RODEO BRINGS MANY VISITORS TO CITY

Snappy Two Day Program Enjoyed by Large Crowd

Legionnaires Plan to Make Rodeo Annual Event

With huge crowds in attendance from many West Texas towns the American Legion Rodeo, which was given here last Friday and Saturday was enjoyed by all present.

The first annual event was a success from every standpoint and visitors were high in their praise of the splendid program presented. Each morning fans witnessed a good game of baseball when the Ozona and Sanderson teams crossed bats. The parade, which was held the first day, had many entrants. George Adams, the oldest cowboy in Texas, carrying the American flag headed the parade followed by cowboys, cowgirls, the high school band and cars which were decorated and represented various business firms. At noon of the first day a delicious barbecue was served by the legionnaires. The meat for this barbecue was donated by the members of the Eat More Lamb Club. Each afternoon a fast rodeo program was put on followed by dancing at night at the C. A. C. hall with good music.

Following are the results in the various rodeo events for the two days of last week:

First Day, June 19th

Bronc Riding: Louis Babb, Sanderson, first, and Johnnie Williams of Ft. Worth second.

Wild Cow Milking: Charlie Gregory, Sanderson, first; Earl Sellers, Del Rio, second; Howard Westfall, Ft. Stockton, third.

Steer Riding Contest: Johnnie Williams, Ft. Worth, first; Buster Edwards, Sanderson, second; Buck Dunn, Uvalde, third.

Calf Roping: Mark Tolliver, Ft. Stockton, first, time 22 4-10 seconds; Jack Sellers, Del Rio, second, time 23 seconds; Carl Sheppard, Eldorado, third, time 23 4-10 seconds.

Steer Breakaway: Carl Sheppard, Eldorado, first, time 6 4-10 seconds; Charlie Gregory, Sanderson, second, time 8 2-10 seconds; Fred Montgomery, Sanderson, third, time 9 6-10 seconds.

Goat Roping: Howard Westfall, Ft. Stockton, first, time 10 5-10 seconds; Emmett Buck, Dryden, second, time 10 6-10 seconds; "Coon" Chandler, Dryden, third, time 11 5-10 seconds.

Second Day, June 12th

Bronc Riding: Dave Pool, Girvin, first; Louis Babb, Sanderson, second.

Wild Cow Milking: Carl Sheppard, Eldorado, first, Leo Bishop, Pumpville, second; Charlie Gregory, Sanderson, third.

Steer Riding: Johnnie Williams, Ft. Worth, first; Buster Edwards, Sanderson, second; Buck Dunn, Uvalde, third.

Calf Roping: Earl Sellers, Del Rio, first, time 19 5-10 seconds; Pecos Meador, Eldorado, second, time 22 7-10 seconds; Howard Westfall, Ft. Stockton, third, time 29 6-10 seconds.

Steer Breakaway: Jack Sellers, Del Rio, first, time 6 5-10 seconds; Charlie Gregory, Sanderson, second, time 6 6-10 seconds; Leo Bishop, Pumpville, third, time 6 9-10 seconds.

Goat Roping: Walter Babb, Langtry, first, time 8 5-10 seconds; Jack Sellers, Del Rio, second, time 9 3-10 seconds; Willie Banner, Sanderson, third, time 10 8-10 seconds.

In addition to the purses given for the various events, above Louis Babb was presented a pair of spurs by Andrew & Son of San Angelo for the best bronc riding the first day. For the best time made in the calf roping contest on the first day.

Former Resident Killed By Train

Eastbound S. P. Passenger Train Crushes Auto

M. L. Shelton was killed almost instantly last Sunday when the fast S. P. train 102, already 30 minutes late, was hurrying down the track at the Toronto crossing near Alpine and crashed into his stalled car just at the edge of the rails. Shelton was returning from a trip to Presidio about 5 o'clock in the afternoon and a small wagon was on the crossing, the driver backing his horses, having seen the oncoming train. Shelton passed the wagon on the hill as the driver told him a train was coming, then he evidently stopped his car to see what the man had said.

The car, a model T coupe, was thrown through the fence and parts strewn down the track for 150 yards. Shelton was thrown clear and died before the crew could get him to town. His small white dog, also in the car, was killed almost instantly, sustaining a broken back. Mr. Shelton was badly cut about the head and face but the blow which was the immediate cause of his death crushed in his chest.

Mr. Shelton is the father of A. A. Shelton of this city and at one time was a resident here. He taught at the Dryden school several years ago.

The many friends in this city and county of Mr. Shelton extend sympathy to him in the loss of his father.

WOMAN HITCH-HIKER ILL

Mrs. Cleo Goggins, age 21, of San Diego, Calif., and Mrs. Priscilla Long of Welaka, Fla., who were hitch hiking from Florida to California were detained here this week due to illness of Mrs. Goggins.

Since being here several ladies of the town have provided them with food and taken care of them. Dr. Robertson gave the sick woman medical attention. Both girls have been staying at the vacant house of Jim Kerr's just back of the Marathon Oil Co., station on Oak street.

Mrs. Long is the mother of two boys aged 5 and 3 years. This is her first experience in hitch hiking and stated that she would sure be glad to get back home where she knew people. Mrs. Goggins states that she has found that sometimes strangers are kinder to one than their own people. Both women seem to regret the fact that illness caused their delay in getting to the California coast.

The women stated that they were a little over a week making it here and found that after leaving Houston rides were fewer and farer between. They were in Langtry from Wednesday of last week until last Saturday. As soon as Mrs. Goggins is able they are going to return to their homes.

Mrs. George Russell and children of El Paso visited Mrs. O. T. Schupbach this week.

Funeral Services Held Sunday For Ed Downie

Well Known Pioneer Terrell County Rancher Dies at San Antonio Home

On the evening of June 12th our friend and neighbor, Edward R. Downie, passed over to the other side, leaving his bereaved family and a host of friends in Terrell county, Texas.

Mr. Downie had been ill but a short time and passed away in the Santa Rosa hospital in San Antonio, Texas, surrounded by family and friends.

Services were conducted from the Downie home at 102 West Elsmere Place, San Antonio, by Dr. P. B. Hill of the First Presbyterian church of San Antonio on Sunday afternoon at four o'clock of June 14th, and interment took place in the Alamo Masonic cemetery of that city.

Edward R. Downie was born in Austin, Travis county, Texas, on the 30th day of October, 1855. He spent his early youth and manhood in west Texas in the ranch business. He was educated in San Antonio Academy and the University of Texas, and was at the University a member of the Sigma Chi fraternity. Survivors are: the widow, Mrs. Helen Gregory Downie; three sons, Edward R. Downie, Walter G. Downie and Jackson N. Downie; two sisters, Mrs. F. L. King of Berkeley, California, and Miss Octavia Downie of New York City.

Mr. Downie was considered one of the most progressive and successful ranchmen of Terrell and Pecos counties, and at the time of his death operated a large ranch interest in this and Pecos counties. He was actively interested in the affairs of the cattle, sheep and goat industries and for years served as executive committee member of the Sheep and Goat Raisers Association, as well as director and executive of stockmen's companies.

We will miss him from our midst, and those who knew him and his life in the saddle form a host of warm hearted west Texan friends who all say "Farewell, stout fellow!"

(Editors Note:—We are reprinting the above article, correcting several mistakes made in it last week in regard to Mr. Downie's life etc.)

MRS. ELDER DIES

Word reached the city Wednesday of the death of Mrs. I. H. Elder, former resident of this city, at her home in Kerrville on Tuesday. Mrs. Elder suffered a stroke of paralysis.

Mrs. Guy Nation, her daughter, who lives here, has been with her mother for sometime. Mr. Nation left late Tuesday for Kerrville where funeral services will be held.

A more extended obituary will appear next week.

NOTARIES APPOINTED

Nine citizens of Sanderson and Terrell county were given appointments as notaries this year and were qualified as such on June 1.

Following are the notaries appointed: Mrs. Mabel Miller, Dryden; F. C. Bates, Jr., Sheffield; Addie Lee Edling, Alfred E. Creigh Jr., W. E. Grigsby, W. D. Hunter, H. R. Laurence, L. H. Lemons and Fred Savage all of Sanderson.

Legionnaires To Hold District Convention

Midland to Be Host On July 4 and 5

Midland, June 25.—American Legion Post members of Sanderson are being urged to attend the 16th district convention at Midland, July 4 and 5.

A program including a barbecue, banquet, dancing, horse races, ball game and important business sessions has been arranged by the Woods W. Lynch post and Chamber of Commerce at Midland.

The people of Sanderson in general are invited to Midland July 4 when 53 beeves will be barbecued and a big entertainment program given. Legionnaires will hold their convention on the same dates as the big general celebration at Midland. Over 500 Legion members are expected.

GETS EYE CUT

Coon Chandler had the misfortune last Sunday to have his eye ball cut by flying glass when in closing a car door the glass broke causing a piece to strike the eye ball. He was given first aid treatment by Dr. Robertson and later carried to Del Rio. Dr. Scott eye specialist made an examination of the eye and had to take several stitches to close the wound. So far he is getting along nicely and it is not thought that he will lose the sight of the eye.

HUDSPETH ASSERTS HE'S THROUGH WITH POLITICS

Special Correspondent.

El Paso, June 17.—"I'll never run for office again," said Claude B. Hudspeth, who has returned to El Paso with the announcement he will resume the practice of his law profession here and "do everything possible to help others further upbuild the city."

Mr. Hudspeth, now Attorney Hudspeth, was the former congressman of this district. He has been seriously ill for several years. He was pronounced a very sick man when he retired and declined to run for re-election. However, when he stepped off the Sunset Limited, after making the trip all the way from Baltimore, he walked with a springy step. He looked better than he has for 12 years. He said he had fully recovered his health, and has that appearance.

Accompanied by Wife

During the years Mr. Hudspeth was seeking the restoration of his health, Mrs. Hudspeth accompanied him from place to place. She was always with him. She never left him. She was with him on the trip back home.

"I have been very sick," Mr. Hudspeth said, "and I could not thank my friends for their interest in my welfare and the manner in which they have stood by me. I would appreciate it if you would let me take this means of thanking them."

In Office Today

Mr. Hudspeth said he will be in his law office in the First National Bank building this week. The firm name is Nealon, Hudspeth and McGill.

Mr. Hudspeth was in Congress 12 years. Although he has held office 28 years. He had opposition only twice.

"While I said I was through with running for office, Mr. Hudspeth said, "still, having held office for so long a time, I could not do without some kind of an office. So, I had my partner, Joe McGill, make me a notary public. He got this through during the last session of the Legislature."

Joseph McGill is the State representative from this district.—Del Rio Evening News.

BESSIE SHARP LOSES PLEA FOR FREEDOM

Terlingua Man Is Found Dead

Burial Services Held Here Wednesday Afternoon

With a revolver containing three empty shells by his side the dead body of Marcus Hulings, mine superintendent for the Chisos Mining company, Terlingua, in the extreme southern part of Brewster county, was found by passing motorists Monday afternoon on the Fort Stockton road, about 18 miles northeast of Alpine. Life had apparently been extinct only a few minutes when the body was found lying by the side of Mr. Hulings' automobile which was parked at the side of the road with the motor still hot. A bullet wound had pierced his head, entering from the right side and passing clear through and out on the opposite side. No conclusive evidence as to the cause of the tragedy had been uncovered, local officers said yesterday.

Mr. Hulings left Alpine about 30 minutes before his body was found at 1:45. A party of tourists from Oklahoma passed the parked car first, and seeing the circumstances, were afraid to stop, hurrying on into town to notify officers. On the way they met two Alpine men and told them what they had seen, the Alpine men then hurrying to the scene. Within just a short time Sheriff Oscar Hale and County Clerk Worth Frazier, returning to Alpine from Fort Stockton, drove up.

The car was on the right side of the road with the emergency brake up and all of the doors shut. Mr. Hulings' hat, gloves and glasses being found on the front seat. Evidence points to the fact that Mr. Hulings fell on the running board of the car and then slid to the ground. He was found with his money and watch still on his person and the gun, a 38 caliber revolver, lying within 18 inches of his outstretched hand.

Marcus Hulings was born at Emelton, Pennsylvania, on April 25, 1879, of one of the most prominent families of the East, the former General and Mrs. Willis Hulings. The family moved to Oil City, Pennsylvania, where they made their home for many years until the death of Mr. Hulings' father and mother a number of years ago.

He was educated in the public schools of his home state, graduating from Rensselaer Polytechnic institute of Troy, New York, with a major in mining and engineering. He devoted his entire life to the mining game, both in Mexico and Texas, being mine superintendent for the Chisos Mining company at Terlingua for 20 years. He moved to Texas from Mexico in 1911 and was located at Terlingua up to the time of his death.

Mr. Hulings enlisted in the army at the outbreak of the Spanish-American and served in his father's regiment. He was enroute to Porto Rico when he was taken sick with typhoid fever and had to return to his home.

He was married in 1919 to Miss Lucy Frazier of Tyler, Texas, to which union was born one child, Marcus Hulings, Jr., who has been with his father at Terlingua since the death of Mrs. Hulings five years ago, in 1926.

Surviving Mr. Hulings, beside his small son, were three sisters and six brothers. They are Miss Florence Hulings of Masselon, Ohio; Mrs. Harry Heilman of Kittanning, Pennsylvania; Mrs. F. E. Stewart of Davenport, Iowa; George S. and Willis J., both of New York City; Captain Joseph S. Hul-

Habeas Corpus Action Filed In Effort to Gain Freedom Under Bail

Woman Sent to Asylum in San Antonio

Freedom for Mrs. Bessie Sharp was sought in the 94th District Court of San Antonio last Saturday before Judge W. W. McCrory. County Attorney Alfred E. Creigh Jr., was in San Antonio and fought all efforts of Mrs. Sharp to gain her freedom under bail. The State was represented by the district attorney, Julian LaCrosse. After hearing all evidence Judge McCrory remanded the prisoner back to the custody of Sheriff Lee Cook.

The application for habeas corpus was filed by Mrs. A. J. Ivy, mother of Mrs. Sharp. Mrs. Ivy declares that while no indictment has been returned against Bessie Sharp and that she has recently undergone two operations, she is being restrained by Sheriff Lee Cook and guarded. Due to the fact she is being kept under 24-hour guard is causing extreme nervousness on the part of Mrs. Sharp and her life is being endangered, Mrs. Ivy sets forth.

However, the Judge instructed Sheriff Cook to exercise his custody by having the woman taken to the Southwestern State Asylum, which he did. Upon his return here Mr. Cook stated that Mrs. Sharp was placed there for a period of 10 days' observation at the end of which time she will be returned here. It was upon request of Mrs. Sharp's attorney C. S. Staton, San Antonio, that the Judge instructed the prisoner be put under observation at the asylum.

Mrs. Sharp, held without bond in connection with the death of her husband, Telefus Sharp, by poisoning, has been in the Medical Arts hospital since the early part of May. She underwent a tonsil operation the first part of last week. Previously, she had undergone there a major operation for ailments said to have been the outgrowth of her recent hunger strike here in the jail.

Her trial in all probability will be held here next month, when the regular term of District Court which is scheduled to be held here commencing Monday, June 13, meets.

TIMES INSTALLS LINOTYPE

We are pleased to announce to our readers and advertisers that this week we are installing a Model 8 Linotype machine and will now have one of the best equipped printing shops in this section. We are sparing no expense in having a good equipped shop and are making every effort to publish a good lively well readable weekly paper.

During the past two months, since the writer has returned to the paper, she has made every effort to publish a good paper. All good words said and the many compliments paid us on the improved appearance of the paper has been appreciated and we certainly thank every one for the kind words and encouragement given. We also thank the advertisers, both old and new, as well as the new subscribers and those of all the old ones who have stood by.

It is our aim and hopes to publish a good weekly and can do so with the help of all citizens of the town and county.

Mr. and Mrs. John M. Doak returned to their home in Del Rio last Sunday following several days visit here in the homes of Mr. and Mrs. R. L. Doak Sr. and Boyd Doak.

Pleatings Solve Many Problems

By **CHERIE NICHOLAS**

Pleatings, and an abundance of them solve a majority of the trimming problems in fashion's realm this season. A lavish use of fine knife pleating results in some other than ultra chic for the costume. The model pictured gives emphasis to the charm of the new pleated trimmings. It also goes to show how prettily printed materials, especially the popular dotted effects yield to pleated treatments.

If you would like to know about the smart umbrellas to which this up-to-date young woman seems to be waiting to call attention we do not mind telling you a secret, or perhaps it is the handsome leather bag which she carries which holds the secret. Anyway, to make a long story short, the umbrella is made to fold up so it can be stowed away in a certain little commodious zipper-top bag without anyone ever suspecting such a thing. Clever, is it not, and well worth following up when next you go to buy a new umbrella-and-bag ensemble.

But about this matter of decorative pleatings which are having so much to do with the swank of the mode this season, one need not hesitate to employ this form of trimming at any time for they adorn the simplest everyday print frocks with as much distinction as they enhance the most exquisite and exclusive evening gowns. As to pleating the daytime prints,

it has become the rule rather than the exception. A favorite use of fine knife pleating is to border both blouse and skirt with it.

Have you tried trimming with pleated lace? If you are making a blouse or a dress of allover lace, for instance, cut strips of any width which may happen to suit your fancy. Have them pleat-edged and pleated. You will find that these pleated frills give a beautiful finish to all edges.

Enthusiasm for pleating also carries into the coat realm this season. Full-length coats of either light woolen or silk are given very youthful and flattering lines in that they are bordered about the bottom with pleated flounces of considerable depth, the pleating repeated on the now-so-fashionable three-quarter sleeves and if there be a cape-collar it is also finished with pleating.

(© 1931, Western Newspaper Union.)

Chiffon and Sequins in Mode for Evening Wear

Chiffon and sequins have come to a novel agreement for the skirt of an evening gown that is very full and cut on the bias to make it swing and swirl like a bell when the wearer is dancing.

The chiffon is printed in large pink roses on a black background. The sequins are let the roses stay soft and pink and untouched if they would agree to let all the black spaces behind them go sequin.

The surprise comes in the cape accompanying and on which background and flowers have completely changed places. The spaces are in chiffon and the roses in colored sequins!

Some Timely Food Suggestions

By **NELLIE MAXWELL**

The cook who really enjoys mixing ingredients as a painter does his colors, will find no limit to the delightful dishes which one may originate or enlarge upon with the materials at hand. One must follow a few fundamental principles in cooking, and after that let the imagination soar, for there is no end to inspiration.

After some experience with handling foods, most toothsome dishes may be prepared from bits of leftovers. The cook who wastes nothing, but serves her food in a dainty, appetizing manner, is a real genius and her talents are ever in demand.

It is not always wise to tell all one knows as to the contents of a dish, for some conscientious objectors will refuse to try a made-over dish, or rearranged food.

Now, who will dare to call a steamed pudding a leftover? Yet one may prepare a most tasty one with a few squares of corn bread, cupful of leftover cocoa, a bit of oatmeal, a few raisins and a couple of egg yolks left from some icing or dessert.

Use the things you have at hand—anyone who knows little about foods can prepare a good meal if the market can be called upon with no regard to expense.

Do you use the half-cupful, more or less, of leftover ice cream in a cake or pudding?

with a few whole berries may be spread over the cake if desired.

Sponge Cake.

- 4 eggs - 1 tsp. baking powder
- 1 cup sugar - 1/2 tsp. salt
- 3 tbs. cold water - 1/4 tsp. vanilla
- 1 cup sifted soft-wheat flour - 1/2 tsp. lemon juice

Separate the egg yolks from the whites, and beat the yolks well. Gradually beat in the sugar, add the water, and continue the beating until the mixture is very thick and light. Sift the dry ingredients together and fold them into the egg and sugar mixture. Then fold in the stiffly beaten whites of the eggs, add the flavoring, and bake in a slightly greased shallow pan in a very moderate oven (325 degrees F.) for 45 to 50 minutes.

Correct Posture Is Important

(Prepared by the United States Department of Agriculture.)—WNU Service.

While the lady in the picture regards rather the old verse "Gather ye rose-buds while ye may, Old Time is still a-flying—" a home gardener examining shrubs for insect pests—one is struck immediately by her beautiful carriage.

Her posture is the ideal, easy standing position for which we should all

Ideal Standing Posture.

strive. It is necessary for her to lean forward slightly to examine her rambling roses, but in doing so she has kept her back flat and straight, her head, shoulders and hips in line with

her ankles, and she uses her feet properly to balance herself.

The picture is from a series of charts on good posture prepared by the extension service of the United States Department of Agriculture. These talks on posture include advice on the proper position for all sorts of home activities, both outdoors and indoors. The charts indicate by analogy with indoor tasks, that for garden work, too, such as digging, weeding, planting, and tasks that require stooping, it is possible to carry on the job and at the same time avert the fatigue that comes from bad position maintained for long stretches. Work close to the ground, for example, can be done on a kneeling pad, with the back straight and the shoulders flat; hoeing and raking can be done like mopping or sweeping, keeping the abdomen and hips in the correct position and the feet squarely on the ground. Pruning, watering and gathering garden products are, similarly, much less fatiguing if good posture is maintained while carrying them on.

This and That

"Logic" is what is used in Plato's works to split hairs.

Female tarantulas have been known to live thirteen years.

Pushing into society rids anyone of the inferiority complex.

A loving heart is the beginning of all knowledge.—Chrytle.

Monotony marks the bachelor's existence; "and aren't we all!"

Somebody is always pointing out violations of the Constitution.

Every man has obligations which belong to his station.—Whewell.

We take less pains to be happy than to appear so.—Rochefoucauld.

Even a "red-blooded he-man" recognizes that he can acquire polish.

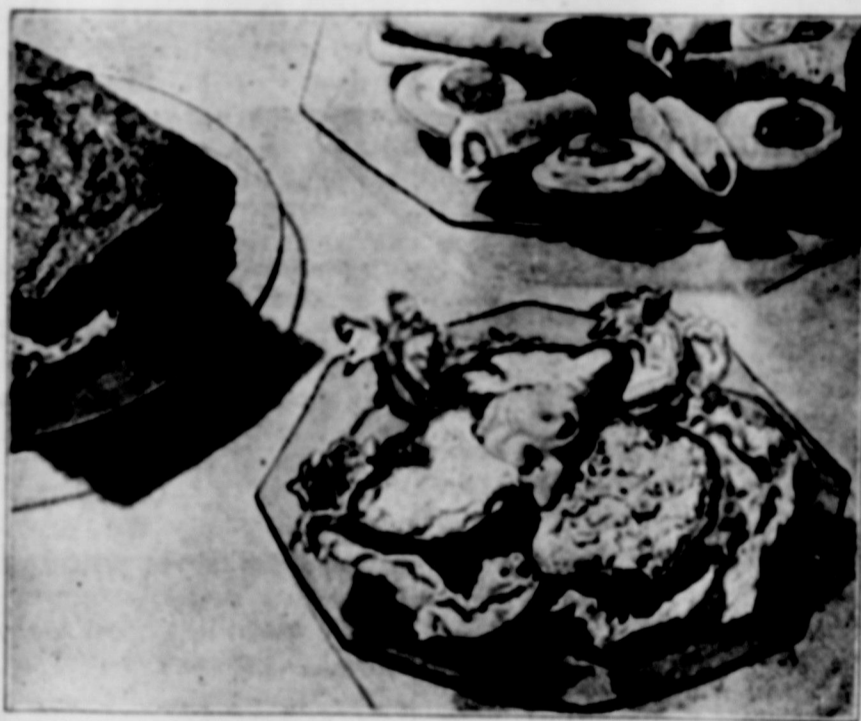

Intolerance may be necessary in order to keep the rein on one's self.

One may like to be indifferent to the fact that he does not know and even not want to know.

One has to be whole-souled in manner and calculating to mind to be a successful political boss.

Laws are like cobwebs, which may catch small flies, but let wasps and hornets break through.—Swift.

Dainty Dishes for Afternoon Tea

Cream Cheese Is Useful for Making Sandwiches.

(Prepared by the United States Department of Agriculture.)—WNU Service.

Some particularly appetizing ways of using cream cheese in lunch dishes and for afternoon tea are illustrated in this photograph from the bureau of home economics of the United States Department of Agriculture. The salad of green peppers, stuffed with cream cheese, is served with crisp lettuce leaves on a green glass salad plate. It tempts by color and texture as well as by its flavors. Canned piloncillos could have been stuffed for a red salad, or such fruits as prunes, figs, canned peaches, or pears, for a fruit and cheese salad. Large cherries, too, are good with cream cheese stuffing or with cheese balls and mayonnaise dressing.

For afternoon tea, dainty rolled and open sandwiches made with cream cheese will usually prove popular. The open sandwiches consist of a cracker covered with cheese and decorated with red jelly.

Neufchatel and cream cheeses are valuable for the protein, fat, phosphorus and calcium they furnish to the diet. They may be introduced into almost any meal—as part of the appetizer at the beginning of a dinner or of the dessert at the end, and in any course between. Gingerbread with a cream cheese filling, shown in the picture, is an excellent dessert for lunch or dinner. Here are recipes for the gingerbread and the filling,

both from the bureau of home economics of the United States Department of Agriculture.

Gingerbread.

- 1/2 cup fat - 1/4 cup sugar
- 1 cup molasses - 1/2 tsp. salt
- 1 egg - 1/2 tsp. ginger
- 3 cups sifted soft-wheat flour - 1/2 tsp. cloves
- 1/2 cup cinnamon - 1 cup milk
- 1 tsp. baking powder

Cream together the sugar and fat. Add the molasses and beaten egg. Sift together twice the dry ingredients and add to the first mixture alternately with the milk. Bake in two shallow pans in a moderate oven (350 degrees F.) for 20 or 40 minutes. Serve with cream cheese or whipped cream. One cup of sour milk may be used instead of the sweet milk. In that case, use one scant teaspoon of soda in place of the one-half teaspoon now called for, and use only two teaspoons of baking powder.

Cheese Filling for Gingerbread.

- 2 Neufchatel or cream cheeses - 1/2 cup salt
- 1 Neufchatel or cream cheese - 1 cup chopped nuts

Mash the cheese and mix with it enough cream to give it the consistency of a soft filling. Add the nuts and salt, and mix well. Split open a loaf of hot gingerbread, spread the cheese mixture on the lower half, replace the upper part and press it down lightly. Serve the gingerbread at once while still hot.

Fruit Shortcake Is Tempting Dish

(Prepared by the United States Department of Agriculture.)—WNU Service.

When strawberries are over it is time to adapt that favorite of all desserts—shortcake—to other fruits. Nothing is more tempting than a raspberry shortcake, made with the large, perfect, ripe berries, on a foundation of either biscuit dough type or sponge cake—whichever happens to be your preference. Whipped cream, of course, is the traditional sauce for the top layer, although the adherents of the biscuit school of shortcake often maintain that no cream at all is needed to enhance the taste of this delectable dessert.

The bureau of home economics furnishes the recipes below for the biscuit type mixture and sponge cake for the foundation. Some people, in making the former of short cake, divide the dough into two thin rounds, and bake them on top of each other after spreading the lower round with butter. Then they slip apart readily. When raspberries are gone, come

blackberries, peaches, fresh apricots, blueberries for shortcakes.

- 3 cups sifted flour - 4 tbs. fat
- 1/2 tsp. salt - 1/2 cup milk or enough to make a soft dough
- 1 tsp. baking powder
- 1 tbs. sugar - Berries or other fruit

Mix and sift the dry ingredients. Cut in the shortening with a biscuit cutter or rub in lightly with the finger tips. Make a well out of the flour and add the milk gradually and stir from the center with a fork until a soft dough is formed. Knead very lightly until the dough is well mixed. Put with the palm of the hand until about one-half inch thick. Cut with a large biscuit cutter. Bake in a moderately hot oven about 375 degrees Fahrenheit to 400 degrees Fahrenheit for 12 to 15 minutes or until light brown. While hot, split and butter. Place crushed berries, sweetened to taste, between and over the biscuit and serve at once while the biscuit is still warm. Whipped cream decorated

The Evening Fairy Tale for Children

By **MARY GRAHAM BONNER**

EXCITED TALKING

Now the wind and the thunder and the lightning were all having a party. They all got very much excited talking and boasting, and the storm became worse and worse.

Shutters came off from windows,

Terrible Streaks and Darts of Lightning.

plants in gardens were knocked over and some were knocked quite flat.

Benches and chairs which had been left in gardens or on the porches were overturned.

But the wind said when the storm

was all over he was going to be quiet and rest for awhile.

"Well, this has done me good," he said.

"I do believe, too, that it has done the grown-ups and children good."

"They have day after day of sunshine, and now they know that old Mr. Sun isn't the only creature in the world."

"There is the storm wind, King and Queen Thunder and the Lightning children."

Now the storm was over for a little while, but do you know that old King Thunder and Old Queen Thunder and the Lightning children and Mr. Wind found that they had forgotten a number of things they had wanted to say to each other.

The people down on the earth said to each other:

"It seemed as though the storm was over a few minutes ago, but the sky is growing dark again now."

"I believe we are going to have another storm—and so soon after the first one, too."

It was true and Mr. Wind came rushing along.

"I forgot to tell you that I thought you were a fine old fellow, King Thunder," he said.

"Thank you, thank you," rumbled the deep voice of King Thunder, "and I feel the same way about you."

Mr. Wind made a low bow, and as he did so he made such a sweeping

one that everything that was in his way was caught up in the air and thrown about.

"I admire you so much, too, Queen Thunder," said Mr. Wind in a whistling tone of voice.

"Thank you," said Queen Thunder. "I'm much complimented."

And her voice was low and deep and quite terrific.

"You're such bright, brilliant, flashing, clever children, you Lightning children," said Mr. Wind.

"Ah, we're so glad you like us. We'll do the best we can. We'll try to do better now for you, too, because of your kind words and your praise."

"What terrible streaks and darts of lightning," said the Earth people.

"The storm seems to be getting worse all the time."

Oh, the earth people thought the storm was a terrific one.

But the Wind, King Thunder, Queen Thunder and the Lightning children thought it was lovely.

Only Mr. Wind did a very naughty thing. Some one had forgotten to take in some sheets that had been hanging out to dry—great, big sheets that were heavy to wash.

Didn't Mr. Wind just knock them to the ground and over on a dirt path so they had to be washed all over again.

Naughty Mr. Wind!

Machines That Are Almost Human

By **E. C. TAYLOR**

The Robot Plowman

SCIENTISTS, in building robots, those soulless machines designed to free men's hands from the bondage of labor, have not neglected the farmer.

The farmer, of course, benefits along with the rest of humanity from the radio and similar machines of this age of mechanical wizardry, but a new device has been built for his especial benefit. Of course it has only been demonstrated as yet, and it may be many years before it will be seen on the farms of the country, but it has been shown to the public, and it worked.

It is the robot plowman. Imagine having a mechanical man to perform that most tedious of farm tasks, the spring plowing.

At the University of Nebraska college of agriculture there recently was demonstrated a remarkable tractor that ran by itself and successfully plowed a 20 acre field.

The operator guided it once around the field, leaving a furrow around the outside edge of the field to be plowed. Then he started the engine of the tractor, with one front wheel of the tractor in the furrow already plowed, and a metal guide on the front of the tractor did the rest.

The robot tractor chugged along the constantly diminishing area, and did not stop until the whole field was plowed. Then it came to rest in the center of the field, and the operator went out and drove his robot plowman into the garage.

This mechanical plowman has a device attached to it that prevents accidents. An automatic cut-off stops the tractor instantly in case the plow hits a rock or other obstruction while the machine is in operation or whenever the front wheel leaves the plowed furrow that guides it around the field. The device used to operate the robot plowman was similar to that used to operate ships, trains and airplanes without a human being aboard them. The robot, through the levers that serve as arms and hands, starts, stops and steers this wonderful machine, while sets of wheels, magnets and electric cells inside it supply the energy for it to perform its task.

This particular mechanical plowman was started by the operator pulling a lever. It could easily be made to start at a command by spoken words. Science could build a machine that would do the plowing while the farmer sat on his porch and shouted his orders to the robot across the field.

Huge harvesters, threshing machines, reapers, corn cutters and shockers and other farm implements could be operated by this robot just as easily as the tractor was operated in the demonstration at the University of Nebraska.

Farm engineers have produced special electric headlights for tractors and flood lights for the fields to enable farmers to work after dark during their rush season, but this device merely makes it possible for the farmer to do his own work for more hours each day. The robot, however, when the age of mechanical men comes into its own, will do the work for him.

Scientists are constantly at work to lighten the burden of farm tasks and to increase the yield from the soil. New devices that produce almost miraculous results are now in use, and more are foreseen as scientists continue their experiments.

The use of the ultra-violet ray, that source of mysterious power, is constantly being broadened on the farm. Machines spreading "artificial daylight" in poultry houses make the hens lay more eggs, and increase the growth of poultry for the market.

The use of these rays directly, or indirectly by subjecting fertilizers to them, is speeding up productivity of the soil, doubling the size and number of the crops.

(© 1931, Western Newspaper Union.)

"Everybody Works but Father"

Sonny had just been taken by his father on a tour of inspection through the factory where the father is production manager.

They had seen hundreds of men and women busy at various machines. Others were engaged in manual labor involving little skill, but much muscular effort.

Finally the tour ended and Sonny sat down in his father's office while the parent scanned some papers. The boy watched the apparent inactivity for several minutes and then said: "Papa, why don't you work, too?"—Indianapolis News.

Vary Sleeping Position

It seems it is not restlessness which makes people turn and twist when they are sleeping, but a healthy and neutral protective instinct which thus prevents bad circulation of the blood in any one part.

Tests made by the science experts of Country Home show that a normal person should change position every few minutes when sleeping most soundly and healthfully.

No Jealousy There

"Two women ran me," says Bruce Barton in the American Magazine. "They are my wife and my secretary and they are good friends. It must be tough when a wife and a secretary are at loggerheads. But when they are a team they are wonderful."

Air Lines Now Belt the Globe

Planes Are Carrying Mail to All Parts of World on Regular Schedule.

Washington, D. C.—A visiting Eschimo, a tropical Uganda native, or a South Sea Islander, can now send an air mail letter from the United States to his home land, and most of the journey will be in airplanes flying on regular schedules. For air mail services now radiate from Uncle Sam's realm to the edge of the Arctic, to the heart of Africa, and to equatorial Pacific islands.

Announcement that a British air mail line has established regular service between Cairo and Lake Victoria, which soon will be extended to Cape Town, directs attention to the amazing development of an industry that dates from the World War.

Routes of Flying Postmen.

"Except for two gaps, the Atlantic and the Pacific oceans, commercial air lines now belt the globe," says a bulletin from the National Geographic Society. "Not only do they encircle the world, but flying postmen interlace its inhabited areas with crisscross lines and, in some cases, with parallel routes. Time-table planes carry letters, parcels, passengers and freight between the shores of all the seas except the Antarctic, and over all the continents, also excepting the Antarctic.

"In all there were 172,000 miles of commercial airways in regular operation during 1930, according to a survey made by the aeronautics division of the Department of Commerce, and of this mileage more than nine-tenths carried air mail. The routes of the world's aerial mailmen would, if linked end to end, encircle the earth more than six times. In the United States 417,500 passengers, more than the population of Indianapolis, Ind., were carried on scheduled lines. Air mail amounted to \$324,000,000, the aggregate weight of eight large freight locomotives.

"A world accustomed to the deliberation of railroad construction has to rob its eyes to keep pace with its progress today. Airways need no costly bridges, tunnels or fills. It might be said, briefly, that airway engineers draw a dotted line across the map, promoters sign on the dotted line, and presto! a few days later planes are operating over it!

"The United States, one of the first countries to have regularly scheduled air mail service, is the holder of many 'firsts' in commercial aviation. America has the greatest airway mileage within its own boundaries and it has also the greatest mileage outside its own boundaries, giving it world leadership in commercial lines by a wide margin. In Newark, N. J., it now has the busiest air port in the world, with eighty scheduled arrivals and departures daily. That means a time-table plane every 15 minutes during the 24 hours. America has more cities with direct air service than has any other country.

France Our Nearest Rival.

"American lines reaching down into Central America, the West Indies and South America, and in other scattered parts of the world, bring the United States total up to 49,000 miles. America's closest rival today is France, whose lines reach across Europe and Asia to Saigon, in French Indo-China, on the shores of the South China sea, and down the coast of West Africa to Senegal, where fast mail boats connect with the French South American air systems. Under the tricolor 18,000 miles of airways were flown last year.

"Germany's mileage, more than 12,000 miles, is third. Most of the German lines are confined to her own boundaries, and all of them are within Europe.

"The Dutch have the longest air mail line in the world in the recently opened Royal Netherland Air Navigation company's route to Java, in the South seas. For 10,000 miles modern 'flying Dutchmen' hurdle deserts, jungles, mountains, plains and seas, fortnightly between Amsterdam and Batavia. Affiliated Dutch companies carry the line some 600 miles farther east to Surabaya, Java, and plans are being considered to extend it to Darwin, North Australia, linking it with Australia's widespread air mail system.

Three Races East.

"Three European nations are pushing eastward into Asia above old caravan trails which fell into disuse with the discovery of water routes to the Far East. To date the three have cooperated. The Dutch and French use the same route, as far as Rangoon, Burma, but they run their planes on alternate weeks, and each carries the mail of the other, sharing expenses and profits. The English, flying a slightly different route, have extended their lines to New Delhi, India's new capital.

"The Dutch planes, starting at Amsterdam, travel across central Europe, Istanbul, Baghdad, Karachi, Calcutta, Rangoon, Medan (Sumatra) to Batavia. The French line begins at Marseilles, jumps the Mediterranean sea to Syria, and, between Baghdad and Rangoon, duplicates the Dutch route. From Rangoon the French line continues eastward to Bangkok, Siam, and Saigon. French Indo-China. The week the French line is idle French air mail is carried on the Dutch planes; and the week the Dutch line does not run mail from the Netherlands is put aboard a French plane at Marseilles.

"The English operate independently the line that was first to reach India in Europe this route extends from London across central Europe to Athens, Greece, and across the Mediterranean to Cairo. It then turns eastward and follows a series of ancient water holes across the desert to Baghdad. The next stage is the same as that flown by the French and the Dutch to Karachi. Regular service on the British commercial line ends now at New Delhi, the capital of India, but an extension is projected to Singapore, Australia, and New Zealand. An experimental British air mail flight is being made this month from London to Australia, via India, Singapore, and the Dutch East Indies. Farthest-North Air Mail.

"If all the air services under the Union Jack were grouped together the British Commonwealth of Nations would be second in mileage, with some 28,100 miles. The units, however, prefer to make their own reports. The four leading divisions are: Australia,

9,000 miles; Great Britain, 8,100 miles; Canada, 7,900 miles and British Africa, 4,000 miles.

"At least a dozen different companies operate commercial airways in Canada. The longest of these is the 3,800-mile route extending over the northern wildernesses from Fort McMurray in Alberta to Aklavik, and Hershel Island, on the Arctic coast.

"South America is completely ringed with commercial airways, with three different lines running parallel to each other down the east coast from Natal to Buenos Aires. Every country and foreign colony in the continent has regular air service.

"Soviet Russia claims 18,000 miles of commercial airways in operation in the Union this year, with lines running east as far as Lake Baikal in central Siberia, and south to Teheran, the capital of Persia. An Arctic line to northern Siberia points along the Yenisei river has just been blazed by a plane using skis. China's airways connect several of the largest cities of the country, including Peiping, Shanghai, Hankow and Canton. Mexico's air lines reach from the United States border at Brownsville and El Paso, to Guatemala and Yucatan. Airplanes will supplement dog teams on 14 of the 25 star mail routes in Alaska next October."

Cleveland Is in Field Giving Speedy Divorces

Cleveland, Ohio.—Cleveland is the latest entrant in the "divorce while you wait" race. Record times are being made by other divorce mills, but Cleveland's bid for popularity is the "10 minute divorce."

Domestic Relations Judge Samuel H. Silbert has set a pace of six divorces an hour, 18 every day between 9:30 a. m. and noon. He devotes the afternoon to hearing divorce cases which are contested, and, being more difficult, they take as long as 40 minutes each.

In the "10 minute" divorces Judge Silbert not only finds time to give decisions but also to hear from the husband or wife the marital difficulties leading up to divorce action.

Unusual Pear Tree Flourishing in Iowa

Fort Madison, Iowa.—Ed G. Doherty claims to have a pear tree which is unique in horticulture. The tree is more than 50 feet high. It produces a crop of from 25 to 50 bushels. But the harvest is a fruit about the size of a man's fist, round, and without the characteristic protuberance near the stem which marks all other pear species. The tree is about 100 years old, and none now living knows its origin.

Hindu Philosopher Buried Alive

With only two small boards to cover his chest to prevent hundreds of pounds of earth from crushing him, Hamid Boy, Hindu philosopher, was buried for two hours under six feet of dirt at Los Angeles. He was none the worse for his experience.

Insects Destroy Many Farm Crops

Thirty-Six Pests Cause Nearly Half of Harm—Some Is Preventable.

(Prepared by the United States Department of Agriculture.)—WNU Service.

About 6,000 species of insects collectively destroy \$2,000,000,000 worth of property in America each year, according to J. A. Hyslop, chief of the insect pest survey, United States Department of Agriculture. Thirty-six pests cause nearly half of the damage, and at least two-thirds of the damage is preventable.

Mr. Hyslop recognizes that monetary estimates of insect damage can not be precise if for no other reason than the fact that destruction of part of a crop by an insect may enhance the money value of the remainder. But they do serve to indicate the relative destructiveness of the pests.

Most Notorious Insect.

Most notorious of the insect world, Mr. Hyslop says, is the boll weevil, which annually destroys 12 per cent of the cotton crop, or cotton worth \$163,000,000. To this must be added \$1,500,000 a year that growers spend in an attempt to control the weevil.

Next in destructiveness is another pest of the cotton crop, the bollworm, which, because of its versatility in feeding, is likewise known as the corn ear worm and the tomato fruit worm. Its destruction is estimated at \$24,000,000 on the cotton crop, \$75,000,000 on field corn, \$4,000,000 on sweet corn, and \$500,000 on tomatoes. Collectively, these damages exceed \$100,000,000.

Each year insects damage forests and forest products worth about \$138,000,000. One of these, the spruce budworm, ranks third in our list of "public enemies" by reason of an annual damage of \$71,000,000. In the 10-year period 1910-1920 it destroyed about 250,000,000 cords of pulpwood—enough to supply the nation for about 25 years at the present rate of demand.

Damage Buildings.

Termites, or white ants, add 1 per cent annually to the depreciation of wooden buildings in this country. Their damage to farm buildings alone reaches about \$29,000,000 annually. Cattle grubs cause a loss to the beef industry of nearly \$30,000,000 annually, and twice as much to the dairy industry. The damage to hides alone amounts to about \$5,000,000 a year.

Concerning the long list of insects that attack stored grain, dried foods, clothing, and furniture and those household nuisances, the cockroaches, ants, and fleas, Mr. Hyslop says the damage is incalculable. Nor can we measure the great drain by insects on the energy, thrift, efficiency, and comfort of man and beast, and the toll of diseases transmitted by these parasites.

The federal government expends annually about \$2,500,000 in entomological research, some years more than \$5,500,000 in eradication campaigns and in the maintenance of quarantines to keep dangerous insects out of this country.

Satisfactory Storage for Potatoes in Pits

Properly constructed pits provide cheap but satisfactory storage for potatoes throughout the storage season. The spuds should be placed in the pit as soon as harvested but should be given only a light covering at first, says A. E. Hutchins, vegetable specialist, University farm, St. Paul. Care must be taken to keep them dry and well ventilated, he cautions, and when the ground freezes the covering should be increased.

Pits should be made in well drained soils. A good size is four feet deep, six feet wide, and as long as needed. Pits of the above width and depth will hold about 100 bushels for each five feet of length. Ventilators should be placed every five feet. These may be six inches in diameter and three feet long.

Complete directions, including simple diagrams, for making and using storage pits are contained in Special Bulletin No. 85 of the Minnesota agricultural extension division. This booklet also discusses cellars and warehouses, as well as the general subject of potato growing. It may be had free by writing Mailing Room, University Farm, St. Paul.

Improve Cream Quality by Frequent Delivery

In reference to the age of cream and the established fact that beyond four days cream does not keep well on the farm, the understanding and acceptance by the cream producers, that cream should be delivered within four-day periods, is growing.

Perhaps an even more important step is the system now in vogue whereby the cream agent is not paid a commission or compensated in any manner if he pays the top price for undesirable or low-grade cream.

A closer check is also carried on in connection with transportation companies and they are made to assume losses when there is an undue delay in transportation or an undue exposure that causes deterioration of the product.

There is no doubt that these fundamental control factors, if carried out and pursued by everybody in the business, constantly, from day to day, will have the effect of improving cream quality from year to year.

Spraying Potatoes During August Best

Grower Will Be Well Repaid for Careful Work.

August is usually the month which makes or breaks a potato crop and, therefore, the potato grower will be well repaid for careful spraying in this month. In the opinion of insect and plant disease specialists for the Ohio State university.

Whether heavy rains occur in August and September or the drought continues, it is equally important to spray, say the specialists. During normal August weather two troubles bother potatoes in Ohio, they say; one is the hopperburn disease and the other is sunscald. They are similar in appearance; both start to kill the leaves at the tip or margin. The withered portion turns brown, becomes dry and brittle and tends to roll.

All the food that is stored in the potato tuber is manufactured by the leaves, and when the leaves ripen and die permanently, or insects and diseases cut down the leaf area, the potato yield is reduced, say the specialists.

Plants that are kept free of leafhoppers are not affected with hopper burn, and bordeaux mixture spray protects the potatoes from leaf hoppers in two ways—it acts as a repellent and kills insects that suck the juice from the copper-treated plant.

Late blight, which usually occurs in the fall if the season is wet, is another menace, say the specialists. A good coating of bordeaux mixture prevents this disease from getting a foothold. Sprays, under 300 pounds pressure, applied eight or twelve times a season during the growth period of the vines, will give increases of approximately 30 or 40 per cent in yield. Ohio experiments have shown.

Inbreeding Is System Requiring Much Skill

Here is some breeding advice for breeders of pure bred dairy cattle and with an application to those farmers who use the same bull, year after year, breeding him to his daughters and granddaughters. It is from V. A. Rice, author of "Breeding and Improvement of Farm Animals." He writes: "Inbreeding is a system that should be practiced only by the better class of breeders who are able to discern weaknesses and who know the inherent weaknesses of their animals through a thorough knowledge of the individual's ancestry. Moreover, it should be practiced by breeders who will season their inbreeding operations by a very rigid selection, by a very ruthless weeding out of undesirables. Used in this way, inbreeding is the most valuable system of breeding a breeder can use. It is, however, a two-edged sword. It also has the greatest likelihood of harm. If outcrossing is the safest system, inbreeding is certainly the most dangerous, not because of anything inherent in the system but because of the inheritance involved."

Concerning the long list of insects that attack stored grain, dried foods, clothing, and furniture and those household nuisances, the cockroaches, ants, and fleas, Mr. Hyslop says the damage is incalculable. Nor can we measure the great drain by insects on the energy, thrift, efficiency, and comfort of man and beast, and the toll of diseases transmitted by these parasites.

Sweet Clover Superior Pasture in Corn Belt

Bluegrass, which forms the bulk of our pasture, is a plant which makes little growth during the hot, dry season of summer. For this reason it has failed to produce profitably in much of the corn belt country. Bluegrass thrives best during the cool, moist weather and this condition does not exist except in a few limited sections. Bluegrass on hundred-dollar-per-acre land is questionable in any section of the corn belt, and sweet clover is proving a much superior pasture plant in this region. Sweet clover grows during hot, dry weather, as its roots are deep. It is a splendid plant to feed with corn or cane silage, and dairy cattle thus supplied will produce well and with great economy.

Farm Hints

Why not build a silo?

The cowpea is always a good hay crop.

There is a wide choice of cowpea varieties. The Whippoorwill and New Era are hay and seed producers.

As a soil building crop for comparatively poor soils, the cowpea has outstanding advantages. It will do well on quite acid soils lacking in lime.

There are more than 500,000 species of insects known to science, and an amateur gardener often feels that at least half of them are creeping out in his backyard.

Go over the budding currant bushes with a copious shower of nicotine solution. Currant bushes are the greatest nurse plants for aphids, which will speedily go to everything in the garden.

For the home garden it is desirable to make successful seedlings of snap beans, inasmuch as it is certainly impossible for one planting to continue to produce beans during the entire frost-free season.

Although prunes for drying purposes are not usually thinned, both prunes and plums which are to be shipped fresh require thinning to produce a desirable size, says the Oregon experiment station.

sluggish feeling

NEXT time you are out of fit as the result of irregular or faulty bowel movement, try Theodore's Black-Draught for the refreshing relief it gives thousands who take it. Mr. E. W. Cecil, a construction superintendent in Pulaski, Mo., says: "When I get constipated, my head aches, and I have that dull, tired feeling—just not equal to my work. I don't feel hungry and I know that I need something to cleanse my system, so I take Black-Draught. Can you say we have found it a great help."

THEODORE'S BLACK-DRAUGHT

Photographing Wills

Legal circles are concerned, for financial reasons, at the recent innovation by the government in photographing all wills. A supercamera and dark room were provided for the experiment, which is said to have had considerable success in the United States. The photographs of the wills will be placed on the most durable paper, and authorities maintain will outlive the present copies provided by lawyers.

"After the stork came I was in wretched health. I don't know what I would have done if it hadn't been for G.F.P. This rich tonic gave me back my health and I unhesitatingly recommend it to every woman and girl."

Wings Added to Bicycle

Feathered wings have been added to a bicycle by a mechanic in Austria, who expects to make great speed with the device. A tiny gasoline motor mounted over the front wheel causes the wings to flap by means of a rope and pulley arrangement. The wings have a horizontal as well as vertical motion. The artificial feathers are designed to be weatherproof.

A FAVORITE

The American public have their "favorites." Whether person or product, these favorites enjoy unusual popularity. For instance, Babe Ruth's popularity is the result of his home run hitting and colorful personality. Constance Bennett's fame results from her beauty, her ability to act and wear clothes effectively. Hobby Jones, the golfer, because of his uncanny skill and pleasing personality. And so it goes, on and on, St. Joseph's Genuine Aspirin is now the largest selling pure aspirin in the world for 10c because it is as genuine and as pure as money can buy. Thousands now realize that it is neither sensible nor necessary to pay more than 10c for twelve tablets of genuine pure aspirin. Last month alone more than one million people laid down on druggists' counters more than one million dimes for one million boxes of St. Joseph's Genuine Pure Aspirin. Always ask for "St. Joseph's," it meets every government standard.

Secret of Salesmanship

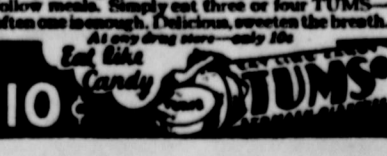

Salesmanship isn't primarily a matter of goods at all, but of knowing and understanding people.—American Magazine.

Regain appetite Purify your blood Recover strength GROVE'S TONIC

Explosions of wrath are not so much due to a high temper as to a weak will. Money often wins the first battle, but seldom the second.

7th INDIGESTION TUMS FOR THE TUMMY

A delightful new Antacid mint—TUMS—quickly relieves that gassy fullness, burning, sourness, heavy feeling, nausea, belching, etc. which often follow meals. Simply eat three or four TUMS—often one is enough. Delicious, covers the breath. At any drug store—only 10c.

24 EGGS AT A MEAL MODEST REPAST OF NEW JERSEY MAN

He Prefers Them Brown-Boiled, but Enjoys Them Raw or Cooked Any Style.

Fort Lee, N. J.—Walter T. Heckman is one heck of a man when it comes to eating eggs.

Twenty-four eggs at a clip are mere hors d'oeuvres before a man-sized meal to this big egg and appetite man of New Jersey.

And that's why Mr. Heckman scooped long and loudly at the claims of that man in Colorado Springs who hails himself as the egg-eating champion with a record of two dozen.

Heckman doesn't eat is dyed and blown Easter eggs. Fried or raw, sugared or salt, yellow and white, the only part this terror of the barnyard doesn't eat is the shell.

Mrs. Heckman just can't keep her egg-eating husband in eggs, although she buys a gross at a time. Down Main street Mr. Heckman makes the rounds each day, beneath the highly pigmented portals of the chain stores. There he takes eggs, makes a small incision in one end with his peckknife, drums on the shell and the egg bout is on.

Sometimes he makes holes in a dozen at a time, and taking two in each hand, lightens the third box before the clerk has finished itemizing the bill. White leghorns, pullet or cracked.

"But it's the brown ones for me," he said. "You get a good brown egg and you got something. I would give

a dozen of your pale-faced, scrawny, select white eggs for one brown egg with a fine, sun-tan complexion."

Mr. Heckman pushed his chair back from the breakfast table where a dozen shells, empty, discarded, lay like a graveyard of bleaching bones. A bowl held another two dozen, unopened, unravaged. They would do for lunch.

"Some day you'll kill yourself eating so many eggs," said Mrs. Heckman and shook her head.

"Oh, that was just a few," demurred Mr. Heckman, shoving his plate away.

"Few? You just swallowed 12."

"Wait a minute," said Heckman. "Those two are cracked. They won't keep. I better eat them. You don't want to see 'em go to waste, do you?"

Kept Alive 12 Years

Vienna, Austria.—Dr. Dozent Dehmel succeeded in keeping a woman patient alive for 12 years by artificial feeding through a tube while treating her throat and digestive tract for burns from poison.

**BAPTISTS OBSERVE
 ANNIVERSARY**

The following program was
 carried out at the First Baptist
 church last Sunday, celebrating
 Rev. and Mrs. Ira Harrison's
 second anniversary here:

Song service led by O. H.
 McAdams.
 Devotional—Mrs. W. M. Druse.
 Address—Ruel Adams.
 Song—By Junior Choir.
 Church History—A. D. Brown.
 Duet—Elizabeth Brown and
 Howard Black.
 Piano solo—Lillian Halley.
 Reading—Mrs. D. L. Duke.
 Mixed quartet—Mrs. J. R.
 Black, Mrs. John O'Dell, O. H.
 McAdams and Ruel Adams.
 Duet—J. R. Black and Herbert
 Brown.
 Solo—Stump Duke.
 Benediction—Ruel Adams.
 After the program, which was
 well rendered and seemed to
 have been enjoyed by everyone
 present, lunch was prepared in
 the basement where all enjoyed
 about one hour of feasting and
 visiting.

 FRANK ROBERTSON, Owner.

THE STATE OF TEXAS,

To the Sheriff or any Con-
 stable of Terrell County, Greet-
 ing:

You are hereby commanded to
 summon J. C. Turner, R. I. Tur-
 ner, Mrs. Viola Walls, Tom
 Walls, R. J. Turner, Jr., Clara
 Bertha Cooper, Alfred Cooper,
 and Wesley "Dick" Green,
 whose residences are unknown,
 to appear at the next regular
 term of the District Court of
 Terrell County, Texas, to be held
 at the courthouse thereof, in the
 city of Sanderson, on the 2nd
 Monday in July, 1931, being the
 13th day of July, 1931, then and
 there to answer a petition filed
 in the said court on the 13th day
 of June, 1931, the file number of
 which is 1865, in which suit,
 Levi Garrett Turner, J. M. Tur-
 ner, Sarah Catherine Turner
 Wise and F. L. Wise are plain-
 tiffs and J. C. Turner, R. I.
 Turner, Mrs. Viola Walls, Tom
 Walls, R. S. Turner, Jr., Clara
 Bertha Cooper, Alfred Cooper
 and Wesley "Dick" Green are
 defendants; the cause of action
 being alleged as follows: Suit
 for partition and distribution of
 the undivided one-half commu-
 nity interest inherited by said
 plaintiffs and defendants, as
 heirs of Sarah J. Turner, De-
 ceased, in three hundred and
 fifty-three and fifty-one
 eightieths acres out of the south
 two-thirds of Section 9, Block
 151, E. L. & R. R. Ry. Co.,
 Original Grantee, Certificate No.
 1615, Abstract No. 268, Terrell
 County, Texas. You are com-
 manded to so summon such de-
 fendants, and to serve this cita-
 tion, by making publication of
 this citation once in each week
 for four consecutive weeks pre-
 vious to the return day hereof,
 in some newspaper published in
 your county; but if there be no
 newspaper published in said
 county, then in any newspaper
 published in the nearest county
 where a newspaper is pub-

lished.
 Herein fail not, but have you
 before said Court, on the first
 day of the next term thereof,
 this Writ, with your return
 thereon, showing how you have
 executed the same.

Witness F. L. Burnside, Clerk
 of the District Court of Terrell
 County, Texas.

Given under my hand and seal
 of said court in the city of San-
 derson, this the 13th day of
 June, 1931.

(Seal) F. L. BURNSIDE,
 Clerk of the District Court,
 Terrell County, Texas.

Issued this the 13th day of
 June, 1931.

F. L. BURNSIDE
 Clerk of the District Court,
 Terrell County, Texas.

COMMUNION HELD

A very impressive ceremony
 was celebrated at the Catholic
 church Sunday morning when
 Anna Rosa Milam and Campbell
 Kerr received their first holy
 communion. The procession was
 led by Edward and James Kerr
 followed by Margaret Pierson.
 The pastor, Rev. John M. Ber-
 trant, delivered a very appropri-
 ate and instructive sermon be-
 fitting this event. Robert Ber-
 nard and Joe Kerr Jr. assisted as
 acolytes at the altar.
 In the afternoon the children
 were the guests of Father Ber-
 trant at the rectory where deli-
 cious refreshments were served
 and a most enjoyable time
 was spent.

Miss Kate Frazier attended
 the funeral at Alpine of her bro-
 ther-in-law Marcus Hulings of
 Terlingua, Texas, Wednesday.

**SANDERSON PASTOR
 HOLDING MEETING**

Rev. B. M. Stradley, who for
 the past two weeks has been in
 Toyah, Texas, holding an All
 Denominational Revival meeting
 will return to Sanderson Tues-
 day, June 30th.

Dr. R. R. Willingham, pastor
 of the First Methodist Church of
 Toyah, who preached at the
 First Methodist Church of San-
 derson recently, is associated
 with the Sanderson pastor in
 the Toyah meeting, conducting
 the special young people's ser-
 vices, and directing the singing.
 Rev. Stradley preaching each
 morning and evening.

Mrs. J. M. Corder and daugh-
 ter, Miss Ferde of Austin, came
 in last Wednesday to spend the
 summer here at the ranch. Her
 other daughter, Miss Mary
 Francis, is attending summer
 school in Austin and plans to
 come out later for a visit at the

Women to Have Special Service at Dryden, Sunday, June 28th at 3 P. M.

The women of the Missionary Society of the First Methodist Church of Sanderson, and the women of the Dryden community and surrounding territory will hold a special Kingdom Extension Service at the Dryden Community Church, Sunday, June 28th at 3 p. m.

Mrs. F. S. Garrison will preside and Mrs. A. F. Buchanan will direct the music.

Mrs. E. M. Taylor, Miss Martha Thomas, and Mrs. F. E. Carter, who have charge of the music for the Dryden Community Church, have arranged several special musical numbers for this service, and Mrs. Chester Smith and Mrs. A. F. Buchanan will direct two groups of the Sunday school children in rendering special anthems at the services.

Additional seats have been provided and it is hoped that every person in the Dryden community and the Dryden territory will attend this service Sunday, June 28th, at Dryden Community Church building.

PECOS TO HAVE RODEO

We are in receipt of the program of the 2nd annual celebration and rodeo that is to be put on by the American Legion at Pecos on July 3 and 4. Attractive purses are offered on the various events such as bronc riding, calf roping, steer riding, cowboys team tying, cowgirls horse, stampede bell calf roping.

The Legion and Enterprise also has our thanks for the complimentary tickets sent us and we wish that we were able to accept the invitation of our fellow editor Jack Hawkins of the Pecos Enterprise to be his guest during the big show.

Read their ad elsewhere in this paper.

MANY VISITORS HERE AT THE RODEO

We were unable to get the names of all visitors who were in attendance here at the American Legion Rodeo that was held last Friday and Saturday.

However, the towns of Alpine, Marfa, Ft. Davis, Valentine, Sonora, Sheffield, San Angelo, Marathon, Ft. Stockton, Ozona, Mertzon, Eldorado, Del Rio,

TERRELL COUNTY OIL NEWS

By J. Calvin Stansell

A very extensive play along the path of oil and gas developments is now taking place in this county. Quite a large number of people in the oil industry arrived on the 15th from the Golden Gate State of California to make an inspection of the well being drilled on section 6, cert. 100, Cedar Springs block, by the Trans-Pecos Development Co., and are favorably impressed with the present log of the well and with the structural conditions in the south-eastern portion of the county.

The other test wells now in operations in the county are as follows:

Big Bend Oil Corporation's test on section 155, in block "D", M. K. & T. E. Ry. Co. survey.

Miller Brothers, test on section 10 in block D-7, E. L. & R. Ry. Co. survey.

Jessie McPhee's, test on section 78 in block D-7, E. L. & R. Ry. Co. survey.

The Mid-Kansas Oil & Gas Co. test on section 26 in block 161, G. C. & S. F. Ry. Co. survey, with 1750 pounds of rec. pressure of natural gas.

Jones et als., test on section 13 in block B-2, C. C. S. D. & R. G. N. G. Ry. Co. survey.

It is reported that Mrs. Jessie McPhee has recently purchased more mineral rights in the county, and has leased additional acreage as well, and has made two more new locations.

Representatives of several independent companies are now in the county endeavoring to lease several nice size blocks with the intent of sinking several test wells.

A geologist by the name of Wilson is still contemplating on leasing the Joe Kerr acreage in block A-2, G. H. & S. A. Ry. Co. survey, and contemplates sinking at least two deep test wells. Mr. Wilson states that his company has recently been incorporated for the sum of Five Hundred Thousand Dollars, and the boys from Michigan will do the drilling on the Joe Kerr ranch just as soon as the lease has been properly executed and titles passed upon by his attorneys.

Jay Lewis of Central Building in San Antonio now has a prospector in the field by the name of M. E. Vargas who claims to have found a brick-red mineral consisting of calcium, magnesium and potassium, in the southern portion of this county. He classified the mineral as "Polyhalite."

FOR SALE

Second-hand bucks at a price to fit the ranchman's pocket book.
2tpd. P. F. Sullivan.

Uvalde, Comstock, Langtry, Dryden, Girvin, Ft. Worth were well represented.

All visitors expressed themselves as having enjoyed the events and the cordial reception extended to them.

Speak the Truth Every Man With His Neighbor. Eph. 4:25

Truth is of such vital importance that no one can afford to esteem it lightly. In common every day affairs men should state that which bears the stamp of truth. What we say then must conform to fact, standard, ideal, duty. This is right according to the divine standard of right regulating life in common with life. Reports that do not bear the stamp of truth are hurtful in the extreme to the reporter and shameful to any people. Truth as revealed by the Bible is in its very nature the highest ideals heard by angels or considered by man. The man that lightly esteems the smallest principle with which the Bible deals and teaches men so is at once the smallest man in the kingdom of God who deserves to, and will be cast out in the last day. See Mt. 5:19:12:41.

Such statements from the source above should strike to our hearts the deepest reverence and concern.

R. E. GRIFFITH.

The subject for Sunday, June 28th is "Why Be a Christian?" In this study of this phase of the Bible we shall also consider, "How Be a Christian?.. Come and hear the many reasons why we should be Christians.

The Presbyterian Church.

Dr. McCall will preach at 11 o'clock on "Christian Life" and at 8:15 p. m. on "God's Use of Our Talents."

The Sunday school attendance is climbing up. Let all of us at home come, to make up for the absence of those away on vacations. At the Workers Conference Wednesday night plans were made to increase the efficiency of our Sunday school.

A Home Mission program will be given Sunday morning at the close of the lesson hour. The offering will go for Assembly Home Missions.

BAPTIST CHURCH

We want to thank those of our members who contributed and had part in the observance of the pastor's second anniversary as pastor of the church last Sunday. We had a good time together. All of the regular services for Sunday.
IRA HARRISON, Pastor.

THE METHODIST CHURCH

10:00 A. M.

"The whole family Sunday School."

11:00 A. M.
A Special Kingdom Extension service.

The Woman's Missionary Society will have charge of this service, and have arranged an hour's worship service which should richly bless all who attend.

The music committee of the church have arranged a special women's quartet number with a trumpet and violin accompaniment, and a special violin and trumpet duet, Messrs. Billy and Henry Goldwire.

7:00 P. M.
The Junior Epworth League meets in the parsonage reception hall.

7:15 P. M.
The Hi-Epworth League will meet at the church auditorium. Special young people's quartet at the League meeting.

Promptly at 8:00 P. M.
An hour's worship service directed by the laymen of the church.

Scripture: Acts 1:3-8, subject, "Power from on High."

Special message on some phase of this theme will be brought by the laymen of the church. Mr. L. A. Lowe is charge Lay Leader and will pre-

side. The music committee of the church have arranged two special quartets for this service, one a mixed quartet directed by Mrs. A. P. Utterback, and a male quartet directed by Carlton White. Special solicitation is made to all who do not regularly and systematically worship and work elsewhere to come worship and work with us for the Lord.

RATTLE OF THE RAIL

Engineer G. W. Toms has been assigned to a freight run El Paso to Valentine.

Fireman C. C. Chapman of El Paso is on the extra list here.

Fireman J. H. Loehausen has been assigned to a regular freight run out of here.

Fireman I. D. Hendricks and R. S. Ingram have been assigned to switch engines in El Paso.

Fireman W. H. Buchanan has returned from a visit to New Orleans where he met Mrs. Buchanan who was returning from attending a convention of the Ladies Auxilliary of the B. of L. F. & E. at Columbus.

SANDERSON 10—MARFA 0

Cecil Hutto, with a nonchalant attitude, stepped into the pitcher's box Sunday, two days after pitching a twelve inning battle, and completely subdued the visiting Marfa team. With a strong wind blowing in from the east they "popped up" his slow ball with monotonous regularity.

Leonard Howard, fast ball artist with Marfa, did not fare so well. The locals scored ten runs off his delivery. Errors of omissions and commissions by his team mates caused his downfall.

The entire local team hit and played well. Rufe Stirman, an old time star of by gone days caught for the locals and did remarkably well.

An Excellent Show

We wish to take this opportunity to compliment the boys of the American Legion for the splendid Rodeo which they conducted last week. The ball games, Rodeo exhibitions, Dances—all were good clean fast entertainment from start to finish, as was attested by the high crowds that stayed through every performance, and the Legion boys in charge handled the whole affair after fashion of experienced rodeo men.

We do not feel that this statement would be complete if we did not bring the members of the "Eat-More-Lamb-Club" in to the picture also. We have never heard more complimentary remarks about a barbecue than the one you superintended last Friday. Your chefs evidently knew their business and the dispatch with which the entire dinner was carried out deserves the highest praise.

Lesson for June 28

REVIEW: JESUS THE WORLD'S SAVIOR: SUFFERING AND SOVEREIGNTY

GOLDEN TEXT—For God so loved the world, that he gave his only begotten Son, that whosoever believeth in him should not perish, but have everlasting life.

PRIMARY TOPIC—Jesus the Savior, JUNIOR TOPIC—Jesus the Savior.

Since the lessons of the quarter center in one Supreme Person and have one transcendent theme, Jesus Christ the world's Savior, the best method of review for senior and adult classes will be to refresh the mind with the principal facts and leading teachings of each lesson. The following suggestions are offered:

Lesson for April 5.
Jesus taught humility to the disciples by the parable of how guests bidden to a wedding should seat themselves. The humble man will take the lowest place. Those who choose the lowest places in life have a chance of promotion.

Lesson for April 12.
The younger son, becoming tired of the restraints of home, demanded of the father the portion of goods which he would inherit. The father acceded to his request, and after his life of profligacy joyfully received him back into his home. This act portrays the forgiving mercy of God.

Lesson for April 19.
The story of the rich man and Lazarus gives us a look into two worlds. In this world the rich man lived in luxury while Lazarus begged at his door. In the other world their positions are reversed.

Lesson for April 26.
Prayer is an obligation on the part of the believer. It is essential to spiritual life. All true prayer is accompanied with becoming humility.

Lesson for May 3.
Zacchaeus brushed aside all difficulties in order to see Jesus. The soul which earnestly seeks Jesus shall never be disappointed. Zacchaeus proved the reality of his conversion by making restitution. He was saved instantly upon receiving Jesus Christ.

Lesson for May 10.
The Parable of the Pounds was spoken to correct the misapprehension of the disciples as to the immediate establishment of the kingdom. While the kingdom awaits establishment, it is incumbent upon the believer to use faithfully the gifts left in his hands by the Lord. While the size of the gift is a matter of sovereign choice on the part of the Lord, fidelity in its use is demanded. There is a time of reckoning coming.

Lesson for May 17.
Christ's entry into Jerusalem was his official offering of himself as the promised Messiah. His coming was in exact fulfillment of prophecy. Christ's driving out of the temple the money changers demonstrated his authority over the temple and its service.

Lesson for May 24.
Jesus knowing that the hour of his death was near, instructed the disciples to make preparation for the Passover, that he might have fellowship with them in this ordinance before his crucifixion. In connection with the Passover Feast, he instituted the Feast of the New Covenant. The bread was symbolic of his broken body. The cup was a symbol of his atoning blood shed on Calvary.

Lesson for May 31.
Jesus' indescribable agony in the garden shows us what it cost the sinless Son of God to identify himself with a sinning race. The load of sin was so revolting that the face of the loving Father was turned from his beloved Son.

Lesson for June 7.
The story of the crucifixion of Jesus presents the greatest tragedy of all history. The sinless Son of God suffering for a sinning race should move all sinners gladly to accept salvation at his hand.

Lesson for June 14.
The resurrection of Jesus Christ is one of the foundation truths of Christianity. It is the supreme proof that Christ was what he claimed to be and is the unmistakable evidence that his offering on Calvary's cross was accepted by God. The empty tomb is the supreme and grand proof of the deity of the Son of God and of his vicarious sacrifice.

Lesson for June 21.
Disputes and misunderstandings are bound to arise even among those who are members of Christ's body. Those who have been vitally united to him will be scrupulously careful lest they cause to stumble those for whom Christ died.

Never Fear
Never fear when the Lord bids you go down to the way "which is desert." The moment you set your foot in the wilderness you are the Lord's guest, and he ever keeps his table right royally furnished.—Guy Mark Pearce.

Interest in the Bible
What other book beside the Bible could be heard in public assemblies from year to year, with an attention that never tires, and an interest that never cloy?—Robert Hall.

Star for Every State in Flag of the Union

Since the admission of New Mexico and Arizona into the Union in 1912, our flag has borne 48 stars. With the addition of two more stars for these two states, it was necessary to rearrange the position of all stars in the flag. In that year President Taft issued an Executive order providing for the specific arrangement of the stars in the flag, and also designating one for each state.

Beginning at the upper left corner and following each row from left to right, the stars represent the states in the order in which they ratified the Constitution (for the first 13 states) or were admitted to the Union.

Here is the pattern of the star field, with the name of the state substituted for each star:

First row—Delaware, Pennsylvania, New Jersey, Georgia, Connecticut, Massachusetts, Maryland, South Carolina.

Second row—New Hampshire, Virginia, New York, North Carolina, Rhode Island, Vermont, Kentucky, Tennessee.

Third row—Ohio, Louisiana, Indiana, Mississippi, Illinois, Alabama, Maine, Missouri.

Fourth row—Arkansas, Michigan, Florida, Texas, Iowa, Wisconsin, California, Minnesota.

Fifth row—Oregon, Kansas, West Virginia, Nevada, Nebraska, Colorado, North Dakota, South Dakota.

Sixth row—Montana, Washington, Idaho, Wyoming, Utah, Oklahoma, New Mexico, Arizona.

List of Active Members in League of Nations

The League of Nations now has a membership of 54 states. Here is the roll of member states: Albania, Argentina, Australia, Austria, Belgium, Bolivia, Bulgaria, Canada, Chile, China, Colombia, Cuba, Czechoslovakia, Denmark, Dominican Republic, Estonia, Ethiopia, Finland, France, Germany, Great Britain, Greece, Guatemala, Haiti, Honduras, Hungary, India, Irish Free State, Italy, Japan, Latvia, Liberia, Lithuania, Luxembourg, Netherlands, New Zealand, Nicaragua, Norway, Panama, Paraguay, Persia, Peru, Poland, Portugal, Rumania, El Salvador, Siam, South Africa, Spain, Sweden, Switzerland, Uruguay, Venezuela and Yugoslavia.

The nations not in the league are these: Afghanistan, Brazil, Costa Rica, Ecuador, Egypt, the Hedjaz and Nejd, Mexico, Soviet Russia, (U. S. S. R.), Turkey and the United States of America.

Cylinder Made Air Pump

A new device that can be screwed into the spark plug hole of one of the auto's cylinders turns that cylinder into an air pump that will produce two and a half cubic feet of free air per minute. This much air is sufficient to spray oil paint, germicide, insecticide, and liquids, says Popular Science Monthly.

On the down stroke of the piston in the cylinder to which the device is fitted, the piston sucks in outside air through a spring-operated valve. On the up stroke, this valve closes and another opens, allowing the air to flow into a storage tank or into the pipe leading to the spray equipment. If more air is needed than can be obtained from one cylinder in this way, two of the devices can be used at the same time so as to double the output. It is designed to work at an engine speed equivalent to a road speed of 20 miles an hour.

Baby Whales Hatched

For the first time, writes a correspondent of the London Sunday Observer, the Budapest zoo has been successful in hatching whales' eggs in an incubator. The four baby fish which appeared are sporting themselves merrily in a small stretch of water.

As Hungary's only considerable lake, the Balaton, would scarcely be large enough to harbor four grown whales as well as its yachting societies, it is presumed that the whales will be sold, like the baby hippopotamus born at London last year, before the reach an inconvenient size.

Empty Honor

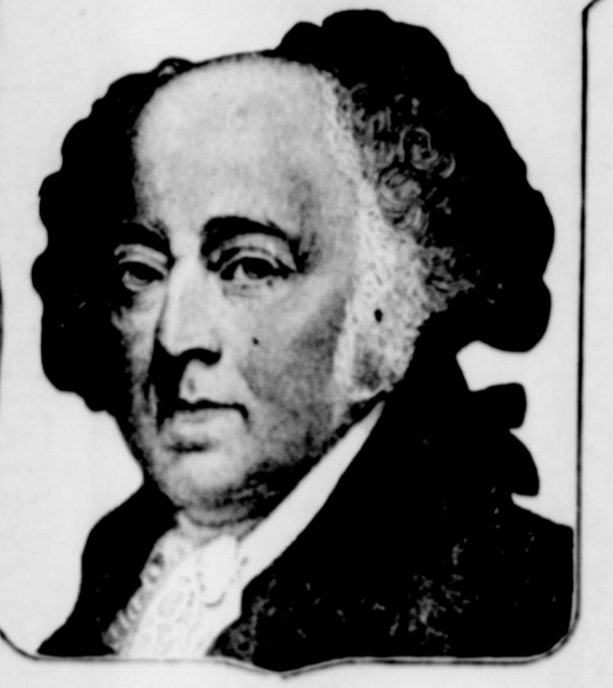

Many years ago a virulent disease broke out among the English army horses and killed them in droves. A young doctor, Griffith Evans, made blood tests, and discovered the germ that was causing the trouble—to be discredited by the army authorities, but he was right though, as ten years later the war office admitted. Now he is aged ninety-five, deaf and bedridden, living in obscurity at Bangor, in Wales. In recognition of his invaluable work he has just been given the freedom of the city.

Life is not so short but that there is always time enough for courtesy.—Emerson.

JOHN ADAMS
Died July 4, 1826

JAMES MONROE
Died July 4, 1831

JAMES A. GARFIELD
Lay Stricken by an assassin, July 4, 1881

CALVIN COOLIDGE
Born July 4, 1892

By ELMO SCOTT WATSON

IT WAS the Fourth of July, 1826. In Quincy, Mass., ancestral home of the Adams family, John Adams, second President of the United States, lay dying. From Washington, D. C., John Quincy Adams, sixth President of the United States was hurrying—if that word can be applied to the laborious progress of a stage coach over the inadequate highways of that day—to his father's bedside. About noon the dying man opened his eyes at the sound of ringing bells and booming cannon which drifted into the open window. Mrs. Clark, his daughter-in-law, bent over him and in answer to the unspoken inquiry in his eyes reminded him that it was the Fourth of July, the fiftieth anniversary of American Independence. "It is a great day," he said. "It is a good day."

About one o'clock in the afternoon he spoke again. "Thomas Jefferson survives," he said, but the last word was indistinctly and imperfectly uttered. After that he spoke no more. He could not know that at the very moment when he was saying "Thomas Jefferson survives," the sage of Monticello was breathing his last in far off Virginia.

The death of these two men on the day which they helped make famous also ended a most unusual friendship and a famous correspondence. This friendship and this correspondence is also one of the unique and most human bits of American history. In those stirring days of 1776 they, as members of the Continental Congress, were associated closely in one of the greatest adventures of history—that of producing a document which would either result in the establishment of a new nation or, in case military force failed to make good that document, in their becoming unsuccessful rebels and perhaps ending their careers on the gallows. The choice of drafting that document lay between them, and Adams, in his autobiography, gives the following reasons why Jefferson was chosen for that work.

"Mr. Jefferson had been now about a year a member of congress, but had attended his duty in the house a very small part of the time.

"It will naturally be inquired how it happened that he was appointed on a committee of such importance. There were more reasons than one. Mr. Jefferson had the reputation of a masterly pen; he had been chosen a delegate in Virginia in consequence of a very handsome public paper which he had written for the House of Burgesses, which had given him the character of a very fine writer. Another reason was, that Mr. Richard Henry Lee was not beloved by the most of his colleagues from Virginia, and Mr. Jefferson was sent up to rival and supplant him. This could be done only by the pen, for Mr. Jefferson could stand no competition with him, or

anyone else, in eloquence and public debate.

"The committee had several meetings, in which were proposed the articles of which the Declaration was to consist, and minutes made of them. The committee then appointed Mr. Jefferson and me to draw them up in proper form, and clothe them in proper dress. The subcommittee met, and considered the minutes, making such observations on them as then occurred, when Mr. Jefferson desired me to take them to my lodgings, and make the draft. This I declined, and gave several reasons for doing so:

"1. That he was a Virginian, and I a Massachusettsian. 2. That he was a southerner man, and I a northerner one. 3. That I had been so obnoxious for my early and constant zeal in promoting the measure, that every draft of mine would undergo a more severe scrutiny and criticism in congress than of his composition. 4. And lastly, and that would be reason enough, if there were no other, I had a great opinion of the elegance of his pen, and none at all of my own. I therefore insisted that no hesitation should be made on his part. He accordingly took the minutes, and in a day or two produced to me his draft."

When the Revolution ended successfully, and the Republic was established, they became political enemies—Adams the Federalist and Jefferson the Republican. In the Presidential campaign to select a successor to Washington, Adams came out victorious only to be swept aside by the people in favor of Jefferson four years later. In 1812 through the entreaty of their mutual friend, Benjamin Rush of Philadelphia, a correspondence began between them in which their warm mutual esteem was evident.

In this correspondence they unburdened their hearts and minds to each other.

And what an amazing correspond

ence it was! Some of Adams' letters to Jefferson run to 3,000 and even 4,000 words and to these Jefferson responded in kind. One of the most touching of them all is Jefferson's last letter to his colleague. Deploring the interruption but asking permission for his grandson, Thomas Randolph, to pay his respects to Adams on a visit to Boston he said:

Like other young people he wishes to be able in the winter nights of old age to recount to those around him what he has heard and learnt of the heroic age preceding his birth, and which of the Argonauts individually he was in time to have seen. . . . It was the lot of our early years to witness nothing but the dull monotony of a colonial subservience; and of our riper years to brood the perils and labors of working out of it. There are the halcyon calms succeeding the storm which our Argosy had so stoutly weathered. Gratify his ambition then, by receiving his best bow. . . .

Five years later, it was the Fourth of July, 1821. Again the bells were pealing and the cannon booming. But in New York city they were suddenly stilled for James Monroe, fifth President of the United States, lay dead in his home on Prince street, far from the scenes of his youth in the hills of old Virginia, and far from his beloved home "Ash Lawn" near Charlottesville. It was from the University of Virginia there that he had marched away as a young lieutenant to win the approval of his fellow Virginian, George Washington, on revolutionary battle fields. And when at last he had retired from a long and distinguished public career as an ambassador to foreign lands, as a member of two President's cabinets and finally as President himself, he had come back to Ash Lawn to spend his declining years, only to be forced by debt to sell it and make his home at last in New York city.

Fifty years later, it was the Fourth of July, 1881. In a darkened room in the White House James A. Garfield, President of the United States, lay stricken by the bullet of an assassin. Two days previously on July 2 while he was standing in the Baltimore and Potomac railroad station, Charles J. Guiteau, a disappointed office seeker whose diseased brain was responsible for his terrible act, had shot down the President. For several weeks Garfield lingered between life and death until it was thought best to move him to Elberon, Long Branch, N. J., where it was felt that he might regain strength more rapidly. At first the change seemed to benefit the President but his strength had been so sapped by the prolonged illness that the end came at last on September 19, 1881.

But July 4 has not always been a day of deaths for Presidents. On July 4, 1872 there was born in a farmhouse near Plymouth, Vermont, a boy destined for occupancy of the White House. Calvin Coolidge was his name.

PRINCESS THEATRE

a bridle was given by the Jones Saddlery Company of Ozona to Carl Sheppard of Eldorado.

Match Calf Roping
At the close of the rodeo program on the second day a matched calf roping contest was arranged for between Carl Sheppard of Eldorado and Howard Westfall of Ft. Stockton. This was very exciting and the crowd that witnessed the roping saw some quick tying of calves. Each man roped five calves. The time made by each is as follows:
Westfall: 1st calf, 26 3-10 seconds; 2nd calf, 32 6-10 seconds; 3rd calf, 21 5-10 seconds; 4th calf, 20 seconds; 5th calf, 30 6-10 seconds; total time 131 seconds.

Sheppard: 1st calf, 32 3-10 seconds; with a 10 second penalty; 2nd calf, 21 4-10 seconds; 3rd calf, 18 1-10 seconds; 4th calf, 26 seconds with a 10 second penalty; 5th calf, 26 8-10 seconds; total time 123 seconds. Sheppard won in this contest with a margin of eight seconds. He suffered two penalties due to the fact that he crossed the line before the signal was given. The purse, which was made up by the ropers and friends amounted to \$500.

Baseball Games

Friday morning at 10 o'clock, Cecil Hutto, local hurler, and Hanna, tall elongated southpaw representing Ozona, tied up in a twelve inning pitcher's battle. The game was featured by the hitting of M. White and Bodkin of the local team. M. White hit a long fly to left center which was muffed, scoring Bodkin in the last of the twelfth with the winning tally. The final score was 7 to 5.

Ozona played ahead in the first few innings of play when they scored three runs on a couple of hits and costly errors in the left field. This lead was shortlived however. In the last half of the third with two down and a man on first and second, M. White hit the first pitched ball over the left field wall to tie the score.

The game from this stage became even a tighter battle between the two southpaws, with Sanderson gaining a two run lead late in the game only to be overtaken and tied by the boys from Crockett county. Bodkin scored the winning run in the twelfth.

Cecil Hutto cannot be commended too highly on his performance during the whole game his control and cool headwork dominated through-out.

Martin Bodkin, who proved that love of the game and a fighting spirit are great factors in baseball slammed out three timely hits.

C. White and Frank Robertson handled the right side of the infield in great style.

Second Game

Sanderson won an easy victory over Ozona, 17-4 in the second encounter of the rodeo.

Smith and Buchanan formed a dependable battery for Sanderson and won without extending themselves.

Weaver and Gray of Ozona hit home runs in the second and third innings but Buchanan settled down after this and the outcome of the game was never in doubt. M. White and Bodkin again lead the hitters.

HULINGS

ings of Rutherford, N. J.; Lieutenant-Commander Garnet S. Hulings of Baltimore, Maryland; Major Cortland M. Hulings of Rustford, N. J., and Norman Hulings, of Tulsa, Okla.

Of the nine children, only one, Norman Hulings of Tulsa, was able, on account of the great distance, to be present at the funeral which was held Wednesday from the First Presbyterian church with interment at the Elm Grove cemetery. Two of the former Mrs. Hulings sisters, Miss Kate Frazier of Sanderson and Mrs. Pat Beaird of Tyler, were also present.

Marcus Hulings had been a christian since childhood, joining the Prespyterian church when he was just a boy. Ever since that time he has been a leader in christian and civic activities wherever he was living.

A great number of friends and acquaintances of the family from Terlingua and the entire Big Bend followed his remains to their last resting place.

Mrs. W. L. Erwin and daughters of El Paso are here for the summer and have rooms at the Ware house.

W. M. U. Meets.

The W. M. U. of the Baptist church met Monday afternoon at the ranch home of Mrs. Sullivan. Mrs. McAdams had charge of the program. The topic for discussion was "The Training of Our Youth."

Mesdames Burnside, O'Dell Davis, and Adams gave interesting talks.

A duet, sung by Elizabeth Brown and Howard Black accompanied by Mrs. Harrison at the piano was greatly enjoyed.

Lillian Halley gave a piano number that was very creditable to herself and teacher, Mrs. Wilson.

Those present were Mesdames Nance, Davis, Burnside, Mussey, Adams, Deaton, Dyer, Halley, Brown, McAdams, Harrison, Johnson, Strange, Sullivan, and Miss Newman.

A delightful ice course was served by the hostesses Mesdames Strange and Sullivan.

Miss Floy Watts left Tuesday for Sabinal where she will visit friends for several weeks.

THE STATE OF TEXAS

To the Sheriff or any Constable of Terrell County, Greeting:

You are hereby commanded to summon Levi Garrett Turner, J. M. Turner, Sarah Catherine Turner Wise, F. D. Wise, J. C. Turner, R. I. Turner, Mrs. Viola Walls, Tom Walls, R. J. Turner Jr., Clara Bertha Cooper, Alfred Cooper, and Wesley "Dick" Green, the residences of all except the four first above mentioned of whom are unknown, to appear at the next regular term of the County Court of Terrell County, Texas, to be held at the courthouse thereof, in the city of Sanderson, on the first Monday in August, 1931, being the 3rd day of August, 1931, then and there to answer an application and petition filed in the said court on the 16th day of June, 1931, in the Estate of R. J. Turner, Sr., Deceased, No. 77 on the Probate Docket of said court in which J. M. Turner, Administrator of said estate, is applicant for the partition and distribution of the following described real property listed as assets of said estate: The undivided one-half community interest which was owned by the said R. J. Turner, Sr. in three hundred and fifty three and fifty-one eightieths acres out of the south two-thirds of Section 9, Block 151, E. L. & R. R. Ry. Co., Original Grantee, Certificate No. 1615, Abstract No. 268, Terrell County, Texas. You are commanded to so summon such parties, and to serve this citation by making publication of this citation once in each week for four consecutive weeks previous to the return day hereof, in some newspaper published in your county; but if there be no newspaper published in said county, then in any newspaper published in the nearest county where a newspaper is published.

Herein fail not, but have you before said court, on the first day of the next term thereof, this writ, with your return thereon, showing how you have executed the same.

Witness F. L. Burnside, Clerk, County Court, Terrell County, Texas.

Given under my hand and the seal of said court in the city of Sanderson, this the 16th day of June, 1931.

SEAL

F. L. BURNSIDE, Clerk of the County Court of Terrell County, Texas. Issued this the 16th day of June, 1931.

F. L. BURNSIDE, Clerk of the County Court of Terrell County, Texas.
