the greatest of all Barthelmess hits. You'll never forget it. He aims to thrill—and hits!

THURS. AND FRIDAY, June 11, 12

Dorothy Mackaill in

**"KEPT HUSBANDS"**

Listen! All you men! Are you slaves or husbands? Are men going soft? Selling body and soul in marriage? 1931 marriage with smashing 1932 punch.

**::CHOICE FRYERS::**

--Barbecue Every Day--

Fillet of Haddock every Wednesday

And the best of meats at the lowest Prices

Fair Maid Bread and Cakes

**Cooke's Market**

Phone 94

The many friends in this city of Miss Helen Watson will be glad to learn of her being elected to teach in the Alpine schools next year.

Among those who attended the Babb-Locke wedding Sunday at the First Methodist Church were Mr. and Mrs. John T. Edwards and daughter, Mary Bell of Marathon.

**Cemetery Association Meeting**  
Friday, June 5th at 4 p. m., there will be a meeting of the Association to transact some important business. Reader please take notice and be present.

The Cemetery Association hired me to water the Association's trees only.

Those having individual trees must either see after their own trees or arrange with me to do so.

It is not my duty to see after filling graves.

R. E. GRIFFITH

Mrs. A. H. Utterback has arrived from Sweetwater to visit with her son, Dr. A. P. Utterback and family.

Mr. and Mrs. John F. Nichols are spending this week with Mr. and Mrs. Joe F. Brown at their ranch.

Mr. and Mrs. C. P. Peavey and baby were Marfa visitors Sunday.

Mrs. E. I. Ricks of Alpine visited with her brother Joe Nance and family several days this week.

Miss Mary Lois Whitten of Merten visited at the Bud Holmes ranch the past week.

**James House's SELF SERVICE GROCERY**

Don't fail to see our Complimentary Picture every Friday and Saturday at Princess Theatre
