## TV Practically Assured Here

Television has been practically assured for Sanderson within the next few months, according to information received recently. The Sanderson Cable Co. has been experimenting for some time with a tower erected just north of town. Cable has been strung to bring the reception in to the Big Bend Gas Co. and the reports are that that group has ordered the installation of a 440-foot-high tower at the site of the present tower to increase the potential reception from a Midland station.

The reception received from the present installation has been spasmodically from good to poor and topography tests indicate the probability of much better reception with the increased height of the receiving tower.

Spokesmen of the company stated that it was their intention to continue improvements until satisfactory reception was assured. The group that has been working with the possibility of local reception by the use of a translator unit, have reported gratifying results from recent tests and information from engineers of the translator manufacturing company who also install the unit.

An excellent quality of reception has been consistent on a mountain west of the S. L. Stumberg ranch house and tests have proved the possibility of line of sight transmission to a hill south of Sanderson and engineers state that relay into the town is available under the conditions that are listed above.

Complete plans and specifications will be received by the engineers within a short time. The group reports that both Midland and Odessa may be received and transmitted from the site and the possibility of receiving both locally will depend only upon the advisability of the funds necessary for reception of the two stations.

## Christmas Seal Receipts Lag

Judge R. S. Wilkinson, seal sale chairman, has reported that local donations to the Terrill County Tuberculosis and Health Association from the Seals are coming in very slowly. To date only \$130 has been received. An urgent appeal is being sent out to local citizens to mail or bring in their contributions at an early date.

Receipts from the annual Christmas Seal Sale are used in a year-round campaign to control and abolish tuberculosis. There is no other source of income for this purpose. Since tuberculosis attacks all age groups at all economic levels of society, it is of vital importance that an educational program be carried on, in addition to medical treatment. The disease can be prevented and wiped out, as other scourges have been in the past, if people will support the programs now being carried on in their behalf.

"ALMOST, BUT NOT ENOUGH" is our verdict on how close competitive cars have come to matching the Swept-Wing 58. Take style. Other new cars are "almost" as low in inches, but still seem high and boxy in looks. Some of them are "almost" going to fins, but not enough to really make a difference. Then take performance. None of the other 1958 cars have anything to match the sway-free, dip-free, vibration-free ride of Torsion-Aire. (It's standard equipment.) Most of them still don't even have push-button driving! ## CHEVY'S TURBO-THRUST V8 WITH TURBOGLIDE

The Bel Air Impala Sport Coupe—one of two new super sport models!

There's never been an engine-drive combination like this one!

Chevrolet's Turbo-Thrust V8\* introduces a radical new slant on engine efficiency with the combustion chambers located in the block rather than in the head. Turboglide\*—the other half of the team—is the only triple-turbine automatic drive in Chevy's

field. It takes you from a standstill through cruising in a single sweep of motion. Harness these triple turbines to a 250-h.p. Turbo-Thrust V8—or the 280-h.p. Super Turbo-Thrust\*—and you step out instantly in any speed range. Nothing else on the road goes into action so quickly, so smoothly. Your Chevrolet dealer has the combination!
