In last week's Times, in the tory about the local telephone service, through error it was stated that Mrs. Rose Finley is the thief operator and cashier. It should have been Mrs. C. P. (Sale) Finley.

Vehicle Inspection Period Extended To September 7

Austin, Jan. 15 - Homer Garrison, Jr., Director of the Texas Department of Public Safety, announced today that the period for securing initial motor vehicle inspections in Texas had been officially extended until midnight, September 6, 1952. As originally specified, all vehicles would have been required to pass inspection before they could be registered on April

Garrison made the statement following an opinion issued by the office of Attorney General Price Daniel which ruled that the Safe- Facilities Additions ty Department might legally extend the inspection date, and that no inspection certificate would be necessary for 1952 registration.

Director Garrison had pointed out in his request for a ruling by the Attorney General that it would be impossible to complete an inspection of the nearly 3 1-2 million vehicles in the state by April 1.

Effect of the new action wi mean, according to Garrison, that all motor vehicles in Texas must be inspected and bear an approved sticker prior to next September 7th. Following that, a second inspection wil lbe required after Sep- for books for the high school were tember 7 but prior to April 1, 1953, before vehicles can be registered

George W. Busby, chief of the department's Motor Vehicle Inspection Divisioin, stated that he had, today, issued the 1000th license to official inspection stations and another 1,500 are currently in the process of being approved.

Generous Gifts Asked For Polio Fund

W. W. Sudduth, Terrell County chairman of the March of Dimes, is urgently requesting a generous response to the annual finance campaign for funds for the National Foundation for Infantile Paralysis, popularly termed, "The March of Dimes".

No letters have been sent out but "Iron Lung" coin receptacles have been placed in the local business houses and it is hoped that patrons will be constantly reminded of the need for generous support of the current drive. Waitresses in the local cafes and coffee shop are wearing receptacles on the belts of their uniforms and patrons are again reminded of the drive. Each establishment is contributing the sales of coffee for one day to the drive and the Sanderson Drive Inn is giving the proceeds of the shuffleboard and all of the proceeds of the nickleodeon for one day.

A five-milion deficit in the national fund makes generous response a "must" all over America and a low reserve in the local fund makes it necessary for the local half to be a big one, it was pointed out. "One or two serious cases in Terrell County would exhaust the present county chapter reserves," Sudduth stated.

Modern equipment has tive communities to visit class. rooms and to plan programs with the purpose of giving the pupils and the citizens a better understanding of the school program.

Public Schools Week was observed officially for the first time in Texas last March. In hundreds of communities thousands of citizens visited their public schools in groups. Manys visitors had not been inside schools in years.

Statistics compiled by the Texas Citizens Committee on Public Schools Week program revealed a great awakening on the part of the public to the problems of their local public schools.

SURE IS TRUE FOR '52 WHEN BETTER AUTOMOBILES ARE BUILT

"We did it Again!"

That's the jubilant news that comes from Flint to every Buick dealer-and here we pass the thrilling story on to you. It sure is true for '52 that better automobiles are being built - and Buick is building them. Read the good word and you'll agree.

TET's pare this down to plain statements of fact and let them speak for themselves:

The dynamic darling pictured here is the 1952 ROADMASTER.

It has the mightiest engine in Buick history.

It has the biggest brakes of any postwar Buick.

It is the quietest car that Buick ever built. It has the richest fabrics and smartest tailoring

that ever graced a Buick's interior.

It has the greatest trunk space since spare tires moved off the front fenders.

It has the most superb ride in Buick history.

It has the finest carburetor that Buick research has ever devised.

And with all its new power, it delivers more miles per gallon.

But that is not all.

For those who wish it, there is a brand-new version of power steering that works like a helping hand-gives you the same sure feel of control you have always known in straightaway driving-yet takes less than one-fifth the effort needed to turn the ordinary wheel standing at curbside.

Sure, we're putting our best foot forward when we talk about ROADMASTER.

But you'll find a host of notable features in SUPERS and SPECIALS too - plenty to make them, as always, the standout buys in their fields-for ride, for comfort, for style, for room, and for power.

Come in-look this triumphant trio over-and you'll know why every Buick dealer from coast to coast is going around with a smile on his face.

FIRST SHOWING SATURDAY

McKNIGHT MOTOR CO. SANDERSON, TEXAS

Get a supply in sight-saving sizes today!

Yes-the easiest way to end the bulbsnatching nuisance is to keep a supply of spare bulbs in assorted sizes always on hand.

Better stock up now with enough bulbs to fill all your empty sockets-plus several cartons of spares to replace burnouts as they occur.

Be sure to include the large sight-saving sizes that mean so much in eyesight protection. Eyes are priceless-good light is cheap!

Home-makers' FORT A Digest of GOOD IDEAS for Planning. Building. Decorating and Maintaining Your Home

Brought to you each week by Sally and Johnny O'Mala "Weather-Protect" your

DON'T WAIT! . . . INSULATE! There's no need to live in a refrigerator or in an oven.

Weather-protecting a house by installation of insulation and weatherstripping can reduce the heating requirement in winter by as much as 50 per cent. In summer, rooms will be cooler because insulation retards the flow of heat into the house just as it retards its exit in the winter. Weather-protection consists of insulation plus weatherstripping, and in extreme climates, the use of storm sash. The need for complete "weatherproofing" is greater than ever

today because our houses are less compect and more rambling, as is evidenced by the popular "ranch style" which is not only spread out, but has a low pitched roof, fewer interior partitions, larger windows, and often a slab foundation. All of these elements call for insulation. By all means, insulate when you

are building a new home; and if your home is already built, insulation will add to its comfort and value.

Even the most solidly built house needs insulation

4 Principal Types of Insulating Materials Loose Fill le e leose, lightweight insulating ma-terial made from mineral wood, wood thors, or vermiculite which can be blown, poured or packed. Plexible

Many people ask, "Why do we need insulation if our house is solidly built?" The answer, of course, is that even the most solid construction is no barrier to loss of heat. Heat flows through wall and roof materials, moving always from the warm to the cold side. The rate at which heat flows through various materials is sometimes designated by what is called the "K" factor. Briefly this means the amount of heat that will pass through one inch thickness of material, one square foot in size, in one hour, for each degree difference in temperature between the two sur-

Where to insulate

How your house is designed and constructed, as well as where it is located and how it is used determines where and how it should be insulated. Below are illustrated some of the main points to be observed:

Outside walls

ceiling, and un-derside of floors should be insu-lated, so that in-sulation envel-opes living area. Vent gables. with space beneath.
