A BIRTHDAY MESSAGE

WASHINGTON'S WARNING . . .

The amazing increase of \$3-billion in federal spending which is called for in President Eisenhower's budget is causing consternation and keen disappointment among all Americans who have looked forward to a reduction, at long last, in the unbridled spending of the too-often-remembered past.

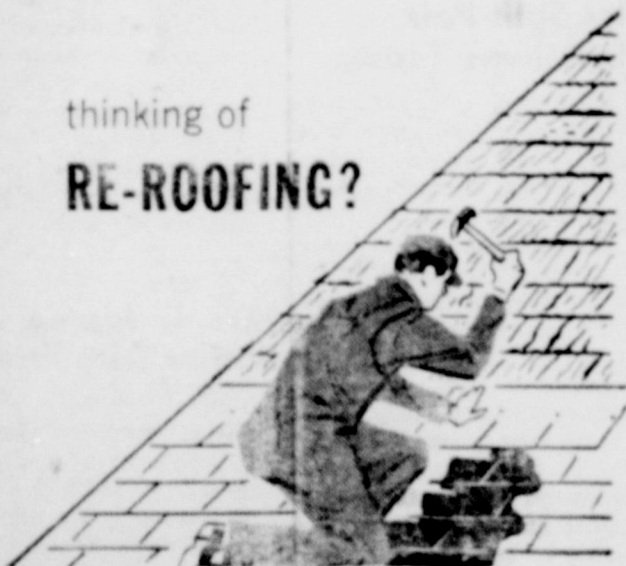

In addition, there is the discouraging fact that the Government is spending more and more on its domestic programs, where economy should be achieved.

The big increases in federal spending since 1955 are not in military spending, as many people believe. The President's proposed domestic spending for 1958 is some \$6-billion greater than in 1955, with the military spending only \$2.7-billion greater.

With the tense world situation, our country must be both militarily and economically strong. But if we are not domestically strong, how can we discharge the responsibilities of the international leadership which we have assumed?

On his birthday, the national capital named in his honor should resound with George Washington's warning that "as a very important source of strength and security" public credit should be cherished, and that "one method of preserving it as sparingly as possible."

Austin — Even in a water-minded legislature, passage of a state-wide conservation program apparently faces some rough sledding.

First hitch came when the House conservation committee voted to hold the \$100,000,000 Texas Water Development Fund measure for 14 days' study. Senate Water Committee had given it unanimous recommendation in less than an hour and a half.

Rep. Leroy Saul of Greer, sponsor in the House, was sharply critical of the delay. He said it could be "fatal".

Rep. A. R. Schwartz of Galveston, author of the delaying motion, said he thought a \$100,000,000 fund required some safeguard investments.

As now proposed, the development fund could later be increased to \$200,000,000 by a two-thirds vote of the Legislature. Another \$100,000,000 bond proposal to buy water storage in federal reservoirs could likewise be doubled. It means a potential of \$400,000,000 under the two plans.

As designed by its sponsors, the development fund would be self-financing, even show a long-range profit. They anticipate the state would receive more interest on the bonds it buys from cities than it has to pay on the bonds it sells.

But some legislators have pointed out that if a deficit should develop, it would drain money from the General Fund, straining the state's tax sources.

Two Revenue Bills

Despite the Legislature's early "wait and see" attitude on new taxes, two plans for new revenues have been introduced.

Re. Jerry Sadler proposed a "manufacturing tax" with an estimated yield of \$52,000,000 a year. It would levy one-eighth of one percent on gross receipts of manufacturing over \$25,000 a year including goods brought into Texas.

Two bills were introduced for higher tuition at state colleges. One, by Rep. Murray Watson of Mart, would double fees at state colleges, bring in some \$5,000,000 more a year. Another, by Rep. Harold Parish of Taft, would allow the college governing boards to set tuition. Basic fee now is \$25 a semester for Texas students.

"Ethics" Program Up

State Bar-recommended bills to curb influence peddling have been introduced in the Senate.

Sen. William Fly of Victoria sponsored the measures which would (1) prohibit a legislative member or candidate from representing a client before any state agency except the Industrial Accident Board and (2) abolish the mandatory continuance in trials where a legislator has been retained as counsel.

Sen. Searcy Bracewell offered a bill with stiff penalties for a state

official offering or accepting a bribe.

In the Mill

Other measures dropped on the legislative assembly line would:

1. Prohibit offering for sale any merchandise at less than cost if the number of units is restricted or the merchant refuses to sell to any "willing customer".
2. Require lobbyists to register with the Secretary of State.
3. Request the Texas Legislative Council to investigate the small

loan business and report in 1959.

4. Create a state municipal planning board to assist smaller cities in getting federal aid for slum clearance.

5. Set aside 11,000 square feet of space for state archives in the soon-to-be-built State Courts building.

6. Revamp the law to put into effect a paid adult probation and parole system.

7. Gives Texas citizens and bus-

Clings to the road like a stripe of paint!

The '57 Chevy can give lessons on taking curves and holding the road to just about any car going. Few cars at any price are so beautifully balanced and so smooth, sure and solid in action.

A car has to have a special kind of build and balance to keep curves under control. And nobody outdoes Chevrolet in that department! It "corners" with all the solid assurance of an honest-to-goodness sports car. Chevy doesn't throw its weight around on turns because it carries its pounds in the right places.

And if the road should turn upward, Chevy can take care of that nicely, too—with up to 245 h.p.*

Come on in and take a turn at the wheel of a new Chevrolet.
