### FROM TEXAS TO TOKIO

Louis Whistler, S 2-c, U.S. Navy, writes on April 6, at his grandmother, Mrs. Whistler: "I was put on this ship last Monday... We have a real bunch of fellows here and an officer in charge of us. I don't get sick, and I hope I won't. I am first on a 3'50. I like my position a little bit the last few days. We have been practicing a little bit of the ship. The name of the ship is the Phillips. I don't know how long it will be here. I did I couldn't tell you. It is a hard time trying to find things aboard ship, but I just about gotten straightened out. I think I will like it when I get used to it. I am not so G. I. as they are on land bases. We wear what we want to."

E. Harkins, Jr., USMC, writes to his brother and sister, Mr. and Mrs. Sid Harkins: "Ran into a few buddies before I got home. Spent a few days at their place before we finished our trip. I got from Honolulu some time ago, but I just wondered if you had received it (the letter). We went to Waiakoi Beach—it was a beautiful place." Sgt. Harkins left the army on duty on February 15, this year.

Duke, S 2-c, U. S. Army, arrived here on leave from morning of last week. He is here on leave with his parents, Mr. and Mrs. D. L. Duke, and sisters, Mrs. Diana David reported to San Diego on April 17. He has recently completed camp training, and later will be assigned to a Naval School.

Camp Carson, Colorado, an Army communication news of "Pfc. Jose L. Rodriguez, husband of Mrs. Guadalupe Rodriguez, and son of Petra L. Rodriguez, stating he now is stationed at the Army General Hospital at Carson. He fought in Normandy, France, Germany, Norway, at St. Lo, Mortain, etc. He wears the ETO Good Conduct ribbon and Combat Infantry badge. Pfc. Rodriguez has brothers in the service, Pfc. Jose L. Rodriguez, in Italy and Pfc. Luis L. Rodriguez, in many," concludes the communication.

Harold E. Schroepler, 695th, writes from the Philippines to his sister, Mrs. C. C. Bell: "I am sending you pictures of the Filipino family of us a while ago. You see some bamboo huts in the background. The family was good to us because we had some medicine on one of the heads. I'm getting sort of raised up on bananas here. Raise small ones, but they darn good. I met the big movie actor of the Philippines yesterday; he seemed like a nice guy. He's bigger than the Philippines and talks beautifully. I haven't seen any lots of horses, but they are small—about 12 hands weigh about 500 or 550 lbs. The farm work is all by carabao (water buffalo). The people don't seem to be of beef eaters, as I have

## STOCK CENSUS IN 6TH DISTRICT IS 74% COMPLETE

The Agriculture Census, 1945 in the Sixth Census District, Texas, which is identical with the 16th Congressional District and which includes the nineteen counties in West Texas, is reported by Capt. M. L. Swinehart as being 74 per cent completed. Enumerators in Loving, Reeves, Pecos, Brewster, Reagan and Glasscock counties have completed the field work in their areas, with Midland, Crane, Upson, and Ward counties lacking only a few farms of completion. It is expected the work of collecting the data for the entire district will be completed about April 30.

One of the features of this enumeration, conducted in Terrill County by Mrs. Troy Druse, is the count of the number of persons, 14 years old and over employed on ranches in Terrill County. This will provide information, it is explained by Capt. Swinehart, supervisor, on the extent of the rural labor force in this country, after three years of war, and its draw on the rural population.

## THREE FIRES IN THREE DAYS KEEP FIRE DEPT. BUSY

While firemen were busy putting out a fire back of James House's Piggy Wiggly Store Saturday afternoon of last week another alarm was turned in. Trash burning too close to a chicken house back of the M. H. Goode Jr. residence had set it afire, and the flames endangered other nearby buildings. The firemen succeeded in extinguishing both fires, with a minimum loss of property sustained by owners.

Early Monday morning a fire believed to be caused by a live cigarette destroyed the bar propyls in the bar operated by Reynaldo Garza. The rest of the building was undamaged.

## SLIGHTLY INJURED

Bill Casey suffered minor bruises and lacerations Saturday afternoon when he was thrown from the fire truck as it made the turn coming out of the alley behind the residence of M. H. Goode, Jr., after firemen had put out flames partially destroying a chicken house in that vicinity.

Moon, preacher-scientist of the Moody Bible Institute extension staff. The picture will be shown Tuesday night at the Sanderson Baptist Church.

Mitchell was named to fill the vacancy. Twenty-five dollars was the sum voted to contribute to the Red Cross. The athletic chairman reported \$1,250.50 in the athletic fund, announcing that the contract for construction of the football field was let to J. C. Wade of McCamey on the yardage basis.

The regular meeting of the PTA was called to order in the high school auditorium at four o'clock, E. A. McMillan giving the invocation. After a health program presented by the second and third grades, Mrs. W. H. Savage discussed the topic "Health and Safety in Wartime." The organization voted to present Mrs. J. W. McKee with a lifetime membership in the PTA in tribute to her outstanding service. A charter member of the local unit, Mrs. McKee has been a constant and devoted worker in the interests of this group.

## TERRELL COUNTY GOES OVER TOP IN RED CROSS DRIVE

Terrell County went over the top over the week-end in the Red Cross War Fund Drive, local chairman R. E. Corder said today, exceeding its quota of \$3,100 by \$210.18, which makes a total of \$3,310.18 contributed by citizens of the county.

The local Red Cross kept \$1,069.19 of the amount to carry on its activities here, and the remainder, \$2,240.99, was sent in to national War Fund headquarters.

Mr. Corder said that he wished to thank the Sanderson and Dryden committees for their excellent work in helping to raise the quota and put the county over the top, extending his gratitude to all the people of Terrell county for their splendid cooperation and generosity, which has never failed when some collective effort must be made. The county's fine record of "coming through," established in many past war drives and campaigns stands stronger than ever after the completion of this War Fund drive.

## Men with money invest it only when they believe, to the best of their judgment, that it will pay reasonable returns. Now they are sure of only one thing: Nearly everything an investment earns will be taxed away from them. Will they invest in new enterprises? No. Then where will our returning service men find work? Unless present tax laws are changed soon, they will find it on huge W. P. A., to the disgrace of our free America.

## WHO IS INJURED?

Men who cut off big salaries have other income. That's why their tax rates are so high. That's why they can afford to spurn a salary. But if they must decline the proceeds of their own invested earnings, one thing is sure: They will not invest further earnings to start new ventures or expand old ones. Investments in business are not safe never have been. Any investment is a risk.

## SON TO SCHWALBES

A son, Richard Lee, weighing six pounds, was born last Tuesday, April 10 in a Del Rio hospital to Mr. and Mrs. Lowell Schwalbe. Both mother and son are reported doing well.

## PAY-CUT

Last year at this time I enjoyed the acquaintance of a business man whose salary was \$50,000 a year. I looked upon him with a great deal of admiration and respect for several reasons. He earned what he has with hard work and know-how. His employees, numbering above ten thousand, call him Uncle Frank. He lives in a small town and helps a lot of people in a quiet way.

Last week somebody showed me a page of a pocket-size magazine published for the employees of his company and I read with grave interest that his pay had been cut. That was news by anybody's standard; most people are getting raises in pay these days. What's more, this man's pay-cut is big. It amounts to more in a year than most men manage to accumulate in a whole lifetime.

## HIS OWN WORDS

"I insisted that the board of directors reduce my annual salary from \$50,000 to one dollar," the signed statement said. "I have not been receiving net anywhere near \$50,000 a year for working... Only \$309.36 was left for my use out of my 1944 wages... Why should I permit the company to pay out \$50,000 a year to benefit me by only \$309.36?"

Let me make haste to say that I am not sorry for Uncle Frank. He will be all right; he has some other money. I am not worried about his employees either. The faithful workers among them will be able to retire in dignified comfort. My only concern is over men who, next year or the next, may hunt jobs and not find them; jobs Uncle Frank would like to offer but can't.

## INSIDE FIGURES

Here is another enlightening passage from his statement: "Perhaps you wonder why my net realization from wages has been so small. The answer lies in the extremely high income tax rates which apply to my wages, added as they are to my other income, and to the fact that I must pay not only federal income taxes but also state income taxes."

This man is not the only big-company official in the country who has cut a lordly income to less than 10 cents a month. Why do they do it? Because their big salaries benefit them so little and cost their firms so much. My young friend who started last fall to work his way through college running a steam dishwasher four hours a day realized more net from his salary than this \$50,000 executive.

## WHY INVEST?

Men with money invest it only when they believe, to the best of their judgment, that it will pay reasonable returns. Now they are sure of only one thing: Nearly everything an investment earns will be taxed away from them. Will they invest in new enterprises? No. Then where will our returning service men find work? Unless present tax laws are changed soon, they will find it on huge W. P. A., to the disgrace of our free America.

 JAMES WORD

**So the city folks have done it! Well, WATCH OUR SPEED!**

**WORD** comes from Washington that the fat-salvage problem has got to be licked in the small cities, the towns and on the farms.

We women have to save enough used fats in our kitchens to help make munitions, medicines, fabrics, soap for military and civilian use, and many other essentials.

The job, to date, has been done largely by city people, because arrangements for collecting the fats were made in the cities first. And these city folks are turning in more than twelve million pounds a month!

Now we're called on. And will the women on the farms and in the towns and small cities break that record?

Don't worry—just watch our speed!  
**HOW TO DO IT:** Save all used fats in a tin can. Keep it handy to the stove. Scrape your broilers and roasting pans, skim soups and gravies, for every drop counts. Keep solid pieces of fat, as meat trimmings and table scraps, in a bowl.

Melt down once a week when your oven's going, add the liquid fat to the salvage can.

Take the can to your butcher as soon as it's full. He will give you two red points and up to four cents for every pound. If you have any difficulty, call your County Agent or Home Demonstration Agent. This message is approved by WFA and OPA, and paid for by Industry.

Keep Your Cream Checks Up!

If you've noticed that the cream content of your milk goes down at this time of year, it may indicate that your dairy cows are not getting all the feed they need for heavy production.

CATFISH CAN'T RAISE CORN

Nature has equipped catfish with feelers so they can find their way about in muddy, silt-laden rivers.

Catfish can't use that fertile mud to raise corn, and that's too bad. Because right now, America needs all the corn it can produce.

Through soil conservation practices fertility is maintained, crops make better yields, carrying capacity of pastures is increased, more and cheaper feeds are provided for livestock.

There's More Money in Eggs if you: 1) collect them often, 2) cool them promptly, 3) keep them clean.

SULPHUR FOR LAMB COCCIDIOSIS

Coccidiosis in lambs may be successfully prevented by the addition of ground crude sulphur to their feed in proportions ranging from 1/4% to 1 1/2% of the ration.

LOST! A MILLION EXTRA ANNUAL MEAT RATIONS

Approximately 200 million pounds of meat a year are being wasted as a result of bruises, crippling and death losses of livestock in transit to market.

2. Do not overload or jam animals. Partition mixed loads of livestock.

LEON ERROL, ANNE ROONEY,  
 IN "SLIGHTLY TERRIFIC"  
 SHOWING HERE TUESDAY

As gay and bright as Spring-time—and just as welcome—are funnyman Leon Errol, Anne Rooney, Eddie Quillan and Betty Kean in "Slightly Terrific," the new comedy musical, coming Tuesday to the screen of the Princess Theatre.

Melodic, too, is the wholly diverting comedy production, with no less than half a dozen new tunes by Milton Rosen and Everett Carter included.

The inimitable Errol, in a dual portrayal, together with Quillan the Misses Kean and Rooney

Ray Malone and Richard Lane generate a succession of laugh-inducing situations which maintain the film's pace at a lively clip.

Story of "Slightly Terrific" concerns the attempts of a group of earnest young entertainers to land their musical show on Broadway, a project that is made no simpler by Errol's well-meaning but poorly-directed energies in their behalf.

The dancing wizardry of Ray Malone and the clowning of Betty Kean are exceptional.

Envy is a madness which cannot endure the good of others.

## Statistics Show Rabies Increase In Texas High

COLLEGE STATION, April 19 —Rabies is on the increase, and last year Texas was one of the seven high states in the number of cases recorded, the Bureau of Animal Industry has reported. Dogs are still the most frequent victims of this dreaded disease but reported cases of cats with rabies have doubled in the last seven years. Increase in the number of cases where rats were affected was 85 per cent in the same period.

Cattle, horses, sheep, swine goats, as well as human beings, sometimes contract rabies, but in lesser numbers the BAI report to the Texas A. and M. College Extension Service shows Total reported cases in 1944 for the nation as a whole were in excess of 10,000.

BAI veterinarians point out that vaccination alone will not control rabies, since many dogs especially strays, go untreated. This agency of the U. S. Department of Agriculture makes rigid tests on vaccines and reports that vaccination of dogs against the disease "really has a definite value."

Here are control measures recommended by the BAI to owners of animals: Licensing of dogs impounding and disposal of all stray dogs, vaccination, strict quarantine of dogs suspected of rabies, for at least six months diagnosis by competent veterinarians, and destruction of rabid animals.

THE OLD JUDGE SAYS...

"Adding another War Bond to your collection, eh, Judge?"  
 "Yes, Josh, I've always looked upon buying Bonds as one of the best ways older folks like me here at home can help our fighting men overseas. For the past couple of years I've put every extra cent I had into them... not only during the War Bond drives... but on a regular basis. Of course, when there's a drive on I always try to buy an extra one or two."

"We've done the same in our family, too, Judge. We figure the more we buy... the better we equip our men... the quicker they'll finish their big job and come marching home again."  
 "That's the spirit, Josh. And let's be sure of one more thing. Let's be sure that they come back to the same kind of place they left. While they are away and can't express their opinions, let's not make any decisions on things that are going to concern them in years to come."

## Is Your Refrigerator Ready for Its Summer Work?

### NOW'S THE TIME TO CHECK UP

Don't wait until *hot* weather to have your electric refrigerator checked over and any needed repairs or adjustments made. Refrigerator repairmen are busy now and will be extra busy during the midsummer rush. You'll save possible food losses and inconvenience later on by having your refrigerator put in first-class condition *now*.

### Follow These Tips—For That "Ounce of Prevention"

- Defrost whenever frost reaches thickness of one-quarter inch.
- Wash interior, including freezer, with weak baking soda solution each time you defrost.
- Wash exterior with mild soap and warm water. A thin coating of wax will help protect finish.
- Wipe grease from the door gasket promptly. Grease deteriorates rubber.

- See that gasket makes tight seal. Do not open door oftener than necessary and always close it quickly.
- Cover all liquids and keep defrosting tray dry to retard formation of frost on freezer.
- Don't set con-rol for colder temperature than necessary. Use fast freezing sparingly.
- Keep unit compartment clean. Do

- not let dust accumulate on condenser coils.
- If an open unit model, check to see that belt is not worn and fits properly.
- Oil open unit models periodically as per manufacturer's instructions. Sealed unit models need no oiling.
- Place refrigerator in coolest part of kitchen where there is plenty of room for ventilation.
