LISTEN TO LUKE

While we were sitting around watching the deer hunters go by both ways — this week, we had a little reminiscing about our light and the possibility of a few resolutions to break during next year.

We can remember when — and wasn't long ago — when many local citizens had visions of grandeur for the future of our little town. We heard the magic word "GAS", and we saw much money being spent in this area by pipeline crews, seismograph, and other type of explorations crews.

There were those who considered a road across the mountains to the plant to bring all of those people here to shop, to make a road for the school bus to decrease the travel time for the pupils out there.

We also had visions of grandeur about a gold-coated or maybe even a solid gold school system with many improvements.

We envisioned curb lined streets and sidewalks, maybe a sewer system, and many other improvements as a result of the magic word.

Some people were interested in floating bond issues to begin spending money before it ever started coming in, since no vault would be big enough to hold it. Yes, we joined in many of these dreams for the improvements for the town in facilities, services, and growth as a result of the magic word. We even had visions of replacing our old Model L Linotype, built in 1917, and our old Pony Cottrell press, antedated in history, buying a new two Mixer, an automatic press two, and having a building all our own and big enough to house increased machinery and employees and big desks and office space for "the boss".

Yes, we had a few dreams!

The bubble hasn't burst, yet, it's growing mighty thin!

Having set in on a few tax savings, having kept up fairly well with the increase in the income of the county and schools, and seeing the increases in the costs of everything that is purchased, and coming to my senses because of the realization of the picture of things, we have had a few of our dreams.

The main thing that awakens a person to reality of such things is the condition of persons, buses, and the schools and the county, is to look at the bank account.

There are people here who are of the opinion that Terrell County, the schools, and the citizens and their citizens all would be rolling in wealth and spending money right and left in improvements.

Frankly, we are glad that suchightedness were not understood, that those in charge of purse strings of the various organizations and governments have taken a realistic look into the future and into the bank being jumping out on a limb.

It is unlikely that the county's — Continued to Page 4

Army Enlistees Guaranteed Job Suitable to Them

"How can I know I'm qualified for the job training I choose?"

According to SFC Billy G. Dart, of the Army Recruiting Service, it's important to you — and to the Army — to make sure you are suited for the job in which you will be trained. This is determined with aptitude tests, which measure your potential ability to do well in a given area.

"This way you know that the odds are for you before you begin; but the final success, of course, depends on your own efforts.

"When you enlist in the Army you choose the job training you want. Then you're given aptitude tests, to make sure you're qualified to take the training you pick. We check, too, to make sure there's an opening in the course of training you select.

"This way you know you are qualified for the job training you choose. You know you'll get it, too. You can be sure of this because the Army gives you a written guarantee for the technical training of your choice, before you enlist.

"There's no obligation, even after you get the guarantee, so drop by my office and I'll tell you more about it," Sgt. Dart stated.

Sgt. Dart can be reached at 243 S. Oak St., Pecos, Texas, or by calling HI 5-2600, collect.

Listen To Luke - Continued from Page 1-

Residents will ever know what it is like to have millions for their disposal. Most unlikely unless there is a sudden change from the present outlook. And we don't know but what maybe it is a good thing. Counties, like people, sometimes have a way of not knowing what to do with prosperity because they never knew what to do with mediocrity or poverty.

Some people, too, have a way of making fools of themselves over money and what it can do or power and what it can do. And we like too many people here to see them made fools of.

I wouldn't trade my little town For a dozen Empire States, Or a hundred other buildings With their stories piled like crates.

Our little town's just big enough For me to feel a part, And still it is just small enough To hold close to my heart.

CHEVROLET... on the road every day! ITS RELIABILITY COMES FROM ITS QUALITY A nutshell description of Chevrolet trucks could be "Trucks That Work". It's not exactly earthshaking but it says a mouthful. It's what Chevrolet trucks are best known for - their reliability. Ready to work, day after day, whenever you are. You can't build trucks that perform like this if you don't put quality into engine, chassis and body. Chevrolet does: double-wall construction, insulated cab, select-wood body floor, chain-supported tailgate, ladder-type frame, the careful attention to upholstery and finish. It's this kind of quality that makes any Chevrolet truck - from pickup to heavyweight tandem - worth more on the average at trade-in! 2 NEW 6-CYLINDER ENGINES New High Torque 230-cu.-in.
