MRS. CONWAY F. PICKARD

H. Underwood of Sanderson, became the bride of Conway F. Pickard, son of Mr. and Mrs. William M. Pickard, of Levelland, Texas, in a setting of white carnations and fern. The Rev. Taft Holloway performed the ceremony in the presence of members of the immediate families and a few intimate friends. Preceding the ceremony, Ross Underwood, brother of the bride, played softly, "At Dawning," and Miss Lily Albertson sang "I Love You Truly," accompanied by Mrs. May Wilson. The bridal party entered to the strains of the "Bridal Chorus" from Lohengrin.

The bride wore a powder blue suit in tailored style with a fitted jacket and a dusty rose blouse. Her accessories were of a matching dusty rose and she wore a corsage of pink carnations. ## Interest in Range Conservation Shows Continued Increase

Steadily increasing interest in the range conservation program is being shown by ranchmen all over the state, Howard T. Kingsbury, state agricultural Conservation Association committee-man from Santa Anna, reported following a series of three meetings in West Texas to study the 1940 program.

"Participation in the program this year probably will be even greater than the record participation of 1939," Kingsbury said. "The committeemen, both community and county, are interested in getting 100 per cent cooperation with and belief in the program are important."

Meetings were held in Fort Stockton, Big Spring, and Brownwood and were attended by committeemen, AAA administrative assistants, county association secretaries, Extension Service district agents, county agricultural agents, and range inspectors. Fred Rennels, state AAA range representative, Jess H. Watson, state ACA committeeman from New Castle, and Kingsbury represented the state office.

Long-time planning of range improvement work is underway, Kingsbury said, as the ranchmen realize more and more that it is necessary to map out their conservation work in advance. County agents and county AAA officials reported at the meetings that many ranchmen were laying plans for range improvement and conservation which would take several years to be realized.

**BANKS AND NEWSPAPERS**

Newspapers and banks have at least one thing in common, in the opinion of the Ouachita Citizen of West Monroe, Louisiana. Both of them get plenty of criticism.

"The most difficult task that we can think of at the moment is to run a bank or a newspaper to please everyone," says the Citizen. "If the banker is conservative he is charged with not being helpful to the community. If he lends the depositors' money too freely he is criticized when the borrower can't repay and the bank closes. The newspaper man who prints all the news regardless of who makes it, is criticized and called sensational. If he leaves it out he is charged with being afraid to print the news. The best plan for the banker or newspaperman to follow is to run his business the way he thinks it should be run and let the citizens criticize."

"It would be an interesting experiment if 'self-starting' critics were given charge of the nation's banks and newspapers for a period. It's a safe bet that they'd rapidly learn a sad lesson—and an equally safe bet that the public which depends upon the banks to safeguard its money and newspapers to give it the news of the world, would take a terrific beating. Amateur banking has given the American people and American business unparalleled service—it furnished the financial lifeblood that built this nation in world record time. The American newspaper gives the people better, more complete and more accurate coverage of what is happening a mile away or ten thousand miles away than the press of any other country. The bankers and the editors will go on doing these vital jobs while the critics criticize."

TEN YEARS AGO  
This Week—Remember?**

February 15, 1930

**WITH OUR  
NEIGHBORS**

Monahans News—Possibility of a move to gain more funds for the construction of Ward County's new courthouse was seen here this week as reports from all parts of the county indicate that most people believe the \$150,000 structure will be inadequate to meet the needs of the county.

McCamey News—McCamey property owners will go to the polls here Saturday to vote on a \$250,000 bond issue to decide whether to buy the water works with a loan from the Reconstruction Finance Corporation. The issue calls for a purchase price of \$200,000, the remaining \$50,000 to be used in extensions and repairs to the present system.

Uvalde Leader-News—The huge crowd, which milled in and around the new livestock building of the Southwest Texas Livestock and Agricultural Exposition throughout the day, saw the Woodley brothers of Sabin—T. M. Jr., and Fred—walk off with a major part of the prizes in the calf division for the second

consecutive year. Last year they repeated and came through with flying colors against a field that offered extremely keen competition.

Big Bend Sentinel—Conservation minded owners of the ranch land in the Highland section, and there are many of them, will be interested to know that a further step has been taken toward setting up of a Soil Conservation district embracing a large part of Presidio County.

Fort Stockton Pioneer—Pecos County's first annual Fat Stock Show held here Saturday was well attended, despite unfavorable weather, and the initial local effort in exhibiting livestock was declared an outstanding success, giving promise of bigger and better shows in the years to come.

Hudspeth County News—A big two-pound lemon was brought here from the lower Rio Grande valley by Mr. and Mrs. Art May of Lake Park, Iowa, who are on a tour. It was raised by Dr. Walter Ross farm between Edinburg and McAllen.

Texas Mohair Weekly—Fort Worth—Cuba struck a blow to the Texas Sheep and Goat Raiser's Association by requesting two specimens of the Angora goat for the zoo in Havana.

Happy enough to fill the order Fred T. Earwood of Sonora, was nevertheless that the Angora should be looked upon as a curiosity or a museum piece. Cubans will find, he says, that his beauty is one of the least of the goat's good points.

Alpine Avalanche—Discontinuance of football and other forms of intercollegiate athletics in favor of an extensive general Physical Education and student activity program is announced by Sul Ross State college.

**Test New Deer Traps**

Hoping to be able to restock more land with deer than ever before and at the same time bring about a better balance between bucks and does on certain areas which are overcrowded with does, the Texas Game, Fish and Oyster Commission is experimenting in the Hill Country with a one-deer-at-a-time trap. Traps used by the department heretofore were made to hold several animals at a time and were too cumbersome to tear down and transport to other places as needed.

The new traps are similar to

those used in the Pisgah National Forest of North Carolina by the U. S. Forest Service. Slight variations were made by the Game Department. Deer trapped in the new devices cannot injure themselves and they can be removed with a minimum of trouble and placed in trucks to be transported to areas in need of restocking.

The area in which the traps are being tested is heavily overstocked with does. The Game Department will reduce the over-supply of female deer there and will at the same time be able to restock other areas. This work will supplement other stocking operations carried on annually by the department.

Should the new traps prove as successful as expected, 200 will be constructed for the next trapping season, it is announced by the executive secretary of the Game Department.

**Coyote Pinned Quail**

Houston Lockhart, plow foreman on the huge King ranch, is hoping to be able to trap a certain coyote he saw in action recently. If he does, he may have the most unusual bird "dog" ever known.

Mr. Lockhart was going along a pasture fence near Kingsville one morning during the open season on quail when he saw a coyote come down on a point exactly like a bird dog. The coyote held the point for a full minute, then broke and pounced into the center of a covey of Bobwhites. He came up with 1 in his mouth and then slunk away into the brush.

**Bluebird Traveled Far**

Another note on the migration of birds was added to the records recently when a Bluebird released by the Bureau of Biological Survey in Washington, D. C., in 1938 was caught by Clyde Anderson on the farm of Mrs. M. G. Jackson near Winters, Texas. Birds are banded and released in an effort to determine the migratory habits of the various species.

**National Flower  
Show Set for  
Feb. 28 to March 6**

Thousands of Texas women will gather in Houston for the National Flower Show February 28 through March 6, according to Mrs. Joe F. Brown, local chairman.

Word was received here from Mrs. O. H. Carlisle of Houston, chairman of the women's committee for the flower show, that arrangements are being made which will make the eight days memorable among women's events in the state.

First of all there will be the Flower Show itself, which is being shown in Houston for the second consecutive year; which was so widely acclaimed last year and which returns this year—new and different and far more elaborate.

W. Ray Murphy, chairman of the National Flower Show committee announced from Houston that more than \$1,000.00 worth of flowers will be assembled under the roof of the Sam Houston Coliseum, with a Dutch garden, glamorous with the rich coloring of 25,000 blooming tulips and hyacinths from Holland, serving as the central theme.

Mrs. Carlisle explained that the flower show will furnish more than exquisite spectacle—it will be the rallying point for flower and garden lovers from all over the state. She said that a "hostess room" in the Coliseum has been set aside for this purpose.

"And so far as the women are concerned, tentative plans are being formulated for a series of Spring style shows and receptions of various sorts," said Mrs. Carlisle.

"In addition, the River Oaks Azalea Trail will be held during the show—March 2, 3 and 4—with twelve of Houston's loveliest gardens open to inspection. On March 4, there will be a concert of the Houston Symphony Orchestra at the City Auditorium.

"All of this will make attendance at the National Flower Show a gala occasion and one which will merit a stay of several days in Houston."

Texas' present proven oil reserves of 10,794,055,000 (billions) barrels are over five billion barrels more produced in Texas during the past fifty years.

Mr. and Mrs. H. H. Stokes were visitors to San Antonio Sunday and Monday.

Miss Sue Estep accompanied Miss Mozelle Rogers as far as Del Rio on her return home to Waco after visiting two weeks with Miss Estep.

Mr. and Mrs. D. B. Ambrose of Clinton, Mo., are here visiting in the home of Mr. and Mrs. Lee McCue. Mrs. Ambrose and Mrs. McCue are sisters.

Mrs. W. E. Lea returned home Wednesday from Del Rio where she spent a few days with her mother, Mrs. V. R. Gildea.

## Who's Who Among Seniors

You've probably wondered who that tall, dark and handsome (?) senior spinning around in either a swank auto or a run down is. You usually see him with Edgar and John Fisher. His name is Bobbie Lee McCue, and he's free, white and 17. Bobbie was born October 28, 1923, at Del Rio. He started to school at Sanderson, and this is his eleventh year here. This year he is taking Bookkeeping, English IV, Economics and Shop. Shop is his favorite.

Bobbie likes to work on cars. He dislikes bookkeeping and spinach, very much. His ambition is to go to Curtis-Wright Technical Institution in Los Angeles, and become a Master Mechanic in Aviation.

Born March 7, 1924. Marjorie "Chiche" Canon is the youngest in the senior class. She was born in San Angelo, had spent most of her earlier years growing freckles on a ranch. The nickname "Chiche" has remained with her since her baby days, when big brother Hicks tried to call her "sister," and succeeded only in saying "Chiche."

Until Marjorie was in the 4th grade, she was taught by her mother on the ranch. Then she started to school in Sanderson Grammar school, and has been going here ever since. She is a senior this year, and is taking algebra II, bookkeeping, American History and English IV. Of this group of subjects, Marjorie prefers bookkeeping.

Chiche has a tremendous liking for Bud, Erma Lee and "Blue Orchids." She dislikes English IV.

IVY LOU PHILLIPS NEW PUPIL Ivy Lou Phillips has recently enrolled as a new pupil in the seventh grade in the Sanderson schools. She comes from Marfa. George O'Neill has recently withdrawn from school when he moved with his parents to Sabinal.

The Rankin Red Devils will play in Sanderson Saturday night at 7:30 p. m. The Eagles defeated the Red Devils in a game at Rankin last Friday night by a score of 36-6. The game was tied several times during the game and in the last few minutes the Eagles could not miss while the Rankin boys were unable to hit the basket.

## Newspaper Staff Practices Interviewing

Wednesday at newspaper club the staff had a big time pretending Vivian Earwood acted as reporter for Chicago Tribune interviewing Vice-President Garner (Kenneth Litton) about a fishing trip off the coast of Florida. Martha Bassett was a reporter for the San Antonio Evening News and got all the dope on Clark Gable's trip through San Antonio. Gable was Al Creigh. Wilton Dishman was reporter for the San Antonio Express interviewing the tennis champion, Alice Marble the blonde tennis champ turned out to be Chiche Canon.

The staff will now know better how to approach people for interviews.

## DATE CHANGED FOR BI-COUNTY MEET

A letter from Supt. C. G. Matthews was recently received here stating that the date of the bi-county meet would be changed from March 15 to some other date. It was necessary to change the date of the meet due to the teachers meeting in El Paso. Mr. Holt states that the probable date for the meet will be March 22, a week from the original date.

## JUNIOR CLASS PREPARING SHORT STORY UNITS

The junior class for the past week have been preparing units on short stories for English III. Some of the stories they have prepared units on are: "Outcasts of Poker Flat," "The Fall of the House of Usher," "Paste," and others. These units are made into forms of attractive booklets which made the project a very interesting and worthwhile one.

## ATTENDANCE RECORD DROPS DURING SIX WEEKS

The attendance record for the high school dropped considerably during the past six weeks due to so much sickness and cold weather. It is hoped that all students who are sick will be able to attend school again soon so the attendance record will again be back to its normal position.

Forest fires can run uphill more rapidly than downhill, the heated air drawing the flames upward, Texas game department biologists say.

## "Know Your Texas" Contest

A "Know Your Texas" contest is being sponsored by the Dallas Morning News for pupils and teachers in Texas high schools. The contest is open to any pupil in any grade from the fourth through the highest grade in school. Teachers in schools in Texas may enter the contest.

There is a small "Guide Booklet" put out with 130 questions in it. Each pupil who enters must answer 20 questions completely and correctly in the "Guide Booklet." Teachers who enter the contest must answer all the 130 questions. The "Texas Almanac" and the "State Industrial Guide" are to be used in answering the questions. After answering the 20 questions the pupil must write in no more than 100 words, the best possible statement explaining how "The Texas Almanac" and "State Industrial Guide" can help him in his school work.

Teachers must write the 100 word statement explaining how the two books will help them best in teaching. The contests provide a properly sponsored De Luxe tour of Texas for forty-eight winning pupils and \$100 each for six winning teachers. The contest closes June 1, 1940.

## WHITE BASS SOON TO BE FOUND IN ALL TEXAS WATERS

Austin, Texas—Texas is being invaded again! Members of the onrushing horde are spreading so rapidly that in a short time they have traveled from deep east Texas as far west as Medina Lake.

However, the timid need have no fear for the invaders are white bass, often called striped bass, sand bass and bar bass. These fish, which rank with the carp as being the most prolific in fresh waters are being helped along in their invasion by the Texas Game, Fish and Oyster Commission, which has high hopes of being able to stock every suitable lake in the state with this fine sport-food member of the finny tribe.

Actually the spread of the white bass has been amazing. Oddly enough, it, many, many years ago was a denizen of salt water, but members of the clan transported to fresh water adapted themselves to their new environment and are now providing much sport for Texans who wield rod and reel or an ordinary cane pole.

Until 1932 the only lake in Texas in which white bass were known was Caddo. That year, J. A. Wikerson, then superintendent of the Dallas State Fish Hatchery brought thirteen of the brood white bass to the Dallas hatchery and then transplanted them in Lake Dallas.

From those thirteen brood fish and a few more which have been taken out of Caddo Lake has come enough fish to stock several other huge lakes. Plantings in all but one or two lakes have been successful and in almost every instance of failure it was because the lake in question did not have at least a fair size stream emptying into it. White bass, like salmon, must travel upstream in the spring to find suitable places in which to spawn. Following the spawning season they return to the lake proper but will never spawn in a lake.

That is the reason the State Game Department cannot raise white bass in hatchery ponds. However, the department is able to obtain sufficient brood bass from Lake Caddo with which to stock lakes and the invasion of the striped bass continues. Lake Dallas provides an excellent example of the proficiency of the white bass. A year after the thirteen brood fish were placed in Lake Dallas a few of them were caught. However, by 1935, just three years after the transplanting, striped bass were caught by the thousands. Commercial fishermen easily netted as many as 400 pounds of them in a day. However, it was not long before the game department was able to apply the same regulations to this species of bass as applies to other bass.

planting of the fish at Lake Dallas, the Game Department started stocking other lakes. In 1938, Bill White, present superintendent of the Lake Dallas Hatchery, placed 100 in Lake Kemp, 140 in Lake Buchanan, 126 in Medina Lake, 50 in Eagle Mountain Lake, 108 in Lake Waco and 125 in Lake Wichita. They have prospered in all those lakes. Last summer many sportsmen working those bodies of water wondered what kind of a strange fish they had caught. This winter scores of fishermen are catching many of the bass at Buchanan Lake, despite the fact that body of water like many others was stocked with a few brood fish less than two years ago.

White bass weighing from one-half to two and one-half pounds are used for stocking purposes. The reason these bass are able to stock a lake so quickly will be readily understood when it is known that each female lays from 400,000 to 500,000 eggs. A laboratory count in Texas last spring showed 480,000 eggs taken from a two-pound fish. When these figures are compared with the egg capacity of other species of fish it can be readily understood why sportsmen are catching white bass in goodly numbers. A 20-pound salmon will average 16,000 eggs. Two to four-pound rainbow trout lay 3,000 eggs, brook trout of the same size 2,500; a two and a half pound smallmouth bass 3,000 to 10,000 and a largemouth bass of the same size 6,000 to 20,000 eggs. Only a carp rivals the white bass in egg production. A four to five pound carp will average 400,000 to 500,000 eggs. The white bass, by that or any other local name tacked on it, is a good fish for sport or for the table. It attains a length of 18 inches. Not too particular in its diet, it will take a hook when baited with small minnows, angleworms or grubs and will also strike flies and plugs. It can be recognized by its silvery color tinged with golden below. Its sides are striped with narrow dusky lines, about five above the lateral line, one along it and has a variable number below it.

## TEXAS OUT-O-DOORS

Assist in Duck Survey

A number of game managers, biologists and other field men of the State Game Department are assisting the U. S. Bureau of Biological Survey in its annual duck goose and swan census. A project in which more than 3,000 employees of the Bureau and co-operators are assisting. The census under way at this time is the sixth annual and is being taken throughout the United States with the vast corps of observers using blimps, airplanes, autogiros, boats, motor cars and snowshoes to get to the waterfowl concentration areas. After returns are made to Washington from the numerous district headquarters of the Bureau of Biological Survey will have a rather definite idea of the total number of ducks, geese and swans on the North American continent. This information is important, for it is with the aid of it and observations made during and after the nesting season, that Bureau officials determine the policies to be in force during the 1940 duck hunting season.

## Quail Drifted 15 Miles

While quail generally remain in the vicinity where they are born or planted, a report of a quail having traveled fifteen miles from where it was liberated last March was received recently by the State Game Department. The female bobwhite was banded and released on the Parks ranch in Goliad county during the closing days of quail season the bird was shot two miles southeast of Schroeder, Texas, almost exactly fifteen miles from the spot where it was released. Lack of sufficient food or cover was given by Game Department biologists as the reason for the lengthy trip made by the quail.

## Cobb Praises Texas Hunting

Irving S. Cobb, noted author and humorist who has not failed to come to Texas for hunting for a good many years, was high in his praise for deer and duck hunting following his tour of the Lone Star State recently. Mr. Cobb, who got his two bucks while hunting in southwest Texas, also took advantage of the open season on duck during that time to get in several days' shooting at Eagle Lake in Colorado County. Eagle Lake has just about the finest duck hunting I ever saw, he said. Returning the compliment, observers noted that the author can really shoot, according to the Galveston News.

## Gets Double Fish Catch

Wymon O. McInnis of the Cox and McInnis Ranch near Brownwood didn't waste a great deal of bait in catching two fish recently. He snagged a 27 1/2-pound catfish and saw protruding from its mouth the tail of another fish. It proved to be a one and a half pounder the cat had caught just before it greedily snapped up the McInnis bait.

## Taking Creel Census

The Fort Worth Angler's Club, co-operating with the Texas Game Department in attempting to provide better fishing at Eagle Mountain Lake and Lake Worth, is inaugurating a creel census. Blank cards to be filled out after every fishing trip will be provided members of the club and resort owners along the lakes. Figures on catches will be carefully tabulated and probably will provide the aquatic division of the Game Department considerable valuable data. Other organizations desiring to conduct creel census will be provided the form for them by the Game Department.

## SLY SI SAYS

By Paul Patterson

We see in the papers where about six Republicans are lining up for the "Gone With the Wind" season—Landon, Dewey, Vandenberg, Taft, Lodge, and Hoover. We recollect last election where Hoover made a witty little address and someone compared him to the immortal old Will Rogers. We will say he was like old Will in one respect—they both made jokes outta the government.

Speakin' of six Republican candidates reminds us of that old verse about The Blind Men and The Elephant so we'll recite the latest version of the same.

## THE BLIND MEN AND THE ELEPHANT

It was six sage Republicans (To G. O. P. inclined) Chose to pursue an elephant; It seems their course was blind. "We don't see why the-hell-e-cant Make leaders of our kind." The first approached the elephant When nominations ceased In terms quite rough but eloquent He swore to say the least "Curse thee," quoth he "thou elephant Art a deceitful beast."

The second, feeling his remorse Cleared up his achin' throat "I see" quoth he "the elephant Is like a leaky boat. He sunk my hopes right nigh the shore And made of me the goat!"

The third betrayed by elephant Upon the scene did mope. He sat him down upon the ground With his distress to cope. "I see" quoth he "the elephant Is like a hangman's rope."

The fourth came amblin' blindly by; The mourners heard him pass These burning words did sting their ears: "My ignorance was crass. I say today the elephant's A snake within the grass!"

A fifth one piodin' weakly on. Wiped red and cryin' eyes And said in very plaintiff tones "Indeed 'tis a surprise When a colossal elephant Turns out a rat in size."

The sixth one joined the harassed crew And crouched within their ranks "I needs must speak wise words to you; The Reps have played us pranks; We can't support an elephant On thin and rotten planks."

Anyhow, we'll see whether the above prediction is correct or no when the ballots have been cast and the balloters cussed.

The announcer the other night said that Goddy kissed Joe in the fourteenth round—guess he was jist payin' Joe back for the light smacks Joe was givin' him! It was a classic little fight all right—either one of them is liable to be drafted (or both) to play opposite one another in "Romeo and Juliet."

In fact they both fought like raw recruits in the Russian army.
