LISTEN TO LUKE

British socialism is up against the hard facts of life. It is saying that you can't have your cake and eat it too — you can't say that you can't have your cake when you have no cake. Logic makes the British ignorant of the status of Latin for the mess they are making of living for the standards of any nation may be raised in three possible ways: (1) Raise it out of the fruits of your own labor. (2) Raise it out of the confiscated surplus of your neighbor and (3) raise it by taking gifts from others. Truman's "Queer Deal" of government is a good example of what we mean. If you are the president's chat last you probably heard him say that public expenditures of federal, state and local governments are running at a rate of close to 60 billion dollars a year is itself an element of great stability in the present situation. These are the words of the president of the United States. We rephrase it in fewer words. The fact that federal, state and local governments are running into the red every year is an element of instability. That wouldn't sound too alarming. Let's try it again: The fact that the cost of government in this country is more than a thousand dollars employed American is in an element of great stability in the present situation. That sounds like a moronic statement when put in those words, doesn't it? Those are the words that represent the business back of the Queer Deal.

Reason for a man to go into the haberdashery business is most likely because those of business logic were tried. A thousand dollars a head for an American who has a job and money. There are approximately fifty-eight million at work now. Mr. Truman says that the country spends sixty millions on government. Figure it out. The federal government alone spend about \$45,000,000,000, and local governments are to spend about \$15,000,000,000. Sixty billion dollars. Plain about it, is one and a half times as much as all the that has been discovered in whole world since Columbus landed America. Would we be truly prosperous asks the President, "with the deficits in our educational system or our housing or health services or our progress for resource development."

Column would not attempt to be prophet and say if good or not. But sure as made little apples would try it and see. Just a few weeks on the part of the government would bring the pictures of the government receipts of the government. One thing is certain we can't be prosperous and spend more than we British nation says that no thing is to get false for all who need false and get them at tax-expenses. Wigs for the week ends for the leisure and play for all things come first and all Marshall Plan aid shall be unto you Brother Truman willing to go along with British in the socialistic movement and let the American taxpayer foot the bill.

PHONE CUT-OVER SET FOR TODAY

Local telephone subscribers will be happy with the announcement made in this issue of the Times that Friday, July 22, the cut-over from the magneto-type phone to the common battery system will be effected. A large crew of workmen has been busy for several weeks replacing old cables and stringing new cables, erecting new poles and installing new telephones. The work will continue as new subscribers are added with the completion of the new system. O. H. McAdams, local manager, has stated that phones will be available for all who desire them and that work will begin immediately on the installation of sets for new subscribers. With the new system, the lifting of the receiver will connect with the operator. POLIO CONTROL IMPOSSIBLE SANS SANITATION

AUSTIN, July 21 — With the alarming total of 922 Texans having been attacked by the dread disease poliomyelitis, 1949 bids fair to be the worst polio year the state has ever experienced, and health officials in every section of the state are exerting every effort to bring the disease under control. "This polio situation will never be controlled without the observance of stringent basic sanitation measures," the health officer declared. "The filth on your premises may cause the disease to attack your neighbor; and the same condition on his premises may cause polio in your own home. This problem of controlling polio is one demanding the closest possible cooperation, and until a program of continuous cleaning up in instituted and stringently enforced, we shall continue to face the menace of polio on all sections of the state." Dr. Cox emphasized to parents whose children are suffering from poliomyelitis, the comforting knowledge that about 60 per cent of all cases of recognized polio recover completely, and at least 25 to 30 per cent of recognized cases recover with only minor disabling paralysis. "Only about 8 per cent of polio victims develop the deadly bulbar type, which affects the nerves at the base, or bulb of the brain," Dr. Cox said. "Most patients suffering from bulbar polio die within a very short time. But it is a comforting thought that 92 per cent of polio patients never develop bulbar polio, and make a partial, or in many cases complete recovery and are restored to health."

LIONS, VFW DROP TWO GAMES EACH

Thursday night of last week the VFW lost the first game to the Firemen 9-5. Seven walks and five hits were good for the 5 runs for the veterans, while the Firemen got 11 hits and only 3 walks. In the second game that night the Lions Club lost their tilt with the Legion 9-3. They got 7 hits, compared with 7 for the Legionnaire, but the latter team drew 7 bases on balls. Tuesday night this week the Legion beat the VFW in the first game 12-1. The VFW was missing some of their regulars and Harkins had an easy night on the mound. In the first inning the VFW team got one hit, but that was the only inning when the pitcher faced more than 3 batters.

The second game started out like a picnic for the Lions in their game with the Firemen. The score was 6-0 for the Lions at the beginning of the 3rd inning. Six walks and 2 errors by the Lions netted the Firemen 9 runs and the Lions were never able to overcome the lead. Thompson, Sullivan and Paul tried their hands at pitching during the game. The score ended 13-8 for the Firemen.

The league standing remains the same after Tuesday night with the Legion leading with 18 wins for 21 games; the Firemen second with 17 wins out of 22 games; the VFW 3rd with 6 wins out of 22 games and the Lions in the cellar with 6 wins out of 23 games.

A delegation from 16 towns and cities along the border route will comprise the group. The local delegates are L. H. Gilbreath, director, F. M. Weigand, R. S. Wilkinson, W. G. Downie, Clyde Griffith and Monty Corder. Highway 90 was a part of the National System of Interstate Highways until this year, when '90 was so designated. The Border Trails Association was formed in Del Rio a few weeks ago to seek re-designation of Highway 90. It has been estimated that approximately 75 per cent of the tourist trade will be lost if the re-designation is not obtained. They will bring out to the commission that Highway 90, in addition to being a more suitable route for winter travel, offers more interesting points of scenic value to the tourist between Van Horn and San Antonio. San Felipe Springs, in Del Rio, and the only port of entry into Mexico east of Juarez on either highway, the old court of Judge Roy Bean at Lantry, the Big Bend National Park, the Davis Mountains, and the beautiful mountain scenery all along the route. Tourists traveling the newly-designated route will miss all of this, those working in the interest of the businesses along Highway 90 pointed out.

Autobiography of an Embarrassed Cowboy

by WALTER RODGERS, author of "Huntin' Gun"

EDITOR'S NOTE - Walter Rodgers, author of "Huntin' Gun", sent the following autobiography since his new book was published. Walter is Game Department Trapper at Elida, N. M., now, but is well known in these parts. In a letter to the editor, he states that he plans on coming back to these hills to live some of these days. Mrs. Rodgers' home is near Del Rio and we know they would be welcomed back to Texas. Walter wants to get somewhere where he can "slip out now and then and catch me a calfish." We must warn him now that we have a game warden in Sanderson and perch for bait is not allowed. The use of dynamite is banned too because the noise might wake up some of the river riders. Come on down, Walter, and we'll just roast some weiners.

Yeah! I wrote the book, I have to confess that But, shucks, I never figured that folks would be askin' questions about who I am, and where was I born? and when? and why? and all such like. Shucks! Why not ust read the book? It's all dressed up - and I ain't.

I wouldn't mind tellin' folks about me, if I had ever done anything important, like may-be gettin' into Politics, or bein' a Hero. But it's the truth - I never accomplished anything bigger than a man-sized appetite. And as to my Origin; Shucks! I've always been plumb embarrassed about my poor memory. I reckon I wasn't more than knee-high to a fair sized hound dog, when I come prowlin' out of the Big Thicket in Central East Texas, but I was packin' a gun. They wasn't any Automobiles then, for folks to hitch-hike rides in, so I sorta grewed up with a Texas Pony danglin' on my spurs. Sort of figured that since a man had to walk every where he went -

that four legs was better than two.

It must of been about the time that I first started scratchin' thoughts out or my own hair that I tried to collect some information out of my Mama, about my Origin. But shucks! She just shut me right up: Well! You know how them old Fashioned Mothers was? Later I come to know several Fellers that must have been in the neighborhood when it happened, including My Dad. But considerin' how reticent they all was about it, I finally decided that maybe my Entrance into the material side of things in general, wasn't a very dignified affair; and since they all seemed to be tryin' to forget the incident, I proceeded to do so, too.

As to guns: - Well, I always admired a good gun, and a man that could use it. I've known several that shore performed extra good. - I mean - Men and Guns. I've wrote down some of it in this here book. I've wast-

ed most of my wages on ammunition, tryin' to learn to shoot. But, shucks! I reckon they's some fellers that just can't ever learn. I always reckoned that I could shoot about as fast - and make as much noise as the next feller. But unless a man can hit what he's shootin' at - it don't mean anything. I still believe the book is more interestin' than I am, and - it's like me. - It's pretty cheap.
