# ISTEN TO LUKE

The local Methodist Church, of hich I. in a manner, am a memer, had a guest speaker and also wed refreshments before the rening service last Sunday even-The repast consisted of any nd all kinds of sandwiches and lads, desserts of all kinds, tea nd coffee. The feed and the serice were both good and we wish e would be more of both. Usually a feed of this nature is ed a "covered dish" dinner. ere every possible kind of food

prepared by the ladies of the

What gets us stumped is a true accurate definition of the "covered dish". True, some the dishes brought are covered a great majority ol them are It seems that the ladies who responsible for providing the oceries at our church always w what to bring so that all the erent appetites may be satised There are those, for ince, who like green beans, and re are those who like meat f and we could go on and on still find the variety needed Yet, after all the covered dishes uncovered, we find that there ample for the number to be and also an assortment that ald satisfy almost anyone

Nature has been kind to the man race in that there are alys some in a group who will the very things that I would n. As an illustration, meat loat I might say, edible, that is for e people, Many years ago I ded against meat loaf for afabout the third day with the e meat loaf set before me I me bitter toward the dish. It looked like meat loaf and sted like meat loaf. I had a re to throw it out to the dog ut I thought too much of my own g and had no desire to embitmy neighbors' dogs against so I found it necessary to ddenly become ill and express need for soft-boiled eggs or anything for a change.

There was a day when family sups seemed to enjoy packing basket and going somewhere to njoy" a pienie lunch. That provsuccessful to a degree, but ere was always the problem of good place to go. Usually there as at least one in the group who ew just the right place to go nothing short of murder ild have changed his or her and When we would finally get the selected spot either all the ace would be taken or things d changed so that it wasn't such good place after all. Then uslly there would be a Presbyterchild in the group which ould take all the joy out of the ing I don't mean that the aild necessarily belonged to the esbyterian Church, but he was initely afflicted with the docine of predestination. He was redestined to get into something t would make the affair uneasant. For instance, if there ere a yellow jacket nest nearby at particular child was predesned to find it and attempt to exine it with the result that he ould end the day with welts all er his face and his eyes swollen

Then, too, one trouble with picicing, there was always the posbility that someone forgot to ring the ice for the tea, a grassopper would land in the middle the potato salad, bugs would wariably fly between the morsel food and your mouth just at e wrong time, or the dust would art blowing just as it was time start eating. After all, I believe ood is better where one can sit own to a comfortable table and in peace.

Back to the food question, just few years ago there was an aundance of muskrats in the Panandle country and there were se who thought they might be dible and good food would be

# **School Burglary Last Friday Night Causes Small Loss**

The Sanderson High School was burglarized Friday night, according to Supt. Matt Bader, and considerable damage was done in gaining admission to various rooms in the building and because of pilfering within the

Admission was gained through the door in the hall on the southwest of the lower floor by breaking a glass pane and reaching in to trip the night latch.

The superintendent's office principal's office, and several of the class rooms were entered and the burglar or burglars left papers and various items strewn around inside the rooms. There was extensive pilfering in the homemaking rooms, Mr. Bader

The burglary was discovered by Mr. Bader Saturday morning when he went to his office for some work.

Local officers were notified and at press time there were no suspects of the burglary appre-

# **Four More File For School Post**

Besides the present seven persons who comprise the Terrell County Independent School District Board of Trustees, there are four more applicants for pocitions on the board, according to A. J. Hahn, Jr., secretary of the

The four who have filed for positions on the board are: W. G. Downie, Mrs. Irvin Robbins Herbert Cates and Jack Deaton

The present board members are: Herbert Brown, Hahn, Ed Kerr, J. T. Williams, Jack Hardgrave, F. M. Wood and Dudley Harrison

There will be seven people named to the board at the election to be April 4. The seven candidates receiving the highest number of votes will be elected.

A run-off could be necessary because of a tie between two or more candidates which would not give a clear naming of the complete slate of seven, such as a tie between the seventh and eighth highest candidates.

At the same time, but on an other ballot, county trustees wiil he named from precincts two and four

The school district board will be named from a county-wide

#### **Building Program** Considered By L-A Methodists

dent of the board. Mr. Cooke stated that of about six companies heard, the First of Texas Corp. had far the best proposal to offer the local water district and legal advicee given the board was that the contract was very sound financially and in a

business way also. Mr. Cooke stated that he was proud of the advancement the directors had made in the securing of information and of the progress the board had made in bringing the purchase of the

utility closer to a reality. Cooke stated that he felt the urgency of the issue was more imminent with the growth already made in Sanderson and with the potential and probable growth that was expected here. The purchase of the water utility, he felt

The water board has completed all negotiations with the T&NO Railroad to take over their complete water system at a very nominal fee, and all arrangements have been made to utilize the soon as the water district has the

power to buy and sell water. As has been pointed out many times, the acquisition of the water system of the railroad will almost double the present water supply. It will also make possible the pumping of more water at less expense, it will offer storage for additional water, it will offer the opportunity for sale of water back to the company at far more revenue than the price of

the lease of their water system. Cooke concluded with the statement that the feasibility and possibility of the purchase of the water utility, and the probability of the system being self-sustaining was much nearer a reality and actuality than at any time previously. He says there is much enthusiasm in most circles over the possibilities of the entire over-all plan and asks that all qualified tax-paying voters who do not know or understand the details of the proposals to contact him or the other members of the water board whe are: Ed Kerr, M. # We put the light in Your window

Had you come 25 years ago young fellow, your light would have been a kerosene lamp. But your Dad and a lot of other folks like him organized an electric cooperative and built their own electric system. It was the only way we could get electricity in our rural area.

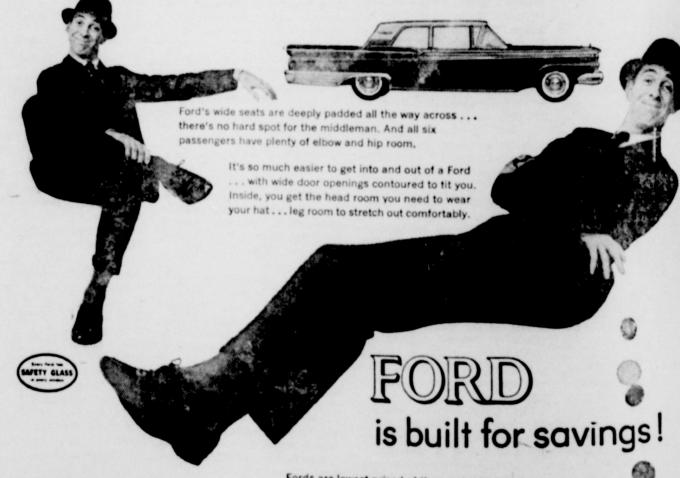

Now you are going to have to help guard it. Some people would have you think the government built the system and gave it to us. That isn't true. We borrowed the money and we are paying back our loan with interest. Our cooperative is a business managed, tax paying partnership and we are happy to welcome you as a member. Because the Cooperative brought electricity to your farm you'll lead a healthier, happier life.

Grow strong young fellow. You'll want a light in the window some distant night when your son comes into the world.
