LISTEN TO LUKE

February closes with the country as a bone, notwithstanding the local prognosticators' predictions that rain would fall during the month.

February Ranchers are doing a lot of feeding and prospects are that they will have to come later than was presumed at first. Spring will fail to bring much feed unless there is rain in the very near future.

As this is written light clouds are in evidence but rainfall seems to be for some future date. Feed prices, although frozen, have continued to climb and the ranchmen do not see effects of the price freeze.

Controversy over the pending truck load limit bill in Austin has stirred quite a bit of discussion in stock truck haulers' circles. It seems that the catch in the bill is the fact that it provides for reduced load limit which would make it unprofitable to the trucker at the present rate. This column is not familiar with the trucking industry and not qualified to express an opinion on the merits or demerits of such legislation.

Those qualified, however, to state that all violations of any of the laws should be prosecuted and any laws should be repealed. Do not believe that a trucker should be allowed to violate the law any more than anyone else.

An overload is discovered it should be made then and there to comply with the law and not simply pay a fine and continue over the seven hundred miles of Texas highway. If the load limit is too low it should be raised to what is reasonable.

This column is of the opinion that men who make a living trucking have the same rights as free enterprise as a printer or any other profession but they also have the same responsibilities in the observance of the laws of the state.

Unsettling criminal tendencies seem to be causing much concern in the nation in recent months. Nearly all the arrests for felonies in recent months have been minor or at least youngsters below 21.

There is a reason for this concern and this column is unable to point out just the cause and the necessary steps to curb this concern. There is a need for a national awakening to the condition the menace spreads. Recently the culprits were branded "bad men" by newspapers and it is to the point that they were all of their achievements and asked that they be permitted to sell their stories to publishers. It has caused the youngsters a "my bravo" feeling and they were willing to take the consequences of punishment for the life-lived in publicity.

Any youngsters have a home training and school training that gives the impression that they are entitled to anything they can get in any way they can get it. This philosophy is pretty general nowadays and is practiced in many ways. The American public certainly has not endorsed such things but the inclination to what you want any way you have been accepted with an "I blame them" attitude.

There must be a return to the fact that we are all obligated to fellow man for the benefits we give. And the responsibility of citizenship demands that we recognize the rights of others. America is the great nation among us today because it is founded upon the principles of live and let live — free enterprise.

SANDERSON GI SAYS COLD IS WORST ENEMY

San Antonio, Feb. 12 — A 22-year-old Sanderson soldier, recovering in Brooke Army Hospital from wounds suffered in Korea, believes the biggest battle in Korea is "the cold weather you must face."

Pfc M. R. Forney, friend of Mr. and Mrs. M. A. Robertson, was wounded the morning of January 7, when a sniper's bullet struck him in the left side, cutting through his intestines.

Forney was with the 13th Combat Engineers in Korea establishing a line of resistance 180 miles from Tagu. The unit was cut off from its supply line for a week, and was receiving food by air drop.

The men were quartered in a schoolhouse, and periodically they would scan the sky for airplanes.

On the morning he was wounded, Forney had stepped out into the school yard. A sniper fired a single shot, and Forney fell. He was taken back into the schoolhouse, and soon afterward was evacuated when the supply lines were reopened.

Forney said he never knew where the guerrilla sniper was located. "He fired three or four more times, but didn't hit anyone," he stated.

He was overseas when the Korean conflict began, but had been in Korea only three months when he was wounded.

He first enlisted for two years but when that enlistment was concluded he was in Japan, so he re-enlisted.

SP BUYS 7,000 NEW FREIGHT CARS

Purchase of 7,000 more freight cars has been authorized by Southern Pacific. It was announced last Friday by President A. T. Mercier, following a meeting of the railroad board of directors in New Orleans.

The new cars, he said, will be constructed in Southern Pacific shops and under contract by car building companies. They will supplement 8,650 ordered in 1950 of which more than 3,000 are in service with the bulk of the remainder scheduled for delivery by the end of July.

The 7,000 cars will consist of 5,000 box cars, 1,000 gondolas, and 500 hopper cars. The new authorization brings to 35,900 the number of freight cars acquired or authorized by Southern Pacific since the end of World War II.

Acquisition of the additional large number of cars, Mr. Mercier said, is a further step to meet the expanding needs of industry and agriculture in territory served by SP and the increase in freight traffic resulting from the present national emergency.

From 1949 to the end of 1950, it was pointed out, Southern Pacific by acquiring new and larger cars increased the carrying capacity of its freight car fleet by 33 1/2 per cent compared with the national average gain of 6 per cent. With the additional new cars the company's percentage of increase in carrying capacity will be raised to about 50 per cent.

SCHOOL WEEK TO BE FEATURED AT LOCAL PLANT MAR. 5-9

Supt. Matt Bader has announced that, in accordance with the Public Schools Week proclamation by Governor Allan Shivers and the insistence of the Texas Public School Agency, Public Schools Week will be observed here the week of March 4 through March 9. Appropriate programs have been arranged in the schools for the observance, according to Bader.

Supt. Bader stated: "Public School Week will be observed by all teachers in the system by carrying on class discussions of the importance of the American Free Public Schools and as to how it helps to foster democracy in our country. Teachers have been asked to have students write papers on the value of the public schools and to express their own ideas as to their part in 'Democracy in action.'"

"We are in earnest when we ask the patrons to visit school and the classes during the week. We want them to come. We will not put on any special show in the classroom for the visitors but will go on with our regular routine work as we believe the visitors can get a more true picture of the school in actual operation than by putting on special acts or work for the visitors."

He stated that the band will parade in the down town section at 10:15 Thursday morning and play several numbers for the public after which Supt. Bader will invite the public to the high school auditorium for an assembly from 11 to 12.

The assembly will open with the playing of the "Star Spangled Banner" followed by the invocation by one of the students. The audience and band will participate in the singing of one or two songs after which Jack Hayre will deliver the principal address. Following the Pledge of Allegiance to the Flag the group will be dismissed by the singing of the high school song.

Almost to the entire list this paper has suggested and urged every last one of the proposed ideas, notwithstanding the phrase used by the contributor that "We all know from past experience that in your column 'Listen to Luke' you are, generally speaking, very seldom in favor of anything."

Herewith submitted is a bare-minimum tentative list. None of the points is discussed or enlarged upon. I am, however, prepared to argue in favor of any of the items either in print or in verbal debate, and invite sincere criticism or discussion from you or any of your readers.

Hoping you will see fit to use this letter and to carry out the suggestion as to the list, I am, Sincerely yours, WALTER G. DOWNIE

12. Active promotion of farm-to-market projects on the Dryden-

This newspaper is glad at all times to help get the people of Sanderson and Terrell County aroused to the needs of the community. Every worthwhile thing comes to us at a price we must pay - those suggested projects above would cost something and lots of time and effort. We think a suggested project should carry with it a suggested workable plan for its completion.

History Relived In Film Showing Of Half-Century News

Fifty years of events - military, sports, movies, political, historical - will pass before the eyes of local moviegoers on the screen showing next Friday and Saturday at the Princess Theatre when "50 Years Before Your Eyes", a thrilling photographic cyclorama of the half of the twentieth century ended, is shown.

Arthur Godfrey, radio and television star, heads the list of famous commentators who narrate the full-length film. The amazing compilation of actual scenes compressed with the laughs and excitement of the old-time movies the Keystone Cops, Charlie Chaplin, Ben Turpin, lover Rudolph Valentino, the fashions of a quarter-century ago or more, Mayor LaGuardia's reading of the Sunday comics over the radio.

On the historical side are many scenes one will never want to forget. President Roosevelt's greatest moments, the earliest appearances of Stalin, Hitler, Mussolini and the detachment of Japanese naval officers that paraded on the White House lawn headed by Admiral Nomura who thought he would be there one day on his own, not as a guest.

Sports, too, are liberally described, taking up the all-time greats in every field of sports.

The management of the theatre insures the patrons a very interesting and entertaining film in the presentation of "50 Years Before Your Eyes". The historic and popular events and personages will be recalled to many of the theatregoers, and to others items of interest they have heard of all their lives will be brought into vivid reality in the film.

Repeat Overload By Truckers Spur Fight For Law Enforcement

Austin, Feb. 26—More than 17,800 truck arrests were made on Texas Highways for overloading and other violations for the year ending August 31, 1950, according to a recent report released by Kent Odum, chief of the license and weights division of the Department of Public Safety.

8,447 cases were filed in justice courts throughout the state, charging the operation of vehicles with loads in excess of the 48,000 pound gross load limit and over 18,000 pounds of weight on each truck axle; 3,801 cases charging operation in excess of registered gross weight of the truck and 5,582 cases were filed for miscellaneous offenses, such as overlength, overwidth, driving while intoxicated and operating without permits.

According to the report, nine trucking companies were arrested more than 100 times last year. One Dallas firm with 265 arrests, was fined over \$5,000 for hauling more than a million pounds excessive weight.

The license and weights division of the Department of Public Safety is composed of only 32 inspectors, who must work in pairs patrolling the 36,840 miles of the Texas Highway System. During the period covered by Chief Odum's report, these guardians of the state roads checked more than 72,000 trucks and found one out of every four were violating the law.

Many states have found the only way to prevent these constant violations of overloading trucks on state and county roads, is by requiring the overloaded trucks to reduce the excessive weight to the legal limits before proceeding over the roads.

Texas has no such unloading on the spot law. A bill is now pending in the Senate designed to stop the practice of overloading trucks continuing on their way after paying a small justice court fine.

Mr. and Mrs. James E. Felts have moved to the George Turner house in the east end of town on Highway 90.

TEXANS ALERTED ON POLIO CRISIS

Austin, February 20 — Benefits even beyond the money raised to fight polio were gained from the 1951 March of Dimes, according to National Foundation for Infantile Paralysis officials.

They pointed out that the hard facts of the polio problem have been driven home to most of the state's 8,000,000 citizens.

"We don't know yet whether we reached our \$2,500,000 goal," said Ed S. Stewart of Abilene, state March of Dimes chairman. "We do know that the day-by-day problems in combatting polio have been carried to the most remote areas."

While campaign results in Texas are incomplete, Stewart said "A sizeable amount of money has been raised. We had hoped to wipe out the deficit from the three-year polio record. Furthermore, we need to establish a surplus for future emergencies. Above all, we have got to send in our share for research, something we have not been able to do."

Stewart said the campaign was hurt by unprecedented drought and by recurring bad weather. He praised the "uphill fight" made by the regular chapter staffs and the countless volunteer workers.

Meanwhile, the National Foundation for Infantile Paralysis, through Basil O'Connor of New York City, president, reported "an increased spirit of cooperation throughout the land" and added: "The third successive year of high polio incidence in the United States has made everyone aware of the need for redoubled efforts."

Some Texas communities over-subscribed quotas. In others, some with deficits from high polio incidence, the struggle for funds was not over.

Chairman Stewart expressed hope that the aroused public would not limit its polio support to campaign dimes but would follow through with its dollars "especially since the welfare of its own folks might be at stake."

New Score Board Installed In Gym At High School

Announcement was made this week of the installation of a new electrical score board in the high school gym by school officials. The actual erection of the score board was donated by R. E. Corder, local contractor.

The new score board, it was explained, automatically records in lights the score, the quarter, time to play and time outs for the fans to view. It will greatly facilitate score keeping and time keeping on the part of the officials, it was stated and would aid the spectators in keeping up with the game.

The board was purchased by the school several weeks ago because of the looming shortage of such equipment and the cable has not been received to complete the installation, according to the officials.

As soon as all of the installation work is completed, it will be made of the date and time for a basketball game which will be between the high school Eagles and some of the businessmen and ranchers of the area. It is hoped that cage fans will take advantage of the opportunity of seeing the new score board in action and also help to pay for the equipment by their attendance.
