#### **NEW CUSTOMS** OFFICER COMES TO SANDERSON

### Don't overlook the Clearance ed with Capt. W. L. Barler in

The committee which was appointed by the people of Sanderson for the purpose of collecting money for the purchasing of fire-fighting equipment has met with good response from the majority of the persons contacted, with a total of \$1646.00 on hand.

ARE YOU ONE AMONG THE FEW?

There are a few local property owners who have failed to contribute their part toward this fund to date, however. Of these there are only 49, some of whom have never been contacted by the committeemen; some of whom have been asked and who have promised to pay at a later date. The Latin-American property owners are not included in this

If you happen to be one of the 49 who have failed to do your part toward this cause, whether you have been overlooked by the committeemen or whether you have felt that you were unable to help at present, you are holding up the purchase of necessary equipment for proper fire protection for not only your home, but the homes of your friends.

You are also placing yourself liable for a lot of blame should someone's home burn, or somebody's little son or daughter be lost in a fire. The equipment cannot be bought until the money is collected with which to make payment. Your part, until it is paid in simply means that you are partly responsible for the delay.

The committee is endeavoring to bring the subscription campaign to a close within the next two weeks. Do your part and pay your contribution TODAY at the Sanderson State Bank, the Times office or to Judge R. S. Wilkinson.

SUBSCRIPTION PRICES (In Advance)

One Year \$2.00 \$1.25 Six Months.

MAYBE WE DIN'T SAY IT JUST RIGHT

Some of our readers, in reading the editorial which appeared in the December 29 issue of the Times, concerning the \$12,000 allotment which went to Reeves County seemed to get the idea that Terrell County had been handed \$12,000 in cold cash to be spent for the right-of-way or for anything else that might come up in the way of road work

It was not intended that this impression be created. nor do we believe that if the article is read carefully, will you read it that way. The money was allocated to Terrell County to be used on road improvement between Sanderson and the Terrell County line on the Fort Stockton highway. Nor cou'd the money be spent for anything else other than improvement, and under the direction of the State.

Procuring of the required right-of-way on which the \$12,000 would have been spent was up to Terrell County and Terrell County would have had to pay for it. And this right-of-way would probably have cost almost as much as the State allocated for the improvement.

As stated in the previous article, we know that only \$12,000 worth of imprevement on a new right-of-way isn't going to make the best road in the county, but we do believe that if we ever expect to have a paved road between Sanderson and Fort Stockton, Terrell County is going to have to purchase a right-of-way. Had the necessary land been bought for the road, there was no guarantee that we would have a better road at present but it would have been just a step nearer for we know that the State will never pave the highway in its present location.

No matter what Terrell County gets, the people of the county are going to have to pay for it. Our stand was, and is. that a good road to the north will be of much value to Sanderson and Terrell County. Whether it would repay us in the long run to work toward this goal by spending the amount required for the right-of-way is a matter of opinion.

# easing and Exploration Of and Gas Produc A Year 'Round Cash Crop for Every Section of Texas Twenty years ago only 30 counties in Texas produced oil. TODAY OIL AND GAS ARE PRODUCED IN 147 COUNTIES! Ninety-eight additional counties are receiving the benefits of leasing and exploration activities. Thus in 245 of Texas' 254 counties, business, government, tax collector. wage earner, farmer and rancher receive their part of the oil man's expenditures every month in the year. Even the dry holes (52,000 drilled to date at a cost of a billion dollars)

contributed their share of employment and wide distribution of money. Last year land owners received 50 million dollars in lease rentals and

bonuses alone. In many counties where oil is a major factor, local government receives as much as 90% of its total tax revenue from the oil business.

Then, too, the State collects 45% of its tax money (exclusive of the gasoline tax) from the oil man. In 1938 this was 32 million dollars.

EVERY BARREL OF OIL PRODUCED IN TEXAS IN 1938 PAID AN AVERAGE OF 9.3 CENTS TAX.
