NUMBER 34

# ISTEN TO LUKE

This week is set aside as National Newspaper Week and much is being written in all the newspapers of the country conterning the observance.

This newspaper appreciates the kind words that have come from time to time to express appreciation of our efforts in bringing the hometown news and for the work we have tried to do as community service in all of the affairs that have to do with the betterment of the community.

Frankly, we prefer our occupation to any other job in town.
We like to feel that we might, in some way, be able to assist in the development of the communay and the affairs that will make for a more united citizenship in any undertaking of pro-

We know we have failed in so many ways where we might have given more time and effort. But being human, we expect to err. Our happiest moments, however, come with the realization of doing our best for the interests of Terrell County and our entire country.

There are times, almost all of the time, when we have to face the realities of life and have to devote a great deal of time in trying to get the part of our work that is required if we can continue to operate and eat regularly—the advertising—that is necessary in this or any other awspaper if it continues to operate

While we like to feel that we are accomplishing something for our reader area, we also like to feel that we are accomplishing in the way of business progression in the accumulation of the material things that we deem vital and necessary.

There would be few, we hope, who would want to live here without the services of a newspaper. There can be little known about the work of the various organizations and individuals of the county if it were not for the newspaper to let the people know about their plans.

Some organizations, in some places would like to get some project promoted and carried to ompletion on a closed-door basis so that they might be able o get credit for doing a good job. That idea will not work. We all want to have better conditions in Terrell County, such as schools, roads, housing facilities, medical facilities, recreafional faciliteis, etc. It is necessary that there be some means informing the good public of the details if such things are to ome about.

The facilities of a newspaper are open to all groups of people and readers. There are certain facilities for which we must ask fees, and there are certain facilities for which we cannot be paid. Any persons who falls to take full advantage of these facilities is doing himself an injustice.

A project of any organization that is not worth reporting, is not worth undertaking. Any item that is not worth advertising is not worth stocking.

# Peculiar Pigeons Are Aerial Acrobats

Along about 6 o'clock every evening in the neighborhood of Mr. and Mrs. S. H. Underwood, one might see the aerial antics of some peculiar pigeons. The birds are called "tumbler" pigeons.

Robert Carle brought the birds to Sanderson when he came back after a session at summer school and gave the birds to the Underwoods when they moved from Sanderson in August.

The birds fly like ordinary pigeons for several minutes when they are turned out and then begin their series of antics. They roll forward, or tumble forward, in flight and repeat the roll possibly immediately or after a short interval.

Persons who have not seen the tumblers in action have a surprise in store when they see them for the first time because of the oddity of their flight actions.

Dove hunters would have an interesting time, indeed, shooting at a group of game birds crossed between the mourning dove and the "tumbler" pigeon.

What we wonder most is, who was able to train a strain of birds to perform thus, how, and why?

# Correctio

In last week's Times it was stated that the Baptist W.M.U. met in the home of Mrs, L. H. Lemons. It should have been Mrs. Emmett Young.

# Texas Press Head Urges Public Visit Local Newspaper

Jimmie Gillentine, president of the Texas Press Association, adged all Texans to visit their hometown newspaper sometime this week in the 18th annual observance of National Newspaper Week.

"We want all newspaper readers to have an opportunity to witness the actual operation of a newspaper plant during the week of October 1-8," emphasized Gillentine, who is also publisher of the Hereford Brand.

"Texas newspaper men and women, who devote a great deal of their time and talents each year to the success of special weeks, will be reflecting, in their columns and news stories, thoughts on the Constitutional guarantee of freedom of the press and the threats to it," Gillentinne continued.

"Many will remind their readers of the first threat which ended in the classic trial of John Peter Zenger in 1735, and firmly established freedom of the press," the TPA president pointed out, "and others will review present day threats, represented by secret or closed-door meetings of public bodies."

Gov. Price Daniel, in an official proclamation honoring the Texas Press Association, succinctly summarizes the importance of this basic freedom:

"Our Constitutional guarantee of freedon of the press is a guarantee of an individual's right to own and control a printing press without subservience to the government. That guarantee established the fact that a free government of free men does not need to live in fear of the thoughts and words of its free citizens."

Thomas Jefferson once said:
"Were it left for me to decide
whether we should have a government without newspapers or
newspapers without government,
I should not hesitate to prefer
the latter."

Gov. Daniel seems to concur when he says, "the freedom of America depends on the freedom of the press. The free flow of information to the public is essential to the preservation of our American way of life, and we must continually be vigilant against any efforts to impede this freedom of information."

#### JOE LITTLE INJURED IN PLANE CRASH

More Taxes, Says Board

Even before the oil slash, the Legislative Budget Board has some hard facts to share with Texas taxpayers.

By 1958, says the Board, the average Texan will pay 6.4 cents of each dollar he earns, in state taxes. This is compared to 5. cents per dollar in '57.

It's the inevitable result of : billion-dollar-a-year budget, say the fiscal experts. They attribute the soaring expenses to inflation and citizen demand for more government services.

As to paying for it, the Board says "All taxes ultimately come from the individual. There's no one else to pay them."

On the brighter side State Comptroller Robert S. Calver reported the state started the new fiscal year this fall in the black. Calvert's report showed Texas took in approximately \$100,000,000 more than it spent up to August 31. "Bug" On The Loose

What's your answer? Suppose it's your child. How often have you said (or heard friends say), "I wouldn't take a million for that kid!"? And then discover a week later that neither you nor your friends were willing to put out just a few dollars to get needed school facilities for that same child!

Doesn't it surprise you to find that the value of a child can vary from priceless to less than a few dollars in a matter of days? Well, not really, because it actually doesn't. It's just that oftentimes

we tend to forget that our children and their futures are pretty closely tied to the kind and quality of the education we can give them. Their future and thus the future of our country depend on your support. Let's see to it that the children of our community get the education they deserve. In the long run it costs less.

PRESS ASSOCIATION

# A NEWSPAPER WAS A RARITY IN MANY AMERICAN COMMUNITIES

Then—a newspaper was a thing to be marveled at
—for memories of the Press' fight for freedom were
fresh in mind. Although newspapers are common
in our country today, their existence should not be
taken for granted. It is a wonderful fact that almost all of our modern communities have their own
hometown newspapers, freely edited by members
of their own communities—spreading the news,
stimulating the business of the community, and
keeping their readers informed of important events
elsewhere. It is well to keep in mind that a free
press and a free people are an unbeatable team.

# Listen to Luke

As we feel proud of ourselves during National Newspaper Week for being a member of the great family of American newspapers that have done so much to preserve the freedom of our country, we also feel humble to all of those who have supported us in our efforts by kind words as well as those who have helped us by their patronage.

Despite the fact that our pages are fewer than most other newspapers, we have some distinctions - we serve the best people in the world-our friends; we have the good will of the best people in the world - our friends - we are the only newspaper in the world that cares about the future of Terrell County - and our columns are just as wide as the rest of the newspapers of the world.

Last Sunday this columntator and others from Sanderson were in Alpine to visit the new hospital on opening day. The hospital is a credit to any town and Alpine is to be congratulated for this magnificent addition. It reflects the untiring efforts of the good people of that county who were determined to give something for the town they love and for the good of the community in which they live.
