Two Prisoners Break Jail Here Are Recaptured

Hopmeyer and Elliott Attempt Getaway Sunday

Sunday afternoon as W. D. Hunter, deputy sheriff, went to feed the prisoners confined in the jail here, two of them, Harry Hopmeyer and Claude Elliott, over-powered him taking his watch, \$10 in money and his pistol. They then locked him in the woman's cell and also tied and gagged Ivey Rankin Bostick, another prisoner then made their escape in Mr. Hunter's Dodge coupe. Mr. Hunter soon attracted Tom Stovell's attention and the alarm was spread and he was finally released from jail.

Officers in Del Rio, Fort Stockton, Marathon and Alpine were notified of the jail break and asked to watch all roads leading into their towns. A posse of citizens, led by Captain W. L. Barier, soon gave chase. Upon making inquiries from tourists they learned that the men had gone on U. S. Highway No. 90 going west toward El Paso. In fact as the men had passed thru Longfellow they had attempted to stop a tourist but failed. The tourist hastened into town and reported the incident thinking they were bank robbers.

As the escaped men passed through Marathon Ranger Earl Young and C. W. Wilson, who owns a filling station there, tried to stop them. Failing to do so they commenced to shoot at the car, hitting a tire and this caused the men to have to stop about a mile the other side of the town. They offered no resistance when the officers came up to them. They were returned here to jail about 7 p. m. by Captain Barier. Monday they were given an examining trial in Justice Court and were bound over to await the action of the grand jury on charges of jail break, robbery by firearms and theft of an automobile.

While being returned here the two men stated to Captain Barier that Bostick planned the jail break and that at the last minute backed out and had them to tie him and put a gag over his mouth. Hopmeyer also started to shoot Mr. Hunter but was prevented in so doing by Elliott. They also stated that they stopped at the Dry Valley filling station, bought gasoline and cold drinks then divided what money they had left. Somewhere between here and Marathon they said they threw the keys to the jail from the car. As yet the keys have not been found. The officers however believe that the men could find the keys if they wanted to. Since their jail break they are kept in solitary confinement and now it is impossible for them to escape. Their food is handed to them through the bars and the officers are not taking any chances on them attempting another such stunt.

The jail break is one of the most daring that has ever taken place here.

Miss Berthamie O'Bryant is visiting relatives in San Antonio.

Contract Let For Airport Improvement

Del Rio Firm Awarded Contract. To Start Work Soon

The Southwest Construction Company of Del Rio has been awarded the contract for the erection of several buildings and making other improvements at the Dryden airport.

An operation office will be constructed of hollow tile and will be modern in every respect. There will be no admission and have all conveniences. A pump house to be used for an electric gasoline pump and a generator room which will be used for two different power units, will also be constructed. A 12,500 gallon gasoline storage tank will be erected on concrete piers, with a pipe line going 115 feet out into the flying field and 150 feet of gasoline hose to be used for servicing of air crafts will be among the other improvements to be at the airport.

Recently two 80 foot radio towers were erected and a first class radio equipment was installed for sending and receiving messages and this has added much to the airport.

The officers in charge are trying to make the airport first-class and are glad to announce that the above improvements are to be made.

The airport has been of great importance to aviation, due to the fact that it is almost the halfway point between San Antonio and El Paso, and now that it is to be improved many more aircrafts will be through here. It is planned to have the work completed in sixty days.

NEW MINISTER ARRIVES

Rev. and Mrs. John V. McCall arrived in Sanderson last week, Dr. McCall having accepted a call to the Presbyterian church here. For the past seven years he has been pastor of the Eastminister Presbyterian church in El Paso.

The first service was held Sunday morning, the pastor preaching from the text, "I ask therefore for what intent ye have sent for me?" Acts 10:29. No service was held Sunday but the congregation worshipped with the Methodist friends.

On next Sunday morning Dr. McCall will preach on "Isaiah's Vision of God."

The McCalls have had a cordial welcome to Sanderson. Besides a well filled larder, they have received many courtesies from members and friends and are deeply grateful for all these kindnesses.

They hope to see the work of the church develop along all lines.

Mrs. Honston Vickers and baby, and brother, Grady Lester of Robstown are visiting their sister, Mrs. Fred Talbot and brother, George Lester.

Miss Nannie Blackham of San Antonio is visiting this week with her aunt Mrs. W. D. O'Bryant.

Ms. and Mrs. John O'Dell and family visited with relatives and friends in Alpine, Fort Davis and Balmorhea last week. They attended a family reunion at Balmorhea at which there were 42 present. Miss Iris Newman their cousin accompanied them.

Famous Painting Will Be Shown Here

Valued at \$75,000 and Represents 22 Years Work

Dr. J. Rembrandt, 7th lineal descendant of the Dutch artist, Rembrandt, will show his famous painting, "The World's Greatest Tragedy," on Thursday, June 18 at 8 p. m. at the high school auditorium.

The painting which is valued at \$75,000 and represents 22 years of labor, depicts Christ just before he is nailed to the cross and crucified.

Dr. Rembrandt will show the painting under flood lights and explains each character in it. It is one of the world's greatest paintings and is on a canvas six by eight feet.

All churches in the city and the school officials are sponsoring this famous painting. Every citizen is asked to come and see charge.

Cochran Revival Meeting Comes to a Close Monday Night

Sunday evening, June 14th, at the First Methodist Church, Rev. H. L. Cochran, who has been in Sanderson for the past two weeks preaching and singing at the First Methodist Church, will deliver the last message of the meeting at 8:15.

Rev. Cochran has many friends in Sanderson who have heard him through two weeks revival meetings, preaching twice daily, and who are always glad to see him in Sanderson.

Rev. H. L. Cochran has one of the best gospel voices in the south today and is one of the most popular radio gospel singers.

The following services will be held Friday, Saturday and Sunday:

Friday, June 12th, preaching by Rev. H. L. Cochran, 10 a. m., Junior Group service 3 p. m.

7:45 p. m., Intermediate and Senior Group in the Parsonage Parlor. Prayer service by Rev. H. L. Cochran.

7:45 p. m., in the church, a prayer service conducted by pastor.

8:15 p. m., preaching by Rev. H. L. Cochran. Special vocal solo by Rev. H. L. Cochran.

Saturday, June 13th, there will be only the evening services as follows: 7:45 p. m., Intermediate-Senior Group at the parsonage in a prayer service conducted by Rev. H. L. Cochran.

7:45 p. m., prayer service at church conducted by the pastor.

8:15 p. m., preaching and special vocal solo by Rev. H. L. Cochran.

Sunday, June 14th, Rev. H. L. Cochran or the pastor will preach at 11 a. m., and Rev. H. L. Cochran will preach and sing at the 8:15 p. m. services.

All the other regular services will be held as usual.

Mr. and Mrs. M. P. Lester and son are visiting relatives in Cuero and Robstown this week.

Mrs. George Brockman and son of San Angelo are visiting with Mr. and Mrs. Russell Menzies at their ranch.

Several from here attended the baseball game in Del Rio Sunday that was played between the Cowboys and Billy Disch's Longhorns.

Miss Mirian Carpenter came in last Saturday from Abilene where she has been a student at the Christian College and will spend the summer with her father, G. W. Carpenter.

Order Eastern Star Installs Officers

Installation Held in Masonic Temple Saturday Night

The Sanderson Chapter No. 136, Order of Eastern Star, held their installation of officers in the Masonic Temple Saturday, June 6, 1931. The Chapter room was attractively decorated in varied colored flowers and ferns. Flowers and gifts of appreciation were presented the outgoing officers.

The officers installed were: Rosa Parson, Worthy Matron; G. J. Henshaw, Worthy Patron; Annie Ware, Associate Matron; H. D. Williams, Associate Patron; Onah Johnson, Secretary; Ida Bodkin, Treasurer; Calista Nance, Chaplain; Mora Cochran, Marshal; Ima Wilkinson, Organist; Sallie Adams, Adah; Johnnie Williams, Ruth; Sybil Savage, Esther; Lula Mae Brown, Martha; Gladys Bogusch, Electa; Dolly Dyer, Warden; Ruel Adams, Sentinel.

S. C. Bodkin was the installing officer. —Contributed.

RODEO PLANS ARE COMPLETED

The stage is all set and every thing points to one of the best and biggest rodeos that has ever been held here when on next Friday and Saturday the American Legion will put on their rodeo.

This week some of the wildest steers, fastest goats, and the toughest horse flesh to be found has been gathered and are already here or will be here in time to give the boys a ride for their money.

Some of the best riders, goat ropers and bulldoggers will be here and cowboys have already begun to gather here for the event. George Adams the oldest cowboy in Texas will be here and will take an active part in the parade and rodeo.

ED DOWNIE ILL

Ed Downie, former Terrell county ranchman and resident of this city has been seriously ill at his home in San Antonio the past week. Relatives and close friends have been summoned to his bedside and for several days his condition was serious. Thursday word was received that he was some better.

Bob Dickens of Carrizo Springs has accepted a position in the James House self service store.

D. W. Shaw of San Diego, California, enroute to his home in Harlingen for a visit with relatives, visited in the home of Mrs. Mary Lou Kellar several days the past week.

Mr. and Mrs. John R. Taylor and Mrs. A. Burdwell and son John Taylor, returned Wednesday from an extended trip to the Pacific coast. After leaving Sanderson their first stop was Phoenix; from there they went to San Diego and then to Long Beach, where they took boat to Catalina Island, and returned home by way of Salton Sea. They report a most delightful trip.

Trans-Pecos Developing Co., Starts Drilling

Well to Be Drilled at Least 3000 Feet

The Trans-Pecos Developing Company has contracted with a large constructing firm at Marfa to drill a well in Terrell county. C. M. Cowden of Marfa will be the drilling contractor. This company is getting things in fine shape under the new management and will resume work July 15 at the Trans-Pecos well in this county, and figure on hitting oil at 3600 feet or if not will go to a depth of 5000 feet. The many difficulties that have beset this company will soon all be straightened out and the company will go ahead with regular work.

Several head men of the Trans Pecos Development Company will be here soon from California.

WEDDING ANNOUNCEMENT

Mrs. W. A. Lyon announces the engagement and approaching marriage of her daughter, Inez St. Cloud to Mr. John Harold Anderson of Baytown. The marriage will take place at St. Mark's Episcopal church on Saturday, June 20.—San Marcos Record.

Miss Lyons was a popular member of our school faculty about four years ago and has many friends in this city who extend to her congratulations and best wishes.

Dryden Airport News

The other day two Naval Flyers landed at the Airport to refuel and while waiting a small group of people from Dryden gathered around. One of them happened to notice on the sides of the Aircraft's U. S. S. Arizona and proceeded to ask the flyers what part of Arizona did they hail from. As it happened the Aircraft was from the Battle Ship Arizona and so the Naval flyers had their laugh.

During the past two months flying thru this country has been very little, due to most of the Air Corp posts getting ready for the long flights in the North and East. Since they have all returned flying is being increased.

As soon as the electric pump is installed at the Airport Dryden will see a good many more Aircrafts land at its Airport than it has before.

During the past week the following Aircrafts landed at this Airport:

Lt. Bowden pilot with an enlisted mechanic as passenger, at this Airport and later departed for their home station at Kelley Field.

Lt. Hix, pilot, with an enlisted mechanic as passenger landed at this Airport and later departed for their home station at Dodd Field.

Lt. Fritch, pilot from Brooks Field landed and refueled at this Airport and later departed for his home station.

Capt. Finter and Lt. Mowers each flying a training Aircraft to a National Guard unit in Colorado landed and refueled at this station.

Mr. Sgt. Earl Cooner of March Field, Calif., stopped and spent a few hours with St. Sgt. McCabe and wife Sgt. Cooper was motoring from March Field to San Antonio.

Miss Kathleen Sullivan, a student at Texas University, is home to spend the summer with her parents, Mr. and Mrs. P. F. Sullivan.

T. & N. O. Railway Lays New Steel

Road Bed and Bridges Improved West of Here

New steel has been laid on the tracks of the T. & N. O. west of here and for several weeks extra bridge gangs have been busy making improvements on the road bed. Bridges have been strengthened and adequate drainage ditches constructed along the right-of-way in preparation for the increased tonnage per train to run over the improved tracks.

Last Friday, the work train was put on to pick up all the old steel between here and Valentine.

New steel will be put from Del Rio east into San Antonio and extra gangs are now working there.

When the improvements and construction program has been finished the T. & N. O. will be able to run longer and heavier locomotives over the road.

TERRELL COUNTY OIL NEWS

By J. Calvin Stansell

News has just been received from the Trans-Pecos Development's Keck Pecos Trust's Hamilton No. 1, oil and gas test on section 6, cert. 190, Georgetown Ry. Co. survey, in Cedar Springs block, to the effect that this well is drilling in full blast endeavoring to reach the deep sands of the Pennsylvania formation which in all probability will produce high gravity flowing oil in more than commercial quantities in the opinion of a large number of the leading present day geologists of considerable reputations.

It is reported that Mrs. Jessie McPhee has gone back to her home in California and has left her field man, land man, geologist and contractor on the ground at her newly selected location to see after all necessary work in connection with her test well.

Jones, et als, Pakenham No. 1, situated on survey 43 in block B2, C. C. S. D. & R. G. N. G. Ry. Co. survey, is reported to be drilling, working three shifts.

Reports from the other three wells testing the subsurface for oil and gas is not obtainable this week, but we hope to gather correct information by next week's issue of the press.

Quite a few geologists, paleontologists and mineralogists are now in the field in the western portion of Val Verde County, all of Terrell and that portion of Brewster County south of the railroad.

Another important find in Brewster County is some iron and copper ores containing cobalt and a white metallic element of the chromium group which a certain mineralogist classified as molybdenum. Molybdenum is used to make molybdic acid and is valuable as a laboratory reagent for phosphoric acid. It is also used in the form of ferromolybdenum to harden steel. Certain compounds of the metal is used in coloring pottery, fabrics, and in analytical chemistry. Molybdenum is considered to be very valuable. A prospector states that a high grade quality of the ore is probably worth forty dollars per pound, but its exact value may be ascertained from the Smithsonian Institute.

Miss Anna Mitchell, who has been attending S. M. U. in Dallas arrived the latter part of last week to spend the summer with her parents, Mr. and Mrs. J. C. Mitchell.

Have Proper Lighting in Living Room

Efficient Light for Reading.

(Prepared by the United States Department of Agriculture, in WNU Service.)

How often one goes into a home which is nicely furnished, well-arranged, and comfortable—except for the lighting! For a long time it was the custom to place a large center light in each room overhead and let every one use it to see what they were doing. It had to serve for reading newspapers, sewing, playing the piano, doing lessons, eating meals, dressing, cooking or washing dishes, depending upon the room and its purpose. Obviously several people in the same room could not all occupy good positions with regard to one overhead light, if, indeed, any of them did. Some would be in semi-shadow, yet unaware that they were straining their eyes and enjoying less comfort than they would have with light distributed to all parts of the room.

The essence of good modern lighting is to have your light concentrated where it illuminates what you want to see, without a glare. Correct lighting for one room differs from that for another. Buildings nowadays put several electric outlets in every room so that lamps may be attached in different parts of the room, and still be convenient when the furniture is rearranged. Even kerosene lamps can be placed on wall brackets and on stands wherever their light is wanted.

A very bright source of light, whether electricity, gas, or other illumination, should be shaded. Clear glass globes can be replaced by frosted ones which diffuse the light. Indirect lighting is successful in some rooms, but lamp shades that direct light downward and concentrate it where it is needed are more popular with night readers.

In the living room there may be occasional use for a large central light that floods the whole room, but many people at the present time do not have one. Instead they use wall lights supplemented by a number of well-shaded floor and table lamps placed where they meet different needs. A lamp near the piano, at the writing desk, close to the book cases, and by each chair used for reading or studying, gives well-balanced arrangement of light in a living room. The illustration, taken by the bureau of home economics of the United States Department of Agriculture, shows how comfortable and effective a well-shaded reading lamp may be when placed beside a roomy padded chair for reading. There is a bookstand close by which also serves as a small table for sewing, afternoon tea or for current magazines. The lamp is so placed that the light falls over the reader's left shoulder, and its shade is fitted to cast the light on one's book or work, never into the eyes.

partment of Agriculture, shows how comfortable and effective a well-shaded reading lamp may be when placed beside a roomy padded chair for reading. There is a bookstand close by which also serves as a small table for sewing, afternoon tea or for current magazines. To restore a white spot caused from heat, on a polished surface, rub lightly with alcohol. Bruised spots on dark furniture may be removed by rubbing with a walnut meat. Press the meat into the scratch or scar. If very deep, a bit of color may be needed to cover it.

In washing linoleum add a little vinegar to the water; it removes any grease that plain washing will not.

A salad may be made more attractive by dipping the fringed edges of the lettuce leaves into paprika.

When gum gets on the furniture, cover with a blotter and press with a hot iron. When in small daughter's hair, that is quite a different matter. Cover the spot with lard and carefully rub and wipe away with a cloth.

To remove varnish and paint from woodwork add two tablespoonfuls of lye to one quart of thick starch. Mix carefully and apply with a brush, using an old one. Leave on for forty minutes, then remove with cold water with an old paint brush. After allowing to stand for several days apply wood filler and varnish.

When food burns on granite or aluminum dishes, fill with cold water,

Evening Story for the Children

By MARY GRAHAM BONNER

THE PIG SCHOOL

The pigs all had their stone slates and their sharp stone pencils and were practicing their letters every little while.

They were writing beautiful big P's, for their family name, more often than any other letter.

Right on time came Peter Gnome, their teacher. He was wearing a tall green hat and green spectacles on his nose.

The gnomes had told him that his costume was rather gay for a teacher of pigs, but Peter had the idea that he must impress the pigs with cleanliness and attractiveness—for, as he so truly said, they would just as soon wear tall hats and tall boots of mud!

As for the fairies who came to see how Peter Gnome's funny school was getting along—they came dressed in soft gray dresses with gray wings and silver gray wands.

They had said they wanted to look like little school fairies.

Soon Peter Gnome began his teaching. All the little pigs stood up and recited in chorus the many wise things Peter had taught them all about; how clean and neat they should be in order to be thought well of—and to give people a different idea than that the very name of pig meant dirt and mud.

Then the pigs sang their school singing. Peter called it singing to encourage them.

But they often called it the Pigs' Bagpipe Orchestra. And some of the little pigs had become so proud of themselves since they had been going to Peter Gnome's school that they thought their squeals were every bit as good as some bands.

After that Pinky Pig got up and

with a very low bow said they would now give their one-act play for the benefit of the fairies, and in honor of their teacher, Peter Gnome.

Another pig waved a big, leafy branch before the fairies so that for a few moments they could not see what was going on.

Then the pig stopped waving his branch, and all the pigs came forth on a little stage made of moss.

They acted a very funny play called "Ham or No Ham."

Of course, they made Ham the villain of the play and No Ham was the

Then the Pigs Sang.

hero—the very finest pig in the school.

And they acted in such a funny way that the fairies were laughing almost every moment—until towards the end of the play they wept because Ham, the villain, was punished by being turned into a real ham for people to eat.

Oh, Peter Gnome's school was a great success for awhile. The pigs

enjoyed playing and writing their letters in mud.

But after a time it became too great an effort and the weather became so warm.

So Peter Gnome said they would all have a summer vacation. He was not sure whether he would continue the school in the fall.

The pigs, after all, didn't care so very much about being wise. And they said they had nothing great in the way of a career or future, so why go to so much trouble?

And there was good sense to that. Don't you think so?

Two Kinds of Ice Cream Easily Made at Home

(Prepared by the United States Department of Agriculture, in WNU Service.)

Here are two kinds of ice cream which may be new to you. Both are easily made if you have a freezer, and the ingredients can be obtained almost anywhere. The recipes are from the bureau of home economics of the United States Department of Agriculture.

Peppermint Ice Cream.

1 1/2 pint single cream, 1/2 tsp. salt

1/2 pint double cream, 2 drops essence of

1/4 cup sugar, 1/2 tsp. peppermint

Heat a half cupful of the single cream, add the salt and sugar, and stir until the sugar has dissolved. Mix with the rest of the cream and add sufficient coloring to make a soft green, and enough peppermint essence for delicate flavoring. Use a freezing mixture of one part salt and four to six parts of ice and turn the freezer slowly. After freezing, remove the dasher, pack the freezer with more ice and salt and let stand for an hour or more to ripen. Serve with hot chocolate sauce.

If a less rich ice cream is desired, use all single cream.

Peanut Brittle Ice Cream.

1 quart single cream, 1 1/2 to 2 cups of

1/4 cup sugar, 1/2 tsp. salt

Heat one cupful of the cream to the boiling point, add the sugar and the ground peanut brittle, and stir until well blended. Mix with the remaining cream, and the salt. Use a freezing mixture of one part salt and four to six parts of ice cream and turn the crank of the freezer slowly. After freezing, remove the dasher, pack the freezer with more ice and salt, and let stand for an hour or more to ripen.

Save Silk Underwear

Acids in perspiration weaken silk fibers and must be removed by frequent laundering if the best service is to be expected, advises the New York state college of home economics at Cornell university. When laundering use a mild soap, lukewarm suds, and rinse thoroughly in lukewarm water. Because glove silk underwear, no matter how it is washed or how good the quality, usually shrinks, buy a size which is large enough and pull it to the right size while it dries, they advise.

Helpful Suggestions for Homemakers

By NELLIE MAXWELL

"It has been said that a man is known by absorption, meaning that we can tell the quality and type of any one's life by the things he allows to absorb him."

To restore a white spot caused from heat, on a polished surface, rub lightly with alcohol.

Bruised spots on dark furniture may be removed by rubbing with a walnut meat. Press the meat into the scratch or scar. If very deep, a bit of color may be needed to cover it.

In washing linoleum add a little vinegar to the water; it removes any grease that plain washing will not.

A salad may be made more attractive by dipping the fringed edges of the lettuce leaves into paprika.

When gum gets on the furniture, cover with a blotter and press with a hot iron. When in small daughter's hair, that is quite a different matter. Cover the spot with lard and carefully rub and wipe away with a cloth.

To remove varnish and paint from woodwork add two tablespoonfuls of lye to one quart of thick starch. Mix carefully and apply with a brush, using an old one. Leave on for forty minutes, then remove with cold water with an old paint brush. After allowing to stand for several days apply wood filler and varnish.

When food burns on granite or aluminum dishes, fill with cold water,

add washing soda and bring to a boil. To keep cheese fresh, wrap in a cloth moistened with vinegar. This will also keep it from molding.

Home-made wall paper cleaner—Take a tablespoonful each of kerosene and salt, two tablespoonfuls of flour, two tablespoonfuls of ammonia and one-half cupful of warm water. Mix all together and boil until the flour is well scalded. Knead with the hands. Make a ball of the dough and use as an eraser on the wall paper to remove grease and soil.

Wall paper wrong side up makes good shelf covering. The leftover border may be used for an edge finish, if of the cut-out variety.

To keep starch from sticking when ironing add a bit of lard the size of a pea to a quart of starch while cooking.

When preparing bread for sandwiches cut off the end crust, spread the bread with softened butter, cut off the slice, spread again on the loaf, and cut the next slice, piling up the slices as they are cut. Wrap them and they are all ready to make into sandwiches with hot bacon or scrambled eggs when the serving time comes. The old-fashioned pies that mother used to make of leftover pastry crusts filled with all sorts of good things, make the best kind of pies to take on an outing. Little turnover pies was the name; they are not often seen today and are so good. Even the regular picnic fan does not enjoy the best pie if it is messy and crushed.

Grandmother's old remedy for colds has not yet been equaled. Twenty or thirty years ago we knew it was a good remedy, but did not know that there is an acid condition of the system with a cold and the acid of the lemon counteracts this acidosis. Use lemon juice in water, a whole lemon to a glass of water and a half teaspoonful of soda, at least three times during the day and stay in bed. Bed is the best place for anyone suffering with a cold. As colds are contagious, it is the safe thing to keep away from crowds, and keep warm. Eat fruit or very easily digested foods. With fever or severe cases of cold it is always wise to call a doctor.

Sheer Velvet for the Bride's Gown

By CHERIE NICHOLAS

Whether the summer bride be arrayed in traditional satin or the very new chalk white lace or the thin-sheer transparent velvet which is so beloved by the present generation, exquisite simplicity distinguishes her costume.

From her headdress and veil draperies to her bridal bouquet, every detail is made to emphasize sophisticated simplicity. In view of this fact the bride is carrying instead of the usual ornate shower bouquet, an armful of calla lilies whose chaste and classic lines add exquisite artistry to the picture.

The amazing sheerness and suppleness of modern velvet speak eloquently in its favor as a medium for the nuptial gown. It is ivory transparent velvet of finest texture which fashions the lovely wedding dress in the picture. The bodice of this softly draped frock is delicately embroidered with tiny rhinestones.

The tulle veil falls in classic silhouette from a simple band of pearls. The sleeves are long, almost completely covering the hand and the skirt is made to touch the floor in front, and the train is moderately long.

For the costume of the maid of honor, as portrayed in the center panel, soft orchid mousseline is the choice. It is made over a layer of self fabric, with blue crepe de chine slip which faintly tinges the orchid mousseline. Posed over this is a little jacket with triple peplums which are bound in orchid. The hat is of pale blue starched mousseline, with a band of orchid velvet tying in a flat bow in the back.

Gowns for the bridesmaid, a model of which is shown to the right, are made of starched mousseline in pale yellow. The fact that the mousseline is stiffened is significant in that it adds a sprightly touch which is charming. The princess bodice has a narrow tied belt of self material. It is embroidered with tiny rhinestones similar to the design which decorates the

bride's gown. The shoulder epaulet treatment is one of the attractive points of this frock. It consists of several petals which completely cover the shoulder.

The hat worn by this bridesmaid is of the starched mousseline, wide-

brimmed and very simple in outline as the picture shows. The bands which encircle the crown and tie in the back are of the same mousseline. Soft suede gloves and satin slippers in matching yellow are worn.

(© 1921, Western Newspaper Union.)

Slip Covers for Chairs, Good Protection

(Prepared by the United States Department of Agriculture, in WNU Service.)

Slip covers are attractive on bedroom chairs at any time. They protect the upholstery from dust and hard wear and provide variety in the room's decoration. In summer a crisp, fresh slip cover of semi-glossed chintz, gingham or percale, adds immeasurably to the impression of coolness and cleanliness of the room. In winter cretonne, terry cloth or rep, in warm colors, may be used to make the room

Slip Cover for Bedroom Chair.

appear comfortable, friendly and cheerful.

The type of slip cover shown in the illustration is suggested by the bureau of home economics of the United States Department of Agriculture as being suitable for a small upholstered chair in a bedroom. For removable covers or upholstery on small chairs, such as this one, choose material with a small design. Since the pattern in this material is an all-over one the cover can be fitted directly on the

chair. Pin all parts together and mark the seam lines with chalk or pencil. The seams in this cover have been finished with seam cording of the same material to give them a trim appearance. The little ruffle around the lower edge makes a practical and pleasing finish but it should be short enough to clear the floor at least two inches. Accurate stitching and good fitting are essential in making furniture covers, for loose slips soon wrinkle badly and look mussed and untidy.

As a slip cover of this kind is intended to be removed and washed occasionally it is made with a placket down the center back and closed with strong snaps. A sliding fastener could be used equally well. If preferred, either in the center back or in one of the seams joining the back to the sides.

Hints for Housekeepers

If your child dislikes eggs as eggs, try giving them to him in custards or egg-nogs.

Well-lighted rooms help to make a home cheery as well as healthful and efficient.

A closed, curtained shelf over the kitchen work table helps the housewife to save steps.

If you wish to iron a rough-dry garment in a hurry, dampen it with hot water, roll it tightly in a cloth and place it on a hot radiator or over the oven while the iron is heating.

Machines That Are Almost Human

By E. C. TAYLOR

The Thermostat

ONE of the most remarkable robots yet produced by scientists has stood guard for many years over the enormously valuable library of the pope in the Vatican at Vatican city, Italy.

It protects the unreplaceable books, documents and other treasures from the ravages of the weather and of time. It is on the job twenty-four hours every day, and since it first was given its instructions and put to work, it has performed its duties without once breaking down or calling for outside help.

The heart of this robot is a thermostat, a device that is highly sensitive to heat and humidity. It automatically controls the humidity and temperature in the pope's library and it has halted the deterioration that Rome's priceless books for centuries.

Rome is either very dry or very humid, very hot or extremely cold. These sudden changes and wide ranges of humidity and temperature were causing the library to crumble into dust.

The robot is set at the exact temperature and humidity that is best for the library, and when the humidity or temperature reaches beyond that point either way, the thermostat starts a "weather machine" that quickly brings the temperature and humidity back to where they should be.

The thermostat measures heat and cold and is highly sensitive to moisture in the air. It trips other machinery into action. In thousands of dollars throughout the country it is standing guard over the furnace, manipulating dampers and drafts to increase or diminish the heat as it is instructed to do. It has replaced thousands of men from watching boiling caldrons or vats.

The thermostat is used to turn on the phonograph, washing machine, electric lights, and perform many tasks heretofore trusted only to human beings.

The principle of the thermostat is used in the thousands of automatic refrigerators that have been installed in homes and that are used by food-packing plants.

A thermostat robot signals men in New York city to turn on the street lights when the city is about to be darkened by a storm.

The device is on the roof of a building where the street light controls are located. When an electrical storm is approaching the robot rings a bell to warn the operators to notify the electric generating stations to increase the power over the network of electric lines that carry current throughout the city.

This is done whenever a sudden storm brings on premature darkness, calling for more light than is ordinarily used.

A new development of the thermostat tells builders if their lumber is properly seasoned. It operates on the principle that the electrical conductivity of wood varies with its moisture content. Green wood or wood that is not properly seasoned has more moisture than properly seasoned lumber.

The device consists of a simple indicator and two contact points and a dial. The needle on the dial is set to show the range of moisture content that would be acceptable for the quality of lumber desired for the building operation. If the needle is deflected off the scale for which it is set when the test is made, there is too much moisture in the wood.

The device also is used by painters to determine if a house or other building can be painted after a rainstorm. It shows whether the wood is too damp to hold the paint.

The thermostat robot has a peculiar use in keeping billiard balls alive. Ivory billiard balls "catch cold" when subjected to a temperature of 50 degrees for only a few minutes, and their life is greatly shortened. They can live only three months after "catching cold."

The life of ivory billiard balls is five times as long if they are kept in a temperature of 70 degrees than if they are forced to live in a temperature of 60 degrees.

Man of Many Hobbies

John Vollmer, of Ashland, Pa., is a cabinet maker by trade. He also is the official clockwinder of Ashland. The number of hobbies he indulges in may set a record. By avocation, he is a chemist, botanist, archeologist, mineralogist, philatelist, photographer, beekeeper, gardener and astronomer. Only recently he erected a nine-inch reflecting telescope, through which all residents of Ashland were invited to take free glimpses at the moon. And he ground the lenses himself. His home is full of equipment and specimens gathered over many years. He has an excellent collection of Indian relics. And when he is not busy at any of these hobbies he likes nothing better than to whittle a pine board with a sharp penknife.—Indianapolis News.

Relics of St. Patrick

The greatest collection of St. Patrick's relics ever assembled will be brought to Ireland for the international exhibition to be held at Cork in 1922. The collection will be made from all parts of the world, as there are now few St. Patrick relics in Ireland.

Compass Leads Vessel Astray

Steamer Lost 15 Days in the Indian Ocean With Supplies Exhausted.

Cape Town.—Lost in the Indian ocean for 15 days with food and fuel exhausted, unable to make port owing to a faulty compass, was the experience that befell the steam trawler Fume, which arrived in Durban, after thrilling adventures, a short time ago. The Fume has already gained a wide reputation by the stories told of her by Commander J. E. Capstickdale, better known by the nickname of "Cappy Ricks," and her adventures on fishing expeditions to the St. Brandon group of islands, known as the "Isles of Death."

Can't Find Islands.

Describing the adventures of the trawler, the chief engineer, J. W. Nichols, said: "After steaming that distance in fairly rough weather we looked round for the islands and couldn't find them. We cruised about for three or four days, and the only conclusion we could come to was that we must make our way back to Port Louis."

"That was easier said than done. We could no more find Mauritius than we could the islands. I suggested that we try to find Reunion. We cruised around looking for Reunion in vain. "The bunkering capacity of the Fume is only 30 tons. Supplies would soon be running low, not only of coal but of provisions. Fortunately I had taken the precaution of securing ample reserves of fresh water and the Fume also had a good supply of ice aboard. Of her 30 tons of coal the vessel was using 3 1/4 to 4 tons daily.

"It was now our sixth or seventh day at sea, and we had not glimpsed land. The skipper decided we had better run for Madagascar, a big island and one that we could scarcely miss. We steamed west and west, but still caught no sign of Madagascar. It was clear we had come too far south. We then decided to steer due north, or as near due north as we could.

Sight Land at Last.

"By this time, in addition to rationing food supplies, it had become necessary to economize on coal. We were down to the last two tons. I started burning all the woodwork that could be spared, gratings, old stanchions, old charcoal, insulating out of the hold, and also one of the booms. Then we used up all the old sacks we could find, also any other rubbish that would keep the fires going.

"We were just on the point of burning the ship's boat when land was sighted after 15 days at sea. It was

Madagascar, but what part of Madagascar we know not. We sailed about 12 miles along the coast without seeing any sign of life, and then lay to for the night.

"Next day we veered towards the coast until about 2 p. m., when a small native boat put out from the shore. It was manned by about 20 natives. We asked how far off was Tamatave. None appeared to know such a place, but one who spoke a little French volunteered the information that the nearest place was Fort Dauphin, 70 miles southward. We put about and made for Fort Dauphin, using sail as much as possible to economize fuel.

Find U. S. Missionaries.

"Just off St. Luce bay the wind changed so we dropped anchor for the night. In the morning we sighted what we took to be Europeans dressed in white clothes, walking about the beach. We ran up the pilot's flag. Nobody appeared to take the faintest notice of that, so it was decided I should go ashore. I landed in the surf from our lifeboat only to discover that the people on the sands were young native girls from ten to fifteen years of age wearing white frocks and belonging to a mission station nearby.

"I followed them and came to the mission station, the occupants of which were two American women missionaries, Miss Owen and Miss England, who supplied provisions. A message was sent to Fort Dauphin, from where a cable was dispatched to Mauritius. "For five days Nichols had to kick his heels awaiting an answer. At last came the reply, but there still remained the problem of fuel to take the Fume to Fort Dauphin. Practically every ounce of coal had been used up. Natives were employed to cut down wood in the forest. This was green wood, and Nichols was not at all certain how it would go as fuel. However, a start was made and all went well, the Fume ultimately fetching up in the harbor of Fort Dauphin. The ship's trouble was a defective compass.

Health Official Claims Dirt Is Good for Babies

Detroit.—If the baby likes to crawl in the dirt and occasionally takes a bite of mud, let him alone, it's good for him, says Dr. Henry F. Vaughn, Detroit health commissioner.

"Let your children eat a little dirt now and then," Doctor Vaughn told an audience at the Child Health Institute. "Let them get their hands and faces dirty. The bacteria in all forms of dirt will help them build up immunity to disease.

"Of course, there is dirt and dirt. I don't mean to let babies come in direct contact with sick persons. But the ultra-immaculate mother who sterilizes her baby's toys and boils everything her baby will touch or play with is doing the child more harm than good."

MAY BE CANONIZED

Mother Elizabeth Seton, founder of the Sisters of Charity, who will be the first woman of North America to be canonized by the Roman Catholic church, if the petition signed by 100,000 Americans is granted by the pope, Mother Seton, who lived in New York and Maryland, was born near Bowling Green on August 28, 1774. She was a daughter of Dr. Richard Bailey, professor at King's college, now Columbia university, and first became interested in Catholicism while traveling in Italy with her husband, William Magee Seton, a wealthy shipowner. The school which she ultimately founded in Baltimore was the foundation of the parochial system in the United States.

Man Ships Glass Eyes to All Parts of the World

Denver.—Perhaps you need a glass eye. If so notify Conrad E. Biel. He has 80,000 of them, blue eyes, gray eyes, brown eyes, pink eyes, violet eyes, even eyes with bumps on them.

For 26 years Biel has been selling eyes. It is said that he has the largest collection in the world. "Each day," Biel said, "I ship from 5,000 to 10,000 eyes. I furnish them to unfortunate men and women in Hawaii, Greenland, Europe, New York. Biel said glass eyes usually last about five years, as they are subject to a constant wearing down.

"The eyelids exert a friction, making the eye rough in time," he said. "Or the eye may become discolored. Frequency of the exchange, however, depends upon the individual. Take a farmer. Perhaps he only wears his glass eye on Sunday."

Only Arizona Citizens Can Work on Highways

Phoenix, Ariz.—Determined to protect Arizona's citizens, a special examiner of the highway department has been appointed to scan the pay rolls of contractors with a view to preventing all but Arizona citizens from working on highway projects.

E. B. Peterson is the examiner. The burden of the proof under Peterson is on the employee, who must furnish evidence that this state is his voting place.

Registration as a voter is considered proof of citizenship.

Strawberry for Every Locality

Klondike, Aroma and Howard 17 Are Three Leading Varieties.

(Prepared by the United States Department of Agriculture.)—WNU Service.

People who avoid strawberries because of their high acidity need not deny themselves the pleasure of eating this luscious fruit if they will try some of the milder flavored varieties such as the New York, the Marshall, and the Chesapeake. Several hundred varieties of strawberries are grown in the United States, one for every locality and purpose, according to specialists of the United States Department of Agriculture who have classified them for the benefit of growers and consumers. Of this large number of varieties, however, only about 40 are grown commercially, and 19 of these constitute 96 per cent of the acreage. The three leaders—Klondike, Aroma, and Howard 17—account for 63 per cent of the acreage in the country.

Best Varieties to Grow.

Climate and soil conditions are factors that determine to a large extent the best varieties to grow in the different sections of the country. The Missionary is the leading sort in Florida and along the Atlantic coast to Maryland. Most other parts of the South prefer the Klondike. The Blakemore, a new berry developed by the department, is becoming popular in the Carolinas and as far north as New Jersey.

The Aroma is a favorite in most of the milder regions of the central states, including the northern part of Arkansas and Tennessee, and the southern parts of Missouri, Illinois and Indiana. The Dunlap is popular in the remainder of the Middle West. In the Northwest, Marshall, Oregon, Eltersburg 121, and Clark are most widely grown, while the Howard 17 is king north of the Ohio and Potomac and east of the Mississippi.

New Varieties Increase.

New varieties of strawberries are being introduced constantly, the department says. Many of them possess no special value as compared with the well-established varieties, and most of them soon disappear from nursery-men's lists. Occasionally a new variety such as the Blakemore has merit enough to make a place for itself.

Night Light for Baby

Chicks Meeting Favor

The favorable results secured by a large number of poultry raisers with the use of a dim light for baby chicks are being confirmed by experiments at the Massachusetts Agricultural college. Prof. William C. Sanctuary reports that with 227 chicks under observation, the lighted chicks showed a gain in growth at four weeks of age which varied from 8 to 15 per cent, depending upon the breed. This gain did not come from eating during the night but it was noted that the dim light kept the chicks spread out in the most comfortable sleeping belt available and enabled them to find their way back to the hover without becoming chilled. It was also observed that on cold mornings the lighted group of chicks lost no time before starting to drink and eat while a large portion of those in the unlighted group first took time off to get warm under the hover.

Where electricity is available either from a farm lighting plant or transmission line, a ten-watt light was recommended. This assures a dependable light which will not blow out or become an extra fire hazard.

Trap Japanese Beetle

When Infestation Light

In the summer of 1929 approximately 17,500 Japanese beetle traps baited with geraniol were used by the United States Department of Agriculture in lightly infested areas, and in 1930 the number was increased to 25,583. The department recommends trapping only where there is a light infestation. The baited traps attract beetles from a great distance and if used in heavily infested areas would draw abnormal numbers from neighboring properties to the property where the traps were used. The cost for bait and for operating the traps was \$1.96 per trap in 1929 and \$1.63 in 1930.

Massachusetts Favors Two Feeding Mixtures

The Massachusetts station makes the following recommendations for poultry feed mixtures. Much of course will depend upon local conditions such as the price and availability of the ingredients.

The laying mash is: 200 lbs. cornmeal, 100 lbs. wheat bran, 100 lbs. middlings, 100 lbs. ground oats, 50 lbs. meat scraps, 25 lbs. fish meal, 25 lbs. alfalfa leaf meal, 25 lbs. dried skim milk, and 5 lbs. salt.

Scratch feed: 500 lbs. yellow corn, 250 lbs. wheat, 150 lbs. barley, and 100 lbs. oats.

Grinding Feed Pays

No experienced dairy farmer would feed whole grain to his cows. At any rate one would hardly think so. Yet there are men who do this very thing and then complain because there is no money in dairying. True, prices of dairy products are low at this time, and there is reason for dissatisfaction on that score, but the man who feeds whole grain to his cows is not likely to secure much profit at any time.

Lower Fencing Cost With Large Fields

Irregular Enclosures Have Too Many Corners.

Fencing small irregular fields is an expensive operation, according to J. I. Falconer, chairman of the department of rural economics at the Ohio State university, who finds that for most kinds of general farming the fields should be at least 40 rods long.

Rectangular fields and small fields require more fencing per acre than square or large fields. With fields of the same shape, he states, the larger the field, the fewer rods of fence to the acre are required to enclose it, and a proportionally smaller area of tillable land is occupied by fences. A square field of one acre would require 50 rods of fence; one of 20 acres, 11.3 rods of fence per acre; while a square field of 40 acres could be fenced with eight rods of fence per acre.

If the width of land occupied by fences in the one acre and 40-acre field were uniform, the amount of waste land due to fences would be more than six times as much in the one-acre field as in the 40-acre field, Falconer says.

A square field of ten acres requires 100 rods of fence; a rectangular field of ten acres, 28 by 56 rods, requires 170 rods of fence; and a rectangular field 20 by 80 rods requires 200 rods of fence. If the fields are not to be fenced this disadvantage of the rectangular field need not be considered. Irregular fields are especially wasteful of fencing and land, and uneconomical to operate. They have too many corners, too many short rows, and too many corner posts.

Inoculate Legume Seed by Making Them Sticky

Several materials used on legume seed every week before planting the seed have not given satisfactory results compared to jelly or moist applications, according to work done at Purdue university and by the United States Department of Agriculture and reported recently by K. E. Beeson, Purdue university.

Soil from well inoculated fields can be used satisfactorily but the only way to tell how well the field is inoculated is to observe this fact when the legume is growing in the field. Small seeded legumes should be made sticky by use of a solution of one part sugar to two parts water, Beeson recommends. Less than a pint of the sweetened solution will treat a bushel of seed. After the solution is applied the seed should be mixed and have the dirt applied. If the seed is not left moist it can be sown or stored.

Soybean seed should not be moistened but should be made slightly damp, as much moisture causes the seed coat to slip and clog the drill. All land that has not been inoculated before should have seed inoculated this year, Beeson suggests.

Weedy Clover Seed Not Popular on Any Farm

Buckhorn, dock and pigweed seeds—weed seeds commonly contaminating clover seed—produce many times more seed for each seed sown than the clover seed, making it vitally important that none but scrupulously clean clover seed be sown, says Samuel M. Jordan, weed and seed specialist of the Missouri state board of agriculture.

For each clover seed sown one may expect to harvest 50 clover seeds; for each seed of buckhorn, 2,400 seeds of its kind; for each seed of dock, 50,000 dock seeds; and, for each pigweed seed, 1,000,000 weed seeds of this kind. From the foregoing facts, it is easy to see, Mr. Jordan says, that it is better to sow no clover seed at all than to sow a lot of weed seed with it.

Strawberries Lacking

It is a matter of surprise when one actually sees the scarcity of fruit among some farmers. Their tables are well provided with milk and cream, with pork and poultry, also bread and pastry, but as to fruit, they seem to be content to go without. A few rows of strawberry plants in the garden, the fruit of which when well smothered with cream, of which farmers have a rich abundance, would give them three times daily a dessert for the gods.

FARM NOTES

Rack the apple barrel frequently while it is being filled.

To do a good, clean job of cultivating, all shovels should be sharp and polished.

Based on past experience, profit in growing cucumbers depends primarily on the control of insect and disease pests.

Grape arbor can be used to good advantage in making the farm home grounds attractive. Try to give some thought to the location of these.

Fruit should be thinned out if the usual June drop has left more fruit on the trees than will mature properly. Thinning will improve the quality of the remaining fruit.

Omitting the last spray on the potatoes is like letting the insurance lapse on the day before the fire. As long as the vines are green spraying will help to control blight and rot.

Old Too Soon

Fry the poor men and women who always feel tired and sluggish—who grow old too soon—never knowing the real thrill of complete health and vitality.

Recapture that old time zest in life, that keen appetite, stamina, and sweet sleep at night. Take Fellows' Syrup, the wonderful tonic for weakness, "nerves," and "run-down" conditions. It replenishes the system with the valuable elements demanded by Nature. It aids you to regain youthful energy and vitality and—doubles your "age."

These benefits, and awakened interest in living, are quickly evident after the first few doses. Be sure to ask your druggist for the genuine Fellows' Syrup, which doctors prescribe.

FELLOWS' SYRUP

Heavy Diet

A young couple living in the suburbs invested in some fine baby chicks. The husband was called away on business and on his return most of his chickens had died. The wife, trying to comfort her husband, said:

"I'm sure the hatchery will replace them, for it's no fault of ours. I dug and fed them worms all the time you were gone."—Indianapolis News.

LINCOLN SAID

"You can fool some of the people all of the time, and all of the people some of the time, but you cannot fool all of the people all of the time." Lincoln was right. The public wants facts, not fallacies. The fact that more than nine million boxes of St. Joseph's Genuine Pure Aspirin have been sold in one single year is conclusive proof that thousands of people now realize that it is neither sensible nor necessary to pay more than 10c for one dozen tablets of genuine pure aspirin. Because doctors, druggists and the public know that "St. Joseph's" Aspirin is as genuine and as pure as money can buy, it is now the largest selling pure aspirin in the world for 10c. Why pay more? Never say, "Gim-me some aspirin." Be safe, be sensible and ask your druggist for St. Joseph's Genuine Pure Aspirin. It meets every government standard—it's genuine pure aspirin. If it bears the name "St. Joseph's."

A Hard Task

Friend—What do you have to do in your new role?

Actress—Nothing much. Just represent a pretty girl, that's all.

Friend—Really? What a lot they expect from actresses these days!—Answers.

7c HEARTBURN

7c HEARTBURN 10c TUMS

Do favorite foods sometimes disagree, causing that queer feeling, burning, sourness, belching, nausea, upset stomach, etc.? TUMS—a new Alkaloid—gives relief almost immediately. Simply eat three or four TUMS after meals—often one is enough. Delicious, sweetens the breath. At any drug store—only 10c.

TUMS For the Tummy

No Sale

"This is a wonderful fountain pen. Its advantage cannot be described!"

"No, not with the pen itself."

There is now so much notable literature in existence, that the necessity of some tabloid form in which to absorb it is pressing.

It is such hard work to get a million dollars, that when a man once has it, he will not fool it away.

There ought not to be so many closets and then so many worthless things would not be saved.

Applause in a movie theater has some reason. It means something to the manager.

A loud, good-natured man never thinks of "pleasing people," though he generally does.

CHANGE OF LIFE

For over fifty years, women have been taking Cardui for troubles like Mrs. M. C. Westoverford, of Tahlequah, Okla., describes below: "I had spells (during change of life) when I could not stand up. I had the headache all the time. I was dizzy and had attacks of nausea. I read about Cardui, so I got a bottle to try. It helped me so much that I continued to take it until I was entirely past the critical period of my life. I have given Cardui to my girls. It has been a wonderful medicine in my home."

Buy Cardui at the drug store. 25c

W. and J. Students Walk Out on Their President

Some of the 412 students of Washington and Jefferson college at Washington, Pa., who walked out of the chapel exercises immediately following the address of President Simon S. Baker, whose resignation they have demanded. The students allege the college head has discriminated against varsity athletes.

EXPLAIN WHY WORLD WAR CAME TO AN END IN 1918

Mary Roberts Rinehart Tells of Interview With General Pershing in France.

New York.—Why the World War came to so sudden an end on November 11, 1918—a point still obscure to most Americans—is explained graphically and tersely by Mary Roberts Rinehart who, in the Good Housekeeping Magazine, describes her visit to General Pershing's headquarters three days after hostilities had ceased.

"At last we were at Chaumont and I was being taken into General Pershing's private office," she says. "He was standing there smiling and holding out both hands.

"So you got here after all!" "He looked thinner, very tired. But he looked every inch a man and a soldier. He had fought not only his part of the war; he had fought Foch

and the entire Inter-Allied command; he had fought for his army as an entity. And now he had struck the decisive blow with that army and ended the war. Standing by the map he showed me the strategy of the final smash of the German lines; the terrible choice between battle loss of an attack that summer and fall with green troops, or the slow attrition by disease of a French winter and an attack in the spring."

Mrs. Rinehart also discloses that, long before he returned from France, Pershing foresaw and forestalled the movement to reward his military achievement with the Presidency.

"After dinner on the train that night I sat alone with Pershing and asked him what he thought of the talk of his running for the Presidency in 1920. His answer was swift and unequivocal. He did not want the Presidency. He would not run or allow his name to

be presented. He was a soldier; he knew nothing about politics."

The week after the Armistice presented one phase of war suffering which has never been completely pictured until now—the return of Germany's ex-prisoners. Mrs. Rinehart describes an incident in Strassburg.

"Quite suddenly in the dark our car was stopped in the public square by an influx of men. Out of the darkness they emerged into the light of a street lamp. Clad in the uniforms of most of the allied nations, ragged, weary and footsore, they poured doggedly into the square and moved on. The Germans, exhausted of food and supplies, had merely opened their prison doors, and the prisoners had vomited forth these incredible caricatures which had once been men. Between them and any occupied land lay the wide belt of the devastated zone. Before them a journey on foot and in winter, in rags and broken shoes, without food or funds, toward homes and families which might not still exist."

An educated man is one who knows a great deal he isn't interested in.

Safety Glass

Ford cars are now equipped with safety glass in all doors and windows at a small extra charge

\$15 for the Coupe, De Luxe Coupe, Sport Coupe or Convertible Cabriolet **\$20** for the Tudor Sedan, Standard Sedan, De Luxe Sedan, Town Sedan or Victoria

THE Triplex safety glass windshield has always been an outstanding feature of the Model A Ford. By reducing the dangers of flying glass, it has saved many lives and prevented countless injuries in automobile collisions.

Now comes a further assurance of safety to every Ford owner . . . polished plate safety glass in ALL DOORS AND WINDOWS at slight additional cost.

The charge for this extra protection is unusually low because of large production and the development of new methods of manufacture. Simply tell the dealer when you buy the Ford that you want "safety plate glass in all doors and windows" and the car will be factory-equipped for you in that manner.

Today, as before, the safety glass windshield is furnished as standard equipment on all Ford cars without extra charge.

FORD OWNERS This announcement refers only to NEW CARS. Ford dealers are not in a position to install safety glass in the windows of your present Ford at the above prices.

HOME OF THE BEST IN TALKING PICTURES

SATURDAY, MONDAY, June 13, 15

Nancy Carroll in

"STOLEN HEAVEN"

with Metreton news and "Tony the Pup" cartoon.
Matinee at 4 p. m.

TUESDAY AND WEDNESDAY, June 16, 17

"Mothers Cry"

Most human thrill packed mother-love story since "Over the Hill." The lives of four children, any of which could be the central theme in any other picture. A strong cast headed by Dorothy Peterson and David Manners.

THURS. AND FRIDAY, June 18, 19

John Mack Brown in

"The Great Meadow"

See this great adventure picture and give yourself a treat. Its crammed with action, Indian fights, wilderness battles, romance, beauty, tense drama. Exceptional entertainment. Matinee Friday at 4 p. m.

WITH THE CHURCHES

Catholic Church Services

Mass every morning at 7:30.

1st Mass on Sunday's at 7:30.

2nd Mass at 9 o'clock.

Rev. John M. Bertrant,

Rector.

Church of Christ

Ladies' Bible class on Tuesday afternoon at 5 o'clock.

Mid-week Bible study on Wednesday evening at 8:30 o'clock.

Sunday Bible classes begin at 10 o'clock.

Preaching and Communion each Sunday beginning at 11 a. m. and 8:30 p. m.

Young people's Bible class on Sunday evening at 7:45 o'clock.

A cordial invitation is extended to all.

R. E. GRIFFITH, Minister.

THE METHODIST CHURCH

We Earnestly Solicit All Who Are Not Worshipping Regularly Elsewhere To Come Worship With Us.

10 a. m., Sunday School.

"A class for every age, and a trained teacher for every class."

"A whole family Sunday School."

11 a. m., Preaching; Song service directed by Rev. H. L. Cochran, and the pastor.

Special vocal solo by Rev. H. L. Cochran

7:45 p. m.: Hi-Epworth League in the Church Auditorium. A special invitation is extended to all young people who are not regularly attending some other young peoples organization to come meet with us.

7:15 p. m.: The Junior Epworth League meets in the parlor of the parsonage.

All junior age children not regularly attending some other junior age organization are cordially invited to come to the Junior Epworth League each Sunday evening at 7:15 p. m.

8:15 p. m.: Sermon by H. L. Cochran, which will close the present public preaching services of the revival conducted by Rev. Cochran.

Rev. Cochran will render a special vocal solo at this service.

We cordially invite all who are not regularly worshipping and systematically supporting some church in Sanderson to worship and join in active service of the Lord with us.

B. M. STRADLY, Pastor

Wanted—Typing or any kind of stenographic work to do at home.

Margaret Hoffman, phone 137.

In the rush of the American Legion Rodeo dont forget to let us keep your clothes freshly cleaned and pressed. They will be returned the same day spotless and odorless. We are "Master" cleaners.
