Mrs. H. E. Ezelle conducted the worship program, and was assisted by Mrs. E. R. Cantrell, Mrs. John Deaton, Mrs. Beard, Mrs. Bustin Canon, Miss Eva Billings. Mrs. Klassen was assisted with the program by Mrs. Clyde Higgins, Miss Billings, Mrs. A. B. Gates, and Mrs. Lowell Schwalbe.
Following the business session refreshments were served to eleven members.

SCATTERED RAINS; HEAT CONTINUES

Rainfall which amounted to a quarter of an inch in some sections to more than two inches in other sections, Saturday and Sunday night brought a few days respite from the drouth and heat wave, although speaking from a general standpoint no great relief was given.

Portions of the north and northeastern section of the county received rains, but the greater portion of the south are still very dry. There was so little moisture in the ground at the time that little benefit was derived although the heat wave was broken temporarily. Since the rainfall the thermometer readings have climbed again however, with readings in Sanderson reported to have reached 110 Wednesday of this week.

Because the meeting is for the purpose of electing officers to serve the coming year, Mr. Corder urges all members to be present.

F. Frazor. The automobile belonging to Mr. and Mrs. Frazor overturned twice and was completely demolished, although no serious injury was suffered by either Mr. or Mrs. McIver. The blowout occurred as they were making a curve and the car could not be kept under control.

The ranch which is owned by Mr. Roberts, and has been operated by him since he purchased it in 1937, contains 17,136 acres. Livestock involved includes 6,300 head of sheep, 1,400 head of goats, about 25 head of cattle and the ranch saddle horses.

Mr. Hardgrave stated that the additional acreage will be added to his present holdings which it joins, and the entire holdings will be operated as E. W. Hardgrave & Sons. He will take charge of the Roberts ranch October 1 of this year.

Deer Season to Be Only Five Days West of Pecos River

Due to Adverse Range Conditions Which Caused Losses

Announcement has been made by the Texas Game Department to the effect that the hunting season on blacktail and white-tail deer west of the Pecos River will be changed this year, with only five days in which hunting may be done.

Formerly blacktail deer could be hunted from November 16 to December 1 and flagtail from November 16 to December 31. The season this year will be from November 20 to 25, inclusive on both species.

It was stated in Austin that the season had been shortened because of adverse range conditions which have caused population losses, especially among blacktail deer.

The limit remains unchanged.

Miss Rosamunde Vincius of San Antonio visited here this week with Misses Billie Jo and Mickie Corder. She returned home Thursday.

Mr. and Mrs. John Carruthers left Thursday for San Angelo where they went for medical attention for Mrs. Carruthers.

FROM TEXAS TO TOKIO

Mr. and Mrs. E. W. Hardgrave returned Thursday after visiting with their son, Flight Officer John Hardgrave at Bergstrom Field.

Cpl. Paul I. Patterson, stationed in Italy, writes Mr. and Mrs. Ted Baker thanking them for a box of candy, and states that candy is a lot scarcer in that sector than formerly. He says, "The Italian kids think that all the convoys bring nothing but straight caramelli and 'gooma' Caramel, (candy and gum). They figure we're like Christ with the loaves and fishes. They think when we pull out a double handful of bonbons the supply increases tenfold in our pockets."

"Rome is very clean, neat and modern and the people dress and look like I imagine they do in the United States. They are blond brunettes, and red-headed like Americans, but they are a bit more expressive with their hands. Get two of them excited and they really sound like a thicket full of magpies as you used to say about your students. Some of these days I'm going to describe the Church of St. Peter to you people. It beats any edifice I ever beheld."

Paul will be remembered as a former member of the local school faculty and also as the writer of the "Sli Si" column which at one time was published in the Times.

Mrs. Alice Turner has returned from El Paso where she has been with her son, F. S. Turner, seaman first class, who is in a hospital there. She reports that he is doing all right now.

We have a letter in hand from Aviation Student Jasper R. Cockrell who is stationed at Lafayette, La., with Bill Cochran, son of Mr. and Mrs. Carl Cochran of Sanderson, who writes:

"I thought you would be interested in the enclosed clipping which appeared today in the S. L. I. school paper. We who know Bill are all of the opinion that, among other things, Sanderson can be proud to have produced such a swell guy and fine athlete."

The clipping of which he speaks follows, in part:

"Paced by Bill Cochran's 13 points, the Texas Basketball five easily romped over the California All-star 38 to 23 in the first of the three game series, which was held in the SLI Gym last Wednesday night."

The Longhorns broke into an early lead on quick baskets by Captain Dave Cook and Cochran, and led at the end of the first quarter 14 to 8. Ken Peck and Jack Cashel began hitting for the Californians, but to no avail, as Cook, Switzer, and Cochran—the latter using a deadly two hand push, continued their fast-scoring clip, and the half time count read 23 to 14.

The fast pace began to tell on the Coasters in the second half, as the Texans time and again successfully fast-broke for easy lay ups. Cochran by the way, who hails from Sanderson, Texas, turned in the best performance of the night, not only in scoring, but also in rebounding, as he overshadowed the Cook and Switzer."

Lt. and Mrs. D. F. Sudduth spent Monday and Tuesday here visiting with his brothers, W. W. and O. T. Sudduth and families. Lt. Sudduth was enroute to the Marfa Army Air Field where he is now stationed. He was formerly stationed at Cedar Rapids, Iowa.

Mr. and Mrs. W. E. Lea have word that their son, Bob Lea, entered the Navy July 13, and is stationed at San Diego at the United States Naval Training Center. He says he finds the

SHORTAGE OR PLENTY

Government agencies have conducted consumer surveys which bear out the general belief that at the end of the war American consumers will be in the market for every luxury and necessity in the book.

If these surveys prove correct, the next job will be to fill the demand. Whether that can be done will depend upon the ability of American manufacturers and retailers to produce the goods and distribute them at prices the people can pay.

be met and overcome, if possible, by unprecedented operating efficiency.

Before the war free competitive markets pushed efficiency up and prices down—and industry and labor prospered on a sound basis. The simple truth is that after the war the country must return to that system or suffer chronic shortages and regulated existence.

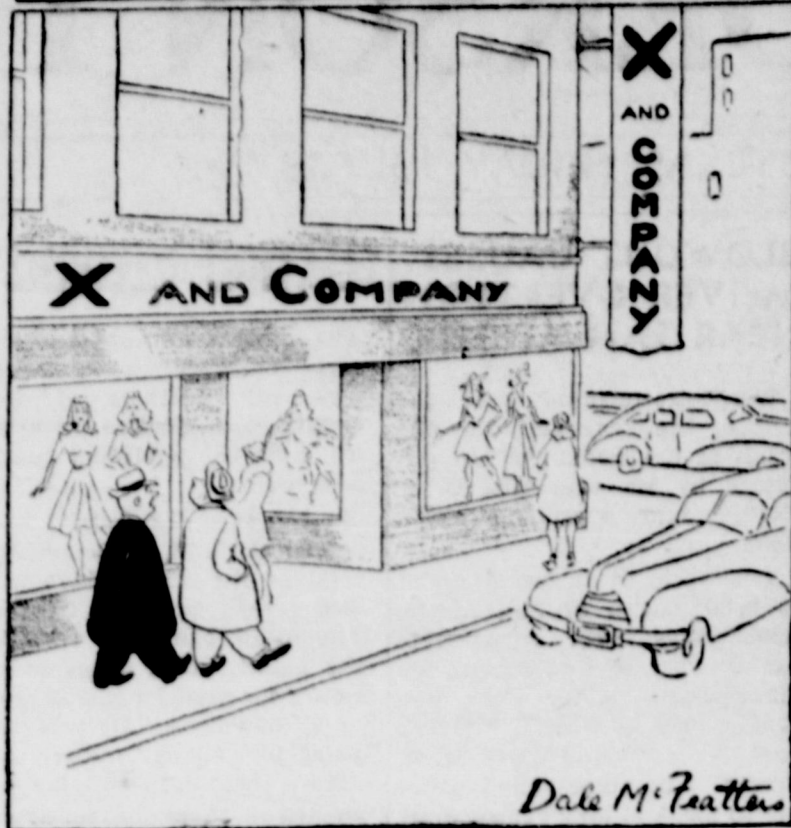

WHY PERPETUATE TAX DODGERS?

Commenting on an analysis of the Tennessee Valley Authority by the United States Chamber of Commerce, the Charleston, West Virginia, Daily Mail says: "It reveals (1) an aggregate cost of TVA to the American taxpayers of almost one billion dollars; (2) tax payments of only one-twelfth of the rate per kilowatt-hour assessed against electric energy which is produced by competitive enterprise; (3) a misleading system of allocating 80 per cent of all TVA costs to 'navigation, flood control' and other activities—only 40 per cent to power; and (4) a list of 30 other 'activities' ranging from experiments in socialized medicine to operating public schools grocery stores, service stations and drug stores."

"The Authority's advantage in competing with private business

is based on its comparative freedom from taxes; access to the Federal treasury and privilege of allocating investment to any one of five purposes, namely, flood control, navigation, manufacture of fertilizer, national defense and power development.

"The four-mill tax paid on every kilowatt-hour produced in 1942 by private utility companies equals the total cost to these companies of producing power. If these private companies were tax free as is TVA and other public agencies, they could write off the equivalent of their power production costs and reduce rates accordingly a fact which mocks the so-called cheapness and value of government expenditures for waterpower development."

There never was a more un-American practice than using tax money to build tax-exempt Federal power plants to compete with highly-taxed investments of private citizens.

It Happened In Sanderson TEN YEARS AGO This Week — Remember

July 27, 1934

With a decided change in wind direction which for months had been from the east, and a very noticeable drop in the mercury rain began to fall in Sanderson and vicinity about 2 A. M. Thursday, heavy at first, then settled to a slow steady down-

Ants are another summer pest. They seem to appear from nowhere but seldom disappear. However, a visitation of ants can be controlled by feeding them a commercial mixture of arsenic and syrup. Spread about a table spoonful of the mixture on a heavy paper where the ants can find it. They will carry it back to their nests because they love it and are eager to tell their families about it. It's a deadly poison to them as well as to all living creatures, so take all precaution when you use it.

THE OLD JUDGE SAYS...

"Mary and I were just saying, Judge, how lucky we are here in America that we have so many natural resources to help win the war."

"That's right, Jim. When war broke out we had oil, we had steel, we had food, lumber, aluminum...practically everything we needed. There's one thing we didn't have...rubber. The enemy had that."

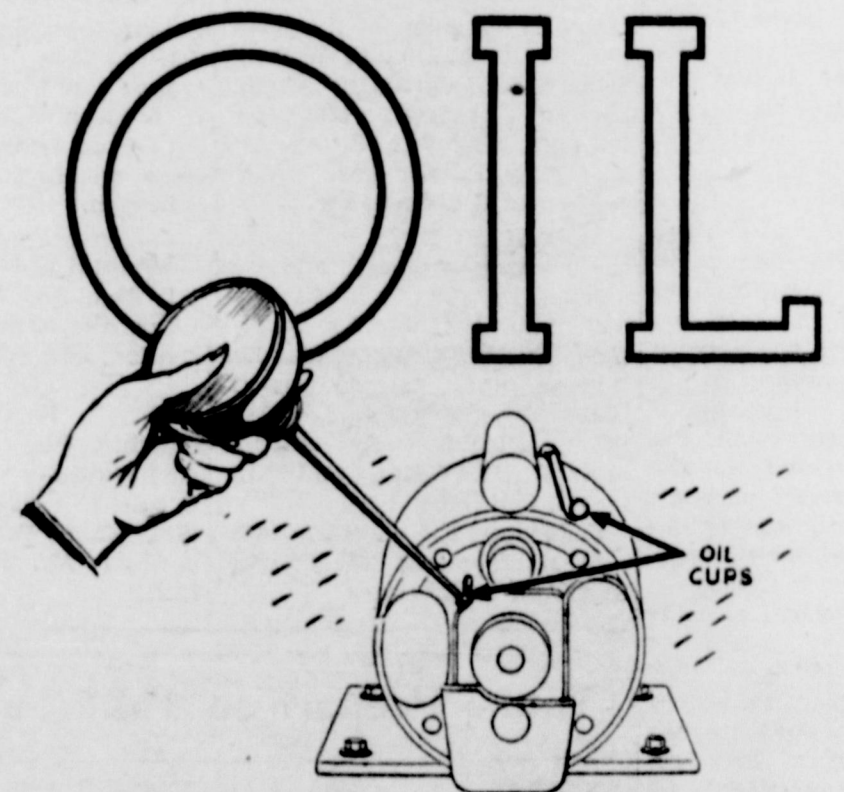

"But that didn't bother us for long. Soon American brains and industry had synthetic rubber by the tons rolling out of plants. That filled a critical need...you can't win a war without rubber."

"I was very much interested the other day in reading a statement made by a high government official on synthetic rubber. In it he said 'It is fair to regard the rubber manufactured to date as being almost solely the product of the beverage distilling industry.'"

"He also said that, in his estimation, the tremendous contribution of distillers' industrial alcohol to the synthetic rubber program had not received the recognition which it deserves."

"We certainly learned something today, didn't we Mary?"

YOUR REFRIGERATOR MOTOR Twice Each Year

If you have the open or belt-driven type of refrigerator unit, the motor should be oiled twice each year. Sealed unit models need no oiling.

A light motor oil should be used, but never use oil as light as sewing machine oil. S.A.E. 20 or 30 weight oil in the best grade available at your filling station is recommended. Oil should be fed slowly into the

oil cups supplying front and rear bearings until both cups are filled. The two bearings are the only parts of motor that require oiling.

Over oiling can damage a motor as well as under oiling, so do not oil oftener than once each six months. Tag motor with date last oiled or paste date inside unit compartment. Then you will know when it is time to oil again.

Marine Corps Veterans Attack Saipan

Marines spearheaded the attack on heavily fortified Saipan and suffered the major share of casualties. Typical scenes, recorded by Marine combat photographers during the first few days of landing, show the beachhead: Leathernecks washing at a captured reservoir; a gutted American tank; digging in for stands on the beach; and farther inland a mortar crew in action—and last, a final farewell to fallen comrades. Saipan, like Tarawa, exacted a heavy toll on the Marine assault forces, who after the initial landing never took a backward step.
