"A VISION OF TAXATION"

The following verse was sent to the Chicago Daily News by G. A. Haywood:

Each day you may see me out working on the farm.

I have a little forty, a chicken coop and barn. I love to work upon the farm and

keep it neat and clean.

But when I'm in my bed at night,

I have such awful dreams, I see taxes on the ceiling, I see

I see taxes in the kitchen, I see taxes in the hall,

taxes on the wall,

I see taxes in the dining room, I see taxes on my plate,

I believe I can taste taxes in every-

thing I eat, I believe in paying taxes, I believe

in being sane, I beleive these unjust taxes are

taxation of the brain. I see taxes on my children, I see

taxes on my wife, I see taxes on my income, I see

taxes on my life. The next bum rap that we predict

with no other can compare: It's a meter on our windpipe, then tax us for the air.

Happenings That Affects the Dinand International Problems Inseparable From Local Welfare.

According to R. G. Dun and Company, stability in many branches of industry is more sustained than at any time in the past three years. A survey by Standards Statistics indicates that, while trade outlook for the immediate future is irregular, a number of major lines are strengthening. It is interesting to note that food products are making a much better showing than industry in general.

The belief is widely expressed that a clear-cut legislative program at Washington would probably do more to initiate trade activity than any other single development at the moment. The present congress has * created the impression in business that almost anything may happen. thus forcing industry to be extremely cautious.

Spending to save through Advertising

Not many of us, these days, are troubled with so much money that we cannot spend it. But we ARE interested in spending the money we have, to get the most out of it.

One way-and not a new way, either-is to make a budget and put down, week by week, the money that comes in. down beside it, week by week, the money that goes out. So much for food, so much for clothing, so much for rent. So much for giving, and for luxuries.

It won't always be easy, of course, to stay within the budget. That's where advertising helps you. Advertisements in this newspaper tell you how much butter, foods, meats, clothing drugs will cost, BEFORE you go shopping! They point out ways to save money. They show you how to cut a little here, a little there. And they tell about new products, new ways of doing things, that help make this life of ours very much worth living!

EVEN big-city folks must have their "neighborhood stores"! Most of them would no more think of going down town to fight their way through the crowds in search of a roast for dinner than they would of walking to the factory to get a pair of shoes.

City women know that their neighborhood stores can supply them just what they want - and that, in most cases, the service is more alert and friendly.

The same thing is true of this "neighborhood". Our merchants-the men whose ads you read in this paper - are in position to furnish your home with the best and most popular brands of goods. Not only can they save you money, but they gladly relieve you of a lot of worry and loss of time.
