Prayer

The Army Ground Forces soldier is famed for his ability to carry out any assignment with resourcefulness and initiative - the qualities that make leaders in civilian life as well as the Army.

The Ground Forces not only teach you leadership - they equip you with fine job training to go with it. In peacetime, the Army is a gigantic school-going organization - with training available in many skills and trades. Courses offered range all the way from automotive mechanics to welding-designed to help you find the work you like and do best.

Increased Army pay scales are now in effect, and you receive 20% additional pay for overseas service.

Thousands of outstanding young men, able to meet the new higher standards required, are enlisting in the Regular Army. They are beginning interesting, useful careers by learning leadership along with special skills. Visit your nearest U. S. Army Recruiting Station for details.

# REMEMBER -- when you could buy a good white broadcloth shirt for \$1.95?

BACK in 1939 you could buy a good white broadcloth shirt from almost any men's furnishings shop for \$1.95. Today for a shirt of the same quality you pay approx. imately twice as much. And what is true of men's shirts is true of most other things you buy. Almost everything has gone up-almost everything except electricity.

As a result of greatly increased use coupled with sound business management, electricity has stayed down in cost while other prices have been going up. Electricity is one of the few things you buy that still sells for pre-war prices or lower. Although your monthly bill may not be less, due to the fact that you're using more electricity, the cost per unit of electric service was never cheaper than it is today.

THE SANDERSON TIMES

# HEALTH NOTES-

AUSTIN, Texas, Feb. 27-According to Dr. Geo. W. Cox, State Health Officer, pneumonia caused approximately 2,460 deaths during the past year in Texas, a total which is entirely too high. This disease is most prevailent during the winter and spring months.

Pneumonia is caused by a germ called pneumococcus, which many of us have lurking in our throats ready to start trouble, when our resistance to it is lowered. We can keep up our resistance by avoiding undue fatigue and unneccessary exposure to extreme weather conditions. When we go outside in cold weather sufficient wraps should be worn to protect us. Keeping the temperature of our homes "as low as is consistent with comfort will greatly lessen the difficulties encountered in adjusting ourselves to the cold when we leave the house.

Another method of prevention in pneumonia is not to neglect
