LISTEN TO LUKE

Back passing seems to be the order of the day in Washington circles if we can judge by the reports from various sources as to who is responsible for the state affairs we face today.

Most recently the entire blame has been placed on top-ranking military men in all branches of the Pentagon. Some continue with the idea that the people are to blame for insisting that Congress come down on expenditures.

Why, you ask, does a country newspaper attempt to discuss affairs of a national or international nature? Why should the average voter in Terrell County be interested in those matters? In the place this is our business. We make up the population of this country and have our say in the polls and elect our Congressmen and Senators. We are sending them as our proxy to express our opinions and to act in our stead in all matters of interest to the people. They expect and welcome suggestions from the people of the "grass roots" area under their sphere of presentation.

In placing blame we should not overlook the fact that we are at the disposal of all our resources, our income and all our physical might. It is placed at the disposal of those in authority so that a body end may be forthcoming when our men can come back home. We are not unmindful of the recent refusal by the President to shake up his command of military and civilians who had bungled things. We remember when the lines of officers and high ranking naval and air officers were squelched below the top of political generals and not permitted to speak their minds.

In April of this year an executive memorandum was referred to Representative Van Zandt of Pennsylvania. The Congressman's demand for an investigation disclosed a record of facts that tell a very good story of the failure of our campaign in Korea. The executive order was issued in 1948 and has been reiterated regularly since. It was addressed to the Director of the Budget. It reads in part:

"I cannot condone the practice of seizing upon any opportunity which presents itself to indicate opinion, either directly or indirectly, that my estimates are sufficient."

When you notify the heads of various departments and agencies of the amounts to be included in the 1948 budget for their activities, I wish you would include a reminder that I shall expect them and their subordinates to support only the President's estimates in hearings and discussions with members of Congress."

Any military man who attempts to offer an expert opinion had suffer the consequences of Admiral Denfeld who was removed as an example. The President fired the wrong advisors and has them.

To our Congress is not to blame. The people are not to blame. The only place to put the blame for our inadequate resources to handle the Korean situation is with our political top men who advise the administration with a rubber stamp to everything the White House says.

This week a five-star general has his foot in the political set-up made a statement for the veterans in their national convention general MacArthur's challenge to administration's policy on the island of Formosa is now on the Congressional Record after President tried to suppress it.

Men of General MacArthur's name cannot be listened to in foreign policy then we have to a pretty mess. Time and diplomats have been sent confer with the general. Time again recommendations have been unheeded. It is time we demand our Congressman and Senators to listen to expert advice on matters affecting so many people. The leaders of Washington rub all party lines and get behind good common sense program to win this war. Let the November election take care of itself get busy to win the war.

Sander's garbage dump needs attention. There has been considerable talk about spraying for the location of flies. Surely spraying would be the thing to do if we could first get the fountain-head of fly-breeding places first. Various civic clubs have discussed what should and could be done at present there has been no-

## WILLIS CARTER BURIED HERE SATURDAY MORNING

Funeral services were held at the First Baptist Church in Sanderson Saturday morning for Willis Carter who died in a Fort Stockton hospital Thursday evening. Rev. Clifford Spencer officiated with O. T. Sudduth, Inc., in charge of arrangements. Burial was made in Cedar Grove Cemetery.

Pall bearers were W. F. Frazier, R. S. Wilkinson, J. S. Nance, C. I. White, S. D. Thompson and Lee Kelly.

Born January 13, 1871, he married Miss Ida May Estes January 3, 1900 and she preceded him in death six years ago. Carter was hostler for the T&NO roundhouse for several years in Del Rio.

The Carters came to Sanderson in 1910 and he was T&NO roundhouse foreman for thirty-two years until his retirement in 1942.

Mr. Carter had been in failing health for the past year following a stroke and suffered another stroke Monday night before his death, being found unconscious in the yard at the home of his son, Clyde. He was taken by ambulance to a Fort Stockton hospital Tuesday morning and was thought to be improving Wednesday but his condition gradually grew worse Thursday.

## SCHOOL CLASSES TO REGISTER TUESDAY FOR FALL SEMESTER

Summer vacation for Terrell County public school students will end Monday, September 4, with registration for the fall semester to begin at 9 o'clock Tuesday morning.

High school students with those of the seventh and eighth grades are asked to meet at 8:30 for a short assembly program preceding the beginning of the registration. Pupils will be permitted to go home after they have registered and received their books. Regular classes and schedules will begin Wednesday.

Supt. Matt F. Bader has reminded the parents that children entering school for the first time will be required to have birth certificates and certificates of small pox vaccinations.

The lot formerly occupied by the superintendent's home has been cleared, leaving additional space of approximately 100x200 feet to the elementary playground. The iron fence separating the Keller property from the playground will be rebuilt. A new boys basketball court has been added to the playground equipment and several new saw-saws will be built.

With the resignation of Miss Mary Lou Collins last week, Miss Marjorie Sholars of LaRue was hired to teach a section of the 4th grade and the faculty for the local schools is complete again, according to Bader.

thing but talk. Action is what is needed. Action will cost some money and some effort. If the citizens are interested enough in proper disposal of the garbage there is no reason why work cannot be started on the project immediately.

First job at hand, it would seem, is to get a bulldozer to drag all the trash to the ditch and cover as much as possible, then clear the way for those who take trash out there so that it can be dumped at the back of the grounds. As it is now one would have to drive over trash if he got back far enough from the highway to be within the law. It seems that the problem of keeping it back would not be difficult if it were taken care of properly and regularly.

If someone familiar with that kind of work could get an estimate of the monthly cost of such maintenance it would not be difficult to make a reasonable assessment to the citizens to take care of it.

Highway authorities are within their rights when they demand that trash be dumped at least 100 feet from the right-of-way. The unsightly mess down there now is certainly not a welcome sight for people coming into Sanderson.

## General Rains Over County Past Week

Rains have been general over the county during the past week with reports of varying amounts falling on different days and in different areas.

Three inches of rainfall have been reported from some ranchers with fractions of an inch reported from others. Much of the heavy rainfall was lost in draws and canyons as the large amount of rain fell during a short period.

High winds preceded the rain here Sunday afternoon when 1.10 was gauged over a three hour period. Gauged rains fell to the north and west and kept the highway crew busy until after nightfall Sunday keeping traffic coming through over Highway 285 from Fort Stockton. That part of the highway which is under construction was very slick after the rains and several of the draws on the unpaired section were running.

With summer-like weather still prevailing and unsettled clouds moving over the area, prospects are good for fine pasturage for the winter months.

## 89,000 POUNDS HONEY PRODUCED IN AREA THIS YEAR

Honey by the tons is sweet income for any section of the country.

Last week three apiaries in the Big Bend section southwest of Sanderson and just south of Marathon, sold 89,000 pounds of the nectar product.

Charles T. Smith of the Toyah Creek Apiaries, and the Jack Smith Apiary, Marathon, sold 35,000 pounds each in one shipment, John Bennett sold 9,000 pounds from the Maravillas Creek Apiary, and the Johnny Adams Apiary sold 10,000 pounds of honey.

Bees thrive in that section of the Big Bend and one of the most delicious products of the white brush and catclaw flavor is gathered twice a year from the hives.

Forty-four and one-half tons of honey shipped by only four producers is proof that the industry could be expanded to create a substantial income for this section of Texas.

A ready market is waiting for this product the apiary operators report.

## Donkeys Win Game Over Would-Be Burro Riders

The donkey ball game here Saturday night ended in a score that favored the Dudes, but the donkeys definitely won the game. Few, if any of the players failed to find out how hard the ground was and some unfortunates found out more times than they wished.

The Lions Club reported approximately \$85 netted from the game which was viewed by spectators from all parts of the county. The game lasted 5 innings, about 2 hours, and fans were well pleased with the show which resembled a three-ring circus in that several times more than one rider was having plenty of trouble with his mount.

None of the ball players succeeded in riding Gonzales, a small mouse-colored mule, but a few of them came close. Most of the donkeys that were used by the fielders caused little trouble other than their characteristically stubborn way of having an idea that never matched the riders' desires. None of the players received more than slight bruises and plenty of loud laughs from the spectators.

This is the second year that the Lions Club has made possible the playing and viewing of the sport for local citizens and they are grateful to all those who played in the game to furnish the entertainment, and gave their thanks to the spectators for coming out to view the fun.

The boys admitted stealing a pouch of mail in Valentine and cutting it open to search the contents. They had a postoffice money order in their possession when taken, according to local officers. The mail sack and contents were dumped from the freight train between here and Valentine, the youths stated, and efforts will be made to recover the contents.

The sheriff of Jeff Davis County and a mail inspector arrived Wednesday afternoon to return the boys to that county where they will be charged with theft of the mails.

The group voted to accept the school and they were included in the season schedule for this year's play. Sanderson will play Van Horn there on October 13, their previously assigned open date.

One new prospect for the 1950 Eagles squad has been reported by Coach England. Gary Vassbinder who is scheduled for a position in the line, probably at tackle. Vassbinder moved here from Del Rio and is eligible for conference play.

Humberto Arredondo has been assigned manager for the Eagle squad and has been busy with the two coaches this week marking the uniforms and getting the equipment in shape for the season's play. Among his duties as manager are seeing that the equipment is cared for, seeing that balls are available for practice and games, taking care of the medical supplies for the team, issuing and receiving equipment and generally assisting the coach in the records of the team and general management of the locker room and the equipment. This is the first year for Arredondo at this job. He replaced J. D. Thompson who graduated last year and served at the post for four years.

## Trigger-Happy Dove Hunters Warned To Be Sure of Targets

Austin, Aug. 29—The Executive Secretary of the Game, Fish and Oyster Commission reports that an increasing number of sportsmen have expressed interest in trying promiscuous shooting on the fall hunting season in Texas opens September 1. He said letters to his office indicated particular concern over possible harm to the immature quail crop. The general state all season opens December 1. Meanwhile, the first major phase of the scattergun season will open September 1, when mourning doves in the north zone become legal game. The south zone season does not open until October.

The executive secretary suggested that the trigger happy few "shoot at everything that flies" cause law-abiding sportsmen to worry about the welfare of species which are not legal game. He qualified this comment by pointing out that Texans are known for their good sportsmanship.

ship in the field and said that, as always, the overwhelming superiority of the genuine sportsmen will have a strong bearing on restraining the irresponsible element. The serious minded hunter, according to the Executive Secretary, is not interested in mixing up his targets. For example, when he flushes the inevitable covey of quail and neither will he bang away at squirrels and rabbits while stalking deer or turkey. It is not only bad hunting discipline but often illegal as well. One sportsman wrote the game department that he had an outlet for the uncontrolled shooting enthusiasm of the trigger happy types, as well as for responsible sportsmen for that matter. He suggested they "take up the slack" by cracking down on the thousands of house cats that have reverted to the primitive in Texas outdoors and prey on many species of bird life, as well as on small game generally.

### Communism's Actions Tend To Aid U. S. Military Strategy

Communists are clever but not intelligent. This is unavoidable and inescapable. A lack of common sense is the prior essential to acceptance of the communist religion.

Their fundamental dumbness was illustrated in the forcing of the Korean situation. For five years the Kremlin had maneuvered to reduce the United Nations to impotence. The Korean adventure revived the UN within five days. In re-creating an alliance of the democratic nations of the world which had begun to crack into quarrelling segments within two weeks of the opening of hostilities, important weaknesses in American military planning were exposed. It is costing us much less in men, money and material to learn about them in Korea than would have been the case if they had not been exposed until we were engaged

in a major conflict.

For five years and longer Americans had been led to believe that the next war could be won largely by science and machines. The atomic bomb and supersonic airplanes cost tremendously in dollars but they would avoid the cost in lives of men fighting on the ground. It was old-fashioned to say that all military effort should be directed fundamentally toward supporting the ground soldier. The new concept was that the man on the ground was primarily needed to support the airplane and its load of atomic bombs. The surface fleet, the floating airfield on a carrier's deck were obsolete. It was an attractive picture. But it neglected a highly important point — it takes two people to fight a war! Unless you are willing to be the aggressor you have to fight not your kind of war, but the other fellow's kind of war. After weeks or months you may gain the initiative, but in the early, sometimes crucial stages of the conflict you fight under the conditions selected

by the aggressor — conditions carefully selected to cause you the most embarrassment.

In Korea, there is no target that is worthy of the atomic bomb. To use one there would result in useless carnage of non-combatants that would divorce from us the support of the peoples of the world. This is equally true over vast areas of possible future conflict with the slaves of the Kremlin.

The jet airplanes of which we have been so proud are of small value in Korea. There are no convenient airfields and small chance to build them. Flying weather is bad, ceilings low. This, too, is true over vast areas of the globe where the Kremlin might choose to take up fight. On clear days the fast-moving jets have shown little ability to disable slow-moving tanks or piston-engined Yak planes. Making one pass at the target the jets require three or four minutes to turn and return for another attack — ample time for ground columns and tanks to disperse. Heavier tanks than we would have thought possible are being used by the communists, and the Russian armor is proving less vulnerable to our anti-tank weapons than we had expected. The floating airfields provided by the "obsolete" Navy's carriers are now pressed into much-needed service and the support of "obsolete" piston-engined planes is being stridently demanded by the troops on the ground who, as in all past wars, are carrying the brunt of the battle.

And here is the other lesson the communists have taught us — the soldier on the ground is still the decisive factor in the kind of war the man of the Kremlin intend to make us fight. Neither mountain

nor swamp, fog nor heat, keeps him from the fight. Give him his rifle, mortar, recoilless gun, a sack of grenades and canned rations, and he will go anywhere. Put him on a horse, that, like him, can live off the country if it is impractical, down-to-earth guy, the foot soldier. He isn't interested in anybody's theory as to how wars ought to be fought. He wants tanks, guns, airplanes that will help him win the war he is fighting.

The Korean episode may remain a minor incident in our military history. It may prove to be the beginning of World War III. In either case, the dictators in the Kremlin have outsmarted themselves. They have given us an object in our military planning before too great harm has been done.

#### CORRECTION

In last week's Times the story concerning the opening of dove season erroneously stated that all minors under 17 years of age were required to possess a hunting license. This was, of course, a mistake and should have read: "All dove hunters over 17 years of age must have in their possession a hunting license for the 1954 season."

KITCHEN MEMO BY ANN CLARK

When you're entertaining and want to be free of pot-watching, serve *Hamburger Goulish*. It's full of flavor, combines nicely with a tossed green salad and suffers no damage if it must stand and wait for late guests' arrival. Fry 1/2 lb. cubed beef, 1 lb. cubed pork, 1 cup chopped onion. Brown lightly. Add 1/2 slices tomatoes, 1/2 tsp. paprika, 1/2 tsp. caraway seed, 1/2 tsp. marjoram, 1 tsp. salt, 2 cups stock. Simmer over low flame until beef is tender (about 2 hrs.). Yield: 6 portions. Place the goulish in a ring of fluffy white rice or mashed potatoes.

Dust and lint in the air collect on the air filters of your gas furnace. Now is an excellent time to replace this inexpensive protection obtainable from your hardware dealer or furnace repairman.

Soup sometimes becomes quite greasy. Drop a few lettuce leaves in it to absorb excess fat, then remove them just before serving.

Any acid foods allowed to remain on porcelain surfaces of sink or gas range will stain them. Wipe up spills at once with a soft paper towel.

Your finest linens will have a smoother finished texture if they are damp-dried in the gas dryer instead of dried out completely. They'll be easier to iron too.

Diced bacon flavors hamburgers and helps to keep them moist. Use about 4 slices bacon to 1-lb hamburger.
