prying eyes, she proceeded to strip to the skin and plunge in. As she came up for a breath of air she saw a young ruffian as he ran away with her clothes. The irate bather ran up on the bank with and old tub which she had picked up from the edge of the brook, and holding it in front of her, she yelled at the boy, "Do you know what I think?" she asked. "Sure," replied the lad, "you think that tub has a bottom in it."

They were enumerated to be: To God, family, nation, school, community and to our fellow man.

"Citizenship in a community is not a free ride," Mr. Carter said. "Each of us must try to put back into society more than we take from it or our community life will disintegrate," the speaker said.

The other car involved was driven by John R. Tollett, body repair man for McKnight Motor Company. Both cars were badly damaged by the impact which struck the priest's car in the center on the right side.

Billy Gene Hill was a passenger in Tollett's car and received only minor scratches.

Tollett pleaded guilty to a charge of driving at an excessive rate of speed and failing to yield right-of-way in Justice of the Peace E. B. Litton's court Monday afternoon.

Word from the Alpine hospital indicated that the two priests had only slight injuries and would be released in a few days.

RED CROSS STARTS DRIVE MARCH 1

The local chapter of the American Red Cross will start the annual drive for funds March 1, according to Mrs. J. W. McKee, local chairman. J. A. Gilbreath is the chairman of the fund raising campaign.

In seeking funds locally the Red Cross urges the citizens to keep in mind the fact that the money goes for emergency disasters all over the nation as well as for aiding unfortunates locally and seeing needy transients are clothed and fed before being helped on toward their destination. There has been no emergency locally for many years but the Red Cross did aid in the floods in the Del Rio area last year.

The most recent action of the Red Cross on a big scale was the aiding of 24,000 persons in eight disaster-stricken states during the recent blizzard, flood, tornado and ice disasters in the Midwestern states. These people were fed, sheltered, brought to medical aid or otherwise aided by the Red Cross from January 2 to February 3.

The fact that so little is needed in maintaining the local chapter, comparatively speaking, by no means relieves the citizens of their obligation to their fellow man who has been set back through disasters in other parts of the country, said Mrs. McKee.

The drive for funds this year will be conducted mostly by written letters and it is hoped that those who can and will contribute to this fund will rush their contributions to Troy Druze who is the treasurer for the fund-drive this year, so that the campaign will not be prolonged unnecessarily.

The Red Cross is seeking only a little more than \$500 this year in Terrell County.

CLOUDY WEATHER AND RAIN FOR TERRELL COUNTY

The drizzle and mist of Tuesday in Sanderson and the rain Tuesday night gauged 22 on the official gauge. However, the rain was not as heavy over some sections of the county. The rain did not extend many miles north of town, gauging only 10 at the W. G. Downie ranch in the Dryden country, the rainfall was similar to that locally.

The rain which fell late Wednesday afternoon extended over a larger area to the north and gauged 27 locally. Fair skies are noted today (Thursday) and temperatures are very mild.

The prevailing warm weather of the past three weeks has caused the weeds and range grasses to begin to grow in some areas but much more moisture is needed over the county. While the amount of rainfall so far this year is above average, it is far from sufficient for good spring range after the drought of the past two years.

This is the beginning of lambing season in Terrell County and ranchmen report the ewes in fair condition after prolonged feeding of the reduced flocks of sheep.

KITCHEN MEMO

For that individual touch to a meal for guests or when you feel the family would especially appreciate your adding a decorative food, serve **Orange Sweet Potato Baskets**. Squeeze the juice from 6 large orange halves. Remove and discard the membrane. Cut the edges of the orange shells in a scallop design. Mash 2 cups cooked sweet potatoes and beat in 1/4 cup orange juice, 1 tsp. brown sugar and 1 tsp. salt. Pile sweet potato mixture into orange shells. Dot with 1 tbsp. melted butter or margarine. Place on broiler tray under a medium flame and broil 12 mins. Save time and gas by serving a complete broiler meal including thick ham slices and broiled grapefruit halves.

An 1890 cook book advised cooks to drop water on the oven bottom. If the water hissed, the oven was supposed to be hot enough for baking. Today the thermostat on modern gas ranges keeps baking temperatures at exactly the degree needed.

Yellow and light green celery tops combined with brown onion skins simmered in water over a low flame for about 20 minutes makes a nourishing and tasty drink. The liquid can be added to soups and gravies for flavoring.

All water has some sediment in it. To keep your automatic gas water heater free of this sediment, once a month draw off a quart or two of water until it flows clean.

Do You Want Dictatorship Over Public Health?

No one likes dictatorship or monopoly.

But that is exactly what the State Medical Association is trying to establish in Austin at our State Capitol.

It would be a dictatorship over public health more absolute than anything conceived by Hitler or Mussolini.

The bill that would bring about this dictatorship is Senate Bill 63, the so-called Basic Science Bill.

It would give the State Medical Association a death grip on the healing arts.

If this bill passes you will no longer be able to go to a chiropractor in Texas, or to a naturopath, because there would be none. Eventually, it is probable you would be unable to go to any type of doctor, except a member of the State Medical Association — the dictatorship would be that strong.

You wouldn't think this could happen in Texas. But it will unless you EXPRESS YOUR OPPOSITION TO S. B. 63 by writing to your representative and senator.

THE SANDERSON TIMES

Has Led the List in Civic Improvement in Sanderson

One of the first jobs of a newspaper is to bring to the people it serves the news; to better inform the readers of the happenings locally, primarily, and nationally, in order to promote the association of their thinking and actions in what is considered a democratic way of life. — The Sanderson Times this week is beginning its forty-second year in such a capacity.

The idea of the free press is one of the best ways that we have of assuring the American way of life in this land of ours. The free press is at liberty to bring forth arguments to the people to propagate intelligent thinking and knowledge-seeking through another's ideas. The

newspaper is proud to be of such a benefit to the community and to the nation. It is proud to have the leading hand in setting forth ideas in printed form for the criticism, knowledge and understanding of the public.

The newspaper brings into closer relation the merchant with his potential buying public. This is the bread of life of the newspaper as well as for the merchants and citizens. As an advertising medium, The Sanderson Times has, for 42 years, brought before the eyes of the public all the products that the business men have seen fit to merchandise in a

manner that has kept up with the trend of the times in attractiveness and effectiveness.

To the people, the paper brings annually more than 225 pages of news in the form of stories and advertisements, to better qualify them as citizens who are eager for the growth and development of all forms of life within the community.

It is the desire of this paper to continue at all times to lend aid to any and all activities that will in any way lead to the betterment of Sanderson, Terrell County, Texas and the United States.

In so doing we have accomplished the ultimate in the duties of a newspaper.

Economic Highlights

Immediately after the election when it was known that the Democrats had not only elected a President but had gained substantial working majorities in both House and Senate, it was felt by some that Mr. Truman could have anything he wanted. But there were those whose knowledge of the workings of politics went deeper, who were not so certain. Even Franklin Roosevelt had plenty of trouble with Congresses which were overwhelmingly Democratic. Mr. Truman is in the same boat.

The Taft-Hartley Bill is a conspicuous example. If the labor groups really thought that outright repeal of this act and a return to the Wagner Act was likely, they were badly misinformed. The temper of Congress certainly is not for giving labor a free hand. The Republican minority is solidly in favor of many Taft-Hartley provisions, and so are a considerable number of Democrats. The fight against unqualified repeal has been ably led by two young Republicans — Ives of New York and Morse of Oregon — and they have developed a large following on both sides of the aisle. The day has long been over when party members voted as a group, and statistical majorities do not necessarily mean much when some particular

piece of legislation is involved. Other parts of the Truman program will also, in all probability, be extensively modified. Sentiment against heavy new taxes on business is strong — this, it is feared in some quarters, might produce a dangerous drop in business activity and employment. Large elements in Congress — and these are also bipartisan — think the first step should be to cut the cost of government, and that new or higher taxes should only be levied if there is no other way out. The Hoover reorganization plan, which, it is estimated, would save \$3-billion a year, largely in administrative expense, is providing the ammunition for those who think that.

The middle-of-the-road elements are also laying plans for extending social security on a less-costly basis than that proposed by the President. The Administration's concept of the welfare state has aroused fears in its own ranks no less than those of the opposition. Such matters as compulsory medical insurance for everyone face tough going. Here Senator Taft, who is one of the best strategists in Congress, has met fire with fire, and comes up with a modified program of medical aid to the needy, housing, etc., which has strong backing. "Modern politics," wrote Henry Adams, "is a struggle not of men but forces." This Congress is affirming that truth.

Milk Cause of Undulant Fever

AUSTIN, February 22— As a safeguard against the serious and disabling disease known as undulant fever or Malta fever Dr. George W. Cox, State Health Officer, advises Texans to drink milk only from approved sources. Undulant fever is usually acquired by human beings as a result of consuming raw milk products from cows infected with Bang's disease.

Raw milk or milk products can be consumed with safety only when they are known to be produced by cows tested and found to be free of Bang's disease. Pasteurization, of course, will kill the germs if present.

To assist in lowering the incidence of undulant fever all dairymen should remove cattle infected with Bang's disease from their herds as soon as the disease is discovered. Even if the milk is made safe for human consumption by pasteurization, infected cows are still a menace to health since they can transmit the disease to healthy animals and to their owner and other persons who handle them. "Undulant fever from cattle," Dr. Cox said, "is one health hazard we can eradicate in our state through absolutely safe milk supplies from dairy herds free from Bang's disease.

"Unless a herd is known to be free from this infection only pasteurized milk should be used so that the disease cannot be passed on to the consumer of milk and dairy products."

How to Study the Bible The importance of Bible study is emphasized in II Timothy 2: 15 where the apostle Paul urges "Study to show thyself approved unto God." I am convinced that many do not profit from their Bible study because they do not study properly. Just as any other book the Bible is subject to certain rules and principles that must be observed, if we are to understand and appreciate it. Most people take

up the Bible, open it at random and read a few verses or a chapter hastily and with little or no thought. Such a procedure of hasty and careless reading will never lead to a proper understanding or appreciation of God's word. No one would follow this plan in a study of history, science, medicine or law because such a foolish course would never acquaint them with these subjects. So, in studying the scriptures, we should use the same system and sensibility.

The following rules are given for proper study of the Bible:

Rule One — Our study must be prompted by proper motives. Jesus said to the Jews: "Ye seek me, not because ye saw the miracles, but because ye did eat of the loaves and were filled." —John 6:26 They were following Christ from wrong motives. If a man studies the Bible to pick flaws or find imaginary contradictions he will not learn very much truth.

Rule Two — We must rightly divide the Bible. One of the greatest maladies of proper Bible study is the inability of most people to rightly divide the scriptures. They go alternately to the Old and New Testaments for commands, precepts and promises only to find themselves discouraged and confused.

There are three dispensations recognized in the Bible. The Old Testament gives the history of the Patriarchal and Jewish periods, while the New Testament gives the history of the Christian era.

(1) Patriarchal Dispensation: this period covered about 25,000 years — the time between Adam and Moses. Patriarchal means the rule of the fathers. Hence, in this system of worship, the father was the ruler or priest of the family.

(2) Jewish Dispensation: This

covered about 1500 years — from the giving of the law on Mount Sinai to the death of Christ. Since the law was given specifically to the Jews, it superseded the Patriarchal system.

(3) Christian Dispensation — This era began on the first Pentecost after the resurrection of Christ and will continue till the end of time. Its laws and regulations are found in the New Testament.

How's Your Listening Time?

Howell and I were in Bal- last week. Dropped in at Bob's where some friends were sitting around talking about whether all bugs now or wait.

From where I sit, that's a good system. Everyone has a right to his opinions—but others have a right to theirs, too—whether it's deciding between to sell or not to sell, apple pie or cherry pie, or a glass of mellow beer or cider. Life's more interesting that way, and hang it if you don't sometimes learn something!
