NUMBER 11

TAKING FEED OUT OF ONE OF TEXAS 1700 TRENCH SILOS

The silo has long been used in the storing of green feed to be used later during dry spells or in winter. The old silo was an expensive cylinder of concrete, rock or brick that cost a few hundred or a few thousand dollars. Just a few years ago the trench type silo came into popularity. In Texas in 1936 there were 5841 in use. This number jumped to 9483 in 1937, and last year the number had reached a total of 17,048, an increase of almost 80 percent, according to the Texas Extension Service. Two of this type silos are located

in Terrell County, one on the W. J. Banner ranch and the other on the Lindsay Hicks ranch. Green feed such as corn, red top cane, or any of the grain sorghums, is put into the silo with a certain amount of water and then covered over air-tight with a thick layer of dirt. The sugar in the feed starts a fermentation which continues until all of the air has been used. This action takes only a few weeks and the feed is then ready to be used. It can be stored in this manner for years without waste.

MISSISS GARRISON AND DORIS COOKE ENTERTAIN ROTARY

Scouting Activities Discussed By Field Scout Executive

Members of the Sanderson Rotary Club were entertained Wednesday at the regular luncheon hour by Miss Louise Garrison and Miss Doris Cooke. The latter gave a reading entitled "When My Pa Shaves", which drew applause from all. Miss Garrison favored the club with two numbers, "Indian Love Call" and "St. Louis Blues" to the accompaniment.

L. Malcolm R. Rogers, field Scout executive of San Angelo, was also a guest of the club and discussed Scouting activities that will take place in the near future. Camping is to start at Camp Louis Farr in two weeks and will last for three weeks. There will also be two weeks of camping at Camp Fawcett.

Mr. Rogers also showed a short picture showing demonstrating the benefits of cubbing to boys between the ages of 9 to 11, and also what advantages it meant to parents in becoming closer to their boys. Plans at present call for organization of a Cub pack in Sanderson at the beginning of the next school term.

MAYBE HE HEARD ABOUT THE COMING RAINS

Whether he was trying to get up high enough to keep from getting wet or just out for a stroll isn't known, but Mooby Bennett killed a rattlesnake on the roof of his ranch home some 25 miles north of Dryden Saturday.

Mr. Bennett had been to the corral and was coming back to the house when he looked up and saw the snake crawling around on the roof. It had eight rattles. Mr. Bennett said the only means for climbing to the roof was by way of a trellis at the side of the house. A ladder was procured and the snake killed.

RAIN—

Rains fell during the past week-end over most of this section which was worth many dollars to ranchmen. The first fall was Friday evening when a heavy down-pour followed a hailstorm. The hail was not severe and did no damage that was reported although hailstones were rather large.

Precipitation Friday amounted to 1.46 inches and .85 of an inch was received early Monday morning. Good rains were reported at Longfellow, at Dryden, and in most other parts of this section for several miles in each direction.

The rainfall alleviated suffering from the drought and saved ranchmen additional feeding expense as many would have had to start feeding within the next few weeks had it remained dry.

SCHOOL AID FOR DISTRICT WITH UNIVERSITY LAND

Winfield Given Credit For Passage Of Helpful Bill

To Sen. H. L. Winfield of Fort Stockton goes credit for the final passage of legislation which would equalize the state aid West Texas school districts to compensate them for the taxes on University lands which they cannot collect.

Sponsors of the legislation in Austin, which will equalize inequities in a previous amendment allowing counties to tax University owned lands, succeeded last week in securing appropriation of a sum to range from \$50,000 to \$75,000 annually from the state rural aid funds.

H. C. Secrest, superintendent of Rankin schools, was the chairman of the land-taxing organization, and spent much time in Austin urging its passage and aiding Sen. Winfield and Rep. James H. Goodman, who aided with the matter in the House.

In Terrell County there is some 61,884 acres of University land which has a total valuation of \$86,610, and according to Judge Sims Wilkinson will yield better than \$700 for Terrell County Schools.

**72 HIDDEN TAXES
BOOST TOTAL COST
OF COTTON DRESS**

Dallas (Special) — Cotton grown by the Texas planter picks up parts of local, state and federal taxes on its way through business channels to the retailer's shelves, Mrs. Kenneth C. Frazier, president of the National Consumers Tax Commission, said here today.

Citing an NCTC survey of taxes affecting the cost of a cotton dress, she stated that fractions of the taxes, accumulated at every step of the production and distribution of the finished cotton goods, are paid by consumers in higher retail costs.

Leader of the commission's non-partisan crusade to "arouse tax consciousness among women and to expose hidden taxes," Mrs. Frazier declared:

"Hidden taxes, which now produce a major share of all local, state and national tax revenues, raise retail prices, thereby reducing buying power and tending to retard sales. For example, they make up 8.4 percent of the cost of a cotton dress. As a result, a Texas woman buying \$3 cotton dress actually gets a \$2.75 article and pays 25 cents in hidden taxes.

"These unseen levies, paid by consumers on all necessities as well as luxuries, on a cotton dress are originally taxes against planter, ginner, country buyer, railroad, coastwise shipper, cloth mill, dress manufacturer and retailer. Unable to absorb their tax load, these businesses must pass on a share of their taxes to the ultimate consumer."

Study groups in the NCTC tax education campaign already are active in 4,200 communities, Mrs. Frazier said, with more than 500 of them in Texas. Mrs. Volney W. Taylor of Brownsville, is NCTC national committee member for the Lone Star State.

First Camp-Site Bought for Migratory Workers By Government

Raymondville—The Federal government is today in possession of land near here for the first of four Texas camps to be built by the Farm Security Administration for migrant farm laborers.

for final consideration at Washington.

The Raymondville camp will cost approximately \$250,000 and accommodate 343 families. There will be 50 three-room cottages, 249 one-room metal shelter units, and 44 platforms upon which migrants may erect tents.

"These camps are an experimental remedy for a condition brought about by displacement of many thousands of farm tenants who were once comparatively secure upon the land," Mr. Evans said.

"The conditions under which these laborers are living constitute a menace not only to the communities in which they are temporarily located," he stated, "but also to the entire state."

Other migratory labor camps will be located at Westaco, Robstown, and Sinton.

ERADICATION OF RODENTS TO BE REQUIRED IN 1939

College Station—Reports to the AAA's state office here indicate that Texas ranchmen who participate in the Range Conservation Program this year are going to make it tough on the rodents and insects that have been killing out the grass.

Howard Kingsberry, Santa Ana stockfarmer and member of the State Agricultural Conservation Committee, said a number of county committees have indicated they will require ranchmen to eradicate prairie dogs, kangaroo rats, moles, gophers, cut ants, red ants and grasshoppers to more completely effacuate the purpose of deferred grazing.

The 1939 program that county committees may set up certain additional requirements in connection with deferred grazing if the State Committee approves of the added requirements as being

in the interest of range conservation.

Use may be made of 20 percent of a ranch's range-building allowance to help defray cost of carrying out the supplementary practices. The State Committee has indicated it will approve rodent and insect eradication under this provision.

"We've been inclined to underestimate the damage done to our ranges by rats and prairie dogs, and other little varmints and insects that destroy grass and other desirable plants," Kingsberry asserted. "But there's no use to defer your land from grazing by livestock and leave it to the prairie dogs. If there are enough of them, they'll make more grass disappear than the stock ever would."

Engineer Warns Motorists of Broken Stripes on Highways

Austin—"Stay on your own right-hand lane, clear of the centerstripe except when passing," is the warning issued today to motorists traveling Texas highways by Harry S. Phillips, Traffic and Safety Engineer of the State Highway Department.

Pointing out that of the 353 persons fatally injured in traffic accidents in this State during the first three months of this year, 80 of those or 22.7 per cent were killed in head-on collisions between motor vehicles. Mr. Phillips stated that an observance by motorists of the traffic striping being inaugurated on the major highways of the State will contribute greatly to their safety.

In addition to a continuous centerstripe on all hard-surfaced roads, auxiliary or broken stripes are being painted on curves and hills and other places where sight distance is restricted. The broken stripes begin at a point of short sight distance and continue to a point from which the driver is able to see at least 1,000 feet ahead. Black asphalt paint is used on concrete and light colored pavement and white paint is opposite your side of the centerline. You may safely pass vehicles in front," Mr. Phillips explained "but where the broken stripe is on your side of the centerline, then crossing the double stripe is prohibited. This usually applies to bridges, overpasses, hills, and curves with restricted sight distance."

Broken stripes appearing on both sides of the centerstripe in certain locations indicate that sight distance is restricted in both directions in either direction is dangerous.

"On four lane highways, use the inside for passing only and never cross the double stripe," Mr. Phillips warned.

If the motoring public will comply with the safety rules incorporated in the stripes appearing on the highways, refrain from driving while under the influence of intoxicants and at all times stay as far from opposing traffic as possible, a large reduction in the number of head-on collisions during the rest of this year will be achieved, the Traffic Engineer predicted.

"Remember," he said, "selfishness, discourtesy, and inattention on the part of drivers were responsible last year in Texas for the death of more people than suicides and murders combined."

Scouts To Attend Camp Louis Farr

Assignment of Troops for the 3-week periods at Camp Louis Farr are being made this week by Assistant Executive L. Malcolm R. Rogers. Scout leaders will come largely by districts with the first week, June 4th, being given over to Troops from the Permian Basin, Ballinger, and Ranch Districts. The second week, June 11, will see Scout units from San Angelo and Brady in attendance. The third week it to be conducted on a different basis, with an even greater emphasis on Troop camping and cooking.

A special group of troops, making requests, will be scheduled for this period. Each Troop is expected to be accompanied by a Scoutmaster, Assistant, or member of the Troop Committee, so that the programs learned at camp will be carried on in the troop through the balance of the year. Emphasis on the Troop camp with leaders directly in charge and the Troop Camping as a unit, will be featured again
